DANON, JOSEPH BEN JACOB BEN MOSES IBN: Hebraist and Talmudist; born at Belgrade about 1620; died at London toward the end of the seventeenth century. He was descended from an old Spanish family which had settled at Belgrade several generations earlier. Having received an excellent education, he became the secretary of Joseph Almosnino, rabbi of Belgrade. When Belgrade was taken by Prince Max Emanuel of Austria (Sept. 6, 1688), Danon, with the greater part of the Jewish community in that city, was exiled. He maintained for some time a precarious existence in various Moravian towns, dependent sometimes upon public charity for food and shelter. He finally wandered to Amsterdam, where he received aid and protection from the Mæcenas of Jewish learning, Joseph Ẓarfati.

Danon now devoted himself to literary pursuits, and wrote a work entitled "Sheloshah Sarigim" (Three Branches), a treatise on the three foundations upon which, according to the Talmud (Abot i. 2), the world is based—the Law, Worship, and Charity. The first part only of this manuscript work, with its preface, is still extant. During his residence at Amsterdam he composed an index of the abbreviations found in Hezekiah de Silva's "Peri Ḥadash," a commentary on Joseph Caro's Shulḥan 'Aruk. At the death of his protector, Danon settled in London, where he remained, highly appreciated, until his death.

L. G. I. Br.

DANON, MEÏR BENJAMIN MENAHEM: Rabbinical writer, and chief rabbi of Sarajevo in Bosnia; lived in the first half of the nineteenth century. He wrote "Be'er ba-Sadeh" (A Well in the Field), a supercommentary on Rashi's commentary to the Pentateuch, and on its supercommentator, Elijah Mizraḥi. It was published in Jerusalem in 1846.

Bibliography: Ḥazan, *Ha-Ma'alot li-Shelomoh*, p. 13.

L. G. M. Fr.

DANON, YOM-ṬOB: Author and rabbi of Smyrna in the first half of the nineteenth century. He went to Jerusalem in 1821, where he succeeded Joseph Ḥazan as chief rabbi. He wrote "Kebod Yom-Ṭob," a commentary on Maimonides' "Yad ha-Ḥazaḳah" (Salonica, 1846).

Bibliography: Ḥazan, *Ha-Ma'alot li-Shelomoh*, p. 51b.

L. G. M. Fr.

DANTE, ALIGHIERI: Florentine poet; born 1265; died at Ravenna Sept. 14, 1321. Dante took an active part in the political feuds then distracting his native city, and in 1302 was banished. From that time on he lived in exile, enjoying from time to time the hospitality of several princes of northern Italy, such as Can Grande della Scala of Verona and Guido Polenta of Ravenna. Dante's principal work is the "Divina Commedia." A few Hebrew words ("Hosanna," "Sabaoth": "Paradiso," vii. 1; "El," "Eli," "Malacoth": *ib.* xxvi. 134; "De Vulgari Eloquentia," i. 4), and the two hitherto unexplained and perhaps inexplicable passages ("Inferno," vii. 1—"Pape Satan, Pape Satan, aleppe"; and xxxi. 67—"Raphel maï amech, zabì almì"), have led to the assumption that Dante understood Hebrew; which, however, is contradicted by his own testimony ("Paradiso," xii. 73). Dante's "Divine Comedy" served as a model for his contemporary Immanuel ben Solomon in the closing (twenty-eighth) chapter, "Tofet we-'Eden" (Hell and Paradise), of his "Divan." Mose de Rieti's "Miḳdash Me'aṭ" (Little Sanctuary) can not unreservedly be considered an imitation of Dante's "Paradiso."

In spite of Kraus's objections (see his "Dante, Sein Leben und Sein Werk," p. 146), it seems certain that Dante entertained friendly relations with Immanuel ben Solomon. Whether the two poets became acquainted at the court of Can Grande in Verona, where Immanuel also stayed for a while, or at the house of their common friend Bosone in Gubbio, can not be ascertained. Their friendship is shown by an exchange of sonnets between Bosone and the Jew Manoello (*i.e.*, Immanuel), in which Dante's death is bewailed. An alleged exchange of sonnets between Cino da Pistoja and Bosone, in which Cino transfers Dante and Manoello to the Inferno, while Bosone defends both, is spurious. From this it appears that the close personal relations between the two poets was a matter of common knowledge to their contemporaries. Concerning the question as to whether Dante is alluded to in the character of Daniel in the 28th chapter of Immanuel's "Divan," in which the poet is led through the Inferno and Paradise, see IMMANUEL BEN SOLOMON.

G. H. V.

DANZ, JOHANN ANDREAS: German theologian and Hebraist; born at Sundhausen, near Gotha, 1654; died at Jena Dec. 22, 1727. Danz studied at Wittenberg and at Hamburg, where he learned Hebrew under Esdras Edzardi; and he became professor of Oriental languages at the University of Jena, at first in the philosophical, and after 1713 in the theological faculty. He was considered the greatest Hebrew scholar among his Christian contemporaries. Danz wrote several text-books on Hebrew grammar, which for nearly a century remained standard works. He is the author of "Nucifrangibulum Sanctam Scripturæ V. T. Linguam Hebraicam Enucleans," Jena, 1686. This first edition contained two parts, the first treating of the etymology, the second of the syntax, of the Hebrew language. In the following editions these parts were published separately: part one under the title "Literator Ebræo-Chaldaicus," Jena, 1694, 1710, 1715, and 1745; part two under the title "Interpres Ebræo-Chaldaicus," Jena, 1694, 1708, 1710, 1755, and 1796. The "Nucifrangibulum" was followed by "Spicilegium," *ib.* 1689, and "Rabbinismus Enucleatus," *ib.* 1696, 1751; Frankfort-on-the-Main, 1761.

His most popular work, however, was his "Compendium Grammaticæ Ebræicæ-Chaldaicæ," Jena, 1699, of which numerous editions appeared. It was translated into German, under the title "Hebräische und Chaldäische Grammatik," and edited, by G. Kypke, Breslau, 1784. Among his works on Hebrew antiquity may be mentioned: "Antiquitas Baptismi Initiationis Israelitarum Vindicta," Jena, 1710; "Pluralitates Personarum Divinarum Genesis i, 26," Jena, 1710; "De Sinceritate Scriptorum V. T. Suspicio Errorum in Decade Exemplorum, Abrabaneli," etc., Jena, 1717.

DANZIG (Polish, **Gdansk**): Capital of West Prussia. The Jewish population of Danzig in 1895 was 2,474, in a total population of 125,605.

The Five Congregations.

The oldest document concerning the Jews of Danzig, a charter of King Casimir authorizing two Jews, Zub and Michael, to trade in Prussia, bears the date of 1476; although Jews may have lived there in the preceding century. It is probable that the Jewish merchants who came to trade with Danzig were accustomed to land their merchandise outside the town, and return to their homes after having finished their business. Yet a great many of them were invited by rich merchants of Danzig to come to the town to translate letters written in Hebrew or to superintend the preparation of kasher-wine. The authorities took no notice of this, and therefore the Jews are not mentioned in any official document till the second half of the fifteenth century. Until 1813 they lived in the four suburbs of Danzig—Schottland, Weinberg, Mattenbuden, Langfuhr—and in Danzig proper, thus forming five distinct congregations. They maintained this division into separate congregations until 1881. Schottland was founded in the second half of the fourteenth century, and it appears that Jews settled there soon after its foundation.

The commercial success of the Jews aroused the envy of the inhabitants of Danzig, and in 1551 the "voyevoda" (governor) of Danzig wrote a petition to Sigismund II. asking him to exclude the Jews from Danzig, except on fair-days. In 1552 he received a favorable answer, and, as a preliminary measure, Jewish commerce was heavily taxed. The authorities of Danzig appear to have placed an arbitrary interpretation on the edict, for in 1616 the burgomaster of Danzig was ordered by Sigismund III. to pay Isaac Joenbower of Cracow, Abraham Solomon of Posen, Jelen of Lublin, and Wolf of Lemberg a fine of 100,000 gold pieces for arbitrary exclusion. There are other documents showing that the "Privilegium Casimirianum" was not strictly observed. In the "Regesty" (i., No. 643) it is mentioned that on April 25, 1583, the Jew Abraham Shmoilovitz of Burov brought lumber to Danzig; that on the 28th of the same month the Jew Mendel Urelovichsh of Brest brought in 235 barrels of grain; and that on different days of May in the same year Shmoilovitz brought rye, wheat, barley, and oats.

The Suburbs.

The life of the Jews who settled at Schottland soon after its foundation was very precarious, and they were subjected to incessant and petty persecutions on the part of the non-Jewish inhabitants. In 1508 the council of Danzig enacted a fine for buying anything from a stranger. In 1520, when the German troops were marching against Danzig, the citizens burned the suburbs. Whenever an enemy approached the town, those who lived in the suburbs were generally the first to suffer. In spite of these difficulties the Jews of Schottland contemplated forming a congregation, and, indeed, they united themselves with the Jews of Hoppenbruch, a small town near Danzig, and acquired a synagogue and a cemetery. The Jews of Weinberg and those of Stolzenberg formed the congregation of Weinberg. There were Jews in Danzig also, some being under official protection, while others lived there with the connivance, but without the permission, of the authorities. An edict of the council, dated 1605, prohibiting the Jews from meeting for religious exercises, reveals the presence of a community in Danzig itself. In 1616 the Jews were expelled from the town, their presence being permitted only during the six days of the Dominik fair, a fee of three florins each per day being exacted. In 1626 the council accorded certain privileges to Jewish lumber- and grain-dealers, and the "Privilegium Casimirianum" was renewed in favor of certain Jews.

The Reformation.

After the Reformation the situation of the Jews of Danzig grew worse. The contending religious sects were united in oppressing them, and the Reformation produced new efforts for their conversion, which efforts, however, as it appears from a sermon by Pastor Cramer (printed in 1664), were without success. The preacher lamented that a Jew, though sentenced to death, would not embrace Christianity. As the position of the Jews was not legally secured in Danzig during the seventeenth century, they dared not form a congregation. It was only at the beginning of the eighteenth century, when Danzig was stricken with a succession of calamities, that their were admitted to the town to revive its commerce. But they did not enjoy that hospitality for long. About that time the Jews were driven from the bishop's domain, and the fact of their finding a refuge at Danzig roused the anger of the bishop. He protested before the council of Danzig, and, not obtaining any satisfaction, he incited the mob against the Jews. This happened in 1723, and there is no further mention of Jews in Danzig until 1747. Those of Schottland had, by 1724, a well-organized congregation. They founded in that year a society for the aid of the sick and a ḥebra ḳaddisha. The register of the latter was kept in Hebrew from 1724 to 1848.

Re-settlement.

In 1750 Frederick Augustus permitted the Jews to settle again in Danzig, though they were subject to heavy taxes. The Jews of the three suburbs of Schottland, Weinberg, and Langfuhr steadily increased in number. In 1757 the congregation of Schottland numbered 46 contributing members. In 1767 its expenses amounted to 4,644 florins ($580); in 1768, to 6,117 florins ($764); in 1772, to 13,139 florins ($1,642), when the congregation had two synagogues. Till 1777 there was no physician for its hospital, but in that year it engaged Phoebus, the son of Meshullam of Prague. In 1752 the congregation elected as its rabbi Elhanan ben Samuel, formerly rabbi of Fordon.

The congregation of Langfuhr settled in that suburb when it was still under Polish protection. The Count of Weiher, owner of that domain, permitted the Jews to settle there, and they built a fine synagogue, acquired a cemetery, and formed a ḥebra ḳaddisha. The cemetery was devastated by the Russians in 1813, not a single tombstone being left in place. The register (פנקס) begins with 5535 = 1775; the ḥebra ḳaddisha then counted 47 paying members. The congregation of Langfuhr was then a dependency of the rabbinate of Schottland. In 1782 the three congregations cited above were united under Rabbi Meïr Posner. In 1807 the suburbs being devastated by Napoleon's army, the Jews of Weinberg entered the town; a great many of them lost their lives during the bombardment of Danzig.

After the treaty of Tilsit (July 9, 1807) Danzig, with the three above-named suburbs, became a free state, and remained such for the space of not quite seven years. The Jews rejoiced at this development, but they had to pay a contribution of 50,000 German thalers ($18,000), most of which was sustained by the community of Schottland. Their life was still rather precarious: admission to the exchange was refused them, and their right of residence in the town was only provisional. In 1813, when Schottland and Langfuhr were destroyed, the Jews of these two suburbs were admitted to the town, and on Feb. 3, 1814, after Danzig had become a Prussian city, they obtained citizens' rights. They had then the opportunity of forming a congregation; but unfortunately there was no cohesion among them, and their 300 members were still divided among five distinct communities, four of which were named after the suburbs in which they had lived. Not until 1881 were these congregations united into one by the efforts of Rabbi Werner; in that year one large synagogue was built for the united communities. M. Sel.

Appended is a brief account of the rabbis of Danzig and of its suburbs:

Schottland: Of the five original communities that of Schottland has always been reputed the wealthiest and most important. Abraham b. Eliezer ha-Kohen, author of "Ori we-Yish'i" (Berlin, 1741), and R. Moses b. Jonah, who died there June 27, 1754, were among the scholars whose names are associated with the religious history of Schottland.

Rabbis.

The following were the regularly appointed rabbis of the community: R. Elhanan b. R. Samuel Sanwil Ashkenasi (1752–80), born in 1713, died Sept. 22, 1780; pupil of R. Ẓebi Hirsch of Halberstadt; R. Meïr b. R. Judah Löb Posner Munk (1782–1807), born in 1735, died Feb. 3, 1807; R. Chajim (1807–35), son of the preceding; died June 11, 1835; R. Israel b. R. Gedalja Lipschütz (1837–50); Dr. Abraham Stein (1850–64), subsequently rabbi of the Meisel synagogue at Prague, where he died Sept. 2, 1884; Dr. Joshua Wallerstein (1865–76), born in 1838, died June 19, 1876; Dr. Cosman Werner (1878), during whose rabbinate the communities were united.

Langfuhr and Weinberg: The community of Langfuhr had always been included in the rabbinate of Schottland. In 1782 the community of Weinberg also came under the same rabbinate, whose incumbent thereafter designated himself as rabbi of של״ו ("Schottland, Langfuhr, Weinberg"). When Dr. Stein became the rabbi of Schottland in 1850, R. Israel Lipschütz officiated as rabbi of Weinberg and Langfuhr, dying Sept. 19, 1860. In 1878 the community of Weinberg called a rabbi of their own, Dr. S. Gronemann, who assumed the district rabbinate of Hanover when the communities were united.

Mattenbuden: The community of Mattenbuden was organized toward the end of the eighteenth century, and did not have a synagogue until 1793. The following officiated as rabbis: R. Moses b. R. Chajim Chefez of Sklow; died April 7, 1807; R. Isaac Itzig b. R. Elhanan, son of the rabbi of Schottland; died Feb. 19, 1814; R. Samuel Sanwil b. R. Judah Löb Rosenstein, grandson of R. Elhanan of Schottland; died Feb. 6, 1824; R. Michel Levin Munk (R. Jehiel Arje b. R. Matitjahu ha-Kohen), born in 1788; called to Danzig in 1853.

Danzig: R. Marcus Noah Perls (R. Mordecai b. Noah ha-Levi) of Lissa, died July 8, 1825; R. Moses Eliezer Thorner, died Aug. 6, 1837; R. Michel Levin Munk, died Aug. 23, 1853.

The above-named communities united under the name "Vereinigte Gemeinde." The following were its rabbis: Dr. Cosman Werner, called in 1878 to Schottland, was subsequently appointed rabbi of the united community. In 1895 he accepted a rabbinate at Munich. Dr. S. Posner, called as acting rabbi in 1896, subsequently became second rabbi at Karlsruhe. Dr. S. Blumenthal, called in 1897, and officiated to 1900 was subsequently appointed rabbi at Berlin. Since 1900 Dr. Max Freudenthal, previously district rabbi at Dessau, has been the incumbent.

D. M. FRE.

DANZIG, ABRAHAM BEN JEHIEL: Lithuanian codifier; born in Danzig in 1747 or 1748; died at Wilna Sept. 12, 1820. He was descended from a family of scholars in West Prussia, his great-grandfather, Jehiel Michael, having been rabbi in Schottland, near Danzig; his grandfather was Samuel, the author of the commentary on Isaiah, "Neḥamot Ẓiyyon." When Danzig was fourteen years old his father sent him to the yeshibah in Prague, after exacting from him a promise that he would not mingle with the "Moderns," who, through the influence of Mendelssohn in Prussia, were gradually coming into prominence. Under the guidance of Ezekiel Landau and Joseph Liebermann, Danzig zealously devoted himself to the study of the Talmud, and at eighteen years of age he left Bohemia with a "ḥaber" diploma, showing him to be a proficient Talmudist. He then settled in Wilna, Lithuania. When offered the salaried position of rabbi he declined it, considering it improper to receive a stipend in such a capacity, and he engaged in business as a merchant, visiting the fairs of Leipsic and Königsberg. Only in his later years, and after having lost almost his entire fortune through the explosion of a powder-magazine, could he be induced to accept the position of dayyan in Wilna, which office he held until his death. His fixed intention had been to emigrate to the Holy Land.

His Youth.

His Works.

Danzig is the author of the following: "Ḥayye Adam: Nishmat Adam" (The Life of Man: the Soul of Man), Wilna, 1810, reedited many times; "Ḥokmat Adam: Binat Adam" (The Wisdom of Man: the Understanding of Man), *ib.* 1814, reedited many times; "Sha'are Ẓedeḳ" (The Gates of Justice), on the commandments and prohibitions having reference to the land of Palestine, *ib.* 1812; Jerusalem, 1863; "Zikru Torat Mosheh" (Be Mindful of the Teaching of Moses), precepts for the Sabbath, Wilna, 1820, and several editions (this little work contains by way of supplement the treatise "Miẓwot Mosheh" [The Precepts of Moses], an extract from Askari's book "Ḥaredim" [The God-Fearing]; "Toledot Adam," a commentary on the Passover Haggadah, *ib.* 1817 (in the Haggadah edition "Ma'aleh Bet Ḥoron"); "Bet Abraham" (The House of Abraham), his last work, 1821, and many editions (also translated into Judæo-German by Isaac Hamburger, Lemberg, 1875). Among the writings of Danzig not yet published are an elaborate ethical work, specimen pages of which are contained in the introduction to "Zikru Torat Mosheh," and commentaries to several books of the Bible.

Danzig is especially known as the author of "Ḥayye Adam" and "Ḥokmat Adam," which represent the most important productions in the line of codification after the time of Joseph Caro and Mordecai Yafe. In these two works Danzig treats of the same subject-matter as the first two parts of the Shulḥan 'Aruk. The enormous mass of new material which had accumulated in the field of the Halakah since the appearance of the Shulḥan 'Aruk—a period embracing more than two and a half centuries—was collected and critically sifted by Danzig and presented in a readily intelligible form. His codex, however, was intended primarily for the cultured layman and not for the officiating rabbi. Hence there is a tendency to give prominence to the more exacting side of the Law, even though in his expert decisions and treatises, which, under the respective titles of "Nishmat Adam" and "Binat Adam," are added to "Ḥayye Adam" and "Ḥokmat Adam," Danzig shows independence enough to oppose the views of the AḤARONIM, and he frequently protests against the tendency to decide in favor of new prohibitions. His "Ḥayye Adam" met with unusual success during the author's lifetime. In many cities societies were formed for the purpose of studying this work; and even to-day these societies may be found in most of the Polish-Russian communities.

His Importance as Codifier.

This success was well merited; for there is hardly another work that presents in so concise and lucid a manner all the details of the discussions of the Aḥaronim. Danzig preserves in his works a certain freshness of tone, and dwells with special emphasis upon the ethical bearings of religious precepts. The high ethical standpoint of the author reveals itself most conspicuously in his "Bet Abraham," and the contents of this little book alone should suffice to refute the accusation that Talmudism had stifled religio-ethical sentiments. The love of God, it is pointed out, is man's highest mission, to which the fear of God is only a preparatory stage. The enjoyment of worldly things is not in itself to be condemned; but man is to bear constantly in mind that the recognition of God and the exercise of good deeds are the proper occupation of life. He lays great stress upon prayer; but this must not be mere lip-service; and, accordingly, he bids his children say their prayers in German rather than in unintelligible Hebrew. This is all the more noteworthy since Danzig in this very work enters a protest against all innovations, and even denounces the reading of German books.

His Ethics.

Love of truth and contentedness he especially enjoins; and declares repeatedly that "an offense against one's fellow being is far more reprehensible than a sin against God." He not only admonishes his family, therefore, to refrain from all dishonesty in their business relations with both Jews and non-Jews, but makes it a duty never to decide in money matters according to one's own opinions, but to inquire of a learned man whether the intended action conforms to the Law. While insisting upon the strictest observance of the rites, he bids his children even to let the time of prayer pass if this be necessary to secure money wherewith to pay a working man's wages.

Characteristic of Danzig is his warning not to study the Cabala before the age of maturity and before the study of the Talmudic-rabbinic literature. He himself shows an acquaintance with the Cabala; but in his halakic writings this is not made apparent. A somewhat mystical touch appears in his prayer for the eve of the Day of Atonement. This prayer may be found in "Ḥayye Adam" (No. 144), and has been published separately several times in Judæo-German as well as in Hebrew, under the title "Tefillah Zakkah" (Sincere Prayer).

L. G.

DAPIERA (DE PIERA), ASTRUC: Martyr; lived in Barcelona. He was probably a relative of Isaac de Piera, who also lived in Barcelona, and who, in the year 1391, was baptized under the name of Guillermo Vidal Puiol ("Rev. Et. Juives," iv. 59). Dapiera, accused of witchcraft, was put in prison in 1370 by the grand inquisitor of Aragon, Fr. Nicolas Eymeric. He was sentenced to express his repentance publicly in the cathedral, and to suffer imprisonment for life.

G. M. K.

DAPIERA or **DA PIERA** (דפיארה, דאפיירה), **SOLOMON BEN MESHULLAM:** Neo-Hebraic poet of North Spain; died after 1417. He was a relative of Meshullam ben Solomon Dapiera, who flourished, probably in southern France, in the earlier part of the thirteenth century, and who, in several extensive poems, declared against the "Moreh Nebukim" of Maimonides. Before the troubles which came upon him and the Jews in Spain generally, Dapiera seems to have been rich, and charitable to the needy. Forced to leave his native place, he took refuge in Saragossa at the house of Benveniste ben Labi, the Mæcenas of Hebrew scholars, where he became tutor to Benveniste's two sons, with one of whom, Don Vidal Joseph ibn Labi, he exchanged many letters and poems. Through the recommendation of his host, to whom he was not related, as Grätz avers, he became a favorite with Don Meïr Alguadez.

While in Saragossa, Dapiera filled the position of scribe to the congregation; letters are extant written by him in its name. He, however, did not remain there, but again took up the wanderer's staff. In 1417 he was in Monzon, where he made the acquaintance of a young poet, En-Samuel Bonastruc. Despite certain mannerisms, Dapiera may be ranked among the first Hebrew poets of his time. He showed great skill in rimed prose and artistic versification, and the criticism which Grätz passed upon him as a poet is now known to be undeserved. Under the title "Imre No'ash" (Speeches of a Desperate One) he compiled a comprehensive dictionary of rimes in three parts, two of which dealt with homonyms and synonyms. It is probable that the "Maskiyyot Kesef," edited by Mordecai Tama (Amsterdam, 1765), is a part of the "Imre No'ash" ("Literaturblatt des Orients," ix. 343; Steinschneider, "Cat. Bodl." col. 2386).

Dapiera was a prolific poet and writer; more than forty piyyuṭim issued from his pen; and the manuscript Or., fol. 1059, in the Berlin Royal Library, contains versified panegyrics sent by him to such men as Moses Abbas, Samuel al-Rabi, Don Bonfos, Astruc Ramuk, Astruc Crescas, Don Solomon al-Constantini, Maẓliaḥ of Majorca, as well as to Christian scholars. Many of his letters are still extant; one of them, to the above-mentioned Maẓliaḥ of Majorca, was published by Edelman in his "Dibre Ḥefeẓ" (p. 27). H. Brody has published in his "Beiträge zu Salomo Da-Pieras Leben und Wirken" (Berlin, 1893) a number of Dapiera's letters and poems. Solomon ben Meshullam Dapiera must not be confounded with Solomon ben Immanuel Dapiera, who probably died shortly before 1363, and who, under the title "Batte ha-Nefesh" (Smelling-Flask), translated from Arabic into Hebrew the didactic poem "Al-Saba'niyyah" by Abu 'Imran Moses Ṭobi, to which he wrote a commentary (see Hirschfeld in the "Report of the Judith Montefiore College," 1894, p. 8).

G. M. K.—G.

DARDA: One of the wise men surpassed in wisdom by King Solomon (I Kings iv. 31). He is mentioned, with Ethan, Heman, and Chalcol, as a son of Mahol. In I Chron. ii. 6 he is called "Dara," the son of Zerah. Rabbinic fancy has identified Darda with "the generation of knowledge" ("dor de'") of the wilderness. "Kol Adam" refers to Adam; "Ethan" is Abraham; "Heman" is Moses; and "Chalcol" is Joseph (see Rashi on I Kings v. 11).

E. G. H. G. B. L.

DARDANELLES or **CHANAK-KALESSI:** Name of the two cities situated opposite each other on the shores of the strait at the entrance to the Sea of Marmora. The European city is inhabited by

Mohammedans exclusively; the Asiatic city contains Mohammedans, Greeks, Armenians, Europeans, and Jews The Jewish community dates from the year 1510 according to local traditions which report that the Portuguese rabbi Jacob Ben-Ḥabib, the author of "'En Ya'aḳob," after emigrating from Portugal, established himself at Salonica, and afterward led a colony of twenty Jewish families from Gallipoli to Dardanelles. The old epitaphs in the cemetery of the city are illegible. The community is not mentioned until the middle of the seventeenth century, when the false Messiah Shabbethai Ẓebi was imprisoned by Sultan Mohammed IV. in the castle of Abydos in the vicinity of the Dardanelles. The Jewish population of this city, as well as of all the places along the Sea of Marmora, made a pilgrimage to the pseudo-Messiah (1664). Dardanelles is the birthplace of a Jewish author, Judah Benveniste, who wrote two works, "Tiwwasha' Yehudah" (Judah Shall Be Saved), published at Smyrna, and "Zeker Dabar" (Remembrance of the Word), published at Salonica (1863).

In a total population (1902) of 11,600 inhabitants there are 2,700 Jews. The latter have four synagogues, one school of the Alliance Israélite Universelle with 178 boys, a congregational school for girls (100), a Talmud Torah with 150 pupils, and a society of young people, "Ahabat Re'im," which furnishes a midday meal to poor school-children. Members of the three chief Jewish families, the Sedaccas, Gormezanos, and Taraganos, represent foreign powers as consular agents.

DAR'I, MOSES (or **MOSES OF DAR'AH** [**דרעה**; **in Africa**]):

1. Moses ben Adonim ha-Lewi: Karaite; flourished in Dar'ah toward the end of the ninth century. He was a grammarian of prominence, as is shown by the title "Medaḳdeḳ" (Grammarian) given to him. Some of his exegetic notes, conceived in the true Karaite spirit, have been preserved. Of his religious poems one fragment only is in existence, and of this the first stanza alone is in print, so that it is difficult to form an opinion regarding the poem. Pinsker assumes that the father of Moses was that Adonim one of whose poems is yet extant ("Liḳḳuṭe Ḳadmoniyyot," p. 138); but this theory can not be accepted without further proof.

Bibliography: Pinsker, *Liḳḳuṭe Ḳadmoniyyot*, p. 105; Fürst, *Gesch. des Karäert.* i. 97.

2. Moses Dar'i: Rabbinite; mentioned by Maimonides in his collection of responsa, "Pe'er ha-Dor" (No. 19). He emigrated from Maghreb (Spain) to Egypt, where he exchanged his own tefillin for others conforming to the regulations of the Geonim. Steinschneider inclines toward the opinion that he later joined the ranks of the Karaites, and that he is identical with the Moses Dar'i below.

Bibliography: Pinsker, *Liḳḳuṭe Ḳadmoniyyot*, p. 46; Steinschneider, in Geiger's *Jüd. Zeit.* ix. 178.

3. Moses Dar'i: The most prominent among Karaite poets. Concerning the dates of his life and activity the last word has not yet been said. Pinsker, the first to study his collected poems and give detailed information concerning him, places him in about the middle of the ninth century, and holds that Dar'i's "Diwan," according to certain data contained therein, was finished about 843. Steinschneider, Geiger, and Schorr have, for weighty considerations, rejected Pinsker's supposition.

There can be no doubt whatever that Dar'i was familiar with the works of the greater poets, from Gabirol to Abraham ibn Ezra, and that he derived much material from Judah ha-Levi, and not, as Pinsker maintains, that Gabirol, Moses ibn Ezra, Judah ha-Levi, and other Rabbinite poets took Dar'i as their model. Dar'i himself, in the superscriptions to his poems, names pieces by Judah ha-Levi and others that served him as patterns. The earliest date, therefore, that can be assigned to Dar'i is the end of the twelfth century. The date which appears in Dar'i's collection of poems must be regarded as a falsification.

Concerning the life of Dar'i little is known. His ancestors are said to have gone from Jerusalem (the presumptive starting-point of so many old families) to Spain, and from thence to have emigrated to Dar'ah, where Dar'i was born. He took up his abode in Egypt, and there completed the "Diwan." He made visits to Damascus, but his reception there was not cordial. While on his way to Jerusalem he wrote one of his poems. Two of his sons died at an early age; his third son, Uri, heads a genealogical table (Pinsker, "Liḳḳuṭe Ḳadmoniyyot," p. 49) extending to the twentieth generation.

Dar'i's poems often contain his name in acrostics: the fullest of these is: אני משה בן מרי ורבי אברהם הרופא הקראי חזק אמן. It also occurs abbreviated as משה רופא קראי חזק and משה קראי רופא חזק: which makes it evident that the epithet "rofe" (physician) refers to Dar'i himself. The "Diwan" (collection of poems) consists of two parts: the first part is the work proper, bearing the title "Firdaus Azhar al-Ḳaṣa'id wal-Ash'ar"; the second part is in the nature of a supplement. The two parts together contain about five hundred religious and secular poems. By far the greater number are in Hebrew; a few are written in Arabic. In some poems the verses are in Hebrew and Arabic alternately. Dar'i was acquainted with all those forms of poetry introduced into Hebrew literature from Spanish-Arabian countries.

In his religious poems—one whole series of which is arranged to correspond to the weekly lessons—he prays for forgiveness of sins, bewails persecutions and hardships, and gives expression to his longings for redemption. Among his secular poems occur several of a satirical character, directed against the "Anshe Mishnah" (followers of the Mishnah, or Rabbinites). There are also nuptial poems and love-songs, somewhat coarse in conception; eulogies and poems on friendship, extravagant in their fervor; besides elegies, epigrams, enigmas, etc. He is not wanting even in the affectations and artificialities of form and language peculiar to his models. His imagination often soars to great heights, and he displays great cleverness, especially in his epigrams. His language is fluent, but occasionally he has recourse to poetic license. His productions contain the stereotyped ideas and imageries which his predecessors used, following them even in the matter of linguistic expression; in other words, he plagiarizes freely. Of Dar'i's longer poems all that is known is reported by Pinsker.

Bibliography: Pinsker, *Likkuṭe Ḳadmoniyyot*, pp. 46-105, 135, and pp. 113 *et seq.*, where Dar'i's religious poems are enumerated; Geiger, in *Z. D. M. G.* xv. 813 *et seq.*, xvi. 290; Schorr, in *He-Ḥaluẓ*, vi. 57; Steinschneider, in Geiger's *Jüd. Zeit.* ix. 176 *et seq.*, where other sources also are mentioned; D. Kohn, in *Oẓar ha-Sifrut*, v. 90 *et seq.*

K. H. B.

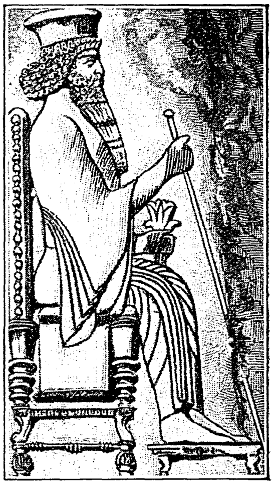
DARIUS I. (דריוש; Δαρεῖος): King of Persia from 521 to 485 B.C.; son of Hystaspes. The sources for the history of Darius are his own trilingual inscription at Behistun, the Babylonian contract tablets, and the accounts which the Greeks from Herodotus onward have given. Herodotus is corrected repeatedly by Ctesias. The older branch of the Achæmenides died out with Cambyses and his brother, the true Smerdis, while the head of the younger branch, which traced its descent to Teispes, was Hystaspes, governor of Parthia, who submitted to the new ruler. His son Darius, however, undertook to win back the scepter from the Magian Gaumata, who had assumed the title of king and had married Cyrus' daughter. Darius and six intimate companions of noble blood, relying on the protection of Ahuramazda, attacked the usurper on the 10th of Tishri (Oct. 16), 521, at a city in Media, and killed him; Darius now became king.

In Persia itself Darius was confronted by a new pretender, a second pseudo-Smerdis. In addition, the subject nations throughout the East (for instance, the Elamites, Medians, Parthians, Hyrkanians) tried to win back their independence, and placed at their head men who claimed descent from the royal family. The most serious rebellion was the one in Babylon under Nidintabel, who called himself Nebuchadnezzar III., the son of Nabonid. The first Babylonian record of Nebuchadnezzar III.'s reign is dated Tishri 17 (Oct. 23) of the year of his accession, 521.

Darius Crushes Rebellions.

Darius besieged Babylon and sent capable generals against the other usurpers. In Jan. or Feb., 520, Babylon yielded, and Darius was free to personally direct the crushing of the Median revolt. But in the spring Babylon rebelled again under the Armenian Arakha, who also pretended to be Nebuchadnezzar, son of Nabonid. There are many records dated in Darius' reign. At the beginning of 519 Babylon was retaken by Vidafra; and by the summer of 519 Darius had authority over the whole of the empire. These events directly concerned the Jews, who thought they presaged the great crisis, the self-annihilation of the heathen kingdom, which, according to Ezekiel, was to precede the Messianic era. But the Jews entertained no idea of rebelling: they were too thoroughly imbued with the teaching of the Prophets that it was wicked to forestall the ways of God. Nevertheless, they looked upon Zerubbabel, of the house of David, who, as the Persian governor, was the head of the little province of Judea, as the coming Messiah. It was fit then that they should make preparations, since God Himself was evidently preparing. Consequently, on the first day of the sixth month, in the second year of the reign of Darius, the prophet Haggai announced to Zerubbabel that the time was ripe, and the high priest Joshua began the rebuilding of the Temple. On the 24th of the ninth month (Dec. 17), 520, the foundation-stone of the Temple was laid. The prophet Zechariah supported Haggai and encouraged the people, even when news came of the continuous victories of the Persians. As late as the 24th of the eleventh month (Jan. 13), 519, he had a crown made for Zerubbabel out of gold sent by Jews in Babylon.

The hopes in the Messianic era were vain, for soon the Persian rule was more firmly established than ever. Jerusalem received a visit from the satrap of 'Abarnahara (the Persian province of Syria), Tatnai (Greek Σισίνης; Babylonian, "Ushtani"). The activity of the Jews and the building of the Temple naturally excited his suspicion. When the elders referred to Cyrus, who had ordered the Temple built, he dared not interfere, but reported the matter to Darius, who judged the affair correctly and without prejudice. He knew he need never fear a rebellion of the Jews, and that it would be of advantage to the kingdom to further their religious interests. The cost of building the Temple was paid out of the tribute-tax of Syria. He commanded the Jews to offer in the Temple a daily sacrifice for the welfare of the kingdom and for his sons. On Adar 3 (March 10), 515, in the sixth year of Darius, the Temple was completed (Ezra vi. 14).

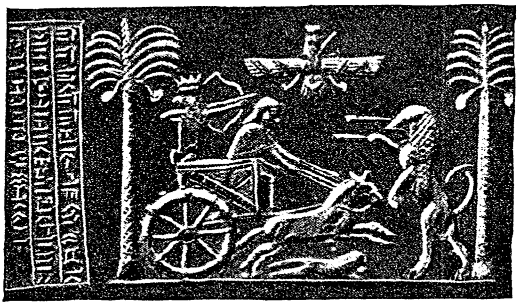


Darius Seated on His Throne.
(From Flandin and Coste, "Voyage en Perse.")

Organizes the Empire.

Darius was the organizer of the Persian Empire. His conquests served to round out the boundaries of his realm in Armenia, the Caucasus, and India, and along the Turanian steppes and the highlands of Central Asia. In order to systematize the collection of the tributes from subject nations, Darius divided his empire into twenty provinces ruled by governors, who are enumerated by Herodotus (iii. 89 *et seq.*). Each province was subdivided, each part with its own head. These governors and vice-governors were called, in Persian, "khshatrapavan" (guardians of the land; in Greek, σατράπης; in Hebrew, אחשדרפן; in Babylonian, "paḥat" (= Hebrew פחה). The number of the satraps and the districts over which they ruled frequently changed. According to the Book of Daniel (vi. 2), "It pleased Darius to set a hundred and twenty princes [satraps] over the kingdom"; while Esther says that Xerxes (Ahasuerus) "reigned from India even unto Ethiopia, over a hundred and seven and twenty provinces [מדינה]"; but this number can not be relied upon. It was Darius, also, who introduced and regulated the coinage of the realm. The standard coin was the golden daric (Hebrew and Phenician אדרכון, to be distinguished from אדרכמון, "drachma"), weighing 8.4 grams = 130 grains, and in silver worth 20 shekels, each 5.6 grams = 86.5 grains; 100 shekels, or 5 darics, made a silver mina; and 6,000 shekels, or 300 darics, made a silver talent.

Light is thrown upon the religious policy of Darius by the inscription of Uzaḥor, chief priest of the goddess Neit in the Egyptian city Sais. Uzaḥor was summoned to Elam (Susa) by Darius, and was fully empowered to restore the Hierogrammatic College (the House of Life), for which institution he trained many children. Darius himself went to Egypt and showed such deep interest in the institutions of the land that the Egyptian priesthood regarded him as the last great lawgiver of Egypt (Diodorus, i. 95; compare Herodotus, ii. 110).



Cylinder Seal, with Name of Darius in Persian, Scythian, and Assyrian.
(In the British Museum.)

In the Book of Daniel, whose author had but a dim knowledge of Persian history, "Darius the Median" appears as the son of Xerxes (ix. 1), successor to the Babylonian Belshazzar and predecessor of Cyrus (vi. 28, x. 1). The epithet "Median" is to be explained by the fact that in the Orient, as among the Greeks, the name "Media" was applied to the whole Persian realm (for instance, in the Minean inscription of South Arabia [Halevy, n. 535]; compare "kings of Media and Persia" in Dan. v. 28, viii. 20; Esth. x. 2; compare i. 3, 14).

G. E. ME.

DARIUS III.—Biblical Data: Last King of Persia; reigned from 336 to 330 B.C.; conquered by Alexander the Great. He is probably the "Darius the Persian," with whose reign the record of the priestly heads of families mentioned in Nehemiah (xii. 22) ended. On this passage compare Eduard Meyer, "Entstehung des Judenthums," p. 103.

G. E. ME.

——**In Rabbinical Literature:** Darius and Cyrus were the commanders of Belshazzar's two legions. When they saw him in a debauched state, they made him descend from his throne, deprived him of his crown and of his royal robes, and left him standing in his shameful nakedness (Esth. R. iii. 1; compare David Luria *ad loc.*). According to another version, Darius and Cyrus were Belshazzar's doorkeepers (Cant. R. iii. 1). It was during Darius' reign that Daniel disobeyed the order to worship the king ('Ab. Zarah 3a; compare Dan. vi. 11-12).

The latter Darius, by whom the Talmud means the king mentioned in Ḥag. i. 1, and who is not identical with Darius the Persian (see R. H. 3b, and Tos. *ad loc.*), was the son of Esther, and thus of pure descent on his mother's, and impure on his father's, side. This is implied in the Syrian hyrax (Lev. xiii. 5), the emblem of the Medo-Persian empire, uniting as it does the signs of the clean and of the unclean animals (Esth. R. viii. 3; Lev. R. xiii. 5). Compare CYRUS.

L. G. C. L.

DARKNESS: The rendering in the English versions of the Hebrew חשך and its synonyms אפל, אפלה, ערפל, צלמות. At one time darkness was regarded as something substantial, and not merely as the absence of light. This is apparent from the frequent juxtaposition of "darkness" with "light." God forms light and darkness (Isa. xlv. 7); light and darkness are consumed or confined (Job xxvi. 10). In the Creation-story, darkness is said to have been over primitive chaos, ABYSS. In this opening sentence traces or reminiscences of an early mythological personification have been detected (see COSMOGONY). Darkness antedates creation. It has also been noticed that it is not called good, as are the other works of the Creator. The absence of the definite article before חשך in Gen. i. 1 points in the same direction.

Something of this mythological notion is present in Job's imprecation (Job iii. 4, 5), where both "Ḥoshek" and "Ẓalmut" (or "Ẓalmawet") are invoked as though ravenous monsters lying in wait for prey (the verb recalls the blood-avenger, the "goel"). They are in parallelism with a phrase—"Let all that maketh black the day" [R. V.]—which is now recognized by nearly all commentators to describe mythological beasts (see DRAGON). In ordinary speech, of course, the Hebrew mind did not revert to this personification of darkness and its underlying antecedent mythological conceits. Darkness is simply the night, as light is the day (Gen. i. 5, 18). The sun grows dark; the day is darkened; and the like. In mines and other subterranean regions darkness has its realm, which the searcher for the precious metals invades, and thus forces upon it the establishment of new boundaries (Job xxviii. 3). This impression of substantiality goes with the descriptions of Egyptian darkness (Ps. cv. 28; Ex. x. 23). Darkness is also likened to a pillar of cloud (Ex. xiv. 20), as something almost palpable, if not personal. It is a frequent circumstance of theophany (II Sam. xxii. 12 = Ps. xviii. 12); and is associated with "She'ol" in such a way as to make it plausible that this place of the ingathering of the shades was a domain ruled over by twin demons, Ḥoshek and Ẓalmut (darkness and thick darkness). The double form, masculine and feminine, "ḥoshek" and "ḥashekah," also goes back to mythology.

In figurative speech, for reasons that are apparent, darkness was used for a secret hiding-place (Isa. xlv. 3; Job xxxiv. 22; Ps. cxxxix. 11, 12). As the effect of sorrow is to dim the eyes by tears, or as grief or sin injects darkness into the world (compare ‘Ab. Zarah 8a), the Hebrew speaks of distress as darkness (Isa. v. 30, xxix. 18; Ps. cvii. 10–14, again "Ḥoshek" and "Ẓalmut").

Darkness is uncanny. It may be the hiding-place of evil spirits; this, at all events, was the notion in post-Biblical times (compare DEMONOLOGY); therefore darkness expresses fear, dread, terror. As such it is one of the equipments of the DAY OF THE LORD, a circumstance of judgment (Amos v. 18, 20; Zeph. i. 15; Naḥum i. 8). This eschatological idea underlies also the darkness which ensues upon the Crucifixion (Matt. xxvii. 45). According to the theory advanced by Gunkel ("Schöpfung und Chaos"), that in eschatological visions primitive mythology finds its expression, the underlying idea is that darkness is an attendant on final judgment or punishment (Matt. viii. 12, xxii. 13, and frequently in N. T.).

Darkness is also the emblem of mysterious afflictions, of ignorance and frailty (Job xix. 8, xxiii. 17; Isa. ix. 2), of sin and evil (Isa. v. 20; Prov. ii. 13), of mourning (Isa. xlvii. 5), of doubt and vexation (Job v. 14, xii. 25), and of confusion (Ps. xxxv. 5). As wisdom is light, so ignorance is darkness (Job xxxvii. 19; Eccl. ii. 14).

Darkness was the ninth of the ten Egyptian plagues (Ex. x. 21 *et seq.*). What caused the darkness has been a subject of much unsatisfactory discussion. Some reminiscence based upon observation of natural phenomena is always involved in the other plagues. What the reminiscence is in this case has not been determined; a storm of dust has been suggested by some commentators. E. G. H.

DARMESTETER, ARSÈNE: French philologist and brother of James Darmesteter; born at Château-Salins Jan. 5, 1846; died at Paris Nov. 16, 1888. Darmesteter, who came as a little boy to Paris, went first to a primary school, but learned much from the books in the workshop of his father, who was a bookbinder. At the age of twelve he went to the Talmud Torah school, where, in addition to religious subjects, he studied French, Latin, and Greek. It was in this school that he determined to solve the problem of the Old French words in the text of Rashi. At the age of sixteen he presented himself for the baccalaureate. His father had intended him to become a rabbi; but criticism of the New Testament had led him to criticize the Old; his religious orthodoxy had been shaken, and, although he continued his Hebrew studies, his warm religious faith had given place to scientific interests. Science was destined, he thought, to transform and to unite humanity.

For a year he was a pupil at the Séminaire Israélite under Zadoc Kahn; the next year he worked at the Collége Ste. Barbe to qualify for his licentiate, which he obtained in 1864. He studied Latin epigraphy under Léon Renier. In 1865–66 he began to study Old French at the Ecole des Chartes. It was about this time that he wrote the remarkable essay on the Talmud which he had finished just when the similar article by Emmanuel Deutsch had appeared. The article was afterward revised by Darmesteter and published posthumously in his "Reliques Scientifiques."

In 1867 Darmesteter became a pupil of Gaston Paris, the great Romance scholar, who quickly recognized his powers. In 1869, at the request of Paris, the minister of public instruction sent Darmesteter to study the French glosses in the manuscripts of Rashi at Oxford and Cambridge, and in the British Museum. In six weeks, working from twelve to fourteen hours a day, he went through fifty-nine manuscripts. His object was to elucidate the phonetics and structure of Old French by means of the forms preserved in Hebrew characters. The first results of his investigations were published in "Romania" in 1872, in which year he was nominated "répétiteur" (lecturer) in Romance languages at the Ecole des Hautes-Etudes. He finished in the same year his first large work, "Traité sur les Mots Composés" (published in 1874), in which he showed his powers as a philologist on ground which he had made his own.

Arsène Darmesteter.

To Darmesteter a language was essentially living; he was not content with a mastery of the bare facts of phonetics and morphology; the problem which above all attracted him was that of the creation of new words, and the development of new senses from old words. The "Mots Composés," in which some 12,000 words are dealt with, has become a classic.

Earliest Publications.

In 1871 Darmesteter had already begun, jointly with Adolphe Hatzfeld, a dictionary of the French language, expecting to complete it in three years. Its publication, however, did not begin until after Darmesteter's death. Hatzfeld, a man with singularly fine logical and literary perceptions, struck by the lack of order in the classification of the meanings of words given in Littré's great work, proposed to reduce them in each case to one or two fundamental meanings. Darmesteter saw that the problem of each word could only be solved by the history of the word. Hatzfeld and Darmesteter worked together for seventeen years. When Darmesteter died the first draft of the manuscript was complete and the printing was begun. The revision of the etymological part, and the great treatise on the formation of words which he had planned and, in part, written, as a preface, were completed by his former pupils A. Thomas and L. Sudre. The work was awarded a grand prix at the Paris Exhibition of 1900, and the prix Jean Reynaud, of 10,000 francs, by the Académie des Inscriptions et Belles Lettres, the highest honor in its power to bestow.

The dictionary was far from absorbing Darmesteter's energies. In 1874 he deciphered the difficult and beautiful French elegy, preserved in the Vatican, on the burning of the thirteen Jewish martyrs at Troyes in 1288. In the same year he examined in Parma and Turin fifty-five other manuscripts of Rashi. In 1876 he discovered the important phonetic law of the protonic, known since as "Darmesteter's law." He obtained in 1877 his doctor's degree from the Sorbonne, presenting two dissertations: "De Floovante" and "De la Création Actuelle des Mots Nouveaux dans la Langue Française." On June 16, 1877, he was nominated "maître des conférences" in Medieval French at the Faculté des Lettres of Paris.

"The Life of Words."

In 1878 he published, in collaboration with Hatzfeld, "Le Seizième Siècle," a book on the language and literature of the sixteenth century in France, which is used as a text-book in the universities of Germany and of England as well as of France. In 1880 he gave much of his time to the foundation of the Société des Etudes Juives, and especially to the "Revue" issued by it, in which he published a number of papers dealing with ancient and medieval Jewish history. He was also for some time professor of French at the Paris Rabbinical Seminary. In 1881 he became lecturer at the Ecole Normale Supérieure des Filles at Sèvres. His lectures, delivered to audiences of women students training as teachers in secondary schools, became the "Cours de Grammaire Française" (4 vols.), published posthumously, and translated into English by Alphonse Hartog. The French Academy awarded it the Saintour prize in 1897. In 1883 he was appointed at the Sorbonne titular professor of Medieval French literature and of the history of the French language. In 1886 he published "The Life of Words," which appeared first in an English translation, and then in the French original under the title "La Vie des Mots," a series of lectures on the changes of meaning in words, in which certain theories, originally published in 1876 in the "Revue Philosophique," were extended and developed. Most of Darmesteter's papers were collected in two volumes, "Reliques Scientifiques" (Paris, 1890), by his brother James. The first volume contains a biography, a bibliography, and Jewish and Franco-Jewish studies; the second, the purely French studies. The book was intended for the public, and has gone through many editions in France; it throws a new light on linguistic development. In 1885 heart-disease, unsuspected but of long standing, probably aggravated by the accidental death of his mother and by periods of almost superhuman intellectual effort, declared itself. On Nov. 7, 1888, he acted as examiner at the Sorbonne in a room without a fire; the chill brought on endocarditis, and he died on Nov. 16, 1888.

A second edition of the "Mots Composés," edited by Gaston Paris, and with an index of 12,000 words compiled by Darmesteter's wife, was published in 1894. An essay on the Celtic element in French was published in the "Revue Celtique" for 1901.

The notes on the "La'azim" of Rashi are still unpublished.

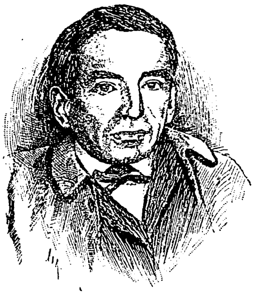
S. P. J. H.

DARMESTETER, JAMES: French Orientalist; born March 28, 1849, at Château-Salins, Lorraine; died Oct. 19, 1894, at Paris. His parents were from a family established in Lorraine since the middle of the eighteenth century. When, in 1791, the Jews of France were bidden to choose surnames for themselves, the great-grandfather of James selected the name "Darmstädter," in remembrance of the Darmstadt ghetto whence his parents had emigrated to Lorraine. The French registrar translated the name into his own language and wrote it "Darmesteter." Calmann and Cerf, the son and grandson of the original Darmesteter, were booksellers and bookbinders in the town of Château-Salins; and there, in 1839, the latter married Rosalie Brandeis, the daughter of one of Napoleon's officers. The Brandeises, of Polish origin, were of a notable stock—rabbis, physicians, and soldiers through many generations. The family archives contain interminable series of rabbis. A great-uncle of the Darmesteters was physician to the Czar of Russia; their grandfather and their maternal uncles were soldiers or army doctors. From the Brandeises James and his brother Arsène inherited their love of letters, their scientific bent, and their enthusiastic patriotism.



James Darmesteter.

James was the youngest son. The eldest, Achille, a lad of uncommon promise, died suddenly one evening on his return from school, when Arsène was about six years and James about three years old. In 1852 the death of Calmann Darmesteter in Paris, leaving there a widow wholly unprovided for, gave Cerf and his wife a reason for moving to the capital; and with the widow they settled in the crowded quarter of the Marais. Work was difficult to procure; privations were many; and the close air and inappropriate food affected the health of James, who never grew to his full size, his stature being slightly deformed and his health always frail. He resembled in an extraordinary degree the illustrious poet of Recanati; and when he visited Florence in 1887 the Florentines dubbed him "Il piccolo Leopardi."

With the tenacious idealism of the Hebrew race, the bookbinder and his wife, poor as they were, spared no sacrifice to afford their children a first-rate education. Both of them were grounded at the primary school of the Rue des Hospitalières, Saint Gervais; proceeding thence, on attaining their tenth or twelfth year, to the Talmud Torah, the seminary of the Jewish Consistory, a school whence most but not all of the pupils entered the Rabbinical College. At the age of eleven James obtained a Bischoffsheim scholarship; and thenceforth he followed the education of the Lycée, first at the Collège Charlemagne, then at the Collège Bonaparte (now Collège

Education.

Condorcet), the most prominent of Parisian public schools. In after days he was wont to compare the "amiable and sterile education of the public school," much to its disfavor, with the original and somewhat chaotic system of the Talmud Torah; but it was partly to the classical discipline of the Lycée, and to its preoccupation with rhetoric and logic, that James Darmesteter owed his singularly beautiful style, at once lucid and suggestive, terse and admirably descriptive, elliptic and convincing.

Darmesteter's school-days were a series of triumphs that terminated in the acquisition of the "Prix d'Honneur" at the general competition in 1867. On the morrow every school in France echoed with the Latin phrases which the delicate little Jew of eighteen had put into the mouth of the dying Demosthenes.

After such brilliant school-days, Darmesteter showed a certain hesitation in deciding on his career. He obtained his baccalaureate in science and in letters, took the higher degrees in letters and in law, and then earned his daily bread by giving lessons. He had as yet published nothing. He had indeed begun a drama, a philosophical novel, a history of the satanic element in modern literature, and a synthesis of religions. But all these schemes were relinquished ere they neared completion. He fancied, as at his age Ernest Renan had imagined, that his gift was perhaps in the line of natural science. "But I studied only vague generalizations," he wrote later, "without that interest in details which is the beginning of wisdom. I wished to make a synthesis of the universe. I decided to employ nine years in research: a year for each science, following the order of Comte. In the tenth year I would write my book." Meantime he studied Byron in English, Heine in German, and Carducci in Italian. But ere the fourth year of his program was completed—a program loosely adhered to—one day, in reading Michelet's "Bible de l'Humanité," he heard the voice of the antique Orient: he had found his vocation.

On the advice of Michel Bréal, Darmesteter in 1872 entered the Ecole des Hautes Etudes. He was not long a student. His rapid and surprising progress soon invaded the whole domain of ancient Persian literature, language, history, and religion. From the first he associated the life and the history of a people with the development of its language, and sought to interpret its faith by its traditions rather than by arbitrary philological comparisons.

Iranian Studies.

In order to understand the Avesta, he felt it important to study the inscriptions of ancient Iran, the legends of Firdusi's "Shah Nameh," the Pahlavi commentators of the "Bundahish," and even the rites of the modern Parsees of Bombay, rather than to compare the text of the Iranian Scriptures with the Holy Writ of ancient India, in the manner of certain German scholars. Each race, he felt, was, in matters of religion, more like itself throughout the continuity of its history than it was like any other race, however near a neighbor and contemporary. His "Haurvatât et Ameretât," published in 1875, proclaimed the student a master; and soon after he entered the Ecole des Hautes Etudes as professor.

In 1877 his "Ormuzd et Ahriman" attracted the notice of F. Max Müller at Oxford; the eminent Sanskrit scholar entrusted to the young Frenchman the English translation of the Avesta for the collection of the "Sacred Books of the East"; and the same year Darmesteter went, for the first time, to England. While continuing his English edition of the Avesta, he contributed to the French reviews various essays and articles on points of historical and philological interest: these were collected in 1883 under the title "Etudes Iraniennes." The same year witnessed the completion of his English Avesta, of which the first volume had appeared in 1880.

English Studies.

Darmesteter's translation of the Avesta had advanced him in the knowledge not merely of Persian, but also of English; and at one moment his increasing admiration for English literature went far toward robbing Zoroaster of his last and most brilliant disciple. But his devotion to his real career was too deep-rooted for any other interest to endanger it, though ever and anon the Orientalist paused in his more serious labors to publish an edition of "Childe Harold" (1882), a volume of "Essais de Littérature Anglaise" (1883), a classical edition of "Macbeth" (1884), a book on Shakespeare (1889), or to write the charming pages collected in his posthumous "English Studies" (1896). Few Frenchmen have understood England so intimately. Darmesteter, by a sort of happy guesswork, had divined the English character before he set himself to study it.

Journey to India.

His translation of the Avesta into English had convinced Darmesteter that these sacred books—being in fact a prayer-book, a collection of ritual—could be understood only by a study of the religion which still practises their rites; and in February, 1886, almost immediately after his election to the chair of Iranian languages at the Collège de France, he left Paris for Bombay, the seat of an important Parsee community. The thirteen months spent by him in India formed, in many respects, the most important period of his life. In Bombay he became acquainted with the sages of the Zoroastrian cult; read priceless manuscripts with the venerable Tahmuraz; discussed points of ritual with the alert and modern-minded Yivanje Modi; and laid the foundations of that epoch-making translation of the Avesta to which in 1893 the French Academy of Inscriptions awarded the "Prix Biennal" of twenty thousand francs. There, too, he came to the conclusion that the antiquity of the Avesta had been greatly exaggerated by Iranian scholars; and that the Zoroastrian Scriptures bear traces of the influence not only of Buddhism, but also of the Jewish Bible, and especially of the Neoplatonist philosophy: "On peut dire que les Gâthas sont le premier monument du Gnosticisme, mais d'un Gnosticisme pratique, arrêté sur la pente fatale par un sens profond du réel et une préoccupation morale qui ne cherche dans l'abstraction qu'un moyen d'édification." According to Darmesteter, no part of the text of the Avesta is anterior by more than a century to the common era; the oldest fragments being contemporary with Vologeses, while the bulk of these Scriptures may be attributed to the reign of Ardashir (middle of the third century of the common era).

But if the letter be relatively modern the spirit is ancient. The faith that Ardashir and his minister, Tansar, sought to restore and to reduce to writing was, even in their time, an inheritance from distant forefathers. This antique element persists in a great part of the doctrine of the Avesta—in the principle of dualism, for instance, as in the limit set to the duration of the world, in the final defeat of evil, and in the idea of resurrection—no less than in certain details of the ritual, such as the sacrifice of the sacred plant, the Haoma. In an elaborate introduction to the third volume of his French translation published by Leroux (Paris, 1893), Darmesteter brings the whole force of his philological knowledge and his historical method to bear upon this question of the origins of Zoroastrianism. In the present state of science some of the factors of the problem are lacking; but those existing have never been classified with so masterly a competence nor presented with such originality and grace as by Darmesteter.

During his stay in India Darmesteter did not devote the whole of his time to the study of Zoroastrian tradition. He had left Europe with a mission from the French government to collect the popular songs of the Afghan tribes. On leaving Bombay he proceeded to the Northwest frontier and thence to the hills of Abbotabad. He who had made friends at Bombay with the Parsee priests might then be seen on the market-place of Peshawur talking with ragged mountain chiefs from Afghanistan or Baluchistan, or listening in prison to a poet in tatters—taken more or less redhanded—and writing down from his dictation some picturesque incendiary Pushtun ballad. These wild songs of border hate and love delighted the romantic soul of Darmesteter, while that other half of his mind, the scientific half, never asleep, noted strange linguistic forms and singular mutations of consonants, until, from a quantity of scattered details, he drew the unforeseen conclusion that in the language of the Afghan tribes there still survives the antique speech of the Medes. The Afghan tongue of to-day springs from Zend, as French springs from Latin. These Afghan songs, with a French translation and an important philological essay, were published by Leroux under the title "Chants Populaires des Afghans" (1888–90).

Afghan Studies.

Darmesteter did not confine himself to seeing every side of native life. Everywhere he met with the kindest, the most hospitable reception. At Bombay he stayed with the governor, Lord Reay; at Lahore, with Sir Alfred Lyall. The officers of Abbotabad made him an honorary member of their mess; just as the learned "mobeds" of Bombay had welcomed him as a brother in Zoroaster, and as the most distinguished mendicants of the fair of Peshawur had treated him as a fellow of their rambling academy of Afghan letters. He liked, admired, and understood all this variegated universe of India. Something of the magic and the miracle, something of the sheer delight and amazement of this voyage into the silver land of Indian nights lingers still in the pages of his "Lettres sur l'Inde," published on his return to Paris (Lemerre, 1888).

In his Peshawur garden one day Darmesteter chanced to read a small volume of English verses entitled "An Italian Garden." On his return to Europe in 1887 he called in London on their author, Miss Mary Robinson; in 1888 he married her. Between these two dates he translated into French, under the title "Poésies de Mary Robinson" (1888), a selection of her poems, and published them with an introduction which is one of the most spontaneous and lyric of this scholar's efforts.

Darmesteter was no scholar buried in his books. His immense and noble curiosity embraced the whole order of the universe. Everything interested him, and more and more, as the years of middle life expanded and matured his marvelous faculties, was he preoccupied by the problems of moral, social, and political reform. He longed for the day when justice and righteousness should rule in the land. He was more than a Republican: he was a Liberal, convinced that the future lay with the party that should organize democracy for the greatest good of the greatest number, without forgetting that a moral ideal and a moral discipline are integral parts of the greatest good. He felt that the first thirty years of the Third Republic had been too exclusively given to political battles. The lot of the toiler, the education of the young, the faith of reasonable men, had been neglected.

When still a youth of fifteen or sixteen, at the Collège Condorcet, Darmesteter had broken from the Jewish faith. For many years the rigid orthodoxy that he associated with the Synagogue inspired him with a singular distaste. Yet his nature was a profoundly religious one, as was shown in "La Chute du Christ" (1880), which was republished and remodeled in an infinitely finer form in 1889 under the title "La Légende Divine." Therein he reveals a revolt against the silence of God in the world, a pity for human suffering, an enthusiastic altruism which at last becomes the source of a new religion—a religion of justice and rectitude, the religion of Amos and Hosea.

Relation to Judaism.

Darmesteter never returned to the Synagogue; but he returned to the Bible. "My faith is of my own making, not metaphysical, but moral, evolutionist, and Biblical," he wrote in 1887. A few years later he was to give to this new faith the name of "Prophetism." In the reconciliation of the truths of science with the social ethics of the Hebrew Prophets, he saw the possible faith of the future. He expressed this conviction in the essays collected under the title "Les Prophètes d'Israël" (Calmann Lévy, 1892). The prophetism of James Darmesteter reveals no secrets of the future life and makes no promises. In his system the spiritual other-world is neither included nor denied. No rites and no miracles enforce the moral faith which Darmesteter drew, in almost equal portions, from the writings of the Prophets of his race and the principles of the Revolution of 1789.

Darmesteter was far less a metaphysician than a moralist and a sociologist. So early as 1882, under the pseudonym of "Y. D. Lefrançais," he had written for the primary schools of France a book of "Lectures Patriotiques," destined to imprint on the minds of children the love of their country and those principles of peace, justice, fraternity, and mutual aid from which he was to construct, ten years later, his ideal prophetism. In 1893, when the house of Calmann Lévy founded the "Revue de Paris" and offered its political direction to Darmesteter, he accepted this new duty, seeing in it an opportunity to forward ideas that he felt necessary to the dignity and happiness of France. The article in which he proposed to all the warring parties of his country a general disarmament in favor of a policy of social reform, opens the volume, "Critique et Politique," published posthumously in 1895.

Darmesteter died suddenly on Oct. 19, 1894, after a few days' indisposition. No successor has been found for his chair either at the Collège de France or at the Ecole des Hautes Etudes.

L. G. I. BER.

DAROCA: Town in the Spanish province of Saragossa, and formerly a part of the ancient kingdom of Aragon. It contains an old Jewish community. It had its privileges, like the neighboring community of Calatayud, and for the most part shared the same fortunes. In 1264 it paid an annual tax of seven hundred and fifty dineros. Many wealthy Jews lived at Daroca, among them Don Abraham Maquatel (Maquarel), a contemporary of Isaac b. Sheshet. A number of them were baptized in 1413, among them a wealthy Jew named Alfonso Reus; the Ram family, whose children and grandchildren filled high offices; and others. Don Astruc ha-Levi represented the community of Daroca at the disputation of Tortosa, and was the author of the circular letter to the community of Gerona.

DARSHAN, SIMEON. See KARA, SIMON.

DARSHANIM. See HOMILETICS.

DART: A pointed weapon to be thrown by the hand; a javelin or light spear. The English version uses "dart" as an equivalent for five Hebrew words: (1) "Ḥeẓ," which should be rendered "arrow" (compare the Assyrian "uṣṣu" and the Phenician חץ). (2) "Massa'," given in the list of weapons which of necessity must prove ineffective in the struggle with the leviathan (Job xli. 26). In the same connection is found (3) "totaḥ," and from the words "counted as stubble," a weapon with a shaft can be inferred (Job xli. 18). (4) "Shebeṭ": with three of these Joab smote Absalom (II Sam. xviii. 14). The most usual form is (5) "shelaḥ." This the workers on the Temple wall under Nehemiah constantly had with them (Neh. iv. 11). Hezekiah provided them in abundance for the defense of the Temple (II Chron. xxxii. 5). The men under Jehoiada were armed with them (II Chron. xxiii. 10). Darts were used in sieges (I Macc. vi. 51), and it may be that the reference here is to darts used to carry fire into the works and the city of the enemy. The New Testament speaks of the "fiery darts of the wicked" (Eph. vi. 16).

DASCOLA, ASTRUC. See KANSI, SAMUEL.

DASHEV: Village in the government of Kiev, Russia. It has a population of 6,200, including 3,200 Jews, whose sources of income are mainly commercial and industrial. About 714 are artisans, 278 of these being masters. Tailoring occupies 176 persons; blacksmithing, 80; cabinet-making, 72. The output of the cabinet-makers and blacksmiths is valued at 10,000 rubles annually, and is sold at the neighboring fairs. There are 252 Jewish day-laborers, most of whom (175) hire out for field-work. About 17 families are engaged in dairy-farming. There are no charitable institutions. Three hundred children are taught in ḥadarim.

DATE-PALM. See PALM-TREE.

DATHAN: Son of Eliab, of the tribe of Reuben. He conspired with his brother Abiram against Moses and Aaron. See ABIRAM.

E. C. M. SEL.

DATHEMA: The name of a fortress in Gilead to which the Jews fled when hard pressed by Timotheus. There they shut themselves in, prepared for a siege, and sent to Judas Maccabeus for aid (I Macc. v. 9–11). Dathema was one of many places in a similar plight, and seems, from the description of it, to have been strongly enough fortified to necessitate "an innumerable people bearing ladders and other engines of war" to take it. Judas attacked in three divisions, drove off Timotheus, killed eight thousand of the enemy, and saved the city (I Macc. v. 29–34). The Peshiṭta reads "Rametha," from which George Adam Smith ("Historical Geography of the Holy Land," p. 589) infers that it was perhaps Ramoth Gilead. Conder (Hastings, "Dict. Bibl." i. 560) suggests the modern Dameh on the southern border of the Lejah district. It can not, however, be positively identified.

E. G. H. G. B. L.

DATO, MORDECAI BEN JUDAH: Italian rabbi and preacher; born 1527; lived in various places in the territory of the house of Este; died after 1585. Steinschneider thinks it possible that he was a grandson of Angelo (= Mordecai) Dato, mentioned in Vogelstein and Rieger, "Gesch. der Juden in Rom," ii. 436. Dato was a pupil of the cabalist

Moses Cordovero, and was himself an adept in the Cabala. He is honorably mentioned by Azariah de Rossi in connection with a Messianic prediction ("Me'or 'Enayim," ch. xliii.), by Menahem Azariah de Fano, and by Angelo Alatrini, who dedicated to him his "Angelica Tromba" (Ferrara, 1579). Dato's writings follow the Cabala of Cordovero and Luria. He added marginal notes to the "Asis Rimmonim," a compendium of his pupil Samuel Gallico's "Sefer ha-Pardes" (Venice, 1601), but the editors have so mutilated and misplaced his notes, which they have incorporated in the text, as to render the compendium unintelligible. It has since been reedited by M. A. de Fano (Mantua, 1623). Dato wrote "Migdal Dawid" (Tower of David), a disquisition on questions relating to the Cabala, and also annotations to the Zohar, both of which are in manuscript. The British Museum contains manuscripts of some of his sermons in the Italian language, but in Hebrew script ("Yad Yosef," p. 24), of a cabalistic commentary to Esther, and of collections of his poems.

Studien*, p. 193; Steinschneider, in *Monatsschrift*, xlii. 521; S. Margoliouth, *Descriptive List of the Hebrew and Samaritan MSS. in the British Museum*, pp. 28, 48, 49, 58, 59.

G. G. J.—G.

DA'UD EFFENDI MOLKO: Chief of translation in the Turkish Foreign Office; born at Salonica in 1845. Da'ud is of humble parentage. His family settled in Constantinople while he was still a boy, and he received his elementary education at the Camondo Institution. Attached to the service of the Foreign Office at the age of 18, he rose to the position of translator-in-chief during the reign of Sultan 'Abd al-'Aziz, and retained that post when 'Abd al-Hamid II. ascended the throne.

Da'ud has been decorated with the Grand Cordon of the Order of Nishan-i-Osmanie, that of the Nishan-i-Medjidie and that of the Nishan-i-Imtiaz, and with the Persian Order of the Sun and Lion. Da'ud is also a commander of the Legion of Honor, and has been decorated with the Order of the Crown of Prussia.

S. M. FR.

DAUGHTER IN JEWISH LAW: The legal status of a daughter in Jewish law changed very materially from patriarchal times to the Talmudic era. In the former period the daughter had no appreciable legal rights; she was merely a member of her father's household, and as such was, in common with the other members of the household, subject to the power of her father, who was accountable to no one for his treatment of her. This state of absolute subjection to the parental control was somewhat modified by the Mosaic law; but it was not until the days of the rabbinical authorities that this ancient patriarchal authority was abolished, and legal rights secured for the daughter, resulting in her practical emancipation from parental government upon reaching her majority at the age of twelve years and six months.

In illustration of the power of the father in patriarchal times, many incidents may be cited from the Bible, of which a few will suffice. The right of the father to kill his daughter is apparently not questioned in Judges xi. 34-39, though some commentators (*e.g.*, Levi ben Gershon and David Kimhi, also Nicholas de Lyra) hold that the passage must not be interpreted as indicating that Jephthah actually killed his daughter in this case. In later times this extraordinary power, more especially when used to offer up sons and daughters as sacrifices, is condemned (II Kings xxiii. 10; Ps. cvi. 37, 38; Ezek. xvi. 20, 21). A man could sell his daughter to be a maid servant (Ex. xxi. 7), and, like Laban, he could also sell her in marriage (Gen. xxxi. 15; compare Gen. xxix. 21-30). The incident in reference to Lot's daughters (Gen. xix. 8), as well as a similar incident in Judges xix. 24, shows the extent of paternal authority. Since the daughter was practically the property of her father, damages for an injury done to her were demandable by the father (Ex. xxi. 31). The father was likewise entitled to damages for slander of the good name of his daughter (Deut. xxii. 19) and for her seduction (Ex. xxii. 16; Deut. xxii. 29).

Laban, after having given his daughters in marriage to Jacob, claimed the right of paternal authority over them long after their marriage (Gen. xxxi. 43); and it seems that Jacob, to a certain extent, recognized this right (*ib.* xxxi. 31). In Judges xv. 1, 2, and in I Samuel xxv. 44, incidents are recorded showing the exercise of paternal authority over the married daughter; for in both cases the married daughter is taken from her husband by her father, and given in marriage to another without the husband's consent.

In the Talmudic and post-Talmudic law there is an entire change in the legal status of the daughter. Thus, of the law in Ex. xxi. 7, according to which the father was permitted to sell his daughter to be a maid servant, the Talmud says that it was in force only as long as the law concerning the jubilee was in force (Kid. 69a; Maimonides, "Yad," 'Abadim, i. 10); and the Talmud bases this view upon the ground that in the year of the jubilee all slaves were absolutely free, and that, therefore, when the jubilee year was no longer observed, the right of the father to sell his daughter to be a maid servant must necessarily be taken away, because the safeguard against her continuance in perpetual slavery no longer existed.

Right of Sale.

According to another tradition, the jubilee year was not observed after the destruction of the First Temple ('Ar. 12b); thus, according to the Talmud, the right of the father to sell his daughter was taken away at least as early as the sixth century before the common era. The mother never had the right to sell her daughter (Soṭah iii. 8).

The Talmudic law practically emancipated the daughter from parental authority when she attained her majority. The daughter was a minor ("ḳeṭannah") under the age of twelve years; between the ages of twelve and twelve and a half she was called "na'arah"; and upon attaining the age of twelve years and six months she became "bogeret," and was no longer under parental control. All of the father's rights over his daughter's person and property which survived in Jewish law from patriarchal times ceased when she became bogeret. These rights are thus summed up in the Mishnah (Ket. iv. 4; *ib.* Gem. 46b): While the daughter is a minor, the father may give her in marriage; he is entitled to her earnings and to that which she finds; he may annul her vows; and he must receive the bill of divorce when one is given by her husband. She becomes sui juris upon attaining the age of twelve years and six months, or upon her betrothal earlier (Mishnah B. M. i. 5; Ket. iii. 8, iv. 4; Nid. v. 7).

The right of the father to annul his daughter's vow is based upon Biblical law (Num. xxx. 4-6). His right to give her in marriage while she is a minor is admitted in the Mishnah (Ket. iv.); but it is condemned as immoral by the Rabbis, who are of the opinion that the father should not give his daughter in marriage during her minority, but that he must wait until she is old enough to decide whether or not she is satisfied (Ḳid. 41a).

Custody and Support.

The father is entitled to the custody of his daughter; but, if he divorces his wife, his daughter remains with her mother (*ib.* 102b). According to the later law, however, which seems to have followed the decisions of the Roman law, the court must determine whether the mother in such cases is a proper guardian for the daughter; and the question of the custody of the girl is one to be judicially determined according to the best interests of the child (Shulḥan 'Aruk, Eben ha-'Ezer, 82, 7).

The father must support his daughter while she is a minor (Ket. 49a), even though she has been given into the custody of her mother who has been divorced ("Yad," Ishut, xxi. 17); but the father is not obliged to support his daughter after she has attained the age of six years, if she has a separate estate which is sufficient for her maintenance (Eben ha-'Ezer, 71, 1). If the daughter, after attaining her majority, remains with her father, and is supported by him, he continues to be entitled to her earnings and to that which she finds (B. M. 12a; and Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 270, 2).

After the death of her father, his son and heir must support the daughters out of the patrimonial estate until their marriage (Ket. 52b; B. B. 116b). The daughter's right to be supported out of the estate of the father is limited to that part of the estate which actually was in her father's possession at the time of his death. She has no right to demand support out of any part of the estate which has accrued to the heirs after the father's death, and which may be the increase or increment of the estate which they received from him (Bek. 52a; Ishut, xvi. 5). The right of the daughter to be supported out of the father's estate is recognized by an early decision, delivered in Jerusalem by Judge Admon (*c.* 40 C.E.), whose decision was approved by Rabban Gamaliel. Admon said: "If a man die, leaving sons and daughters, and his estate be large, the sons inherit it and the daughters are maintained by it; but if the estate be small the daughters are maintained by it and the sons may go begging" (Mishnah Ket. xiii. 3; *ib.* Gem. 108b). If the heirs are spendthrifts, and the estate is in danger of being dissipated by them, the court will set aside a certain portion of the estate beyond the control of the heirs, in trust for the support of the daughters (Eben ha-'Ezer, 112, 11, gloss). It seems that, inasmuch as the mother is not liable for the support of her daughter, the latter can not claim maintenance out of the estate of the mother (Mishnah B. B. viii. 4; Gem. 122b).

Right of Dowry.

The Talmudic law provides furthermore (Mishnah Ket. iii. 11; *ib.* Gem. 52b) that the husband shall include in the marriage contract (Ketubah) a clause providing that any daughters which may be born to him shall live in his house and be supported by his estate until their marriage. This right of support or alimentation is technically known as "mezonot," and is to be distinguished from "parnasah," or the right of dotation which the daughter has in her father's estate.

The law requires that the father shall provide the daughter with a suitable dowry upon her marriage; and the obligation to provide the Dowry rests upon the father's heirs (Mishnah Ket. vi. 6; Gem. 68a). There is a difference of opinion among the authorities as to the right of a daughter to receive a dowry from her mother's estate, although the preponderance of authority is in favor of this right (Eben ha-'Ezer, 113, 1, gloss).

The daughter may inherit her father's estate if he has left no son or issue of a deceased son. The right of the daughters to inherit was originally established by the Mosaic law in the case of the daughters of Zelophehad (Num. xxvii. 7); and the decision in this case was made a general law (*ib.* verse 8). The right of the daughter to inherit was qualified by a later decision in the same case, providing that the heiress of her father's estate was obliged to marry one of the family of the tribe of her father, in order to preserve the inheritance within the tribe. Rabba said that this provision of the law applied only to the time of the division of the land of Palestine among the different tribes, and that it had no application in later times (B. B. 120a); so that a daughter inheriting the estate of her father might marry any one she pleased, more especially because, since the destruction of the Temple and the dispersion of the people, all laws relating to the land of Palestine were in abeyance.

The laws of inheritance are the same with reference to the sons and daughters, with the exception that the law of primogeniture does not apply to daughters (Bek. 52a; B. B. 122b).

The Talmudic authorities disagreed as to whether the son and the daughter inherit the mother's estate equally or whether the sons inherit to the exclusion of the daughters (*ib.* 111a). It was finally decided, however, that the same rule applied as to the father's estate, the sons being preferred (Ḥoshen Mishpaṭ, 276, 4). If the maternal inheritance descends to the daughter while she is yet a minor, it is nevertheless beyond the control of her father; and the general rule, that the father is entitled to all the property of his minor daughter, does not apply in this case (Ḳid. 46b).

In order to evade the law of inheritance, which prefers the sons to the exclusion of the daughters,

Nuptial Settlement by Father.

it has become customary since the Middle Ages for the father to provide an inheritance for his daughter upon her marriage, by executing an agreement wherein he confesses that he has received a certain sum of money from his daughter in cash. He acknowledges this as a debt due by him and his heirs, to become payable upon his death in cash; and he thereby pledges or mortgages all of his goods, movable and immovable, to pay the same. He furthermore states that it was a condition of the loan that, when his male heirs enter upon their inheritance, they shall have the right either to pay the said sum in cash or to give to the daughter a share in his estate equal to one-half of the share of one son (not the first-born). By this agreement the daughter is assured of a share in her father's estate or of a sum of money equivalent to it (Eben ha-'Ezer, 113, 2; Ḥoshen Mishpaṭ, 281, 7, gloss). The form of this contract is given in Appendix F to Mendelssohn's "Ritualgesetze der Juden," and it is known as the "shetar ḥaẓi zakar" (contract for a son's half share).

If a man marries a widow who has a daughter by her first husband, and, as part of the consideration of the contract of marriage, agrees to support the daughter for a specific number of years, it is a binding contract which may be enforced by the daughter, even though the mother is divorced and leaves the house of her husband taking her daughter with her, or even if the daughter is married (Mishnah Ket. xii. 1; *ib.* Gem. 101b; "Yad," Ishut, xxiii. 17, 18; Eben ha-'Ezer, 114, 1).

L. G. D. W. A.

DAUPHINÉ: Former province of France, now absorbed in the departments Isère, Hautes-Alpes, and La Drôme. It is supposed that Jews settled here in the first centuries of the common era (Bédarride, "Les Juifs en France, en Espagne, et en Italie," xxviii.); but nothing is known of their history down to the thirteenth century. Six Jews of Valréas, department of Vaucluse, were accused in 1247 of having murdered a Christian child for ritual purposes. The investigation, which was set on foot by two Franciscan monks, was conducted with ferocity. The unfortunate accused, who unanimously protested their innocence, were horribly tortured for eight days, and finally condemned by the judges—creatures of Dragonet de Montauban, Lord of Valréas—"to be burned, without the crime charged against them having been legally proved, or having been confessed by them" (Elie Berger, "Les Registres d'Innocent IV." i. 424). Profiting by the sentiment aroused by this alleged crime, the Bishop of St. Paul-Trois-Châteaux, the constable of Valence, and a few other noblemen of the province imprisoned the Jews living on their estates and despoiled them of all their possessions.

Thirteenth Century.

Pope Innocent IV. intervened in their behalf, and, in a letter addressed to the Archbishop of Vienne, he enjoined that prelate "to bring to the bar of equity all the wrongs that had been so inconsiderately inflicted upon the Jews, and not to suffer them in the future to be arbitrarily molested on account of these and similar accusations" (Elie Berger, *l.c.*).

In 1253, however, the same pope, yielding to the importunity of the archbishop Jean, authorized him to expel the Jews from the province ("Gallia Christiana, Prov. Vienne," instr. l., li.). They came back in 1289, but in that year the council of Vienne compelled them to wear the yellow badge in the shape of a quoit, and forbade them to employ Christian servants.

Fourteenth Century.

The dauphin Humbert I. favorably received the Jews driven from France in 1306, and authorized them to establish banking-houses within his states, on payment of considerable taxes (Prudhomme, "Les Juifs en Dauphiné aux XIVe et XVe Siècles," p. 12; compare "Revue Etudes Juives," ix. 254, and Depping, "Les Juifs dans le Moyen-Age," p. 161). He entrusted them also with public offices and admitted them into his court (Prudhomme, *l.c.* pp. 14, 18, 72).

The Black Death.

During the Black Death, having been accused of poisoning the cisterns and wells, the Jews of St. Saturnin and Ste. Euphémie were butchered and their possessions plundered (1348). At Veyne ninety-three were massacred. At La Mure a Jew accused of having kidnaped a Christian child was condemned to a horrible death; being cut in two and his quivering limbs hanged on a gallows (*l.c.* 30). Urged by the need of money, the dauphin Humbert, between 1350 and 1365, confiscated all the outstanding credits of the Jews in the county of Gap and in the baronies of Montauban and Meuillon ("Revue Etudes Juives," ix. 247); and in 1388 he annulled the privileges which he had granted to the Jews of Dauphiné, who, in order to have them restored, had to pay him the sum of 1,000 florins (Valbonais, "Histoire du Dauphiné," vol. ii., *preuves* No. 9; compare Prudhomme, *l.c.* p. 23, and Depping, *l.c.* p. 162). In the same year he imposed upon them a special tax of 10,000 francs, and in 1390 he laid upon them an additional tollage of 2,000 francs.

Fifteenth Century.

On March 4, 1413, the dauphin's council compelled the Jews to have their synagogues, their ovens, their wells, and their markets separate from those of the Christians (Prudhomme, *l.c.* p. 58; Depping, *l.c.* p. 196). The dauphin Louis (1461-83), afterward King Louis XI. of France, accused them of excessive usury and of dealings with his enemies during his exile in Flanders and Brabant, and condemned them to a fine of 1,500 gold crowns ("Revue Etudes Juives," ix. 239). In consequence of this they emigrated in great numbers from Dauphiné.

From the seventeenth century onward they were no longer allowed to reside in that province. A decree of Parliament (Jan. 10, 1665) granted them a sojourn there of not more than three days, under penalty of being whipped and of having their merchandise, money, and chattels confiscated (Prudhomme, *l.c.* p. 69). Jews lived in all the important places of Dauphiné, but the principal congregations were in VIENNE, NYONS, GRENOBLE, ST. SYMPHORIEN D'OZON, CRÉMIEU, MONTÉLIMAR, VALENCE, and ETOILE.

Jews were resident in the following places also:

Graisivaudan District: A Hebrew document dated Adar 6, 5106 (Jan. 30, 1346), states that the officers of the Jewish communities of the district had pledged themselves under oath to pay to the dauphin, in addition to their share of the money needful for the expenses of the country, such further taxes as should be levied upon them ("Revue Etudes Juives," x. 239, 240).

Crest or **Crest-Arnault:** Here, in 1296, R. Menahem ben Aaron copied the Pentateuch with the five Megillot and the Hafṭarot, for Jacob of Crest, son of Solomon the Saint, the martyr of Grenoble (Zunz, "Z. G." p. 208; Gross, "Gallia Judaica," p. 143).

Montauban: R. Eliezer ben Jehiel, מונגבן, copied here, at the end of the thirteenth century, the manuscript of the "Semaḳ" now preserved at Paris (Gross, *l.c.* p. 318). The dauphin Humbert II. gave orders in 1339 to all his officers in the baronies of Montauban and of Meuillon to compel all the debtors of the Jews to settle their debts when due (Prudhomme, *l.c.* p. 19).

Serre: The wealthy Astrug Macip, or Astrugon Mancip, one of the familiars of the dauphin Humbert II., lived here. In a document of the year 1346 he calls himself the dauphin's "garderium specialem" (Prudhomme, *l.c.* pp. 25, 76).

L'Albenc: The home of R. Solomon ben Eliezer Ḥayyim ha-Kohen, called "Diéau" or "Deuaye," who about 1340 copied the Pentateuch with Onkelos and the commentary of Rashi (Prudhomme, *l.c.* p. 18; Gross, *l.c.* p. 269).

Gap: The physician David Levi lived here. Raoul, lord of the manor of Gaucourt and governor of Dauphiné, granted him in 1445, on the recommendation of King René, Count of Provence and Forcalquier, the right to practise medicine in the baronies, the counties of Gap and Embrun, and the districts of Champsaur ("Revue Etudes Juives," ix. 261).

Peirins: Home of Moses, the surgeon, to whom the governor of Dauphiné in 1370 granted the unrestricted right to practise medicine in the whole province, "where the lack of physicians is daily deplored" (*ib.* ix. 251).

Jews also dwelt at La Salette (Carmoly, "Revue Orientale," iii. 460), La Tour-du-Pin, Villeneuve de Royban (Prudhomme, *l.c.* pp. 16, 58, and 76), Aoûste, Oriol-en-Royan, Bordeaux, Communay, Albon, Tullins, Beaucroissant, St. Christophe, Chatte, Grane, Moutiers, Le Pont, Bourgoin, St. Sorlin, La Roche-sur-le-Buis, Moirans, Voiron, Roy bon, St. Nazaire, Laval, and Montrigaud ("Revue Etudes Juives," ix. 240-247).

All these communities have entirely disappeared. To-day in the ancient province of Dauphiné only a few Jewish families remain, and these are scattered at Grenoble, Valence, Nyons, and Valréas.

G. S. K.

DAVID.—Biblical Data: Second King of Israel; according to I Chron. ii. 15, the youngest of the seven sons of Jesse the Bethlehemite; or, according to I Sam. xvi. 10 *et seq.*, xvii. 12, the youngest of eight sons. His adventurous career before he became king was evidently a popular theme in Israel; and so many incidents were woven around his early years that it is now impossible to construct a strictly historic account from the traditions preserved. David kept his father's sheep, and found opportunities to prove himself a dauntless defender of his charges. He was further noted for his poetic and musical talents; and these determined his future. When Saul fell into an incurable melancholy, David was summoned to court to cheer the despondent king by playing upon the harp; and Saul became so fond of the young man that he selected him as his armor-bearer.

David Consoles Saul.

During the wars with the Philistines, which occupied most of Saul's reign, David distinguished himself so highly that he attracted the attention of all Israel. Saul gave him his daughter Michal for a wife; and the king's eldest son, Jonathan, became his intimate friend. David, however soon incurred the anger of the suspicious king, and had to flee in peril of his life. Thereupon the priests of Nob, who had innocently aided the fugitive, had to bear the brunt of the sick king's anger, and all but one —who escaped to David—were executed as traitors. David then placed himself at the head of a band of men daring and desperate. Eager to be of use to his countrymen, he relieved the city Keilah, which was threatened by the Philistines; but when Saul, regarding him as a rebel, advanced against him, David could make a stand only for a very short time.

After various adventures, during which he magnanimously spared the life of the king, David fled into the land of the Philistines, and became a vassal of King Achish of Gath, who assigned to him the city of Ziklag for a residence. He ruled here a year and four months, when the disastrous battle near the mountains of Gilboa ended the life and reign of Saul. These are the bare facts of David's early history, which in the second Book of Samuel are developed into a charming picture.

The unfortunate battle of Gilboa completely changed the situation. Saul and three of his sons lay dead on the field; Israel was prostrate; and the country west of the Jordan was again under Philistine rule. East of the Jordan, in Mahanaim, Abner, Saul's general, founded a small kingdom for Saul's only surviving son, Ishba'al, or Ishbosheth, as the name is changed in Samuel; but this kingdom, too, was probably under Philistine suzerainty. David then determined upon returning to his own country; and after having opened negotiations in Ziklag with the tribes and families of Judea, he had himself anointed at Hebron as tribal King of Judea, without, however, giving up his relations as a vassal of the Philistines. This state of affairs lasted for seven years and six months; and when Abner attempted to conquer David's little kingdom for Saul's son, he was defeated at Gibeon by David's general, Joab. Afterward, owing to a

At the Battle of Gilboa.

quarrel between them in connection with Rizpah, one of Saul's concubines, Abner left Ishba'al and went over to David, but was killed by Joab on pretext of a vendetta. Ishba'al, also, was murdered soon afterward. Since Mephibosheth, a young lame son of Jonathan, was now the only surviving male descendant of Saul, the districts lately ruled over by Ishba'al offered David—as the heir of Saul through his marriage with Michal—the throne made vacant by death; and, after a solemn election, David was anointed at Hebron as King of all Israel.

King of All Israel.

The duties of the newly anointed king were marked out for him by the conditions of the country. His first task was to shake off the suzerainty of the Philistines and again make Israel an independent state. This undertaking was brilliantly accomplished by David. In a long series of fierce battles he "smote the Philistines and subdued them," and took Metheg-ammah out of their hands (II Sam. viii. 1), so that they were no longer a menace to Israel. David's next solicitude was to provide another center for his new kingdom; for, aside from the ancient rivalry between Judah and Joseph, the position of Hebron, in the extreme south, made it impossible for David, as King of all Israel, to remain there. He therefore selected Jerusalem for his capital, that city being still in possession of the Canaanite tribe of the Jebusites, and consequently on neutral ground. Notwithstanding its almost impregnable position, he conquered the city, and made it the political as well as the religious center of Israel by transferring to it the old national shrine, the Ark of the Covenant, in a solemn procession with sacrifices, in which he himself figured prominently as a worshiper and celebrant. In memory of its migrations in the wilderness, the Ark was at first placed in a tent. According to II Sam. vii. 1-17, David thought of building a magnificent temple for it at Jerusalem, but was dissuaded by the prophet Nathan.

Traditional Tomb of David at Jerusalem.

As a Conqueror.

Concerning David's military and political achievements, there is but meager information: a few isolated facts, however, are known; and the interrelation of these can only be conjectured. David subdued and made tributary to the new Israelitish kingdom the cognate tribes of Moab, Ammon, and Edom, as well as their neighbors on the northern frontier of Israel, the Arameans, who had joined the Ammonites in a war against David and his kingdom. Scanty as is the record of these wars, it indicates that they were not instituted for plunder or conquest; nor can it be proved that David was in a single instance the instigator. The Syrian-Ammonite war, the only conflict of which there is a detailed account, was occasioned by a frivolous provocation, the messengers of David having been wantonly insulted when on an errand of good-will and friendship (II Sam. x.).

David waged his wars vigorously, and did not hesitate to employ stern measures. His punishment of Moab and Edom was especially severe; but his alleged cruelties against the Ammonites rest on a misinterpretation of II Sam. xii. 31.

Thus, through David, the people of Israel, who only a generation before had submitted to the insults of the Ammonites (I Sam. xi. 2), became the ruling nation between the Nile and the Euphrates; and it seemed as if their king was to end his days in peace and in the enjoyment of the position he had attained. In the prime of life, however, and at the height of his fame, David sinned; and the inexorable consequences of his transgression plunged him into misery, and threatened even the stability of his kingdom. David's sinful connection with Bath-sheba, whose husband he indirectly assassinated, encouraged his eldest son, Amnon, to deal wickedly with his beautiful stepsister, Tamar; whereupon he was slain by Absalom, her full brother. Absalom had to flee, but was recalled at the intercession of Joab. Stung, however, by the ill-timed severity of his father, Absalom instigated a rebellion in David's former capital, Hebron. David, taken completely by surprise, had to flee across the Jordan; but gaining time through Absalom's fatal delay, he gathered his old, well-tried troops about him, and easily dispersed Absalom's undisciplined bands at Mahanaim. Joab, with his own hand, killed the fleeing Absalom, against the king's express command.

Death of Absalom.

David irritated the Israelites by unwise and one-sided negotiations with the Judeans, whose defection had evidently been a heavy blow to him; and this bitterness resulted in a conflict between the Israelites and the Judeans on the return march. This conflict, which took place at the Jordan, became so bitter that the Benjamite Sheba ben Bichri succeeded in urging Israel to a revolt, which Joab, however, immediately quelled. Sheba fled to the city Abel Beth-maachah, on the northern boundary of the kingdom; but the inhabitants seized him, cut off his head, and threw it over the wall to Joab.

The remaining years of David's life and reign were peaceful. The question of his successor, however, brought up new difficulties. Adonijah, the eldest of David's sons after Absalom's death, was generally

Concluding Years.

regarded as his heir, and David allowed him to appear officially as crown prince. The ambitious and intriguing Bath-sheba tried to secure the succession for her son Solomon, the youngest of David's children, and David, infirm and completely under Bath-sheba's influence, believed a report—whether true or false—that Adonijah, unable to await his father's death, had already proclaimed himself king and had received the oath of allegiance. David, therefore, solemnly presented Solomon to the people as his successor and had him anointed. Soon afterward he died, at the age of seventy, having reigned for seven years and six months at Hebron as tribal King of Judah, and thirty-three years at Jerusalem as the second King of all Israel.

E. G. H. K. H. C.

——**In Rabbinical Literature:** David, the "chosen one of God" (Ab. R. N. xliii.; ed. Schechter, p. 61), belonged to a family that was itself among the elect of Israel. His ancestors were the noblest of the noble, the great men of the most prominent tribe of Israel (Ruth iv. 18–22), and he was a descendant of Miriam, the sister of Moses, although this is not clearly stated in Scripture (Sifre, Num. 78; ed. Friedmann, p. 20b). The judges Ibzan and Othniel were David's relations (B. B. 91a; Sifre, *l.c.*), and as the "ruler David" (David ha-Melek) continued the honorable traditions of his family, so the "pious David" was the son of a man who died sinless (Shab. 55b). Notwithstanding his piety Jesse's marital life was not untroubled; he intended even to liberate his favorite female slave and marry her, but his wife frustrated this design by disguising herself as the slave, and Jesse unwittingly married her the second time. The result of this union was David, who was passed off as the son of the slave, in order to leave Jesse in his error (Yalḳ., Makiri, ed. Buber, ii. 214; compare also Samuel Laniado's "Kele Yaḳar" to I Sam. xvii.). The supposed son of a slave, David was not educated with Jesse's other sons, but passed his days in the wilderness pasturing sheep (Yalḳ., Makiri, *l.c.*).

This pastoral life prepared him for the position he was to occupy. He treated the sheep entrusted to his care lovingly and tenderly, wherefore God said: "He understands how to pasture sheep; therefore he shall become the shepherd of My flock Israel" (Midr. Teh. lxxviii. 70; Ex. R. ii. 2; for a similar Arabic legend see Grünbaum, "Neue Beiträge," p. 193). In the lonely desert David also found opportunity to display his extraordinary strength and courage. Thus, in one day he strangled with his hands four lions and three bears that attacked his flock (Baraita of the Thirty-two Rules, iii.; Midr. Sam. xx.). David was once in great danger when he came upon a gigantic reem asleep. Taking it for a high mountain, he tried to climb it; but the animal awakened suddenly, and David found himself lifted high up into the air on its horns. David now vowed to God to build a temple 100 ells high—as high as the horns of the reem—if He would save him from the beast, and God thereupon sent a lion, which, as "king of the animals" (compare Ḥag. 13b), exacted respect even from this gigantic beast, which fell down before the lion, enabling David safely to alight. Then a deer came, which the lion immediately pursued, so that David escaped both from the reem and the lion (Midr. Teh. xxii. 22). David's pastoral life ended in his twenty-eighth year, when Samuel anointed him king (Yalḳ., Makiri, *l.c.*; compare also Seder 'Olam R. xiii.).

David Anointed as King.

The prophet thought at first that Eliab, David's eldest brother, was destined by God to be king, but it was indicated to him by means of the holy oil that David was the chosen one. When Samuel attempted to pour oil from the vessel upon each of David's brothers in succession, the oil remained in the vessel; but when David's turn came it flowed freely of itself; the drops that fell on his garments changed immediately into diamonds and pearls; and when the anointing was finished the horn was as full as before. David's mother now came and revealed the secret that had been kept for so many years, and his father and brothers learned that he was not the son of a slave (Yalḳ., Makiri, *l.c.*; Yalḳ. ii. 124 contains only a part of this legend; also Ephraem Syrus in his commentary to I Sam. xvi. 13, ed. Benedictini, p. 365; compare Ginzberg, "Die Haggada bei den Kirchenvätern," i. 27, 28). Although the anointing was kept secret, its effects became evident in David's remarkable spiritual development, for he received even the gift of prophecy (Josephus, "Ant." vi. 8, § 2; Sanh. 93b). He thereby excited the envy of many, especially of Doeg, who tried to prevent King Saul from calling David to his court (Sanh. *l.c.*; compare Doeg in Rab. Lit.). Saul became acquainted with David while the latter was still a boy, and grew attached to him, especially because of the cleverness he displayed on the following occasion: A woman who had to leave her home, and was unable to take her money with her, hid the gold pieces in barrels of honey, which she left in the care of a friend. The latter discovered the money, took it, and restored to the woman on her return only the honey. The woman brought the case before Saul, but as she could not prove her assertion the case was dismissed. When David, who was then a little boy playing before the king's house, heard the story, he undertook to convict the thief. At his suggestion the king commanded the barrels of honey to be broken, and two coins which the thief had not noticed were then found on the bottom, the theft being in this way proved (Jellinek, "B. H." iv. 150, 151, and in various "ma'aseh" collections).

David could enjoy the peace of court life only for a short time, as Goliath's appearance forced Saul into war. The sick king gladly accepted David's offer to march in his place against the blasphemous heathen (compare Goliath in Rab. Lit.), and when little David put on the great Saul's armor and found it to fit him perfectly, Saul recognized that David was intended for a higher mission. This change in David was due to the "holy oil" with which he was anointed; hence Saul became jealous of him, and David refused for this reason to go to battle in the king's armor (Tan., ed. Buber, iii. 84). Five stones came of themselves to David (Midr. Sam. xxi.), and when he touched them they changed into one stone (Zohar, Deut. 272). With them he intended to slay

David and Goliath.

Goliath, for they symbolized God, the "three fathers" of Israel, and Aaron, whose descendants Hophni and Phineas had been killed shortly before by Goliath (Midr. Sam. *l.c.*; the Midrash quoted by Ḳimḥi to I Sam. xvii. 40 is somewhat different). As soon as David glanced at the giant the latter was struck with leprosy and rooted to the ground so that he could not move ("Ẓara'at"; Pesiḳ., ed. Buber, p. 175; see also Zohar, Num. p. 206, and parallel passages quoted by Buber). When David called out to Goliath "I shall give your flesh to the birds of heaven," Goliath looked up at the word "birds," the movement displacing his head-dress; and at the same moment the stone flung by David struck the giant's exposed forehead (Midrash quoted by Ḳimḥi *ad loc.*; differently in Midr. Teh. lxxviii.). As Goliath was armed cap-a-pie, David was at a loss how to cut off his head. Uriah offered to help David if the latter would give him a Jewess for wife, and when David consented Uriah showed him how the ends of the bands that held the armor together were joined across the soles of Goliath's feet. David gave Bath-sheba to the Philistine, and she became later a source of much trouble to him, because he had had so little regard for the dignity of a Jewess (Midr. quoted by Alshech to I Sam. xvii. 50, and by Samuel Laniado to II Sam. xii.). David's victory over Goliath increased Saul's jealousy, who closely inquired into David's origin through his general Abner, in order to find out whether he really was a descendant of Pharez, for in that case Saul feared to see in David the future king. David's old enemy Doeg tried to prove that David being a descendant of the Moabitess Ruth, could not be regarded as a legitimate member of the Jewish community; the prophet Samuel, however, decided that the Biblical interdiction (Deut. xxiii. 3, 4) referred only to the men and not to the women of that people (Midr. Sam. xxii.; Ruth R. iv. 4; somewhat differently Yeb. 76b, 77a, and Ephraem Syrus, *l.c.* 379; compare Ginzberg, *l.c.* pp. 32, 33).

David Fleeing Before Saul.

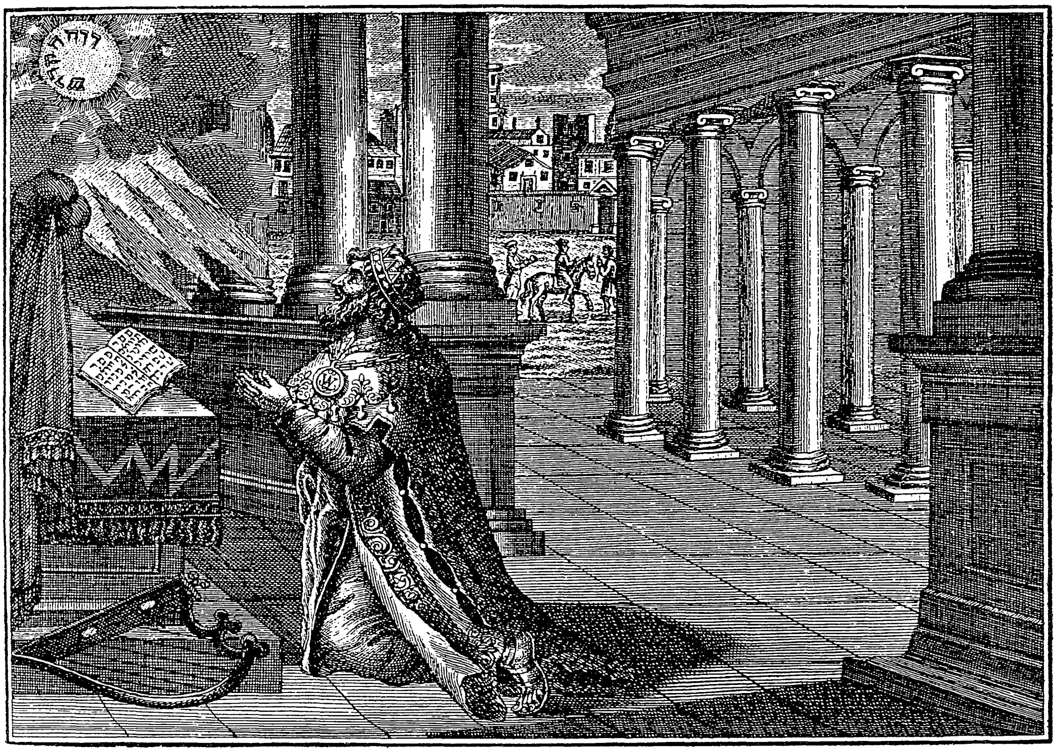
David did not remain long with Saul, being obliged to flee from him shortly after Goliath's death. God did not abandon him, however, and not only saved him from his enemies, but also instructed him how to rule the world justly and wisely. Thus, David once had an opportunity to find out that even lunacy, which he thought served no purpose, had its place in the plan of the universe, for he owed it to his fictitious madness that he was not slain by Goliath's brothers, who formed the body-guard of King Achish (see Achish in Rab. Lit.; Midr. Teh. xxxiv. 1; Yalḳ. ii. 131, with variants; Second Alphabet of Ben Sira, ed. Venice, p. 24). He was compelled to change his mean opinion of the spider in his flight before Saul, when he was hiding in a cave, and his pursuers, seeing a spider's web across the front of the cave, thought it useless to enter; for God had commanded the spider at that moment to give a proof of its usefulness (Ben Sira, *l.c.*; partly in Targ. to Ps. lvii. 3; compare Levy, "Chal. Wörterb." i. 48). David had a wonderful, and at the same time instructive, escape when he seized the water-flask of Abner (see I Sam. xxvi. 7), and found himself caught between the legs of this giant as between two pillars; for a wasp stung Abner, who mechanically moved his feet, releasing David, who now recognized that even an apparently noxious insect can sometimes render service to man (Ben Sira, *l.c.*). Other miracles that David experienced in his flight before Saul were: the appearance of the angel informing Saul, who was about to seize David, that the Philistines were coming into the country (I Sam. xxiii. 26), whereupon Saul was obliged to give up the pursuit (Midr. Teh. xviii.); and the heavenly aid sent to David on his expedition against the Amalekites (I Sam. xxx. 17 *et seq.*), when the night was illuminated by lightning, thus enabling David to end the battle speedily (Lev. R. xxx. 3; Midr. Sam. xviii.).

David's Wars as King.

David's first thought on coming to the throne was to capture the ancient holy city of Jerusalem from the Jebusites. He did not fear the power of these heathen, but he did fear the covenant Abraham had made with their ancestors, the words of which were engraved on bronze figures (Pirḳe R. El. xxxvi.; compare Jebusites in Rab. Lit.). The city was furthermore surrounded by a high wall, and David could enter only after the wall had miraculously lowered itself (Midr. Teh. xviii.; compare Joab in Rab. Lit.). Although the Jebusites could not appeal to the promise given to them by Abraham, because they had attacked the Jews in the time of Joshua, yet David would not seize the holy city without indemnifying them for it (Pirḳe R. El. *l.c.*). After the capture of Jerusalem David marched against the Philistines in the valley of Rephaim (II Sam. v. 22 *et seq.*), and God commanded him to attack his enemy only after seeing the tree-tops bend, for God would judge the guardian angel of the heathen before giving the latter into the hands of the pious, and David was notified by the movement of the tree-tops (pseudo-Jerome commentary on II Sam. v. 24; compare Ginzberg, *l.c.* p. 125). On this occasion the pious king showed his great confidence in God, for there were only four ells between the two armies, and David had to use his utmost authority to make his followers refrain from battle, declaring that he would rather succumb in obeying God than conquer and be disobedient. He had hardly uttered these words when the tree-tops began to move, and he attacked the Philistines victoriously; whereupon God said to the angels: "Behold the great difference between him and Saul!" (compare I Sam. xiv. 19; Midr. Teh. xxvii.). The Philistines thought that David would not war against them, because they possessed a pledge—namely, the bridle of a charger that Isaac had given to Abimelech, the king of the Philistines, as a covenant (Pirḳe R. El. xxxvi.)—and the Arameans thought the same, as they possessed the "maẓẓebot" which Jacob and Laban had erected as covenants. The Sanhedrin, to whom David applied, decided that he was not obliged to keep the covenants of the fathers with the heathen, because the Philistines of David's time were not the descendants of the ancient inhabitants of the country, but a new people that had come from Caphtor (see Amos ix. 7); and the Arameans had lost all right to the covenant between Laban and Jacob on account of their attacks on Israel at the time of Moses and Joshua (Midr. Teh. lx.; Pirḳe R. El. *l.c.*).

David as Ruler.

David was not only a warrior, but also a wise and energetic ruler. Shortly after his accession he appointed not less than 90,000 officials, but he made the mistake of omitting the wise Ahithophel, for which both paid dearly later, as it was principally David's curse that brought about Ahithophel's tragic end (Yer. Sanh. x. 29a, end; abbreviated in Suk. 52b, 53a; compare AHITHOPHEL IN RABBINICAL LITERATURE; PSALMS). Although he was king, he yet modestly asked counsel of his teachers Ira of Jair (M. Ḳ. 16b) and Mephiboshet regarding his decisions in ritual questions (Ber. 4a). He devoted so much time to the study of the Torah and to prayer that he was satisfied with "sixty breaths of sleep" (Suk. 26b). As soon as midnight had come the strings of his harp, made from the entrails of the ram that Abraham had sacrificed on Mount Moriah in place of Isaac, vibrated, and at the sound the king awakened and began to study the Torah (Ber. 3b; Yer. *ib.* i. 2d; Pirḳe R. El. xxi.). David also devoted much time to prayer, the one hundred daily benedictions being his work (Yer. Ber., end; on the ancient reading of this passage, see Ratner, "Ahabat Ẓiyyon we-Yerushalayim," *ad loc.*). He also collected psalms from the time of Abraham down to his own day (B. B. 14b), and composed new ones. When he had finished he exclaimed: "O Lord of the world, is there any creature in the world that has praised Thee so much?" Whereupon God sent a frog to inform him that this mean little animal sounded the praise of God uninterruptedly from early dawn till late at night (Yalḳ. ii. 889, end of Ps.). David, however, forgot himself so far as to boast only for a moment; generally he was very modest (Soṭah 10b). His coins showed on one side his shepherd's crook and scrip, and on the other David's tower (Gen. R. xxxix.; *contra*, B. Ḳ. 97b).



DAVID PRAYING.
(From a Passover Haggadah, Vienna, 1823, in the possession of J. D. Eisenstein.)

David's Piety.

David's piety was so great that his prayers were able to bring things from heaven down to earth (Ḥag. 12b). It was one of his dearest wishes to build the Temple. God said, however, that the Temple would be indestructible if built by David, but that it was His design that it should be destroyed as punishment for Israel's sins; hence David could not build it (Pesiḳ. R. 2; ed. Friedmann, p. 7). David's thoughts were so entirely directed to good that he was among the few pious ones over whom evil inclinations ("yeẓer ha-ra'") had no power (B. B. 17a), and his sin with Bath-sheba happened only as an example to show the power of repentance ('Ab. Zarah 4b, 5a). Some Talmudic authorities even assert that David did not commit adultery, for at that time all women obtained letters of divorce from their husbands who went to war, to use in case the latter should die on the field. Similarly David must not be blamed for Uriah's death, since the latter had committed a capital offense in refusing to obey the king's command (II Sam. xl. 8, 9; Shab. 56a; Ḳid. 43a). The episode with Bath-sheba was also a punishment for David's overweening self-confidence, who thought himself equal to the "three fathers," and besought God to subject him to a trial that he might be able to prove the purity of his heart. God thereupon sent to him Satan in the shape of a bird; David threw an arrow at the latter, hitting instead a beehive under which was Bath-sheba, and on beholding her the king was at once violently enamored of her (Sanh. 107a). He spent twenty-two years in repenting this sin (Tanna debe Eliyahu R. ii.); and he also was stricken with leprosy for half a year, during which time he was abandoned not only by his own court, but by the Holy Spirit, in punishment for his sin (Yoma 22b; compare Ginzberg, *l.c.* pp. 43-46).

The most severe punishment, however, was Absalom's revolt; and it is a proof of David's great confidence in God's goodness that he thanked Him for sending his own son against him rather than a stranger, as the former might have been more inclined to be merciful to him if things had come to the worst (Ber. 7a). In his despair, however, David was about to deny God publicly, in order that the people might not call God unjust for so poorly rewarding David for his piety and justice. His friend Hushai the Archite came in time to show him that his punishment was not unmerited, and would not appear as such to the people, for it may be gathered from Scripture (Deut. xxi. 10 *et seq.*) that he who follows his passion and marries a captive of war must expect from this marriage a "stubborn and rebellious son." If David had not married Absalom's mother, who was a captive, he would not have had such a son (Sanh. 107a). David's kindness of heart is clearly shown in his behavior toward this wayward son, for he not only tried to save the latter's life, but the sevenfold repetition of Absalom's name in his dirge had the effect of saving him from the seven fires, or divisions, of hell (Soṭah 10b). Still David's sins were not atoned for by all these sufferings, and God one day gave him the choice between having his race destroyed and being taken prisoner by enemies. David chose the latter.

The Philistines.

Thereupon it happened that David, pursuing a deer (Satan in disguise), was led into the country of the Philistines, where he was seized by Ishbibenob, Goliath's brother, who flung him into a wine-press. David was confronted by a horrible death, when the bottom of the press began to sink miraculously, so that he was saved from being crushed. Then he was rescued from his perilous position by Abishai, who was apprised, also miraculously, that David's life was in danger (see Abishai in Rab. Lit.); these two pious men conquered the giant Ishbi by pronouncing the name of God (Sanh. 95a; Jellinek, "B. H." iv. 140, 141). Among the trials of David was also the famine of three years (II Sam. xxi. 1 *et seq.*), which he regarded at first as a punishment for the godlessness of the people, and therefore examined the religious and moral conditions of the country for three successive years (Midr. Sam. xxviii. and the parallel passages in Buber *ad loc.*). When he found everything in good order he applied to God to find out the cause of the famine, and was informed that it was a punishment for not allowing the remains of Saul, "the anointed of God," to rest in holy ground. David thereupon brought the remains of Saul and Jonathan to the spot worthy of them, all the people taking part in the ceremony; and this love that Israel showed to its dead king induced God to take pity on them and end the famine (Pirḳe R. El. xvii.). Another debt of the people had still to be paid; namely, Saul's unmerciful behavior toward the Gibeonites, who now insisted on taking vengeance on his descendants. David tried his best to pacify them, conferring with each, and promising them as much money as they might demand. But when he saw that the Gibeonites possessed so little of the characteristic trait of the Israelites—mercy—he ordered them to be excluded from the Jewish community (Midr. Sam. *l.c.*). Although David was responsible neither for the famine nor for the execution of the descendants of Saul who were delivered to the Gibeonites, yet he was wrong in not employing for the relief of the sufferers during the famine the treasure that he had accumulated during many years, especially the gifts of gold presented to him by the women of Israel after his victory over Goliath. It would have been better to use them for that purpose than to save them for the building of the Temple, and God said therefore that he should not build it (Midr. Ruth Zuṭa, ed. Buber, p. 51). David is also censured for undertaking the census of the people, and is punished by a plague (II Sam. xxiv. 15) that, though lasting only a few hours (Ber. 62b; compare Ginzberg, *l.c.* p. 67), demanded many victims, among whom four of his sons, and the elders accompanying him, were slain by the angel; the latter even wiped his bloody sword on David's garments, causing thereby the trembling from which David suffered before his death (Tanna debe Eliyahu R. vii.). This trembling was a punishment for having cut the garment of Saul (I Sam. xxiv. 5); David now found no warmth in the garments that he wore (I Kings i. 1; Ber. 62b; compare Midr. Teh. lvii.).

David's Death.

When David saw his end approaching he tried to escape death by the following means: God had once revealed to him that he would die on a Sabbath, and David therefore spent every Sabbath in studying the Torah, so that the angel of death could not seize him. But the angel outwitted him by causing a noise in the royal palace; whereupon David interrupted his work for a moment, and went to a stairway. The stairs broke down, and David fell dead (Shab. xxx; Ruth R. i. 17). He died on a Sabbath and feast-day—Pentecost—and as no corpse might be moved on Sabbath, and David's body lay in the sun, Solomon called eagles, who guarded the body with their wings (Ruth R. *l.c.*). David reached the age of seventy years, which were presented to him by Adam. David had been destined to die immediately after his birth, but when God was showing the future generations to Adam, the latter offered to give seventy years of his life to David (Pirḳe R. El. xix.; Yalḳ. i. 41). Death did not put an end to

David's greatness and splendor, for he was also among the elect in paradise (Jellinek, "B. H." v. 168; vi. 25, 26), and on the Day of Judgment he will pronounce the blessing over the wine during the great feast (Pes. 119b; compare Cup of Benediction). On the Day of Judgment David will also recite a psalm; the pious in paradise and the impious in hell will loudly say "Amen"; and then God will send an angel to bring even the impious to paradise (Jellinek, "B. H." v. 45, 46).

L. G.

——**In Mohammedan Literature:** Nearly all the legends relating to David (or Da'ud, as he is known to the Arabs) are elaborations of the Biblical narratives which were in circulation among the Jews at the time of Mohammed, and most of which may be traced back to the Koran or its commentaries. Other works which speak of him are the "Khaṣim" of Ḥusain ibn Mohammed, the "Ḳiṣṣat al-Anbiya'," the "Dhakhirat al-'Ulum wa-Natijat al-Fuhum," and the "Ta'rikh Muntakhab."

David and Goliath.

To the Arabs these legends are important, as they form for them a real part of the world's history; and it is interesting to see how they are woven together and connected in a natural sequence. The very stones with which David kills Goliath are historical: one is the stone which Abraham threw at the devil when the latter tried to dissuade him from sacrificing Isaac; another is that which Gabriel pushed out of the ground when he created the spring for Ishmael; another again is the stone with which Jacob fought the angel sent against him by his brother Esau. After killing Goliath, David shares the kingdom with Saul, finally conquers his jealousy through his own generosity, and lives happily with him until Saul's death, when David is unanimously elected king. Baiḍawi remarks that the children of Israel were united for the first time under David.

David's Knowledge.

In addition to the kingdom, God grants David wisdom—interpreted to mean prophecy and the Psalms—and teaches him all he wishes to know; viz., the language of birds and stones, and how to make coats of mail. According to the Arabs, David was the inventor of chain armor, which he was enabled to make because the iron became soft in his hands. "It became like wax," says Baiḍawi, "so that he could mold it into any form he chose." It is related that David obtained this gift in the following manner: One day he overheard two angels, in the guise of men, comparing opinions about him. "He would be a perfect king," said one, "did he not take money from the public treasury"; whereupon David begged God to provide him with some means of self-support, and he was granted knowledge of the art of making armor.

At another time David overheard two men disputing as to the comparative merits of himself and Abraham; one of them contending that David had never endured such trials as had Abraham. David thereupon begged God to try his faith, and God sent a marvelous bird, which led David to a lake, on the shore of which he saw a beautiful woman bathing. This was none other than Bath-sheba, called "Saya" by the Arabs. After causing the death of her husband and marrying her, as related in the Bible, David is rebuked by two angels disguised as men, who tell him the story of the one ewe lamb, and demand judgment. In the Koran these angels come upon David on a day when the doors are closed; and on this Baiḍawi remarks that David so divided his time as to spend one day for devotion, one for giving judgment, one for preaching, and one for his own affairs. He also fasted every other day, and spent half the night in prayer. David was so filled with remorse that he wandered for three years in the desert, and shed more tears in that time than all humankind before him. During David's absence Absalom had made himself king, and had to be deposed.

David as Judge.

After this experience, David never had confidence in his own judgment; and God therefore gave him a miraculous bell, which rang to show the guilty party. As on one occasion he lost confidence in this also, it was taken away from him; and David called the boy Solomon to his aid in matters of justice. Wonderful tales are told showing the sagacity of this lad, then scarcely in his teens.

As David grew old he had only one more desire; namely, to see his future companion in paradise. This request is also granted; and after long wanderings David finds him on the summit of a mountain, on a verdant spot moist with his tears. This companion dies, and is buried by David, who on returning home finds the angel of death waiting for him also.

E. G. H. M. W. M.

——**Critical View:** The salient features of the life and reign of David as outlined from I Sam. xvi. to I Kings ii. have been given above; and the most incisive criticism has been unable to modify any essential point of the narrative, which rests upon a strictly historic foundation. A far different impression of David is given in I Chronicles. Everything doubtful and offensive in regard to David and his house is here passed by, and he himself appears primarily as being preoccupied with the organization of the Temple service. He is said to have gathered together all the material for the building of the Temple, and to have planned every detail, so that Solomon merely had to carry out the work. He also arranged every part of the ritual, and distributed the various offices. The priests he divided into twenty-four families, who performed the service in the sanctuary according to lot. From among the Levites were chosen: (1) the Temple musicians, also divided into twenty-four classes; (2) the functionaries designated for subordinate service in the Temple, as door-keepers and overseers of supplies, chosen by lot according to their families; (3) judges and officials over Israel. The chronicler also mentions ordinances of David pertaining to military matters and to the royal domains.

Subsequently David came to be regarded as the founder of Israel's religious poetry. For since seventy-three of the Psalms have special superscriptions assigning their authorship to him, it became more and more the custom to ascribe the whole Psalter to him. Modern criticism has raised well-founded objections to this assumption. Indeed, the only generally recognized authentic specimen of the king's poetic activity is the splendid dirge on the deaths of Saul and Jonathan (II Sam. i. 19-27).

David and the Psalter.

David's historic importance can not be rated too high, as even those critics must admit who belittle his personal merits by ascribing his successes to a series of extraordinarily fortunate circumstances. Few men in the world's history have achieved as much as David. The molding of Israel into a nation is exclusively his work, for he was the first to unify what until then had been merely a conglomerate of clans and tribes; and Israel remained one nation even after the division of David's single kingdom. Saul had earnestly endeavored to give political unity to Israel; but he had been unequal to the task, and achieved nothing permanent. With Saul's death everything was lost, and the condition of the people was as hopeless as ever. David, in whom prudence and courage were most happily combined, and who was as careful and circumspect in the preparation of his plans as he was daring and energetic in their execution, followed up his successes with a definite end in view; and while aiming only at the attainable, did not rest until he had reached his goal. In view of the immense difficulties he had to overcome and of the crude and complex conditions which he was called upon to meet, the secret of David's success must be sought in his personality. He made himself the living center of his people and of his kingdom. A born ruler of men, and possessed of a royal nature that attracted and led all that came within his influence, he awakened the national enthusiasm, and thereby overcame every obstacle. For David not only made Israel a nation, but also elevated it at once to the pinnacle of glory. Israel itself has felt this; and therefore the return of a David has become the dream of its future and the object of its most ardent hopes.

His Historic Importance.

David's character has often been criticized unfavorably because his critics have not taken the trouble to consider him in relation to his time. It is undeniable that he was the idol of his contemporaries, and that the power of his magnetic personality was irresistible. He was not a saintly character; and the Biblical accounts, with a nice regard for truth, have neither suppressed nor palliated his faults and weaknesses. Still, only blind prejudice will deny that his nature, in its essence, was noble and that he was animated and guided by true piety and a childlike faith in God. Even in modern times it is easy to understand how his contemporaries saw in him "the king after the heart of God."

DAVID, CITY OF. See JERUSALEM.

DAVID: Oriental rabbi; lived at Mosul toward the end of the twelfth century. He was a nephew of the exilarch Daniel b. Solomon (S. Jona writes "Daniel b. Samuel"; also called "Daniel ben Hasdai"), who died in 1175, leaving no male offspring. David contended for the position of exilarch with his cousin Samuel; but while they were thus contending, Samuel b. 'Ali ha-Levi anticipated both and obtained the office.

Certain authors identify this David with David b. Hodaya, exilarch of Mosul, and think that Al-Ḥarizi mentions him ("Taḥkemoni," ch. 46). Pethahiah ("Sibbub," pp. 9, 17, St. Petersburg, 1881) says that when he went to Mosul (1176) he found there the nasi R. David, together with his cousin R. Samuel, who did not succeed in becoming exilarch after Daniel's death. See DAVID BEN HODAYA.

G. M. SEL.

DAVID: A family which played an important part in the earlier annals of the Canadian Jews.

Aaron Hart David: Second son of Samuel David; born in Montreal 1812; died there 1882. He became noted as a physician and communal worker. A licentiate of the Royal College of Surgeons in 1834, he graduated at the University of Edinburgh in 1835, taking up the practise of medicine at Montreal. He became dean of the medical faculty and professor of the practise of medicine at the University of Bishop's College, and governor of the College of Physicians and Surgeons of Lower Canada. David was a prominent member of the Medico-Chirurgical Society of Montreal and a member of the British Association for the Advancement of Science. He held the degree of D.C.L., and was honorary general secretary of the Canada Medical Association. He was for many years president of the Spanish and Portuguese Congregation Shearith Israel of Montreal, in the affairs of which he took a deep and active interest. He was also one of the earliest members of the volunteer military forces of Canada, and served with the Montreal Rifle Corps in the rebellion of 1837-38. He joined the troops sent to the front to repel the Fenian raid in 1866, acting as surgeon to the Hochelaga Light Infantry. David married Catherine Joseph, a daughter of Henry Joseph of Berthier, and had several sons and daughters. Three of his sons were members of regiments which saw service during the Fenian disturbances.

David David: Eldest son of Lazarus David. Born at Montreal Oct. 14, 1764; died there Nov. 30, 1824. He was one of the most prominent citizens of Montreal, and was one of the founders, and a member of the original board of directors, of the Bank of Montreal, the largest financial institution in Canada. He devoted much of his considerable wealth to philanthropic objects, and took a keen interest in the affairs of the Spanish and Portuguese congregation of Montreal, giving it the use of a plot of land for the erection of its first synagogue; this was built in 1777, and was the earliest Jewish place of worship in Canada.

Lazarus David: The first member of the David family to settle in Canada; born in Swansea, Wales, in 1734; died in Montreal Oct. 22, 1776. He went to Canada about the time of the British conquest, and took up his residence in Montreal in 1763. He was one of the founders of the Spanish and Portuguese Congregation Shearith Israel of Montreal, and was one of the most active organizers of the earliest Canadian-Jewish community. He also took a prominent part in the political affairs of his day, and was an extensive landowner in Montreal. His is the oldest Jewish grave in Canada. He was married in Rhode Island, in 1761, to Phœbe Samuel, who was born in England in 1736 and died at Montreal in 1786. He had three sons, David, Samuel, and Moses, who were all prominent in Canadian communal affairs, and two daughters, Abigail and Fanny (Frances). Abigail married Andrew Hays, one of the early Jewish settlers of Canada, and had issue. Fanny married Myer Michaels, but had no issue.

Moses David: The youngest son of Lazarus David; born 1767; died 1814; married Charlotte, a daughter of Commissary Aaron Hart. He was active in the political life of his times and was a communal worker of note. He had a son, **Moses Eleazar David,** born in 1813, who laid the corner-stone of the second synagogue of the Spanish and Portuguese congregation of Montreal in Chenneville street in 1835.

Samuel David: Second son of Lazarus David; born at Montreal Oct. 22, 1766; died there 1824. He married, in 1810, Sarah, daughter of Commissary Aaron Hart of Three Rivers. A prominent Jewish communal worker, he took an active part in the affairs of the Shearith Israel congregation of Montreal. Although engaged in extensive mercantile pursuits, he joined the British forces on the outbreak of the war with the United States in 1812, and had a distinguished military career. His diary, covering the latter part of the eighteenth and the opening years of the nineteenth century, furnishes many pictures of early Jewish colonial life. He had four sons and three daughters. Two of his sons were prominent as cavalry officers in the rebellion of 1837–38, notably at the battles of St. Charles and St. Eustache.

Tucker David: The third son of Aaron Hart David; took up his residence in New York, and was active in the affairs of the Spanish and Portuguese congregation of that city.

DAVID BEN AARON IBN ḤUSAIN: Moroccan poet; lived in the second half of the eighteenth century. At the end of a collection of dirges of Moroccan poets written in commemoration of the destruction of the Temple, there is one composed by David in 1790, in which he describes in vivid colors the persecutions of the Moroccan Jews in that year in consequence of the death of the sultan Muley Sidi Mohammed. The dirge is interesting for the data it contains regarding these persecutions.

G. I. BR.

DAVID BEN ABRAHAM (Arabic name, **Abu Sulaiman Da'ud al-Fasi**): Karaite lexicographer of the tenth century. His surname "al-Fasi" shows that he came from Fez. From a reference by Abu al-Faraj Harun ("Rev. Et. Juives," xxx. 252; compare Pinsker, "Liḳḳuṭe Ḳadmoniyyot," i. 183), and from the fact that Saadia is quoted by him, it is concluded that he flourished in the second half of the tenth century. During that century Fez produced two other authorities on Hebrew philology; namely, Dunash b. Labrat and Judah b. David Ḥayyuj. It was to the congregation of Fez, also, that Judah b. Kuraish, about the beginning of the tenth century, directed his epistle embodying the first systematic application of comparative philology to the elucidation of Biblical Hebrew, a method largely followed by David b. Abraham and the two previously mentioned philologists.

David's lexicon, written in Arabic, of which two manuscript copies are extant, is called "Agron," as Abu al-Faraj Harun and Ali b. Sulaiman attest. One of Saadia's works bears the same title. According to the somewhat defective introduction, the Arabic title, "Kitab Jami' al-Alfaẓ" (Book Containing a Collection of Words), is a translation of the Hebrew title "Agron."

The "Agron."

The copious extracts which Pinsker and Neubauer have furnished from this book afford a definite idea of its nature and contents. The introduction contains general rules on Hebrew word-formation and on the functions of the various letters. The roots are classified according to the number of letters which they contain. The lexicon is divided into twenty-two parts, each part being introduced by a brief essay on the functions of particular letters where their use is functional, and on their importance as single-letter roots where they are so used. Neither his views on grammar nor the grammatical terms given go beyond those found in the works of Saadia and Ibn Ḳuraish (for David's grammatical terminology see the notes to Bacher, "Die Grammatische Terminologie des Jehuda Ḥajjug"). The comparison of the Hebrew and the Arabic is an important part of the lexicon, and agrees generally with the "Risalah" of Ibn Ḳuraish, a work with which David was familiar, although he makes no special reference to its author. A peculiarity of David's work is his view that words explainable by the Arabic are in reality Arabic words which have been taken into the Biblical vocabulary (see Bacher, "Die Hebräisch-Arabische Sprachvergleichung des Abu al-Walid," pp. 71–78).

In his other etymological analyses the interchange of consonants occupies a very important place. He rarely quotes the Aramaic for comparison, but gives the preference to the Neo-Hebraic words of the Mishnah and the Talmud. The Targum he refers to frequently, but in a polemic spirit, mentioning Onkelos the Proselyte as author of the Targum to the Pentateuch, and Jonathan b. Uzziel as author of that to the Prophets. He also refers to the Masorah, and mentions a number of accents. As to the Biblical text, he accepts the traditions of the college of Tiberias as authoritative, and applies to their pure and elegant language the expression "goodly words," found in the blessing of Jacob (Gen. xlix. 21).

Karaite Tendencies.

David's Karaite proclivities are evident from the fact that in a number of passages he indulges in polemics against the Rabbis, quoting Saadia simply as the "Fayyumite." He cites no other author, alluding only in a general way to the Biblical exegetes ("mufassirin") and the grammarians ("diḳdukiyyin"). On one occasion, in connection with an explanation of a Biblical passage, he makes an attack upon Mohammed and Mohammedanism, which attack, however, is judiciously made in Hebrew. In addition to critical comments on Biblical passages, the lexicon of David contains numerous exegetical discussions not directly bearing upon his etymological analyses. On one occasion he refers to a commentary on the Psalms, and on another to a commentary on the Song of Solomon, neither being elsewhere mentioned by him. In the "Introduction to the Decalogue," falsely ascribed to Solomon b. Yeruḥam, a work on punctuation ("tanḳiṭ") by David b. Abraham is cited.

A compendium of David's lexicon is said to have been prepared by Abu Sa'id b. al-Ḥasan al-Baṣri (Levi b. Japheth) at the close of the tenth century. This is the view of Ali b. Sulaiman, who employed this edition for his own lexicon; but according to Abu al-Faraj Harun, David himself prepared a compendium ("Rev. Et. Juives," xxx. 252).

J. W. B.

DAVID BEN ABRAHAM HA-LABAN: French religious philosopher and cabalist; lived after 1200. His grandfather, Judah, was rabbi of Coucy-le-Château. David was the author of "Masoret ha-Berit" (The Bond of the Covenant), on the existence, the unity, and the attributes of God, and also on creation and its purpose (Paris MSS. Nos. 800, 871). The fact that the work exists in several manuscript copies shows that it was much read.

K. I. Ber.

DAVID B. ABRAHAM MODENA. See Modena, David b. Abraham.

DAVID B. ABRAHAM PROVENÇAL (PROVENZALE): Italian scholar; born before 1538; eulogized by the greatest of his contemporaries as the most eminent preacher of his century and as a prominent scholar. He and his brothers Moses and Judah were leading members of the congregation in Mantua. A friend of Azariah dei Rossi, and, like him, thoroughly familiar with the humanitarian tendency of his time, David was the first among the Jews to refer to the works and the importance of Philo; thereby strongly influencing the researches of Azariah, who was the founder of historical criticism in Jewish literature.

In a student's prospectus which has been preserved, David recommends the study of Latin and Italian. In his "Dor Haflagah," no longer extant, he endeavored to prove that more than 2,000 foreign words in Greek and Latin are of Hebrew origin; but the few etymologies preserved in Dei Rossi's "Me'or 'Enayim" are somewhat daring.

David was the author of: "'Ir Dawid," a commentary on the Pentateuch; a commentary on Canticles; "Migdal Dawid," a work on grammar; and "Hassagot," a defense of Philo against the "Me'or 'Enayim."

In general, David seems to have been averse to study toward the end of his life; it is true that he is said to have complained in 1564 of those who busied themselves with the theater and the secular sciences, but this was probably only one of the characteristic inconsistencies of the time. In 1565 David was employed as corrector or Arama's "'Aḳedat Yiẓḥaḳ," a work issued in Venice. He was living in 1572, the year in which Azariah dei Rossi composed his "Me'or 'Enayim." None of his works has been preserved.

G. I. E.

DAVID BEN ABRAHAM SHEMARIAH: Cabalistic writer; lived at Salonica toward the end of the sixteenth century. He wrote "Torat Emet" (The True Law), which is an abridgment of the section on Genesis in the Zohar, with a commentary and glossary. Afterward he found a copy of the Zohar Ḥadash (Salonica, 1597), and added the contents of some of the parashiyyot to his work. At the end of the book there is an appendix called "Tokaḥah" (Warning), which Steinschneider supposes to be intended for "Miftaḥot" (Index). This work was printed at Salonica in 1604.

Bibliography: Fürst, *Bibl. Jud.* i. 198; Steinschneider, *Cat. Bodl.* No. 4846; Benjacob, *Oẓar ha-Sefarim*, p. 645, No. 474; Fuenn, *Keneset Yisrael*, p. 258; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 197; *Ḳore ha-Dorot*, 50b.

K. M. Sel.

DAVID OF ARLES, MAESTRO: Rabbi of Avignon in the sixteenth century. He figured prominently in a casuistic question which agitated the rabbis of Provence, Italy, and Palestine.

The two brothers Isaac and Jacob Gard, learned rabbis of Lisle (Comtat-Venaissin), led astray by a misprint in the rabbinical code "Eben ha-'Ezer," had sanctioned a marriage which was really forbidden. The rabbis of Avignon, led by David and his son-in-law Boniaquet (or Bonisac) de la Roque, supported by Isaac ben Immanuel de Lattes of Bologna and his friend Abraham, son of Aaron of Rome, strongly protested against the decision. All endeavors proving fruitless, and being weary of disputation, the protestants finally appealed to the supreme authority of Joseph Caro, who, together with his rabbinical college, upheld Maestro David and his friends, and pronounced on two occasions (1560 and 1562) a decree of excommunication against Isaac Gard, his brother Jacob having died in the mean time.

Bibliography: Gross, in *Monatsschrift*, 1880, pp. 525-527; idem, *Gallia Judaica*, pp. 14, 271; compare *Rev. Et. Juives*, x. 80.

L. G. S. K.

DAVID BEN ARYEH LOEB OF LIDA: Lithuanian rabbi of the seventeenth century. On his mother's side he was a nephew of R. Moses Rivkes, author of "Be'er ha-Golah." At first rabbi of Lida (whence his name), he became successively rabbi of Zwolin, Mayence, Ostrog, etc. In 1682 he went to Amsterdam, and became rabbi of the Ashkenazic community there. A quarrel broke out between him and the rabbis of the Spanish and Portuguese Jews, who suspected him of being a follower of Shabbethai Ẓebi. David was obliged to resign his rabbinical office and leave Amsterdam. The Polish rabbis protested and denounced the calumniators.

The storm gradually subsided and David returned to Amsterdam. A few years later he went back to Poland, and died in Lemberg. The inscription on his tombstone bears the date 5450 = 1690, but Polak (see "Ḳol Bat Gallim," p. 3) proves this to be a mistake, as several works are extant which were indorsed by him after the year given in the inscription. Stern (see "Bikkurim," i., Preface, p. xxxvi.) gives Ḥeshwan, 5448, which may, however, be a misprint for 5458 = 1698.

David wrote the following works, some of which were printed after his death: "Be'er 'Eseḳ" (The Well of Dispute), containing his discussions with the rabbis of Amsterdam, together with anathemas of the Polish rabbis (Lublin, 1684); "Dibre Dawid" (The Words of David), a book on morals (Lublin, n.d.; Offenbach, 1723; Zedner gives 1724, but without place of publication); "Ḥalluḳe Abanim" (Smooth Stones), a commentary on Rashi to the Pentateuch (Fürth, 1693); "'Ir Miḳlaṭ" (The City of Refuge), a commentary on the 613 commandments (Dyhernfurth, 1690; this is included also in the "Yad Kol Bo"); "Migdal Dawid" (The Tower of David), a cabalistic commentary on Ruth (Amsterdam, 1680); "Berit Adonai" (The Alliance of God), a treatise in Judæo-German on circumcision (Amsterdam, 1684); "Sod Adonai" (The Secret of God), a treatise in Hebrew on circumcision, with a commentary entitled "Sharbiṭ ha-Zahab" (The Golden Scepter), written at Mayence in 1680, and published at Amsterdam 1694; "'Ir Dawid" (The Town of David), a collection of homilies, edited by his son Pethahiah (Amsterdam, 1719); "Shir Hillulim" (Wedding Song), a poem on the occasion of presenting a scroll of the Pentateuch to the synagogue (Amsterdam, 1680). DAVID (TEVELE) B. BENJAMIN: German Talmudic scholar; born at Posen; died at Ottensee, near Hamburg, 1699. He wrote the following works: "Masoret ha-Berit" (The Bond of the Covenant), a homiletic commentary on the Pentateuch and the Five Scrolls, edited by his son Meïr b. David (Hamburg, 1715); "Sha'are Ẓiyyon" (The Gates of Zion), a book of ethics and homiletics divided into thirteen chapters, taken from the "Sefer Ḥasidim" and other works.

DAVID, BENJAMIN FERDINAND: French deputy; born at Niort, department of Deux-Sèvres, March 30, 1796; died there Jan. 24, 1879. He studied medicine, and went on several cruises to the Gulf of Mexico as assistant surgeon in the navy in 1813-14. He was deputy from Deux-Sèvres from 1834 to 1837, and again from 1842 to 1846; mayor of Niort in 1840; and representative of Deux-Sèvres at the legislative assembly of 1849, and from 1852 to 1870. David was in favor of the coup d'état of Dec. 2, 1851, and supported the imperial government throughout the Second Empire.

DAVID BEN BOAZ: Karaite scholar; flourished in the tenth century. He is reported to have been the fifth in the line of descent from Anan, the founder of Karaism (Anan, Saul, Jehoshaphat, and Boaz, father of David). The Karaite chronicler Al-Hiti mentions David under the year 383 of the Hegira (993 C.E.), and gives the titles of the following three works written by him: a commentary on Ecclesiastes; a commentary on the Pentateuch; a treatise on the fundamental principles of the Pentateuch. Of these three only a fragment of the second, comprising Leviticus and the latter half of Deuteronomy, is still extant in manuscript in the St. Petersburg Library. In this commentary, says Harkavy, David frequently attacks Saadia, whom he never calls by name, but by the appellation "hadha al-rajul" (this man).

BIBLIOGRAPHY: Pinsker, *Liḳḳuṭe Ḳadmoniyyot*, p. 53; Harkavy, in Stade's *Zeitschrift*, i. 157; *Al-Hiti*, published by Margoliouth in *Jew. Quart. Rev.* ix. 432.

DAVID BONET BONJORN or **BONGORON:** Convert to Christianity; lived in Catalonia in the second half of the fourteenth century. He is believed to have been the son of the astronomer Jacob Poel. In consequence of the persecutions of 1391 he embraced Christianity, assuming the name "Maestre Bonet Bonjorn." He was the intimate friend of Profiat Duran, who had also been compelled to embrace Christianity. Persuaded by David, Profiat consented to accompany him to a foreign country so that they might both return to Judaism. On the eve of departure David changed his mind, and declared himself satisfied with his new religion. Profiat Duran left Spain alone. He subsequently addressed to his friend the well-known epistle "Al Tehi ka-Aboteka," a masterpiece of satirical criticism against converts to Christianity.

G. I. BR.

DAVID, CHRISTIAN GEORG NATHAN: Danish political economist and politician; born at Copenhagen Jan. 16, 1793; died there June 18, 1874. Christian received his education in his native city, graduating from its university in 1811. His first contribution to literature was a reply (in 1813) to Th. Thaarup's translation of Buchholz's "Moses und Jesus," a work unfriendly to the Jews, under the title "Et Par Ord i Anledning af Forhindringen til Oversaettelsen af Buchholz's Moses und Jesus." He then took the degree of doctor of philosophy at the University of Göttingen, and published "for Statsoekonomisk Archiv," I–II, 1826–29.

In 1830 David deserted Judaism and joined the Protestant Church. In the same year he was appointed professor of political economy at the University of Copenhagen, and about the same time became political correspondent for the "Maanedsskrift for Litteratur" and leader of the Liberals. In 1834 he started a weekly paper, "Feedrelandet," but being accused of publishing articles in advocacy of a constitutional government, he was dismissed from the university, although acquitted by the court. After a trip to England David served as a representative from 1840 to 1846, being also elected (1841) an alderman of Copenhagen. He then associated himself with the government party, and was appointed by the king to the Senate. Soon afterward he was elected representative from Copenhagen to the first Folkething, where he became leader of the so-called Sleswick-Holstein party.

David was elected chief inspector for the prison department in 1849; was chief of the state statistical department from 1854 to 1875; and became a director of the National Bank in 1858. After the war of 1864, he became secretary of the treasury in the administration of Bluhme, but in the following year he resigned his office. In 1870 he also gave up his seat as member of the Rigsdag, and withdrew entirely from political life.

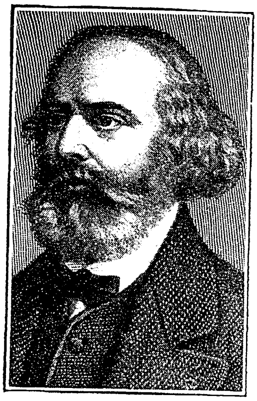
DAVID, ERNEST: French musician; born at Nancy July 4, 1844; died at Paris June 3, 1886. He completed his musical education under Fétis, and was a prolific writer. His principal works are: "La Musique chez les Juifs," 1873; "Etude Historique sur la Poésie et la Musique dans la Cambrie" (with M. Lussy); "Histoire de la Notation Musicale Depuis Ses Origines" (1882); "La Vie et les Œuvres de J. S. Bach, Ses Elèves et Ses Contemporains: Mendelsohn-Bartholdi et Robert Schumann" (1886).

Bibliography: Baker, *Biographical Dict. of Musicians*.

S. J. So.

DAVID, FERDINAND: Violinist and violin-teacher; born at Hamburg Jan. 19, 1810; died suddenly July 19, 1873, near Kloster, Switzerland, while on a mountain tour with his family. His musical talent manifested itself early; and after a course of only two years with Spohr and Hauptmann at Cassel, he made his début in 1825 as a virtuoso in the Gewandhaus, Leipsic. During 1827 and 1828 he was a member of the orchestra of the Königsstädtische Theater in Berlin, where he first became acquainted with Felix Mendelssohn. A year later he became first violinist in the private quartet of a wealthy and influential amateur of Dorpat, Baron von Liphardt, whose daughter he subsequently married. He was in Russia from 1829 until 1835, making frequent and successful tours to Riga, St. Petersburg, Moscow, and other important cities.



Ferdinand David

When, in 1835, Mendelssohn became conductor of the Gewandhaus concerts, he chose David for his concert-master; and here the young violinist found ample scope for the development of his genius, particularly after the establishment of the Conservatory in 1843. In this position he remained until his death; and it was largely due to his influence that Leipsic remained the center of violin-playing in Europe after the death of Mendelssohn, Schumann, and Gade. The relations between Mendelssohn and David were particularly cordial, and upon the death of Mendelssohn, David was one of those to whom the posthumous works of the master were entrusted for publication.

In his playing David combined the qualities of Spohr with the greater technical skill and brilliancy of the modern school. Joachim, Wilhelmi, and other eminent violinists of the present day were among his pupils. It was largely due to his initiative that many old masterpieces of the Italian, French, and German schools were preserved; for he not only took a prominent part in preparing revised editions of the works of Haydn, Beethoven, and others, but actually edited and published, for purposes of study, nearly the whole classical repertoire of the violin. His greatest work in this domain is the celebrated "Die Hohe Schule des Violinspiels: Werke Berühmter Meister des 17ten und 18ten Jahrhunderts," consisting of twenty-three numbers containing selections from Porpora, Tartini, Vivaldi, Leclair, J. S. Bach, and many others. Scarcely less important are the studies, op. 39, 44, 45, and 70. Among his other works are the following: Five concertos, that in D minor (op. 35) being arranged also by A. Wilhelmj; 6 caprices, op. 20; "Concert Polonais," in E; 12 Salonstücke, op. 24; 5 *ib.*, op. 28; 30 Charakterstücke, entitled "Aus der Ferienzeit" (op. 46, 47, 48, and 50); "Bunte Reihe," 24 pieces, op. 30, and its continuation, "Nachklänge," 15 pieces, op. 41; 8 Kammerstücke, op. 36; a comic opera, "Hans Wacht," 1852; and, in addition to these numerous variations on original, operatic, national, and song themes, as well as other minor compositions.

DAVID OF FEZ. See DAVID B. ABRAHAM.

DAVID GERSON: Rabbi at Reshid, Egypt; flourished in the middle of the seventeenth century. He was a contemporary of Mordecai ben Judah ha-Levi, author of "Darke No'am," in which are given some of Gerson's responsa. He is also mentioned as a great rabbinical authority by Abraham ben Mordecai ha-Levi, author of "Ginnat Weradim" and "Gan ha-Melek," who was his pupil. Moses Ḥagiz, in his "Leḳeṭ ha-Ḳemaḥ" on Oraḥ Ḥayyim, attributes to David Gerson the discontinuance of the practise of lighting a pipe from a tallow candle, which according to some authorities is forbidden, as the use of tallow (= חלב) is prohibited in the Pentateuch. David Gerson gave as a reason a dream which he once had of being punished as though he had eaten fat because he used to light his pipe from tallow candles.

L. G. I. BR.

DAVID BEN ḤAYYIM HA-KOHEN (known under the abbreviation **RaDaK**): Rabbi at Corfu, and later at Patros, Greece, at the beginning of the sixteenth century. He was a pupil of Judah Minz, and a contemporary of Elijah Mizraḥi and Moses Alashkar, with whom he maintained a correspondence, though chiefly with the latter, with whom he subsequently had some disputes. David became prominent through his attacks upon Benjamin Ze'eb, who had permitted an "'agunah" to marry on the testimony of a Gentile.

The whole of David's works, with the exception of thirty-three responsa, perished in a fire at Adrianople. The responsa were arranged by David's son-in-law, David Vital, and were published under the title "She'elot u-Teshubot MaHaRDaK" (Constantinople, 1537; reprinted several times).

BIBLIOGRAPHY: Conforte, *Ḳore ha-Dorot*, p. 32a; Steinschneider, *Cat. Bodl.* col. 785; Michael, *Or ha-Ḥayyim*, p. 326, No. 725.

L. G. I. BR.

DAVID IBN HIN: Cabalist; lived at Salonica at the end of the sixteenth and at the beginning of the seventeenth century. Although blind, he devoted himself to cabalistic studies, and published the "Sefer Gerushim" of Moses Cordovero (Venice, 1600) and the "Sodot" of Joseph Gikatilla. David also published a work entitled "Liḳḳuṭe Shoshannim"(Collections of Lilies), containing explanations of Biblical passages from the works of Jacob Berab, Meïr 'Aramah, Obadiah Sforno, Isaac Gershon, and Samuel Almosnino (Venice, 1602).

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* col. 863; idem, *Jüd. Lit.* p. 453, note 11; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 204.

K. I. BR.

DAVID BEN HODAYA OF MOSUL: Prince of the Davidic house; lived at Mosul (New Nineveh) about 1150–1220. His genealogy, contained in an excommunication issued by him, reads as follows:

"David, son of Hodaya, son of Azariah, son of Solomon, son of Messias (or Moses), son of Judah, son of Hezekiah, son of Judah, son of Gamaliel the latter, son of Judah, son of Gamaliel the latter, of Tiberias, son of Judah the Saint, etc., son of Shefatiah, son of King David."

The list of names is evidently incomplete and incorrect. After the death of the childless exilarch Daniel ben Ḥasdai (or Solomon; see Grätz, vi. note 10), his two nephews, David b. Hodaya and Samuel, were candidates for the office. The election was still undecided when the traveler R. Pethahiah was at Mosul (about 1175). David was a powerful protector of Samuel ben Ali at Bagdad, the chief opponent of Maimonides in the East.

Samuel had made many enemies by his attacks on Maimonides, and against these the above-mentioned excommunication, dated about 1191, was directed. Al-Ḥarizi, who visited Mosul in 1217, mentions David as the exilarch (ch. 46), and praises him and his nephew Hodaya as the most meritorious in that region. See DAVID.

G. A. K.

DAVID BEN ISAAC HA-KOHEN: Prominent rabbinical scholar; lived at Avignon in the thirteenth century. Aaron b. Jacob ha-Kohen of Narbonne, his grandson, who went to Majorca in 1306, names him in his "Orḥot Ḥayyim" as the teacher of R. Eliezer ben Immanuel of Tarascon, and quotes his ritual work "Hilkot Ṭerefot" (Laws on Forbidden Food; Renan-Neubauer, "Les Rabbins Français," p. 516; compare *idem*, "Ecrivains Juifs Français," p. 468). In the collection of responsa which he exchanged with R. Samuel of Agde, Rabbi Eliezer often mentions David as his teacher, and quotes in his name casuistic decisions of R. Nathan of Trinquetailles (*ib.*). R. Eliezer's son Immanuel was the grandfather of Isaac de Lattes (Isaac of Lattes, "Sha'are," No. 74).

DAVID BEN JACOB: Rabbi of Szerczow, government of Grodno, Russia; one of the most influential rabbis of Lithuania at the end of the eighteenth century. He wrote "Ḥomot Yerushalayim" (The Walls of Jerusalem; Frankfort-on-the-Oder, 1807), containing a commentary to a portion of the Shulḥan 'Aruk; *i.e.*, to the Oraḥ Ḥayyim from its beginning to the laws concerning tefillin.

BIBLIOGRAPHY: Zedner, *Cat. Hebr. Books Brit. Mus.* p. 178; Fuenn, *Keneset Yisrael*, p. 258; Benjacob, *Oẓar ha-Sefarim*, p. 171, No. 163.

L. G. M. SEL.

DAVID, JACOB JULIUS: Austrian journalist and author; born at Weisskirchen, Moravia, Feb. 6, 1859. Immediately after his birth his parents removed to Fulnek, Moravia, where his father died of cholera when David was but seven years old. The boy successively attended the gymnasia of Teschen, Troppau, and Kremsir. In 1878 he entered the University of Vienna to study philology. While a student he was subjected to want and privation; and it was not until 1890 that he was able to secure means for passing his examinations for his doctorate. Thereafter he devoted himself wholly to literature and authorship, his first poems appearing in the "Deutsches Dichterbuch aus Oesterreich," edited by Karl Emil Franzos. Later he published long and short stories, and numerous poems and essays in various publications and periodicals of Austria and other countries; distinguishing himself equally as a lyric poet, essayist, dramatist, and novelist.

The more important of his productions are: "Das Höfe-Recht," a story, Dresden; "Das Blut," "Gedichte," "Probleme," Dresden, 1892; "Die Wiedergeborenen," six tales, Dresden; "Hagar's Sohn," a drama in four acts, which appeared in the "Moderne Rundschau," and was performed in the Landestheater of Vienna on Jan. 20, 1891; and "Am Wege Sterben," Vienna, 1900. All these productions, evincing a rich, vivid imagination, forcible style, and exquisite finish, mark their author as a fine artist of the realistic school. At the beginning of his literary career David was for some time associate editor of Franzos' "Wiener Illustrirte Zeitung." Since 1891 he has collaborated on the "Montags-Revue," writing for it theatrical notices on the performances in the Vienna Burg- und Volkstheater, and later also conducted the art department in the "Oesterreichische Volkszeitung."

S. B. B.

DAVID BEN JACOB HA-KOHEN: Turkish Talmudist; flourished about 1550 in Salonica. He wrote essays ("shiṭṭot") to the Talmudical orders Mo'ed, Nashim, and Neziḳin, of which there was published after his death the part on Giṭṭin, "Migdal Dawid" (The Tower of David), Salonica, 1597. He is also mentioned in the responsa of Samuel de Medina (No. 198) and Joseph di Trani (No. 25). David is distinguished as Talmudist by his profound knowledge (Ghirondi, "Toledot Gedole Yisrael," p. 80). Azulai supposed that David was a pupil of Solomon b. Jehiel Luria.

Bibliography: Azulai, *Shem ha-Gedolim*, ii. 30; Steinschneider, *Cat. Bodl.* col. 867.

L. G. I. Ber.

DAVID BEN JACOB MEÏR: Italian astrologer of the fifteenth century, and a member of the Kalonymus family. He wrote in 1464 two astrological treatises, the smaller of which is on the conjunction of Saturn and Jupiter. He dedicated the latter work to King Ferdinand I. of Naples, and hoped thereby to obtain religious liberty for his coreligionists. In 1466 David translated from Latin into Hebrew an astronomical work of John of Gmünd, which he called "Mar'ot ha-Kokabim" (The Aspects of the Stars). The work is a description of an astronomical instrument which had been invented at Vienna in 1417. He was invested by the king with an office, probably that of astrologer. In 1484 he wrote a philosophical treatise on the "Destructio Destructionis" of Averroes, which he addressed to his son Ḥayyim Kalonymus.

DAVID B. JACOB OF SZCZEBRSZYN: Polish scholar; known only as the author of a commentary on the so-called "Targum Jonathan" and "Targum Yerushalmi" of the Pentateuch (also known as "Targum Yerushalmi I." and "Targum Yerushalmi II."), and on the "Targum Sheni" of the Book of Esther. It was published in Prague in 1609, but there is a record of a former edition printed in the same place in 1537, which would place the author in the first half of the sixteenth century. The commentary, which is really a glossary, was reprinted in Prague in 1781, and again in 1789. Steinschneider ("Cat. Bodl." No. 4816) denies the existence of the edition of 1537.

L. G. I. Br.

DAVID BEN JUDAH: Exilarch of Babylonia 820–834; successor to Iskawi II. at a time when this dignity was on the decline. His appointment was contested, by a party which favored Daniel, a Karaite according to Bar Hebræus. The calif Al-Ma'mun, to whom the contest between David and Daniel was submitted, is said to have declined all interference by issuing an edict permitting any community numbering not less than ten persons—be they Christians, Jews, or Zoroastrians—to elect its own chief. Bar Hebræus adds that the followers of David were "Tiberians"; if the reading is correct (which Grätz doubts). This would point to the participation of Palestinian Jews in the election. David was finally recognized as exilarch. About 834 David appointed as gaon in Pumbedita a scholar of the name of Isaac ben Ḥananya.

G. A. K.

DAVID BEN JUDAH: German cabalist; flourished in the thirteenth century. He was not the son of Judah ha-Ḥasid (see A. Epstein in "Monatsschrift," 1895, p. 450), but he may have been his grandnephew, the fact of his father's name being "Judah" being responsible for the confusion in the sources quoted by Gross ("Magazin," i. 106 *et seq.*). David was an eminent cabalist, and is highly praised by Eleazar of Worms. He wrote the following works, none of which has been published: "Sodot shel Ma'aseh Bereshit" (The Mysteries of the Beginning), a cabalistic explanation of the Creation;

"Ma'aseh Merkabah" (Description of the Chariot); "Perakim be-Siklin ha-Nibdalim," chapters on the individual intellects which, according to David, are between the עולם המרכבה and עולם הספירות; "Sefer ha-Gebul" (Book of the Boundaries), on the names of God (the foregoing treatises are still extant in manuscript in the Bodleian Library: Neubauer, "Cat. Bodl. Hebr. MSS." No. 1911, 5); "Or Zaru'a" (Sown Light), a mystic commentary on the prayers (*ib.* No. 1624); a commentary on the Sefer Yeẓirah (mentioned in the preceding work); "Libnat ha-Sappir" The (Whiteness of the Sapphire), cabalistic explanations on the Haggadot of the Talmud, quoted by Bezalel Ashkenazi in his "Shiṭṭah Meḳubbeẓet" (B. B. ed. Lemberg, 1809, p. 64); "Mare'ot ha-Ẓobe'ot" (Visions of the Assembled), a mystic commentary on the prayers, after the "Or Zaru'a." I. D. Luzzatto expresses his doubts concerning David's authorship of the "Or Zaru'a," as the work contains passages from the Zohar, which was composed later (see "Yad Yosef," p. 13).

Bibliography: Steinschneider, *Jewish Literature*, p. 304, note 7; Jellinek, *Beiträge zur Gesch. der Kabbala*, ii. 47; Fuenn, *Keneset Yisrael*, p. 263.

DAVID BEN JUDAH. See Leon, Messer David ben Messer.

DAVID BEN KALONYMUS OF MÜNZENBERG: German Tosafist and liturgical poet; flourished at the end of the twelfth century and the beginning of the thirteenth. He was rabbi of Münzenberg, Hesse. His mother was a daughter of Kalonymus the Elder of Speyer, and his teacher was his granduncle Samuel ha-Ḥasid, also of Speyer. He is quoted in the Tosafot and in the Talmudic works of his pupil Simson of Sens (Commentary to Sifra, 34a and 53a), of Mordecai ben Hillel (Ket. ii. 2; 'Ab. Zarah v.), of Isaak b. Moses of Vienna ("Or Zaru'a," No. 720), of Meïr b. Baruch of Rothenberg (Responsa, No. 872), and others. He is also the author of some seliḥot.

Bibliography: Azulai, *Shem ha-Gedolim*, i. 46; Zunz, *Literaturgesch.* p. 328; Epstein, in *Monatsschrift*, 1895, pp. 400, 448, 451; Landshuth, *'Ammude ha-'Abodah*, p. 60.

L. G. I. Ber.

DAVID KALONYMUS OF NAPLES: Italian scholar; lived in the fifteenth and sixteenth centuries. In "Kerem Ḥemed" (iii. 173) there is published a letter written in 1286 by Jesse b. Hezekiah, the Exilarch of Damascus, anathematizing those who calumniated Maimonides. David Kalonymus, intending to give greater publicity to the anathema, transcribed three or four copies of it. He was particularly induced to do so, he said, by the fear that during the persecutions which the Jews suffered at that time in Portugal and western Castile, the original might be lost. At the end of the letter is found: "Written at Naples the first of Ab, 5266" (= July 21, 1506). Steinschneider ("Cat. Bodl." col. 1575) thinks it possible that David was the son of Ḥayyim Kalonymus, and the father of Kalo Kalonymus (see Zunz, "Z. G." 10, 232).

L. G. M. Sel.

DAVID (ABU SULAIMAN) AL-ḲUMISI: Karaite teacher of the tenth century, of whom little is known. As his name indicates, he was a native of the Persian province of Ḳumis. He died in Jerusalem in the year of the Hegira 334 (= 945 C.E.). His Biblical commentaries, written in Arabic, have been lost, and only two passages of his are known. One of them refers to the Passover sacrifice, which according to Karaites did not begin until the twilight of the 15th of Nisan, and which, being a private sacrifice, could not displace the Sabbath. When the 15th of Nisan fell on a Sabbath, the private sacrifice was omitted, only one lamb, according to David, being offered for the whole of Israel. It was not eaten, however, but burnt whole (see Passover). The other passage refers to the prohibition, generally accepted by the Karaites, against eating the fatty tail. David derived the prohibition from Lev. iii. 9, where the fatty tail is called simply "fat." This "proof," though refuted by Saadia, is repeated by all the Karaites.

Bibliography: Harkavy, in *Luaḥ Aḥiasaf*, 1895, ii. 281; Poznanski, in *Jew. Quart. Rev.* viii. 681, and in *Rev. Et. Juives*, xiv. 50, 176.

K. S. P.

DAVID LAḤNI BEN ELIEZER: Rabbi at Karasu-Bazar, in the Crimea, at the end of the seventeenth century. He was a native of Poland, whence his Tatar surname "Laḥni" (from "Liaḥ" = Poland). Abraham Firkowich claimed to have had in his possession a manuscript containing a work by David entitled "Mishkan David" (The Residence of David), which was divided into two parts, the first treating of the Hebrew roots and their significations, the second of Hebrew synonyms. David arranged and published the Crimean "Ḥazanya" ritual.

Bibliography: Fuenn, in *Ha-Karmel*, iii. 117; idem, *Keneset Yisrael*, p. 240.

G. I. Br.

DAVID BEN LEVI: Rabbi of Narbonne, France; flourished at the end of the thirteenth century. From the fact that he speaks of R. Samuel Shekili, who was probably his master, as of one already dead, it is likely that he lived on into the fourteenth century. He wrote an important work called "Miktam" (from the Biblical מכתם לדוד), containing the halakic decisions of the Talmud arranged in the order in which they occur in the latter. This book is often quoted in the "Orḥot Ḥayyim" of Aaron ha-Kohen, in the "Kol Bo" of David Abudarham, and in the "Bet Yosef" of Joseph Caro. In the consultations of R. Solomon b. Adret are found decisions signed "David b. Levi, author of the 'Miktam.'" David corresponded with Isaac b. Isaac of Chinon, who called him his master. A part of the "Miktam" is still extant in manuscript in the collection of Baron Günzburg; the collection of Halberstamm contained a fragment of David's commentary on Alfasi.

DAVID HA-LEVI: German Talmudist; lived in the eleventh century. He is mentioned in "Mordecai" (Baba Meẓi'a, 332), where his decision is given in an important law question. He is also mentioned in 'Anaw, "Shibbole ha-Leḳeṭ," part i., "Hilkot Ḥanukkah." No. 185; and part ii., "Issur," No. 26.

Bibliography: Buber, Introduction to *Shibbole ha-Leḳeṭ*, Wilna, 1887.

L. G. N. T. L.

DAVID BEN MENAHEM COHEN: Dutch scholar; lived at Amsterdam in the first half of the seventeenth century. He was the author of "Mizmor le-Todah" (Song of Thanksgiving), edited by Elijah Aboab, Amsterdam, 1644. It describes in Judæo-German rimes the historical facts contained in the Pentateuch and the Five Scrolls. David also published in Judæo-German the prayers of Rosh Ḥodesh according to the German and Polish rite, Hanau, 1626.

Bibliography: Steinschneider, *Cat. Bodl.* col. 323, No. 2130; col. 879; Fürst, *Bibl. Jud.* p. 206.

E. C. I. Br.

DAVID (ABU SULAIMAN) IBN MERWAN AL-MUḲAMMAṢ (or AL-MIḲMAṢ) AL-RAḲḲI (also known as **David ha-Babli**): Philosopher and controversialist; native of Rakka, Mesopotamia, whence his surname; flourished in the ninth and tenth centuries. Harkavy derives his byname from the Arabic "ḳammaṣ" (to leap), interpreting it as referring to his asserted change of faith (Grätz, "Gesch." Hebr. transl., iii. 498). This is uncertain. The name is written אלקומסי in Mas'udi's "Al-Tanbih" (ed. De Goeje, p. 113), in a Karaitic commentary to Leviticus, and in a manuscript copy of Jefeth's commentary to the same book ("Jew. Quart. Rev." viii. 681), and is perhaps a derivative from the city of Ḳumis in Taberistan (Yaḳut, iv. 203). Another Karaite bears the name "Daniel al-Ḳumisi," and in Al-Hiti's chronicle this name is also spelled with a ẓade ("Jew. Quart. Rev." ix. 432).

Polemical Works.

David, the father of Jewish philosophy, was almost unknown until the latter part of the nineteenth century. The publication of Judah Barzilai's commentary to the Sefer Yeẓirah ("Meḳiẓe Nirdamim," 1885), in which is found a poor Hebrew translation of the ninth and tenth chapters of David's philosophical work, first brought the latter into notice. Barzilai says that he does not know whether David was one of the Geonim, but claims to have heard that Saadia had known him and had profited by his lessons. Pinsker and Grätz, confounding him with Daniel ha-Babli of Cairo, make him a Mohammedan convert to Karaism, on the ground that he is quoted by Karaite scholars, and is called by Hadasi "ger ẓedeḳ" (pious proselyte). The discovery by Harkavy of the "Kitab al-Riyaḍ wal-Ḥada'iḳ," by the Karaite Al-Ḳirḳisani, threw further light on David. Al-Ḳirḳisani cites a work by him on the various Jewish sects, and says that David had "embraced Christianity" (tanaṣṣar); that he was for many years the pupil of a renowned Christian physician and philosopher named Hana; and that, after acquiring considerable knowledge of philosophy, he wrote two works against Christianity which became famous. But it seems more probable that the word "tanaṣṣar" means simply that David had intercourse with Christians. Ḳirḳisani, indeed, does not mention his return to Judaism, and no Rabbinite mentions his conversion to Christianity. His conversion to Christianity can hardly be reconciled with the fact that he is cited by Baḥya, by Jedaiah Bedersi (in "Iggeret Hitnaẓẓelut"), and by Moses ibn Ezra. Ḳirḳisani mentions two other books by David: "Kitab al-Khaliḳah," a commentary on Genesis extracted from Christian exegetical works; and a commentary on Ecclesiastes. He is mentioned as a learned Karaite by David al-Hiti in his chronicle of Karaite doctors, published by Margoliouth ("Jew. Quart. Rev." ix. 432).

In 1898 Harkavy discovered in the Imperial Library of St. Petersburg fifteen of the twenty chapters of David's philosophical work entitled "'Ishrun Maḳalat" (Twenty Chapters). The subject-matter of these fifteen chapters is as follows: (1) the Aristotelian categories; (2) science and the reality of its existence; (3) the creation of the world; (4) the evidence that it is composed of substance and accidents; (5) the properties of substance and accident; (6) a criticism of those who maintain the eternity of matter; (7) arguments in favor of the existence of God and His creation of the world; (8) the unity of God, refuting the Sabeans, the Dualists, and the Christians; (9) the divine attributes; (10) refutation of anthropomorphism and Christian ideas; (11) why God became our Lord; (12) showing that God created us for good and not for evil, and combating absolute pessimism as well as absolute optimism; (13) the utility of prophecy and prophets; (14) signs of true prophecy and true prophets; (15) mandatory and prohibitive commandments. David as well as other Karaites—for instance, Joseph al-Baṣir and Al-Ḳirḳisani—was a follower of the Motazilite kalam, especially in his chapter on the attributes of God, wherein he holds that, though we speak of these attributes as we speak of human attributes, the two can not be compared, since nothing comes to Him through the senses as is the case with man. God's "life" is a part of His "being"; and the assumption of attributes in the Deity can in no way affect His unity. "Quality" can not be posited of the Deity. In his tenth chapter, on "Rewards and Punishments," David holds that these are eternal in the future world. This chapter has many points in common with Saadia, both drawing from the same source (Schreiner, "Der Kalam," p. 25). David is the first Jewish author who mentions Aristotle ("Jew. Quart. Rev." xiii. 450).

Other Works.

David quotes two others of his own works which are no longer in existence: "Kitab fi al-Budud" and "Kitab fi 'Arḍ al-Maḳalat 'ala al-Manṭiḳ," on the categories. In one passage David relates that he had a philosophical disputation in Damascus with a Mohammedan scholar, Shabib al-Baṣri. A fragment of another work, "Kitab al-Tauḥid," on the unity of God, has been discovered among genizah fragments, and has been published by E. N. Adler and I. Broydé in "Jew. Quart. Rev." (xiii. 52 *et seq.*). David does not betray his Jewish origin in his philosophical work. Contrary to the practise of Saadia, Baḥya, and other Jewish philosophers, he never quotes the Bible, but cites Greek and Arabic authorities. It is possible that this accounts for the neglect of his work by the Jews.

DAVID, MEYER MICHEL: Hanoverian court banker and agent of the board of finance; born in Hanover in the middle of the eighteenth century. He was a son of Michel David of Hanover, the friend of Moses Mendelssohn. Michel David made a gift to his native city of the synagogue which he and Solomon Getschlick had purchased. Meyer, his son, left (c. 1798) one hundred thousand thalers to found a school in Hanover in which sons of the Jewish poor might obtain free instruction in the sciences, in Hebrew, and in certain modern languages, and might receive besides a monthly allowance. This school, called the "Meyer Michel Davidsche Freischule," was reorganized in 1835; J. M. Frensdorff was inspector until 1861, and S. Kayserling from Frensdorff's death until 1898. It has produced rabbis, teachers, bankers, mechanics, and merchants, and still continues its beneficent work.

DAVID (TEVELE) BEN MOSES: Russian rabbi and author; born in Turetz, in the government of Minsk, 1792; died at Minsk April 27, 1861. At the age of fifteen he went to Volozhin, where he studied in the yeshibah under Rabbi Ḥayyim, from which he graduated as rabbi. At the age of twenty-five he became rabbi of Stouptz, where he remained from 1817 to 1849, in which year he was elected chief rabbi of Minsk. He occupied that position till his death. There he wrote "Bet Dawid," in two parts, containing responsa and sermons. After his death the following works written by him were published: "Naḥalat Dawid," the first part containing responsa, and the second part containing novellæ on Baba Ḳamma and Ḥullin (Wilna, 1864); "Dibre Dawid," responsa (Wilna, 1882). Among the pupils of David Tevele were Rabbi Joshua Heller of Telshi and Rabbi Abraham Samuel of Eishishki.

Bibliography: B. Eisenstadt, *Rabbane Minsk*, pp. 31, 32; Introduction to *Bet Dawid*; Fuenn, *Keneset Yisrael*, p. 381; Maggid, *'Ir Wilna*, p. 90.

DAVID BEN MOSES HA-KOHEN. See Toledo.

DAVID BEN MOSES OF NOVOGRUDOK: Russian rabbi; born 1769; died in Novogrudok, government of Minsk, 1836. He became rabbi of that town in 1794, and held the position for forty-three years, until his death. He was one of the leading Talmudists of Russia in his time, and was especially noted for his keenness in that form of discussing knotty rabbinical questions which is known as Pilpul. David is the author of "Galya Massekta," a work still highly valued among old-style Talmudists. It was published at Wilna in 1844 in two volumes: the first containing responsa and novellæ; the second being devoted to sermons, commentaries on the Haggadah, etc.

Bibliography: Fuenn, *Keneset Yisrael*, pp. 243-244.

H. R. P. Wi.

DAVID NIETO REDIVIVUS. See Deutsch, Heinrich.

DAVID THE PIOUS: French scholar; lived at Château-Thierry in the second half of the twelfth and the beginning of the thirteenth century. Zunz ("Literaturgesch." p. 305; compare Carmoly, "Itinéraires," p. 177) identifies him with R. David ben Joseph, who, with Isaac ben Abraham of Dampierre, Isaac ben David, and Joseph ben Moses, adopted the decisions of the synod of Troyes which had met about 1160 under the auspices of Rabbenu Tam. Samuel of Falaise (Sir Morel) probably referred to David the Pious when he spoke of רבינו דוד as being a contemporary of Sir Léon of Paris ("Rev. Et. Juives," vii. 47). Together with Solomon ben Judah the Saint, of Dreux, the two brothers Simson and Isaac ben Abraham of Dampierre, Samson of Corbeil, Abraham of Touques, and Eliezer ben Aaron of Burgundy, he was among those scholars of the north of France to whom, about 1204 or 1205, Meïr ben Todros ha-Levi Abulafia addressed his epistle against the doctrine of resurrection as taught by Maimonides.

Bibliography: Gross, *Gallia Judaica*, p. 258.

L. G. S. K.

DAVID RAPHAEL BEN ABRAHAM POLIDO: Satirist; flourished in the seventeenth and eighteenth centuries. His name, and the fact that his work was printed in Leghorn, suggest that he was an Italian; but Somerhausen reads פולניא (Polonya [?]) instead of פולידא; whereas Steinschneider interprets it as "Fulda." David wrote "Zikron Purim" (Remembrance of Purim), a parody on the piyyuṭim for the Feast of Purim, followed by a testament of Haman, a poem full of coarse jokes, but a good imitation of the Sephardic piyyuṭim (Leghorn, 1703). Delitzsch gives 1736 as the date of its publication.

Bibliography: Steinschneider, *Cat. Bodl.* col. 855; idem, *Jew. Lit.* p. 245; Somerhausen, in *Orient*, xi. col. 181; Fürst, *Bibl. Jud.* iii. 110; Delitzsch, *Gesch. der Jüd. Poesie*, p. 82.

DAVID B. SAADIA. See Dosa b. Saadia.

DAVID, SAMUEL: French musician; born in Paris Nov. 12, 1836; died there Oct. 3, 1895. He received his musical education at the Conservatoire, where he was a pupil of Bazin and Halévy. In 1858 he received the "Grand Prix de Rome" for his cantata "Jephtha," and in the following year was the recipient of another prize for the work entitled "Le Génie de la Terre," which was performed by a male chorus and orchestra, the former numbering 6,000 voices. In 1861 he was appointed professor at the Collège de Saint-Barbe, and in 1872 he became musical director in the synagogues of Paris.

David was the composer of the following operas and operettas, all of which were performed in Paris: "La Peau de l'Ours," operetta, 1858; "Mademoiselle Sylvia," operetta, 1868; "Tu l'as Voulu," operetta, 1869; "Le Bien d'Autrui," 1869; "Un Caprice de Ninon," 1871; "La Fée des Bruyères," 1878. David is also the composer of an "ode-symphonie" entitled "Le Triomphe de la Paix," 1878, which is generally regarded as his most popular composition.

He has written, besides the above-mentioned works, four symphonies, a number of choruses and songs, and the following unperformed operatic works: "Les Chevaliers du Poignard"; "Une Dragonnade"; "La Gageure"; "L'Education d'un Prince"; "Les Changeurs"; "Absalon"; and "I Maccabei" (in Italian). A theoretical work, "L'Art de Jouer en Mesure," Paris, 1862, is also popular.

DAVID BEN SAMUEL OF ESTELLA (KOKABI): Provençal scholar; flourished in the first half of the thirteenth century. He was a native of Estella, whence his name "Kokabi" (Star-like), the Hebrew equivalent for "Estella." Isaac of Lattes, in his literary history "Ḳiryat Sefer," represents him as a great scholar, and mentions two works of his which are still extant in manuscript: "Migdal Dawid" (Castle of David), divided into two parts, the first treating of speculative and moral theology, and the second of practical theology (Perreau Cat. ii. 40); "Ḳiryat Sefer" (City of the Book), divided into three parts, and dealing with the precepts concerning the love of God, with those which are useful for the conservation of the body and the soul, and with those concerning social relations (MS. No. 113, London Jewish College).

DAVID, SAMUEL BEN JUDAH LÖB: Polish rabbi; died in Dzialshitz, Poland, in 1751. He succeeded his father as rabbi of Shidlow, Poland, when the latter became rabbi of Cracow. About 1731 he was called to Cracow to take the position rendered vacant by the death of his father; but there he met with opposition, and, while he was temporarily absent from Cracow, another rabbi was installed in his place. When David returned he resumed the rabbinical office notwithstanding the opposition of his enemies. He finally retired to Dzialshitz, where he died. His signature is found on the excommunication published against Moses Ḥayyim Luzzatto.

BIBLIOGRAPHY: Friedberg, *Luḥot Zikkaron*, pp. 27, 28; *Kerem Ḥemed*, iii. 157.

L. G. N. T. L.

DAVID B. SAMUEL HA-LEVI (usually called **Ṭaz,** from the initials of his work "Ṭure Zahab"): Polish rabbi; born in Lodmir or Vladimir, Volhynia, about 1586 (see Grätz, "Gesch." x. 57, and "Ḳin'at Soferim," p. 48b, note 809); died in Lemberg Jan. 31, 1667. David's chief instructor was his elder brother, Isaac b. Samuel ha-Levi, and his reputation for Talmudical knowledge spread far and wide; so that R. Joel Särkes (BaḤ) of Brest gave him his daughter in marriage. After residing with his father-in-law for several years—which were spent in diligent study—David and his family removed to Cracow. Thence David was called as rabbi of Potlitsha, near Rava, where he lived in great poverty. Later he went to Posen, where he remained for several years (see Responsa of Joel Särkes [BaḤ], new series, No. 17); and about 1641 he became rabbi of the old community of Ostrog, or Ostroh, in Volhynia. There David had a famous yeshibah, and was soon recognized as one of the great rabbis of his time. In Ostrog David wrote his commentary on Joseph Caro's Shulḥan 'Aruk, Yoreh De'ah, which he published in Lublin, 1646, and which was accepted as one of the highest authorities on ceremonial law.

Two years after the publication of his commentary David and his family had to flee for their lives from the terrible massacres of the Cossack insurrection under Bogdan Chmielnicki in 1648–49. David went to Steinitz near Ostrau, Moravia, where he remained for some time and probably acted as rabbi. This fact gave rise to an erroneous belief that before the persecution David was rabbi of Ostrau and not of Ostrog, Volhynia (see "Neuzeit," 1865, No. 29, and Kohn, "Biographien Hervorragender Rabbinischer Autoritäten," etc., pp. 109 *et seq.*, Brünn, 1890). David did not find Moravia congenial, and returned to Poland as soon as order was restored, settling in Lemberg, where he remained for the rest of his life.

David was made "rosh bet din," and when Meïr Sack, the chief rabbi of Lemberg, died (1653), he succeeded him in the rabbinate. At that time the city usually had two rabbis, one for the town proper and the other for the suburbs; David was at first the suburban rabbi; as one of the delegates to the Council of Four Lands in Lublin in Nisan, 1664, he signs as of "outside the town" (approbation to "'Ammudeha Shib'ah," by R. Bezalel, darshan of Sluzk, Prague, 1674). Under another approbation he signs "of Lemberg and the Province," indicating that other communities were also subject to his spiritual rule.

The last days of David were saddened by the violent death of his two sons, Mordecai and Solomon, who were martyred in the great riots which occurred in Lemberg in the spring of 1664. Their mother, the daughter of Joel Särkes, had died long before this, and David married the widow of her brother, Samuel Hirz b. Joel, rabbi of Pinczow. His third son from the former marriage, Isaiah Segal, and his stepson Aryeh Löb, were the two Polish scholars who were sent—probably by David, or at least with his consent—to Turkey in 1666 to investigate the claims of the pseudo-Messiah Shabbethai Ẓebi. They brought back as a present from the false Messiah a white silk robe for David, and a letter in which Shabbethai Ẓebi promised to avenge the wrongs of the Jews of Poland.

Most of the works of David were published long after his death. The "Ṭure Zahab" on Shulḥan 'Aruk, Oraḥ Ḥayyim, was published by Shabbethai Bass in Dyhernfurth in 1692, together with the "Magen Abraham" by Abraham Abele Gumbiner; and both commentaries, together with the text, were frequently republished with several other commentaries, and still hold first rank among rabbinical authorities. Two years before the publication of this work, Judel of Kovli, in Volhynia, a cabalist and rabbinical scholar who wrote a commentary to the Oraḥ Ḥayyim, gave money to have it published together with the "ṬaZ," but his wishes were never carried out, and his money was used to publish another work of David's, the "Dibre Dawid" (The Words of David), a supercommentary on Rashi (Dyhernfurth, 1690). Part of the "ṬaZ" on Shulḥan 'Aruk, Ḥoshen Mishpaṭ (to ch. ccxcvi.), appeared separately in Hamburg in the same year, with notes by Ẓebi Hirsch Ashkenazi. The other half, in spite of various attempts and of the general demand for it, did not appear till about seventy years later (Berlin, 1761). The "ṬaZ" on Shulḥan 'Aruk, Eben ha-'Ezer, which was utilized in manuscript by Samuel b. Phoebus, the author of "Bet Shemuel" on the same part of the Shulḥan 'Aruk, was first printed in Zolkiev in 1754. David was the author of responsa which, though sometimes quoted from the manuscripts, were never published. ṬaZ and his opponent, Shabbethai Kohen (ShaK), are the greatest authorities among the Aḥaronim; and their decisions are of greater importance than those of Joseph Caro or of Moses Isserles. In 1683 the rabbis of the Council of Four Lands declared that the authority of the "ṬaZ" should be considered greater than that of the "ShaK," but later the "ShaK" gained more and more in authority. Compare Shabbethai b. Meïr ha-Kohen.

DAVID BEN SAUL: French rabbi; lived in the first half of the thirteenth century. He was the pupil of R. Solomon of Montpellier, and was one of the rabbis of Provence who condemned the philosophical works of Maimonides and the study of philosophy. David is also mentioned in an anonymous commentary on Baba Meẓi'a by one of the Provençal rabbis, which is quoted in the Responsa of Joseph ibn Lab (iii. 60) and those of Joseph di Trani on Yoreh De'ah, 39.

Bibliography: Michael, *Or ha-Ḥayyim*, pp. 346, 347.

L. G. N. T. L.

DAVID BEN SOLOMON IBN ABI ZIMRA or ZAMIRO (also known as **RaDBaZ**): Spanish Talmudist and cabalist; born in Spain about 1479; died at Safed, Palestine, 1589. He was thirteen years of age when his parents, banished from Spain, settled in Safed, where he studied under the direction of Joseph Saragossa. This statement, which is given by all his biographers, is contested by Frumkin ("Eben Shemuel," p. 48). Later David removed to Cairo, and in 1514 he is found there as a member of the bet din presided over by the "nagid" Isaac Sholal. In 1517, on the abolition of the office of nagid by the Turkish government, David was appointed chief rabbi of Egypt, which position he held for forty years. As he was highly revered alike for his vast knowledge, the integrity of his character, and the extent of his philanthropy, the yeshibah over which he presided attracted many distinguished pupils, among whom may be mentioned Bezalel Ashkenazi, and Isaac Luria, the father of the new cabalistic school.

In the introduction to his commentary on the Song of Songs, Isaac Akrish paints in vivid colors the character of David, in whose house he lived for ten years. According to this writer, David was very prominent in both the social and the political life of Egypt, thanks to his high intelligence and to an ample fortune. During his rabbinate he introduced many reforms in the every-day life of the Egyptian Jews, as well as in their religion. It was he who abolished the use of the Seleucidan era among them.

On attaining the age of ninety David resigned the chief rabbinate, and divided the greater part of his fortune among the poor, making special provision for scholars. He then removed to Jerusalem, but did not stay there long, on account of the burdensome taxes that the Turkish government had imposed upon him. He settled in Safed, where he became an active member of the bet din presided over by Joseph Caro, who held him in great esteem. David died, as shown above, at the age of one hundred and ten years.

He was the author of the following works: "Dibre Dawid" (Words of David), containing decisions and novellæ on Maimonides' "Yad," published by Joseph Zamiro together with his own work "Hon Yosef," Leghorn, 1828; "Yeḳar Tif'eret" (Honor of Excellency), containing answers to the criticisms of Abraham ben David (RABaD) on Maimonides' "Yad," and commentaries on those passages in that work which the "Maggid Mishneh" of Vidal de Toloza overlooks: of these commentaries the portions on Hafla'ah and Zera'im were published in Smyrna 1757, and the remaining portions in the Wilna edition of the "Yad," 1890; "Kelale ha-Gemara" (Rules of the Gemara), a methodology of the Talmud, published in the collection "Me-Harere Nemarim" of Abraham ben Solomon Akra, Venice, 1599; "Or Ḳadmon" (Pristine Light), a cabalistic work, edited by Moses Ḥagis, Venice, 1713; "Magen Dawid" (Shield of David), a mystical explanation of the alphabet opposing Recanati and R. Judah Ḥayyaṭ, edited by M. Ḥagis, Amsterdam, 1713; "Meẓudat Dawid" (The Bulwark of David), giving reasons for the commandments according to the four methods of explanation known as "pardes" (Zolkiev, 1862); "Miktam le-Dawid" (David's Poem), cabalistic homilies on the Song of Songs, still extant in manuscript; "Keter Malkut" (Crown of Royalty), prayers for the Day of Atonement, first published with the above-mentioned "Or Ḳadmon," reprinted in the "Shebeṭ Musar" of Elijah ben Abraham Solomon ha-Kohen of Smyrna, and finally inserted by Heidenheim in the ritual for the eve of the Day of Atonement; "Gillui le-Idrot," a commentary on the "Idrot," with notes by Ḥayyim Vital, still extant in manuscript in the Abarbanel Library at Jerusalem; "Dine Rabba we-Zuṭa" (The Great and Small Decisions), a commentary on the Shulḥan 'Aruk; "Shib'im Panim la-Torah" (Seventy Methods of the Explanations of the Torah). The last two works are mentioned in the preface of "Magen Dawid." David ben Solomon's responsa are his greatest contribution to Jewish literature; parts of it were published in Leghorn, 1651 (Nos. 1–300); Venice, 1799 (Nos. 1–318); Fürth, 1781 (Nos. 400–649); Leghorn, 1818 (Nos. 2051–2341). A complete edition of the responsa was published in Sudzilkow 1836.

DAVID IBN YAḤYA. See Ibn Yaḥya, David.

DAVID BEN ZAKKAI: Exilarch; known in Jewish history especially for his controversy with Saadia; died in 940. He was a relative of the prince of the Exile, 'Uḳba, who had been deposed from office and banished, and was his successor in the exilarchate. The office was at this time confronted by a dangerous adversary in the person of the passionate and ambitious gaon Mar Kohen-Ẓedeḳ (in office 917–936), who attempted to make the Academy of Pumbedita the only center of the Babylonian Jews, thereby threatening the existence of the sister academy at Sura. He, as well as the Academy of Pumbedita, refused to recognize David as exilarch, whereupon the latter, who was equally resolute and ambitious, deposed Kohen-Ẓedeḳ and appointed another gaon. This dispute lasted for two years, until Nissim Naharwani, highly respected for his piety, intervened and reconciled the adversaries, peace being concluded at Sarsar (half a day's journey south of Bagdad). Kohen-Ẓedeḳ and his college accompanied the exilarch as far as Bagdad (in the fall of 921); David ben Zakkai, in turn, recognizing the former as gaon of Pumbedita. But the reputation of the Academy of Sura continued to dwindle. A weaver filled the office of gaon for two years (926–928), and the ancient and famous academy was on the point of being dissolved, when Saadia, called from Egypt by the exilarch, was appointed gaon. This was against the advice of Naharwani, who favored Ẓemaḥ ibn Shahin ("Medieval Jew. Chron." ii. 80); but the wisdom of the choice was shown when Saadia made the fame of Sura surpass even that of Pumbedita.

The friendly relations between David b. Zakkai and Saadia were soon disturbed. David shrank from nothing which might strengthen his position, and misused his influence in order to extort large contributions from the community. A case of inheritance which David had decided illegally for reasons of self-interest, led to a rupture between the two. The exilarch asked the two geonim to sign the document in question. Kohen-Ẓedeḳ dared not refuse, but Saadia did. David deposed Saadia from office and banished him, appointing in his place the insignificant Joseph b. Jacob b. Satia. Saadia, however, took up the gauntlet; he, in turn, deposed David, and, together with his followers, appointed David's brother, Josiah Ḥasan, as exilarch.

The Babylonian Jews were now divided into two parties, each of which appealed to the calif Al-Muḳtadir. His successor, Al-Ḳahir, finally decided the case. The opposing exilarch was banished to Khorasan, where later on he died; and Saadia was deprived of his gaonate (beginning of 933). Saadia went to Bagdad, devoting the four years of his involuntary leisure to research. He was reinstated in consequence of a law case in which one of the parties concerned chose the exilarch as judge, while the other chose Saadia, whereupon David had the man maltreated who appealed to his adversary. This caused general excitement, and restoration of peace between the two became imperative. A reconciliation took place on Feb. 27, 937. The opposing gaon was removed from office, and Saadia forgot his injuries. After the exilarch's death Saadia even voted for his son Judah as his successor. David took part in the controversy with Ben Meïr in regard to the fixing of the calendar; and he was one of those who excommunicated the agitator (see "Rev. Et. Juives," xl. 261, xlii. 182).

DAVID-GORODOK: Town in the government of Minsk, Russia. In 1895 it had a population of 10,086, including 4,902 Jews. The latter are mostly engaged in business and in industrial vocations. There are 672 artisans, 564 of whom conduct their own business. Trade in bricks, timber, boats, fish, meat, fire-wood, hoops, iron brackets, etc., engages the activities of the inhabitants. The greater part to these products goes by boat to Minsk and Kiev. About 20 families are engaged in agriculture; 20 persons are occupied in gardening; 6 are teamsters; 13 are employed in shop or factory, mill or brick-yard, etc.; and 140 hire out as day-laborers. There are no charitable institutions. There is a public school enrolling 300 male pupils, of whom 11 are Jewish; and it has a girls' department containing 75 pupils, 10 of whom are Jewish. There are 23 ḥadarim, with 150 pupils, and 7 independent teachers of the Russian language, with 50 pupils.

H. R. S. J.

DAVIDOV (or DAVYDOV), JULIUS: Russian physician; born at Goldingen, Courland, 1803; died at Moscow 1870. He graduated from the University of Dorpat in 1833, and practised medicine in his native town until 1838, when he removed to Moscow. At the time of his death he held the position of chief physician of the Nicholas Orphan Asylum. Prior to his removal to Moscow he had embraced Christianity.

Two of his sons became distinguished: **August Davidov,** mathematician; author of many popular school-books on mathematics; born at Goldingen in 1823; died at Moscow in 1885. **Carl Davidov,** violoncellist; born at Goldingen in 1838; died at Moscow in 1889.

H. R. M. R.

DAVIDOVICH, JUDAH LÖB: Russian Hebraist; born at Wilna 1855; died at Odessa Jan. 1, 1898. He spent several years of his youth working and studying in Western countries. Returning to his native land, he served his term in the Russian army; later he studied surgery, but had no success as a practising "Feldscher," or assistant surgeon; and after a futile attempt to make a career as a singer, he settled in Odessa about 1885 as a private teacher, remaining there until his death.

Davidovich was a frequent contributor to Russian newspapers on topics of general interest, and in Odessa he was influenced by Asher Ginzberg to turn his attention to Hebrew literature. His most notable effort in that line is his translation into Hebrew of Herbert Spencer's essay on education, with preface and explanatory notes, published, under the name "Ha-Ḥinnuk," by the Aḥiasaf Company (Warsaw, 1894). He also wrote two valuable articles on educational subjects in "Ha-Shiloaḥ" (vols. i., ii.).

Bibliography: *Ha-Shiloaḥ*, iii. 187.

H. R. P. Wi.

DAVIDS, ARTHUR LUMLEY: English Orientalist; born in London 1811; died from a sudden attack of cholera July 19, 1832. At an early age he applied himself more particularly to the study of mechanics, music, and experimental philosophy. At the age of fifteen he began the preparation of a "Bible Encyclopedia," at the same time making himself proficient in Turkish and in other foreign languages. Wishing to follow the legal profession, he entered the office of a solicitor, but found himself prevented as a Jew from proceeding to the bar. This prompted his devotion to the cause of the civil emancipation of the Jews, which he advocated in several articles addressed to the London "Times."

Davids' reputation as a scholar rests on his "Grammar of the Turkish Language," dedicated to the Sultan of Turkey, Maḥmud II., which, being the product of so youthful a scholar, evoked high appreciation and commendation.

DAVIDSOHN, BOGUMIL. See Dawison, Bogumil.

DAVIDSOHN, GEORG: German journalist; born at Danzig, Prussia, Dec. 19, 1835; died in Berlin Feb. 6, 1897. He was originally destined for a merchant's career, but in 1856 went to Berlin, and acted for various newspapers as reporter of events in the economic and business world. He joined the editorial staff of the "Berliner Börsen-Zeitung" in 1860, devoting himself mainly to the commercial department; but soon found opportunity for also exercising his literary gifts as a feuilletonist in the weekly supplement to this paper, which he founded under the title "Die Börse des Lebens." He made the review of musical events and the criticism of operas his specialty. In 1868 Davidsohn established the "Berliner Börsen-Courier," which he conducted till his death, retaining the position as its chief editor even after 1884, when it became the property of a joint-stock company.

Personally intimate with Richard Wagner, Davidsohn was the first advocate of his productions in the Berlin press. He was one of the founders of the first Berlin Wagnerverein, and subsequently became an enthusiastic advocate of the Wagnerian theatrical arrangements in Bayreuth, thus championing the composer's cause at a time when it met with general animosity and opposition.

Bibliography: Anton Bettelheim, *Biographisches Jahrbuch und Deutscher Nekrolog*, pp. 36–37, Berlin, 1898; Richard Wrede and Hans von Reinfels, *Das Geistige Berlin*, pp. 64–65, Berlin, 1897; Ad. Kohut, *Berühmte Israelitische Männer und Frauen*, No. 12, p. 144, Leipsic, 1901.

S. B. B.

DAVIDSOHN, LEON: Russian publicist and translator; born at Kopil, government of Minsk, 1855. He was educated at an early age in the Talmud and the Hebrew language. His father confided him to a teacher who explained the Bible according to Mendelssohn's commentary. When Davidsohn was a boy of nine years he could write Hebrew verse. At the age of twelve he was sent to the yeshibah of Mir; two years later he went to Karelitz, where he studied the Talmud under his uncle Isaac Jehiel, rabbi of that town. At the age of fifteen, having been graduated as rabbi, he went to Minsk and began the study of Russian and of other secular subjects.

One of Davidsohn's articles about that time in the Hebrew paper "Ha-Ḳol," in which he exhorted the rich Russian Jews to found a school of Jewish science, made a great impression on the progressionists. In the same year he wrote for the same paper articles on the development of handicraft and agriculture among the Jews. From Minsk he went to Warsaw, where he graduated as doctor of medicine in 1888. He there made the acquaintance of the Polish writer Clemens Junosza, who asked him to translate into Russian Abramovich's "Die Kliatche" and "Masse'ot Binyamin ha-Shelishi." The latter work he translated also into Polish under the title of "Don Kiszot Zydowski." He practises medicine at Pruzhany, and continues to write articles for various Hebrew papers.

Bibliography: Eisenstadt, *Dor Rabbanaw we-Soferaw*, i. 15, Warsaw, 1895.

H. R. B. Ei.

DAVIDSOHN, ROBERT: German journalist; younger brother of Georg Davidsohn; born at Danzig April 26, 1853. He joined his brother on the editorial staff of the "Berliner Börsen-Courier," writing satirical critiques of actors, actresses, and singers. Worsted in an attack on Lilli Lehman, he soon after left Berlin. He then went to Italy to gather historical material, and soon made an enviable reputation in this new line of endeavor.

Davidsohn is the author of "Vom Nordkap bis Tunis," 1884; "Philipp II. August von Frankreich und Ingeborg," 1888; "Geschichte der Stadt Florenz," 1896; and an edition of the last-named work covering the thirteenth and fourteenth centuries, published in 1900.

Bibliography: Kürschner, *Deutscher Literatur-Kalender*, 1901, pp. 239–240; Kohut, *Berühmte Israelitische Männer und Frauen*, xii. 144.

S. E. Ms.

DAVIDSON, ANDREW B.: Professor of Hebrew and Oriental languages in New College, Edinburgh; born at Kirkhill, in the parish of Ellon, Aberdeenshire, Scotland, in 1831; died in Edinburgh Jan. 26, 1902. He was educated at the University of Aberdeen, graduating in 1849. He entered New College, Edinburgh, in 1852, to study for the ministry, and was licensed in 1857.

In 1858 Davidson became Hebrew tutor in New College. Here he produced an "Elementary Hebrew Grammar" (2d ed., 1896) and his "Hebrew Syntax" (1894).

In 1862 his first book on Job (ch. 1–14) was published by Williams & Norgate. When, in the following year, the chair of Hebrew fell vacant, Davidson was appointed professor by the unanimous vote of the Free Church Assembly. In 1871 he was chosen to be one of the Old Testament revision committee. Davidson was the author of a book on Job, published in 1884 as one of the "Cambridge Bible Series." For the same series he wrote the commentaries on Ezekiel, Nahum, Habakkuk, and Zephaniah. He wrote also in the series of handbooks published by T. & T. Clark a commentary on the Epistle to the Hebrews (1882); and he furnished many important articles for the "Bible Dictionary" edited by Dr. Hastings, among them "Covenant," "Eschatology of the Old Testament," "God," and "Prophecy."

T. F. H. V.

DAVIDSON, BENJAMIN: English Orientalist of Jewish birth; died 1871. He was a worker for the British Society for the Propagation of the Gospel Among the Jews, and when that institution founded in London (1847) a college for the training of its missionaries, he was appointed principal. He is the author of an "Analytical Hebrew and Chaldee Lexicon," "Syriac Reading Lessons, with Analysis," and "Chaldee Reading Lessons." He assisted in the editing of the "Englishman's Hebrew and Chaldee Concordance." His chief work, however, was posthumous—a "Concordance of the Hebrew and Chaldee Scriptures," London, 1876.

Bibliography: McClintock and Strong, *Cyc.* xii., *s.v.*

J. V. E.

DAVIDSON, ELLIS A.: English author and technologist; born at Hull 1828; died at London March 9, 1878. Going early to London, he attended the School of Design and the School of Art at South Kensington, and was one of the first art-teachers sent into the provinces by the Science and Art Department. For several years he was connected with the college at Chester. In 1866 Davidson was appointed principal art-master of the City Middle Class School, a position which he subsequently resigned in order to devote himself more completely to the production of a series of educational works especially devoted to technical training, in which he may be regarded as a pioneer. He was well known as a successful art-lecturer, having acquired great facility in speech and considerable skill with his pencil.

Davidson took an active interest in several communal movements, especially those intended to promote the intellectual development of the adult members of the Jewish industrial classes. He also delivered lectures under the auspices of the Teachers' Training Association, the Horological Society, and the Horse Guards. He produced a series of models for class-teaching of drawing, which were used in government and other schools.

Davidson was the author of a number of elementary works on drawing and popular hygiene, among which may be mentioned the following, all published in London: "Orthographics and Isometrical Projection," 1868; "Houses and What They Are Made Of," 1869; "Our Food: a Useful Book for Boys and Girls," 1870; "Drawing for Carpenters and Joiners"; "Gothic Stonework: History and Principles of Church Architecture," 1874; "The Amateur House-Carpenter."

J. G. L.

DAVIDSON, THOMAS: Philosopher and lecturer; born of Presbyterian parents at Deer, near Aberdeen, Scotland, Oct. 25, 1840; died at Montreal, Quebec, Sept. 14, 1900. After graduating from Aberdeen University (1860) he successively held the positions of rector of the Grammar School of Old Aberdeen, teacher and professor in various places in England, Scotland, and America. He traveled extensively, and became a proficient linguist, acquiring a knowledge of French, German, Italian, Spanish, Greek, Latin, and Arabic. His ideal was to popularize knowledge among the masses, and with this end in view he founded the London Fabian Society, but lost interest in it when it drifted into socialism. His interest in St. Thomas Aquinas secured for him an invitation from the pope to proceed to Italy and assist in the preface to a new Vatican edition of the saint's works. He organized the Collegiate Institute of Canada and the Glenmore School for Culture Sciences at Keene in the Adirondack Mountains. Davidson's most successful work was in connection with the Educational Alliance in New York, where he attained wide popularity by a series of lectures on sociology. A special class was formed for Jewish young men and women, whom he introduced to the great writers on sociology and their problems. He aimed at founding among them what he called a "Breadwinners' College," but his work was cut short by his untimely death. His pupils have continued the classes, and annually honor his memory.

Among Davidson's many works are: "Fragments of Parmenides" (1869), and "The Parthenon Frieze and Other Essays" (1882). He introduced to English readers the philosophical system of Antonio Rosmini-Serbati, most of whose works he translated.

Bibliography: Appleton's *Annual Cyclopedia*, 1900, p. 57; *International Journal of Ethics*, xi. 440; *Who's Who in America*, 1900; *American Hebrew*, lxvii. 514, 585.

J. J. S.

DAVILA, DIEGO ARIAS: Minister and confidant of King Henry IV. of Castile; born of Jewish parents in Segovia; died in 1466. He, together with his family, embraced the Christian faith when Vincent Ferrer was preaching special sermons with a view to making converts. Drawn to the court of Juan II. of Castile by Alvaro de Luna, Davila, in conjunction with his former coreligionist Juan Pacheco, became both the farmer and the administrator of the royal taxes. In time he gained the confidence of the prodigal young king Henry to such a degree that the latter appointed him head of the royal audit office or minister of finance ("contador mayor").

To win popular favor both he and his wife showed themselves very generous toward the Church; nevertheless he was always considered a Jew. The author of the "Coplas del Provincial" addressed to Davila the following malignant couplet:

"A ti Diego Arias p . . .
Que eres é fuiste Judio,
É tienes gran señorio
Contigo non me disputo."

[TRANSLATION.]

"Diego Arias, thou wretched hypocrite,
A Jew thou wert and a Jew thou art.
Great is the power that is thine;
Hence to no dealings with thee I incline."

Toward his coreligionists Davila's attitude was for a long time cold and forbidding; only later, when it became his duty to appoint supervisors of the revenues in most of the cities, did he have recourse to Maranos. Furthermore, despite repeated decrees of the Cortes to the contrary, he appointed Jews as tax-farmers. The chief administrator of the ducal tax-revenues at the time was D. Moses Ẓarfati; Rabbi Abraham and Joseph Castellano were the farmers of the revenues in the bishopric of Roa from 1460 to 1462, and D. Moses of Briviesca the farmer of the revenues of S. Salvador de Oña in 1455. While the Jewish tax-farmers were very lenient, the Marano officials appointed by Davila showed themselves merciless, which drew upon them the enmity of the people to such an extent that D. Gomez Manrique, who possessed great influence, preferred charges against the minister, and in the "Advice" which he addressed to him ("Consejos à Diego Arias") he predicted for him a fate similar to that of Alvaro de Luna. With a king so frivolous and prodigal as Henry, Davila's situation was indeed very difficult and precarious; and he often found himself on the verge of being deposed. On one occasion, when he represented to the king that the conditions urgently demanded a curtailment of expenditure, the king replied in an imperious tone· "You speak as Diego Arias; I act as king."

The castle Puñorostro, together with the villages and hamlets connected with it, which, after its acquisition by him, he turned into an entailed estate, Davila transferred to his oldest son, **Pedro Davila,** whom he married to D. Maria de Mendoza, niece of the first Duke del Infantado and a grandchild of Marquis de Santillana. Pedro filled the same position as his father had at the court of Henry IV., until he was overthrown through the intrigues of Alonso de Fonseca.

Davila's second son, **Juan Arias Davila** (not "de Avila"), was Bishop of Segovia. Full of hatred against the Jews, he caused sixteen of them who had been accused of a ritual murder to be burned at the stake.

DAVIN, SOLOMON BEN DAVID, OF RODEZ: Astronomer; lived in the second half of the fourteenth century. He was a disciple of Immanuel of Tarascon (France). He translated from the Latin into Hebrew, under the title "Sefer Mishpeṭe ha-Kokabim," the astronomical and astrological work of Abu al-Ḥasan Ali ibn Abi Rijal, entitled "Al-Bari'" (The Excellent). This work was translated into Spanish, at the request of Alfonso X., by the physician Judah ben Moses Cohen in 1256, and from the Spanish back into Latin by Gilles de Thebaldis of Parma.

Davin's translation, still extant in manuscript (Bibliothèque Nationale, Paris, MS. No. 1067), is accompanied by glosses, which begin with the abbreviated form of his name—אשדת המעתיק (= אמר שלמה דוין תלמיד), "And said Solomon Davin, the disciple, the translator." Davin also translated the astronomical tables of Paris, to which he added notes. This translation is still extant in manuscript (Munich MS. No. 343).

DAVIS, ALFRED: Philanthropist; born in London 1811; died Jan. 6, 1870. Starting life as a general dealer, he soon commenced business on his own account; and his firm subsequently became one of the largest concerns in England as importers of foreign goods in the Birmingham and Sheffield trade.

Davis was an ardent worker in the cause of the advancement of the community, and was early associated with the Jews' Free School, of which he was treasurer for twenty-five years, and to which he contributed some munificent donations. He undertook the expense of the educational equipment of the teaching staff, and at his death bequeathed the sum of £30,000 ($150,000) to the institution. He was also a liberal supporter of Jews' College.

DAVIS, FREDERICK: Archeologist; born at Cheltenham 1843; died in London July 14, 1900. He was the eldest son of John Davis of Derby, and was educated at the Derby and Belper schools. Entering the engineering profession, he for some years was a partner in the Phœnix Foundry and Engineering Works at Derby. He devoted himself to archeological pursuits, and was elected a member of the council of the Society of Antiquaries and of the Silchester Excavation Committee. Davis wrote a history of the discoveries of the "Roman British City of Silchester," and also a work entitled "The Etymology of Some Derbyshire Race Names," and at the time of his death was preparing a work on "Misnomers."

DAVIS, JAMES (OWEN HALL): English playwright and journalist; born about 1848. He was educated at University College, London, and took the degree of bachelor of laws in 1869. After devoting some years to the practise of law as a solicitor (1874–86), he abandoned it in favor of journalism. He was editor and proprietor of a society paper, "The Bat" (1885–87), and assistant editor of Galignani's "Messenger" in Paris (1888–90). For a time Davis interested himself in politics, contesting Dundalk in the Conservative interest at the election of 1890. He is the author of several comic operas which have had an enormous success, among them being "A Gaiety Girl," "An Artist's Model," "The Geisha," "A Greek Slave," and "Florodora." Since 1899 he has edited a weekly paper, "The Phœnix."

J. V. E.

DAVIS, MAURICE: English physician and philanthropist; born Oct. 8, 1821; died in London Sept. 29, 1898. Davis was one of the earliest English Jews trained for the medical profession. He was educated at King's College, London, where he had a distinguished medical career, gaining the first prize in medicine and clinical surgery, and filling several residential positions in the King's College Hospital. In 1887 he was placed on the commission of the peace for the county of Middlesex, and became justice of the peace for the new county of London. Davis served on the committee of the metropolitan branch of the British Medical Association and on the board of directors of the Society for the Relief of Widows and Orphans of Medical Men; he was a member of the Jewish Board of Guardians of the council of the Anglo-Jewish Association, and was an honorary medical officer of the Jewish Convalescent Home.

He produced some literary work, contributed to various specialist periodicals, and wrote some extravaganzas for the benefit of different charities.

DAVIS, MIRIAM ISABEL: English painter; born in London, where, after making a tour of the galleries of Venice, Florence, and Rome, she began a systematic course of artistic study at the Bloomsbury School of Art. Her artistic career commenced in 1882, in which year she exhibited at the Society of Lady Artists. In 1887 a picture by her entitled "New Music" was hung at the Royal Academy; in 1889 she contributed to the Paris Salon; and since then has exhibited in every gallery of importance. Among her works are: "Winter Harmonies," 1887; "A Shady Seat," 1888; "The Last of the Season," 1889; "White and Gold," 1890 (exhibited at the New Gallery); "Pure Emblems of Pleasure," 1891 (Royal Academy); "Simplicité," 1892 (Paris Salon). From 1895 Miss Davis has been engaged in portrait painting, exhibiting often at the Society of Women Painters, of which she was one of the founders.

J. G. L.

DAVIS, MYER DAVID: English educationist and writer; born in London 1830. He was educated at Jews' Free School, in which he ultimately became Talmud Torah master. Subsequently he was headmaster of the Gates of Hope School of the Spanish and Portuguese Jews. For two years (1873–1875) he was editor of the "Jewish World." After this, earning his living by private tuition, he devoted his leisure to research among the unpublished records of the preexpulsion history of the Jews of England. He has made an unrivaled collection of excerpts from the Latin and Hebrew records prior to 1290, which was published by the Anglo-Jewish Historical Exhibition of 1887 under the title "Shetaroth: Hebrew Deeds of English Jews" (London, 1888).

Bibliography: *Jewish Year Book*, 1902.

J.

DAVIS, NATHAN: Traveler and archeologist; born 1812; died at Florence Jan. 6, 1882. He spent many years of his life in northern Africa, and for some years lived in an old Moorish palace about ten miles from Tunis. Early in life he became converted to Christianity, and in 1852 he edited the "Hebrew Christian Magazine," becoming afterward a non-conformist minister. From 1856 to 1858 he was engaged on behalf of the British Museum in excavations at Carthage and Utica. He discovered numerous antiquities, including Roman mosaic pavements and Phenician inscriptions.

His publications are: "Tunis, or Selections from a Journal During a Residence in That Regency," Malta, 1841; "A Voice from North Africa," 1844; "Evenings in My Tent," 1854; "Ruined Cities Within Numidian and Carthaginian Territories"; "Carthage and Her Remains," 1861. He also published "Israel's True Emancipator," 1852, and "Arabic Reading Lessons," 1854.

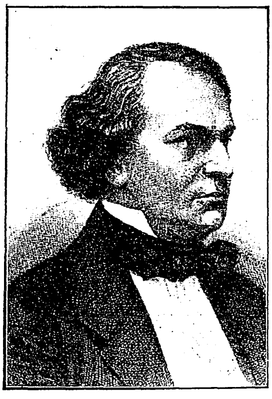
J. G. L.

DAWISON (DAVIDSOHN), BOGUMIL: Actor; born at Warsaw May 15, 1818; died at Dresden Feb. 1, 1872. In his boyhood he earned a precarious living as itinerant correspondent for various firms, alternating this occupation with that of sign-writer; and then he obtained employment in the editorial office of the "Gazeta Warszawska," where his intelligence attracted the attention of the editor, Dr. Krugski, and where he rose to be dramatic critic. But the stage itself had such attractions for the youth that he began studying at the Warsaw Theatrical School (1835). On Nov. 30, 1837, Dawison appeared at the Polish Theater as *Gustav* in "Zwei Galeerensträflinge," and he obtained engagements in 1839 at Warsaw and Wilna. On Aug. 9, 1841, he made his German début as *Baron Sternhelm* in "Das Letzte Abenteuer," following with *Ferdinand* in Schiller's "Kabale und Liebe" and *Masham* in "Un Verre d'Eau." Dawison remained in Lemberg for five years, going thence in 1846 to Breslau, Brieg, and Stettin.



Bogumil Dawison.

His next appearance was on Feb. 13, 1847, at Hamburg, where a year later he married Wanda von Ostaja-Starzewska. In 1849 he starred in Vienna, and on Nov. 6 signed a six-year contract with Heinrich Laube. The latter developed Dawison's latent powers and made him the greatest character-actor on the German stage.

Two years before his contract with Laube had expired, Dawison went to the Hof-Theater in Dresden, where he became the rival of the local favorite, Emil Devrient. Numerous bickerings ensued, and Dawison departed for Munich, whence he went to Berlin (1855–56). He appeared in Paris at the celebration of the one hundredth anniversary of Schiller's birth (1859), and on reciting the entire third act of "Don Carlos" was acclaimed by the French as the greatest exponent of classic declamation.

In 1864 Dawison starred Germany, and in 1866 he went to the United States. He played seventy-six times while there, earning for himself $50,000. On his return his memory gave way, and a few months later he became a raving maniac. He died while in a paroxysm.

His best rôles were *Mephisto, Franz Moor, Marc Antony, Hamlet, Alba, Don Carlos, Charles V., Riccaut de la Marlinière, Harleigh, Stephan, Foster, Molière, Morinelli, Richard III., Lear*, and *Othello*. For the Polish stage Dawison wrote some dramas and comedies, among them "Nasz Antos," Warsaw, 1835, and "Noc i Poranek" (after Bulwer's novel "Night"), Warsaw, 1844.

DAY (Hebrew, "yom"): In the Bible, the season of light (Gen. i. 5), lasting "from dawn [lit. "the rising of the morning"] to the coming forth of the stars" (Neh. iv. 15, 17). The term "day" is used also to denote a period of twenty-four hours (Ex. xxi. 21). In Jewish communal life part of a day is at times reckoned as one day; *e.g.*, the day of the funeral, even when the latter takes place late in the afternoon, is counted as the first of the seven days of mourning; a short time in the morning of the seventh day is counted as the seventh day; circumcision takes place on the eighth day, even though of the first day only a few minutes remained after the birth of the child, these being counted as one day. Again, a man who hears of a vow made by his wife or his daughter, and desires to cancel the vow, must do so on the same day on which he hears of it, as otherwise the protest has no effect; even if the hearing takes place a little time before night, the annulment must be done within that little time. The day is reckoned from evening to evening—*i.e.*, night and day—except in reference to sacrifices, where daytime and the night following constitute one day (Lev. vii. 15; see Calendar). "The day" denotes: (*a*) Day of the Lord; (*b*) the Day of Atonement; (*c*) the treatise of the Mishnah that contains the laws concerning the Day of Atonement (see Yoma and Sabbath).

E. G. H. M. F.

DAY OF JUDGMENT (יום הדין): Name given to the first of Tishri, as being the New-Year's Day. In the Bible the Day of the Blowing of the Trumpet is the first day of the seventh—Sabbatical—month (Lev. xxiii. 24), and no mention is made of the Day of Judgment. The "day of God," in the sense of a time of divine judgment of the wicked, is the one that will appear at the end of days (see Day of the Lord; Eschatology); and a description of the divine judgment in heaven is found in Dan. vii. 9, 10, 22, where the "Ancient of days" is depicted as sitting upon the throne while the books are opened before Him. This description is also found in the apocryphal books. Of a specific day in the year on which God holds judgment over the world, no trace is found in pre-Talmudic literature. Philo, in his treatise on the festivals, calls New-Year's Day the festival of the sacred moon and feast of the trumpets, and explains the blowing of the trumpets as being a memorial of the giving of the Law and a reminder of God's benefits to mankind in general ("De Septennario," § 22). The Mishnah R. H. i. 2 contains the first known reference to the Day of Judgment. It says: "Four times in the year the world is judged: On Passover a decree is passed on the produce of the soil; on the Pentecost, on the fruits of the trees; on New-Year's Day all men pass before Him [the Lord] כבני מרון [an expression rendered by the Amoraim "like young lambs" (see "'Aruk," *s.v.* בני מרון and אמר)]; and on the Feast of Tabernacles a decree is passed on the rain of the year."

This Mishnaic dictum is amplified in the Tosef. R. H. i. 11–13. Besides the Psalm (xxxiii. 15) quoted in regard to New-Year's Day, Ps. lxxxi. 4–5 is quoted, and then follows R. Akiba's dictum:

> "On the [second] Passover day the barley-offering is an invocation to God for the blessing of the soil's produce; the firstlings brought on Pentecost are an invocation for the blessing of the fruits of the trees; and the libation of water on the Feast of Tabernacles is an invocation for blessing through rain. On New-Year's Day the threefold prayer should be recited, the first extolling God as King, 'Malkiot'; the second imploring God's remembrance for the good of man, 'Zikronot'; and the third referring to the trumpet's blasts, 'Shofarot.' For on New-Year's Day all men are judged; and the decree is sealed on the Day of Atonement."

R. Jose says, with reference to Job vii. 18, "Man is judged every day"; while R. Nathan explains it as "God judges man every moment" (R. H. 16a; Yer. R. H. i. 57a).

While the views of both R. Jose and R. Nathan seem to contradict that held by their master Akiba, the latter's has been universally received, and has found expression in the New-Year's liturgy which, while called "Teḳi'ata de-Rab" (Yer. R. H. i. 57a; Pes. xxiii. 150a) is by no means a composition of Rab's, but is "the Teḳi'ah liturgy fixed in Rab's school-house," and is of Essene origin (R. H. 32b, ותיקים; see Joel, "Notizen," p. 30, Breslau, 1873;

Liturgy; Essenes). As is shown from the Mishnah quoted, the first of Tishri was known only by the name of "New-Year" (see also Atonement, Day of; New-Year).

K. F. R.—K.

DAY OF THE LORD (יום ה׳): An essential factor in the prophetic doctrine of divine judgment at the end of time (see Eschatology), generally, though not always, involving both punishment and blessing. It is identical with "that day" (היום ההוא: Isa. xvii. 7, xxx. 23, xxxviii. 5; Hos. ii. 18; Micah ii. 4, v. 10; Zech. ix. 16; xiv. 4, 6, 9), "those days" (Joel iii.1), "that time" (העת ההיא: Jer. xxxi. 1, R. V.; xxx. 25, Hebr.; Zeph. iii. 19, 20), or simply "the day" (Ezek. vii. 10), or "the time." On the supposition that Genesis reflects the nation's earliest hopes—denied by the critical schools—the promises given to the Patriarchs of ultimate blessings upon Israel and, through Israel, upon mankind (Gen. xii. 2, 3; xvii. 2, 4, 5, 6; xxvi. 3, 4; xxvii. 29; xxxii. 12), may be taken for the primitive germ of the idea. The original conception was probably that of the day on which Yhwh manifests Himself as the wielder of thunder and lightning, as the devastator who shatters the powers opposing Him; and this was in historical times transformed into the day when He would smite Israel's foes (compare Isa. xiii. 6; Ezek. xxx. 3). But in the eighth century B.C. Amos is found sounding a decided warning against his people's expectation that simply because they are Yhwh's people the "day of Yhwh" will bring requitement on Israel's enemies alone. It will be an occasion of visiting wrong-doing both within and without Israel. "I will cause the sun to go down at noon, and I will darken the earth in the clear day" (Amos v. 18; viii. 9).

In Amos the punitive aspect of "the day" is dominant; ix. 8–15 is held to be exilic by most modern commentators; but see Driver, "Joel and Amos," pp. 119–123 (Amos iii. 2, v. 18, viii. 9). The day is "darkness and not light" (v. 18). Amos' contemporary Hosea does not use the phrase, but he expresses the idea of a judgment to come along lines identical with those found in Amos (Hosea x. 8, xiii. 16). Isaiah, too, strikes in the main the note of gloom. Israel and Judah both feel the weight of divine wrath provoked by their unrighteousness (Isa. i. 10–17, 21–26; ii. 19–21; iii. 1–15; v. 8–24). But this will show Yhwh's power. He will be exalted (ii. 11–17). The judgment cometh suddenly with earthquakes and thunder and tempest and whirlwind and the flame of a devouring fire (xxix. 6). Still through this terrible process, like the purifying of silver, the nation will be restored on a basis of righteousness (i. 24–26). Isaiah's horizon is national. The foreign nations, too, will be judged, but only in relation to Israel. The kingdom is Israel's alone (this is on the theory that the Messianic passages, except Isa. i. 24–26, are of a later age; see Cheyne, Duhm, Hackmann, G. A. Smith, and others; Hastings, "Dict. Bible," ii. 488). Micah, too, emphasizes the doom of Jerusalem as *the* feature of the end-time (iii. 12).

In the latter half of the seventh century B.C. (Nahum, Habakkuk, and Zephaniah) the idea that "that day" will see the punishment of wicked Assyria in behalf of righteous Israel finds expression. This view thus contains a new ethical element; it is not, as formerly in the popular conception (see above), the *natural* relation of Israel and Yhwh that brings wrath upon Israel's enemies, but it is because Israel is righteous (צדיק), and Assyria, or non-Israel, is wicked (רשע; Hab. i. 4, 13). Judgment and consequent destruction fall on the "Gentiles," not on Israel. There is here the first intimation of a world-judgment in connection with "the day," an aspect that becomes thenceforth more and more prominently emphasized. Zephaniah, indeed, puts it strongly, but with the significant addition that a righteous remnant of Israel will survive the day ("judgment" on Jerusalem—i. 8–13; on Philistia, Ethiopia, Assyria—ii. 1–6; "on the nations"—iii. 8; on the earth's inhabitants—i. 2, 3). The day of Yhwh is a day of trouble, distress, and desolation; of supernatural terrors and of darkness and thick darkness (i. 14–18). The assembled nations are destroyed by Yhwh's anger (iii. 8). The enemies of Israel who are to be punished are, in Zephaniah's conception, no longer definite peoples, as they were for Isaiah (see above); they are the גויים generally, and the instruments of God's punitive power are a mysterious if not mythical people—the "invited guests" of Yhwh (קראין, i. 7).

During the Exile.

In the Exile the conception underwent further amplifications. Judgment is held to deal with individuals. As a result a righteous congregation (not nation) was to emerge to form the nucleus of the Messianic kingdom. This kingdom was to have its prelude in the day of Yhwh, meting out individual retribution (Jer. i. 11–16; xxiii. 7, 8; xxiv. 5, 6; xxv. 15–24, 27–33; xxxvi. 6–10), which will lead to change of heart (xxiv. 7; compare xxxii. 39); a new heart and a new covenant (xxxi. 33, 34). The blessings of the new conditions will be participated in by the nations (iii. 17; xii. 14, 15; xvi. 19). Only the impenitent will be destroyed (xii. 16, 17).

Ezekiel's vision enlarges on details. A universal uprising of the nations under Gog is one of the incidents (compare Ezek. xxxviii., xxxix.; Zeph. i. 7). With this the climax in the development of the idea of the day of Yhwh seems to have been reached. Henceforth the thought of judgment (= day of Yhwh) disappears almost entirely, and is succeeded by a universal Messianic kingdom, preceded not by a day of wrath, but by the missionary zeal of righteous Israel and the spontaneous conversion of the nations (see Messiah).

After the Exile.

Of the post-exilic prophets only Malachi lays great stress on the element of judgment. The Temple is central to his religious construction. To it Yhwh will come suddenly, but a messenger will prepare for His coming for judgment. Before that "great and dreadful day" Elijah will "turn the heart of the fathers to the children, and the heart of the children to their fathers" (Mal. iv. 23, 24 [A. V. 5, 6]). This judgment (in Hag. ii. 21–23, it is destructive for the nations) is only on Israel (*ib.* ii. 17; Mal. iii. 3, 5, 13 *et seq.*). The day "burns as a furnace"; it destroys "all the proud and the workers of iniquity."

In apocalyptic writings, however, the day of

Yhwh reappears. Joel (400 B.C.) reverts to it. The valley of Jehoshaphat is the place of judgment. The nations are gathered, judged, and annihilated (Joel iii. 1, 2, 12). Yhwh is Israel's defender (iii. 2). Israel is justified, but it is Israel purified (ii. 25-27, 28, 29; iii. 16, 17). Before "the day" all Israel is filled with the spirit of God (ii. 28, 29). Nature announces its approach (ii. 30, 31). As in Joel, so in all apocalyptic visions the idea is prominent that the day of Yhwh (= of judgment) marks evil's culmination, but that Israel and the righteous will be supernaturally helped in their greatest need. Faintly foreshadowed in Ezekiel, this thought is reproduced in various ways, until in Daniel (vii. 9, 11, 12, 21, 22; xii. 1) it finds typical expression, and is a dominant factor in Jewish apocalyptic writings and Talmudic eschatology (see Apocalyptic Literature, *s.v.* Book of Enoch; Daniel; Day of Judgment; Eschatology).

Regarding the name "Day of the Lord" given by Christianity to Sunday, see Didascalia; Resurrection from the Dead; Sunday. Regarding the Talmudic day of God in the sense of "millennium," see Millennium.

DAYS, LUCKY AND UNLUCKY. See Superstition.

DAYYAN, ABRAHAM BEN ISAIAH: Turkish rabbi; lived at Aleppo, Asiatic Turkey, in the first half of the nineteenth century. He wrote "Shir Ḥadash" (A New Song), an Arabic glossary on the Psalms (Leghorn, 1841); "Zikron ha-Nefesh" (Remembrance for the Soul), ethical discourses arranged in alphabetical order (*ib.* 1842); and a work in two parts: the first, "Holek Tamim" (He Who Walks in Uprightness), similar in character and arrangement to the preceding; the second, "Po'el Ẓedek" (He Who Acts Justly), responsa (*ib.* 1850). At the end of the last-named work the author gives a history of Aleppo, or, as he calls it, Aram Ẓobah, from its conquest by David to the present time.

DAYYENA. See Diena.

DEAD BODY. See Impurity.

DEAD, DUTY TO THE: The dead, free from all obligation (Shab. 30a), have many claims upon the living. "Their wish must be respected and fulfilled" (Giṭ. 14b; Maimonides, "Yad," Zekiyah, viii. 2, xiii. 1; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 125, 8). "It is unlawful to speak evil of the dead" (Ber. 19a; Mordecai Yoma, ii. 1196; Hagahot Asheri Ta'anit, iii. 64; compare Diogenes Laertius, "Chinon," i. 3, 70, whence the Latin proverb "De mortuis nil nisi bonum"). It is a transgression of the Law (Deut. xxi. 23) not only to leave the dead unburied (see Burial), but also to do anything which may disfigure or desecrate the dead (נוול המת) (Yer. Sanh. vii. 3: Yer. Soṭah iii. 19b; see Cruelty). For this reason a post-mortem examination was forbidden by R. Akiba (B. B. 154a, b; compare Ḥul. 11b), although anatomical knowledge was obtained by occasional post-mortem examinations such as are mentioned in Ber. 45a (compare Nid. 30b). In fact disrespectful treatment of a dead human body, as, for instance, placing the bones in a sack and loading them upon a beast, instead of carrying them reverently to their last resting-place, is regarded as inhuman (Ber. 18a). See also Burial Societies; Cemetery; Funeral Rites; Post-Mortem Examinations.

"Every act of kindness done to the dead is called 'ḥesed shel emet' [= "true unselfish love"] because the hope of compensation is excluded" (Gen. R. xcvi.).

In case the dead was offended in his lifetime, his pardon is to be solicited at the grave by the offender in the presence of ten persons (Yoma 87a; Yer. Yoma viii. 45c); this is called asking "meḥilah." Particularly should the memory of the righteous be held in honor, and his name when mentioned be blessed (Ps. cxii. 6; Prov. x. 7; Yoma iii. 11; Pesiḳ. R. 12; Midr. Teh. to Ps. cxviii. 1; Gen. R. xlix.; Midr. Shemuel i.). For this reason the names of good men, and especially of parents, were preserved by being given to children (Haggadah Shab. i. 17; see Zunz, "Z. G." p. 318). When mentioned, the name of the dead, especially of parent or teacher, is to be accompanied by some formula of blessing upon his memory (Ḳid. 31b; see Eulogy; Zunz, *l.c.* pp. 320-348). See also Jahrzeit; Ḳaddish; Levirate.

K.

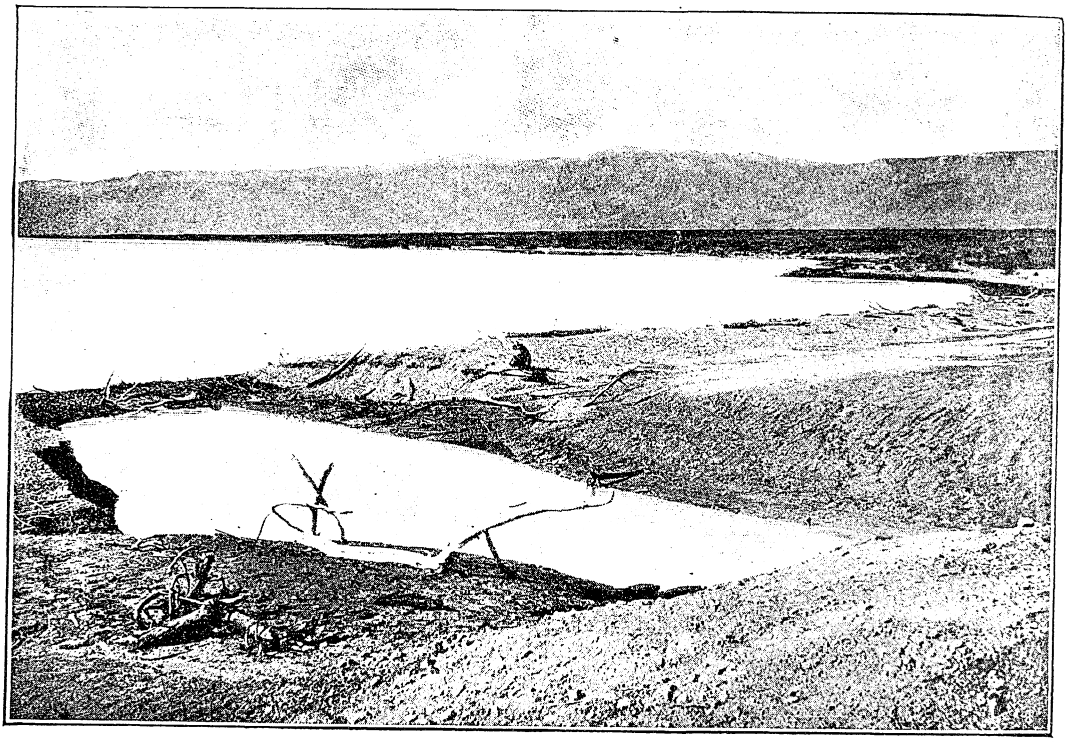
DEAD SEA: Lake in southeast Palestine, and one of the curious natural phenomena of the earth. It occupies the lowest part of the great depression which extends from northern Palestine to the Gulf of Akabah. At its most northerly point 150 meters above the level of the Mediterranean, the depression south of the Dead Sea rises to a height of 240 meters. The surface of the Dead Sea is 394 meters, and its greatest depth not less than 793 meters, below the level of the Mediterranean. Therefore the present formation of the basin prohibits any outflow, and geological investigations have shown that there never was one. The Jordan pours daily 6,000,000 tons of water into the Dead Sea; but since about an equal amount is daily evaporated, the level remains nearly the same, varying only from 4 to 6 meters with the change of seasons. Owing to this evaporation, to the mineral character of its own basin, and to the constant addition of saline elements from the Jordan, the water of the Dead Sea contains a large proportion of mineral matter, chiefly salt, chlorids of magnesium and calcium. It is consequently bitter to the taste and has an oily consistency. It is likewise extremely buoyant. The human body floats well out of the water, and diving is almost impossible. With the exception of some microscopic protophytes—namely, fresh-water diatoms and pathogenic microbes—nothing can live in the waters of the Dead Sea. Even salt-water fish die in it, and the bodies of fresh-water fish carried down by the Jordan float on the surface in great numbers. It is not true, however, that birds

Composition of the Water.

flying over the sea die. Another peculiarity is the amount of asphalt that floats in large quantities on the surface. This is probably due to the great prevalence of sulfur on the shores.

Description of Vicinity.

The Dead Sea is enclosed east and west by mountain ridges, which, forming to the northwest the headland Ras Feshkhah, descend abruptly into the water. Elsewhere on the west the ridges are separated from the sea by a barren strip of land, of which the only cultivable part lies below the spring Engedi. On the east the mountains descend precipitously to the water's edge, except where a fertile little plain marks the mouths of a wadi. In the southern part, at the mouth of the Wadi beni Hammad, there is an extensive level stretch, forming the large peninsula Al-Lisan. This peninsula—which in its southern extremity is rich in salt—divides the sea into two unequal parts; the smaller and shallower in the south, and the larger in the north, where the sea is deeper. On the southern shore of the sea is an open barren plain, Al-Sabkhah, the brown soil of which is flecked with salt. Toward the west rises a high ridge, Jabal Usdum, which is composed almost entirely of salt.



View of the Dead Sea.
(From a photograph by Bonfils.)

The Dead Sea, known at present as "Bahr Luṭ" (Lot's Sea), is called in the Old Testament "Sea of Arabah" (R. V. Deut. iii. 17; Josh. xii. 8), "East" or "Eastern Sea" (Ezek. xlvii. 18; Joel ii. 20; Zech. xiv. 8) and "Salt Sea" (Gen. xiv. 3). The Talmud refers to it as "Salt Sea," or the "Sea of Sodom"; and Josephus and Pliny call it "Lake Asphaltites."

Names Given to It.

The name "Dead Sea" is used by Pausanias, Justin, and the Church Fathers. Josephus ("B. J." iv. 8, § 4) mentions the salty taste of its water, the impossibility of diving in it, its change of color, and the great floating blocks of asphalt, which were used for calking ships and for medicinal purposes. Similar descriptions are given by Tacitus ("Hist." v. 6) and Pliny ("Hist. Naturalis," v. 15). The Talmud (Shab. 108b) mentions the density of the water, and says that a bath in the Dead Sea is considered good for certain ills, especially diseases of the eye, although the salt extracted from the sea was considered noxious to the eyes (Ḥul. 105b). Because of the poisonous air about the sea no ship sailed on it (Hirschensohn, "Sefer Sheba' Ḥokmot," 1888, p. 173).

References to It in Old Testament.

The destruction of the five cities of Sodom, which, according to the Old Testament, were near the Dead Sea (Gen. xiv. 3), is intimately connected with the geological history of the region. After the great depression of the Jordan valley, with its southern continuation, had been formed, it became the basin of a mighty sea during the heavy rains of the diluvian epoch. The surface of this sea—which stretched from the watershed of the Araba valley, south of the Dead Sea, to the Sea of Galilee—was 426 meters above the present level of the Dead Sea, and about 30 meters above that of the

History of Its Formation.

Mediterranean. Traces of fresh-water vegetation show that the water did not then contain nearly so much salt as at present. It became salty as it sank, leaving that great deposit of salt to the south, of which the Jabal Usdum is a remnant. A second rising of the water produced the high terraces lying south of the sea and extending along both sides of the Jordan; and a third gave rise to the lower terraces lying in front of the others. Blanckenhorn conjectured that an earthquake depressed the bottom of the valley south of the sea, where the five cities were situated, causing the salt sea to flood it. He sees a connection between the asphalt pits of the valley of Siddim and the large amount of asphalt in the southern part of the sea, and thinks that an earthquake might have freed the gases of petroleum and asphalt confined in the earth. These could easily have become ignited, thus causing the catastrophe. The event would naturally have been preserved by tradition; and it does actually figure in extra-Biblical accounts. Justin attributes to it the separation and emigration of the Canaanitish tribes.

DEAF AND DUMB IN JEWISH LAW: In Jewish legislation deaf and dumb persons are frequently classed with minors and idiots, and are considered unable to enter into transactions requiring responsibility and independence of will. They are regarded as irresponsible persons in the eye of the law, and in many cases their claims upon others, or the claims of others upon them, have no validity. Still, to preserve peace and order, the Rabbis made special provisions for this class in civil, criminal, and ritual cases.

As Witnesses.

The deaf-mute, as well as the deaf or the mute, was not competent to be a witness to any transaction: for all testimony was given by word of mouth, and the witnesses had to be able to hear the exhortation of the court. There was only one exception to this rule, and that was in the case of an ‘AGUNAH, where the testimony of deaf-mutes was sufficient to warrant her remarriage. No oath could be administered to deaf-mutes, nor could an oath be administered through charges brought by them (Maimonides, "Yad," To‘en, v. 12; Shulḥan ‘Aruk, Ḥoshen Mishpaṭ, 96, 5). To a dumb person, however, an oath could be administered, either by his writing out the formula of the oath above his signature, or by his assenting to the oath read before him by nodding his head in approval (Eisenstadt, "Pitḥe Teshubah," Shulḥan ‘Aruk, *ad loc.*).

A deaf-mute who caused bodily injury to another person, or whose ox gored a man, could not be punished by the court, although an injury to him or to his possessions was punishable. The court, however, had to appoint a trustee for the ox that proved itself to be mischievous; and this trustee was then held responsible (B. Ḳ. 39a, 87a; "Yad," Nizḳe Mamon, vi. 3; *ib.* Ḥobel, iv. 20; Ḥoshen Mishpaṭ, 406, 5, and 424, 8).

The uninterrupted possession of real estate for three years, which, according to Jewish law, established one's claim to the land, was of no avail when the property belonged to a deaf-mute, or when the deaf-mute was the holder (To‘en, xiii. 2; Ḥoshen Mishpaṭ, 149, 18).

The deaf-mute or the deaf, after he had satisfied the court as to his full understanding of the transaction under consideration, could buy and sell movable goods, but not real estate. The dumb, however, who was not deaf, might transact business and make gifts, even in real estate (Giṭ. 59a, 71a; "Yad," Mekirah, xxix. 2; Ḥoshen Mishpaṭ, 235, 17–19).

Since the deaf-mute had no legal power of acquiring property, if he found anything he was not entitled to the possession of it, and any one might take it away from him. The Rabbis, however, considered this an act of robbery; and in order to preserve the peace of the community, they decided that such property must be returned to him (Giṭ. 59b; "Yad," Gezelah, xvii. 12; Ḥoshen Mishpaṭ, 270, 1).

Marriage.

According to Biblical law as interpreted by the Rabbis, the marriage of a deaf-mute was not valid; yet the Rabbis sanctioned such a marriage when contracted by signs. Since this was merely a rabbinical provision, it had not the same validity as a perfect marriage; and many complications often arose therefrom (Yeb. 112b; "Yad," Ishut, iv. 9; Shulḥan ‘Aruk, Eben ha-‘Ezer, 44, 1). A male deaf-mute was not permitted to perform the levirate ceremony ("ḥaliẓah"); nor could this ceremony be performed in the case of a deaf-mute woman (Eben ha-‘Ezer, 172, 11).

Just as the male deaf-mute could marry by signs, so also could he divorce his wife by signs. The questions put to him in order to determine his full knowledge of the transaction, were at least three in number, two of which required a negative and one a positive answer, or vice versa. The deaf-mute and the mute were examined in the same manner, and a divorce was then granted by the court. But if at the time of marriage the husband had been perfectly sound, and he had become deaf and dumb after his marriage to the woman, the law did not permit him to divorce his wife (Yeb. 112b; "Yad," Gerushin, ii. 16, 17; Eben ha-‘Ezer, 121, 5, 6).

In the case of a deaf-mute who was permitted to divorce his wife by signs, the court gave to the divorced woman, in addition to the regular bill of divorce ("geṭ"), a note which read as follows:

> "On the day . . .—we, the undersigned, members of the court, sitting in a court of three, being of one mind—there came before us . . ., who made us understand by signs that he wished to divorce . . ., who was married to him by signs; and when he thus explained to us his intention by signs, we wrote this bill of divorce by which she becomes entirely divorced and free to be married to any man that she may desire, and none shall hinder her from that day forever. And this shall be unto her a

bill of dismissal, a document of release, and a letter of freedom according to the institutions of the Rabbis, and she shall be permitted to marry any man" (Eisenstadt, "Pitḥe Teshubah," *ad loc.* quoted from the code of R. Terveham).

In ritual matters, similar restrictions were placed upon deaf-mutes. The deaf-mute and the deaf could not discharge the religious obligation of an Israelite to hear the blowing of the shofar on New-Year's Day, by blowing it before him, while the mute might do so (R. H. 29a; "Yad," Shofar, ii. 2; Shulḥan 'Aruk, Oraḥ Ḥayyim, 589, 2). The same law prevailed in reference to the reading of the Book of Esther ("Megillah") on Purim (Meg. 19b; "Yad," Megillah, i. 2; Oraḥ Ḥayyim, 689, 2).

The deaf-mute was not permitted to slaughter an animal; but if he did slaughter one, and others saw that it was done in accordance with the prescribed rules, its flesh could be eaten. Neither was the deaf allowed to slaughter; but if he did slaughter an animal, although no one saw him do it, its flesh could also be eaten. The mute might slaughter, if some one pronounced the blessing for him (Ḥul. 2a; "Yad," Sheḥiṭah, iv. 5, 9; Shulḥan 'Aruk, Yoreh De'ah, i. 5 and 7).

L. G. J. H. G.

DEAF-MUTISM: Disease of the ear, generally beginning in infancy, causing deafness and consequent dumbness. As with blindness, Jews, at any rate in modern times, have shown a marked tendency toward deaf-mutism—in the general proportion, as compared with non-Jews, of two to one. The following table indicates this:

Place.	Time.	Christians per 10,000.	Jews per 10,000.	Authority.
Prussia...	1881	8.85	14.38	"Zeit. Stat. Bureaus für Preussen," 1882, p. 190.
Berlin....	1880	4.52	6.66	Leibrecht, quoted by Hartmann, "Taubstummheit und Taubstummbildung," 1880, p. 48.
Bavaria..	1879	9.0	18.16	Hartmann, *l.c.*
Holland..	1870	3.36	7.67	Eulenberg, "Realencyc." *s.v.* "Blutverwandschaft."
Baden....	1870	...	12.12	*Ibid.*

There appears to be no distinction between the liability of Jews and of Jewesses in this regard, though the proportion of females so afflicted is slightly less among both Jews and non-Jews. There is some evidence to show that the liability is racial, or at any rate congenital. A. Guttstadt ("Verbreitung der Blinden und Taubstummen im Preussischen Staate," p. 139) points out that the proportion of those who became deaf and dumb after birth is practically the same among Jews and Christians—3.2 as against 2.7; whereas there were 6.5 per 10,000 congenitally deaf among Jews as against only 3.4 among Christians.

The reasons for this inferiority among Jews are probably their continued residence in towns and cities, their general tendency to nervous diseases, possibly the result of continued persecution, and their tendency to consanguineous marriages. Thus, in 1882, of the twenty-eight families represented among the inmates of the Jews' Deaf and Dumb Home, London, the three families resulting from first-cousin marriages had an average of three deaf-mutes among them, whereas among the rest only an average of 1.2 was found (Twelfth Report, p. 16).

As the Jews have suffered most from this disease, it is perhaps only natural that they should have done much to alleviate it. Jacob Rodriguez Pereire was the first to invent a means of training deaf-mutes to utter articulate sounds, and thus prevent their depending upon signs. His method has been the foundation for all modern improvement, and has been reintroduced during the present generation, the chief exponent of the method in England being also a Jew, Mr. J. Van Praagh.

J.

DEATH, ANGEL OF.—Biblical Data: In the Bible death is viewed under form of an angel sent from God, a being deprived of all voluntary power. The "angel of the Lord" smites 185,000 men in the Assyrian camp (II Kings xix. 35). "The destroyer" ("ha-mashḥit") kills the first-born of the Egyptians (Ex. xii. 23), and the "destroying angel" ("mal'ak ha-mashḥit") rages among the people in Jerusalem (II Sam. xxiv. 15). In I Chron. xxi. 15 the "angel of the Lord" is seen by David standing "between the earth and the heaven, having a drawn sword in his hand stretched out over Jerusalem." Job (xxxiii. 22) uses the general term "destroyer" ("memitim"), which tradition has identified with "destroying angels" ("mal'ake ḥabbalah") (Bacher, "Ag. Pal. Amor." iii. 279, note 9), and Prov. xvi. 14 uses the term the "angels of death" ("mal'ake ha-mawet"). See Demonology.

The Rabbis found the angel of death mentioned in Ps. lxxxix. 45 (A. V. 48), where the Targum translates: "There is no man who lives and, seeing the angel of death, can deliver his soul from his hand" (compare also Targ. to Job xviii. 13; Ps. xci. 5; Hab. iii. 5). Eccl. viii. 4 is thus explained in Midr. R. to the passage: "One may not escape the angel of death, nor say to him, 'Wait until I put my affairs in order,' or 'There is my son, my slave: take him in my stead.'"

——**In Rabbinical Literature:** The angel of death occurs very frequently in rabbinical literature.

Where the angel of death appears there is no remedy (Ned. 49a.; Ḥul. 7b). If one who has sinned has confessed his fault, the angel of death may not touch him (Tan., Balaḳ, ed. Buber, 139). God protects from the angel of death (Gen. R. lxviii.). By acts of benevolence the anger of the angel of death is overcome; when one fails to perform such acts the angel of death will make his appearance (Derek Ereẓ Zuṭa, viii.). The angel of death receives his order from God (Ber. 62b). As soon as he has received permission to destroy, however, he makes no distinction between good and bad (B. Ḳ. 60a). In the city of Luz the angel of death has no power, and when the aged inhabitants are ready to die they go outside the city (Soṭah 46b; compare Sanh. 97a). A legend to the same effect existed in Ireland in the Middle Ages ("Jew. Quart. Rev." vi. 336).

The angel of death was created by God on the

Form and Functions.

first day (Tan. on Gen. xxxix. 1). His dwelling is in heaven, whence he reaches earth in eight flights, whereas pestilence reaches it in one (Ber. 4b). He has twelve wings (Pirḳe R. El. xiii.). "Over all people have I surrendered thee the power," said God to the angel of death, "only not over this one which has received freedom from death through the Law" (Tan. to Ex. xxxi. 18; ed. Stettin, p. 315). It is said of the angel of death that he is full of eyes. In the hour of death he stands at the head of the departing one with a drawn sword, to which clings a drop of gall. As soon as the dying man sees the angel, he is seized with a convulsion and opens his mouth, whereupon the angel throws the drop into it. This drop causes his death; he turns putrid, and his face becomes yellow ('Ab. Zarah 20b; in detail, Jellinek, "B. H." i. 150; on putrefaction see also Pesiḳ. 54b; for the eyes compare Ezek. i. 18 and Rev. iv. 6). The expression "to taste of death" originated in the idea that death was caused by a drop of gall ("Jew. Quart. Rev." vi. 327; see Death, Views of).

The soul escapes through the mouth, or, as is stated in another place, through the throat; therefore the angel of death stands at the head of the patient (Jellinek, *l.c.* ii. 94, Midr. Teh. to Ps. xi.). When the soul forsakes the body its voice goes from one end of the world to the other, but is not heard (Gen. R. vi. 7; Ex. R. v. 9; Pirḳe R. El. xxxiv.). The drawn sword of the angel of death, mentioned by the Chronicler (I. Chron. xxi. 15; comp. Job xv. 22; Enoch lxii. 11), indicates that the angel of death was figured as a warrior who kills off the children of men. "Man, on the day of his death, falls down before the angel of death like a beast before the slaughterer" (Grünhut, "Liḳḳuṭim," v. 102a). R. Samuel's father (*c.* 200) said: "The angel of death said to me, 'Only for the sake of the honor of mankind do I not tear off their necks as is done to slaughtered beasts'" ('Ab. Zarah 20b). In later representations the knife sometimes replaces the sword, and reference is also made to the cord of the angel of death, which indicates death by throttling. Moses says to God: "I fear the cord of the angel of death" (Grünhut, *l.c.* v. 103a *et seq.*). Of the four Jewish methods of execution three are named in connection with the angel of death: burning (by pouring hot lead = the drop of gall), slaughtering (by beheading), and throttling. The angel of death administers the particular punishment which God has ordained for the commission of sin.

A peculiar mantle ("idra"—according to Levy, "Neuhebr. Wörterb." i. 32, a sword) belongs to the equipment of the angel of death (Eccl. R. iv. 7). The angel of death takes on the particular form which will best serve his purpose; *e.g.*, he appears to a scholar in the form of a beggar imploring pity (M. Ḳ. 28a). "When pestilence rages in the town, walk not in the middle of the street, because the angel of death [*i.e.*, pestilence] strides there; if peace reigns in the town, walk not on the edges of the road. When pestilence rages in the town, go not alone to the synagogue, because there the angel of death stores his tools. If the dogs howl, the angel of death has entered the city; if they make sport, the prophet Elijah has come" (B. Ḳ. 60b). The "destroyer" ("saṭan ha-mashḥit") in the daily prayer is the angel of death (Ber. 16b). Midr. Ma'ase Torah (compare Jellinek, "B. H." ii. 98) says: "There are six angels of death: Gabriel over kings; Ḳapẓiel over youths; Mashbir over animals; Mashḥit over children; Af and Ḥemah over man and beast."

Identical with Antichrist.

When the Messiah comes all the dead will arise, and there will be an end to death; for the angel of death himself will be destroyed by the Messiah (Pesiḳ. R., ed. Friedmann, p. 161b). Satan, as the angel of death, is identified here with Antichrist. "The last enemy that shall be destroyed is death" (I Cor. xv. 26; compare Heb. ii. 14). The same idea seems to be expressed in the Book of Jubilees xxiii. 29: "And they shall fulfil all their days in peace and joy, and shall live on, since there will be no Satan and no evil to destroy them."

The angel of death, who is identified with Satan, immediately after his creation had a dispute with God as to the light of the Messiah (Pesiḳ. R. 161b). When Eve touched the tree of knowledge, she perceived the angel of death, and thought: "Now I shall die, and God will create another wife for Adam" (Pirḳe R. El. xiii., end; compare Targum Yer. to Gen. iii. 6, and Yalḳ. i. § 25). Adam also had a conversation with the angel of death (Böklen, "Die Verwandtschaft der Jüdisch-Christlichen mit der Parsischen Eschatologie," p. 12). The angel of death sits before the face of the dead (Jellinek, *l.c.* ii. 94). While Abraham was mourning for Sarah the angel appeared to him, which explains why "Abraham stood up from before his dead" (Gen. xxiii. 3; Gen. R. lviii. 5, misunderstood by the commentators). Samuel told Sarah that Abraham had sacrificed Isaac in spite of his wailing, and Sarah died of horror and grief (Pirḳe R. El. xxxii.). It was Moses who most often had dealings with the angel. At the rebellion of Korah, Moses saw him (Num. R. v. 7; Bacher, *l.c.* iii. 333; compare Sanh. 82a). It was the angel of death in the form of pestilence which snatched away 15,000 every year during the wandering in the wilderness (*ib.* 70). When Moses reached heaven, the angel told him something (Jellinek, *l.c.* i. 61).

When the angel of death came to Moses and said, "Give me thy soul," Moses called to him: "Where I sit thou hast no right to stand." And the angel retired ashamed, and reported the occurrence to God. Again, God commanded him to bring the soul of Moses. The angel went, and, not finding him, inquired of the sea, of the mountains, and of the valleys; but they knew nothing of him (Sifre, Deut. 305). Really, Moses did not die through the angel of death, but through God's kiss ("bi-neshiḳah"); *i.e.*, God drew his soul out of his body (B. B. 17a; compare Abraham in Apocryphal and Rabbinical Literature, and parallel references in Böklen, *l.c.* p. 11). Legend seizes upon the story of Moses' struggle with the angel of death, and expands it at length (Tan., ed. Stettin, pp. 624 *et seq.*; Deut. R. ix., xi.; Grünhut, *l.c.* v. 102b, 169a). As Benaiah bound Ashmedai (Jew. Encyc. ii. 218a), so Moses binds the angel of death that he may bless Israel (Pesiḳ. 199, where "lifne moto" [Deut. xxxiii. 1] is explained as meaning "before the angel of death").

Solomon once noticed that the angel of death was grieved. When questioned as to the cause of his sorrow he answered: "I am requested to take your two beautiful scribes." Solomon at once charged the demons to convey his scribes to Luz, where the angel of death could not enter. When they were near the city, however, they both died. The angel laughed on the next day, whereupon Solomon asked the cause of his mirth. "Because," answered the angel, "thou didst send the youths thither, whence I was ordered to fetch them" (Suk. 53a). In the next world God will let the angel of death fight against Pharaoh, Sisera, and Sennacherib (Yalḳ., Isa. 428).

The teaching of God shields one from the power of the angel of death. The children of Israel have accepted the Torah only in order that the angel may have no power over them ('Ab. Zarah 5a). Since death results only from sin, it can not, of course, come to those who live in accordance with the Torah. Although the sentence of mortality once pronounced could never be recalled ('Ab. Zarah 5a), yet the angel of death may not visit teachers of the Law; he is rather their friend (*ib.* 35b), and even imparts learning to them (Ber. 51a).

Scholars and the Angel of Death.

Talmud teachers of the fourth century associate quite familiarly with him. When he appeared to one on the street, the teacher reproached him with rushing upon him as upon a beast; whereupon the angel called upon him at his house. To another he granted a respite of thirty days, that he might put his knowledge in order before entering the next world. To a third he had no access, because he could not interrupt the study of the Talmud. To a fourth he showed a rod of fire, whereby he is recognized as the angel of death (M. Ḳ. 28a). He often entered the house of Bibi and conversed with him (Ḥag. 4b). Often he resorts to strategy in order to interrupt and seize his victim (B. M. 86a; Mak. 10a).

The death of Joshua ben Levi in particular is surrounded with a web of fable. When the time came for him to die and the angel of death appeared to him, he demanded to be shown his place in paradise. When the angel had consented to this, he demanded the angel's knife, that the angel might not frighten him by the way. This request also was granted him, and Joshua sprang with the knife over the wall of paradise; the angel, who is not allowed to enter paradise, catching hold of the end of his garment. Joshua swore that he would not come out, and God declared that he should not leave paradise unless he was absolved from his oath; if not absolved, he was to remain. The angel of death then demanded back his knife, but Joshua refused. At this point a heavenly voice ("bat ḳol") rang out: "Give him back the knife, because the children of men have need of it" (Ket. 77b; Jellinek, *l.c.* ii. 48–51; Bacher, *l.c.* i. 192 *et seq.*).

K. L. B.

——**In Arabic Literature:** The angel of death is spoken of in the Koran (suras xxxii. 11, lxxix. 1), and is called by the Mohammedans Azrael—probably identical with עסריאל, the angel of Gehinnom, according to "'Emeḳ ha-Melek" ("Tiḳḳune Teshubah"; quoted by Eisenmenger, "Entdecktes Judenthum," ii. 333). "When Death was created by God, he, on account of his terrible power, had to be put in 70,000 chains of a thousand years' journey's length each, and behind millions of barriers. When Azrael was placed in charge of him and saw him, he called the angels to look at him, and when he, at God's command, spread his wings over him and opened all his eyes, the angels fainted away and remained unconscious for a thousand years. Azrael was given all the powers of the heavens to enable him to master Death."

Azrael reaches from one end of the world to the other (Jellinek, "B. H." v. 49), and has 70,000 feet and 4,000 wings. His whole body is covered with eyes (see 'Ab. Zarah 20b) and with tongues as numerous as the living creatures on earth. When any of these latter die, the corresponding eye bulges forth. At the end of the world all these eyes excepting eight are plucked out by God—those of Israfil (Sarafel), Michael, Gabriel, Azrael, and the four "ḥayyot" of the Heavenly Chariot alone remaining. The times of the death of persons is made known to the angel of death through the roll-book in his possession showing a white stripe around the name of the person doomed. Forty days before death, however, a leaf falls from the tree of life, under the throne of God, into the lap of Azrael, who is seated in the seventh heaven, thus announcing the death (compare Yer. Ber. ii. 8, 5c, and the picture of the fig-tree).

"When people lament and weep too much over the death of a person, the angel of death shall stand at the door and say: 'What cause have you for such violent complaint? I am only the messenger of God and have done His bidding, and if you rebel against Him, I shall return often to take one of your house'" (compare Midr. Yalḳ. to Deut. xiv. 1, 2; 'Er. 19b; and Böklen, *l.c.*).

"When a righteous person dies, the angel of death comes with a host of good angels, carrying sweet odors of paradise, and makes the soul leave the body like a drop taken out of a bucket of water. When a wicked person dies, the angel of death comes in the company of demons, who pull the soul out as with iron spits" (compare Midr. Teh. to Ps. xi. and "Nishmat Ḥayyim," ii. 20).

DEATH, VIEWS AND CUSTOMS CONCERNING.

—In Biblical and Apocryphal Literature: The ancient Hebrews expected to "be gathered to [or sleep with] their fathers" when death befell them (Gen. xxv. 8, xlvii. 30), and feared only the idea of going down to Sheol mourning (*ib.* xxxvii. 35). To sleep and be at rest was the desire of the distressed (Job iii. 13–22). To die "in a good old age" was regarded as a blessing (Gen. xv. 15, xxv. 8); to be cut off from the land of the living in the noontide of life was dreaded and looked upon as a misfortune (Isa. xxxviii. 10). Only occasionally the stings of death and the stroke of Sheol became terrors, from which the Lord was petitioned to redeem man (Hosea xiii. 14; Ps. xvi. 10, xlix. 16 [15], lxxxvi. 13). Nowhere, however, in the Bible is death regarded as a real evil, except from the point of view that man, being of divine origin, should have had, like any other heavenly being, access to the tree of life and have lived forever (Gen. iii. 22). Accordingly, the eschatological view found expression in such phrases as that "death will be swallowed up forever" and "the dead shall rise again" (compare Isa. xxv. 8, xxvi. 19).

Still the popular view in the days of Kohelet (Eccl. vii. 1, ix. 4-6) and of Ben Sira (Ecclus. [Sirach] xli. 1-4) was that there was no other prospect for man but that of the dreary life of the shades in Sheol, and this made life on earth all the more precious. Nor did this view in any way prevent Ben Sira from seeing in the yielding of the first woman to the tempter the cause of men's death (*ib.* xxv. 24). More pronounced on the latter point is the Book of Wisdom: "God created man to be immortal; . . . nevertheless through envy of the devil came death into the world" (Wisdom ii. 23, 24). "For God made not death; through righteousness immortality is obtained" (*ib.* i. 13, 16; vi. 18; xv. 3). This view (expressed also in Ethiopic Enoch, xcviii. 4 and Slavonic Enoch, xxx. 16-18) was made the basic idea of Paul's system of salvation (Rom. v. 12; I Cor. xv. 21; Heb. ii. 14), after the apocalyptic literature of the Jews had made the problem of sin and death the object of most serious reflection, which culminated in the hope of the final annihilation of death in the world to come (IV. Esd. iii. 7; vii. 32, 119; viii. 53). Satan is called in the New Testament "a murderer from the beginning" (John viii. 44) and "the destroyer" (I Cor. x. 10). See DEATH, ANGEL OF, IN RABBINICAL LITERATURE.

Death is conceived of as a person who has charge of the shades in the nether world (Ps. xlix. 15; see also DEMONOLOGY). He is their general (Gen. R. xxvi.).

The following is the description of Death as one of God's messengers:

> "When Abraham had refused to let the archangel Michael take his soul, God said to the latter: 'Call Me hither Death of the shameless countenance and the pitiless look, [this seems to allude to the name of Azazel—עזזאל—and the deadly look (עין הרע)]. Death shivered and trembled at being called to come before the Lord, when God said to him: 'Come hither, thou bitter and fierce name of the world [an allusion to both Azazel and מר המות, I Sam. xv. 32], hide thy fierceness, cover thy corruption, and cast away thy bitterness from thee, and put on thy beauty and all thy glory, and go down to Abraham My friend and bring him to Me.' Death put on a robe of great brightness and made his appearance like the sun, and became fair and beautiful above the sons of men, assuming the form of an archangel, his cheeks flaming with fire, and went to Abraham, a sweet odor and a flash of light announcing his coming to the patriarch, who took him to be an archangel, the chief captain of God, and welcomed him as the bringer of light and a most glorious helper. But Death rejoined: 'Most righteous Abraham, I am the bitter drop of Death' [סם המות, whence the name סמאל]; and when asked for his errand, he said: 'For thy holy soul am I come.' Abraham again refused to give up his soul. Death followed him into his chamber, and when Abraham lay down upon his couch, he sat by his feet and would not depart, notwithstanding all the entreaties of the patriarch to let him live.
>
> "On inquiry of the patriarch, he told him that only because of his great righteousness, his hospitality to men, and his love toward God, which became a crown of glory upon his head, did he approach him in such beauty and glory: to sinners he came in fierceness, corruption, and bitterness. 'Show me these,' asked Abraham; but Death replied, 'Thou canst not stand these looks.' Thereto Abraham answered: 'By means of the name of the living God—שם המפורש—I shall be able to look.' So Death put off his sunlike glory and put on his tyrant-like robe and made his appearance fiercer than all wild beasts, and filthier than all filth, and he showed Abraham seven fiery serpents' heads and fourteen faces: (1) of flaming fire, (2) of darkness, (3) of a viper, (4) of a precipice, (5) of a fierce asp, (6) of a terrible lion, (7) of a cerastes, (8) of a basilisk, (9) of a fiery simitar, (10) of terrible lightning and thunder, (11) of a stormy sea, (12) of a rushing river, (13) of a three-headed serpent, and (14) of a cup filled with poison; and then he showed him every mortal disease emanating from the odor of Death. Seven thousand man- and maid-servants of Abraham died from the effect of this odor and sight, so that Abraham implored Death to hide his fierceness and to put on his former garb of beauty. Death complied with his request, and joined Abraham in a prayer to God to restore to life those who had died so suddenly by his fierceness; and the prayer was granted.
>
> "Abraham, however, would not consent to surrender his soul until Death had explained to him the different forms and faces he had shown him in all their fierceness; whereupon Death replied that the seven heads of serpents indicated the seven ages during which he is to destroy all men, rich and poor, and to bring them to the bottom of Hades. Because people die by fire, by falling from precipices, by the sword, by rushing rivers, on the raging sea, and in storms of lightning, by wild beasts or cups of poison, he assumed all those aspects. Finally, he spoke of the seventy-two kinds of death [see ABRAHAM, TESTAMENT OF, and footnote, JEW. ENCYC. i. 95b] and of the death of the righteous. Then Death took the right hand of Abraham, and his soul clung to him."

Death appears here as the personification of psychical evil, with many traits borrowed from Ahriman in the Avesta (see PARSISM), but not of moral evil (see Test. Abraham, A, xvi.-xx.; "Texts and Studies," ii. 2, Cambridge, 1892; "Anti-Nicene Fathers," Eng. transl., pp. 183 *et seq.*, New York, 1897; see also DUMAH).

E. C. K.

Cause of Death.

——**In Rabbinical Literature:** There are different views among Jews concerning the cause of death. Some assign it to Adam's first sin in partaking of the forbidden fruit (Tanna debe Eliyahu R. v.). This view is somewhat modified by the Rabbis, who regard death as the fruit of personal sin; maintaining that, like Adam, each person dies on account of his own sin (Shab. 55a, b), as "there is not a righteous man upon earth that doeth good and sinneth not" (Eccl. vii. 20). Still, the Rabbis speak of a number of "saintly men who died without sin and only in consequence of the poison of the serpent" (בעטיו של נחש); *e.g.*, Benjamin; Amram; Jesse, the father of David; and Chileab, David's son (Shab. 55b; B. B. 17a; compare Derek Ereẓ Zuṭa, where thirteen persons are named). Another view is that death was ordained at creation, and that Adam by his sin merely hastened death (Ex. R. ii.; Tan. [Yelamdenu], Wayesheb, ed. Vienna, 44b). According to others, Adam was destined to live forever and not to taste death, but, owing to the fact that men like Hiram of Tyre and Nebuchadnezzar wanted to be worshiped as gods, God decreed death for man (Ex. R. ix.). The opinion is also expressed that God would have annihilated the power of the angel of death over Israel after its acceptance of the Law, but for the fact that the divine decree could not be reversed ('Ab. Zarah 5a). From the point of view that sin precedes and causes death in each person, the Talmud designates special reasons for the death of innocent children (Shab. 32b).

Modes of Death.

There are 903 (תוצאות, Ps. lxviii. 21) distinct deaths. The hardest is by asthma; and the easiest is called מיתת נשיקה ("death by the kiss"), which is "like drawing a hair out of milk": that is the interpretation of על פי יי ("by the mouth of the Lord," Deut. xxxiv. 5, Hebr.). Six persons are known to have died in that way; namely, the three patriarchs, and Moses, Aaron, and Miriam (B. B. 17a).

Death coming after five days' illness is considered ordinary; after four days, a reprimand of Heaven; after three days, a severe rebuke; after two days, a hastened death; after one day, a sudden one, or, according to some, an apoplectic one (M. Ḳ. 28a). To die before reaching the age of fifty is כרת ("to be cut off," Lev. xviii. 29). Sixty years is a ripe age; seventy is old age; and eighty, advanced age (M. Ḳ. 28a).

Communication with the Living.

Many allegorical tales are related in rabbinical literature about the communication of the dead with the living. A pious man, being rebuked by his wife for giving away a dinar (denarius) to a beggar in time of famine, went to sleep in the cemetery. It was New-Year's eve, and he overheard the spirits of two women gossiping. One of them proposed to fly and listen behind the curtain in the judgment chamber to the promulgation of the future visitations in the world. The other spirit excused herself, saying, "I can not accompany thee because I am buried in reed matting; go thyself, and come back and tell me what thou hearest." Presently her companion returned and reported: "I heard that the hail will kill whatever is planted in the first rainy season." The pious man planted in the second season. The following year he again went to sleep in the cemetery on New-Year's eve, and overheard a similar conversation, gaining the information that whatever was planted in the second season would be consumed by blight. The pious man planted during the first season. His wife was curious to know how he managed to evade the calamitous visitations, and he, being pressed, related his story. A few days later the woman had a quarrel with the mother of the second spirit, and abused her for having given her daughter an indecent burial. The third year the pious husband again sought to obtain information regarding future crops; the second spirit said, "Hush, companion! our former conversation was overheard by mortal men" (Ber. 18a).

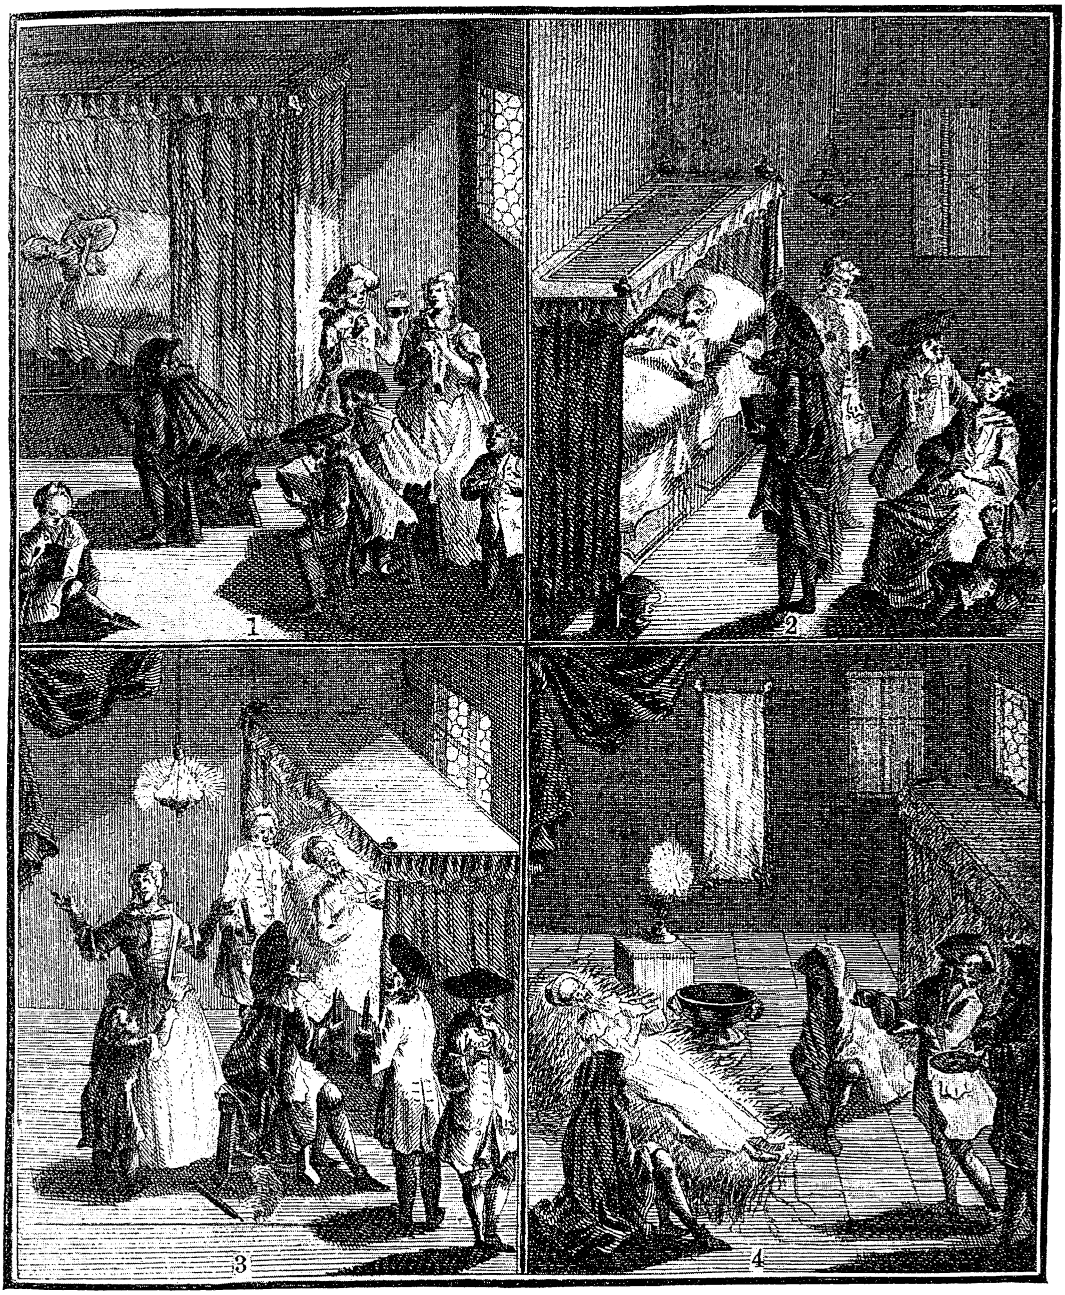
R. Ze'ira left his money with the mistress of a boarding-house. Returning, he found that she had died. He repaired to the cemetery and inquired of her: "Where is my money?" Said she: "Go, take it from the socket under the door-pivot. At the same time tell my mother to send me my comb and the eye-dye flask by a certain woman who will arrive here to-morrow" (*ib.* 18b).

A similar story is told of Samuel, who was absent when his father Abba died, and wished to find out where he treasured the money entrusted to him by orphans. Samuel went to the cemetery and inquired after "Abba," but was told, "There are many 'Abbas' here." Said he, "I want Abba, the son of Abba." "There are many by this name." "But I want Abba b. Abba, the father of Samuel [Samuel being more famous than his father]; where is he?" He was informed that his father was studying at the high yeshibah in heaven. On reaching it Samuel observed Levi standing outside, as a punishment for not attending R. Aphes' yeshibah below. Meanwhile Abba appeared. Samuel saw him crying and laughing, and asked him: "Why cryest thou?" "Because thou wilt soon join us." "Why laughest thou?" "Because thou art very much respected here." "If so," said Samuel, "let Levi enter!" And Levi was allowed to enter. Then the father informed Samuel where to find the money (*ib.*).

Continued Consciousness of the Dead.

The dead are supposed to take an active interest in worldly affairs. The assertion of Kohelet that "The dead know not anything" (Eccl. ix, 5) is interpreted, "The wicked who are considered dead while yet alive." R. Isaac said, "The sting of a worm to the dead is like the pricking of a pin in the flesh of the living" (Shab. 13b). The dead are very sensitive. One must not tell tales around the death-bed of a scholar (Ber. 19a). Inasmuch, however, as the dead are exempt from performing the precepts, they feel slighted if such performance should take place in their presence by the living, as it would be like "mocking the poor" (Prov. xvii. 5). R. Ḥiyya, on his way to the cemetery with R. Jonathan, noticed the ẓiẓit of the latter's garment untied, and admonished him to pick them up, else the dead would remark, "To-morrow they will join us, and now they scoff us" (Ber. 18a; compare Yer. Ber. 4c, d; Eccl. R. ix. 5; see Bacher, "Ag. Tan." ii. 526). From this it is inferred that where the custom prevails to wrap the dead with a ṭallit over the shroud, the fringe must be removed or made unfit for purposes of prayer (Shulḥan 'Aruk, Yoreh De'ah, 351). Also, in burying a scholar it is customary to deposit in his coffin a scroll that is unfit for reading (*ib.* 351; Maimonides, "Yad," Sefer Torah, x. 36).

The Zohar obviously disapproves this practise of making use of the cemetery as a genizah for defective scrolls, and tells the following story of R. Hezekiah and R. Jose, who were passing the ruins of Aleppo in Syria, the latter carrying along a fragment of a scroll. While resting they heard a rumbling noise arising from a grave, and a cry: "Wo, wo, the world must be in trouble, for the Torah has appeared here. Or perhaps they come again to laugh at us and disgrace us?" The rabbis were frightened and asked, "Who art thou?" "I am a dead man. Once upon a time, when the world was in trouble, R. Ḥiyya came here with a scroll to pray. I and my comrades went out to meet him, and introduced him to the patriarchs in paradise; but on examination the scroll was found to be defective, having a superfluous letter 'waw' in the word פרסה [Lev. xi. 3], and because we admitted him we were expelled from the high yeshibah" (Zohar, ed. Cracow, אחרי מות 127).



Death-Bed Scenes.

1. Visiting the Sick. 2. Making the Confession. 3. Lighting the Candles. 4. Mourning.

(From Bodenschatz, "Kirchliche Verfassung," 1748.)

Prayers to and of the Dead.

The practise of praying for the intercession of the dead is of early origin. Caleb on reaching Hebron visited the cave of Machpelah, and prayed to the patriarch to be saved from cooperating in the conspiracy of the scouts sent by Moses to make a report of the conditions existing in the Holy Land (Soṭah 34b). The Talmud mentions the custom of visiting the cemetery to request the dead to pray for the living (Ta'an. 16a; compare *ib.* 23b).

The Soul of the Dying.

The noise of the soul's departure from the body reverberates through the world from one end to the other, and yet the sound is unheard (Yoma 20b). Prior to the soul's exit it sees the Shekinah (Pirḳe R. El. xxxiv.). The soul after death is in the same condition as it is in life when one dreams (*ib.*). Until the body is entirely consumed the soul hovers over the grave (Shab. 152b).

R. Judah ha-Nasi in his last will commanded his sons that on every Sabbath eve after his demise they should continue to light the candles, set the table, and prepare the couch in their customary places, as on every Sabbath eve he would visit his home. Once a neighbor knocked at the door for entrance, and Rabbi's servant answered: "Hush! Rabbi is at home." After this, Rabbi ceased his visits, so as not to reflect on the righteous men who died before him (Ket. 103a). Samuel said: "If one wants to have a taste of death, let him sleep with his shoes on" (Yoma 78b). "And God saw everything he had made, and behold, it was very good" (Gen. i. 31). "This includes death," wrote R. Meïr on the margin of his Bible, playing on the similarity of מאוד and מות (Gen. R. ix.). "The day of death [is better] than the day of one's birth" (Eccl. vii. 1) is explained in Eccl. R. *ad loc.* and Ex. R. xlviii. to mean that "death tells of the meritorious life of the departed: it is like the vessel entering port laden with goods." The great ones of each generation must die to make room for the greatness of successors; "the righteous themselves ask for death as a favor" (Midr. Teh. to Ps. cxvi. 15). The Zohar calls death a festal day (יומא דהילולא; Zohar, Shemini, in referring to the death of Nadab and Abihu; compare also Heilprin, "'Er Ke ha-Kinnuyim," fol. 20c.) The day when Adam died was made a holiday (Tanna debe Eliyahu R. xvi.).

The windows of the death-chamber should be opened to allow the spirits to enter and to depart (מעבר יבק, *s.v.* שפתי כהן, vi.; see Birds as Souls).

Superstitions.

The angel of death is supposed to wipe his bloody knife in water near the dead; hence all water of the adjacent houses must be emptied on the ground (Yoreh De'ah, 339). As the "shedim" are supposed to follow the dead or to hover around the graves, those who follow a funeral cortége must wash their hands on their return, before entering a house (*ib.* 376, 4); but should not dip them in the river. A special lavatory for this purpose is usually provided at the cemetery. On returning from the funeral one should sit down and rest on the way several times, so as to drive away the spirits that follow him (Ṭur Yoreh De'ah, 375). The board upon which the dead is cleansed must not be turned over. One should not visit the same grave twice during one day (Will of R. Judah the Pious); nor sleep in the cemetery (Nid. 17a); nor look closely on the face of a dead person; nor kiss the dead, not even when a near relative ("Sefer Ḥasidim," § 236).

Omens of Death.

A common superstition is current that if the shadow of one's head is invisible against the wall in a house where a light is burning on Hosha'na Rabbah eve, it is a sign that the person is destined to die within the year; if visible, he will live (see Naḥmani, commentary on Num. xiv. 9). R. Ammi says: "If one wishes to know whether he will live during the following year, let him during the ten Penitential Days burn a candle in his house where no wind can blow it out. If it does not become extinguished he will live; otherwise, not" (Hor. 12a). To discover whether the husband or the wife will die first, calculate the numerical value of the letters in the names of both. If the amount is even, the man will die first; if odd, the woman (נפלאים מעשיך, letter Mem, § 6).

Superstitions concerning death in connection with dreams are numerous. One of them, the vision of a scroll in the Ark, foretells death, as the death of Aaron follows the description of the tablets placed in the Ark ("Sefer Ḥasidim," § 533). See Dreams.

A dying child may be released from death's grasp if nominally sold by the parents to a friend for a shekel ("Sefer Ḥasidim," § 245). A change of name may save from death (R. H. 16b). Removal of a feather pillow from beneath the head of a dying person helps the soul to depart more easily. But some rabbis objected to this treatment, on the ground that it disturbs the sinking person and hastens his death (כנה"ג to Ṭur Yoreh De'ah, 339; "Sefer Ḥasidim," §§ 245–246). The iron keys of the synagogue, if placed under the pillow, have the same effect (*ib.*). In accordance with Prov. x. 18: "He that uttereth slander [דבה = "evil news"] is a fool." Announcement of death should be made indirectly (Pes. 3b); it was for this reason that the shofar was blown in Talmudical times when death occurred in a town (M. Ḳ. 27b). The beadle who summons the congregation to early morning prayer by three knocks at their doors or windows, announces a death in the town by reducing the number of knocks to two. It is a good omen to die with a smile on the face, or to die on one's birthday. Rain on the day of a funeral is a sign of compassion and forgiveness toward the dead (Ṭur Yoreh De'ah, 353).

It is customary to bend the thumb of the corpse so that the whole hand resembles the word "Shaddai" (Almighty), and to bind it in this position with the ẓiẓit. A shard is placed on the eyes, a little stick in the hands, a piece of metal on the body, a little bag with earth from the Holy Land under the head, and a three-toothed wooden fork in the hands, to enable the dead to excavate a subterranean way to the Holy Land on the day of resurrection, when all the Jewish dead will arise in Palestine. A towel is hung up and a glass of water placed beside it, so that the soul might bathe when it returns to the body.

DEATH (Statistics). See Mortality.

DEBARIM. See Deuteronomy.

DEBARIM RABBAH: A Midrash or homiletic commentary on the Book of Deuteronomy. Unlike Bereshit Rabbah, the Midrash to Deuteronomy which has been included in the collection of the Rabbot in the ordinary editions does not contain running commentaries on the text of the Bible, but twenty-five complete, independent homilies, together with two fragmentary ones, on as many sections of Deuteronomy, which for the larger part are recognized as "sedarim," the Sabbatical lessons for public worship according to the Palestinian three-year cycle. The index to the rabbinical Bible (Venice, 1525) gives twenty-seven sedarim in Deuteronomy; on nineteen of these there are homilies in the present Midrash, as well as a fragment, which, according to the editions, belongs to another seder (Deut. xxix. 9). It may be due to differences of time and place in the division of the cycle of sedarim that in the Debarim Rabbah there are no homilies on seven or eight of the sedarim mentioned in that index—namely, Deut. xi. 10, xiv. 1, xv. 7, xxiii. 10, xxiii. 22, xxiv. 19, xxvi. 1, and occasionally and conditionally xxix. 9—and that, besides a homily on a section mentioned in other sources as a seder (Deut. iv. 25), there are five additional homilies on the sections Deut. i. 10, iv. 7, xi. 26, xxiv. 9, and xxix. 1, which were not otherwise known as sedarim. In some of these homilies, moreover, the halakic exordiums (see below) close with the words מנין . . . ממה שקרינו בענין, which clearly show that the Scriptural sections on which the homilies were pronounced were used for public lessons. The editor of this Midrash, however, has probably included only the homilies on the Sabbatical lessons of the cycle of sedarim; for Debarim Rabbah contains no homilies on the lessons of the Pesikta cycle belonging to Deuteronomy, Deut. xiv. 22 and xxv. 17 (Deut. xxxiii. 1 is a seder as well as a Pesikta section).

Sections of the Midrash.

The economy of this Midrash containing sedarim homilies on Deuteronomy, as well as the character of the individual homilies, could easily have been misconstrued and forgotten after the division of the Torah into pericopes according to the one-year cycle had come into general use. In present editions Debarim Rabbah is divided only according to these latter pericopes; it was not noticed that the homilies on כי תצא and כי תבא did not correspond with the beginnings of the pericopes Deut. xxi. 10 and xxvi. 1. The sidrot Niẓẓabim and Wayelek formed *one* pericope in the oldest Midrash editions (Constantinople, 1512, and Venice, 1545); hence in these editions Debarim Rabbah contains only ten sections, corresponding with the pericopes. The further designation of these sections as "parashiyyot" and their enumeration from 1 to 11, dividing Niẓẓabim and Wayelek, are addenda of the later editions.

According to its original composition, this Midrash includes the following homilies (the passages marked with an asterisk are sedarim):

(1) Parashah i. Nos. 1-9 (according to the Wilna ed.), on *Deut. i. 1; (2) *ib.* Nos. 10-14, on Deut i. 10; (3) *ib.* Nos. 15-20, on *Deut. ii. 2; (4) *ib.* Nos. 21-25, on *Deut. ii. 31; (5) par. ii. Nos. 1-9, on *Deut. iii. 23; (6) *ib.* Nos. 10-17, on Deut. iv. 7; (7) *ib.* Nos. 18-24, on *Deut. iv. 25; (8) *ib.* Nos. 25-30, on *Deut. iv. 41; (9) *ib.* Nos. 31-37, on *Deut. vi. 4; (10) par. iii. Nos. 1-7, on *Deut. vii. 12; (11) *ib.* Nos. 8-11, on *Deut. ix. 1; (12) *ib.* Nos. 12-17, on *Deut. x. 1; (13) par. iv. Nos. 1-5, on Deut. xi. 26; (14) *ib.* Nos. 6-11, on *Deut. xii. 20; (15) par. v. Nos. 1-7, on *Deut. xvi. 18; (16) *ib.* Nos. 8-11, on *Deut. xvii. 14; (17) *ib.* Nos. 12-15, on *Deut. xx. 10; (18) par. vi. Nos. 1-7, on *Deut. xxii. 6; (19) *ib.* Nos. 8-14, on Deut. xxiv. 9; (20) par. vii. Nos. 1-7, on *Deut. xxviii. 1; (21) *ib.* Nos. 8-12, on Deut. xxix. 1; (par. viii. No. 1, merely a halakic exordium, doubtful if belonging to *Deut. xxix. 9); (22) par. viii. Nos. 2-7, on *Deut. xxx. 11; (23) par. ix. Nos. 1-9, on *Deut. xxxi. 14; (24) par. x. Nos. 1-4, on *Deut. xxxii. 1; (25) par. xi. Nos. 1-5, and probably 7-8, on Deut. xxxiii. 1 (*ib.* No. 6 is an interpolated second halakic exordium; No. 8 probably closes the homily and the Midrash, the remaining pieces being additions borrowed from the "Midrash on the death of Moses").

Analysis of Contents.

These homilies, which in a new edition of the Midrash should be marked as its proper components, evince a great regularity of workmanship in their composition and execution. Each homily begins with a halakic exordium, has one or more proems, followed by the commentary—in which, however, only the first verse, or a few verses from the beginning of the section read, are treated—and ends with an easily recognizable peroration containing a promise of the Messianic future or some other consolatory thought, all concluding with a verse of the Bible. The comments referring only to the first verses of the lesson characterize Debarim Rabbah as a Midrash of homilies in which even the proems are rather independent homilies than introductions to the comment on the Scriptural section; and the exordiums show, further, that Debarim Rabbah is very similar to the Tanḥuma Midrashim. In the halakic exordium (an essential of the haggadic discourse which is found neither in Pesiḳta and Wayiḳra Rabbah nor in Bereshit Rabbah) an apparently irrelevant legal question is put, and answered with a passage from the Mishnah (about twenty times) or Tosefta, etc. Such answers are generally introduced in Debarim Rabbah by the formula כך שנו חכמים; though the formula usual in Tanḥuma, כך שנו רבותינו, occurs twice (in parashah i. Nos. 10 and 15). Then follow other halakic explanations (compare parashah v. No. 8; par. vii. Nos. 1 and 8; par. ix. No. 1; par. xi. No. 1) and haggadic interpretations, the last of which are deduced from the Scriptural section of the Sabbath lesson. Thus, a connection between the halakic question and the text or the first verse of the lesson is found, and the speaker can proceed to the further discussion of the homily, the exordiums closing generally with the formula מנין ממה שקרינו בענין, followed by the first words of the Scriptural section. The formula occurs 18 times as cited; twice as מנין שכתוב בענין; once as מנין שכך כתוב; twice as מנין שנאמר; it is lacking altogether in only a few of the homilies.

Resemblance of Yelamdenu.

The stylistic manner of opening the discourse with a halakic question is so closely connected with the original Midrash Tanḥuma, however, that in consequence of the introductory formula ילמדנו רבינו ("May our teacher instruct us?"), with which the exordiums and hence the homilies began, the name "Yelamdenu" was given to this Midrash. Even in early times some scholars concluded from the halakic exordiums in Debarim Rabbah that this Midrash was derived in large part from the Yelamdenu; as did Abraham ben Solomon Akra in his "Kelale Midrash Rabbah," Venice, 1601.

It is curious that while in Debarim Rabbah every homily has a halakic exordium, in the extant Tanḥuma Midrashim the part on Deuteronomy is without any (the Tanhuma edited by Buber lacks the exordiums to Exodus also). It would be erroneous to conclude from this, however, that the present Debarim Rabbah must be identified with Tanḥuma, and Tanḥuma to Deuteronomy with Debarim Rabbah, or that Debarim Rabbah as well as the Tanḥuma Mirdash in the editions to Deuteronomy, and several other Midrashim to Deuteronomy of which fragments have been published in modern times, or from which quotations are found in old authors, have all borrowed from the original Yelamdenu. If the designation "Tanḥuma homilies" be given to the homilies described above, consisting of halakic introductions, proems, comments on various verses, etc., modeled on the form of the Yelamdenu Tanḥuma, and if the latter was also the model for the haggadic discourses in the centuries immediately following Tanḥuma, it may be said that Debarim Rabbah contains these homilies in a much more primitive form and also in a more complete collection than the Midrash Tanḥuma to Deuteronomy in Buber's and the earlier editions; for these editions (as Theodor has shown in his "Die Midraschim zum Pentateuch," in "Monatsschrift," 1886, pp. 559 *et seq.*) are extant in a very defective form, treat much fewer sedarim than Debarim Rabbah, and, are with few exceptions, only shorter or longer fragments of sedarim homilies.

Debarim Rabbah Older than Tanḥuma.

In view of the form of the homilies and the composition of the whole work, which lend to Debarim Rabbah the appearance of a Tanḥuma Midrash, it is not strange that passages from this Midrash are quoted, in some citations of earlier authors (in the thirteenth century and later), as belonging to Tanḥuma. Textually, Debarim Rabbah has little in common with the Tanḥuma Midrashim on Deuteronomy, either in the editions or in the extracts from Tanḥuma in Yalkuṭ or from Yelamdenu in Yalkuṭ and 'Aruk. Some halakic questions found also in Tanḥuma in homilies on Genesis, Exodus, and Leviticus are quite differently applied and developed in the exordiums of Debarim Rabbah. This Midrash, in its use of the old sources, such as Yerushalmi, Bereshit Rabbah, and Wayiḳra Rabbah, often shows a freer treatment, and endeavors to translate Aramaic passages into Hebrew and to modernize them.

As regards the time of writing or editing the Debarim Rabbah, "the epoch of the year 900" comes, according to Zunz, "perhaps" nearest the mark. The Midrash was not known either to R. Nathan, the author of the 'Aruk, or to Rashi (the passage in a citation quoted by the latter is not found in Debarim Rabbah). A large number of extracts are found in Yalkuṭ, generally with the designation of the Midrash אלה הדברים רבה, as it is commonly cited by the older authors. The same name is given to the Midrash on Deuteronomy in Cod. Munich, No. 229; this contains for the first pericope, דברים, four entirely different homilies which have but a few points of similarity with those in present editions, but which are likewise composed according to the Tanḥuma form, and are on the same Scriptural sections as the homilies in Debarim Rabbah; namely, on Deut. i. 1, i. 10, ii. 2, ii. 31. The second and third pericopes have also halakic exordiums closing with the words, . . . מנין ממה שקרינו בענין, in which, however, the question is put without any formula. The Munich manuscript agrees with Debarim Rabbah in the pericopes עקב to נצבים, but has additions to the latter; the remaining pericopes are lacking. Another manuscript Midrash, in the possession of A. Epstein, Vienna, contains not only the same homilies as Cod. Munich for the pericope דברים, but for the pericope ואתחנן has similar homilies, that are entirely different from Debarim Rabbah and are on the sedarim Deut. iii. 23 (not iv. 7), iv. 25, iv. 41, vi. 4; all these four homilies have halakic exordiums. The manuscript also has a different exordium for the beginning עקב. From this point to the pericope כי תבא, it agrees with the editions (the exordiums, however, are preceded only by the word הלכה, without אדם מישראל); in pericope נצבים and its additions it agrees with the Cod. Munich. For וילך (also on Deut. xxxi. 14) it has a different text; and in the last two pericopes, האזינו and וזאת הברכה, it agrees with the Midrash Tanḥuma in present editions. It may be assumed with certainty that the first one or two pericopes of this manuscript—in which several passages can be pointed out that R. Baḥya (end of the thirteenth century) quotes from the Midrash Rabbah or from אלה הדברים רבה—belong to a Midrash that originally included the whole of Deuteronomy. What remained of that Midrash was combined in those codices with pericopes from Debarim Rabbah and Midrash Tanḥuma. Among the numerous Midrashim to Deuteronomy there are known to be a number of fragments of a Debarim Zuṭa, the preservation of which is due to the author of Yalkuṭ.

Probable Date.

DEBASH, ISAIAH BEN SAMUEL: Provençal poet of the second half of the thirteenth century. Renan supposes that the surname "Debash" (honey) is the Hebrew translation of the Provençal name "Miles," a surname frequently borne by the Jews of Provence. Debash is known by two poems addressed to the poet Gorni in defense of Shiloni, also a poet, who had been criticized by Gorni. These two poems are still extant in manuscript (Munich MS. No. 128).

G. I. Br.

DEBE RABBI ISHMAEL. See Ishmael ben Elisha Tanna.

DEBIR: 1. A king of Eglon referred to in Josh. x. 3 *et seq.* The Septuagint reads Δαβὶν. Debir was one of the five kings who joined Adonizedek, King of Jerusalem, against the city of Gibeon. In the battle which ensued, according to the Book of Jashar, Joshua, who had come to the support of Gibeon, caused the sun and the moon to stop in their courses while he took revenge on his enemies. The outcome was a crushing defeat for Debir and the allied kings, who fled, but were caught and ignominiously put to death.

J. JR. I. Hu.

2. City in the south of Judah. According to Josh. xv. 15 and Judges i. 12, it was originally called "Kirjath-sepher" (קרית ספר); according to Josh. xv. 49, "Kirjath-sannah" (קרית סנה). In Josh. x. 39, xi. 21, xii. 13, it is said to have been conquered by Joshua, while in *ib.* xv. 15 *et seq.*; Judges i. 12 *et seq.*, Othniel is named as its captor. It was the seat of a tribal chief, and therefore a place of some importance. It is mentioned among the Levitical cities in Josh. xxi. 15. Its situation is not certainly known. Probably it is identical with Al-Ḍahariyyah, a large village on the top of a hill southwest of Hebron. Some consider the "Debir" mentioned in Josh. xv. 7 to be another place; but no city of this name is elsewhere mentioned as being in the vicinity indicated in the passage, and the text seems to be corrupt.

DEBIR, THE. See Holy of Holies.

DEBORAH: 1. Rebekah's nurse, who accompanied Jacob, and died on the road to Beth-el. She was buried under a terebinth ("oak" in A. V. and R. V.), on this account named "Allon-bakut" (terebinth of weeping; Gen. xxxv. 8). This tree appears later on in Jewish history in connection with another Deborah. In Judges iv. 5 it is called "the palm-tree of Deborah," as though named in honor of the prophetess, who sat under it and judged Israel; but it is more likely that "Deborah" in this connection is a reminiscence of the nurse.

How Deborah came to be in the camp of Jacob is explained by Moses ha-Darshan as follows: "Rebekah had said to Jacob, 'I shall send thee hence, and I shall bring thee back' (see Gen. xxvii. 45); and in fulfilment of the second part of her promise she sent Deborah to bring him back." The nurse is also mentioned in Gen. xxiv. 59, but her name is not given.

E. G. H. G. B. L.

2.——**Biblical Data:** A prophetess who judged Israel. The story of Deborah is given in Judges iv. and v., and, although these chapters agree in some details, the differences between the two are so great as to make it necessary to treat them separately. Ch. iv. is a prose narrative from which it is learned that for twenty years Jabin, King of Canaan—whose royal city was Hazor, and whose general, Sisera, also had a special city, Harosheth of the Gentiles—oppressed Israel. During this time, or for a part of it, there was a prophetess named Deborah, wife of Lapidoth; she also acted as judge. Her residence was between Ramah and Beth-el in the Mount of Ephraim. Stirred by the wretched condition of Israel she incites a rebellion, and sends for Barak, the son of Abinoam, to Kedesh of Naphtali, and orders him to muster ten thousand troops of Naphtali and Zebulun and concentrate them upon Mount Tabor, the mountain at the northern angle of the great plain of Esdraelon. At the same time she states that she will draw Sisera to the River Kishon. Barak declines to go without the prophetess. Deborah consents, but declares that the glory of the victory will therefore belong to a woman, for a woman will capture Sisera. Barak gathers ten thousand troops and comes to Mount Tabor. As soon as the news of the rebellion reaches Sisera he collects nine hundred chariots of iron and a host of people. A battle is fought, and Sisera is completely defeated. He himself escapes on foot, while his army is pursued as far as Harosheth of the Gentiles and destroyed, not a man being left. Sisera passes the tent of Jael, who calls him; and he lies down to rest. He asks for a drink; she gives him milk; and while he is asleep she hammers a tent-pin through his temple. When Barak, in hot pursuit, passes the tent, she shows him the dead general. The narrative closes with the statement that thenceforth the power of Jabin waned until he was finally destroyed. For Judges v., see Deborah, Song of.

E. G. H. G. B. L.

——**In Rabbinical Literature:** Deborah was one of the seven prophetesses God raised in Israel: Sarah, Miriam, Deborah, Hannah, Abigail, Huldah, and Esther (Meg. 14a). The epithet אשת לפידות ("wife of Lapidoth") is interpreted by the Rabbis (*l.c.*) as referring to the woman who furnished wicks for the "lamps" of the sanctuary. The story is told more elaborately in Tanna debe Eliyahu R. ix.: Deborah, being married to an "am ha-areẓ," induced him to furnish wicks for the Shiloh sanctuary, and he made them so big as to turn the lights into blazing torches (לפידות). His real name was "Barak," given to him because his face "shone like lightning" (ברק); he was also called "Michael," because he was modest before God (ממיך את עצמו); but his name "Lapidoth" (furnisher of lights) indicates the merit of his wife Deborah, which caused her to become a great light in Israel. The fact that she was appointed by God to be judge and prophetess while Phinehas, the son of Eleazar, was living, was to evidence that the spirit of God rests alike upon Jew and Gentile, man and woman, bondman and bondwoman. The name "Deborah" is made an object-lesson: Two women were prophetesses, yet at the same time conceited and overbearing; all the more ugly were their names: that of the one being "Deborah" (bee), that of the other, "Huldah" (weasel). Of Deborah it is said: "And she sent and called Barak" (Judges iv. 6) instead of going to him; while Huldah sent a message to King Josiah: "Tell the man that sent you to me," etc. (II Kings xxii. 15), omitting to address him as king (Meg. 14b; compare marginal glosses).

Deborah's dwelling under the palm-tree (Judges iv. 5) is explained in several ways. According to one view, she would not, being a woman, teach or judge in privacy, but in the open air, where all could assemble; according to another opinion the palm-tree symbolized the unity of hearts of all Israel, all being turned, like the leaves of the palm, to God their Father in heaven (Tanna debe Eliyahu ix.; compare Yalḳ. ii. 42). Deborah's prophecy consisted in her revealing the fact that God aids Israel by means of men who consecrate their lives to the worship of God and the study of His Law, praising Him in the bet ha-keneset and bet ha-midrash (Tanna debe Eliyahu ix. and x., derived from המתנדבים בעם ברכו, Judges v. 2, 9; compare Targum to I Macc. ii. 42, and "Apost. Const." lxiii.). "Barak, because he heeded her prophecy, was made participant of her song" (Judges v. 1).

Deborah's song, which is taken by Grätz ("Gesch." i. 115) to be a poem not composed by her—the form שקמתי (Judges v. 7) being the second person feminine; *i.e.* "Until thou didst arise, O Deborah," not "I arose" (A. V.)—is referred by the Haggadah to such Ḥasidean heroes as aided the Maccabean warriors in their battle against the Syrians (Tanna debe Eliyahu x.; 'Er. 54b, Targ. to Judges ii. 2–9, 11). The words "I arose a mother in Israel" show her conceit, and her punishment for such pride was that she lost her powers of prophecy (Pes. 66b).

S. S. K.

DEBORAH, THE SONG OF: Name of the triumphal ode found in Judges v. 2–31 and ascribed in the title (Judges v. 1) to Deborah; it celebrates the victory in the plain of Megiddo over Sisera and his army. The song belongs to the earlier poetry of the Hebrews, but shows such a remarkable power of expression and such a spontaneity that it takes a high place among the masterpieces of the world's poetic literature. The Masoretic text, while exhibiting corruptions and obscurities, may be said on the whole to be fairly faithful to the original. It has, however, been in the way of all attempts to reduce the poem to meter and divide it into regular strophes. The principal pauses occur after v. 11 and v. 22, and the prevailing rhythm has four beats to the line.

The poem opens, after the summons to praise Yhwh, in which the kings of the surrounding nations are asked to join, with the description of Yhwh's marching forth from Seir (verses 2–5). Then the song enlarges on the disorganized state of affairs before the war "until thou didst arise, O Deborah" (verse 7) (the ending of the verb שקמתי, which may be taken to be the first person, is rather the archaic form of the second person feminine); this apostrophe to Deborah (or declaration by Deborah) is followed by continued portrayal of the critical situation in Israel, which was completely unmanned because disloyal—though the phrase ("they chose new gods," v. 8) is of obscure meaning—to the ancestral God. The text of verses 9–11 shows some misplacements, and verse 9 may be a marginal note by some later hand, or a eulogy added, of the class so numerously found in the Old Testament. Verses 12–22 describe the march into battle, the victory, and the flight of the Canaanites; verse 12a is the appeal to Deborah to strike up the battle-song, followed by that to Barak to open the fight. Praise is bestowed on the tribes of Ephraim, Benjamin, Machir (Manasseh), Zebulun, Issachar (Deborah's tribe), and Naphtali (Barak's tribe), while censure is dealt out to Reuben (Gilead), Dan, and Asher for lack of patriotism. Verses 19–22 detail the battle, in which "from heaven fought the stars" (Yhwh's aid), and the rout of the enemy. The third division, verses 23–31, narrates the flight and death of Sisera (verses 23–27), and graphically describes a scene in his palace where his mother and her women await his return with anticipations of rich booty (verses 28–30). "Meroz"—an unknown place—is cursed for its unwillingness to help Yhwh, and by contrast Jael is blessed for her bravery (verses 23–27). The whole poem concludes (verse 31) with a fervent wish that Sisera's fate befall all of Yhwh's enemies, while His friends shall be invincible. The poem may have been included in the "book of the wars of Yhwh" (Num. xxi. 14; see Ber. 58a). Modern critics for the most part concede that the song was written very near the time at which the battle therein described took place.

E. G. H.

DEBORAH: A Jewish weekly in the German language, founded in 1855 by Isaac M. Wise and Max Lilienthal in Cincinnati, Ohio, for German immigrants who had not mastered English. It was planned as a German supplement to the American Israelite, and with the increase of the English-speaking Jewish population it lost ground continually. It was kept up until Wise's death (March 26, 1900), he being assisted at various times by S. H. Sonneschein, Henry Zirndorf, and G. Deutsch. The last weekly issue appeared April 6, 1900. In Jan., 1901, G. Deutsch, assisted by S. H. Sonneschein, resumed the publication of "Deborah" as a monthly; but this was discontinued in Dec., 1902.

G. D.

DEBTOR AND CREDITOR: The law-books treat under this head the incidents of payment: the kind of money that the creditor must accept; the place at which the debtor must pay; the means of sending or bringing the money; good and bad tenders; the creditor's duty to give a receipt; etc.

The Jewish codes treat some of these questions on Talmudic authority. They speak of debtor and creditor as "malweh we-loweh" (literally, "lender and borrower"), looking upon a liquidated debt, even when it arises from the sale of land or goods, as a loan.

The question, What is a good tender—so as to stop interest and costs—is of no consequence in Jewish law, as the latter awards neither interest nor costs. Though debts were not paid with checks or notes in Talmudic times, yet cases quite analogous are discussed.

A debt is payable wherever the creditor demands it, even if he meets the debtor in the wilderness (provided the payment leaves to the debtor the means for getting home); but should the debtor offer to the creditor in the wilderness money which he has borrowed in a settled country, the creditor may refuse to take it (B. Ḳ. x. 6, also applicable to liabilities arising from torts or bailment; Maimonides, "Yad," Malweh, xiii. 8; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 74, 1).

Time of Payment.

The custom arose in the days of the Geonim for the creditor, at or after the time of a contract made before witnesses, to request the debtor to pay only before witnesses; and, according to rules drawn by the Geonim from Shebu'ot vi., such a request must be complied with. That is to say, the debtor will in such a case be unable to set up payment except by the testimony of witnesses (Maimonides, *ib.* xv. 1, and see gloss for disputed points). So if the creditor stipulates that the witnesses must be scholars or physicians, or that he, the creditor, shall be trusted without oath against the plea of payment, the stipulation was enforced (*ib.* xv. 2, 3). Similar stipulations may be made by the debtor; with what effect see *ib.* xv. 5; compare generally Ḥoshen Mishpaṭ, 69.

The debtor is responsible for the sum due till he pays it over to the creditor or to his agent. Should the creditor say to him, "Throw me my money and be quit," and he does so, but the money is lost or stolen before it reaches the creditor, he is quit (Giṭ. 78b; see Maimonides, *ib.* xv. 1). What is said about throwing the money applies, of course, to any mode of transmission chosen by the creditor (Ḥoshen Mishpaṭ, 120, 1, 2).

In the absence of special terms, a loan or a sale on credit (unless there be a local custom to the contrary) is presumed to fall due in thirty days (Tosef., B. M. x. 1; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 73, 1). Where a time of payment has been set, either in an oral "loan" or by bond, whether the debtor be dead or alive, the creditor may make no demand before the day set (see Ḥoshen Mishpaṭ, 73, 2, 3, 4, for the settlement of disputes as to the time of maturity).

Acceptance.

At maturity the debtor may wish to pay at once, so as no longer to hold the money at his own risk—for example, if it be feared that the government will levy an arbitrary tax or change the money standard—and the creditor is bound to accept. If he refuses, the debtor may deposit the money with the court or with some trustworthy party; but not when the debt is not yet due and some untoward act, as above, seems imminent. If no such risk is apparent, however, the creditor must accept; for the setting of a time is intended only for the debtor's benefit.

After maturity the debtor may wish to pay in driblets. Here the better opinion is that the creditor may not refuse such payments. Still, if there is a pledge or mortgage for the debt, the debtor can not compel the creditor to release part of the property, even though it may be easily divisible (Ḥoshen Mishpaṭ, 74, 4, based on B. M. 77b).

When the coin in which a contract was made has been demonetized by the government, it must still be accepted so long as it remains current in some other country to which the creditor has access; if not current in such a country, the debtor must pay in the coin current at the time; and such is also the rule for the wife's jointure (*ib.* 74, 7).

Can-celation.

It has been shown under Alienation how a demand is transferred in a "meeting of three." Thus, the promise of a third person may be transferred in payment of a debt. As Maimonides says, if A owes a mina to B, and B says to A in a meeting of three, "Give to C the mina which you owe me," and C assumes it, but it turns out that A is insolvent, C may back out; for B has misled him. But if C knew of A's insolvency, or if A was well off at the time and became insolvent afterward, C may not repudiate his assumption. Again, suppose A has no demand on B, but owes a mina to C, and he refers the latter for payment to B, although he refers him thus in a "meeting of three," there is no transfer. B need not give the money to C; but if he does, he can recover it from A. Also, if C says, "I do not wish to collect from B," he may hold A liable, even after collecting part of the demand from B ("Yad," Malweh, xvi. 3, 4). The inference from the cases in which the old debt is not barred by reason of fraud or mistake is that where the debtor in a meeting of three furnishes to the creditor a new obligor with a full understanding of the facts all round, the old debt is extinguished.

The formal acquittance by which a bond is canceled is known as "shober" (literally, "breaker"), and is in form a "sheṭar"; that is, attested by two witnesses. Where the debt is by bond, the bond is delivered upon payment in full. Upon partial payment, the creditor may insist on receiving a new bond for the remnant, or he may give an acquittance for the part paid. For a debt otherwise than by bond, the debtor may have his shober, provided he pays the scrivener's fees. But if the creditor claims to have lost or mislaid the bond, the debtor is entitled to a shober at the creditor's cost, and may, moreover, compel him to take an oath that the bond is not in his possession (Ḥoshen Mishpaṭ, 54, and authorities there quoted).

L. G. L. N. D.

DEBTS OF DECEDENTS: Under the old law as it is recognized in many passages of the Talmud (*e.g.*, Ket. 81b) and implied in the Mishnah (Ket. ix. 2; B. Ḳ. x. 1), the goods and chattels of a decedent, or the moneys due to his estate, can not be seized by his creditors or by his widow, who is a bond creditor for her jointure ("ketubah"), though R. Meïr distinctly said, and the Mishnah in one place intimates, that all of a man's estate is bound by the latter instrument. The very name given to lands and slaves, "estate which has responsibility" ("aḥarayot"), as shown in the article on Alienation, indicates that land was deemed by the old sages the primary fund for securing creditors (see also Deed). It may hence be inferred that in Palestine, even after the destruction of the Temple, and in Babylonia, the Jews were, down to the completion of the Talmud, in the main land-owning farmers, not landless traders or artisans.

In later times, when the bulk of the Jews had become landless, this rule became impracticable, and the Geonim instituted another rule, subjecting the goods and demands of decedents, as well as their lands, to their debts (see Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 107, 1). Maimonides shows that even without this new institution the orphan heirs of A, who have as such obtained the land of his debtor, must give them up to A's creditors: for the lands would be considered as coming to them from their father (Ket. 92a); and morally orphans were always bound to pay their father's debts to the extent of both lands and chattels received ("Yad," Malweh, viii. 9, based on Ket. 91b). As to priorities of bond creditors on descended lands, see Deed. Regarding personal property, all creditors are on an equality, except in so far as one gains a priority by making the first seizure. The codes say little or nothing about the distribution of an estate that is not sufficient to satisfy all creditors.

Bond creditors take lands sold by the heirs out of the hands of the purchasers (unless the heirs will pay the debt), in like manner as they prevail against purchasers from the debtor himself.

The manner of appraising the lands of infant heirs, and of advertising and selling the same for the payment of debts, is described in the article on Appraisement (see also Ḥoshen Mishpaṭ, 109). A sort of judicial conveyance, known as "adrakta," is drawn up after the selling of the lands, which must contain the declaration that the lands sold belong to the deceased debtor, naming him (*ib.*).

A debt arising by word of mouth, or by written contract not sealed (see Deed), can be set up against the debtor's heirs in three cases only: (1) if the debtor had in his last sickness acknowledged the debt; (2) if the debt was not due at the debtor's death; (3) if the debtor had been excommunicated for failing to satisfy a judgment, and had died while under the ban; for in other cases the debt might have been paid in the debtor's lifetime without the knowledge of the heirs.

And, except in these three cases, even a debt by bond can not be enforced against the heirs during their infancy (boys under thirteen), though the bond contain a clause that the debtor trusts the honesty of the creditor; for these heirs, if of full age, might find proof to overcome the bond or to show its having been paid. Nor can the debt be enforced during the infancy of the heirs if the testimony of witnesses is needed to bring it within one of these three cases; for witnesses can not be adduced against an infant. Hence it was usual to make a judicial minute of the debtor's death-bed acknowledgment. So decides Caro (Ḥoshen Mishpaṭ); but Maimonides (Malweh, xii. 1, 2) holds that during the infancy of the heirs no proceedings can be taken in any cases but the following two: (1) where the demand belongs to a Gentile, and bears interest which it is for the benefit of the infants to stop; (2) the case of a widow's jointure, provided she has not married again. In these two cases the court should appoint a guardian for the infant heirs, who will guard their interests; and if there is no defense, the descended estate will be sold, and the debt paid off (see also B. B. 5b, 22a, 174a).

Whether the heirs be under or over age, the creditor can not proceed against them without taking the oath, unless there be a clause in his bond in which the debtor declares faith in his truthfulness. Should the creditor die, and his heirs set up a claim against that of the debtor, they must take a solemn oath framed for the circumstances (see Sheb. 45a), unless a clause in the bond avows faith in the creditor and in his heirs. Where the creditor does not know of assets descended, and calls upon the debtor's heirs for payment, and they, while admitting the debt, deny the receipt of assets, they may clear themselves by the rabbinical oath.

A fine, such as was often imposed by the rabbinical courts ("ḳenas"), falls to the ground with the wrong-doer's death, and can not be collected from his heirs (Ḥoshen Mishpaṭ, 108, 2).

The rule of enforcing all demands against the obligor's heirs is of late date. Rab and Samuel, the first of the Babylonian "pairs" (*c.* 230-250), still agreed in the proposition: "He who lends by word of mouth can not collect either from heirs or from purchasers" (B. B. 175a; but see Robbery as to liability of descended lands for things taken forcibly).

This feature of the older Talmudic law falls in with the common-law rule that the heir (*i.e.*, the successor to the decedent's lands) is bound only for the bonds or sealed instruments of his ancestor. Later on, in both systems of law natural equity prevailed over narrow distinctions.

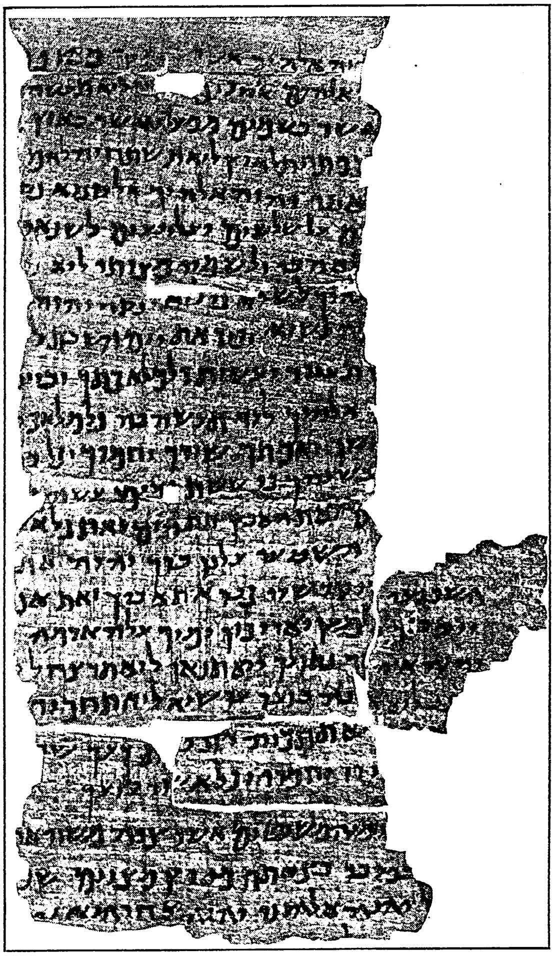
L. G. L. N. D.

DECALOGUE: A word, derived from the Greek, corresponding to the Biblical עשרת הדברים; LXX. *οἱ δέκα λόγοι* (Ex. xxxiv. 28; Deut. x. 4; compare Josephus, "Ant." iii. 5, § 3) and *τὰ δέκα ῥήματα* (Deut. xiv. 13); also *τὰ δέκα λόγια*, in the title of Philo's dissertation *Περὶ τῶν Δέκα Λογίων*; in later Hebrew ע״ הדברות (Shabbat 86b) or, without the numeral, הדברות (B. Ḳ. 54b). As a singular, *ἡ δέκαλογος* (scil. *βίβλος*) was first used by the Church Fathers (see Clement of Alexandria, "Pædagogus," iii. 12, § 8, and "Stromata," vi. 16, §§ 133, 137); the corresponding Latin "decalogus" is met with in Tertullian ("De Anima," xxxvii.).

——**Biblical Data:** The Decalogue is given in the Pentateuch in two versions (Ex. xx. 2-17 and Deut. v. 6-18) that exhibit some variants (see below). According to the Biblical records, it represents the solemn utterances of Yhwh on Mt. Sinai, directly revealed by Him to Moses and the people of Israel in the third month after their deliverance from Egypt, amid wonderful manifestations of divine power marked by thunder and lightning and thick smoke (Ex. xix.). As such, God wrote the Ten Words upon two tablets of stone—"tables of testimony" (לחות העדת, Ex. xxiv. 12, xxxi. 18, xxxii. 16) or "tables of the covenant" (לחות הברית, Deut. ix. 9, 11, 15)—and gave them to Moses. The people having gone astray, Moses, carried away by righteous indignation, broke the tables (Ex. xxxii. 19), and God subsequently commanded him to hew two other tables like the first (Ex. xxxiv. 1), whereon to rewrite the Ten Words (Ex. xxxiv. 1). According to another passage (Ex. xxxiv. 27, 28), Moses was bidden to rewrite, and did rewrite, the Commandments himself; but in Deut. iv. 13, v. 18, ix. 10, x. 24, God appears as the writer. This second set, brought down from Mt. Sinai by Moses (Ex. xxxiv. 29), was placed in the Ark (Ex. xxv. 16, 21; xl. 20), hence designated as the "Ark of the Testimony" (Ex. xxv. 22; Num. iv. 5; compare also I Kings viii. 9).

Contents.

The Decalogue opens with the solemn affirmation, put in the first person, that the speaker is Yhwh, Israel's ("thy") God, who hath led Israel ("thee") out of Egypt. Therefore there shall be for Israel ("thee") no other gods before Yhwh's ("my") face. Prohibition of idolatry follows as a logical amplification of this impressive announcement, and then a caution against taking Yhwh's name in vain. The duty of remembering the Sabbath and that of honoring father and mother are emphasized. Murder, adultery, theft, and false testimony are forbidden, and the Decalogue concludes with an expanded declaration against covetousness.



Earliest Manuscript of Decalogue (Second Century?), Containing Variations from the Masoretic Text. Probably the Oldest Example of Square Characters in a Hebrew Manuscript.

(From "Transactions of Society of Biblical Archeology.")

—**Critical View:** The Decalogue in Deuteronomy does not differ materially from that in Exodus in regard to the affirmations and obligations contained therein. Verbal discrepancies, however, are comparatively numerous, while the reason adduced for the Sabbath is altogether different. In detail these variants may be grouped as follows:

(a) *Differences in the consonantal (Masoretic) text, in identical words*: For example, "miẓwotai" (מצותי, Ex. xx. 6), which occurs as "miẓwotaw" (מצותו, Deut. v. 10, in the "Ketib"; this variant is due to an anticipation of the transition from the first to the third person which ensues after this verse). Similarly, there are changes in the use and position of the auxiliary vowel letters: *e.g.*, אבת (Ex. xx 5) and אבות (Deut. v. 9); יארכון (Ex. xx. 12) and יאריכון (Deut. v. 16).

(b) *Syntactical differences*: *E.g.*, the syndetic arrangement "children, grandchildren, *and* great-grandchildren" (Ex. xx. 5, Hebr.), over against the polysyndetic "children *and* grandchildren *and* great-grandchildren" (Deut. v. 9, Hebr.); and the asyndetic succession "Thou shalt not kill. Thou shalt not commit adultery. Thou shalt not steal" (Ex. xx. 13-17), over against the polysyndetic "Thou shalt not kill, *and* thou shalt not, . . . *and*," etc. (Deut. v. 17, Hebr.).

(c) *Stylistic variations*: "Covet," occurring twice in Exodus (xx. 17), is replaced in one instance by "desire" in Deuteronomy (v. 18). "Graven image and any likeness" in Ex. xx. 11 (Hebr.) appears as "[the] graven image of any likeness" in Deut. v. 8 (Hebr.). "Remember (זכור) the Sabbath" in Ex. xx. 9 corresponds to "Keep" (שמור) in Deut. v. 12. עד שקר ("false witness") in Ex. xx. 16 corresponds to עד שוא ("a witness of iniquity" or "falsehood") in Deut. v. 17 (A.V. 20), the prohibition being furthermore prefixed by "and." The sequence "house and wife" in Ex. xx. 17 is reversed to read "wife and house" in Deut. v. 18 (A.V. 21).

(d) *Additions and amplifications*: Deuteronomy adds in two places (v. 12, 16) the formula "as Yhwh, thy God, hath commanded thee." Another addition is found in Deuteronomy in the text of the command to honor father and mother (v. 16): "and that it may go well with thee." Ex. xx. 10 summarizes "thy cattle," which in Deut. v. 14 (Hebr.) is expanded to "thine ox and thine ass and all thy cattle," to which is added "that thy man-servant and thy maid-servant may rest as well as thou." Deut. v. 18 (Hebr.) has "his field," which in the corresponding passage of Exodus is wanting.

But of greatest interest is the variation in the reason given for the Sabbath. Ex. xx. 10, 11 connects it with creation (compare Gen. ii. 2); Deuteronomy assigns to it a social purpose and connects it with Israel's liberation from Egyptian bondage. Thus the Sabbath may be said to rest in Exodus on a universal-theological, in Deuteronomy on a national-historical-economic, basis.

A careful analysis of these variants leads to the conclusion that Exodus, on the whole, presents an earlier text than Deuteronomy. The clearly marked effort at stylistic refinement (the substitution of "lo tit'awweh" for "lo taḥmod"; the mention of the "wife" before the "house"; even the polysyndetic phrasing, showing a straining after effect) points in this direction. The insertion of the formula "as Yhwh hath commanded" indicates that the appeal rests on a well-known and long-established law. The enumeration of the various kinds of cattle also betrays the hand of a later writer, and so does the explanatory and qualifying gloss "that it may go well with thee."

On the other hand, the variants in the command against idolatry point to the priority of the Deuteronomic reading. Exodus is more explicit and strenuous, as if afraid that the laxer wording ("graven image of any likeness") of Deut. v. 8 might not be sufficiently comprehensive to bar every species of

Relation of the Two Versions.

idolatry. The Sabbath law in Deuteronomy, at least in part, appears to confirm this; while the expression "keep" is stronger than that in Exodus, "remember," and would thus indicate a later solicitude for a better observance. Also, its anxiety for the welfare of the servant exhibits a humane spirit not ordinarily to be looked for in documents of antiquity. The introduction of the theological motive in Exodus, where Deuteronomy has the historical-economic, is an element that favors the assumption of the higher antiquity of the Deuteronomic Decalogue.

These variants, however, have been explained as due to scribal carelessness, such as is easily established by a comparison of the texts of other parallel passages; the writers, contrary to the later rabbinic practise and injunction, failing to consult the written text while quoting from memory, and thus mixing with their lines reminiscences of similar but not identical verses (compare Bardowicz, "Studien zur Geschichte der Orthographie des Alt-Hebr." Frankfort-on-the-Main, 1894; Blau, "Studien zum Alt-Hebr. Bücherwesen," Budapest, 1902). But upon examination this plausible theory will be seen to create new difficulties in the matter in point. The Decalogue must be considered, on the basis of the Mosaic authorship of the Pentateuch, to have been fundamental; and as such its wording must have been so accurately fixed as to preclude the possibility of latitude for scribal caprice. The Rabbis, indeed, have felt this difficulty. They have solved it by assuming that both versions are of identical divine origin, and were spoken in a miraculously strange manner at one and the same time ("Bedibbur Eḥad"; see Mek., ed. Weiss, p. 77, Vienna, 1865; Shebu. 20b; R. H. 27b; Yer. Ned. iii. 1; Yer. Shebu. iii. 5; Cant. Rabbah xxviii.; Sifre, Ki Tabo).

Ibn Ezra (to Ex. xx. 1) recognizes the insufficiency of this explanation, but is equally dissatisfied with the solution proposed by Saadia. The latter, conforming to his rigorous theory of inspiration, would not admit that the Masoretic text was other than of divine origin. It is therefore his theory that literally the Deuteronomic Decalogue equally with that of Exodus was divinely inspired. While Exodus presents the reading of the first set of tables, Deuteronomy contains that engraved by divine direction on the second (see "Jour. Asiatique," Dec., 1861, in Neubauer, "Notice sur la Lexicographie," etc.; Geiger's "Jüd. Zeit." i. 292). With profuse professions of regard for Orthodox teachings, Ibn Ezra ventures to hold that these variants are in the nature of linguistic differences often noticeable in the Biblical books.

——**Modern Views:** Modern conservative scholars, with few exceptions (G. Livingston Robinson, "The Decalogue and Criticism," 1899), in so far as they do not maintain that the version of Exodus is the original Mosaic, or at least the older, while that of Deuteronomy (also Mosaic) departs from the original text in conformity with the parenetic method and purpose of Deuteronomy, have concluded that both versions are amplifications—those in Deuteronomy on the whole being later than those in Exodus—of an anterior and old (Mosaic) but briefer list of ten statements written in the manner of the prohibitions against murder, adultery, theft, etc. (Strack, "Exodus," p. 241; Franz Delitzsch, in "Zeitschrift für Kirchliche Wissenschaft und Leben," 1882, p. 292; Holzinger, "Exodus," in "Kurzer Hand-Commentar zum A. T." pp. 79 *et seq.*, Tübingen, 1900; Eduard König, "Einleitung," p. 187, and Index, *s.v.*; Wildeboer, "Die Literatur des A. T." p. 17).

Graphically considered, the writing of the letters (about 620) contained in the Decalogue on two tables of stone of moderately large dimensions does not present, as was long thought, an impossibility. The Mesha stone proves the contrary. The Decalogue written in the style of the latter would fill about twenty of its lines (Holzinger, *l.c.* p. 69). The unevenness in the length of the first and the second parts is a much stronger indication that the original version was without the amplifications noticeable in the commandments of the first and tenth groups.

Original Form.

The tradition, according to which earlier tables were replaced by others, shows that for a long time the knowledge was current of changes in the text, and not, as Holzinger contends (*l.c.* p. 77), that a Mosaic law had never existed.

The original Ten Words probably opened with (1) "I am Yhwh, thy God," etc. Then followed:

(2) Thou shalt have no other gods before Me [beside Me].
(3) Thou shalt not take the name of Yhwh thy God in vain.
(4) Remember the Sabbath-day.
(5) Honor thy father and thy mother.
(6) Thou shalt not murder.
(7) Thou shalt not commit adultery.
(8) Thou shalt not steal.
(9) Thou shalt not bear false witness.
(10) Thou shalt not covet (Wildeboer, *l.c.* p. 19).

Eduard König and others (see Lotz in Herzog-Hauck, "Real-Encyc." 3d ed., p. 563) place as the second of these original Ten Words the prohibition against the making and the worshiping of graven images. It is probable that the early Hebrews shared with the Arabs the repugnance to molten plastic idols (פסל; see Wellhausen, "Reste Arabischen Heidentums," p. 102); but "maẓẓebot" (pillars or stones) were legitimate accessories of the Yhwh cult down to a much later period than that of such a Mosaic decalogue. Moreover, idolatry was tolerated in North Israel and even in Judea down to the later centuries. Upon these considerations, Kuenen, Wellhausen, Stade, Schultz, and Smend have argued against the ascription of any decalogue to Mosaic times; but with the omission from the original ten of the injunction against idolatry, the mainstay is taken from under the opposition to the authenticity of the tradition connecting Moses with such a lapidary code.

These simple brief statements were amplified in course of time; the fourth, for instance, reflecting in both versions agricultural conditions such as did not obtain in the Mosaic days. So also does the promised reward of the fifth. The reason given in Deuteronomy for keeping the Sabbath also appeals to circumstances of agricultural civilization; that adduced in Exodus is of a theological nature, and can not be much older than the priestly code (P), nor can it antedate the reception into the Pentateuch of Gen. i.

and ii. 1-4. Critics have assigned the Exodus version, with this exception, to the ninth century B.C.; the Deuteronomic text, to the seventh century.

Decalogue of Exodus xxxiv.

From the point of view of Pentateuchal analysis Wellhausen ("Die Composition des Hexateuchs und der Historischen Bücher des Alten Testaments," 1885, pp. 84, 85, and *passim*) maintains that the Jahvist (J) contains an altogether different decalogue; viz., that of Ex. xxxiv. 14-26. Goethe, in his "Zwo Fragen, 1773," was the first to suggest this. This decalogue is concerned merely with ritual affairs. Holzinger (Commentary on Exodus, p. 119) proposes the following brief sentences as its contents:

(1) Thou shalt not worship any strange god.
(2) Thou shalt not make thee any molten images.
(3) Thou shalt observe the Feast of Maẓẓot [Pesaḥ].
(4) The first-born are Mine [YHWH's].
(5) Thou shalt observe the Feast of Weeks.
(6) Thou shalt observe the Feast of the Ingathering.
(7) Thou shalt not mix with leaven the blood of My offerings.
(8) The fat of My feast shall not remain with thee until the next morning.
(9) The choicest of the first-fruits of the land shalt thou bring to the house of YHWH, thy God.
(10) Thou shalt not seethe the kid in the milk of its mother.

In order to extract these "ten words" from the passage, many other laws therein contained of seemingly equal importance have to be omitted, as also the reasons assigned for their observance. This attempt to reconstrue another decalogue may be said to be a failure, all the more as it is conceded that the decalogue in P (Ex. xx.) is virtually anterior to that (Ex. xxxiv.) in J (Holzinger, *l.c.* p. 120). Still less satisfactory, because altogether unreasonable, is the venture to recover the Decalogue from fragments in Ex. xx. 27, 28, and xxiii. 10-16 (Meissner, "Der Dekalog," Halle, 1893; Staerk, "Das Deuteronomium," pp. 29 *et seq.*, 40, Leipsic, 1894).

Division of the Decalogue.

Written on two stone tables (Deut. iv. 13, v. 19, x. 34), with script on both sides (Ex. xxxii. 15), the Decalogue would most naturally have been divided into two groups, of five "words" each, each group appearing on one stone. In this way, according to Josephus ("Ant." iii. 5, § 4) and Philo ("De Decalogo," § 12, *δύο πεντάδας*), the Decalogue was originally delivered, the first pentad containing the commandments of "pietas" (relating to God or His visible representatives on earth, the parents); the other, those of "probitas" (relating to conduct toward one's fellow men).

The Midrash mentions a similar division: ה' על לוח זה וה' על לוח זה (Ex. R. xli.), though, according to R. Nehemiah, each table contained the complete text of the Ten Words (compare Yer. Sheḳ. vi. [quoted in "'En Ya'aḳob"]). The first table would thus have contained 146 of the 172 words of the Exodus Decalogue, but the other only 26. In view of this inequality in the distribution it has been suggested that the one table contained only the first three commandments; the other, the last seven. But if the amplifications were omitted, the grouping in sets of five would result in assigning to the one table 28 words and to the other 27 (Strack, "Exodus," p. 242).

Sequence and Numbering.

The order of the prohibitions against murder, adultery, and theft, as now given in the Masoretic text, in Josephus, and in the Syriac Hexapla, is not followed by the Septuagint, the Codex Alexandrinus, and Ambrosianus (which have "murder, theft, adultery"), nor by Philo (who has "adultery, murder, theft"), nor by the Codex Vaticanus (which reads "adultery, theft, murder").

Differences obtain also in regard to the numbering of the various commandments. The traditional Jewish system makes Ex. xx. 2 the first "word," and verses 3-6 are regarded as one; viz., the second (Mak. 24a; Mek., ed. Friedmann, p. 70b, Vienna, 1870; Pesiḳ. R., ed. Friedmann, p. 106b, *ib.* 1880). This arrangement is found also in the Codex Vaticanus of the LXX. and in the Deuteronomy of Ambrosianus. Still R. Ishma'el counts verse 3 as the first "word" (Sifre to Num. xv. 31; ed. Friedmann, p. 33a, Vienna, 1864). Philo and Josephus count verse 3 as commandment i.; verses 4-6 as ii.; verse 7 as iii.; verses 8-11 as iv.; verse 12 as v.; verse 13 as vi.; verse 14 as vii.; verse 15 as viii.; verse 16 as ix.; and verse 17 as x.

The numbering adopted by the Roman Catholic and Lutheran churches combines verses 3-6 into a single commandment which is numbered i., in consequence of which, up to the last, every commandment is advanced by one, the Jewish No. III. becoming II., and so on. In order to maintain the number ten, the Jewish No. X. is divided into IX. ("Thou shalt not covet thy neighbor's wife") and X. ("Thou shalt not covet thy neighbor's house," etc.). This method of numbering is ascribed to Augustine ("quæst. 71 ad Exodum"), but the Codex Alexandrinus, as E. Nestle was the first to notice ("Theol. Studien aus Württemberg," 1886, pp. 319 *et seq.*), also exhibits it. Modern critics are inclined to accept this latter system of enumeration, partly because the Jewish No. I. is not a "commandment," in which they overlook the Hebrew designation דבר ("word"), and partly because, as the Jewish enumeration has it, verses 3 and 4-6 certainly constitute one command.

Accentuation of the Commandments.

The "'aseret ha-dibrot" are accentuated in the Hebrew in two ways: one for private reading, when the verses are marked to begin at 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 17 (13-16 as one verse); the other for solemn public recital, when the first two commandments and the introduction are read without interruption, because God is introduced as the speaker, and every other commandment as a separate verse (Pinsker, "Einleitung in das Babylonisch-Hebräische Punktationssystem," pp. 48-50). It may be possible, though it has been doubted, that this double accentuation preserves the traces of an old uncertainty concerning the numeration of the various "principles" or "words." These accents are respectively known as the "ṭa'am ha-'elyon" (superlinear) and the "ṭa'am ha-taḥton" (sublinear). The Oriental Jews know only the division into ten words; *i.e.*, that observed in private reading (W. Wickes, "Accentuation of the Twenty-one So-called Prose Books of the O. T." p. 130). The superlinear accentuation is generally used for the cantillation of the Decalogue on the Feast of Weeks as the memorial day of the revelation—*i.e.*, the giving of the Torah (זמן מתן תורה)—while on the ordinary Sabbaths, when the Decalogue is read as a part of the pericope (Yitro and Wa’etḥannan), the sublinear is followed (Japhet, "Die Accente der Heiligen Schrift," 1896, p. 160; Geiger, "Wiss. Zeit. Jüd. Theol." iii. 147 *et seq.*; also "Urschrift," p. 373, note).

E. G. H. E. K.—E. G. H.

DECALOGUE, THE, IN JEWISH THEOLOGY: The Ten Words are designated by Philo as κεφαλαῖα νόμων = "the heads of the law," the title of the chapter "De Decem Oraculis." The second table Philo, contrary to the usual order, begins with the commandment against adultery, describing adultery as the greatest of all violations of the Law, since it corrupts three houses—that of the adulterer, that of the wronged husband, and that of the adulterer's wife. The fourth commandment refers to all festivals, and, according to Philo, embraces all the laws conducive to the spread of kindness and gentleness and fellowship and the feeling of equality among men (with reference to Sabbatical year and the jubilee). Under the fifth commandment he ranges all laws in regard to family life, the honor due to old people, the duties of the old to the young, the ruler to his subjects, the benefactor to the needy, the master to his servants, etc.

Philo's exposition of the preeminence and original character of the Decalogue, both in its general tenor and in many of its particular details, reflects the teachings of the Mishnaic period, as indeed it also anticipates some of the positions of later Rabbis. The fact that the recital of the Ten Words constituted a salient feature of the daily liturgy in the morning service (Tamid v. 1; Ber. 3c) indicates that they were regarded as the essential parts of divine revelation. This practise was discontinued as a protest against the unwarranted inference drawn therefrom by sectaries that the Decalogue alone had been revealed by God on Sinai (Ber. 11a). The Shema‘ ("Hear, O Israel," Deut. vi. 4) and the selections from Deut. vi. 4-9, xi. 13-22; Num. xv. 37 *et seq.*, which follow the Shema‘ in the order of the liturgy, and form as it were a part thereof, were believed to contain in essence the Decalogue.

The new Pesiḳta (Bet Ham. vi. 41; comp. Bacher, "Die Agada der Palästin. Amoräer," ii. 183) holds the reading of the Shema‘ every morning as tantamount to the keeping of the Ten Commandments, because they, too, had been proclaimed "in the morning" (Ex. xix. 16). Again, Sifre to Deut. i. 3 controverts the assumption that the Decalogue alone had been revealed through Moses. Like the Shema‘, Num. xix., looked upon by R. Ḥiyya as fundamental, is construed by R. Levi as a cryptogram of the Decalogue (see Didache).

According to Hananiah, the son of Joshua's brother, the Decalogue contains all the laws of the Torah (Yer. Sheḳ. 46d, bottom; Soṭah 22d; Cant. Rabbah to v. 14), his words, "parashiyyoteha wediḳduḳeha shel Torah," recalling Philo's view that the Decalogue contains the capital, the rest of the Pentateuch the special, laws. Berechiah is credited with a similar opinion (Bacher, *l.c.* iii. 356). The Decalogue is compared with a rare jewel of ten pearls (Exod. R. xliv.; Tan. [Ki] Tissa, end). The Patriarchs had been loyal to the principles of the Decalogue long before they had been revealed to Moses. (Attention is called to Yalḳ. Shim‘oni, i. 276, end.) The universality of the Decalogue is accentuated by the fact of its being offered in turn to all the nations (Deut. xxxiii. 2, 3; Hab. iii. 3; Ta‘an. 25a; ‘Ab. Zarah 2a) in the desert territory ("hefḳer") which belonged to none exclusively (Mek., Yitro, 1), and of its proclamation in all the (seventy) languages of the world (Shab. 88b).

The Seventh Commandment.

The first and second commandments are rated as preeminent (Sifre to Num. xv. 31), both on account of their doctrine and also because they alone, as is indicated by the use of the first person singular, were spoken to the people by God Himself (Macc. 24a; Sanh. 99a; Hor. 8a; compare Geiger, "Jüd. Zeit." iv. 113 *et seq.*). On the other hand, the tenth commandment is also held fundamentally to include the others; at least its violation amounted to transgressing the seven "nots" (לאוין) of the Decalogue (Pesiḳ. R. 22). As the tenth forbids the coveting of a neighbor's wife, the foregoing statement of its scope agrees with the similar valuation placed upon the seventh (against adultery: Tan., Naso). Adultery is a violation of the first commandment, according to Jer. v. 7, 8, 12; of the second, according to Num. v. 14 (וקנא = Ex. xx. 5); of the third, because adultery is denied, as is generally the case, with an oath; of the fifth, inasmuch as the child of such a union can not honor its parents; of the sixth, because adulterers are always prepared to kill if caught in the act; of the seventh, which directly forbids adultery; of the eighth, as the adulterer is virtually a thief (see Prov. ix. 17); of the ninth, because the adulteress gives false testimony against her husband; of the tenth, in that the adulterer makes his son another man's heir. In regard to the fourth (concerning the Sabbath), the eventuality is assumed that the issue of an adulterous intimacy between a non-priest and a woman of the priestly caste might become a priest. The arrangement of the two tables whereby one is opposite six indicates that murder includes the denial of God (Mek. to Ex. xx. 17). The last six commandments are also regarded as the basis of all morality (Tosef., Shebu. iii. 6).

As a statue is seen by a thousand, and its eye covers them all, so, R. Levi says, every single person heard the words as though personally addressed (Pesiḳ. 110a; Tan., ed. Buber, to Yitro 17; compare Pesiḳ. xxi., where Jochanan is credited with this simile, while Levi points to one sound heard by many). The fact that the versions of Ex. and Deut. present textual discrepancies was explained by the theory that both were divinely given בדיבור אחד, in one act of divine speech (Sheb. 20b; R. H. 27a; Mek. xx. 8; Sifre, Deut. xxii. 11), which "would be impossible for men," and "which the human ear could not hear"; but, according to Ps. lxii. 12, the one speech of God was apprehended as two by men. In fact, the Ten Words were all proclaimed at once ("bedibbur eḥad," Mek. xx. 1). The first set of tables did not contain, in the fifth, the words "that it may be well with thee," because they were predestined to be broken (B. Ḳ. 55a). Interesting is the report that R. Ḥiyya was ignorant of this difference between Deut. and Ex. (B. Ḳ. 54b).

The Decalogue often appears as a subject of controversy with non-Jews, a circumstance which goes far to demonstrate the fundamental value attached to it (see Pesiḳ. R. xxiii.). One such controversy is with Hadrian (Pesiḳ. R. xxi.). The subjects discussed are such as why is circumcision not in the Decalogue? (Pesiḳ. R. xxiii.; Tan. to Lek Leka, Agad. Bereshit xvii.); or why does not the Torah begin with the Decalogue? (Mek. to xx. 2). The "Ten Words" are even a "pleader" for Israel (Pesiḳ. R. xi.; Midr. Teh. to Ps. xvii. 4).

How the Ten Words were distributed between the tables is also a subject of rabbinical inquiry. The prevailing opinion is that there were five on each; but it has also been maintained that each had the whole ten (see Decalogue; Yer. Sheḳ. 49d; Yer. Soṭah 22d; Cant. Rabbah v. 14; Mek. xx. 27): even twice—once on each side (Yer. Sheḳ. vi. 1). Simai argues that the Ten Words were inscribed on each table four times (*τετράγωνον*; *ib.*).

Tables of the Law.

The dimensions of the tables furnish a fruitful subject for exegetical ingenuity. The objection that they were too heavy for one man to carry (raised even by modern Bible critics) is met by ascribing to the letters engraved thereon miraculous powers. They virtually carried the tables; only when they began to fly away did Moses feel the weight of the stones (Yer. Ta'an. iv.; Tan., Ki Teẓe *et al.*). The first set given with pomp attracted the "evil eye," and hence were broken (Tan., Ki Teẓe). According to some, Moses was ordered by God to break the tables, and received God's thanks for the act (Ab. R. N. ii.: see note of Schechter on the passage; Yalḳ. 363, 640). According to another version, when Moses noticed that the script began to fly off, he became alarmed and threw the tables down, whereupon he was struck dumb (Yalḳ., Ki Teẓe). By the use of "anoki" ("I am," an Egyptian word: Pesiḳ. R. xxi.), which God had employed in His conversations with Abraham, Isaac, and Jacob (Gen. xv. 1, xxvi. 24, xxxi. 13), He convinced the people that it was the God of their fathers who spoke to them (Tan., ed. Buber, to Yitro 16).

In post-Talmudic literature and liturgy the Decalogue is also expounded and expanded as the fountainhead whence all other laws flow. Shebu'ot being the day of the revelation (Shab. 86a), this idea was prominently utilized in the piyyuṭim and Azharot for the holiday. Saadia adopts the numeration of the letters of the Decalogue given in Num. Rabbah xviii. as 613, a number likewise fixed by Naḥshon Gaon ('Aruk, under תפל). Eliezer ben Nathan has the same number in the "Ma'arib" for Pentecost, Eleazar b. Judah the same in the "Sefer ha-Ḥayyim." In reality, the Decalogue contains 620 letters, the mnemotechnic word for which is כתר ("crown": "the Crown of the Law"), which number, according to its expounders, corresponds to the 613 Commandments, one for each letter, the seven others, auxiliary vowel-consonants, indicating the seven Noachian commandments (see beginning of "Bet" in the "Sha'ar ha-Otiyyot").

The Decalogue Fundamental.

Many "poetic" elaborations of the Decalogue are in existence, but the plan was also carried out by writers on legal matters (Zunz, "Literaturgesch." p. 95; Steinschneider, "Hebr. Bibl." vi. 125). The philosophical writers of the tenth to thirteenth centuries occasionally emphasized the fundamental nature of the Decalogue. Judah ha-Levi, in his "Cuzari" (ii. 28), remarks: "The root of knowledge was placed in the Ark, which is like the innermost chamber of the heart, and this [root] was the Ten Words and their derivatives: that is, the Torah." Baḥya ben Joseph, in his "Ḥobot ha-Lebabot," gate i., urges the importance of the Decalogue, and connecting therewith the Shema', construes the latter as laying down ten main principles corresponding to the Ten Words. Albo, in his "'Iḳḳarim" (iii. 26), develops in extenso the idea of the Decalogue's fundamentality, calling attention to the difference between the "words" on the first table as theological, and those on the second as ethical, both together covering the whole field of religion. Of Bible commentators following on the same line may be mentioned Rashi to Ex. xxiv. 12: "The first word of the Decalogue is the fountainhead of all."

Naḥmanides makes the first one of the mandatory commands ("miẓwot 'aseh"). The whole people heard all ten, but understood only commandments one and two as perfectly and thoroughly as Moses. From three on, however, they did not comprehend, and therefore Moses was forced to explain them. Maimonides, desirous of removing all anthropomorphic conceptions, reiterates Philo's idea, that it was not God's voice that was heard, but an impersonal voice created especially for the enunciation of the Decalogue ("Moreh," i. 65; compare Saadia, "Emunot we-De'ot," ii. 8; "Cuzari," i. 89). The writing on the tables was also a "creation" ("Moreh," i. 66). The Karaites entertain the same view (see Japhet Abu-

Ali on Ex. xx.; Munk, "Guide," i. 290, note 2; Aaron ben Elia, "Eẓ Ḥayyim," ch. 55, 98). On the effect of the second Commandment see ART.

The third commandment, interpreted to prohibit swearing, led, in unconscious appreciation of its original meaning—a caution against pronouncing divine names or imparting them to persons other than the properly initiated—to a reverent avoidance of the mention of the Shem ha-Meforash (Soṭah 38a; Sifre to Num. vi. 27, and elsewhere), and to extreme caution even in writing not to expose "the Name" to disrespect or thoughtless disregard.

Many of the modern catechisms have summarized both the doctrines and the duties of Judaism to correspond with the ten ideas of the Decalogue:

(1) The unity and personality of God.
(2) His incorporeality.
(3) Against profanation of the Name.
(4) Sabbath and festivals; cruelty to animals; slavery.
(5) Family relations.
(6) Rights and duties of life.
(7) Marriage and chastity.
(8) Rights and duties of property; interest and usury; begging.
(9) Duties to the state.
(10) Covetousness; other personal virtues and vices. For modern expansions of the Decalogue see Gerson Lasch ("Die Göttlichen Gesetze," 1857). In Dr. Samuel Hirsch's "Catechismus" the third commandment is made the basis of the discussion of prayer, inasmuch as prayers expressive of wishes and hopes no longer entertained violate the commandment. Isaac M. Wise, among modern Reform rabbis, declared the Decalogue to be "the Torah," which alone was divinely revealed. According to him, Reform Judaism has in the Decalogue its legal basis, and finds in it its limitations (see "Hebrew Review," i., Cincinnati, 1880; Isaac M. Wise, "The Law").

DECAPITATION. See CAPITAL PUNISHMENT.

DECAPOLIS, THE ("Ten City"): Name of a district of Palestine that included a number of autonomous cities. According to Pliny ("Historia Naturalis," v. 18, 74) these ten cities were Damascus, Philadelphia, Raphana, Scythopolis, Gadara, Hippos, Dion, Pella, Gerasa, and Canatha. With the exception of Scythopolis (= Beth-Shean) all these cities are east of the Jordan. It is curious that Damascus, which lies much further north, is also included in the Decapolis. Josephus mentions Scythopolis ("B. J." iii. 9, § 7), Philadelphia (*ib.* ii. 18, § 1), Gadara, and Hippos ("Vita," §§ 65, 74) as in the Decapolis. The "Onomasticon" of Eusebius and Jerome (ed. Lagarde, 251, 89, and 116, 29) describes the Decapolis as situated in Peræa, round about Hippos, Pella, and Gadara, these cities being expressly mentioned, perhaps, because they were more prominent than the others in the history of Christianity; Pella, for example, is known as the home of the first Christian community, and it is also included in the Decapolis by Epiphanius ("Hæreses," i. 30, § 2). It is curious that Stephanus Byzantius includes Gerasa (*Γέρασα*) in a district he calls *Τεσσαρεσκαιδεκάπολις* ("Township of Fourteen"), but this is probably a clerical error for "Ten City." Ptolemy (v. 15, §§ 22, 23) places the Decapolis in Cœle-Syria, and enumerates most of the cities mentioned by Pliny, as well as some in the neighborhood of Damascus, eighteen cities in all, and among them Capitolias, founded by Nerva in the year 97 or 98. The city of Abila is mentioned on an inscription ("C. I. G." No. 4501) as being included in the Decapolis.

The population of the Decapolis was chiefly pagan. Scythopolis was attacked by the Maccabeans (II Macc. xii. 29), but most of the cities of the Decapolis were not subjugated until the reign of Hyrcanus. Pompey again separated them from the Jewish territory in 63 B.C., and placed them as autonomous cities directly under the government of the legate of Syria. Gadara and Hippos were given to Herod (Josephus, "Ant." xv. 7, § 3; compare 10, § 2); but after his death they were again declared to be free by Augustus, so that Galilee and Perea, the two districts of Herod Antipas' tetrarchy, were separated by the Decapolis. The cities of the Decapolis used the Pompeian era in reckoning dates; were organized entirely along Hellenic lines; had Greek worship and Greek games, and were always hostile to Jews. Pliny (*l.c.* xv. 4) speaks highly of the small olives of the Decapolis. Jesus had several persons from the Decapolis among his followers (Matt. iv. 25; Mark v. 20), showing that many Jews were living there. When the Jewish war broke out, the pagans fell upon the Jews, an uprising for which JUSTUS OF TIBERIAS took bloody revenge. The Talmud speaks often of the pagan population of these cities, the philosopher Oenomaos of Gadara, for instance, being cited; hence several cities mentioned in the Talmud under other names may have been identical with the cities of the Decapolis, as Susitha with Hippos, Pehla with Pella.

The Decapolis must have existed as a special district in the second century, since the geographer Ptolemy speaks of it as such; when, however, the province of Arabia was organized (106), several of those cities came gradually to be included in that province—for example, Gerasa and Philadelphia (Ammian. Marcell. xiv. 8, § 8), in 295, according to Marquardt ("Staatsverwaltung," i. 277, Leipsic, 1873); the other cities with their territories were probably included a century earlier.

G. S. KR.

DECKERT, FRANCIS: Clerical anti-Semitic agitator; born at Vienna 1846; died there March 21, 1901. From its beginning in the eighth decade of the nineteenth century Deckert was identified, as a political agitator and writer, with the anti-Semitic movement; but he did not become prominent until the liberal press exposed some of his questionable business transactions. In retaliation he published a pamphlet on SIMON OF TRENT, in an effort to confirm the truth of the blood accusation ("Ein Ritualmord Actenmässig Nachgewiesen," Vienna, 1893). Actuated by the same motive, he induced the convert Paulus Meyer to write an account of a ritual murder which he pretended to have seen in 1875 in Ostrow, Russia. The story was published in the Vienna "Vaterland," and the parties named as perpetrators in the crime brought a libel suit against Meyer and Deckert, the latter being sentenced (Sept. 15, 1893) to a fine of 400 florins ($160).

Deckert continued to preach anti-Jewish sermons, which he published in his magazine, "Der Sendbote des Heiligen Joseph." To one of these sermons he appended a "prayer for the distress caused by the Jews" (1894), a travesty of the "Lord's prayer" in the most infamous language. The government confiscated it. His violent diatribes were several times the object of an interpellation in the Reichsrath, and evoked from the premier, Prince Windischgrätz, the reply (May 27, 1895) that he regretted such expressions were heard from a Christian pulpit. Nevertheless, the lawsuit brought against Deckert for inciting riots was dismissed (Jan. 14, 1896). He continued his tirades with a collection of sermons under the title "Juden 'raus!" (Out with the Jews), published in the same year. He became popular with the anti-Semitic city government, and in 1899 was given the Salvator gold medal, the highest distinction in the gift of the city. He, however, bequeathed in his will a sum for charity to be distributed without regard to religious distinctions.

D.

DECKINGEN, JUDAH BEN BENJAMIN (also known as **Leva Rokhausen**): German lexicographer of the sixteenth century. He was the pupil of Isaac of Ahrweiler, and lived as tutor at Wendersheim (1555), Rüsselheim, and other places of southern Germany. In 1556 he compiled a Hebrew-German glossary of five quarto pages, prepared as an aid in the translation of German into Hebrew. This work has been published from a manuscript by N. Brüll.

Bibliography: Brüll, *Jahrb.* iii. 89 *et seq.*

G. M. K.

DECSEY, SIGMUND: Departmental president of the Supreme Court of Budapest; born in 1839 at Aszod. He studied law at Budapest; founding with Desider Szilágyi (afterward minister of justice and president of the Parliament) "a lawyer's relief society." On completing his studies Decsey entered the service of the state as notary of the Court of Cassation (1870); was promoted five years later to the office of judge of the Royal bench ("Tafel"), to that of judge of the Royal Court ("Curie") in 1886, and "Senats president" in 1895. Exchange, commercial, and banking affairs belong to his department.

S. L. V.

DEDANIM (Hebr. דדנים; R. V. **Dedanites**): The descendants of the Arabian Dedan, spoken of (Isa. xxi. 13) as engaged in commerce. Dedan is first mentioned (Gen. x. 7; I Chron. i. 9) as a son of Raamah, son of Cush, and again (Gen. xxv. 3; I Chron. i. 32) as a son of Jokshan, son of Keturah. Dedan is found in Jer. xlix. 8, where Edomitish settlers seem to be referred to, as "Dedan" occurs in the prophecy against Edom; again in xxv. 23, with Tema and Buz; in Ezek. xxv. 13, with Teman, in the prophecy against Edom; and in Isa. xxi. 13 ("The burden upon Arabia. In the forest in Arabia shall ye lodge, O ye traveling companies of Dedanim"). As a Keturean tribe Dedan seems to have occupied a position in northwest Arabia. Regarding the reference to Dedan in Ezek. xxvii. 15, 20, which points to South Arabia, Gesenius and Winer suggest that the Keturean Dedan intermarried with the Cushite branch, and this theory of mixed descent gains weight from the fact that in each case the brother of Dedan is mentioned as Sheba. Thus the name of Dedan may apply to one tribe.

K. B. P.

DEDE AGATCH: Turkish port on the Ægean Sea, at the mouth of the Maritza, near Enos, European Turkey. It has about two hundred Jews in a population of three thousand. The community, founded in 1870, possesses a synagogue, and a primary school attended by thirty children. The rabbi acts also as shoḥeṭ and mohel, and is paid out of the meat-tax. There are two charitable societies—a "biḳḳur ḥolim" and a "gemilut ḥasadim."

D. M. Fr.

DEDICATION. See Consecration or Dedication.

DEDICATION FEAST. See Hanukkah.

DEED (translated from the law Latin "actum"): In English law a contract under seal. To it corresponds very closely in Jewish law the "sheṭar" (lit. "writing"); the latter, however, means a solemn document, and is as such distinguished from the mere note of hand ("ketab yad").

I. The sheṭar was said to be sealed, and in Biblical times seal-rings, making an impression upon wax, clay, or lead, were evidently used to authenticate written documents; but in the Mishnah and in the later rabbinical literature the sealing of a document means neither more nor less than the signatures of two or more attesting witnesses.

In Biblical Hebrew "sefer" (lit. "a book") is the common name for a document, whether it be a conveyance (Jer. xxxii., *passim*), a bill of divorce (Deut. xxiv. 1), or an indictment (Job xxxi. 35).

Letters Patent and Close.

Another word, "geṭ," is found in the Mishnah, mostly applied to the bill of divorce, but used also in a more general sense. It is known, according to its outward form, either as the "straight deed" ("geṭ pashuṭ") or as the "tied deed" ("geṭ mekushshar"), the former being open, the other folded and sealed (Mishnah B. B. x. 1). The straight deed is signed by the witnesses at the bottom of the page; the tied deed (generally made up of several sheets sewed together) is folded and signed by one witness on the back, then folded again and signed by another witness. The latter form went out of use at an early date. The Talmud (B. B. 160a) says it was invented to prevent undue haste, especially in making out bills of divorce.

Concerning the form of written documents in use among the Jews before the Babylonian captivity, nothing is known. For more than a thousand years before that event, written contracts—especially bonds for the payment of money with interest thereon—were in use in Assyria and Babylon, thousands of which are still preserved and known as "contract tablets"; and the forms observed in them have had their influence upon the documents of the post-exilic Jews.

The ordinary language of written documents, such as marriage contracts, bills of divorce, assignments of claims, as it has come down through the Mishnah and Baraita, was Aramaic; so also bonds, as appears by samples of their language (Mishnah B. B. x. 2).

Bond of Indebtedness.

II. An important variety of the deed is the bond known as the "sheṭar ḥob" (writing of debt). The sealed bond—that is, an acknowledgment of debt attested by two or more witnesses—is of "higher dignity," to use an English law term, than the simple note of hand or a promise by word of mouth. For the judgment on a bond may be levied on "subjected property"—that is, property sold or pledged to others after the delivery of the bond—while a judgment on an oral contract or on a note of hand can be made only out of "free property." In other words, the bond creditor can subject the debtor's land or slaves to his claim, notwithstanding a subsequent sale, gift, or pledge to others; the bond thus operating as a mortgage, from the time of its delivery, of all the debtor's lands wherever situate—according to R. Meïr, however, only when a clause to that effect ("aḥarayut") is inserted; but, according to the majority, with or without such a clause (Mishnah B. M. i. 6; B. B. x. 8), its omission being deemed an error of the draftsman. Hence, one who finds a bond on the highway should not return it to either debtor or creditor, as it may have been paid off and thrown away, and might now by collusion be used to the injury of third parties (B. M. i. 6). It was thought that the attestation of a bond by witnesses would give to it sufficient notoriety to deter others from buying the debtor's land or lending upon its security. The obligor's signature was not a necessary part of a bond or other document; though the Babylonian contract tablets always bear it. According to Rashi, such subscription was customary in his time; and it has been so since.

When a bond was discharged, the creditor generally made out an acquittance ("shober," lit. "a breaker") with the same formalities as those observed in the bond (see Debtor and Creditor).

No set form of words is required to make a valid bond. The marriage contract, or ketubah, in so far as it secures to the bride sums of money payable upon divorce or upon the death of her husband, is in the nature of a bond, and can be collected in similar manner out of "subjected property" (Ket. 90b).

Indications of Amount.

It was usual to express the sum in two ways: first, in zuz or drachmas; next, in shekels or in minas. In case of contradiction the smaller sum prevails. But if the sum is twice named in the same coin, the last or lower figure prevails over the first or upper. Should the lower figure be indistinct or partially blotted, it can be supplied from the number first written. Where money units are named in the plural, but the number is rubbed out, the number two is presumed. Where a bond written in Greek contained the sum *ὀγδοήκοντα* (80) with its first part blurred, and probably raised from *πεντήκοντα* (50), the judge at Tiberias (Yer. B. B. x. 1) allowed only 30 shekels, *τριάκοντα* being the smallest sum ending in the plainly written syllable *κοντα*.

A bond was given generally for the repayment of a loan, and is in that case a "document of loan" or "sheṭar milweh." The Talmud speaks often of its being accompanied by an instrument known as a "prozbul," meant to defeat the law concerning the year of release (see Sabbatical Year).

The cost of writing the bond falls on the borrower; and the scrivener may, in the lender's absence, prepare a bond at the borrower's instance (B. B. x. 3). Where a bond was so blotted or worn as to become illegible, the creditor might have it reestablished on the testimony of witnesses by the decree of court.

The name of a surety ought to be inserted in the body of the bond above the attestation of the witnesses, and be connected by the word "and" with that of the chief debtor. If he simply writes under the attestation, "I, *A*, son of *B*, am surety on this bond," he is at most liable on a "simple contract"; and only his "free property" can be levied on. Even this is doubtful; for, unless he has become surety before the loan is made, or property is delivered, there is no consideration for his suretyship (*ib.* x. 8, where the point is raised by Simeon ben Nannas, the most celebrated lawyer of his time).

The plural "sheṭarot" (writings, documents) stands for bonds as a class of property. It has been shown, under Alienation and Acquisition, how a bond is transferred.

In the chapter of the Mishnah on overreaching ("ona'ah"; compare B. M. iv.), bonds are said to have no market price; for the value of a bond depends not only on the time it has to run, but also on such uncertain elements as the maker's honesty and solvency. Hence, the rule that a sale or purchase at more than a sixth above or below the market price gives a right to rescission is not applied to bonds.

III. Deeds for the conveyance of land, by way of sale or gift, are treated under the heads of Alienation and Acquisition; Gifts; Sales. Other important deeds are the Ketubah, or marriage contract; deed of Lease.

L. G. L. N. D.

DEEP: **1.** In contradistinction to "rock," which is used figuratively for "a refuge" (Isa. xxxiii. 16; Ps. xxvii. 5, xl. 2, lxi. 3), the "deep" ("ma'amaḳḳim") is a metaphorical expression for misfortune or sorrow (Ps. lxix. 2, 15; cxxx. 1). Thus the "deep valley" ("'emeḳ") designates a "place of affliction and judgment" (Joel iv. 2, 12, 14, Hebr.), and the phrase "deep pit" and similar words are used in the sense of "great danger" (Prov. xxii. 14, xxiii. 27; Isa. xxiv. 17, 22; Zech. ix. 11; Ps. lv. 23, lxxi. 20, lxxxvi. 13, lxxxviii. 6, cvii. 20; Lam. iii. 47, 53; iv. 20; compare the Arabian saying, "They live in a valley that is at the mercy of torrents." Hence "the depths of Sheol" (Prov. ix. 18) is an image of utter affliction.

2. "Deep" is also an expression for the unfathomable and inscrutable. Therefore hardened sinners are said to make deep—that is, heap up—their sins (Isa. xxxi. 6; Hosea v. 2, ix. 9), and "deep" is synonymous with "inexhaustible quantity" (Rom. xi. 33; II Cor. viii. 2). The Bible also speaks of people who are "deep"; that is, are cautious in speech (Isa. xxxiii. 19; Ezek. xxxiii. 5 *et seq.*). The Bible applies the word "deep" also to the heart (Ps. lxiv. 7; Judith viii. 14), and to a man's words (Prov. xviii. 4), or to his plans (Prov. xx. 5), while it finds "deep things" (secrets) in the universe (Job xii. 22), in the nature of things (Eccl. vii. 24), and in history (Dan. ii. 22). Hence the word "deep" is used in the sense of "inscrutable" in reference to God's thoughts (Ps. xcii. 6). As a further consequence of these metaphorical applications, "to make deep" came to be an equivalent for "to conceal" or "to deceive" (Isa. xxix. 15). It is interesting to note that in the cuneiform texts wisdom is designated as "the deep" ("nimeḳu"), and is characterized thereby as something difficult of attainment and seldom found.

E. G. H. E. K.

DEFENSE: Means of protection from assault. In Biblical times outlying farms were protected from bands of marauders by watch-towers ("migdal"; see TOWER). When the collection of houses in a village became large enough to need protection, they were generally enclosed by a wall, and were then known as cities. At times centers of strategic importance were held as fortresses (see FORTRESS).

G. J.

DEGREES, SONG OF. See PSALMS.

DEHAVITES (דהוא; R. V. Dehaites): The Dehavites are mentioned among the peoples settled in Samaria who opposed the reconstruction of the Temple at Jerusalem (Ezra iv. 9). Whether the Dehavites are to be connected with a nomadic Persian tribe, the *Δάοι*, mentioned by Herodotus (i. 125), or with the name of the city of Du'-va, mentioned on Assyrian contract tablets, is doubtful. The Septuagint reads, in codex A, *Δαναῖοι* ("the Davæans"), but in codex B the reading is *Σουσυναχαῖοι οἵ εισίν Ἠλαμαῖοι*, which means "the Susamchites who are the Elamites," taking the word translated "Dehavites" as a verb.

K. B. P.

DEICHES or **DAICHES** (דייכעס or דייכש): Polish family; mentioned as early as the seventeenth century, and members of which are living in Russia and Austria. The relationships of those bearing the name can be determined only in a few cases; and the fact that "Deiche" is common as a first name among Russo-Polish Jewesses suggests the probability of a common origin of the family name. Nevertheless, as there are Deiches in Russia who are known to have come from the city of Cracow, and as there are others of that name resident in that city, it is not impossible that Cracow is the native place of the Deiches family. The following are the more important members of the family:

Eliezer Elijah b. Solomon Ẓebi Hirsch Deiches: Russian Talmudist; born at Wilna in 1797; died there in 1881. Eliezer officiated as rabbi of the communities of Woronowo, Padzelwe, and Eishishuk, succeeding his father as dayyan of Wilna at the age of twenty-nine, and remaining in that office until his death. As dayyan he was noted for his endeavors to lighten the burden imposed by the ritual, while he himself lived a life of asceticism.

Elijah Judah b. David Deiches: Russian rabbi and Talmudist; flourished in the eighteenth and nineteenth centuries; died at Jerusalem Feb., 1858. Elijah was the son of David b. Aryeh Löb Deiches, who was rabbi of Eishishuk at his death in 1842. Elijah was for many years rabbi at Neustadt-Shirwint and Wilkowiski, where he also directed large yeshibot. He then removed to Palestine, and was one of the leading rabbis of Jerusalem.

Israel Ḥayyim b. Löb Hirsch Deiches: Russian rabbi and Talmudist; born at Dorshunishak, near Kovno, Dec., 1850. At the age of three he accompanied his father to Kovno, where, under the direction of his father and of other scholars, he devoted himself to the study of the Talmud. In 1869 he removed to Wilna. Here he married the daughter of Moses Bielitzki, called also Moses Zerne's. He remained in that city until 1885, when he went as rabbi to Neustadt-Shirwint, whence he emigrated to England; he is now rabbi and editor of a Hebrew paper in Leeds. He is the author of the following works: "Pirḥe ha-Abib" (Blossoms of Spring, Wilna, 1870), discussions on portions of Jewish law, composed at the age of eighteen; "Imre Yosher" (Words of Uprightness, Wilna, 1887), sermons; "Netibot Yerushalmi" (The Ways of Jerusalem, Wilna, 1880), a commentary on the treatise Baba Ḳamma of the Palestinian Talmud; "Ḳuntros . . . 'al ha-RIBaSH," remarks and notes to the responsa of Isaac b. Sheshet, included in the Wilna edition of that work (1878); "Ma'arekot Yisrael" (The Armies of Israel), halakic discussions on various subjects included in the "Oraḥ ha-Ḥayyim" of R. Ḥayyim of Ratzki (Wilna, 1879). H. N. Steinschneider ("'Ir Wilna," p. 106) gives 1853 as the date of Deiches' birth.

Jacob Mordecai b. Simon Deiches: Polish Talmudist of the seventeenth century. He was first associate rabbi at Cracow, and as such approved Ḥayyim Krochmal's "Meḳor Ḥayyim," which appeared at Fürth in 1697.

Leizer Deiches: Polish Talmudist and rabbi; flourished in the beginning of the eighteenth century. He was rabbi at Opatow (Galicia), and was among the scholars who lived for a time in Joseph b. David Oppenheim's house for the purpose of studying the rare books and the still rarer manuscripts in the latter's library. At the request of Oppenheim, Deiches prepared for the press Abraham Abele Gombiner's work, "Magen Abraham," on the Tosefta (Amsterdam, 1732). Gombiner's grandson remarks in the introduction that Deiches was so modest that he objected to having his labors in connection with the work publicly acknowledged.

Löb Hirsch Deiches (generally called **Aryeh Ẓebi b. David**): Lithuanian Talmudist; died at an advanced age at Kovno Oct. 1, 1891. He was a son of Rabbi David of Eishishuk, and a brother of Elijah Judah Deiches. He officiated for some years as rabbi at Dorshunishak, near Kovno, and removed to the latter place in 1853, where he filled the offices of associate rabbi and director of a yeshibah until his death. He is the author of "Zibḥe Teru'ah," a commentary on the prayers of New-Year's Day (Wilna, 1867).

Samuel b. Aryeh Löb Deiches: Lithuanian rabbi; died at Wilna March 23, 1825. His father was rabbi at Lida, near Wilna; his grandfather, called Elijah Arkes ("Arke" is the diminutive of "Aaron"), was a native of Cracow. On his mother's side he was a nephew of the dayyan of Wilna—"the great Simeon." Like the latter he was for many years one of the dayyanim of Wilna, and was famous for his devotion to the study of the Talmud. Many of the works printed at Wilna during his term of office bear his printed approbation. His brother David was the father of Elijah Judah Deiches; his other brother Meïr was dayyan at Kovno.

L. G.

DEISM: A system of belief which posits God's existence as the cause of all things, and admits His perfection, but rejects Divine revelation and government, proclaiming the all-sufficiency of natural laws. The Socinians, as opposed to the doctrine of the Trinity, were designated as deists (F. Lichtenberger, "Encyclopédie des Sciences Réligieuses," iii. 637). In the seventeenth and eighteenth centuries deism became synonymous with "natural religion," and deist with "freethinker."

Deism in England.

England and France have been successively the strongholds of deism. Lord Herbert, the "father of deism" in England, assumes certain "innate ideas," which establish five religious truths: (1) that God is; (2) that it is man's duty to worship Him; (3) that worship consists in virtue and piety; (4) that man must repent of sin and abandon his evil ways; (5) that divine retribution either in this or in the next life is certain. He holds that all positive religions are either allegorical and poetic interpretations of nature or deliberately organized impositions of priests. Hobbes (d. 1679) may be mentioned next (see Lange, "Gesch. des Materialismus," i. 245; F. Toennies, "Hobbes," in "Klassiker der Philosophie," Stuttgart, 1896). John Locke (d. 1704; see Jodl, "Gesch. der Ethik," i. 149 *et seq.*), in "The Reasonableness of Christianity as Delivered in the Scriptures" (1695), declares that "the moral part of the law of Moses is identical with natural or rational law." John Toland (d. 1722), the forerunner of the modern criticism of the N. T., in "Christianity Not Mysterious" (1696), says: "Revelation is no reason for assuming the truth of any fact or doctrine; it is a means of information." Anthony Collins (d. 1729), author of "Discourse on Freethinking" (1713) and "Discourses on the Grounds and Reasons of the Christian Religion" (1724), asserts that "Christianity is mystical Judaism." He applies the comparative method, and utilizes the Mishnah to show the affinity of N. T. theological allegorizing to that of the Rabbis. Tindal (d. 1733), in "The Gospel a Republication of the Religion of Nature" (1730), avers that "Revelation, both Jewish and Christian, is only a repetition of the *lex naturæ*."

Mendelssohn's Deism.

In France, Voltaire, Diderot, and, above all, Rousseau, were exponents of deism, on the whole illustrating the intellectual moralism of the school. In Germany it is the "Aufklärungsphilosophie" that to a certain extent is under the influence of the deistic theses, and as Moses Mendelssohn is one of the prophets of the "Aufklärung," deism may be said through him to have had a part in the shaping of modern Jewish thought. Reason and common sense are, according to Mendelssohn, identical ("Werke," ii. 265, 283, 315). Religion is, according to him, natural and eminently practical. To "do," not to "believe," is the chief care of the religious man. Natural theology is as accurately certain as mathematics. That God is, is a fact, not a belief. Mendelssohn parts company with deism by modifying the doctrine of divine retribution. According to him, happiness and the doing of right are coincidental. The virtuous man is happy. However, Mendelssohn is not consistent throughout, as he admits repeatedly that, without the assumption of immortality, morality can not stand, nor can God's Providence be established (Phædon). Revelation for him is not necessary to religion; but the national law of Judaism, which is not natural, had to be revealed ("Schriften," iii. 311-319, 348-356; v. 669, Leipsic, 1843).

The Mendelssohnian arguments left their imprint on the Jewish theology of the nineteenth century (see L. Löw, in "Ben Chananja," i.). His "deistic" moralism on the one hand, and his "national legalism" on the other, have not been without influence on the theories of the Reform rabbis (see Holdheim, Samuel), which differentiated the moral—that is, the universal and eternal—injunctions and principles of the Law from the national and temporal; while the distinction made between moral and ceremonial laws (see Ceremonies), though recognized by Saadia and others, received a new emphasis through Mendelssohn's views. The relations of deism to Judaism, however, have not been made the subject of systematic inquiry, though non-Jewish controversial writers have often argued that Judaism, positing a transcendental God, virtually stood for deism. This contention must be allowed if deism connotes anti-Trinitarianism. Judaism has always been rigorously Unitarian. Deism, as the denial of original sin and the soteriology built thereon, also harmonizes with Jewish doctrine. But the doctrine of deism which relegates God, after creation, to the passive rôle of a disinterested spectator, is antipodal to the teachings of Judaism. God directs the course of history and man's fate (Ex. xix. 4, xx. 2; Deut. xxxii. 11, 12; xxxiii. 29; Ps. xxxiii. 13, cxlv. 16; Jer. xxxii. 9). God neither slumbers nor sleeps. He is Israel's guardian (Ps. cxxi.). Nations may plot and rage, but God's decrees come to pass (Ps. ii.).

The question as to what God has been occupied with since the creation is the subject of rabbinical speculations (Lev. R. iii., viii.; Gen. R. lxviii.; Pesiḳ. 11b; compare Midr. Sam. v.; Tan., ed. Buber, Bemidbar, xviii.; Tan., ed. Buber, Maṭṭot, end; Tan., Ki Teẓe, beginning). God presides over the births of men (Nid. 31a; Lev. R. xiv.; Tan., Tazria'). He takes care that the race shall not

Talmud and Midrash.

die out (Pes. 43b; Pesiḳ. R. xv.). Even the instinctive actions of animals are caused by God, and so is He the power and will behind the acts of terrestrial governments (Eccl. R. x. 11). None wounds a finger without God's will (Ḥul. 7b). God sends the wind that the farmer may have wherewith to live (Pesiḳ. 69a; Lev. R. xxviii.; Eccl. R. i. 3; Pesiḳ. R. xviii.). God assigns the fate of the nations and of individuals (R. H. i. 2). Man's life is in the hand of God (Lam. R. iii. 39). Not alone the creation of the world, but also its preservation (Gen. R. xiii.; Eccl. R. i. 7, iii. 11; Gen. R. ix.; Midr. Teh. to Ps. ix.), as well as the destiny of man and mankind, is subject to God's constant guidance. In fact, creation was never considered finished (Ḥag. 12a). As the daily morning prayer has it: "[God] createth a new creation every day, everlastingly" (compare Reḳanati, "Ta'ame ha-Miẓwot," p. 37, and "Aḳedat Yiẓḥaḳ," gate iv.). Albo ("'Iḳḳarim," iii. 26) calls attention to the distinctive element of the Jewish God-conception which associates Him not merely, "as some philosophers do," with the creation, but also with the direction of the world after creation.

These ideas of God's government are expressed in the Jewish prayer-books (especially for Rosh ha-Shanah), and are in one way or another put forth by the philosophers. The question how God's government is compatible with human freedom has kept the Jewish thinkers on the alert; but, whatever their answer, none disputes God's supremacy and government (Saadia, "Emunot we-De'ot," iv.). Ibn Gabirol assumes that God's direction is carried into effect through "mediating forces." Judah ha-Levi's discussion of the names of the Deity (Elohim and YHWH) proves his antideistic convictions. "Ehyeh asher ehyeh" indicates God's constant presence in Israel and His help ("Cuzari," iv. 1, ii. 7). Maimonides' discussion of Providence ("Moreh," iii. 17) is also antideistic, though largely influenced by the pseudo-Aristotelian doctrine that Providence does not extend to the care of individuals.

Deism posits the moral freedom of man, his predisposition to virtue: so does Judaism (Ber. 33b). "All is in the hands of God save the fear of God" is the Talmudical formula for a doctrine resting on Biblical teachings, and accepted by Jewish theology. Judaism is theistic, not deistic. See GOD; MIRACLES; PROVIDENCE, DIVINE; REVELATION, DOCTRINE OF.

DEITY. See GOD.

DEL BANCO, MIRIAM: American authoress; born June 27, 1867, at New Orleans; daughter of Rabbi Max Del Banco, who died shortly after her birth. Her mother removed to St. Louis, in the public schools of which city the daughter was trained, displaying remarkable poetic talent. Later she was sent to her uncle at Cape Girardeau, Mo., where she attended the State Normal School. After completing the course with honors, she rejoined her mother, who in the mean time had removed to Chicago, in which city Miss Del Banco obtained in 1885 a position as teacher in the public schools; since 1889 she has been assistant principal at the Von Humboldt School. She has been a frequent contributor to both the Jewish and general press, having written a large number of poems, both Jewish and secular; she has likewise translated Kayserling's "Die Jüdischen Frauen," which appeared as a serial in the columns of the "Jewish Advance" and was published in Chicago in 1881; and Alberti's "Ludwig Börne," which appeared in the "Menorah," 1888-89.

A. M. Co.

DEL BENE, DAVID (also known as **Mehaṭob**): Italian rabbi; born at Mantua in the latter half of the sixteenth century; died at Ferrara in the beginning of the seventeenth century. Possessed of great oratorical talent and having received a thorough secular education, he began while a youth to preach in the synagogue of his native town. His sermons attracted crowds of listeners, the more so as he introduced in his addresses quotations from Italian poets, and even went so far as to speak of "the holy Diana." This mode of preaching could not fail to antagonize the zealots, who raised a storm of opposition against the young orator. Israel Sforno put himself at their head, and petitioned the rabbis to excommunicate him. Consequently David retired from the pulpit, and resolved to turn his attention to rabbinical studies. His former judge, Menahem Azariah of Fano, became his master. Having acquired considerable Talmudical reputation, so much so that he was often consulted in regard to complicated halakic questions, David was appointed rabbi at Ferrara, which position he held for thirty-six years. David was distinguished by the ascetic purity of his life.

G. I. Br.

DEL BENE (מהטוב), JUDAH ASHAEL BEN ELIEZER DAVID: Italian rabbi; born about 1618; died at Ferrara April 2, 1678. Together with Menahem Recanati he signed a halakic decision on the remission of debts in the jubilee year, which decision is cited in "Paḥad Yiẓḥaḳ" by Isaac Lampronti, who counts Del Bene among the greatest Talmudical authorities of the time. Del Bene wrote "Kis'ot le-Bet Dawid" (Thrones of the House of David), Verona, 1646. It is a philosophical work, divided into eight sections ("bottim") and fifty chapters ("she'arim"), and deals with the creation of the world, the heavens and the planets, the elements, the immortality of the soul, resurrection, articles of faith, the preeminence of the Hebrew language, the liturgists and payyeṭanim, and Mohammedanism. In the part dealing with the last-named subject Del Bene shows the superiority of Christianity over Islam, notwithstanding the Trinitarianism of the former. Another work of his, entitled "Yehudah Mehoḳeḳi" (Judah, My Lawgiver), is quoted in "Kis'ot le-Bet Dawid." Del Bene was a skilful poet, and many of his productions have been included in miscellaneous poetical collections. His style, however, is inferior because of his too frequent use of synonyms, though, as he says in "Kis'ot le-Bet Dawid," in treating of Hebrew style, he considers its wealth of synonyms to be one of its most beautiful features.

L. G. I. Br.

DELACRUT, DELACROT, or **DE LA CROTA, BEN SOLOMON:** Polish scholar; lived in the middle of the sixteenth century. He settled early in Italy, and at one time seems to have attended the lectures on Cabala and philosophy at the University of Bologna, devoting himself to the interpretation of cabalistic and scientific works. He was the author of the following: (1) "Perush," a commentary on Joseph Gikatilla's cabalistic work, "Sha'are Orah," Cracow, 1600; (2) a commentary on Solomon ben Abigdor's Hebrew translation of Sacrobosco's treatise on astronomy, "Tractatus de Sphæra," or "Aspectus Circulorum" (Hebrew, "Mar'eh ha-Ofannim"), with an explanation of the difficult passages of the translation according to the reading of his masters of the University of Bologna, and the interpretation he had found in Christian works (Cracow, 1720); (3) "Ẓel ha-'Olam" (The Image of the World), a translation of a treatise on cosmography written in French by Gossouin, under the title "Livre de Clergie," or "L'Image du Monde" (Amsterdam, 1733).

Bibliography: Steinschneider, *Cat. Bodl.* cols. 1882-1883; idem, *Hebr. Uebers.* pp. 644, 950.

H. R. I. Br.

DELAIAH: 1. A son of Elioenai in the Davidic genealogy (I Chron. iii. 24; A. V. "Dalaiah"). The sons of Delaiah are mentioned in the long post-exilic list of those who returned from captivity under Zerubbabel (Ezra ii. 60; Neh. vii. 62). They were unable to trace their descent. In I Esd. v. 37 the name is given as "Dalan."

2. Son of Mehetabeel and father of Shemaiah, who tried to persuade Nehemiah to seek refuge at night in the Temple, which caused Nehemiah to suspect him of spreading false alarms at the instigation of Sanballat (Neh. vi. 10).

3. Son of Shemaiah, a prince during the régime of Jehoiakim; one of those to whom Micaiah related the reading of the prophecy of Jeremiah by the prophet's scribe Baruch (Jer. xxxvi. 12).

4. A priest who headed the twenty-third of the twenty-four priestly divisions in the reign of David (I Chron. xxiv. 18).

E. G. H. G. B. L.

DELAWARE: A state on the Atlantic seaboard of the United States. The first Jew of whom anything definite is known as a resident of the state was Solomon Solis, born in Wilmington March 13, 1819 (Morais, "The Jews of Philadelphia," p. 51). Prior to 1855 M. M. Stern, now of Philadelphia, was engaged in business in Milford. There were, however, few Jews in the state before 1860, when Nathan Lieberman settled in Wilmington, his brother Henry about the same time locating in Dover, the capital of the state. Since then there has been a small influx, the total number of Jewish residents being given as 928, of whom over 800 reside in Wilmington. That city contains the only Jewish organizations in Delaware. Congregation Adath Kodesh Baron de Hirsch was organized in 1885 and incorporated Sept. 13, 1889. Its present rabbi is Herman A. Blatt. A free Hebrew Sunday-school, dating from Jan. 1, 1896, has now (1903) over 300 pupils. The charitable organizations are the Moses Montefiore Benefit Society, incorporated Feb. 10, 1883; the Hebrew Charity Organization, incorporated March 9, 1902. The latter has a loan fund without interest. There are also the Young Men's Hebrew Association, the Wilmington Lodge No. 470, I.O.B.B., and a few smaller organizations. A few Jewish families are scattered in Viola, Newcastle, Odessa, Millsboro, Laurel, Delaware City, Lewes, Georgetown, Seaford, Harrington, Middletown, and Milford.

A. J. H. Go.

DELGADO, GONÇALO: Portuguese Marano of the sixteenth century, and son of Juan Pinto Delgado; born at Tavira, where he occupied the position of an "escrivão dos orfãos" (secretary of an orphanage). He is the author of "Poema Composto de que Era, o Argumento: a Violente Irrupção Feita Pelos Inglezes no Anno do 1596, Sequeando e Abrazando a Cidade de Faro," a poem narrating the circumstances of an English incursion in 1596, during which the town of Faro was stormed and sacked. The poem is dedicated to Ruy Lourenzo de Tovara.

G. M. K.

DELGADO, JOSEPH: Farmer of the revenue of Lumbrales, Castile. On July 26, 1723, he, his wife Antonia de Cardenas, and his brother Gabriel Delgado, refusing to renounce their faith, were sentenced to imprisonment for life by the Inquisition at Llerena. On the same day, the mother-in-law of Joseph Delgado was burned at the stake for the same reason.

S. M. K.

DELGADO, JUAN (MOSES) PINTO: Marano poet; born at Tavira, Portugal, about 1530; died in 1591. Going to Spain in his youth, he studied the humanities at Salamanca, where he formed a friendship with the poet Luis de Leon. He was talented in many ways, and was endowed with an unusually retentive memory, being able to reproduce verbatim a discourse heard but once. Pursued by the Inquisition, he left his wife and child at Tavira, and went first to Rome, and then to France, where he openly professed Judaism and took the name of Moses.

The poems of Jean Pinto Delgado are distinguished for grace, sublimity of style, and variety of meters; "parts of them are written not only with tenderness, but in a sweet and pure versification," says Ticknor. In addition to various poems, he composed poetical versions of certain books of the Bible, which were published together under the title "Poëma de la Reyna Ester, Lamentaciones del Propheta Jeremias, Historia de Rut, y Varias Poesias" (Rouen, 1627), and dedicated to Cardinal Richelieu. The view of J. A. de los Rios and Ad. de Castro that there exists an earlier edition, published at Paris, is very questionable. Barbosa Machado says that Delgado translated parts of Petrarch into Portuguese. Daniel Levi de Barrios says of him:

> "Del Poema de Hester en sacro coro
> Mosseh Delgado da esplendor sonoro,
> Y corren con su voz en ricas plantas
> De Jeremias las Endechas santas."

DELIATITZ, ELIJAH BEN ABRAHAM: Russian Talmudist and rabbi of Deliatitz; flourished at the beginning of the nineteenth century. He wrote: (1) "Shene Eliyahu" (The Years of Elijah), notes on the comments of Elijah Wilna on the Abot de-Rabbi Nathan; (2) "Ben Abraham" (The Son of Abraham), a concordance of the parallel passages in the Abot, with explanations (Wilna, 1833). Deliatitz is also the author of "Ma'aneh Eliyahu" (The Reply of Elijah), a commentary on the last Mishnah of 'Uḳzin, and on the fifth Mishnah in the fifth section of Kilayam, published with the preceding work.

BIBLIOGRAPHY: Fürst, *Bibl. Jud.* i. 204; Benjacob, *Oẓar ha-Sefarim*, p. 654; S. J. Fuenn, *Keneset Yisrael*, p. 105.

L. G. M. SEL.

DELIATITZ, NISSAN: Russian rabbi and mathematician. He wrote "Ḳeneh Ḥokmah," the meaning of which in Prov iv. 5 is "buy wisdom," but which here means "the scientific measure." It is a manual of algebra in five parts (Wilna, 1829). Benjacob says that Nissan was the son of Abraham Deliatitz, but Fürst makes him the son of Elijah b. Abraham Deliatitz.

DELILAH: A woman of Sorek, loved by Samson (Judges xvi. 4–20). The chief of the Philistines bribed her to discover the source of Samson's great strength. Three times she failed. First, at his own suggestion, she bound him with "seven green withes," but these he easily snapped asunder. Then she tied him with new ropes: these also failed. Then she fastened the locks of his hair to the loom (see Moore, "Judges," *ad loc.*), but with the same result. Finally, after many complaints that Samson did not trust her, he told her that his strength lay in his hair. Then, when he was asleep, she called in a man to cut off his hair. She then awoke him, and delivered him into the hands of the waiting Philistine chiefs, from each one of whom she received 1,100 pieces of silver. In all probability Delilah was a Philistine woman, although not necessarily a "political agent" of the Philistines (Cheyne and Black, "Encyc. Bibl." *s.v.*; see SAMSON).

G. B. L.

Delilah's name, דלילה, has been explained as "faithless one" by E. Meier ("Hebräisches Wurzelwörterbuch," p. 330), and as "traitor" by Ranke ("Weltgesch." i. 51); it has also been compared with the Arabic "dalilah," Modern Arabic "dlyle," used to designate a hetæra (Gesenius, "Th." p. 341; compare "dallum" = amorous, coquettish, in Gesenius, "Lexicon," p. 195b).

This interpretation of the name would be justified only if it were certain that the story of Samson is a myth, and that the name "Delilah" had, in connection with his story, a symbolical significance. This, indeed, has been assumed by Ignaz Goldziher, for example, who, in his "Der Mythus bei den Hebräern" (pp. 186 *et seq.*), says: "Delilah is the setting sun, which has completed its day's labor, or, rather, which is no longer the sun, but the night that cuts her lover's curly locks (crines Phœbi), in which his whole strength is centered." E. Wietzke (in the pamphlet "Der Biblische Samson der Aegyptisches Horus-Ra," 1888) likewise identified Delilah with the night; but these assumptions are more or less arbitrary attempts to reduce Samson to a mythological figure. It is more correct to apply to Delilah Philo's words, in his "De Sampsone," concerning the first Philistine wife of this hero: "O nefanda mulier abominabilis, optas audire ut tradas dicentem, ut exuas coronam ab eo!" In the stories of "The Arabian Nights" the name of Delilah has come to be applied to a cunning woman (see Joseph Horowitz in "Z. D. M. G." pp. 333-335).

E. G. H. E. K.

DELITZSCH, FRANZ: Christian Hebraist; born at Leipsic Feb. 23, 1813; died there March 4, 1890. He was not of Jewish descent; although, owing to his rabbinical learning and his sympathy with the Jewish people, and from a misunderstanding of his relation to his Hebrew godfather (whom he called "uncle"), a Jewish ancestry was often attributed to him. He devoted himself early to Semitic studies, was made assistant professor at Leipsic in 1844, and was called as professor to Rostock in 1846, to Erlangen in 1850, and in 1867 to Leipsic, where he spent the remainder of his life. His services to Hebrew philology and literary history and to Biblical exegesis were great. As an Old Testament critic he was progressive: beginning as a bulwark of conservatism, he gradually moved toward the modern position (for example, in regard to the documents of the Pentateuch, and the dates of Deuteronomy, Isaiah [xl.–lxvi.], and Daniel). In Biblical psychology his work was less satisfactory, and has not met with favor. As a student he became deeply interested in post-Biblical Hebrew literature, and even his Biblical commentaries are full of citations from rabbinical and Neo-Hebraic works. In 1837 he worked out a catalogue of the Hebrew and Syriac manuscripts in the Leipsic Rathsbibliothek (published 1838). In conjunction with Steinschneider he edited and annotated Aaron ben Elijah's "'Eẓ Ḥayyim" (Leipsic, 1841); though his chief work in this branch was his "Zur Geschichte der Jüdischen Poesie" (Leipsic, 1836), a history which is still of use. Mention should also be made of his "Jüdisch-Arabische Poesien aus vor-Muhammedanischer Zeit" (Leipsic, 1874); "Jesus und Hillel" (3d ed., 1879); "Jüd. Handwerkerleben zur Zeit Jesu" (3d ed., 1879; Eng. transl. "Jewish Artisan Life," London, 1877); and his edition of Weber's "System der Altsynag. Theologie" (Leipsic, 1880).

Delitzsch's principal publications, besides those already mentioned, are his "Pentateuch-Kritische Studien," in "Zeitschr. für Kirchliche Wissenschaft," 1880, 1882; and the following commentaries: On

Genesis, 1852, 1853, revised ed., 1887; Job, 1864; Isaiah, 1866, 1889; Psalms, 1867; Proverbs, 1873; Song of Songs and Ecclesiastes, 1875. These commentaries, though they follow the Masoretic text without attempt at emendation, are exegetically strong.

Delitzsch was also active in other lines of Biblical science. He took part in the revision of Luther's translation of the Bible, instituted by the government of Saxony in 1873; he collaborated with Baer in the publication of a revised Masoretic text of the Old Testament (the Baer-Delitzsch text, unfortunately left unfinished); and, in connection therewith, produced a series of studies (from 1871 to 1886) on the Complutensian Polyglot. Delitzsch was a vigorous opponent of the anti-Semitic movement in Germany, and was one of the foremost opponents of Rohling, defending the Jews against the blood accusation. In 1841 he made a public declaration on this subject in the Waisenhaus-Kirche in Dresden, and in 1882 published a responsum ("Christliche Zeugnisse Gegen die Blutbeschuldigung," p. 12). In this connection he wrote "Rohling's Talmudjude" (7th ed., 1881); "Was D. Aug. Rohling Beschworen Hat?" (1883); "Schachmatt den Blutlügnern Rohling und Justus" (2d ed., Erlangen, 1883); "Neueste Traumgeschichte des Antisemitischen Propheten" (Erlangen, 1883). This did not prevent him from repelling what he considered unjust attacks upon Christianity in the Jewish press ("Christentum und Jüdische Presse" (Erlangen, 1882). His interest in the Christianization of the Jews led him to found in 1886 at Leipsic the institution which, after his death, was called the "Institutum Judaicum Delitzschianum"; and for them he translated the New Testament into Hebrew (1877), with the aid of J. E. Salkinsohn. His son **Friedrich Delitzsch** is noted as an Assyriologist; he is professor of Assyriology at the University of Berlin.

DELMANSI. See ANAW.

DELMEDIGO (דילמידיגו = "Del Medico"): A family of German descent. About the end of the fourteenth century its founder, **Judah Delmedigo,** emigrated to the island of Crete, whose inhabitants were mostly of German origin (compare Joseph Solomon Delmedigo, "Elim," p. 30, Amsterdam, 1629). Judah had three sons: (1) **Abba ha-Zaḳen** (I.), who, at his own expense, erected a German synagogue (*ib.* הנקרא אלימניקו); (2) **Mejuhas,** who died childless; and (3) **Shemariah,** with the surname Cretensis (איקריטי). The last wrote a philosophical work, "Ḥeber Ish we-Ishto" (compare Geiger, "Wiss. Zeit. Jüd. Theol." iii. 447), and many grammatical treatises (compare Wolf, "Bibl. Hebr." ii. 597, No. 33; Zunz, in "Catalogus Lib. Manuscript. Bibl. Senat. Lips." 324). His son **Moses** was the father of **Elijah Cretensis ben Moses Abba Delmedigo** (see next column). Elijah left two sons: **Moses,** a philosopher, and **Judah,** a rabbi (see JEW. ENCYC. iv. 509). One of Judah's daughters, Rachel, married Joseph of Constantinople, a descendant of Mordecai b. Eleazar Comtino (compare Grätz, "Gesch." viii. 274, 438, note), in whose library his (Comtino's) commentary on Ibn Ezra was studied by a later descendant of the family, Joseph Solomon Delmedigo.

Casta (קשתי: *idem*, "Elim," p. 29), the only daughter of Joseph of Constantinople and Rachel, married her relative Elijah, whose genealogy, on his father's side, is as follows: The above-mentioned Abba ha-Zaḳen (I.) had three sons: **Elijah, Moses,** and **Elkanah**—all Talmudists—who, together with other rabbis, defended—"with flaming swords"—their countryman Moses Capsali against the charges of Joseph Colon (Grätz, "Gesch." viii. 253). Elkanah's son **Samuel,** also a rabbi, had a son **Samuel Menahem,** who was born after his father's death. This Samuel Menahem, physician and teacher of philosophy, the head of a yeshibah in Padua, was made a prisoner of war, was ransomed by his countrymen, and was recalled as rabbi to Candia. His son **Abba** (II.) had a son **Eliezer,** who presided over a Talmudic school for many years, and was a zealous opponent of the Cabala. His son **Elijah,** also a Talmudist, his father's successor as rabbi in Candia, and husband of the above-mentioned Casta, was the father of **Joseph Solomon Delmedigo** (see JEW. ENCYC. iv. 508) the most illustrious member of the family (compare Steinschneider, "Cat. Bodl." 1510). It is not reported that children were born to him on the island of Candia (see his lament in his "Ta'alumot Ḥokmah," ii. 3b, Preface). His remarks ("Elim," p. 32), "that he had a little daughter at home," and "that he needed much money for his daughter's dowry," are explained by Moses Metz as humorous references to his work "Bosmat bat Shelomoh" (Geiger, "Melo Chofnajim," p. xlv.) and to the expenses of its printing. He was married in Frankfort-on-the-Main, where he held the position of communal physician, and where his two daughters were born. One died young (Carmoly, in "Allg. Zeit. des Jud." 1856, Jahrg. 20, No. 20, with inexact statement of sources). The other, Sarah, married the physician Solomon Bing, and after his death (1680) Isai Oppenheim, who died, according to her tombstone (No. 3009 in the old cemetery of the Israelitic community in Frankfort), Feb. 9, 1691 (M. Horwitz, in Berliner's "Magazin," x. 113).

D. M. Sc.

DELMEDIGO, ELIJAH CRETENSIS BEN MOSES ABBA: Cretan philosopher and physician; born in Candia in 1460; died there March, 1497 (Grätz, "Geschichte," 3d ed., viii. 244, note). Elijah was instructed by his father in Bible and Talmud, and when scarcely more than a child he addressed halakic questions to Joseph Colon, who highly praised his erudition and clear mind (Responsa, No. 54).

The high opinion of such a Talmudical authority probably led to the call, which Delmedigo received a little later, to preside over the Talmudical school of Padua. There he devoted himself to the study of philosophy, chiefly that of Aristotle, Maimonides, and Averroes, whose systems he afterward inculcated among Christian students by lectures and by translations and commentaries written in an elegant literary Latin.

As Professor of Philosophy.

Delmedigo's reputation as philosopher soon stood so high that he was chosen by the University of Padua, with the approval of the Venetian Senate, as umpire in a dispute on some philosophical subject between the professors and students of that university; and as a result of his decision he, at the age of twenty-three, was appointed professor of philosophy, teaching successively at Padua, Florence, Venice, Perugia, and Bassano. Among his students was the eminent scholar Count Giovanni Pico di Mirandola, who became his lifelong friend and protector.

This happy period in Delmedigo's life did not last long. The members of the party against whom he had decided the above-mentioned dispute had not forgiven him for their defeat, and they commenced to persecute him. Moreover, a quarrel arose between Delmedigo and Judah Minz, rabbi of Padua, who, being strongly opposed to scientific progress and freedom in religious matters, could not agree with the theories propounded by Delmedigo in his work "Beḥinat ha-Dat" (see below). This quarrel soon developed fierce persecutions, obliging Delmedigo to leave Italy; and he returned to his native place, where he was received with much sympathy by his countrymen, both Jews and Christians. There he taught philosophy for two or three years, at the expiration of which he underwent an operation on the cheek, which caused his death. Joseph Solomon Delmedigo, who in his "Maẓref le-Ḥokmah" gives some biographical notes on Elijah, relates that crowds of learned Christians, clad in mourning, attended Elijah's funeral.

His Works.

Elijah's scientific activity lay chiefly in translating from Hebrew into Latin and in commenting upon some of Averroes' commentaries on Aristotle. He did this mostly at the request of Pico di Mirandola. His translations and independent works are: "Quæstiones Tres: I. De Primo Motore; II. De Mundi Efficientia; III. De Esse Essentia et Uno," Venice, 1501; "Adnotationes in Plurima Dicta," or "Anno. Quædam in Lib. de Physico Auditu Super Quibusdam Dictis Commentatoris [Averrois] et Aliis Rebus," etc., published as an appendix to the preceding work; two questions on the hylic intellect, in Latin and in Hebrew, under the title "She'elah 'Amuḳḳah 'al Aḥdut Sekel ha-Hayulani" (the first question being whether the hylic intellect is one; the second, whether it conceives substances separated from matter [Paris MS. No. 968; at the end of this work, Delmedigo promises to publish a book on the number of the precepts according to the Talmud]); "Averrois Quæstio in Librum Priorum (Analyticarum)," Venice, 1497; Averroes' commentary on Plato's "Republic," "De Regimine Civitatis" (no longer extant, and known only from quotations); "Averrois Commentatio [Summa] in Meteora Aristotelis," with an introduction as well as fragments from Averroes' "Middle Commentary," *ib.* 1488; "Averrois Commentatio [Media] in Metaph. Aristotelis," i.-vii. *ib.* 1560; Averroes' proem to the large commentary to Aristotle's "Metaphysics," xii., translated once for Pico di Mirandola, and a second time for Cardinal Grimani (Paris MS. No. 6508); a small treatise on metaphysics (*ib.*); "[Averrois] De Substantia Orbis," in Latin and in Hebrew, under the title "Biur ha-Ma'amar be-'Eẓem ha-Galgal" (*ib.*); "Sperma" (*ib.*); "Beḥinat ha-Dat" (Investigation of Religion), written at the request of his disciple Saul Cohen Ashkenazi, and published by Delmedigo's great-grandson, Basel, 1519; also, with a commentary, by Isaac Reggio, Vienna, 1833. In the last-named work Delmedigo endeavored to separate religion from philosophy. In his opinion religion consists in actions leading to a moral life, and is not a matter of syllogisms requiring demonstration. Philosophical speculations leading to a better understanding of the religious principles are indeed permitted, if not prescribed, by the Law; but these speculations are applicable only for the small minority possessing a philosophical training. As for the majority, they must take the Biblical and Talmudical prescriptions in their literal sense. Still, he admits that Judaism, besides religious prescription, contains certain dogmas, such as the unity and incorporeality of God, divine retribution, belief in the miracles related in the Law and resurrection; but these are by no means illogical—as is, for instance, the Trinity—and no true philosopher will declare them untenable. Delmedigo ascribes a divine origin to the halakic part of the Talmud, which is the traditional interpretation of the laws. The haggadic part, on the contrary, being the work of men, has no higher authority than the dicta of the philosophers. The Cabala, he claims, is rooted in an intellectual swamp; no trace of it is to be found in the Talmud, and its basal work, the Zohar, is the production of a forger.

"Beḥinat ha-Dat."

The "Beḥinat ha-Dat" can hardly be called an original work. All that Delmedigo says in it respecting philosophy and religion is borrowed from Averroes' "Faṣl al-Maḳal," as has been pointed out by A. Hübsch ("Monatsschrift," 1882, pp. 555–563; 1883, pp. 28–46). Delmedigo's merit in connection with this work lies chiefly in the courageous expression of his opinions, heedless of consequences, which, as the result showed, were disastrous for him. His assertion concerning the haggadic part of the Talmud was probably the cause of his quarrel with Judah Minz, who regarded it as a veritable heresy. On the other hand, the cabalists, who were at that time powerful, could not forgive Delmedigo for his severe attacks upon the Cabala; and even his friend Pico di Mirandola, who was a warm supporter of the Cabala and caused many cabalistic writings to be translated into Latin, was probably offended by his attacks.

Samuel Algazi, in his "Toledot Adam," attributes to Delmedigo a commentary to the Song of Songs; but this is no longer extant. According to Joseph Solomon Delmedigo ("Maẓref le-Ḥokmah," p. 5), Elijah wrote several works in which he defended Maimonides against the criticisms of Levi b. Gershom.

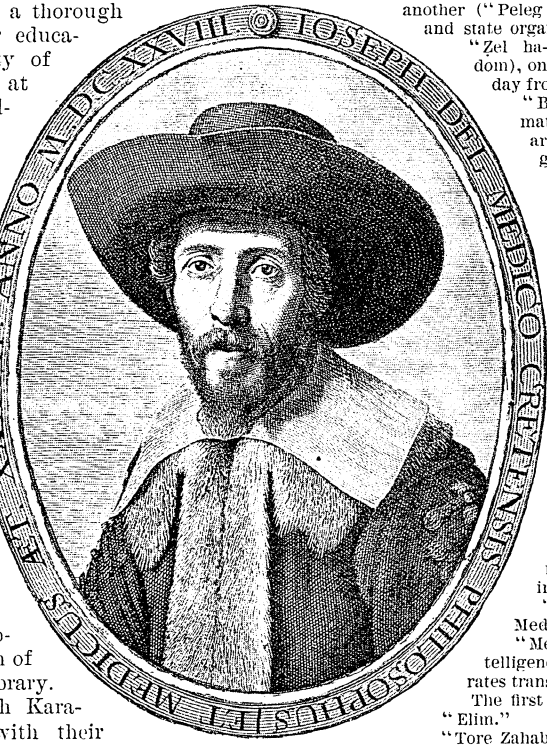
G. I. Br.

DELMEDIGO, ELIJAH BEN ELIEZER: Cretan rabbi and Talmudist; flourished in the second half of the sixteenth and in the first of the seventeenth century in Candia. He was widely known in his time as a Talmudic scholar. A halakic decision of his exists in Joseph Samega's "Derek Yemin." He was the father of the famous philosopher and writer Joseph Solomon Delmedigo.

Bibliography: Nepi-Ghirondi, *Toledot Gedole Yisrael*, p. 6; Geiger, *Nachgelassene Schriften*, iii. 5.

L. G. I. Ber.

DELMEDIGO, JOSEPH SOLOMON (YaShaR = Joseph Solomon Rofe): Philosopher and physician; born at Candia June 16, 1591; died at Prague Oct. 16, 1655; son of Elijah, rabbi of Candia. Joseph received a thorough Jewish as well as secular education. At the University of Padua, which he entered at the age of fifteen, he studied logic, natural philosophy, metaphysics, and divinity; and then devoted himself to medicine and to his favorite studies, mathematics and astronomy, the latter under Galileo. While at Padua he frequently visited, at Venice, Leo de Modena, who exercised a great influence over him. Returning to Candia, Delmedigo's freethinking tendencies and his preference for secular studies soon made his residence there impracticable. For many years he led a wandering life, going first to Cairo, in search of new books for his rich library. There he associated with Karaite scholars, especially with their ḥakam, Jacob Iskandari, at whose request he wrote his works on mechanics. At Cairo, Delmedigo triumphed over a certain Mohammedan professor in a public debate on mathematics. At Constantinople, also (where he studied the Cabala), he associated chiefly with the Karaites. Going by way of Wallachia and Moldavia, he visited Poland and Lithuania. At Wilna he was engaged as physician to Prince Radziwill (*c.* 1620).



IOSEPH DEL MEDICO CRETENSIS PHILOSOPHUS ET MEDICUS AET XXXVII ANNO M DC XXVIII

Joseph Solomon Delmedigo.
(From the frontispiece to his "Sefer Elim.")

The appearance in Wilna of a man with such a versatile intellect was a rare event. Among his pupils here was Moses ben Meïr of Metz. A Karaite, Zerah ben Nathan of Trok, addressed to Delmedigo a number of questions on scientific subjects, the answers to which constitute his "Elim." After a few years in Lithuania and Poland, Delmedigo went to Hamburg, where he officiated as rabbi or preacher to the newly established Sephardic community. An epidemic compelled him to move to Glückstadt; from there he went to Amsterdam, where he officiated as rabbi for a few years. About 1630 he settled in Frankfort-on-the-Main, and in 1631 became a communal physician. He finally, about 1648, settled in Prague, and resided there until his death.

Delmedigo was the author of numerous scientific works. Most of them are known only by the author's list of his own writings. The following enumeration may contain some duplicates, as it is not always possible to distinguish between books which have one and the same title:

His Works.

"Ya'ar ha-Lebanon" (The Forest of the Lebanon), an encyclopedia of science according to the system of the ancients. One part treats of the value of chemistry, and is entitled "Ḥefes Meḥuppas"; another ("Peleg Elohim"), of various religious and state organizations.

"Ẓel ha-Ḥokmah" (Shadow of Wisdom), on the reckoning of the time of day from the length of a shadow.

"Bosmat bat Shelomoh" (Basmath, Daughter of Solomon), on arithmetic, geometry, astronomy, geography, chiromancy, harmony, logic, ethics, and metaphysics. Delmedigo claims to have elaborated in the "Bosmat" a system of his own.

"Or Shib'at ha-Yamim" (The Light of the Seven Days), on creation and on optics.

"Ḳeshet Derukah" (A Bent Bow), on the rainbow and on colors. This and the preceding are appended to the "Bosmat."

"'Ir Gibborim" (City of Heroes), divided into two parts: (1) "Geburot Adonai," on astronomy; (2) "Niflaot Adonai," on chemistry and mechanics.

A commentary on the "Almagest" (a part of which is included in the "Elim").

"Refu'ot Te'alah" (Healing Medicine), a medical work.

"Meḳor Binah" (Source of Intelligence), the aphorisms of Hippocrates translated from Latin into Hebrew. The first chapters are included in the "Elim."

"Tore Zahab" (Plaits of Gold), selections from Hebrew literature, with a commentary entitled "Neḳudat ha-Kesef."

"Tor ha-Ma'alah" (Order of Dignity), on the treatment of scholars.

"Ruaḥ Eliyahu," a defense of Elijah Mizraḥi's commentary on Rashi.

On Porphyry's "Introduction to Logics," and on the "Categories."

Translations of several of Philo's works and of Judah Abravanel's "Philon et Sophia."

Explanations of difficult passages in Isaac 'Aramah's "'Aḳedat Yiẓḥaḳ."

Comments on Ibn Ezra's "Sefer ha-Shem" and "Sefer ha-Eḥad."

"Arubbot ha-Shamayim" (Windows of the Heavens), on metaphysics.

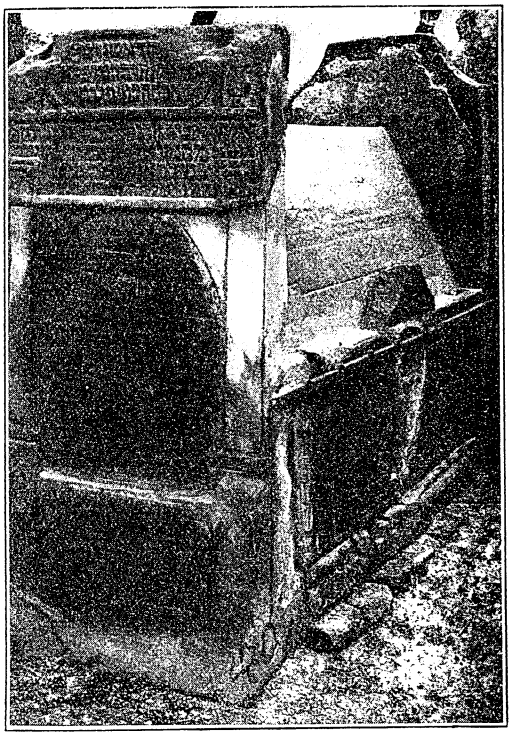
"Raḥel Mebakkah," and a number of other works upon unknown subjects.

"Elim" (Amsterdam, 1629) contains answers to twelve scientific questions propounded by Zerah ben Nathan, and seventy mathematical paradoxes. The title is an allusion to Ex. xv. 27. The work also contains some letters of Zerah ben Nathan, and dissertations by one of Delmedigo's disciples, Moses ben Meïr of Metz.

"Rosh Mashbir," on arithmetic.

"Ma'yan Gannim" (Source of the Gardens), a continuation to the answers to Zerah ben Nathan. It consists of the following short treatises: on trigonometry; on the first two books of the "Almagest"; on astronomy (these three printed with the "Elim"): on astronomical instruments; on Cabala and the supernatural; on astrology; on algebra; on chemistry; on the aphorism of Hippocrates; on the opinion of the ancients concerning the substance of the heavens; on the astronomy of the ancients, who considered the motion of the higher spheres due to spirits (Delmedigo shows that their motion is similar to that of the earth); on the principles of religion; mathematical paradoxes (printed together with the "Elim").

Another of Delmedigo's disciples, Samuel Ashkenazi, published under the title of "Ta'alumot Ḥokmah" (Basel, 1629–31) that portion of the "Ma'yan Gannim" which deals with the Cabala. This work shows that Delmedigo was a follower of the system of Isaac Luria. Geiger has published ("Melo Chofnajim," Berlin, 1840), with a German translation, one of Delmedigo's letters to Zerah ben Nathan.



Tombstone of Joseph Solomon Delmedigo at Prague.
(From a photograph.)

His Insincerity.

Despite Delmedigo's scientific attainments, he is to be blamed for deriding the Cabala in private and defending it in public, even if Michael's supposition be correct that the letter addressed to Zerah contains interpolations by Karaites, among whom it was found. Evidently ashamed of his "Maẓref le-Ḥokmah," he asserted that it was written at the request of an influential personage in Hamburg who wished to defend philosophy, and that an author is not bound to state his private belief in such cases. His lack of sincerity is also seen in some evidently false statements; for instance, regarding the miracles worked by Naḥmanides and Ibn Ezra. He was so afraid of being accused of heresy that he covered the discussions on scientific and theologic questions in his "Elim" with the cloak of orthodoxy, and attributed his own opinions to Zerah or to Moses b. Meïr of Metz. It was probably this fear that caused him to suppress the treatises on angelology and Cabala in his "Ma'yan Gannim." Still his contemporaries Yom-Ṭob Lipman Heller and Jair Ḥayyim Bachrach speak of Delmedigo in the highest terms, and praise his piety and his vast erudition.

G. I. Br.

DELMEDIGO, JUDAH B. ELIJAH: Italian Talmudist; born in Candia; son of the philosopher Elijah Cretensis Delmedigo; studied at Padua under Judah Minz; he then returned to his native city, where his reputation as teacher of the Talmud attracted many pupils, among them Samuel Algazi. He was in continual controversy with the aged historiographer and teacher of the Law Elijah Capsali, who also had a school at Candia, both of the adversaries succeeding in rousing the interest of their most eminent contemporaries. Traces of the many differences of opinion that separated these two men and led to bitter disputes between them may be found in the responsa of the foremost authorities of this time. The liturgical poet Moses Alashkar, Elijah ben Benjamin ha-Levi, Meïr Katzenellenbogen of Padua, and David ibn abi Zimra make mention of these two scholars, who had laid disputes before them. Joseph Solomon Delmedigo was a great-grandson of Judah.

Bibliography: M. Metz, in Joseph Delmedigo's *Elim*, p. 29; Geiger, *Gesammelte Schriften*, iii. 4; Michael, *Or ha-Ḥayyim*, pp. 165 *et seq.*, 453; *Zeḳan Aharon*, Responsa Nos. 7-29, 70-78, 99, 112-114, 148-154.

DELUGTAS, SAMUEL BEN MOSES. See Dlugosz, Samuel ben Moses.

DELVAILLE, ALBERT: French dramatic author; born at Neuilly-sur-Seine May 30, 1870. He studied at the Ecole Monge (afterward the Ecole Carnot), and then joined his father, who was a dealer in colonial wares. He soon, however, turned to writing dramas, under the pseudonym "Trebla." Among his plays, some of which are collaborations, are the following: "Par-çi, par-là," "L'Indécollable," "La Confession Naïve," "Le Harem de Pontarlier" (1896); "Vive la Femme," "A Nous la Chanson," "Voyez Terrasse" (1897); "Chez la Couturière," "Le Pierrot Bleu," "Elle" (1898); "Personne," "Vénus Cantonnière," "Pierrot aux Manœuvres," a ballet (1899); "Napolégnon," "Nostalgie" (1901). The latter play was prohibited by the authorities. He also published, in 1898, a collection of dialogues entitled "L'Amour en Fantaisies." He has contributed to "La Plume," "Le Grelot," "Le Courrier National," "Fin de Siècle," "Gil Blas," and other periodicals.

Bibliography: Curinier, *Dictionnaire National*.

S. V. E.

DEMAI (דמאי, "doubtful"; something which may still contain the elements of דמע, "things holy"): **1.** Agricultural produce, the owner of which was not trusted with regard to the correct separation of the tithes. The tribe of Levi, having been excluded from participating in the division of the land, obtained as compensation a share in its produce (Num. xviii. 24). As the tribe included two elements, priests and Levites, the compensation was given in two forms: "terumah" (heave-offering) and "ma'aser" (tithe) for the Levites; and the latter gave the tenth part of the tithe to the priests as "terumat ma'aser" (heave-offering; *ib.* 26). In addition, a second tithe had to be separated from the produce in the first, second, fourth, and fifth years of the year-week. This tithe had to be taken to Jerusalem and consumed there, in accordance with certain regulations; while in the third and sixth years it was given to the poor. In the former case it was called "ma'aser sheni" (second tithe); in the latter "ma'aser 'ani" (the tithe for the poor). The produce of the seventh year was free from all these dues.

Terumah and Ma'aser.

The heave-offerings, both terumah and terumat ma'aser, could not be eaten by non-priests; the second tithe, unless redeemed with "silver," which was to be spent on food in Jerusalem, could not be eaten outside that city; while the first tithe and the tithe for the poor were not subject to any restrictions. Conscientious Jews would not partake of the produce of the land unless they had first satisfied themselves that the heave-offering and tithes had been duly separated. The owners of land in Palestine were divided into three classes: (1) non-Jews, to whom the Jewish laws about tithes did not apply; (2) the trustworthy Jews ("ne'emanim" or "ḥaberim"), who were sure to separate from the produce all that was due according to the Law; and (3) the 'Am ha-Areẓ, who was suspected of neglecting these laws. Produce bought of any person of the first class was considered as unprepared—*i.e.*, as produce from which heave-offering and tithes had not been separated; that bought of the second class was "metuḳḳan" (prepared); and that bought of the third class was "demai" (doubtful, or suspected).

Ma'aser Sheni.

The conscientious never partook of demai without first separating the tithes due thereon. It was not necessary, however, to separate all the dues enumerated above, as no one was suspected with regard to the heave-offering, for two reasons: first, it was not burdensome, as the minimum quantity satisfied the Law (Ḥul. 137b); and, secondly, the offense of neglecting it was considered very serious (Sanh. 83a). It was therefore only necessary to mark out the first tithe and the second. Of the former, one-tenth was separated as "the heave-offering of the tithe," and the remaining nine-tenths were retained by the owner, as the Levite was unable to prove his claim. The second tithe could be redeemed without the addition of one-fifth of its value (Lev. xxvii. 31). These regulations concerning demai are ascribed to Johanan, the high priest (John Hyrcanus, son of Simeon), who inquired into the matter and discovered the fact that most people only separated the heave-offering and neglected the tithes (Soṭah 48).

2. The third treatise of the first section of the Mishnah, containing the regulations relating to demai. They concern chiefly the ḥaberim, an association of trusted persons who rigidly observed the laws of terumah and ma'aser, and acted on the presumption that a ḥaber would not permit anything to pass out of his hands which was not ritually qualified for immediate eating ('Ab. Zarah 41a). Without attempting to give a definition of "demai," the meaning of which is assumed to be well understood, the author of the Mishnah at once proceeds to discuss the laws of demai in seven chapters, whose contents may be summarized as follows:

I. Cases in which the law of demai is not rigidly applied; *e.g.*, fruit or vegetables which are found as "hefḳer" (unclaimed property), hefḳer being exempt from ma'aser.

II. Produce of Palestine, even when bought outside Palestine, is demai if bought of an 'am ha-areẓ. The conditions of a ḥaber involve certain restrictions, which are reduced or removed in favor of a ḥaber baker or shopkeeper.

III. A ḥaber must not cause others to partake of demai.

IV. The 'am ha-areẓ is exceptionally trusted with regard to ma'aser on Sabbath and concerning holy things—*e.g.*, "ḥallah" sacrifices—because the awe-inspiring character of Sabbath and holy things ("emat shabbat" and "emat ha-ḳodesh") deters people from uttering falsehood.

V. If demai is bought of several persons, each lot must be tithed separately.

VI. A ḥaber farmer is responsible for the proper tithing of the share of an 'am ha-areẓ landlord.

VII. Regulations for facilitating the tithing of demai on urgent occasions.

The Tosefta has a few modifications and additions. Dividing ch. ii. into two parts, it has eight chapters instead of the seven of the Mishnah; and the eighth paragraph of the sixth chapter of the Mishnah corresponds to the beginning of the eighth chapter of the Tosefta.

Demai and Metuḳḳan.

There is no Babylonian Gemara on the treatise "Demai," which found no practical application in Babylon; but the Jerusalem Gemara is very rich in information concerning the produce of Palestine. There occur many names of fruits and vegetables in addition to those mentioned in the Mishnah; names of places in and outside Palestine; and information about the markets. There seem to have been inspectors, who distinguished between that which was metuḳḳan and the demai; there were also appointed officers who watched the sale of articles of food and kept the prices low.

A few haggadic passages are interspersed. Thus, the conscientiousness of R. Phinehas, son of Jair, with regard to the laws of tithes is fully described; and with it other acts of piety by the same rabbi are related. Among the latter is the following: Two poor men left with R. Phinehas two seah of barley. He sowed the barley and gathered in the harvest. After a time the men came back and asked for their barley, when they found that through the action of the rabbi the two seah had increased to several camel-loads.

Noteworthy is the fact that a ḥaber on being appointed tax-gatherer lost his status as ḥaber.

DEMANDS: In law the rights which a person has to recover money or things of value from others, whether by contract or for wrongs sustained. In the Bible נשה is applied to the debit as well as to the credit. The Mishnah, when speaking of demands as a kind of property, generally names שטרות ("bonds") as being the most valuable; and a single demand is often called מלוה ("a loan").

The incidents of demands are these: (1) Can they be transferred? If so, how and with what effect? (2) To whom do they pass at the owner's death? Do they survive him? (3) Do they survive against the debtor's or wrong-doer's heirs? (4) How are they extinguished without satisfaction?

Transference of Demand.

1. The first question is answered under Alienation. It may be added that though the sages have found means to bring about the transfer of contractual demands, the Talmud nowhere alludes to the assignment of claims arising from torts to either person or property. Where the demand savors of tort, an attorney to bring suit ("mursheh") could not be appointed, even in later times, when the leave to appoint attorneys had been extended; for the letter of attorney took the form of a partial assignment. The claim for an admitted deposit could be assigned, the thing deposited itself being assigned (B. Ḳ. 70a; "Yad," Sheluḥin, iii. 6, 7; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 123, 1).

2. At the owner's death his estate, both landed and movable, together with his demands, goes to his heirs; and they may sue for and collect all demands. The debtor, or person bound by a wrongful act, must pay them. This applies to the value of goods taken by force or embezzlement, and to the one-fifth in addition due under some circumstances by way of atonement (B. Ḳ. ix. 5), and to the double or greater compensation due by the thief or faithless depositary ("Yad," Genebah, ii. 6). Likewise the party who has made himself liable for injury to property must, if the owner die before recovery of damages, pay his heirs, as the injured person is considered in the light of a creditor ("Yad," Nizḳe Mamon, viii. 11).

On Estate of a Deceased Person.

3. It has been shown under the head of Debts of Decedents how far the assets left by a debtor are subjected to his obligations. It is shown under Robbery how such assets are liable for the value of goods taken by force. They would in like manner be bound for the single value of goods stolen; also for all damages to property, whether done wilfully or by negligence (*ib.* viii. 11, 12). Neither Talmud nor either of the codes mentions the liability of heirs for injuries to the person committed by their ancestor; but it may be inferred, from the enumeration of the differences between injuries to property and injuries to the person (B. Ḳ. viii. 7; "Yad," Ḥobel, v. 9, 11), in which there is no mention of injuries arising from the death of the wrong-doer, that here also the heirs are bound to the extent of assets left.

As shown under Debts of Decedents, the procedure against the heirs is clogged with many hindrances; but, in theory, it seems that all demands survive against the heirs of the party under obligation.

4. A demand can not be extinguished by mere lapse of time. There is no statute of limitations, except the Scriptural law of the year of release, which was never in force outside the Holy Land, and even there was practically abrogated in the days of Hillel. The Ḥazaḳah is nothing but a presumption arising from lapse of time, always subject to rebuttal. Any demand may, however, be extinguished by a voluntary release (מחילה); and, as a rule, this act does not need a formal transfer of title (קנין), though in many places it was customary to clothe it in such forms ("Yad," Mekirah, v. 11, 12). Compare Robbery.

The liability of the heirs for personal damages—or the survival of such demands against the tortfeasor's heirs—was hardly ever a practical question; because the liability of the heirs for anything but the bond debts (what the common law calls "specialty debts") of the ancestor was established only a short time before the Jewish courts, for lack of ordained judges, lost their jurisdiction in actions for personal injury. See Debts of Decedents, *sub fine.*

L. G. L. N. D.

DEMBITZ, LEWIS NAPHTALI: American lawyer, scholar, and author; born Feb. 3, 1833, at Zirke, in the province of Posen, Prussia; educated at the gymnasia of Frankfort-on-the-Oder, Sagan, and Glogau, in Prussia, and attended the law course for one semester in Prague. He then studied American law in offices at Cincinnati, Ohio, and Madison, Ind. After doing journalistic work for a time, he began in 1853 the practise of law at the bar of Kentucky, in Louisville, which practise he has continued uninterruptedly ever since. Dembitz was a delegate to the National Republican Convention of 1860, assistant city attorney of Louisville, 1884–88, and is (1901) a commissioner for Kentucky to the Conference for the Uniformity of State Laws.

In 1888 Dembitz drafted the first Australian ballot law ever adopted in the United States, to govern elections in Louisville. His legal works include: "Kentucky Jurisprudence," 1890; "Law Language for Shorthand Writers," 1892; and "Land Titles in the United States," 2 vols., 1895. He is the author of "The Question of Silver Coinage," in the "Present Problem Series," 1896, No. 1; and has written a number of book-reviews for "The Nation," 1888–97, besides articles in other magazines and in newspapers.

Dembitz is strongly attached to conservative Judaism. He was one of the early members of the executive board of the Union of American Hebrew Congregations, and in 1878 a member of the commission on the plan of study for the Hebrew Union College. In 1898 he acted as chairman at a convention of Orthodox congregations, and was elected a vice-president of the Orthodox Jewish Congregational Union of America. In addition to memoirs, articles, and addresses which have appeared in Jewish papers, he has published "Jewish Services in Synagogue and Home," 1898; "The Lost Tribes," in the "Andover Review," Aug., 1889; and has revised Exodus and Leviticus for the new translation of the Bible to be issued by the Jewish Publication Society of America. A.

DEMBITZER, ḤAYYIM NATHAN: Galician rabbi and historian; born in Cracow June 29, 1820; died there Nov. 20, 1892. His father, Jekuthiel Solomon, a scholarly merchant who claimed he was a descendant of R. Moses Isserles, died in 1833, aged forty-one. While diligently occupied with his Talmudical studies, he came across the "Ẓemaḥ Dawid," a chronological work by David Gans, which aroused his interest in Jewish biography and history. He received his ordination as rabbi from Solomon Kluger, Hirsch Chajes, and Berish Meisels, the last-named of whom was rabbi of Cracow until 1854. Dembitzer sided nevertheless with Meisel's rival, Saul Landau, in the quarrel about the rabbinate of Cracow. In 1856 Dembitzer became a dayyan in his native city, and was, like his older brother Jacob, advanced to the position of rosh bet din, which he held till his death. In 1874 he visited Germany and made the acquaintance of Zunz and other Jewish scholars, with whom he corresponded on historical subjects.

Dembitzer's earlier works were all on halakic subjects, on which he was a recognized authority. His "Maginne Ereẓ Yisrael" (responsa, Lemberg, 1852); "Dibre Ḥen," which appeared as a supplement to Solomon Kluger's "'Abodat ha-Ḳodesh" (Zolkiev, 1863); and "Liwyat Ḥen" (Cracow, 1882) belong to that class. But the last-named, a critical commentary on the work "RABYH" of Eliezer b. Joel ha-Levi, which Dembitzer published from a manuscript, contains much valuable material for the history of the Tosafists, which is interspersed among the pilpulistic arguments of the main subject. His chief historical work, "Kelilat Yofi," of which the first part, containing biographies of the rabbis of Lemberg and of other Polish communities, appeared in 1888, and the second part, also biographical and historical, in 1893 (Cracow), is an important contribution to the science of Judaism. He is also the author of "Miktebe Biḳḳoret," a valuable correspondence with the historian Grätz about the Council of Four Lands ("Oẓar ha-Sifrut," iv. 193–243; also published separately, Cracow, 1892), and of a biography of the Tosafist Joseph Porat, which appeared posthumously in "Ha-Ḥoker," ii. 48–59. The "Mappelet 'Ir ha-Ẓedek" (1878), a severe and vindictive criticism of J. M. Zunz's "'Ir ha-Ẓedek" on the rabbis of Cracow, was likewise written by him, although the name of Joel Dembitzer, his younger brother, appears on the title-page as the nominal author.

DEMBO, ISAAC: Russian physician; born at Poneviezh, government of Kovno, in 1846. Dembo studied Hebrew and rabbinical literature under the direction of Samuel Salant and other Talmudic authorities until the age of fourteen, when he devoted himself to secular studies, and in 1870 graduated as M.D. from the University of St. Petersburg. He served as physician in several hospitals, and in 1877, on the outbreak of the Russo-Turkish war, enlisted in the medical department of the army. He was awarded a medal for his services. In 1881–82 he traveled in Germany and France, and on his return to St. Petersburg was appointed physician to the Alexandrowski Hospital. In 1888 the government bestowed upon him the title of "privy councilor."

Dembo turned his attention to the scientific study of the slaughtering of animals according to the Jewish rite. In Switzerland and in Germany attempts had been made to secure the prohibition of the Jewish method, on the plea that it caused the animals unnecessary pain. After investigating the matter and studying all the current methods of slaughtering in Russia and abroad, Dembo arrived at the conclusion that the Jewish method caused less pain than any other. He communicated his results to the leading scientists (who agreed with him on the matter) and to the governments interested. Dembo published two works on this subject; namely, "Anatomisch-Physiologische Grundlagen der Verschiedenen Methoden des Viehschlachtens," Leipsic, 1894; and "Das Schlachten im Vergleich mit Anderen Schlachtmethoden vom Standpunkte der Humanität und Hygiene," *ib.* 1894. The latter work was translated into Hebrew under the title "Ha-Sheḥiṭah weha-Bedikah," Warsaw, 1896.

DEMBOWSKI, NICOLAS. See Baruch Yavan; Frankists; Kamenetz-Podolsk.

DEMETRIUS: Son-in-law of King Agrippa I. When Mariamne II., daughter of Agrippa I. and sister of Agrippa II., had put away Archelaus, the son of Chelcias, she married Demetrius, who was by birth and wealth among the foremost Jews of Alexandria, and held the office of alabarch about the year 49 c.e. By him Mariamne had a son, Agrippinus. The assumption that Demetrius was the son of Alexander, and hence the brother of the apostate Tiberius Alexander, is unfounded, and is not supported by Josephus. He probably belonged to the priestly family of Onias.

DEMETRIUS: Chronicler; supposed to have lived at Alexandria in the third century b.c. In a work entitled Περί 'Ιουδαίων ("About Jews"), containing extracts from foreign authors, Alexander Polyhistor (80–40 b.c.) quotes fragments of Demetrius' chronicles; and these were inserted by Eusebius in his "Præparatio Evangelica" (ix. 17–39).

The first excerpt deals with the history of Jacob from the time of his emigration to Mesopotamia till his death. Demetrius endeavors to establish the Biblical chronology and gives the date of every incident in Jacob's life, even fixing the year and month in which each of Jacob's children was born. The excerpt concludes with the genealogy of Levi back to the birth of Aaron and Moses.

The second fragment is an extract from the history of Moses, laying stress on the genealogy of Jethro in order to demonstrate that Zipporah, the wife of Moses, was a descendant of Abraham and Keturah.

The third excerpt gives an account of the sweetening of the water of Marah (Ex. xv. 23).

Another fragment was preserved by Clemens Alexandrinus ("Stromata," i. 21, 141), who gives the title of Demetrius' chronicles as *Περὶ τῶν ἐν τῇ Ἰουδαίᾳ Βασιλέων*. This fragment endeavors to determine exactly the period of the exile of the Ten Tribes, and that of the tribes of Judah and Benjamin till Ptolemy IV. (222–205 B.C.), in whose reign the chronicler evidently lived.

From the orthography of proper names, and from various expressions used, it is evident that Demetrius used the Septuagint, not the Hebrew Bible. For the determination of certain dates he relied on the Biblical exegesis in use among the Palestinian Jews. Josephus used Demetrius' chronicles for his "Antiquities," and adopted his chronological system.

J. I. BR.

DEMETRIUS I. SOTER: King of Syria 162–150 B.C.; son of Seleucus IV. Philopator. He was sent by his father as a hostage to Rome in place of Antiochus Epiphanes, after whose death he demanded in vain of the Senate that he be acknowledged as his father's successor. Later he again demanded the throne; and, being met with a refusal, he fled with the aid of Polybius to Tripoli, where he was given a cordial reception. He soon obtained possession of Antioch, but could not win the sympathies of the Romans. On the contrary, the Roman Senate permitted the satrap Timarchus to assume the kingly title. Timarchus succeeded, with the aid of Artaxias of Armenia, in conquering the whole of Babylonia, ruling it in a cruel manner. At length he was defeated by Demetrius, whom the Babylonians on that account called "Soter" (Redeemer).

In 162 Demetrius appointed Alcimus high priest of the Jews, and, after the expulsion of the latter, endeavored to have him reinstated; but Nicanor, the general sent for this purpose, was killed in battle (161). Another of Demetrius' generals, Bacchides, succeeded in vanquishing Judas Maccabeus in 160; Jonathan, however, was able to stand his ground, and in 157 he made peace with Bacchides, although he was compelled to tolerate Syrian garrisons in Jerusalem and other places.

Owing to his pride and severity, Demetrius was much hated by the Syrians. He was greatly addicted to drink, and Josephus reproaches him with frivolity and laziness. In 153 Alexander Balas, recognized and supported by the Senate, and aided by Attalus II. and Ptolemy Philometor, appeared with an army in Syria, and captured Ptolemais through treason. Demetrius' own men deserted him; and the Jews, too, whom Alexander Balas had won over with large presents, withdrew their allegiance. Demetrius was compelled to withdraw the troops from the Jewish localities, with the exception of Jerusalem and Beth-Zur, and to concentrate his forces against Balas. In the decisive battle Demetrius fell.

G. H. BL.

DEMETRIUS II. NICATOR: King of Syria; son of Demetrius Soter. He was sent to Rome by his father as hostage for his fidelity. It was intended that he should work there against Alexander Balas, whose cause was promoted by Heraclides. He could achieve nothing, however. After the death of his father he set out in 147 with an army of mercenaries against Balas, who fled to Antioch. He was aided in this by Appolonius, the governor of Cœle-Syria, against whom, however, the high priest Jonathan made successful war. In the decisive battle at Antiochia on the Ainoparus (146), Alexander Balas was defeated by Demetrius and his own father-in-law, Ptolemy Philometor, who had become reconciled with Demetrius. Balas was killed during his flight, and Ptolemy Philometor died of a wound received in the battle. Demetrius now assumed the surname "Nicator." He confirmed the high priest Jonathan, on the payment of a tribute of 300 talents, in his dignity, and in the possession of the three districts of Lydda, Ephraim, and Ramathaim, which had been severed from Samaria. Nor had he cause to regret the act; for when the disbanded native soldiers rose in revolt against Demetrius, Jonathan sent to his aid an army of 3,000 Jews. With this army and his own mercenaries, Demetrius suppressed the dangerous uprising.

Demetrius, however, did not fulfil his promise to withdraw the Syrian garrisons from the fortresses in Judea; on the contrary, he demanded of Jonathan the payment of all the tributes which had been due to his predecessors, but which had not been paid. Under these circumstances, the uprising which was kindled by Diodotus on behalf of the young son of Alexander Balas, Antiochus VI. Dionysus, and which was provoked by the barbarities of Demetrius, came very opportunely. Demetrius was defeated; but found refuge in Seleucia, which remained faithful to him at all times. In the mean time Jonathan stood his ground against the generals of Demetrius, and in conjunction with Simon conquered southern Syria. After the murder of Jonathan, in which Diodotus shared the fortunes of Demetrius improved. The Jews deserted Diodotus, who had forfeited their sympathies not only by this murder, but also because he had removed Antiochus VI. and had usurped the throne under the name of "Tryphon." Demetrius recognized Simon as high priest and ethnarch.

Soon afterward Demetrius commenced a war against the Parthians, but after several victories was finally defeated and taken prisoner by a Parthian general of Mithridates I. (140). He was released only after his younger brother, Antiochus Sidetes, fought a successful battle against the Parthian.

Upon the death of Antiochus, Demetrius again became ruler; and he had begun planning a fresh subjugation of the Jews, when he decided to make war on Ptolemy Euergetes II. of Egypt. He marched as far as Pelusium, but turned back, because, being without confidence in his army, he did not dare to engage in battle. In revenge Ptolemy set up Alexander Zabina against Demetrius (128), and several Syrian cities thereupon freed themselves from Demetrius' control. In 125 he was defeated near Damascus, and was killed at the instigation of his first wife, Cleopatra, who hated him because, during his Parthian captivity, he had married a daughter of the Parthian king.

DEMETRIUS III. EUCERUS: King of Syria; son of Antiochus Grypus. He was pretender to the throne of Antiochus X., whom he supplanted in 95 B.C. after a severe struggle. He divided the authority with his brother Philip, keeping to himself apparently Cœle-Syria. In the year 88 the Jews appealed to him for aid against their king, Alexander Jannæus, who was subsequently defeated. But thousands of Jews renewed their allegiance to their defeated king, probably out of a well-founded apprehension that Demetrius would again subject them to the Syrian rule. Demetrius was taken prisoner in a battle against his brother Philip, and died in captivity.

DEMIDOV, PAVEL PAVLOVICH: Prince of San-Donato, Russian jurist, and philanthropist; born in 1839; died in 1885. He was a member of a well-known Russian family of nobles whose pedigree is traced as far back as 1672. Soon after his graduation from the faculty of jurisprudence of the University of St. Petersburg, he was attached to the Russian embassy at Paris, and later to the embassy at Vienna. From 1871 to 1876 he served as mayor of Kiev.

During the Russo-Turkish war (1877–78) Demidov chose to follow the army as the authorized agent of the Society of the Red Cross, rather than to be a leader of soldiers with more warlike purposes. Of a peaceful and peace-loving disposition, and with a pronounced predilection for literary work, he cared for achievements foreign to those of the ambitious belligerents, and his name is accordingly associated with deeds of philanthropy. Through these years he remained unknown beyond the narrow circle of family, relatives, and personal acquaintances. In 1883, two years before his untimely death, he came suddenly into prominence by the publication of his work, "The Jewish Question in Russia," which was well received. In addition to a very sympathetic though somewhat cursory review of the history of the Jews in Russia, beginning with the first division of Poland, it contains an able analysis of the political and social status of the Jew and of his economic condition and statutory rights, or, more precisely, absence of rights. This analysis proved not only that the author was sufficiently broad-minded and large-hearted to free himself of all popular prejudices, but that he had both the will and the ability to dig deep, reaching here and there the very roots of this social evil. Demidov's solution of the vexed question may be expressed in the demand of equal rights for the Jews and the reorganization and increase of their educational facilities. The abolition of the "Pale of Settlement," the right to live and do as it is accorded to all other Russian subjects, the right to attend any public school upon the same basis as the Christian population, and other privileges, are demanded by the author on the ground of the central idea which he so ably maintains; namely, that the Jew is a desirable and able citizen, all claims to the contrary notwithstanding. He asserts that the peculiarly Jewish exploitation is a fiction; that the exclusiveness of the Jew is as hateful to the Jew himself as is any form of bondage to man; that his commercial ability is useful to the buyer in the Pale of Settlement, as it reduces by sharp competition the profit of the seller, thus on the whole benefiting the public; and, finally, that the much-bewailed baneful influence exerted by the Jew on the Christian poor by his selling intoxicants to the latter, has been exaggerated out of all proportion, as is demonstrated by an array of facts and statistics bearing upon the question and establishing that, beyond all possible doubt, the curse of intemperance is felt considerably more outside the Pale than within it.

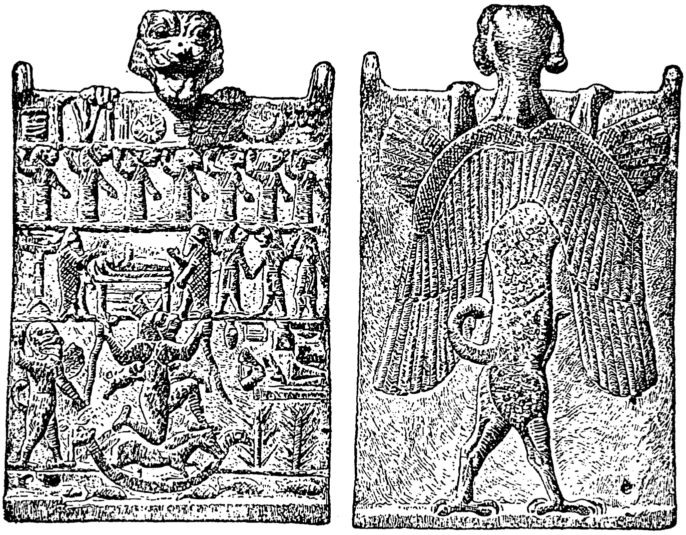
DEMONIACS IN BIBLE AND TALMUD. See Exorcism.

DEMONOLOGY.—Biblical and Post-Biblical Data: Systematic knowledge concerning demons or evil spirits. Demons (Greek, *δαίμονες* or *δαιμόνια*; Hebrew, שדים [Deut. xxxii. 17; Ps. cvi. 37] and שעירים [Lev. xvii. 7; II Chron. xi. 15; A. V. "devils"; Luther, "Feldgeister" and "Feldteufel"]; Aramaic, or rabbinical, מזיקין and רוחין בישין), as spirits animating all elements of life and inhabiting all parts of the world, have their place in the primitive belief of all tribes and races. When certain deities rose to be the objects of regular worship and became the rulers of the powers of life, demons, or spirits, were subordinated to them. But inasmuch as they were still feared and occasionally worshiped by the populace, they became the objects of popular superstition. Jewish demonology can at no time be viewed as the outcome of an antecedent Hebrew belief. While the nomadic Hebrews had much in common with the Arabian Bedouins in their belief in spirits (see Wellhausen, "Reste Arabischen Heidenthums: Skizzen und Vorarbeiten," 1887, iii. 135 *et seq.*; Smith, "Rel. of Sem." 1889, pp. 112–125, 422 *et seq.*), Canaanite practise and belief were greatly influenced by ancient Chaldea, whose demonology is in the main pre-Semitic (see Lenormant, "Chaldean Magic," 1877, pp. 23–38; German transl., 1878, pp. 22–41; Jastrow, "Religion of Babylonia and Assyria," pp. 260 *et seq.*; Zimmern, in Schrader's "K. A. T." 1902, ii. 458–464). In Babylonia the Jews came under the influence of both the Chaldean and the Persian belief in good and in evil spirits, and this dualistic system became a dominant factor of Jewish demonology and Angelology. In Europe, Teutonic, Celtic, and Slavonic demonology in the form of superstition permeated Jewish practise and belief. See Superstition.

Demons in the Bible.

The demons mentioned in the Bible are of two classes, the "se'irim" and the "shedim." The se'irim ("hairy beings"), to which the Israelites sacrificed in the open fields (Lev. xvii. 7; A. V. "devils"; R. V., incorrectly, "he-goats"), are satyr-like demons, described as dancing in the wilderness (Isa. xiii. 21, xxxiv. 14; compare Maimonides, "Moreh," iii. 46; Vergil's "Eclogues," v. 73, "saltantes satyri"), and are identical with the jinn of the Arabian woods and deserts (see Wellhausen, *l.c.*, and Smith, *l.c.*). To the same class belongs Azazel, the goat-like demon of the wilderness (Lev. xvi. 10 *et seq.*), probably the chief of the se'irim, and Lilith (Isa. xxxiv. 14). Possibly "the roes and hinds of the field," by which Shulamit conjures the daughters of Jerusalem to bring her back to her lover (Cant. ii. 7, iii. 5), are faun-like spirits similar to the se'irim, though of a harmless nature. The אבני השדה (Job v. 23, A. V. "stones of the field"), with which the righteous are said to be in league—obviously identical with, if not a corruption of, the אדני השדה (Mishnah Kil. viii. 5), explained in Yer. Kil. 31c as בר נש דטור, "a fabulous mountain-man drawing nourishment from the ground" (see Jastrow, "Dict.," and Levy, "Neuhebr. Wörterb." *s.v.* אדני)—seem to be field-demons of the same nature. The wilderness as the home of demons was regarded as the place whence such diseases as leprosy issued, and in cases of leprosy one of the birds set apart to be offered as an expiatory sacrifice was released that it might carry the disease back to the desert (Lev. xiv. 7, 52; compare a similar rite in Sayce, "Hibbert Lectures," 1887, p. 461, and "Zeit. für Assyr." 1902, p. 149).



The Nether World in the Clutches of a Demon.
(From an Assyrian bronze tablet in the collection of M. de Clerq.)

The Israelites also offered sacrifices to the shedim (Deut. xxxii. 17; Ps. cvi. 37). The name שד (believed by Hoffmann, "Hiob," 1891, to occur in Job v. 21), for a long time erroneously connected with "the Almighty" (שדי), denotes a storm-demon (from שוד, Isa. xiii. 6; A. V. "destruction"; compare Ps. xci. 6, ישוד, "that stormeth about"; A. V. "that wasteth"). In Chaldean mythology the seven evil deities were known as "shedim," storm-demons, represented in ox-like form; and because these ox-colossi representing evil demons were, by a peculiar law of contrast, used also as protective genii of royal palaces and the like, the name "shed" assumed also the meaning of a propitious genius in Babylonian magic literature (see Delitzsch, "Assyrisches Handwörterb." pp. 60, 253, 261, 646; Jensen, "Assyr.-Babyl. Mythen und Epen," 1900, p. 453; Sayce, *l.c.* pp. 441, 450, 463; Lenormant, *l.c.* pp. 48–51). It was from Chaldea that the name "shedim" = evil demons came to the Israelites, and so the sacred writers intentionally applied the word in a dyslogistic sense to the Canaanite deities in the two passages quoted. But they also spoke of "the destroyer" (המשחית, Ex. xii. 23) as a demon whose malignant effect upon the houses of the Israelites was to be warded off by the blood of the paschal sacrifice sprinkled upon the lintel and the door-post (a corresponding pagan talisman is mentioned in Isa. lvii. 8). In II Sam. xxiv. 16 and II Chron. xxi. 15 the pestilence-dealing demon is called מלאך המשחית = "the destroying angel" (compare "the angel of the Lord" in II Kings xix. 35; Isa. xxxvii. 36), because, although they are demons, these "evil messengers" (Ps. lxxviii. 49; A. V. "evil angels") do only the bidding of God, their Master; they are the agents of His divine wrath.

But there are many indications that popular Hebrew mythology ascribed to the demons a certain independence, a malevolent character of their own, because they are believed to come forth, not from the heavenly abode of Yhwh, but from the nether world (compare Isa. xxxviii. 11 with Job xiv. 13; Ps. xvi. 10, xlix. 16, cxxxix. 8). "The first-born of Death who devours the members of his [man's] body" and causes him to be brought "to the king of terrors" (Job xviii. 13, 14, Hebr.), is undoubtedly one of the terrible hawk-like demons portrayed in the Babylonian Hades-picture (see illustration above, and Roscher, "Lexikon der Griechischen und Römischen Mythologie," *s.v.* "Nergal"), and the "messengers of death" (Prov. xvi. 14) are identical with the "servants of Nergal," the King of Hades and god of pestilence and fever in Chaldean mythology (see Jeremias, "Die Babylonisch-Assyrischen Vorstellungen vom Leben nach dem Tode," 1887, pp. 71 *et seq.*; Zimmern, *l.c.* pp. 412 *et seq.*; Jensen, *l.c.* pp. 478, 557).

Other Demons.

'Alukah (Prov. xxx. 15; A. V. "horseleech"), the bloodsucker or vampire, whose two daughters cry "Give! Give!" is none other than the flesh-devouring ghoul of the Arabs, called by them "'aluḳ" (Wellhausen, *l.c.* pp. 135–137). She has been rendered in Jewish mythology the demon of the nether world (= גיהנם; see 'Ab. Zarah 17a), and the names of her two daughters have in all probability, as familiar names of dreaded diseases, been dropped (compare Ewald, Delitzsch, and Wilderboer's commentaries, *ad loc.*, and the description of the demon "Labartu" in "Zeit. für Assyr." 1902, pp. 148 *et seq.*). Deber ("pestilence"), originally the death-dealing sting of the midsummer sun-god Nergal (see Roscher, *l.c.* iii. 257), and Ḳeṭeb ("smiter"), the deadly hot wind (Deut. xxxii. 24; Isa. xxviii. 2; A. V. "destruction," "destroying"), are demons, the one walking in darkness, the other storming along in midday (A. V. "that wasteth at noonday"), against which God's protection is invoked in the incantatory psalm "Shir shel Pega'im," ascribed to Moses by the Rabbis (Ps. xci. 5, 6; compare Midr. Teh. *ad loc.*; Tan., Naso, ed. Buber, 39; Num. R. xii.). Possibly the evil spirit that troubled Saul (I Sam. xvi. 14 *et seq.*) was originally a demon (compare Josephus, "Ant." vi. 8, § 2), turned into an evil spirit coming from YHWH in the amended Masoretic text (see Smith, Commentary, *ad loc.*). None of these demons, however, has actually a place in the system of Biblical theology; it is the Lord who sends pestilence and death (Ex. ix. 3, xii. 29); Deber and Reshef ("the fiery bolt") are His heralds (Hab. iii. 5). The shedim are "not-gods" (Deut. xxxii. 17); there is no supernatural power beyond YHWH (Deut. iv. 35; compare Sanh. 67b). It is possible, however, that, as at a later stage in the development of Judaism the idols were regarded as demons, so the Canaanite deities were, either in disparagement, or as powers seducing men to idolatry, called "shedim" by the sacred writers (Deut. xxxii. 17; Ps. cv. 37); all the more so as the latter ascribed a certain reality to the idols (Ex. xii. 12; Isa. xix. 1, xxiv. 21; see Baudissin, "Studien zur Semitischen Religionsgesch." 1876, i. 130).

——**In Rabbinical Literature:** It was the primitive demonology of Babylonia which peopled the world of the Jews with beings of a semi-celestial and semi-infernal nature. Only afterward did the division of the world between Ahriman and Ormuzd in the Mazdean system give rise to the Jewish division of life between the kingdom of heaven and the kingdom of evil. Rabbinical demonology has, like the Chaldean, three classes of demons, though they are scarcely separable one from another. There were the "shedim," the "mazziḳim" (harmers), and the "ruḥin" or "ruḥot ra'ot" (evil spirits). Besides these there were "lilin" (night spirits), "ṭelane" (shade, or evening, spirits), "ṭiharire" (midday spirits), and "ẓafrire" (morning spirits), as well as the "demons that bring famine" and "such as cause storm and earthquake" (Targ. Yer. to Deut. xxxii. 24 and Num. vi. 24; Targ. to Cant. iii. 8, iv. 6; Eccl. ii. 5; Ps. xci. 5, 6; compare Ps. lxx. and Is. xxxiv. 14). Occasionally they are called "mal'ake ḥabbalah" (angels of destruction) (Ber. 51a; Ket. 104a; Sanh. 106b). "They surround man on all sides as the earth does the roots of the vine"; "a thousand are on his left, and ten thousand on his right side" (compare Ps. xci. 7); if a man could see them he would lack the strength to face them, though he can see them by casting the ashes of the fetus of a black cat about his eyes, or by sprinkling ashes around his bed he can trace their cock-like footprints in the morning (Ber. 6a). They hover around the house and the field (Gen. R. xx.), particularly in the lower regions of the air (Num. R. xii.; Tan., Mishpaṭim, ed. Vienna, 99a; compare Diogenes Laertius, viii. 32, ix. 7). Their main abode is in the northern part of the earth (Pirḳe R. El. iii., after Jer. i. 14). Their sporting-places are caper-bushes and spearworts, where they dwell in groups of sixty; nut-trees, where they form in groups of nine; shady spots on moonlight nights, especially the roofs of houses, under gutters, or near ruins; cemeteries and privies (there is a special demon of the privy, "shed shel bet ha-kisse"); water, oil, and bread-crums cast on the ground; and they harm persons and things coming near them (Pes. 3b; Ber. 3a, 62b; Shab. 67a; Giṭ. 70a; Ḥul. 105; Sanh. 65b).

Time and Place of Appearance.

R. Johanan knew of 300 kinds of shedim living near the town of Shiḥin (Giṭ. 68a). It is dangerous to walk between two palm-trees (Pes. 111a). Demons are particularly hurtful at night. It is unsafe to salute a person in the dark, for he might be a demon (Meg. 3a); to sleep alone in a house, as Lilith may seize one (Shab. 151b); to walk alone in the night or in the morning before cockcrow (Ber. 43a; Yoma 21a; compare COCK); to take water from one whose hands have not been washed in the morning (Ber. 51a). Especially dangerous are the eves of Wednesday and of the Sabbath, for then Agrat bat Maḥlat, "the dancing roof-demon" (Yalḳut Ḥadash, Keshafim, 56), haunts the air with her train of eighteen myriads of messengers of destruction, "every one of whom has the power of doing harm" (Pes. 112b). On those nights one should not drink water except out of white vessels and after having recited Ps. xxix. 3–9 (the verses mentioning seven times "the voice of the Lord") or other magic formulas (Pes. 3a). Another perilous season is midsummer noon from the 17th of Tammuz to the 9th of Ab. Then the demon Ḳeṭeb Meriri reigns from ten in the forenoon to three in the afternoon. He has the head of a calf, with one revolving horn in the middle, and an eye on the breast, and his whole body is covered with scales and hair and eyes; and whosoever sees him, man or beast, falls down and expires (Pes. 3b; Lam. R. i. 3; Midr. Teh. to Ps. xci. 3; Num. R. xii.). Demons assume the shape of men, but have no shadow (Yeb. 122a; Giṭ. 66a; Yoma 75a). At times they are black goat-like beings (שעירים; Ḳid. 72a); at other times, seven-headed dragons (Ḳid. 29a). "Like angels, they have wings and fly from one end of the world to the other, and know the future; and like men they eat, propagate, and die" (Ḥag. 16b; Ab. R. N. xxxvii.). They cause the faintness of students and the wear and tear of their dress in the schoolhouses and assemblies of the learned (Ber. 6a). But they are not always malign spirits. As they, by virtue of their semi-celestial nature, can overhear the decrees of heaven, they may be consulted by men as to the future; this can be done by means of oil and eggshells; only on Sabbath is this forbidden (Shab. 101a). Hillel and Johanan ben Zakkai understood their talk just as King Solomon did (Mas. Soferim, xvi. 9; B. B. 134a; Suk. 28a; Giṭ. 68b; Ker. 5b; Pesiḳ., ed. Buber, 45b).

The saint Abba Jose of Zaintor saved his town from harm, when informed by a water-demon living near by that a harmful fellow demon made his dwelling there, by causing the inhabitants to go down to the water's edge at dawn, equipped with iron rods and spits, and beat the intruder to death; blood marked the spot where he was killed (Lev. R. xxiv.). The magicians in Egypt made use of demons to perform their miracles, as all witchcraft is the work of demons (Sanh. 67b; 'Er. 18b; Ex. R. ix.), though demons can not create, but only transform existing things (Sanh. 67b). Egypt was considered the stronghold of such witchcraft as worked by means of demons (Ḳid. 49b; Shab. 104b; Men. 85a; Tan., Wayera, ed. Buber, 17, 27; Tosef., Shab. xi. 15; compare Friedländer, "Sittengesch. Roms," i. 362, iii. 517). Some of the Babylonian amoraim employed shedim as friendly spirits, and received useful instruction from them, calling them by familiar names, such as "Joseph" or "Jonathan" (Pes. 110a; Ḥul. 105b; Yeb. 122a; 'Er. 43a; regarding יונתן שרא see Schorr in "He-Ḥaluẓ," 1865, p. 18). Demons were regarded by antiquity as beings endowed with higher intelligence (see Friedländer, *l.c.* iii. 562). They were said to have been created at the twilight of the Sabbath (Abot v. 9); "after the souls were created the Sabbath set in, and so they remained without bodies" (Gen. R. vii.).

Nature of Demons.

In the main demons were workers of harm. To them were ascribed the various diseases, particularly such as affect the brain and the inner parts (compare Rhode, "Psyche," 1894, p. 358). Hence there was a constant fear of "Shabriri" (lit. "dazzling glare"), the demon of blindness, who rests on uncovered water at night and strikes those with blindness who drink of it (Pes. 112a; 'Ab. Zarah 12b); "ruaḥ ẓeradah," the spirit of catalepsy, and "ruaḥ ẓelaḥta," also "ruaḥ palga," the spirit of headache (megrim or meningitis?), hovering on palm-trees (Pes. 111b; Ḥul. 105b; Giṭ. 68b); "ben nefilim," the demon of epilepsy, and "ruaḥ ḳeẓarit," the spirit of nightmare (Bek. 44b; Tosef., Bek. v. 3; Schorr, in "He-Ḥaluẓ," 1869, p. 15); "ruaḥ tezazit," the spirit of delirious fever and madness, befalling man and beast (Pesiḳ., Parah, 40a; Yer. Yoma viii. 45b; Yoma 83b; Gen. R. xii.: see Aruch and Dictionaries, *s.v.* תזז); "ruaḥ ẓara'at," the spirit of leprosy (Ket. 61b); "ruaḥ ḳardeyaḳos," the spirit of melancholy (καρδιακός; Giṭ. vii. 1, p. 67b; Yer. Giṭ. 48c); "shibbeta," a female demon, bringing croup to persons, especially children, who leave their hands unwashed in the morning (Ḥul. 107b; Ta'an. 20b; Yoma 77b), probably identical with the "bush-asp," the Parsee demon "with long hands," who lulls men to sleep and attacks them ("Vendidad," xviii. 38; "Bundahish," xxviii. 26); "bat ḥorin" (daughter of freedom; possibly a play on "ḥiwar," a euphemistic expression for blindness), a demon bringing a disease of the eye to one who fails to wash his hands after meals (see Brüll's "Jahrb." i. 157); "kuda," a demon of disease which attacks women in childbirth ('Ab. Zarah 29a); "eshshata," the demon of fever, (*ib.* 28a; Shab. 66b); "ruaḥ zenunim," the spirit of sexual desire (Pes. 111a); "she'iyyah," an ox-like demon dwelling in desolate houses (B. Ḳ. 21a, after Isa. xxiv. 12); and many others mentioned in Rabbinical lore, only part of which has been preserved in Shab. 66 *et seq.*, 109 *et seq.*: Pes. 109–113; Giṭ. 68–70; Sanh. 67 *et seq.*; see Brüll, *l.c.* i. 154 *et seq.*, who refers also to "puta" or "pura," the spirit of forgetfulness, mentioned in Siddur Rab Amram, i. 31b; see also Blau, "Das Altjüdische Zauberwesen," 1898, pp. 71–85. On the demon "ben temalyon" (probably a euphemism for St. Vitus' dance) see BEN TEMALION; EXORCISM.

These demons were supposed to enter the body and cause the disease while overwhelming ("kefa'o shed," R. H. 28a; Sifre, Debarim, 318) or "seizing" the victim ("aḥazo," Shab. 151b; Yoma 83a, 84a); hence the usual name for "epileptic" is "nikpeh" (Bek. 44b; Yeb. 64b; Ket. 60b; Pes. 112b). The Greek word is δαιμονίζεσθαι, meaning the condition of being in the power of a demon. To cure such diseases it was necessary to draw out the evil demons by certain incantations and talismanic performances, in which the Essenes excelled. Josephus, who speaks of demons as "spirits of the wicked which enter into men that are alive and kill them," but which can be driven out by a certain root ("B. J." vii. 6, § 3), witnessed such a performance in the presence of the emperor Vespasian ("Ant." viii. 2, § 5), and ascribed its origin to King Solomon.

In the Book of Wisdom, Solomon claims to have received from God power over the demons (Wisdom vii. 20). The same power of curing by exorcism such diseases as dumbness, blindness, epilepsy, mania, and fever was exercised by Jesus and his disciples (Matt. viii. 16, ix. 32, xi. 18, xii. 22; Mark i. 25; v. 2 *et seq.*; vii. 32 *et seq.*; ix. 17, 27; Luke iv. 33, 39 *et seq.*; viii. 27; ix. 39; xi. 14; xiii. 11; Acts xvi. 16), as also by their Jewish contemporaries (Acts xix. 13 *et seq.*). It remained for a long time a practise among the early Christians (see Irenæus, "Hæreses," ii. 4, 32; Origen, "Contra Celsum," iii. 24; Friedländer, *l.c.* iii. 572, 634).

King and Queen of Demons.

The demons were believed to be under the dominion of a king or chief, either Ashmodai (Targ. to Eccl. i. 13; Pes. 110a: Yer. Sheḳ. 49b; Lev. R. v., where שידא is a corruption of אשמדאי) or, in the older Haggadah, Samael ("the angel of death"), who kills people by his deadly poison ("sam ha-mawet"), and is called "head of the devils" ("rosh saṭanim"; Deut R. xi.; Pirḳe R. El. xiii.). Occasionally a demon is called "saṭan": "Stand not in the way of an ox when coming from the pasture, for Satan dances between his horns" (Pes. 112b; compare B. Ḳ. 21a). The name "mashḥit" ("destroyer," Ex. xii. 23) seems to refer to the head of the demons in the sentence: "When permission is given to the destroyer to do harm, he no longer discriminates between the righteous and the wicked" (Mek., Bo, 11; B. Ḳ. 60a).

The queen of demons is LILITH, pictured with wings and long flowing hair, and called the "mother of Ahriman" (הורמין B. B. 73b; 'Er. 100b; Nid. 24b). "When Adam, doing penance for his sin, separated from Eve for 130 years, he, by impure desire, caused the earth to be filled with demons, or shedim, lilin, and evil spirits" (Gen. R. xx.; 'Er. 18b), and according to Pseudo-Sirach ("Alphabetum Siracidis," ed. Steinschneider, p. 23) it was Lilith, as Adam's concubine, who bore them (compare "Chronicles of Jerahmeel," ed. Gaster, xxiii. 1). Whether identical with Lilith or not, a more familiar personage, as queen of the demons, is Igarat bat Maḥlat (Num. R. xii.; Pes. 112b), with her chariot and her train of eighteen myriads of demons. According to Yalḳuṭ, Ḥadash, Keshafim, 56, she dances at the head of 478 (= מחלת), and Lilith howls at the head of 480 (= לילית), companies of demons. The cabalists have as a third queen of the demons and wife of Samael, "Na'amah," the sister of Tubal Cain and the "mother of Ashmodai" (Gen. iv. 27; see Beḥai's commentary, and Yalḳuṭ, Reubeni, *ad loc.*). Agrat bat Maḥlat seems to be "the mistress of the sorceresses" who communicated magic secrets to Amemar (compare Pes. 110a, 112b). Yoḥane bat Reṭibi, who, according to Soṭah 22a, prevented women by witchcraft from giving birth to their children, seems to be the same mythical person mentioned by Pliny as "Iotape" or "Lotape" in "Historia Naturalis" (xxx. 1, 2), together with Jannes (Jambres) and Moses (see Reinach, "Texte d'Auteurs Grecs et Romains," 1895, p. 282).

Pre-Talmudic Demonology.

Upon pre-Talmudic demonology new light has been thrown by the "Testament of Solomon," translated by Conybeare in "Jew. Quart. Rev." (1898, xi. 1–45), a work which, notwithstanding many Christian interpolations, is of ancient Jewish origin and related to the "Book of Healing" ("Sefer Refu'ot") ascribed to King Solomon (see Pes. iv. 9; Josephus, *l.c.*; Schürer, "Gesch." iii. 300). In this "Testament" it is told that by the help of a magic ring with the seal of Pentalpha, Lilith-like vampires, Beelzebub, and all kinds of demons and unclean spirits were brought before Solomon, to whom they disclosed their secrets and told how they could be mastered (see Solomon, Testament of). It contains incantations against certain diseases, and specifies the task allotted to each of the chief demons in the erection of the Temple. The latter was a favorite theme of the Haggadists (Pesiḳ. R. vi.; Soṭah 48b; Giṭ. 68a). The later Haggadah ascribed to Moses this power to make the demons work at the erection of the Sanctuary (Pesiḳ. R. iv. 6b; Num. R. xii.); and Solomon's "sword against the fear of the spirits at night" (Cant. R. to iii. 8) was transformed into the magic "sword of Moses" (Pesiḳ. 140a; Pesiḳ. R. 15; Cant. R. iii. 7; Num. R. xi., xii.). Henceforth the magic books of Moses and the "Sword of Moses" (see Dieterich, "Abraxas," 1891, pp. 155, 169 *et seq.*; Gaster, "Sword of Moses," London, 1896) took the place of "Solomon's Testament" in the magic lore of the Jews.

Cosmic Demons.

In the main, demonology among the Jews preserved its simple character as a popular belief, the demons being regarded as mischievous, but not as diabolical or as agencies of a power antagonistic to God. Even Ashmodai, or Asmodeus, the king of demons (Tobit iii. 8, vi. 14, Aramaic version), who kills the seven successive bridegrooms of Sara before their marital union, is but a personification of lust and murder; but there is nothing Satanic—that is, of the spirit of rebellion against God—in him; he is driven out by the recipe prescribed by the angel Raphael, and sent to Egypt and bound by Raphael (Tobit viii. 3). It was only at a certain period and within a certain circle that demonology received its specific character as part of the cosmic power of evil, and in opposition to angelology as part of the cosmic power of good.

Babylonian cosmogony describes the combat of Bel-Marduk with the chaos-monster Tiamat, the sea-dragon, the power of darkness whose defeat is the beginning of the world of light and order. The same monster appears in various Biblical passages as Rahab, the sea-monster; Tannin, the dragon of the sea; and Leviathan, the "crooked serpent" slain by Yhwh "with his sure and great and strong sword" (Isa. xxvii. 1, li. 9; Ps. lxxxix. 10, 11; Job xxvi. 12; Gunkel, "Schöpfung und Chaos," 1895, pp. 30–46 *et seq.*). While this mythological figure became in the course of time a metaphor symbolizing nations like Egypt (Ezek. xxix. 3; Ps. lxxxvii. 4), the monster remained a real being in the popular belief; and inasmuch as this conflicted with the monotheistic system, the battle of God or His angel Gabriel with Leviathan and Behemoth was transformed into a great eschatological drama which ended in the perfect triumph of divine justice (B. B. 75b). The Babylonian Tiamat, as Behemoth and Leviathan, became on the one hand infernal monsters devouring the wicked, and on the other food and cover for the righteous in heaven (see Leviathan). Nevertheless, the Mandæan and Gnostic heresies maintained the belief in these cosmic monsters (Brandt, "Mandäische Schriften," 1893, pp. 144 *et seq.*), and many descriptions of Gehenna in Jewish and Christian literature preserve traces of these "Tartarus-holding" or "watching" demons of the lower regions (see Dieterich, *l.c.* pp. 35, 76 *et seq.*; Eschatology; Gehenna). In fact, the hosts of demons punishing the wicked in Gehenna are in the service of angels of divine justice, and though called "saṭanim" (Enoch xl. 7 *et al.*), belong to the category of angels rather than of demons. According to the Book of Jubilees, Noah learned from the angels (Raphael) the remedies against these diseases, and wrote them in a "Book of Healing" similar to the one ascribed to King Solomon (x. 5–12; Jellinek, "B. H." iii. 155 *et seq.*, xxx. *et seq.*). The host of demons under Satan's direction accordingly seduce all heathen people to idolatry (Jubilees, vii. 27, x. 1, xi. 5, xv. 20, xxii. 17), but the end of Satan will be the healing and resurrection of the servants of the Lord (xxiii. 30).

The speculation regarding the nature and origin of these demons and their leaders led as early as the second pre-Christian century, in those fragments preserved under the name of the Book of Enoch, to the story of the fall of the angels (Enoch, vii.–viii.; lxix.). Like Beelzebub, or Lucifer (Isa. xiv. 12; compare Slavonic Enoch, xxix. 4), two hundred 'Irin or "watchers" fell, attracted by the beauty of the daughters of men (Gen. vi. 4); only tradition obviously differed as to the leader of the rebellious host, whether it was Azazel or Shamḥazai. At any rate, they acknowledged the supremacy of Satan (liii. 3, liv. 6), though occasionally many satans are mentioned (xl. 7 *et al.*), and these fallen angels became "the evil spirits" (xv. 8, xix. 19) who taught mankind all the arts of deception, witchcraft, and sin (vii.–viii., lxix.). But their children, the offspring of this mixture of an earthly and a celestial race, became, when slain, the hybrid race of disembodied spirits or demons doing the work of destruction until the Day of Judgment (xvi. 1). Belial is another name for Satan found in the Book of Jubilees (xv. 33), in Sibyllines (iii. 63), and in Ascension of Isaiah (ii. 4), where he is also called "the prince of injustice" (Sar ha-Masṭemah), who rules over this world. Belial (or Beliar) occurs most frequently in the Testaments of the Twelve Patriarchs. He has "seven spirits of deception" in his service (Reuben, 2), and as author of all evil, "the spirit of hatred, darkness, deception, and error," he is the opponent of God, the "Father of Light," and of His Law (Simeon, 5; Levi, 19; Issachar, 6; Dan, 5; Zebulun, 9; Naphtali, 8; Gad, 4; Joseph, 20), and when "he and his evil spirits are crushed the heathen world will be converted to the belief in the Lord" (Simeon, 7; Zebulon, 9). Under this aspect the world appeared as the arena in which Satan contends with the Lord, the God of life everlasting, until "the great dragon, the old serpent, he that is called Devil and Satan, the deceiver of the whole world, shall be cast down and his angels with him" (Suk. 52a; Assumptio Mosis, xi.; Matt. xxv. 41; Rev. xii. 9).

New Testament Demonology.

The whole Jewish and pagan world at the beginning of the Christian era believed in those magic formulas by which the evil powers of the demons could be subdued, and the Jewish exorcists found a fertile soil everywhere for the cultivation of their Essene notions and their magic. This was the atmosphere in which Christianity arose with the claim of "healing all that were oppressed of the devil" (Acts x. 38), enforcing the recognition by the unclean spirits themselves of the Son of David as the vanquisher of the demons (Mark i. 27, iii. 11). The name of Jesus became the power by which the host of Satan was to be overcome, as Jesus himself had seen "Satan as lightning fall from heaven" (Mark ix. 38, xvi. 17; Matt. xii. 28; Luke x. 18). But there was danger lest the exorcism practised by Gentiles and Jews alike (see Conybeare, "J. Q. R." ix. 88 *et seq.*) should engender the spirit of impurity underlying all magic, the dividing line between legitimate and illegitimate magic being anything but sharply drawn (see Book of Jubilees, viii. 2; Sanh. 91a: "Abraham handed the name of unclean witchcraft to the sons of Keturah"; compare Blau, "Das Jüdische Zauberwesen," pp. 15, 23, 41 *et seq.*). It was, therefore, not hostility which prompted the Pharisees to accuse Jesus and his disciples of "casting out devils by the power of Beelzebub, the prince of devils" (Matt. xii. 24; compare Ben Stada, Shab. 104b). The more devils cast out, the more appeared (Luke xi. 26). The cure offered to an age in constant dread of demons (Acts v. 16, viii. 7, xvi. 16, xix. 12-20) only aggravated the disease; nor did Paul's system (see Everling, "Die Paulinische Angelologie und Dämonologie," 1888) spiritualize the idea of Satan as the Testaments of the Patriarchs endeavored to do, in order to remove the fear of demons (see Eph. vi. 12; Gal. iv. 3, 9).

The Law, the Prophylactic Against Demons.

Pharisaism diagnosed the disease of the age differently, and therefore insisted that the observance of the Law was the best prophylactic against demons. The wearing of the Tefillin, the Greek name of which, φυλακτήρια, indicates that they were regarded by the Hellenistic Jews as amulets (comp. Targ. Cant. viii. 3; Gen. R. xxxv.; Men. 33b), the fixing of the Mezuzah at the door, the reading of the Shema' with the name of God in the first verse, and the putting on of the Ẓiẓit, while direct observances of the Law (Deut. vi. 4-9, Num. xvi. 38), were also regarded by the Rabbis as a safeguard against all evil powers (Ber. 5a; Num. 48b). The recital of the set prayers each morning and evening (Ber. 9b), the observance of the commandment of the Sukkah (Pesiḳ. 187b), protect against evil powers. In fact, "the wicked are accompanied by the angels of Satan; the righteous by the angels of God" (Tosef., Shab. xvii. 2-3; compare Book of Jubilees, x. 6). For each commandment observed by man becomes an angel "to guard him against demons" (Ex. R. xxxii. and Tan. *ad loc.*). "Every observance of the Law is a protection" (Soṭah 21a), and those bent upon doing some sacred work ("sheluḥe miẓwah") need fear no evil powers (Pes. 8b). The priest's blessing also is a protection against malign influences (Num. R. xi.). And as in the Passover night, "the night of watching," Satan was bound and prevented from doing harm to Israel (Book of Jubilees, xlviii. 15; Pes. 109b), so is "the left hand when adorned with the tefillim surrounded with thousands, and the right hand performing acts of religion surrounded with myriads, of guardian angels" (Midr. Teh. to Ps. xci. 4). "Every limb engaged in the fulfilment of a divine commandment is protected against the 'Strong One'" (Pesik. R. ix.; Midr. Teh. to Ps. xxxv.). Thus Pharisaism, while increasing the yoke of ceremonial laws for the sake of love of God, showed a way to overcome the fear of demons. Belief in the power of the Law became the antidote against what may be termed "Satanophobia," and against the spirit of pessimism and asceticism which was fostered by the Essenes and by their Christian heirs.

The Philosophers.

Though the belief in demons was greatly encouraged and enlarged in Babylonia under the influence of Parsee notions, demonology never became an essential feature of Jewish theology. The reality of demons was never questioned by the Talmudists and casuists; therefore the Halakah accepted it as a fact (see Shulḥan 'Aruk, Oraḥ Ḥayyim, 4, 2 *et seq.*; 90, 6; 181, 2; Yoreh De'ah, 116, 5; 179, 16, 19; Eben ha-'Ezer, 17, 10: based upon Shab. 101a, 109a; Ḥul. 105a; Ber. 3a; Pes. 112a; Meg. 3a; Pes. 109b; Yeb. 122a). Nor did most of the medieval thinkers question their reality (see Naḥmanides on Lev. xvii. 7; "Cuzari," v. 14; Crescas, "Or Adonai," iv. 6; Solomon b. Adret, Responsa, i. 413; Moses Tachau, in "Ketab Tamim"; "Oẓar Neḥmad," iii. 97). Only Maimonides, when ignoring or circumscribing the rabbinical references to the demons (see "Yad," Roẓeaḥ, xii. 5; Gerushin, ii. 13 *et seq.*; compare "Moreh," i. 7, the commentary to Mishnah Pes. iv. 11, and Abot v. 6), and Ibn Ezra, on Lev. xvii. 7, denied their existence.

The cabalists, on the other hand, not only took up all the ideas expressed in Enoch and Pirḳe R. El.

xxxiv., regarding the demons as the spirits of the men of the Flood and as the result of the union of Adam and Lilith, but they made demons form part of the cosmic design in the emanistic system in which the right and the left are the opposite currents of pure and impure powers filling the world and dividing it between the Holy One and the serpent Samael (see Zohar, Bereshit, 47b, 53 *et seq.*, 169b *et seq.*, 174b, and CABALA). But while the malign powers became agencies of the spirit of impurity working in men and nations, there goes along with this view the popular conception of demons as spirits of the dead roaming about as specters and vampires. This latter view is especially prominent in the school of R. Judah of Regensburg, and is dwelt upon in the Book of Raziel and the "Sefer Ḥasidim," 172, 326 *et seq.* Nevertheless, while the number of the demons of diseases increases (see Güdemann, "Gesch. des Erziehungswesens," 1880, i. 205; Yalḳ., Ḥadash, Mita, 149), and the belief in the efficacy of incantations is firmly adhered to, these writers repeatedly urge their readers not to resort to any conjuration or magic practises, but to have perfect confidence only in prayer and in the power of God. "No one who indulges in such practise will see good results for himself and his house" ("Sefer Ḥasidim," ed. Wistinetzki, Nos. 211 *et seq.*, 1448–57; Güdemann, *l.c.* 207).

The Cabalists.

Prayers Against Demons.

Notwithstanding this closing admonition of the "Sefer Ḥasidim," many prayers for the warding off of demonic influences have found a place in the Jewish liturgy and the Shulḥan 'Aruk. The privies having been in Talmudic times isolated spots which filled the imagination with specters of fear, a special incantation is prescribed invoking the protection of guardian angels against the evil spirits haunting these places (see Ber. 60b; compare Ber. 62a and Oraḥ Ḥayyim, 13, 1). Most of the prayers to be recited before retiring to bed are intended to guard the sleeper against demons (compare Ber. 4a; Shebu. 15b). At the close of the Sabbath, when the angel Dumah calls all spirits of the wicked back to their place of torment after their Sabbath respite, the evil spirits are supposed to swarm everywhere, poisoning the wells and doing harm in many ways; wherefore Psalm xci. is recited (see Pesiḳ. R. xxiii.; Sheeltot, Bereshit; Tanya, xxi.; Ha-Manhig, Shabbat, 65; Solomon b. Adret, Responsa, 1119; Kol Bo, xli.). See DUMAH.

As early as geonic times there was a special incantatory formula, to be recited before drinking from the cup of the HABDALAH wine, against "the demon Puta, the prince of forgetfulness," that "by the power of the holy names of the angels Arimaz, Arimas [Ahuramazda?], Ansisel, and Petahel, he may be cast upon the high mountains [Alburz]" ("Seder Rab Amram," i. 31). To this Isaac Luria added new features in the form of incantations against all the demons, and instead of "Puta" he read "Purah," connecting it with Isa. lxiii. 1 as the name of Esau-Samael (see Isaac Luria, "Tiḳḳune Shabbat," and Ḳiẓẓur Shelah, "Moẓe'e Shabbat"; compare M. Brück, "Pharisäische Volkssitten," 1840, p. 121; Brüll, *l.c.*).

Death at all times impressed people with the fear of evil spirits. Many rites and prayer-formulas were introduced to avert their malign influence, and special formulas for the dying were prescribed by the cabalists, by which all the demons—the shedim, ruḥin, lilin, mazziḳim, etc.—that may have been created by the impure thoughts and deeds of the departing, are adjured, by the Holy Decrees, the Powers of Heaven, and the anathemas of men, not to follow the dead nor injure him, nor in any way, direct or indirect, to cause injury to any person through him (see "Ma'abar Yabboḳ," ed. Landshut, pp. 30–33, Berlin, 1857, and introduction, where the literature is given; AMULET; CHILDBIRTH; INCANTATIONS). Customs are sometimes explained by the superstitious as being based upon belief in demons; for instance, the one prohibiting women from going to a cemetery because demons are fond of following her who yielded to the temptation of the serpent and thus caused death to come into the world, or the custom of blowing the shofar at funerals to ward off the shedim (see Yalḳ., Ḥadash, *l.c.* 47).

E. G. H.—G. K.

——**In Arabic Literature:*** Ante-Islamic mythology does not discriminate between gods and demons. The jinn are considered as divinities of inferior rank, having many human attributes: they eat, drink, and procreate their kind (compare Ḥag. 16a, where a similar belief is expressed), sometimes in conjunction with human beings; in which latter case the offspring shares the natures of both parents. The jinn smell and lick things, and have a liking for remnants of food. In eating they use the left hand ("Manakib Al-Ansar," No. 32). Usually they haunt waste and deserted places, especially the thickets where wild beasts gather. Cemeteries and dirty places are also favorite abodes (compare Shab. 67a; Ber. 62b; Mark v. 5). In appearing to man they assume sometimes the forms of beasts and sometimes those of men; but they always have some animal characteristic, such as a paw in place of a hand (Darimi, "Kitab al-Sunnah," ii. 213). Eccentric movements of the dust-whirlwind ("zawabi'") are taken to be the visible signs of a battle between two clans of jinn (Yakut, iii. 478).

Under the influence of Jewish and Christian demonology in post-Islamic times, the only animals directly identified with the jinn are snakes and other obnoxious creeping things (compare Pes. 112a). When Mohammed was on his way to Tabuk, it is said that a swarm of jinn, assuming the form of serpents, approached him and stood still for a long while.

Generally jinn are peaceable and well disposed toward men. Many an ante-Islamic poet was believed to have been inspired by good jinn; and Mohammed himself was accused by his adversaries of having been inspired by jinn ("majnun"). But there are also evil jinn, who contrive to injure men. Among these are specially conspicuous the three female demons named "Ghul" (corresponding to the Talmudical לילית), "Si'lat," and "'Aluḳ" or "'Aulaḳ" (compare Prov. xxx. 15), and the four male demons "Afrit," "Azbab," "Aziab," and "Ezb." Ghul is especially harmful to new-born children, and in order to keep her away their heads are rubbed with the gum of an acacia (Zamakhshari, "Asas," *s.v.* "ḥaiḍ").

---

*This article treats only of parallels to Jewish demonology found in Arabic literature.

Demons in Islam.

Islam recognized the existence of all the pagan demons, good and evil, protesting only against their being considered gods. It divides the evil demons into five species: "jann," "jinn," "shaiṭans," "afrits," and "marids." Mohammed frequently refers in the Koran to the shaiṭans, of whom Iblis is the chief. Iblis, probably a corruption of the name "Diabolos" = Satan, is said to have been deprived of authority over the animal and spirit kingdoms, and sentenced to death, when he refused, at the creation of Adam, to prostrate himself before him (Koran, vii. 13). The shaiṭans are the children of Iblis, and are to die when their father dies; whereas the others, though they may live many centuries, must die before him. A popular belief says that Iblis and other evil demons are to survive mankind, though they will die before the general resurrection; the last to die being 'Azaril, the angel of death.

Tradition attributes to Mohammed the statement that every man has an angel and a demon appointed to attend him. The former guides him toward goodness, while the latter leads him to evil ("Mishkat," i. ch. 3). The shaiṭans, being the enemies of Allah, strive to disturb worshipers. Mohammed, it is said, prefaced his prayers with "O God! In Thee I am seeking for a refuge from the attacks of the shaiṭan and his witchcraft" (Ḥamzah, vii. 293). Among the evil jinn are distinguished the five sons of Iblis: "Ṭir," who brings about calamities and injuries; "Al-A'war," who encourages debauchery; "Suṭ," who suggests lies; "Dasim," who causes hatred between man and wife; and "Zalambur," who presides over places of traffic. It was in order to keep them away that the faithful were commanded the cleansings and fumigations which are unbearable to the shaiṭans, who delight in dirt and filth (Waḳidi, ii. 178). The pronouncing of the "takbir" formula ("Allah akbar" = Allah is very great) is also a means of driving them away. Mohammed, it is said, pronounced it in his travels whenever the appearance of the region changed, lest it might be enchanted. In later times amulets were invented to which were ascribed the virtue of protecting their bearers from the attacks of demons.

As in cabalistic literature, the cat plays a great part in Islamic demonology. A demon assuming the form of a cat is said to have presented himself to Mohammed while he was praying (Darimi, *l.c.* ii. 449). The demons called "Ḳuṭrus" usually assumed the form of cats (Mas'udi, "Muruj al-Dhahab," iii. 321). As to the good jinn, there are some among them who profess Islamism, and Mohammed pretended that many of them had listened to his sermons (Koran, sura lxxii.).

Interesting are the accounts given in the Koran of the power of Solomon over the shaiṭans, which accounts parallel the legends found in Talmud and Midrashim, and of which the following are examples:

> "And we [subjected] to Solomon sundry devils to dive for him, and do other works; and we watched over them" (sura xxi. 81, 82). "And we tried Solomon, and we placed upon his throne a counterfeit body. . . . So we subjected unto him the wind, which moved gently at his command whithersoever he desired; and the devils also—every builder and diver bound in chains" (sura xxxviii. 33-37). "And of the jinn were those who worked in his presence by the will of the Lord; and such of them as swerved from our command we caused to taste of the punishment of hell. They made for him whatever he pleased of lofty halls and images, and dishes large as tanks for watering camels" (sura xxxiv. 11-12).

In the tradition it is said that Solomon possessed power over the demons by virtue of a talisman, which consisted of a signet-ring of brass, upon which was engraved the most great name of God.

DEMOPHON: Apparently an officer under Lysias' command; he was Syrian general in Palestine about 164 B.C., and as such harried the Jewish population, who were already worn out because of their many wars, and were then engaged in agriculture (II Macc. xii. 2).

G. S. Kr.

DEMUTH, LEOPOLD: Austrian baritone opera-singer; born in Brünn, Austria, Nov. 2, 1860. He studied under Gänsbacher in Vienna; appeared at the city theater in Halle, and at the Kroll opera-house in Berlin. In 1891 he went to the city theater in Leipsic; and toward the end of 1896 he obtained an engagement in Hamburg, where he at once took a commanding position, appearing first as *Wolfram*, and following with *Kurwenal*, the *Flying Dutchman*, *Count Almaviva*, *Belamy*, *Don Juan*, *Rigoletto*, *Hans Heiling*, etc. On the death of Bernhard Pollini, Gustav Mahler called him to the court opera, Vienna, where he became a star of the first rank. At the Bayreuth festival in 1899 he attracted much attention. He sang in the rôle of *Hans Sachs*, in the "Meistersinger," and in that of *Günther*, on the last evening of the "Nibelungen" trilogy, with great success.

DENARIUS. See NUMISMATICS and WEIGHTS AND MEASURES.

DENIS (DIONIS), ALBERTUS: One of the first members of the Portuguese community in Hamburg. On May 31, 1611, he with two others signed the agreement which assured to the community its cemetery in Altona. In 1612 he was with others formally admitted to the town by the Senate and the aldermen. He was banker to Count Ernest of Schauenburg, the reigning prince of the county of Pinneberg in southern Holstein, whom he supplied with silver bullion for his mint. In consequence of his confidential relations with the count, he came into collision with the Hamburg authorities, who accused him of buying up reichsthalers coined in Hamburg to melt down in Altona. The Senate of Hamburg ordered him put into prison, but he escaped to Altona and settled there, protected by the count against the Senate of Hamburg and the hostile population of Altona. Christian IV. of Denmark committed to him (1619) the administration of the royal mint in the newly founded town of Glückstadt. He continued to be a member of the Hamburg Portuguese community, and in 1637 interceded as its representative with Count Otto of Schauenburg for the renewal of the cemetery privileges.

DENMARK: A kingdom of northwestern Europe. The first mention of the Danes in Jewish literature occurs in the "Yosippon" (ed. Breithaupt, pp. 8, 547; compare Jerahmeel, transl. Gaster, p. 68), where the Dodanim mentioned in the Bible (Gen. x. 4) are identified with the Danes, and where they are described as a valiant people who fled to northern shores in order to escape from the Romans, though the latter reached them even there, and overcame their resistance. The last-named detail probably owes its origin to an Italian source, in which may have been recounted, although inaccurately, the wars of the Christian emperors of Rome with the Danish kings. The identification with the Dodanim is, of course, based only on the partial consonance of the names.

It is very doubtful whether Jews were found even sporadically in Denmark in the Middle Ages. Although a "Deulacresse of Danemarcia" is mentioned in connection with the English money-broker Aaron of Lincoln, in an English "sheṭar" of 1176 (the first sheṭar bearing a date, according to Jacobs in "Jews of Angevin England," pp. 58, 59), the designation "Danemarcia" can hardly refer to Denmark proper, but rather to a territory in Normandy subject to the Danes.

The Jews first appeared in the region of Holstein, which belonged formerly to Denmark. In a letter dated Nov. 25, 1622, King Christian IV. (1588–1648) invited the Portuguese Jews of Amsterdam to settle in Glückstadt, where, among other privileges, the free exercise of their religion would be granted them. Though the history of the Jews in the territories of Sleswick-Holstein does not belong to this article, it must be noted that the Danish kings were invariably friendly to their Jewish subjects in these provinces, and that the Jews in Denmark proper were for a long time intimately connected with Altona, inasmuch as the chief rabbi of Altona, Hamburg, and Wandsbeck also exercised civil jurisdiction over the Jews settled in the Danish city Fredericia until Sleswick and Holstein in 1864 were severed from the Danish monarchy. The assistant rabbi of Fredericia was subject to the chief rabbi of Altona until 1812. The first Jews probably came to Denmark by way of Sleswick and Holstein during the reign of the above-mentioned Christian IV. His successor, Frederick III. (1648–70), was not so favorably disposed toward the Jews, for in a rescript of Feb. 6, 1651, he says: "Jews have stolen into Denmark contrary to long-standing custom, [since the days of the Reformation, the Lutheran creed had, according to the laws of Denmark, been compulsory throughout the kingdom], and have dared to traffic with jewels and the like." Accordingly, he ordered that no Jew should enter Denmark without a special passport ("Geleitsbrief"), and that those who were already in the country should be heavily fined if they did not leave within fourteen days. A few years later, however, the tables were turned. Frederick III., being in need of funds for his wars, borrowed money from the Jew Abraham (or Diego) Teixeira de Mattos of Hamburg (known through his relations with the Swedish queen Christina), and gave as security crownlands in Jutland. Teixeira thereupon made such good use of his influence with the Danish king that, as early as Jan. 19, 1657, "the Portuguese professing the Hebrew religion" were permitted to travel everywhere within the kingdom, and to trade and traffic within the limit of the law. Teixeira himself gained little by his transaction with the Danish monarch. As his loan was not returned, he took instead the estates he held as security, selling them later at a great loss. The king acted similarly in his dealings with the De Lima family, who were in possession of the Hald estate from 1660 to 1703.

Relations with Frederick III.

The first Jewish congregation was formed in the capital, Copenhagen, but other congregations were soon founded in some of the provincial cities; for example, in the Laaland town Nakskov (1667). In Ribe, Jutland, there were Jews as early as 1680, although the first synagogue in Jutland, that of Fredericia, was not built until 1719 (rebuilt in 1814). The privilege of 1657 was specially ratified in an open letter of Dec. 14, 1670, at the instance of Gabriel Gomez, who was in the service of the king. Nevertheless, a rescript of April 16, 1681, repeated that Jews were not to come into Denmark without a special Geleitsbrief; and the "Danish Law" (1683) of Christian V. (1670–99), a remarkable production which is still authoritative in Danish jurisprudence, in so far as it has not been expressly abrogated by later laws, classed Jews with Gipsies, and in general breathed the same spirit as the law of 1651. But as early as July 30, 1684, a rescript addressed to the above-mentioned Diego Teixeira declared that the Geleitsbrief was not to be demanded of the Portuguese Jews, and it is probable that the law was not always strictly enforced against German Jews. Religious services were permitted in Copenhagen in 1684.

So far as is known, the only "blood accusation" ever made in Denmark was brought against the court jeweler Meyer Goldschmidt, an elder of the synagogue already mentioned. A poor woman came to him, asking him to buy her child. She said she had been told that rich Jews bought children in order to suck their blood, and she wished to give up her child to him, since she could not feed it. Meyer Goldschmidt immediately notified the authorities, and the woman was sentenced to be whipped, but was let off with imprisonment.

Contrast of Portuguese and German Jews.

At the end of the seventeenth and in the course of the eighteenth century, German as well as Sephardic Jews continued to come into Denmark, although in small numbers. The government was on the whole not unfavorably disposed toward the Jews, although it was often obliged to listen to the complaints of the merchants with whom the Jews competed. The subordinate officials were not generally as friendly as the government; they probably had much trouble with traveling Jews, whose speech they hardly understood. It was not easy, of course, for every police official to find out whether the Jew before him was a Portuguese and therefore enjoyed the general privileges, or whether he was to be accounted a German Jew (as were all who were not Sephardim), in which latter case the legality of his passport required demonstration. Probably the German Jews often assumed Portuguese names, and then joined the Portuguese congregation in Copenhagen in order to enjoy their privileges. What the government feared was that Jewish beggars and vagabonds might tramp about the country without definite means of support. An account of the baptism of a Polish Jew in 1620 leads to the conclusion that even then Jews who were worthless as subjects crossed the frontier and accepted baptism as a means of escaping punishment. To obtain a passport it was necessary to demonstrate the possession of money, or of means in some form for carrying on business, as well as some special technical skill; for in former centuries Denmark endeavored to open up all branches of industry by artificial means, the country until then having been almost entirely dependent upon agriculture and commerce. The Jews promoted the commercial interests of Denmark in relation to both the cloth and the tobacco industry. An agreement to build a house in any city that needed buildings was also a means of gaining an entry into Denmark. This is set forth as early as Sept. 2, 1726, in a rescript for Copenhagen; and earlier still (March 31, 1688) in one for Christianshavn, a suburb of Copenhagen on the island of Amager, where the German Jews received the privilege of carrying on the tobacco industry, but only on condition that they would build houses in that part of the city. Marrying into a Dano-Jewish family often conferred citizenship. It must be added, in explanation of all these privileges and rescripts, that, beginning with 1660, the Danish king was absolute sovereign and sole ruler of the country. He could at his pleasure appoint any Jew to a royal office, as was done in the instance of Aron Goldzieher, customs collector. Although this sovereignty was on the whole very mildly and wisely used, it is easy to see how important personal influence must have been in the direction of government. There were several rescripts against immigration before the middle of the eighteenth century, but none in the following decades of the century.

Jews and Christians.

Denmark was strictly Protestant. Naturally, anything that wore the appearance of an attempt to proselytize would be resented. Danger therefore threatened the Jews when Holger Paulli (d. 1714), a half-crazy merchant, announced himself as the Messiah and king of the Jews. Equally pregnant with possibilities of trouble was the case of Jens Gedelöcke. He was a lawyer who evinced a marked inclination for Judaism, and it became evident at his death (1729) that at heart he had been more Jew than Christian, and, according to the information of some of his Jewish friends, had practised Jewish rites. The Jews were thereupon compelled to remove his body from the Christian cemetery and to inter him in the Jewish cemetery; but as he had not formally embraced Judaism, they soon afterward decided not to permit the body to remain among them, and it was removed again. The chief of police of Copenhagen, who had not a very good reputation, endeavored to magnify the incident into an offense against the state; but the threatened storm soon blew over. At one time the Jews were forbidden to keep Christian servants (Jan., 1725); after two months, however, the ordinance was modified, and soon fell into disuse. The Jews were encouraged to embrace Christianity, but the converts made in that century were not of the best repute.

Influence of Mendelssohn Movement.

The Mendelssohn movement soon found adherents in Denmark. It is well known that Mendelssohn's friend, the Danish councilor of state, August v. Hennings, induced the minister to place the name of the insane king, Christian VII. (1766–1808), on the subscription list of Mendelssohn's edition of the Pentateuch, thereby making it impossible for Raphael Cohen, the rabbi of Altona, to put the book under ban (see Copenhagen).

The crown prince (later Frederick VI.), who was for a long time regent in the name of his sick father, was interested in the progress of his Jewish subjects, and after several commissions had made reports, he issued a comprehensive order (March 29, 1814) granting to the Jews full civil liberty, and placing them in general on an equal standing with the Christian population. They were, however, still debarred from government positions. The fact that they enjoyed no political rights is of no importance, since their Danish fellow subjects were in the same position, owing to the absolute sovereignty of the king. The government at this time was more favorably disposed toward the Jews than were the people. Business rivalry was frequently bitter, and the anti-Jewish movement which spread over Germany in the beginning of the nineteenth century invaded Denmark also. A poet, Th. Thaarup (1746–1821), was the chief assailant, while another poet, Jens Baggesen (1749–1826), was among the defenders; the Jews, however, were well able to take care of themselves. In 1819 Denmark became infected with German anti-Semitism, and the political opposition took this opportunity of attacking the Jews, in order thereby to strike a blow at the government, their protector. But Frederick VI. (1808–39), who was otherwise a most peaceable man, did not allow himself to be trifled with, and suppressed the movement with unusual rigor.

Internal Organization.

In the royal ordinance of 1814 the Jews were enjoined to provide religious instruction in the Danish language for their children, and the congregations to provide Danish preachers in the synagogues. But such preachers were not readily found, and although Copenhagen was soon supplied, it was some time before the most important provincial congregations could secure so-called "kateketer," who, when secured, were placed in charge of the spiritual needs of the various church districts, and whose special duty it was to confirm children. A Danish catechism, after a Hebrew work of Shalom Cohen, was authorized by the government, whereby at least a minimum of religious knowledge was provided for the children. As the word "Jew" had formerly been used as an opprobrious epithet in Denmark, the terms "Mosaites" and "Mosaic religious community" ("Mosaisk Troessamfund") became the official designation for Jews and their congregations.

The Jews distinguished themselves as physicians, jurists, manufacturers, and especially as able and upright merchants, not only in Copenhagen, but also in the provincial towns. Therefore many Christians were willing to concede political equality to them in the third decade of the last century, when the political freedom of the country was inaugurated by the creation of deliberative assemblies. The Jews, however, received the right to vote without the right of election to Parliament, though they were, even then, chosen as members of the communal councils in Copenhagen, as well as in provincial cities. Not until the adoption of the constitution of June 5, 1849, under Frederick VII. (1848-63), were the last restrictions removed. From this period onward the Jews of Denmark are unknown to political history. The constitution, in which civil and political rights are made independent of religious creeds, so long as religious views and acts do not conflict with the accepted code of morals, was carried out to the letter. The Jews have contributed in various ways to the development of their country, and have distinguished themselves in the most diverse fields. A few names are mentioned under Copenhagen. Since the middle of the century the Jews have concentrated themselves more and more in the capital.

In 1860-70 there were in Denmark (irrespective of Sleswick-Holstein) about 6,000 Jews, of whom 2,500 lived in Copenhagen, the remainder, with the exception of the few living in the open country, residing in the provincial towns. According to the census of 1893 there were 3,500 Jews in Copenhagen and its neighborhood, and only about 500 in the provincial towns. These figures show that the Jewish population of Denmark remained stationary in the latter half of the nineteenth century. While in 1860 the Jews constituted about .4 per cent of the entire population, they now number barely .2 per cent. On the one hand the favorable social conditions under which the Jews are living have promoted mixed marriages, and on the other hand the immigration of many Russian and Polish Jews into neighboring Scandinavian countries within the last decades could not be diverted into Denmark, since house-to-house pedling, by which most of them must support themselves, at least in the beginning, is not permitted in Denmark. In conformity with the decrease of the Jews in the provincial towns, the number of communal officials with fixed positions has also naturally decreased. In Aarhus, Jutland, where the merchant Hartvig Philip Ree introduced the first modern regular Jewish service in Denmark, there is no longer a congregation. In Aalborg, too, where S. A. Mielziner, the brother of Professor Mielziner of Cincinnati, officiated for some time as preacher, there are now very few Jews. In Horsens the Levy family built a fine synagogue about the middle of the last century, and made the condition that, when services could no longer be held, the synagogue should be transformed into a philanthropic institution for the community. This condition has already been complied with. In Naskov and Fredericia, whose communities are among the oldest in the country, there are still synagogues, but very few Jews. This is also the case in Faaborg, where a preacher is still appointed; while in Randers, which has the last provincial congregation worthy of the name, there are still a preacher and another official; the congregation is, however, near its dissolution. Jews are found only here and there in the other towns and villages of the country. Some are engaged in agriculture, partly as landed proprietors, and partly as peasants in the strict sense of the word. For additional information concerning the Jews in Denmark, see Copenhagen.

DEPPING, GEORGES BERNARD: German-French historian; born in Münster, Germany, May 11, 1784; died in Paris Sept. 5, 1853. He went to Paris in 1803, where he lived as teacher and writer. Besides other historical works, he wrote: "Les Juifs dans le Moyen Age, Essai Historique sur Leur Etat Civil, Commercial et Littéraire," Paris, 1834; 2d ed., 1844; German transl., Stuttgart, 1834. Depping was especially attracted to the history of the Jews in Europe during the Middle Ages by "its wealth of instruction for us; one can see from this history how fanaticism has been able to root out kindness and neighborly love, . . . and what misfortunes met those exiles who in barbaric times wished to preserve their national customs and a religion offensive to those among whom they lived." The book owed its origin to the offer of a prize, in 1821, by the Royal Academy for a work describing the condition of the Jews in France during the medieval period. Depping's work was given honorable mention, but did not win the prize. He later enlarged the work, extending its scope to the general history of the Jews in Europe. The medieval Christian sources—documents, letters, chronicles, and histories, especially those dealing with the history of the Jews in France—were studied by Depping with great diligence and not without critical acumen. This fact gives importance to the book. But it is to be regretted that those rabbinical sources which were not accessible in the form of translations were but seldom consulted. As a consequence the few passages relating to the literature of the Jews are of no value (compare, especially on Rashi, pp. 113 *et seq.*; Zunz, "Z. G." pp. 151, 446). The Introduction (pp. v.–xxiv.) contains a short but valueless review of the history of the Jews up to their appearance in Europe. Depping's style is pleasing.

DERAZHNYA: Village in the government of Podolia, Russia. In 1898 it had a population of 6,118, of which 5,230 were Jews. Handicrafts constitute the most important sources of income, 518 persons being occupied by them. About 25 families are engaged in dairy-farming, 17 families in raising tobacco, and others in market-gardening and fruit-growing. Some find employment in factories and workshops, and 165 work as day-laborers. The village has a Linat ha-Ẓedeḳ, a Parnasat 'Aniyyim, a Biḳḳur Ḥolim, etc. There are a Talmud Torah with 20 pupils, a private Jewish girls' school with 17 pupils, and 17 ḥadarim for boys and girls, with 436 pupils.

DERAZHNYA. See VOLHYNIA.

DERBENT (called by the Arabs **Bab al-Abwab** ["Main Gate"], or **Bab al-Khadid** ["Iron Gate"]): Seaport in the Russian province of Daghestan (Caucasus), on the western shore of the Caspian Sea. The city of Derbent was founded by the Persian king Khobad at the beginning of the sixth century, to protect the Persian possessions against the attacks of the Chazars; but a fortified settlement existed there long before that time. The Jewish population of Derbent and its neighborhood are probably the descendants of the military colony which Anushirwan (530–578) established there. The suggestion of Joseph Schwarz that Derbent is the "Terbent" mentioned in the Talmud (Yer. Meg. iv. 75), is therefore without foundation. With the extension of the Chazar kingdom the Jewish community in Derbent increased rapidly, so that in the eighth century it probably had a larger population than it has to-day.

The Jewish community of Derbent was of some importance during the period of the Chazar kingdom. Ibn Ḥauḳal tells of a thriving slave-market in Derbent, where merchants of all nationalities met. The place was then much larger than Tiflis. When the Russians devastated the Chazar city Semender, the surviving inhabitants of that city, with those of Atel (capital of the Chazars), among them being many Jews, fled to Derbent (Harkavy, "Skazanie Musulmanskikh Pisatellei o Slavyanakh i Russkikh," p. 220). Derbent was annexed by Russia in 1806. Wilhelmus de Rubruquis in describing the walls of Derbent (1254) relates that the whole country was largely inhabited by Jews (G. de Roubrouck, "Récit de Son Voyage," p. 280, Paris, 1877).

According to Anisimov, the Jewish population in 1888 was 1,671; they had 220 houses, 160 gardens, 19 shops, 1,020 deciatines (about 2,754 acres) of land, 4 synagogues, 6 rabbis, and 8 schools with 95 pupils. The Jewish population in 1891 was 2,490 in a total of 15,265. The Jewish quarter is south of the city and outside the wall.

Birth Customs.

Some of the Jewish customs of Derbent are noteworthy. A woman during her confinement kneels down, and the midwife receives the child and deposits it in a wooden vessel. She then pours salt over the child, cleans it, and puts it without bandages in a cradle. On the eighth day the people gather in the synagogue, and the "shammash" (sexton) takes the child to the synagogue for circumcision. The honor of holding the children is sold for the whole year on the Festival of the Rejoicing of the Law (Simḥat Torah) to the highest bidder. The money goes to the rabbi. Except the midwife and the nearest female relative of the mother, nobody is allowed in the birth-chamber for seven weeks after the birth. The father is not permitted to bathe or to write for seven weeks from the day of the birth. During this period no one is allowed to go on the roof of the house, and it sometimes happens that serious assaults result from people not obeying these laws. If the child is a female, the old women gather in the house of the mother and choose its name, not even informing the rabbi. During these seven weeks it is permissible neither to take fire from the house nor to borrow any utensils.

The children are allowed to grow up very wild, and are far from cleanly. The boys are taught to ride horseback and to handle arms, and boys of not more than fourteen years frequently kill one another in quarrels or fights. In the shabby, filthy, low-ceilinged school buildings forty pupils are sometimes huddled together without order. They sit with crossed legs and study the alphabet, the prayer-book, and the Pentateuch in the Tat language. There are many, however, who receive no education at all.

Preliminaries to Marriage.

When a young man is about to select a wife, he is expected first to negotiate a settlement with the parents of the girl, and in such a case the oldest brother of the girl is the spokesman. If this brother sanctions the marriage, then the mother of the young man begins to bargain about the price to be paid for the bride, which must not be less than sixty rubles. Feasts are arranged for the day after the conclusion of the bargain, first in the house of the girl, and then in the house of the young man. On the second day the fathers of both parties conclude the bargain in the house of the rabbi, with whom the contract of engagement ("tenaim") is deposited. Sometimes very young girls are promised in marriage, and as the marriage can not by law take place before the girl has reached the age of thirteen, the young man is obliged to clothe her and send her presents. In case the contract is broken by the girl, she must return all the presents. In Derbent there is no law of engagement ("erusin"), as in Kuba and other places in the Caucasus, where a regular betrothal ceremony takes place, the young man uttering the words "Hare-at," etc., during the betrothal. The betrothed man is not allowed to enter the house of his prospective bride until the day of the wedding. The marriage ceremony must take place on Wednesday or on Thursday. The wedding-feast lasts for many days. See Chorny, "Sefer ha-Masa'ot," pp. 298–310.

H. R.

DERCETO: A goddess of the Syrians. **1.** Derceto is mentioned indirectly in II Macc. xii. 26, where it is related that Judas in his expeditions came *ἐπὶ τὸ Καρνίον καὶ τὸ 'Αταργατεῖον*, or *'Ατεργατίον*. This latter word designates the sanctuary of the goddess *'Αταργάτις*, and an abridged form of the name is *Δερκετώ*, which is used by Diodorus ("Sicius," ii. 4) and by Lucian ("De Syria Dea," xiv.). The same name is mentioned in the Talmud ('Ab. Zarah 11b, line 28) in the form תרעתה (Tar'atah). It is true that some have connected this Talmudical form with the Aramaic תרע ("door"), and have therefore supposed that it contained a reference to the female pudenda. But although Hesychius gives the equivalent *Σαλάμβω*, derived from *σαλάμβη* ("hole"; Hitzig, "Bibl. Theol. des Alt. Test." 1880, p. 20; but compare Hoffmann in "Zeit. für Assyr." 1896, p. 245), it must be remembered that the consonant ע had also the sound of *γ*, as may be seen in עזה ('Azzah = *Γάζα*, Gaza). Consequently the Talmudic "Tar'atah" (for "Targatah") might be an apocopated form of *'Αταργάτις*. The full form, "Tar'atah," has recently been found.

2. עתרעתה ('Atar'ateh) has been proved to be the name of a goddess in a bilingual Palmyrene inscription (De Vogüé, "Syrie Centrale," 1868, iii. 4) of the year 140, (*'Αταρ)γατες* being there used as the Greek equivalent. The same name, עתרעתה, is found on coins, probably minted in the Syrian city Hierapolis. Hence this name is composed of the following two parts: (1) עתר = עתתר ('Athtar), as the goddess of fecundity and of wells is called in the South Arabian inscriptions (compare Robertson Smith, "Rel. of Sem." i. 97, note; Winand Fell, in "Z. D. M. G." 1900, pp. 245 *et seq.*); (2) עתה, probably signifying "time" (compare עת), perhaps more definitely "favorable time," "favorable circumstances," or "favorable destiny." When combined the two names may signify "'Atar, the daughter of 'Ate," or "'Atar, the mother of 'Ate," for 'Athtar is the all-producing divine power, and a son of Atargatis is mentioned by Athenæus (see Baudissin in Herzog-Hauck, "Real-Encyc." i. 173).

Hoffmann's assertion (in "Zeit. für Assyr." 1896, p. 249) that "'Ateh" is a diminutive of "'Atar" is not demonstrable.

3. "Atargates" may perhaps be compared with "Ashteroth" of Karnaim ("Ashteroth of the Double Horn"; Gen. xiv. 5), whose temple is mentioned as late as I Macc. v. 43 (*τὸ τέμενος ἐν Καρναίν*); for the *τὸ 'Αταργατεῖον* of II Macc. xii. 26 is also mentioned in connection with *τὸ Καρνίον*. Lucian ("De Syria Dea," xiv.) says: "Many people are of the opinion that Semiramis the Babylonian, of whom there are many memorials in Asia, also founded the sanctuary of Hierapolis in Syria, but dedicated it not to Juno, but to her mother, Derceto." Lucian himself doubts this, however, for he continues: "I have seen the image of Derceto in Phenicia: a strange sight! The upper half represents a woman; the lower half, from the hips down, the tail of a fish. The goddess at Hierapolis, however, is entirely a woman." Nevertheless, the goddess worshiped in Hierapolis was probably identical, in idea if not in form, with Derceto, who had a temple in Askalon (Philistia).

The people of Hierapolis avoided eating fish, "and they do that, according to their belief, for the sake of Derceto." Though Lucian says "There are people in Egypt who eat no fish, yet not to please Derceto," it is doubtful if this is decisive. In 'Ab. Zarah 11b, also, "Tar'atah shebe-Mapeg" ("Mabug" = Hierapolis) is combined with "Ẓerifah shebe-Ashḳelon." Finally, the fish may have been made the symbol of the goddess Derceto on account of its fecundity. A calendar preserved in the Louvre represents the lower half of Derceto's body in the shape of a fish. An excellent copy is to be found in Vigouroux, "La Bible et les Découvertes Modernes," iii. 355.

E. G. H. E. K.

DERECHIN: Town in the government of Grodno, Russia. According to the census of 1897 it has a population of 2,289, of whom 1,573 are Jews. The main sources of income are in trade and handicrafts. There are 227 artisans. Shoemaking is the most important industry, affording occupation for 71 persons. The industrial output of the town is sold at the annual fairs. There are 46 Jewish day-laborers, 28 factory employees, and 6 families are engaged in truck-farming. Near the town is situated the agricultural colony of Sinaiskaya, where 30 families are engaged in agriculture. In all they own 187 deciatines of land. The charitable institutions are: Gemilut Ḥasadim, Somek Noflim, Malbish 'Arummim, Linat ha-Ẓedeḳ, Haknasat Orḥim, and Biḳḳur Ḥolim. The town has a Talmud Torah with 50 pupils, and 15 ḥadarim with 150 pupils.

DEREK EREẒ, *i.e.*, good behavior. See ETIQUETTE.

DEREK EREẒ RABBAH (דרך ארץ רבה = "way of the world"; "deportment"): One of the small treatises (מסכתות קטנות) of the Talmud. In the editions of the latter the treatise Derek Ereẓ consists of three divisions: (1) Derek Ereẓ Rabbah (Large Derek Ereẓ); (2) Derek Ereẓ Zuṭa ("Small Derek Ereẓ"); (3) "Pereḳ ha-Shalom (Section on Peace"). This division is correct in that there are really three different works, but the designations

"Rabbah" and "Zuṭa" are misleading, since the divisions so designated are not longer and shorter divisions of one work, but are, in spite of their relationship, independent of each other. The ancient authorities, who have different designations for this treatise, know nothing of the division into "Rabbah" and "Zuṭa"; the "Halakot Gedolot" (ed. Hildesheimer, p. 647) even includes a large part of the Derek Ereẓ Zuṭa under the title "Rabbah."

Summary of Contents.

According to the usual division, Derek Ereẓ R. consists of eleven sections ("peraḳim"). It begins with a halakic section on forbidden marriages ("'arayot"), to which are appended some ethical maxims on marriage. The second section consists of two entirely different parts, the first of which contains reflections on twenty-four classes of people—twelve bad and twelve good—with an appropriate Bible verse for each class; while the second enumerates the sins that bring about eclipses of the sun and moon, as well as other misfortunes, the whole ending with some mystic remarks concerning God and the 390 heavens. The section "Ben 'Azzai," as the ancients called the third pereḳ, contains some moral reflections on the origin and destiny of man. Sections iv. and v., each beginning with the word "Le-'olam" (Forever), contain rules of conduct for sages and their disciples, the respective rules being illustrated by Biblical events and occurrences of the time of the Tannaim. Sections vi. and vii., which seem to have been originally one section, illustrate, by means of several stories, the correctness of the rule of conduct, never, in society or at table, to act differently from others that are present. Sections viii. and ix. also treat of rules of conduct during eating and drinking, especially in society; and it must be noted that sections vi. and viii. begin with the same word "Ha-niknas." Section x., on correct behavior in the bath, also begins with the same word, showing that all these sections, although they differ in content, were composed after one pattern. The last section begins with the enumeration of different things that are dangerous to life, and continues with the enumeration of actions and customs that are very dangerous to the soul.

This short summary of the contents shows that the work is of very diverse origin and that each section has its own history. It is clear that the first section can not, in view of its halakic content, belong with the rest of the treatise, which deals exclusively with morals and customs. Elijah of Wilna was therefore undoubtedly right in assigning this section to the treatise Kallah, which precedes the Derek Ereẓ and deals entirely with marriage and the rules connected with it. The whole section is merely a later compilation, although some of its passages can not be traced back to the Talmudim and the Midrashim, as, for instance, the interesting parody on the hermeneutic rule of "ḳal we-ḥomer" (compare Joseph b. Tadai).

Composition and Component Parts.

Entirely different in origin is the first part of the second section, drawn undoubtedly from an old tannaitic source. Four sentences of this section are cited in the Talmud as being taken from a Baraita (B. B. 90b; Sanh. 76b; Shab. 88b), and one in the name of Abba Arika (Sanh. *l.c.*), who often quoted old sentences and maxims ('Er. 54a). The composition shows that this section is not taken from the Talmud, for the division into twelve good and twelve bad classes of men is not found in the latter. The other half of this section, however, is probably a later interpolation, belonging properly to the third section. For this section begins with a saying of Ben 'Azzai concerning four things the contemplation of which would keep men from sin: hence the four classes of four things each that are enumerated in the second section.

Ben 'Azzai mentioned four things in connection with the four sayings. They are drawn from the Talmud (Suk. 29). The third section seems to have been in ancient times the beginning of Derek Ereẓ R. (Rashi on Ber. 22a; Pes. 86b; Tosef. 'Er. 53b), for which reason the old writers called the whole treatise "Pereḳ ben 'Azzai." Yet it is difficult to understand how this section came to be taken as the introduction to the treatise, which otherwise, beginning with the fourth section, forms a connected whole, and has totally different contents from the Pereḳ ben 'Azzai.

Date of Composition.

Therefore, as regards date and composition, only sections iv.-xi. need be considered, since the first three sections were not originally integral parts of the treatise. Sections iv.-xi. are not only similar in content, in that both set forth rules of behavior for different walks of life, and illustrate their meaning by examples from history, but their whole arrangement and composition also show the hand of the same author. Although the name of this author is not known, his date can be fixed approximately. Among the sixteen authorities quoted in the part which has been designated above as the treatise Derek Ereẓ R. proper, there is not one who belongs to a later time than Rabbi, the redactor of the Mishnah. The Yerushalmi quotes a sentence, found in the Derek Ereẓ R., with the formula "Tene be-Derek ha-Ereẓ" (Shab. vi. p. 8a, bottom); from this it appears that in the time of the Amoraim a tannaitic collection of the name "Derek Ereẓ" was known, and there is absolutely no reason for considering the present as a different treatise from the Derek Ereẓ quoted in Yerushalmi. Nor is there any cogent reason for not considering this treatise as the source of the many quotations from Baraitas in Babli, which are found in Derek Ereẓ R. also (compare Isaiah Berlin's glosses to the treatise), although it must be admitted that a great many of the quotations existed in different collections of Baraitas, and that the Talmud drew sometimes from one source and sometimes from another.

A contemporary of Rabbi, therefore (about 160–220)—hardly Rabbi himself—may have been the author of the Derek Ereẓ R., the first three sections being added much later. A collection known as "Hilkot Derek Ereẓ" existed even in the school of Akiba (Ber. 22a); but, as the term "Hilkot" indicates, it was composed entirely of short sentences and rules of behavior and custom, without any references to Scripture and tradition. It is even highly probable that the treatise was based on the older collection, and that the work of the later editors consisted merely in the addition to the old rules of illustrations from the Bible and from history. For example, in the old collection there was a rule, "No one must enter the house of another without due announcement." This sentence was amplified by a later editor, who added: "This rule of behavior is taught out of the mouth of God Himself, who stood at the gate of paradise and called to Adam, 'Where art thou?'" (Gen. iii. 9); and to this is added the story of a journey of Jewish scholars to Rome, and how they comported themselves there (section v.).

Stories.

It is characteristic of this treatise that in order to emphasize its rules, it relates many stories of the private life of the Tannaim. A most interesting one is the following, which is used as an illustration to the rule, always to be friendly and obliging: "Once Simon ben Eleazar [probably more correctly Eleazar b. Simon; compare Ta'an. 20a] met a very ugly man, and could not help exclaiming: 'How ugly are the children of our father Abraham!' The man answered: 'What can I do about it? Will you go and tell the Master who has created me?' Then Simon b. Eleazar fell down at the man's feet, asking his forgiveness. But the latter said: 'I will not forgive you until you have gone to the Master who has created me, and have said to Him, "How ugly is the creature which you have created!"' Only after much beseeching would the man forgive him; and on the same day Simon pronounced these words in the schoolhouse: 'Be always pliable as the reed, and not hard as the cedar. Although the reed bends to the gentlest wind, it resists the fiercest storm; but the cedar, at first proud and inflexible, in the end yields to the wind, and is uprooted.'" Stories of this nature lend a peculiar charm to the Derek Ereẓ Rabbah.

The version of the treatise found in the Maḥzor Vitry (pp. 724 *et seq.*) is different from that in the editions of the Talmud. Instead of the first part of the second section, there is in the former version a collection of sentences and reflections on various subjects, arranged according to numbers. The version of the treatise Kallah, in Coronel's "Ḥamishah Ḳunṭresim," Vienna, 1864, contains the greater portion of the Derek Ereẓ R.; namely, the whole of sections iii., iv., v., and parts of the following sections. Aside from the variants found here, Coronel's version has also a kind of Gemara to the text. This Gemara, however, is of very late origin, being in all probability a product of the tenth century, although it contains matter of great value and of very ancient (Essene or Ḥasidean) origin. The Gemara, which is quoted by Isaac Aboab in "Menorat ha-Ma'or," is printed in the Wilna edition of the Talmud (Romm, 1889).

Bibliography: The treatise *Derek Ereẓ R.* was printed for the first time in the third Venetian edition of the Talmud (1546–1551); see also Goldberg, *Der Talmud. Tractat Derek Ereẓ Rabbah*, Breslau, 1888, which contains a critical edition and a German translation; Krauss, in *Rev. Etudes Juives*, xxxvi. 27–46, 205–221; xxxvii. 45–64; Weiss, *Dor Dor we-Dorshaw*, ii. 249–250; Zunz, *Gottesdienstliche Vorträge der Juden*, 2d ed., pp. 116–118.

DEREK EREẒ ZUṬA (דרך ארץ זוטא, lit. "etiquette, small [treatise]"): An uncanonical treatise of the Babylonian Talmud. The name is misleading in more than one respect; the word "zuṭa" (small) would seem to indicate that it is a shorter version of the treatise "Derek Ereẓ Rabbah," which is not the case, the two having little in common. "Derek Ereẓ," moreover, is a very unsuitable name for a collection of ethical teachings such as form the substance of the treatise. Even Rashi, however (Ber. 4a), knows the treatise under this name, calling it "Masseket Derek Ereẓ," while the Tosafists likewise call it "Hilkot Derek Ereẓ" (Bek. 44b). The designation "zuṭa" is probably of later origin.

In the Talmud editions the treatise consists of nine sections ("peraḳim"), to which the Section on Peace ("Pereḳ ha-Shalom") is added as a supplement. The Halakot Gedolot (ed. Hildesheimer, pp. 644–652) gives another version; here the same material is in two parts—(1) "Derek Ereẓ Zuṭa," corresponding to sections v.–viii., and (2) "Derek Ereẓ Rabbah," containing sections i.–iv. and ix. There are two manuscript copies with this division in the Bodleian (Nos. 120 and 380 in Neubauer's catalogue), as well as a genizah fragment ("Jew. Quart. Rev." x. 660); but in the latter the first four sections are under the title "Yir'at Ḥeṭ." The Karaite Ḳirḳisani (tenth century) cites a passage from the fourth section under that title ("Jew. Quart. Rev." vii. 698). A third version is that in the Maḥzor Vitry (ed. Horwitz, pp. 721–723), where the first part of the eighth and the whole of the ninth section are given under the title "Hilkot Darkan shel Talmide Ḥakamim." It is noteworthy that in the Talmud editions sections iv.–viii. are marked as having been taken from the Maḥzor Vitry. It should also be mentioned that the "Siddur Rab Amram" (Amram ben Sheshna) gives only the first and fourth sections, which is probably due to the fact that the second and third were not included in the ritual.

Summary of Contents.

Apart from this external evidence, a closer examination shows that the work consists of three different collections: (1) i.–iv., (2) v.–viii., (3) ix., though it has a certain unity in that it consists almost exclusively of exhortations to self-examination and meekness and of rules of conduct, and urges temperance, resignation, gentleness, patience, respect for age, readiness to forgive, and, finally, the moral and social duties of a "disciple of the wise" ("talmid ḥakam"). It is written in the form of separate, short maxims arranged as in the Abot, but differing in that they are anonymous. The compiler attempted to arrange the maxims according to external characteristics, the order followed being determined by the initial word, and by the number of maxims. Several precepts which begin with the same word are put together even when they are not at all related in subject-matter (compare "The Wisdom of Ben Sira," ed. Schechter, vi. 1–20, where twenty sayings begin with אל); especially are they thus combined into groups of four, five, or seven maxims, numbers which serve to aid in memorizing the passages. How far the compiler was able to carry out his principle can not be judged from the text in its present condition; and to ascertain the original form of the treatise it is necessary critically to reconstruct the text. The following analysis of contents is based on such a reconstruction.

The first section begins with introductory remarks on the duties and proper conduct of a "disciple of the wise"; then follow seven sentences, each a precept in four parts, which, however, are often confused in the text as it now exists. The order is: (1) הוי; (2) אל—which sentence is to be read according to Ab. R. N., ed. Schechter, xxvi. 83; (3) אם; (4) אל (the following saying, beginning with אם, belongs to No. 3, while the next אל sentence is the fourth part of No. 4); (5) העבר (the two missing parts to be supplied from Abot ii. 4); (6) אהוב and its opposite הרחק; (7) אל—originally four sentences as shown by the Vatican MSS. in Goldberg and Coronel's version and as confirmed by the parallels in Ab. R. N., ed. Schechter, xxvi. 82, xxxiii. 36; the concluding הרחק sentence belongs to No. 6. The three haggadic utterances which form the conclusion of the first section are a later addition.

The second section begins like the first, emphasizing particularly the duties of the "disciple of the wise." After a series of admonitions concerning only the student, there follow, to the end of the section, maxims of a general nature for people in the most varied walks of life. These are also arranged in seven sentences, each beginning with the word הוי, which word also comes before למוד להיות גומל בטובה (compare Ab. R. N. xli.). Then follow seven beginning with אל, and seven with אם.

In the third section the regular arrangement can be recognized beginning with the maxim אם רפית. There are three sentences each with אם and הוי; and as many with תחלת and אם. The following sentences probably belong to section four, and concern only the conduct of the student. The paragraph beginning with the words אל תאמר איש, which, as is to be seen from the "Siddur Rab Amram," consists of four parts, concludes the fourth section, which is the end of the "Yir'at Ḥeṭ."

From the fourth section to the eighth is a collection of maxims arranged on the same plan. The eighth section contains eight maxims beginning with כל, but the initial and concluding maxims are not relevant to the proper matter of the section. The ninth section is a well-ordered collection of twenty-eight maxims arranged in four paragraphs; seven of these maxims begin with אהוב, seven with הוי, and fourteen with אם.

Date of Composition.

The date of composition can only be conjectured. It is almost certain that sections v.-viii. are the work of one editor, who lived after the completion of the Babylonian Talmud. One needs only to compare the maxim לעולם (v. 2) with Sanh. 23a and Mek. Mishpaṭim 20 to see that the compiler had the Talmud before him. The next maxim is a combination of 'Er. 65b and Ab. R. N., ed. Schechter, xxxii. 68. Ab. R. N. viii., כל המתנבל (ed. Schechter, xxii. 46), Midr. Mishle ix. 9, Pesiḳ. viii., כל זמן (ed. Buber, 44b), and probably Derek Ereẓ Rabbah were also used. As already mentioned, the Spanish version of the Halakot Gedolot, probably made about 1000, adopted these four sections as a complete treatise; hence one would not be far wrong in setting the ninth century as the date of composition. The first four sections date from a much earlier period. From their contents they may even have been an independent collection already in existence at the time of the Tannaim. At any rate this collection contains much that is old, even if it can not be proved that the "Megillat Ḥasidim," which is cited in Abot de-Rabbi Natan (ed. Schechter, xxvi. 52), is identical with the treatise under discussion.

The ninth section, originally, perhaps, a small collection of maxims, is more modern than the first and older than the second part of the treatise. The conclusion of the ninth chapter, which treats of peace, caused the insertion in the Talmud of a Section on Peace ("Pereḳ ha-Shalom"), in which various sayings concerning peace, taken from different Midrashim, especially from the Midrash to Num. vi. 26, are placed together. This tenth (supplementary) section is comparatively a very late product, and is not found in Maḥzor Vitry, in Halakot Gedolot, nor in the MSS.

Importance of the Treatise.

The Abot excepted, this treatise is the only collection of precepts from the period of the Talmud and the Midrashim, and is therefore of great importance in any estimate of the earliest ethical views of the old rabbis. Zunz appropriately characterizes the treatise: "The Derek Ereẓ Zuṭa, which is meant to be a mirror for scholars, is full of high moral teachings and pithy worldly wisdom which philosophers of to-day could study to advantage." The treatise deals mainly with man's relation to man, and is moral rather than religious in nature. A few quotations from it will illustrate its character: "If others speak evil of thee let the greatest thing seem unimportant in thy eyes; but if thou hast spoken evil of others, let the least word seem important" (i.). "If thou hast done much good let it seem little in thy eyes, and say: 'Not of mine own have I done this, but of that good which has come to me through others'; but let a small kindness done to thee appear great" (ii.).

The treatise was much read, and the fact that it went through so many hands partly accounts for the chaotic condition of the text. Scholars of the eighteenth century did much, by means of their glosses and commentaries, toward making possible an understanding of the text, but a critical edition is still needed.

DERELICTS: Things that have been abandoned ("res nullius" in the Roman law). The Talmud treats of four kinds of things that have no owner: (1) Seas, rivers, brooks, the desert (which can not be subjected to ownership), and all they contain; also wild beasts wherever found. (2) Things declared by the owner to be derelict (הפקר). (3) The property of a convert who dies without leaving issue "begotten in holiness." (4) Land sold by a

Gentile to an Israelite, for which he has been paid, but for which he has not executed a deed (this last class is questioned).

He who devotes anything as a derelict can not put any limitations upon it. Like the fruits of the seventh year, it must be as free to the rich as to the poor. And as long as no one has, by occupation, made the derelict his own, the former owner can recover it (Ned. 44a).

The fourth kind is a subject of dispute in the Talmud. It originated in the Persian law, which recognized no transference of immovable property without a deed; which practise became recognized in Jewish law. It was argued: "The law of the kingdom is law"; the Gentile has conveyed no title to the Israelite purchaser, but as he has been paid for his land, his own title is gone; the land is therefore derelict. Hence the first Israelite who can acquire it by occupancy will be recognized as its owner. However, this very maxim, "The law of the kingdom is law," seems to have been quoted on the other side of the question (B. B. 54b). It must also be observed that, according to some interpreters of the Talmud, the third owner could not make his claim valid before he paid to the Israelite who had bought the land from the Gentile all of the money which he had expended.

Seas and rivers excepted, anything, whether movable or immovable, coming within these four classifications may be acquired by occupancy, and not otherwise. The lawfulness of fishing and hunting rests on the position that fish in open waters, and wild beasts or fowl everywhere, are "res nullius," and as such belong to the first occupant. But fish in an artificial pond ("bibarin"; Latin, "vivarium") are private property; to take them without the consent of the owner is robbery; and it is robbery likewise to take game out of a net or trap which has been set by another, even if it be in the desert (B. Ḳ. 81a).

To hunt upon the field of another may be morally wrong, and the hunter is responsible for all damage done; but the wild beasts he catches or kills belong to him (see, however, Finder of Lost Property). Fish that jump from the water into a ship or boat belong to the owner thereof (B. M. 9b). Other ownerless movable things, including tame beasts, belong to him who takes possession in a way that would give title to a purchaser, according to the nature of the thing to be acquired (see Alienation and Acquisition).

When a debt or a deposit has for any reason become ownerless, the debtor or depositary is freed from all liability, being naturally the first occupant. For a like reason bondmen or bondwomen declared by their owners as derelict become their own masters—that is, they become free; but if under age, they become the property of the first occupant, like goods or tame beasts.

The occupation of derelict land must have the same character in each of the three cases. To seize a deed for the land gives no title except to the parchment on which it is written. Such occupation of land as is defined under Alienation is generally good enough; but where a field or other parcel of land is separated from other parts of the same estate, even by a foot-path, the actual occupation of one can not by a declaration in words be extended to the other. The mere perceiving of fruits, or the taking of fallen trees, is not deemed occupancy of the soil. Plowing, or sticking a spade or pick into the ground, or sowing seed and covering it with earth, is effective. To erect posts or doors on the ground gives title; living in a house, or building something in the house above the ground, does not. The reason for these technical distinctions is this: that there is no contract, written or oral, to impress a meaning on the acts of occupation; hence they can not be extended beyond the very thing which they touch (B. B. 54a, b).

Issur, the convert, father of Rab Mare, a Babylonian teacher, is an example of a convert having no son "begotten in holiness." The difficulty with which he transmitted to his son money on deposit is described in B. Ḳ. 87a.

DERENBURG (DERENBOURG): A Franco-German family of Orientalists. Their original home was Derenburg, a town near Halberstadt, Saxony, whence they moved successively to Offenbach, Frankfort-on-the-Main, and Mayence. Concerning **Jacob Derenburg**, the first known member of the family, nothing is ascertainable. His son, **Hartwig (Ẓebi-Hirsch) Derenburg**, was the author of a comedy, "Yoshebe Tebel" (Inhabitants of the Universe), written in imitation of the "La-Yesharim Tehillah" of Moses Ḥayyim Luzzatto, and published in Offenbach in 1789. He moved to Mayence about this time, as is shown by the fact that he calls himself in his preface "tutor in the family of Mdm. Brendeli, widow of Beer Hamburg, in Mayence." The play was dedicated to "the philanthropist and scholar Solomon Fürth of Frankfort-on-the-Main," of whose son Derenburg had been teacher. Derenburg was buried in Mayence, but his tombstone gives no information regarding the date of his death.

The "Yoshebe Tebel" consists of a dialogue in which eight characters hold converse with one another, each of them in turn representing one of the capital sins, which the adjuster of wrongs, the "Prince of Peace" ("Sar Shalom"), representing the pastor of the community, condemns. Hartwig Derenburg abstains from mentioning names, as, in 1803, did Goethe in his "Natürliche Tochter." But as, in the case of Goethe, the originals of the characters which he put upon the stage under the veil of anonymity could be identified, so the contemporaries of Derenburg must have recognized the members of the Jewish congregation in Mayence to whom the "Prince of Peace" (R. Noah Ḥayyim Hirsch) had addressed a well-deserved rebuke. The "Yoshebe Tebel" was the author's sole production of this nature.

Hartwig's eldest son, **Jacob Derenburg**, born at Mayence in 1794, was a lawyer; his youngest son was the French Orientalist **Joseph (Naftali) Derenburg**, born at Mayence, France, Aug. 21, 1811; died at Bad-Ems, Germany, July 29, 1895. To the age of thirteen Joseph's education was confined exclusively to rabbinical studies. When sufficiently prepared, Joseph entered the gymnasium in Mayence, and then attended lectures in the University of Giessen, and afterward in that of Bonn, where he studied Arabic under Freytag. It was principally due to his intimate friendship with Abraham Geiger that he did not entirely drift into the domain of Semitic philology, but remained faithful to Jewish science.

Joseph Derenbourg.

Abandoning the idea of becoming a rabbi, and having obtained his Ph.D. degree, Joseph in 1834 left Bonn for Amsterdam, where he accepted a position as tutor with the Bischoffsheim family. When in 1838 his pupil Raphael Louis Bischoffsheim went to Paris to study at the Ecole Centrale, Joseph accompanied him, and took up his abode in Paris. In 1841 he became associate proprietor of the Pension Coutant, and directed the religious and moral instruction of the Jewish pupils. A few months after his marriage (1843) he regained his French nationality, and, having previously spelled his name "Derenburg" (and later "Dernburg"), he called himself thenceforth Joseph Derenbourg. After teaching German at the Lycée Henri IV. in 1851, he was appointed proof-reader of Oriental texts at the Imprimerie Impériale (1852). In 1857 he established a private college, and remained at its head until 1864. In 1869 he became chevalier of the Legion of Honor, and was elected (Dec. 22, 1871) member of the Académie des Inscriptions et Belles-Lettres. If nominally he was the successor to Caussin de Perceval, his former teacher of Arabic, in reality he was called to fill the place left vacant by the death of Salomon Munk (Feb. 7, 1867). He had already (May 3, 1868) succeeded the latter, who had been an intimate friend of his, as member of the central committee of the Alliance Israélite Universelle, of which he later became a vice-president. From 1869 to 1872 he was a member of the Consistoire Israélite de Paris. In 1877 an eye affection compelled him to resign his position at the Imprimerie Nationale; but immediately after this he was appointed professor of rabbinical Hebrew at the Ecole des Hautes Etudes.

The following are Joseph Derenbourg's principal works, no mention being made of a number of articles which appeared in the "Comptes Rendus de l'Académie des Inscriptions et Belles-Lettres," the "Journal Asiatique," the "Revue Critique," Geiger's "Jüdische Zeitschrift," the "Revue des Etudes Juives," Grätz's "Monatsschrift," etc.:

"Maimonides," in Geiger's "Wiss. Zeit. Jüd. Theol." i. (1835).

"Sur le Dernier Repas Pascal de Jesus," in "Orientalia," i., Amsterdam, 1840.

"Les Séances de Hariri," with a commentary by Silvestre de Sacy; 2d ed. revised and supplemented with historical and explanatory notes, Paris, 1847-51, preface by Reinaud.

"Les Fables de Loqman le Sage," Berlin and London, 1850.

"Les Inscriptions de l'Alhambra," appendix to Girault de Prangey's "Essai sur l'Architecture des Arabes et des Maures en Espagne," Paris, 1851.

"Essai sur l'Histoire et la Géographie de la Palestine d'Après les Thalmuds et les Autres Sources Rabbiniques: I., Histoire de la Palestine," Paris, 1867.

"Manuel du Lecteur, d'un Auteur Inconnu," reprinted from "Journal Asiatique," 1870.

"Opuscules et Traités d'Aboû l-Walîd Merwan ibn Djanâh de Cordoue" (with Hartwig Derenbourg), Paris, 1880.

"Deux Versions Hébraïques du Livre de Kalilâh et Dimnâh," Paris, 1881.

"Talmud," in the "Encyclopédie des Sciences Religieuses," by Lichtenberger, xii., Paris, 1882.

"Etudes sur l'Epigraphie du Yémen" (with Hartwig Derenbourg), in the "Journal Asiatique" for 1882-84.

"Les Monuments Sabéens et Himyarites du Louvre" (with Hartwig Derenbourg), Paris, 1885.

"Les Inscriptions Phéniciennes du Temple de Seti à Abydos" (with Hartwig Derenbourg), Paris, 1885.

"Le Livre des Parterres Fleuris," Hebrew grammar in Arabic, by Abu al-Walid Merwan ibn Janaḥ, Paris, 1886, the text published in anonymous conjunction with W. Bacher.

"Commentaire de Maïmonide sur la Mischnah, Seder Tohorot," 3 parts, Berlin, 1887-89.

"Johannis de Capua Directorium Humanæ Vitæ, Alias Parabola Antiquorum Sapientum," Paris, 1889.

"Corpus Inscriptionum Semiticarum; Pars Quarta, Inscriptiones Himyariticas et Sabæas Continens" (with Hartwig Derenbourg), i.-ii., Paris, 1889-92.

"Texte Arabe de l'Isaïe de Saadia," in Stade's "Zeitschrift," ix., x., Giessen, 1889-90.

"Œuvres Completes de R. Saadia ben Joseph al-Fayyoûmi," edited under his general supervision. I., "Version Arabe du Pentateuque," Paris, 1893; VI., "Version Arabe des Proverbes" (with Mayer Lambert), Paris, 1894.

"La Version Arabe de Isaïe," Paris, 1896, and "La Version Arabe du Livre de Job," edited by Hartwig Derenbourg, Paris, 1899.

Saadia*, Introduction, Paris, 1899.

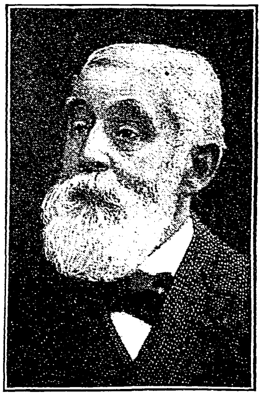
s. H. D.

Derenbourg, Hartwig: French Orientalist; son of Joseph Derenbourg; born in Paris June 17, 1844. He attended the lycées Charlemagne and Bonaparte (now Condorcet). He studied Hebrew, Arabic, and other Semitic languages under Reinaud, Ulmann, chief rabbi of France, and his father, in Paris; under Ewald, Bertheau, and Wüstenfeld, in Göttingen; under Fleischer and Krehl, in Leipsic. In 1866, after taking his degree in Göttingen, he was engaged at the Bibliothèque Impériale, continuing the preparation of the catalogue of Arabic manuscripts, discontinued since 1859. His father-in-law, Hermann Joseph Baer, the well-known bookseller of Frankfort-on-the-Main, placed him in 1871 at the head of the Paris branch of his house. In 1875 he received two almost simultaneous calls: one as professor of Arabic and



Hartwig Derenbourg.

Semitic languages to the Jewish Theological Seminary of Paris, and the other as instructor in Arabic grammar to the Ecole Speciale des Langues Orientales Vivantes. In April, 1879, he was called to occupy, at the latter institution, the chair of literary Arabic, which had been vacant since Reinaud's death in 1867.

In 1880 the minister of public instruction entrusted him with the investigation of the Arabic manuscripts in the Escurial and in the other libraries of Spain. On his return Ernest Renan had Derenbourg made assistant to the commission upon Semitic inscriptions at the Académie des Inscriptions et Belles-Lettres, being especially entrusted, under the direction of his father, Joseph Derenbourg, with the Himyaritic and Sabean section. In 1884 he was appointed professor of Arabic at the Ecole des Hautes-Etudes, and in 1885 professor of Islamism and of the religions of Arabia in the religious section of the same school.

In Feb., 1897, he was decorated with the cross of the Legion of Honor, and in June, 1900, he was elected member of the Institute (Académie des Inscriptions et Belles-Lettres). He is also honorary member of the Academy of History in Madrid, of the Institut Egyptien in Cairo, of the Society of Biblical Archeology in London, and a member of many other scientific societies.

Hartwig Derenbourg takes a lively interest in Jewish affairs. He is a member of the central committee of the Alliance Israélite Universelle and of the council of the Société des Etudes Juives, having become its president in 1890; and continual vice-president of the administrative board of the Ecole de Travail Israélite. He is, further, one of the founders and directors of the Grande Encyclopédie.

The following is a list of his principal works:

"De Pluralibus Linguæ Arabicæ," Göttingen, 1867.

"Quelques Observations sur l'Antiquité de la Déclinaison dans les Langues Sémitiques," Paris, 1868.

"Le Dîwân de Nâbiga Dhobyânî," Paris, 1869.

"Catalogue des Manuscrits Arabes de la Bibliothèque Impériale," 4 vols., 1866–70.

"Notes sur la Grammaire Arabe," Paris, 1869–71.

"Histoire Littéraire de l'Ancien Testament," translated from the German of Nöldeke in collab. with Jules Soury, Paris, 1873.

"Le Livre de Sîbawaihi," 2 vols., Paris, 1881–89.

"Les Manuscrits Arabes de l'Escurial," i., Paris, 1884; ii., Part I., *ib.*, 1899.

"Chrestomathie Elémentaire de l'Arabe Littéral" (with Jean Spiro), Paris, 1885; 2d ed., Paris, 1892.

"La Science des Religions et l'Islamisme," Paris, 1886.

"Ousâma Ibn Mounḳidh," the Arabic text of his "Autobiography," Paris, 1886. French transl. 1895.

"Souvenirs Historiques et Récits de Chasse" (French translation of Ousâma's "*Autobiography*"), Paris, 1895.

"Silvestre de Sacy, Une Esquisse Biographique," Leipsic, 1886; Paris, 1892 and 1895; Cairo, 1903.

"Yemen Inscriptions," the Glaser collection in the British Museum, London, 1888.

"Catalogue des Manuscrits Judaïques Entrés au British Museum de 1867 à 1890," Paris, 1891.

"Les Monuments Sabéens et Himyarites de la Bibliothèque Nationale, Cabinet des Médailles et Antiques," Paris, 1891.

"Une Epitaphe Minéene d'Egypte," two memoirs, Paris, 1893 and 1895.

"Ibn Khâlawaihi, Livre Intitulé Laisa," in "Hebraica," 1894–1901 (unfinished).

"Al-Fakhrî d' Ibn Ṭiḳṭaḳâ," a new edition of the Arabic text, Paris, 1895.

"Les Croisades d'Après le Dictionnaire Géographique de Yaḳoût," Paris, 1895.

"Oumâra du Yémen, Sa Vie et Son Œuvre," Paris, 1897–1903.

"Les Monuments Sabéens et Ḥimyarites du Musée d'Archéologie de Marseille," Paris, 1899.

"Corpus Inscriptionum Semiticarum; Pars Quarta, Inscriptiones Ḥimyariticas et Sabæas Continens," iii., Paris, 1900.

"Les Manuscrits Arabes de la Collection Schefer à la Bibliothèque Nationale," Paris, 1901.

"Notice sur la Vie et les Travaux de Maximin Deloche," Paris, 1901; 2d ed., Tulle, 1902.

"Michele Amari, la Vie d'un Historien et Orientaliste Italien," Paris, 1902.

"Nouvelles Inscriptions Yéménites Inédites," Paris, 1902.

To this list must be added numerous articles which appeared in the "Journal des Savants," the "Journal Asiatique," the "Revue Critique," the "Revue des Etudes Juives," the "Revue d'Assyriologie et Archéologie Orientale," the "Revue de l'Histoire des Religions," etc.

S.

DERNBURG, HEINRICH: German jurist; born at Mayence March 3, 1829; brother of Friedrich Dernburg. The Dernburgs are related to the French family of Derenbourg, which, before its settlement in France, was called "Dernburg" (see Derenburg). Dernburg was educated at the gymnasium of Mayence and the universities of Giessen and Berlin, graduating from the latter in 1851. In the same year he became privat-docent of the juridical faculty of the University of Heidelberg. In 1852 he was called to Zurich as assistant professor, and was appointed professor in 1855. In 1862 he accepted a similar position in the University of Halle, which he represented in the Prussian Herrenhaus (Upper House) from 1866 to 1873, when he became professor of Roman and Prussian law in the University of Berlin. He reentered the Herrenhaus in 1873. With Brinckmann and others he founded in 1851 the "Kritische Zeitschrift für die Gesammte Rechtswissenschaft."

Among his works may be mentioned: "Geschichte und Theorie der Kompensation," Heidelberg, 1854; 2d ed., 1868; "Das Pfandrecht," Leipsic, 1860–64; "Die Institutionen des Gaius, ein Kollegienheft aus dem Jahre 161 nach Christi Geburt," Halle, 1869; "Lehrbuch des Preussischen Privatrechts und die Privatrechtnormen des Reiches," *ib.* 1871–80; "Das Vormundschaftsrecht der Preussischen Monarchie," Berlin, 1875; 3d ed., edited by Schultzenstein, 1886; "Das Preussische Hypothekenrecht" (with Hinrichs), Leipsic, 1877–91; "Pandekten," *ib.* 1884–87; 6th ed., 1900–01; "Die Königliche Friedrich-Wilhelms-Universität Berlin in Ihrem Personalbestande seit Ihrer Einrichtung bis 1885," *ib.* 1885; "Das Bürgerliche Recht des Deutschen Reiches und Preussen," Halle, 1898–1900.

The father of Dernburg and his whole family became Christians.

DERUSH. See Homiletics and Midrash.

DERZHAVIN, GAVRIIL ROMANOVICH: Russian poet and senator; born at Kazan July 15, 1743; died at Zvanka, government of Novgorod, July 20, 1816. In 1799 Derzhavin was commissioned by Emperor Paul to investigate a complaint made by the Jews of Shklov against General Zorich, the owner of that town. The latter was accused by them of oppression and extortion; and it became the duty of Derzhavin to assume the guardianship of Zorich's estate, and to sift the matter thoroughly. During his stay in Shklov the dissensions between the sects of Mitnagdim and Ḥasidim were very bitter, passions rose high, and unfounded accusations were made. Under such conditions much transpired that was not creditable to the Jewish community, and undoubtedly Derzhavin noted it. The Jews were encouraged in their complaint by Kutaisov, a favorite of the czar. Kutaisov desired to get possession of Zorich's estate; and he knew that by proving the accusations against Zorich the estate would be confiscated and sold at auction. Derzhavin realized this; but, although on terms of friendship with Kutaisov, he was loath to become the means of helping him. Derzhavin's scruples combined with the dissensions among the Jews prejudiced the poet against them; and notwithstanding the evident abuse by Zorich of his prerogative, and in spite of the undoubted truth of many accusations against Zorich, Derzhavin reported in his favor, and he was acquitted.

Report on Jews of White Russia.

In the following year Derzhavin was again sent to White Russia, in order to investigate the causes of a famine there, and to formulate a plan for aiding the starving peasants. He was commissioned at the same time to study the economic condition of the Jews in that region, and to present a report on the subject, with suggestions as to the measures to be taken in order to eliminate the supposed harmful influence exerted by their "unscrupulous dealings" on the lower classes of the population. Derzhavin, in collecting the materials for his report, made an extended journey through the province. In a comparatively short time he obtained from various sources—sources occasionally of doubtful value—a considerable mass of data bearing directly not only on the economic condition of the Jews of White Russia, but also on their social, communal, and religious life. In Sept., 1800, Derzhavin prepared in Vitebsk his celebrated "Mnyenie ob Otvrashchenii v Byelorussii Goloda i Ustroistvye byta Yevreyev" (Opinion as to the Protection of White Russia from Famine, and on the Organization of the Status of the Jews). Looking carefully into the condition of the Jews, Derzhavin saw clearly that temporary measures would not be sufficient to remedy existing evils. The Jews of Russia were in an anomalous and unnatural condition; for the old Polish laws and those of Lithuania were defective and equivocal. When, therefore, a commission was appointed in 1804 by Alexander I. to consider remedial legislation, Derzhavin's "Opinion" had great weight with it.

Derzhavin's "Opinion."

Derzhavin's plan called for the creation of a protectorate over the Jews; the protector to advise the czar personally as to the best measures to be taken for the moral uplifting of the Jew, so that he might in time be considered worthy to become a subject. Notwithstanding the more liberal attitude of Speranski, Derzhavin's "Opinion" decidedly influenced the commission. In his report Derzhavin's prejudice against the Jews is very manifest, and is often carried to ludicrous extremes. Thus he concludes, from the custom of the Orthodox Jews of keeping their heads covered, that the Jews consider themselves "of all peoples the most excellent." He associates the frequent occurrence of certain names, such as Moses, Abraham, etc., to a desire on the part of their owners to conceal their individual identity, and states that the Jew hoards money for no other purpose than to rebuild the Temple in Palestine, whither he ever expects to return. One of the redeeming features of the "Opinion" is its recommendation of the establishment of schools for the Jews in order to facilitate their education; but even here Derzhavin insists that corporal punishment should be inflicted on the delinquents of that "stubborn race."

Nathan Naṭa (Notkin), a merchant of Shklov, supplied Derzhavin with much valuable information on the economic and moral condition of the Jews of White Russia, and suggested methods by which they might be made more useful citizens; *e.g.*, by teaching them agricultural and industrial pursuits (see Agricultural Colonies in Russia).

While Derzhavin adopted Notkin's suggestions and embodied them in his report, he nevertheless couched the whole in terms decidedly unfair to the Jews; as a result he and Notkin became estranged. That the enactment of Dec. 9, 1804, was, nevertheless, favorable to the Jews (see Alexander I., Pavlovich), was due to Notkin's exertions. Notkin's opposition angered Derzhavin to such an extent that he called his former protégé "the Jew Notka," and even asserted that Notkin had attempted to bribe him.

H. R. J. G. L.—H. R.

DESCENT, LAW OF. See Agnates.

DESECRATION: The act of diverting from a sacred to a common use. It was forbidden, as being an act of desecration, to use the anointing-oil of the sanctuary for common purposes, or even to prepare oil like it, or to prepare for common use incense similar to that used in the sanctuary. The punishment for any of these transgressions was excision from the people of Israel ("karet," Ex. xxx. 33, 38). All objects used in connection with the Temple service—as the utensils employed in the ritual—the sacrifices, the clothing of the attendant priests, and the building itself were considered sacred, and their use for common purposes was therefore prohibited. Any one who knowingly appropriated any of these objects for his own use was liable to the penalty of stripes; if the act was committed unwittingly, he was required to bring a sacrifice, and to pay one-fifth more than the value of the object misused (Lev. v. 14; Maimonides, "Yad," Me'ilah, i. 1, 2).

Not only could no sacred object be diverted to a common use, but it could not even be exchanged. If a man consecrated an animal that could be used as a sacrifice and then exchanged it for another, he suffered the punishment of stripes, and both animals remained sacred. It made no difference whether

Exchange of Sacred Objects Forbidden.

the exchange was for a better or for a worse animal; the holy object could in neither case be desecrated, nor could it be used for another purpose equally sacred (Tem. 32a; Maimonides, *l.c.* iv. 11). If, however, the animal was such as could not be offered on the altar, the owner might redeem it by paying the value of the animal and an additional fifth. The same law applied to all other objects which were not of immediate use in the Temple service (Lev. xxvii. 9; "Yad," Temurah, i. 1 *et seq.*).

Worn-Out Objects to be Buried.

With regard to the use of the synagogue and its appurtenances, the Rabbis laid down the following general rule: "We may ascend with holy things, but not descend"—that is, holy objects may be used for a holier purpose, but not for one less holy (Shab. 21b). On this principle, objects used in worship were classified and graded according to their sanctity. A community might sell its synagogue and use the money in building an academy, but not the reverse. The appurtenances of the synagogue were graded as follows: the scroll of the Law; other sacred books; the mantle of the scroll; the Ark, where the scroll is deposited; the table upon which it is placed while being read; the synagogue itself being the least sacred. The money realized from the sale of a synagogue may be used in buying an Ark or a table, and so on; but the reverse is forbidden (Meg. 26a; "Yad," Tefillah, xi. 14; Shulḥan 'Aruk, Oraḥ Ḥayyim, 153, 1). The scroll of the Law must never be sold, and when it becomes old and unfit for use, it must be placed in an earthen vessel and buried near the tomb of a scholar. Torn books or pages of books of the Scriptures, and all the accessories of holy objects, as the mantle of the scroll, the sheath of the mezuzah, the straps of the tefillim, and so forth, must not be diverted to any common use, but must be buried (see Genizah). Objects which are used in the performance of certain commandments, as the "sukkah" (booth), "lulab" (palm-branch), "shofar" (ram's horn), "ẓiẓit" (fringes), etc., may be thrown away after they have become useless. It is not permitted to make any use of the light of the Ḥanukkah candles, even for such a holy use as studying the Law (Meg. 26b; "Yad," Sefer Torah, x. 3; Oraḥ Ḥayyim, 154, 673, 1).

The Rabbis permitted an individual to sell the scroll of the Law only when he needed the money for the purpose of studying the Law or for the purpose of marrying; otherwise the possessor of a copy of the scroll of the Law must never sell it, even when he needs the money for the necessities of life (Meg. 27a; "Yad," Sefer Torah, x. 2; "Kesef Mishneh" *ad loc.*; Shulḥan 'Aruk, Yoreh De'ah, 270, 1).

L. G. J. H. G.

DESERT. See Wilderness.

DESERTION: Leaving husband or wife with the intention of not returning. It must be premised that, if the husband deserted his wife and went beyond the jurisdiction of the court, he could not be compelled to give her a bill of divorce; and if he remained away and was never heard of again, the wife was never free from the bond of matrimony (see 'Agunah), because it was always the husband who was presumed to grant a divorce, even though at the suit of the wife, under the order of the court.

There is no proceeding known in Jewish law analogous to a modern suit for divorce on the ground of the husband's desertion, in which the divorce is granted judicially in the absence of the husband and without his consent. Further, in Jewish law there is no presumption of death from absence. Therefore the woman who was deserted by her husband remained his wife until she received a bill of divorce from him, or until his death was legally proved.

Change of Residence.

There are cases in Jewish law which may technically be deemed cases of desertion, in which the wife was entitled to receive a bill of divorce from her husband *before* he left the jurisdiction of the court. If a wife living in a foreign country desired to remove to Palestine, or if, living in Palestine, she desired to remove to the city of Jerusalem, and if her husband refused to accompany her or to allow her to remove, he was at her instance compelled by the court to give her a bill of divorce. If she was living in Jerusalem and he desired her to remove to a foreign country or even some other city in Palestine, or, if living elsewhere in Palestine, he desired her to remove to some foreign country, she had a right to refuse to accompany him, because she was not obliged to expatriate herself (Ket. 110b; compare Domicil). If she feared that he would then desert her, she could appeal to the court, and her husband would be compelled before leaving to give her a bill of divorce for the time being (Shulḥan 'Aruk, Eben ha-'Ezer, 154, 8).

This divorce for desertion was granted only in the above cases, and did not apply to countries other than Palestine or to cities other than Jerusalem; and the reason for this is to be found in the special favor with which the people looked upon the Holy Land and the Holy City. They were deemed to be dwelling-places par excellence of the Jews, and this fact established the right of the wife to refuse to follow her husband in case he desired her to remove. Many authorities are therefore of the opinion that these rules did not apply after the destruction of the Temple (compare Asher ben Jehiel to Ket. 110b).

Under the later law the principle was extended; and if a man was about to leave the jurisdiction of the court of any country to go to another country, he was either placed under oath not to desert his wife, or, if he insisted upon going, was compelled to grant her a bill of divorce (Shulḥan 'Aruk, Eben ha-'Ezer, 154, 8, 9).

Refusal to Accompany Husband.

Desertion by the wife occurred either if she actually abandoned her husband's domicil, or if she refused to follow her husband to another domicil. She was obliged to follow him only from one place to another in the same country, or from any other country into Palestine, or to Jerusalem from any other place in Palestine. For such desertion the husband could give her a bill of divorce, and she lost all of her property rights under the marriage contract (Ket. 110b).

An exception to this rule may be noted. If a man dwelling in one country married a woman dwelling in another, she was obliged to follow him to his domicil; for that was an implied condition of the marriage, or perhaps may have been an expressed condition in the marriage contract. In case of her refusal to follow him, she was technically deemed guilty of desertion; and her husband could divorce her, she losing her property rights under the marriage contract. Compare Domicil.

L. G. D. W. A.

DESSAU: Chief town of the duchy of Anhalt, North Germany, on the left bank of the Mulde. The settlement of Jews here dates from 1621. The introduction of debased coins had ruined the finances of the duchy, and Duke Johann Casimir permitted Jews to settle at Dessau as purveyors of silver to the mint. They were forbidden to export money, and had to prevent its exportation by others. The permit was, however, of short duration. The calamities consequent upon the Thirty Years' war made it impossible to reestablish the finances of the duchy. The Jews were therefore banished. In 1672 Duke Johann Georg readmitted them; and some Jews settled at Dessau. In 1685 there were only 26 families. Moses Wulff, a descendant of Moses Isserles, banished from Berlin at the instigation of his powerful enemy, Jost Liebmann, the court factor, settled with his family at Dessau and became court factor of Johann Georg II. Combining learning with philanthropy, and being of a religious turn of mind, he exerted his great influence for the welfare of the newly established community, which soon became a center of scientific activity. A bet ha-midrash was founded by the Wulff family. At its head was Rabbi Benjamin Wolf, author of "'Ir Binyamin," who was succeeded by Isaac Itzig Gerson, or, as he later called himself, Joseph Isaac Gerson (1708–35).

Moses Wulff.

Graveyard of the Dessau Community Showing Tombstone of Mendelssohn's Father to the Right.

(From Freudenthal, "Aus der Heimat Mendelssohns.")

After the death of Moses Wulff (1729) the material prosperity of the community (which had increased to about 700 persons) diminished. His son Elijah succeeded him in the office of court factor; but the family had become impoverished, and with it the community also declined. Still, enlightened rabbis and scholars like David Hirshel Fränkel, the rosh ha-yeshibah Hirsh, Moses Fränkel, and others, made it a center of learning; and from Dessau came Moses Mendelssohn. A source of intellectual development for the first half of the nineteenth century was the Franzschule. Founded in 1799 as a primary school for poor children, five years later it was transformed, with the sanction of the government, into a Jewish high school. For sixty years it enjoyed the highest reputation throughout Germany. Its director, David Fränkel, and such teachers as Joseph Wolf, Gotthold Solomon, and Moses Philippson, attracted pupils from far and near.

The Franzschule.

The community of Dessau led in the struggle for the emancipation of the German Jews. A German monthly entitled "Sulamith," devoted to Jewish interests and culture, was published for eight years (1806–14) by David Fränkel and Joseph Wolf. But the Dessau-Anhalt government continued until 1848 to consider the Jews as "Schutzjuden." No foreign Jew was allowed to settle in the town without a special permit, and the Dessau Jews were restricted to a special quarter. Even after 1848 the government endeavored to limit the right of the Jews to election to the Parliament, and maintained for a long time the oath "more Judaico." It was probably on this account that between 1850 and 1895 the Jewish population of Dessau fell from about 1,000 to 406.

During the greater part of the nineteenth century the rabbinate of Dessau was in an extremely chaotic state. Rabbi succeeded rabbi with extraordinary rapidity; for many years the post was vacant, and the duties of the rabbinate were partially performed by the teachers of the Franzschule. The rabbis since 1870 have been: Dr. Saalfeld (1870–81); Schönberger (1881–84); Dr. Samson Weisse (1884–1893); Dr. Max Freudenthal (1893–1900); Dr. Isidor Walter (1900). In 1886 the government issued regulations concerning Jewish worship, according to which a chief rabbi for Anhalt, with his seat at Dessau, was to be nominated and supported by the government.

Dessau possesses an imposing synagogue in the Oriental style (restored in 1861), and a monument to Moses Mendelssohn erected on the centenary of his death.

——**Typography:** A Hebrew printing-office was established at Dessau in 1694 by court factor Moses Benjamin Wulff. The privilege obtained for this purpose included both Hebrew and German, but Wulff availed himself only of the former, the enterprise not being undertaken with a desire for gain, but to conserve and advance Jewish learning. The first work published by him (1696) was a ritual entitled "Tefillah le-Mosheh," to which were appended prayers for women in Judæo-German, entitled "Minḥat 'Ani." The type for the Judæo-German was set up by a girl of nine years—Ellah, daughter of Moses of Holland. In 1704 the work of the press was suspended, owing to the great losses Wulff had sustained in his transactions with the court of Gotha. His son Elijah reestablished the office in 1742, but discontinued it in 1743. The first work issued by the latter was the Sifra with a commentary, "Ḳorban Aharon," by Aaron ben Ḥayyim; the last was the "Ḳorban ha-'Edah," on the Jerusalem Talmud, by David Fränkel. In 1783 another office was established by C. Schilder, which continued into the second half of the nineteenth century.

DESSAU, MOSES. See MENDELSSOHN, MOSES.

DESSAU, MOSES B. MICHAEL: Talmudist of the eighteenth century; called "Dessau" after the town in which he lived. He is the author of (1) novellæ published in 1724—haggadic annotations to the Talmudic tractates Berakot, Shabbat, and Ḳiddushin, and halakic novellæ to Pesaḥim and Ketubot; and (2) "Zikron Mosheh" (Memorial of Moses), published in 1765—novellæ on various haggadic and halakic subjects. He also edited and annotated "Sha'are Dura" (Gates of Dueren), by Isaac b. Meïr of Dueren.

DESSAU, WOLF. See WOLF B. JOSEPH OF DESSAU.

DESSAUER, FERDINAND (DESSOIR, FERDINAND AUGUST): German actor; son of Leopold DESSAUER; born at Breslau Jan. 29, 1836; died in Dresden April 15, 1892. He was trained for the stage by Werner Mannheim, and made his début in 1852 as the *Prince* in "Dorf und Stadt." In the following year he went to Mayence, where he remained until 1855, when he appeared at Heidelberg. Vienna was his next engagement, in 1856; followed in 1857 by Stettin; 1857–61, Leipsic; 1861–63, Bremen; 1863–64, Weimar. From 1864 to 1867 he played at the Hoftheater, Berlin; after which he returned to Weimar, in 1868. He next went to the Lobetheater, Breslau, in 1868–69. The following seven years were spent at the Hoftheater, Dresden; from 1877 to 1878 at the Thalia Theater, Hamburg; from 1878 to 1879 at the Residenz Theater, Dresden; and in 1880 he played at Prague.

Dessauer became insane during a performance, and never acted again. His principal rôles were *Kaufmann Bloom*, *Mephisto*, *Falstaff*, *Muley Hassan*, *Riccaut*, *Chalisac*, and *Hans Lange*.

S. E. MS.

DESSAUER, GABRIEL L.: Hungarian rabbi and author; born at Neutra, Hungary, in 1805; died June 1, 1878. He became a pupil of R. Moses Sopher (Schreiber) at Presburg, and was for forty years rabbi at Balaton-Kojár, on the Plattensee, where he died. He published the following works: "Das Buch Hiob: Uebersetzt und Commentirt," Presburg, 1838; "Yad Gabriel" (Gabriel's Hand), novellæ about the slaughtering of animals as contained in the ritual codex in Shulḥan 'Aruk, Yoreh De'ah, *ib.* 1838; "Ha-Ariel," a commentary on the Talmudic utterances of R. bar bar Ḥana, Budapest, 1859; "Shire Zimrah," to a part of Genesis, an appendix to Hartwig Wessely's "Shire-Tif'eret," with a commentary entitled "Degel ha-Lewi"; finally, "Homiletische Skizzen," Ofen, 1862.
S. M. K.

DESSAUER, JOSEF: German composer; born at Prague May 28, 1798; died at Mödling, near Vienna, July 8, 1876; a pupil of Tomaczek (piano) and Dionys Weber (composition). In compliance with the wishes of his parents, Dessauer first devoted himself to a mercantile career. At the age of twenty-three, upon one of his commercial tours, he visited Italy, where his musical bent received a powerful stimulus.

In 1821, owing to the favorable reception accorded at Naples to several of his canzonettas and other vocal compositions, Dessauer determined to devote himself exclusively to composition. He settled in Vienna, from which city he made numerous European tours to introduce his compositions; and his songs, which were distinguished by considerable melodic beauty, soon secured for him international fame. In the "Hofmeister Catalogue" for 1844 nearly seventy of these canzonettas, ariettas, etc., are enumerated.

Less successful were his operas, "Lidwinna" (Prague, 1836), "Ein Besuch in Saint-Cyr" (Dresden, 1838), "Paquita" (Vienna, 1851), "Domingo" (1860), and "Oberon" (not performed). Neither these nor his instrumental works are now performed: only a few of his songs, such as the well-known air "Scheiden und Meiden," having maintained their popularity and being still reprinted. The Schlesingers of Berlin, who included most of these compositions in their catalogue for 1900, publish the following list: "3 Slavische Lieder"; "9 Wanderlieder von Uhland" ("Lebewohl," "Scheiden und Meiden," "In der Ferne," "Morgenlied," "Nachtreise," "Winterreise," "Abreise," "Einkehr," "Heimkehr"); and two song collections of ten numbers each, including "Verschwiegenheit," "Das Gebet," "Wie Glücklich," "Am Strande," "Ich Denke Dein," "Das Zerbrochene Ringlein."

S. J. SO.

DESSAUER, JULIUS: Hungarian writer; son of Gabriel L. Dessauer; born at Neutra 1832. He was for some years rabbi at Ujpest. He has published the following works: "Die Fünf Bücher Moses. Nebst dem Raschi-Commentar, Punktirt, Leichtfasslich Uebersetzt und mit Anmerkungen Versehen," Budapest, 1863; 2d ed., 1887; "Schulchan Aruch, Orach Hayyim, Deutsch Bearbeitet," in two parts, *ib.* 1868; "Spruch-Lexikon des Talmud und Midrash," *ib.* 1876; "Schlüssel zum Gebetbuche," *ib.* 1878; "Perlenschatz: Philosophische Sentenzen in Alphabetischer Reihenfolge," *ib.* 1880; "Der Jüdische Humorist," *ib.* 1899.

S. M. K.

DESSAUER, LEOPOLD (DESSOIR, LUDWIG): German actor; born at Posen Dec. 15, 1810; died Dec. 30, 1874, in Berlin. Dessauer, who was known during his stage career as "Dessoir," was the son of a Jewish merchant. He made his début in the theater of his native town in 1825, playing *Nanky* in Körner's "Toni." Then he traveled about the country, appearing at Coburg, Schönebeck, Wriezen, Krossen, Wiesbaden, and Mayence, eventually playing *Tell* at Potsdam. This was the real beginning of his career, and in 1834 he went to the Stadttheater, Leipsic, where, in the following year, he married the leading woman, Theresa Reimann. The union proved an unhappy one, and in 1836 Dessauer obtained a divorce and left Leipsic for the Stadttheater, Breslau, where he remained until 1837. Two years of starring followed at Prague, Brünn, Vienna (Burgtheater), and Budapest, after which he succeeded Devrient at Karlsruhe. In 1847 he went to Berlin, where he played, with few interruptions, until July 10, 1872. In 1853 he appeared in London.

Dessauer was by many considered a greater artist than Dawison, whose most serious rival he was. The former, it is true, was handicapped by lack of figure, looks, and, to some extent, voice; yet so considerable was his talent that he was among the foremost Shakespearian actors. His *Othello*—first played at Berlin Oct. 6, 1849—*Lear*, *Shylock*, *Hamlet*, *Antony*, *Brutus*, *Coriolanus*, *King John*, *Macduff*, and *Iachimo* were classical creations. Scarcely less clever were his *Bolingbroke*, *Uriel Acosta*, *Faust*, *Tasso*, *Alba*, *Gessler*, *Narciss*, *Caligula* ("Fechter von Ravenna"), *Louis XI.* ("Gringoire"), *Perin* ("Donna Diana"), and *Marinelli* ("Emilia Galotti").

Dessauer's life was greatly embittered by his marital misfortunes, for his second wife, Helene Pfeffer, whom he married in 1844, became insane on the death of their child.

DESSAUER, MORITZ: German rabbi and author; son of Gabriel L. Dessauer; born at Balaton-Kojár, Hungary, May 24, 1842; died April 17, 1895, at Meiningen. He pursued his Talmudic studies at Vár-Palota and Stuhlweissenburg, and attended subsequently the rabbinical seminary and the university at Breslau. In 1871 he went as preacher to Köthen, becoming, in 1881, district rabbi at Meiningen. He published the following works: "Spinoza und Hobbes: Begründung Ihrer Staats- und Religionstheorien Durch Ihre Philosophischen Systeme," Breslau, 1868; "Daniel, in Sieben Kanzelreden für das Neujahrsund Versöhnungsfest," *ib.* 1875; "Der Sokrates der Neuzeit und Sein Gedankenschatz: Sämmtliche Schriften Spinozas Gemeinverständlich und Kurz Gefasst," Köthen, 1878; "Der Deutsche Plato: Erinnerungsschrift zu Moses Mendelssohn's 150jährigem Geburtstage," Berlin, 1879; "Blüthen und Knospen der Humanität aus der Zeit von Reuchlin bis Lessing," Zurich, 1881; "Humanität und Judenthum," Leipsic, 1885.

Bibliography: Human, *Geschichte der Juden im Herzogtum S.-Meiningen-Hildburghausen*, pp. 72 *et seq.*, Hildburghausen, 1898.

S. M. K.

DESSOFF, FELIX OTTO: German conductor and composer; born Jan. 14, 1835, in Leipsic; died Oct. 28, 1891, at Frankfort-on-the-Main; studied with Moscheles, Plaidy (piano), Hauptmann (composition), and Reitz (instrumentation) at the Leipsic Conservatory (1851–54). Graduating with high honors, he first became musical director of the Actientheater at Chemnitz, and during the following six years successively conducted opera-orchestras in Altenburg, Düsseldorf, Cassel, Aix-la-Chapelle, and Magdeburg. In 1860, when only twenty-five years of age, he was appointed leader of the orchestra at the Imperial Opera at Vienna, and in the same year he was elected director of the famous Philharmonic concerts. Several months later he received an appointment as teacher of thorough-bass and composition in the Vienna Conservatory. From 1875 to 1881 he was court kapellmeister at Karlsruhe, and then became the first kapellmeister at the Stadttheater, Frankfort.

Dessoff was at one time perhaps the leading conductor of his day. Although not a strict adherent of the Mendelssohn school, his virtuosity, technical finish, and careful attention to detail stamped his performances as models. His influence upon the development of the Philharmonic Society can scarcely be overestimated; and it was largely due to his initiative that this important musical institution of Vienna was placed upon a secure financial and artistic basis.

DESSOIR, LUDWIG. See Dessauer, Leopold.

DETERMINISM. See Fatalism and Free-Will.

DETMOLD. See Lippe.

DETMOLD, JOHANN HERMANN: German diplomat; born at Hanover July 24, 1807; died there March 17, 1856. He was the son of Detmold, the court physician at Hanover, who, with his whole family, joined the Christian Church. Detmold received his education at the universities of Göttingen and Heidelberg. Admitted to the bar, he established himself as a lawyer in his native town in 1830. He took an active interest in politics as a Conservative, and in 1838 was elected a member of the Hanoverian Diet. His opposition to the new constitution and his attacks upon the government, both in the Chamber and in the press, led to a brief imprisonment. In 1848 he was elected to the German Parliament sitting at Frankfort-on-the-Main, where he allied himself with the deputies of the Right. He remained an uncompromising reactionist. In 1848, after the refusal of Frederick William IV. to accept the German crown, he became secretary of justice, and soon afterward was appointed secretary of the interior in the short-lived German government. When the "Reichsverweser" in 1849 dismissed the government, Detmold returned to Hanover, but was again sent to Frankfort, this time as representative of the King of Hanover, with the title of "Legationsrat." He held the position until 1851, when he was recalled. The last years of his life were spent in Hanover.

During his juridical and diplomatic career Detmold found time for the cultivation of the arts, the last five years of his life being especially devoted to artistic interests. He was a fluent speaker and writer, and his political controversies developed a considerable power of satire and invective.

Detmold is the author of "Anleitung zur Kunstkennerschaft," Hanover, 1833; 2d ed., 1845—an incisive and witty criticism of artistic conditions in Hanover; "Randzeichnungen," Brunswick, 1843—a political essay; "Thaten und Meinungen des Herrn Piepmeyer," Frankfort-on-the-Main, 1849—a satirical pamphlet on the politics of the Frankfort Parliament.

DETMOLD, SAMUEL: Austrian educator and translator; lived at the end of the eighteenth and in the first half of the nineteenth century. He was one of the collaborators on the German translation of the Bible which was published by a number of the "Meassefim," Breslau, 1822–27. Detmold translated the books of Daniel, Ezra, Nehemiah, and the Chronicles. He is also the author of a Hebrew primer with the title "Moreh Derek" (Guide of the Road), Vienna, 1815.

L. G.

DETROIT: Largest city in the state of Michigan. No authentic records of the settlement of Jews in the vicinity of Detroit, or in the state of Michigan, are found earlier than the middle of the nineteenth century. Even then the settlers were few in number and to a great extent interrelated. Most of them were of Bavarian stock. Among the earliest are found the names of Silberman, Hirsch, Cohen, Schloss, Bendit, Sloman, Heineman, and Kanter.

The first organization of Jews in Detroit was effected during the summer of 1850, when the Beth El Society, from which a few years later sprang Congregation Beth El, was established. Like all congregations of that period this one was Orthodox in its ritual, but it was not long before the Reform spirit began to create divisions in the community. In 1861 a large number of the members withdrew because of the introduction of an organ and a mixed choir into the synagogue, and formed the Sha'are Zedek congregation, which is to-day the leading organization of the Orthodox Jews of the city. The pulpit of congregation Beth El has been occupied by a number of well-known rabbis, including Liebman Adler, Isidore Kalisch, Kaufmann Kohler, Henry Zirndorf, and Louis Grossman. This congregation brought Kohler and Zirndorf to America. The present (1902) rabbi is Leo M. Franklin.

In a total population of 300,000 there are about 12,000 Jews, of whom 60 per cent are (1902) of Russian and Polish origin. Besides Temple Beth El, which is now the home of a Reform congregation, there are in the city the congregations Sha'are Zedek, Beth Jacob, Beth David, and Benai Israel, all of which worship in their own synagogues and according to the Orthodox ritual. A number of hebrahs assemble only on the holidays. Each congregation has its own cemetery. The Orthodox Jews maintain a Talmud Torah, and have recently dedicated a modern and commodious school building for that purpose.

Until the fall of 1899 there were not less than nine Jewish charitable institutions in Detroit, but at that time all except one were federated under the title "Union of Jewish Charities." This organization, with headquarters in its own building, carries on practically every branch of educational, philanthropic, and relief work. Most of the Jewish secret orders have lodges in Detroit, and there are three Jewish social clubs, the Phœnix, the Fellowship, and the Standard. The Jewish Woman's Club, with a membership of 250, does excellent educational work. The city supports a Jewish weekly, "The Jewish American," which is the organ of Temple Beth El and other congregations.

A. L. M. F.

DEUTERONOMIST: The name given by critics to the author of the discourses in Deuteronomy. See DEUTERONOMY.

DEUTERONOMY (דברים): The fifth book of the Pentateuch, called in Hebrew "Debarim" (Words), from the opening phrase "Eleh ha-debarim"; in Rabbinical Hebrew it is known also as "Mishneh Torah." The English appellation is derived from the name which the book bears in the Septuagint (Δευτερονόμιον) and in the Vulgate (*Deuteronomium*); and this is based upon the erroneous Septuagint rendering of "mishneh ha-torah ha-zot" (xvii. 18), which grammatically can mean only "a repetition [that is, a copy] of this law," but which is rendered by the Septuagint τὸ Δευτερονόμιον τοῦτο, as though the expression meant "this repetition of the law." While, however, the name is thus a mistranslation, it is not inappropriate; for the book does include, by the side of much new matter, a repetition or reformulation of a large part of the laws found in the non-priestly sections (known as "JE") of Exodus.

——**Biblical Data:** The book of Deuteronomy consists in the main of the discourses which Moses is represented as having delivered, immediately before his death (i. 3), on the other side of Jordan for the purpose of teaching the Israelites the laws which they were to obey, and the spirit in which they were to obey them, when they should be settled in the Promised Land. Disregarding introductions and other subsidiary matter, the contents of the book may be summarized as follows:

Ch. i. 6–iv. 40: Moses' first discourse, consisting (i.–iii.) of a review of the providential guidance of the Israelites through the wilderness to the border of the Promised Land, and concluding (iv.) with an eloquent appeal not to forget the great truths, especially the spirituality of their God, impressed upon them at Horeb.

Ch. v.–xxvi., xxviii. 1–xxix. 1: Moses' second discourse, containing the exposition of the Deuteronomic law, and forming the central and most characteristic portion of the book. It consists of two parts: (1) ch. v.–xi., a hortatory introduction, developing the first commandment of the Decalogue, and inculcating the general theocratic principles by which Israel, as a nation, is to be governed; (2) ch. xii.–xxvi., the code of special laws, followed (xxviii. 1–xxix. 1) by a solemn rehearsal of the blessings and curses attached respectively to the observance and neglect of the Deuteronomic law.

[Ch. xxvii. consists of instructions (interrupting the discourse of Moses, and narrated in the third person) relative to a ceremony by which the nation, after entering Canaan, is to symbolize its ratification of the preceding code; see Josh. viii. 30–35.]

Ch. xxix. 2–xxx. 20: Moses' third discourse, emphasizing afresh the fundamental duty of loyalty to Yhwh and the dangers of apostasy.

Ch. xxxi.–xxxiv.: Moses' last words of encouragement addressed to the people and to Joshua; his song (xxxii. 1–43) and blessing (xxxiii.); the account of his death (xxxiv.).

It is characteristic of the discourses of Deuteronomy that the writer's aim is throughout parenetic: both in the two historical retrospects (i.–iii., ix. 9–x. 11). and in passing allusions elsewhere (as xi. 2–6; xxiii. 4, 5; xxiv. 9), he appeals to history for the sake of the lessons deducible from it; and in his treatment of the laws, he does not merely collect or repeat a series of legal enactments, but he "expounds" them (i. 5); that is, he develops them with reference to the moral and religious purposes which they subserve, and to the motives from which the Israelite ought to obey them. It is a further characteristic of the discourses that they are, in both the historical and the legal parts, dependent upon the narrative and laws, respectively, of JE in Exodus and Numbers; entire phrases from the earlier document being frequently embedded in them (compare Deut. i. 33, 35, 36 with Ex. xiii. 21, and Num. xiv. 23, 24 respectively; and Deut. xvi. 16, 19 with Ex. xxiii. 6, 8, 17).

The Laws in Deuteronomy.

The following is an outline of the laws in Deuteronomy, the asterisk (*) denoting those laws which are peculiar to Deuteronomy, and the dagger († or ‡) those which differ more or less materially in their provisions from those in JE and P respectively. For a more complete synoptical table see Driver's "Introduction to the Literature of the O. T." 7th ed., pp. 73 *et seq.*, or his Commentary on Deuteronomy, pp. iv. *et seq.*

i. **Religious Observances:**

1. Law of single sanctuary, xii. 1–28‡ (burnt offerings, sacrifices [*i.e.*, peace-offerings], tithes, heave-offerings [first-fruits and other offerings from the produce of the soil], vows, free-will offerings, and firstlings, all to be offered at the central sanctuary).
2. Laws against the worship of "other gods," xii. 29–31, xiii*.
3. Sanctity of the laity, xiv. 1–21 (person not to be disfigured in mourning, xiv. 1–2; law of clean and unclean animals, xiv. 3–20; flesh of animals dying a natural death not to be eaten, xiv. 21).
4. Laws tending to ameliorate the condition of the poor, xiv. 22–xv. 18 (disposition of the charitable tithe, xiv. 22–29‡; relief secured to debtors every seventh year, xv. 1–11†‡; law of slavery, xv. 12–18†‡).
5. Offerings and festivals (firstling males to be offered to Yhwh, xv. 19–23‡; regulations respecting the observance of the three annual pilgrimages, xvi. 1–17‡).

ii. **The Office-Bearers of the Theocracy:**

1. Judges to be appointed in every city, xvi. 18*; and judgment to be impartial, xvi. 19, 20.

   [Ch. xvi. 21–22, asherahs and "pillars" prohibited; xvii. 1, sacrifices to be without blemish; xvii. 2–7, an Israelite convicted of idolatry to be stoned to death*.]
2. The supreme central tribunal, xvii. 8–13*.
3. The king, xvii. 14–20 (theocratic conditions which the monarchy is to satisfy*).
4. Rights and revenues of the priestly tribe, xviii. 1–8*.
5. The prophet, xviii. 9–22* (verses 10, 11 against different forms of magic and divination—expansion of Ex. xxii. 18).

iii. **Criminal Law:**

1. Manslaughter and murder, xix. 1–13 (cities of refuge†).
2. Against removal of boundary-stones, xix. 14*.
3. Law of witness, xix. 15–21 (compare xvii. 6).

   [Four laws designed to secure self-control and forbearance in the conduct of war, xx.* and xxi. 10–14*; compare xxiv. 5*.]

iv. **Miscellaneous Laws Relating Chiefly to Civil and Domestic Life:** Symbolical rite of expiation for an untraced murder, xxi. 1–9*; primogeniture, xxi. 15–17*; treatment of an undutiful son, xxi. 18–21*; treatment of the body of a malefactor, xxi. 22–23*; lost cattle or other property to be restored to owner, xxii. 1–4; sexes not to interchange garments, xxii. 5*; mother-bird not to be taken with nest, xxii. 6, 7*; parapets on roofs, xxii. 8*; prohibition of non-natural mixtures and combinations, xxii. 9–11; law of fringes, xxii. 12; slander against a newly married maiden, xxii. 13–21*; adultery and seduction, xxii. 22–29; prohibition of marriage with stepmother, xxii. 30; conditions of admittance into the theocratic community, xxiii. 1–8*; cleanliness in the camp, xxiii. 9–14‡; humanity to escaped slave, xxiii. 15–16*; religious prostitution forbidden, xxiii. 17–18*; usury (interest), xxiii. 19–20; vows, xxiii. 21–23; regard for neighbor's crops, xxiii. 24–25*; divorce, xxiv. 1–4*; pledges, xxiv. 6, 10–13; man-stealing, xxiv. 7; leprosy, xxiv. 8–9; wages of hired servant not to be detained, xxiv. 14–15; criminal's family not to be punished with him, xxiv. 16*; justice toward "stranger" (*i.e.*, resident foreigner), widow, and orphan, xxiv. 17–18; gleanings, xxiv. 19–22; limit to stripes, xxv. 1–3*; ox not to be muzzled while threshing, xxv. 4*; levirate marriage, xxv. 5–10*; modesty in women, xxv. 11, 12*; just weights and measures, xxv. 13–16; liturgical directions for the offering of first-fruits and of the triennial tithe, xxvi. 1–15*.

The moral and religious duties which form the subject of the imprecations in xxvii. 15–26 should likewise be noted, as also the injunctions occurring in other parts of the book, or introduced more or less incidentally in xii.–xxvi—as v. 6–21 (the Decalogue, repeated, with variations in the subordinate clauses, from Ex. xx. 2–17); vi. 8 and xi. 18 (the law of frontlets); vi. 14 and xi. 16 (against "other gods"); xii. 16, 23–25, and xv. 23 (blood not to be eaten); xix. 21 ("the lex talionis)."

——**Critical View: I.** If the Deuteronomic laws are compared carefully with the three codes con- in Exodus and Numbers, it will be apparent that tained they stand in a different relation to each:

(1) The laws in JE—namely, Ex. xx.–xxiii. (repeated partially in Ex. xxxiv. 10–26), and the kindred section, Ex. xiii. 3–16—form the *foundation of the Deuteronomic legislation.* This is evident partly from the numerous verbal coincidences referred to above—whole clauses, and sometimes even an entire law, being repeated verbatim—and partly from the fact that frequently a law in Deuteronomy consists of an expansion, or application to particular cases, of a principle laid down more briefly in Exodus (compare, for instance, Deut. xiii., xvii. 2–7, with

Ex. xxii. 20; Deut. xvi. 1–17 with Ex. xxiii. 14–17; and Deut. xviii. 10, 11 with Ex. xxii. 18). The civil and social enactments which are new in Deuteronomy make provision chiefly for cases likely to arise in a more highly organized community than is contemplated in the legislation of Ex. xx.–xxiii.

(2) With the laws contained principally in Lev. xvii.–xxvi. (the law of holiness, known as "H"), there are parallels in Deuteronomy (chiefly moral injunctions); but though in such cases the substance is often similar, the expression is nearly always different (compare, for instance, Deut. xiv. 1 with Lev. xix. 28; Deut. xvi. 19, 20 with Lev. xix. 15; Deut. xxiv. 19–22 with Lev. xix. 9, 10); and it can not be said that the legislation of Deuteronomy is in any sense an expansion or development of that in Lev. xvii.–xxvi. The one exception is the description of clean and unclean animals in xiv. 4a, 6–19a, which agrees in the main verbally with Lev. xi. 2b–20.

Relation to Other Codes.

(3) With the ceremonial laws contained in the other parts of Leviticus, and in Numbers (P), Deuteronomy is only remotely related: there are no verbal parallels. Some of the institutions and observances codified in P are indeed mentioned, as, for instance, burnt and peace-offerings, fire-sacrifices, heave-offerings, the distinction between clean and unclean, a Torah for leprosy (xxiv. 8); but they are destitute of the central significance which they hold in the system of P; while many of the fundamental institutions of P—as the distinction between the priests and the common Levites; the Levitical cities and the year of jubilee; the cereal-offering; the guilt- and sin-offering; the great Day of Atonement—are not referred to in Deuteronomy at all; and in the laws which do touch common ground, great, and, indeed, in some cases, irreconcilable, discrepancies frequently display themselves. Thus the Deuteronomic legislation may be termed an expansion of the body of laws contained in JE; it is, in several features, parallel to that contained in H; it contains allusions to laws similar to—it can not be said identical with—those codified in some parts of P; while its provisions sometimes differ widely from those found in other parts of P.

Aim and Scope of Deuteronomy.

The Deuteronomic discourses may be said to comprise three elements—a historical, a legislative, and a parenetic. Of these the parenetic element is both the most characteristic and the most important; for it is devoted to the inculcation of certain fundamental religious and moral principles upon which the writer lays great stress. The historical element is subservient to the parenetic, the references to history, as has been already remarked, having nearly always a didactic aim. The legislative element, though obviously, in many of its features, tending directly to secure the national well-being, and possessing consequently an independent value of its own, is by the writer of Deuteronomy viewed primarily as a vehicle for exemplifying the principles which it is the main object of his book to enforce. The author wrote, it is evident, under a keen sense of the perils of idolatry; and to guard Israel against this, by insisting earnestly on the debt of gratitude and obedience which it owes to its sovereign Lord, is the fundamental teaching of his book. Accordingly the truths on which he loves to dwell are the sole godhead of Yhwh, His spirituality (Deut. iv.), His choice of Israel, and the love and faithfulness which He has manifested toward it; from which are deduced the great practical duties of loyal and loving devotion to Him, an absolute and uncompromising repudiation of all false gods, a warm and spontaneous obedience to His will, and a large-hearted and generous attitude toward men.

The Love of God.

The central and principal discourse (v.–xxvi., xxviii.) opens with the Decalogue; and the first commandment, "Thou shalt have no other gods before me," may be said to be the text which in the rest of ch. v.–xi. is eloquently and movingly expanded. Yhwh is, moreover, a spiritual being: hence no sensible representation can be framed of Him. Still less should Israel's devotions be paid to any other material object (iv. 12, 15–19). Yhwh has chosen Israel; and, in fulfilment of the promises given to its forefathers, has wonderfully delivered it from its bondage in Egypt, and assigned it a home in a bounteous and fertile land, to take possession of which it is now on the point of crossing the Jordan (vi. 10, 11; viii. 7–10). In return for all these benefits it is the Israelite's duty to fear and to love Yhwh—to fear Him as the great and mighty God, whose judgments strike terror into all beholders (iv. 32–36, xi. 2–7); and to love Him on account of the affection and constancy with which, even as a father, He has ever dealt with Israel. The love of God, an all-absorbing sense of personal devotion to Him, is propounded in Deuteronomy as the primary spring of human duty (vi. 5); it is the duty which is the direct corollary of the character of God and of Israel's relation to Him: the Israelite is to love Him with undivided affection ("with all thine heart, and with all thy soul," vi. 5; xiii. 3; xxx. 6; and elsewhere—an expression characteristic of Deuteronomy), renouncing everything that is in any degree inconsistent with loyalty to Him.

This brings with it, on the one hand, an earnest and entire repudiation of all false gods, and of every rite or practise connected with idolatry; and, on the other hand, a cheerful and ready acquiescence in the positive commandments which He has laid down. Of nothing is the Israelite more repeatedly and emphatically warned in Deuteronomy than of the temptations to idolatry, and of the perils of yielding to them. The heathen populations of Canaan are to be exterminated; no intermarriage, or other intercourse with them, is to be permitted; and their places of worship and religious symbols are to be ruthlessly destroyed (vii. 2–5; xii. 2, 3). Israel must ever remember that it is "holy" to Yhwh (vii. 6; xiv. 2, 21; xxvi. 19; xxviii. 9). Canaanitish forms of divination and magic are not to be tolerated; an authorized order of prophets is to supply in Israel, so far as Yhwh permits it, the information and counsel for which other nations resorted to augurs and soothsayers (xviii. 9–19). Local shrines and altars, even though ostensibly dedicated to the worship of the true God, were liable to contamination, on the part of the unspiritual Israelites, by the admixture of heathen rites; accordingly, the three great annual feasts are to be observed, and all sacrifices and other religious dues are to be rendered, it is repeatedly and strongly insisted, at a single central sanctuary, "the place which Yhwh shall choose . . . to set his name there" (xii. 5–7, 11, 14, 18, 26, and elsewhere). Obedience to these commands, if it come from the heart and be sincere, will bring with it the blessing of Yhwh: disobedience will end in national disaster and exile (vi. 14–15, vii. 12–16, viii. 19, and especially xxviii.).

Love of Neighbors.

The practical form which devotion to Yhwh is to take is not, however, to be confined to religious duties, strictly so called. It is to embrace also the Israelite's social and domestic life, and it is to determine his attitude toward the moral and civil ordinances prescribed to him. The individual laws contained in ch. xii.–xxvi. are designed for the moral and social well-being of the nation; and it is the Israelite's duty to obey them accordingly. Love of God involves the love of one's neighbor, and the avoidance of any act which may be detrimental to a neighbors' welfare. The Israelite must comport himself accordingly. Duties involving directly the application of a moral principle are especially insisted on, particularly justice, integrity, equity, philanthropy, and generosity; and the laws embodying such principles are manifestly of paramount importance in the writer's eyes. Judges are to be appointed in every city, who are to administer justice with the strictest impartiality (xvi. 18–20). Fathers are not to be condemned judicially for the crimes of their children; nor children for the crimes of their fathers (xxiv. 16). Just weights and measures are to be used in all commercial transactions (xxv. 13–16); grave moral offenses are punished severely; death is the penalty not only for murder, but also for incorrigible behavior in a son, for unchastity, for adultery, and for man-stealing (xxi. 18–21, xxii. 20–27, xxiv. 7).

But the author's ruling motive is humanity, wherever considerations of religion or morality do not force him to repress it. Thus philanthropy, promptitude, and liberality are to be shown toward those in difficulty and want—as the indigent in need of a loan (xv. 7–11); a slave at the time of his manumission (xv. 13–15); a fugitive (xxiii. 15, 16); a hired servant (xxiv. 14, 15); the "stranger [*i.e.*, resident foreigner], the fatherless, and the widow" (xiv. 29, and frequently elsewhere). Gratitude and a sense of sympathy, evoked by the recollection of Israel's own past, are frequently appealed to as the motives by which the Israelite should in such cases be actuated (x. 19, "For ye were strangers in the land of Egypt"; xv. 15; xvi. 12; xxiv. 18, 22, "and thou shalt remember that thou wast a bondman in the land of Egypt"). A spirit of forbearance, equity, and regard for the feelings or welfare of others underlies also many of the other regulations of Deuteronomy. Nowhere else in the Old Testament does there breathe such an atmosphere of generous devotion to God and of large-hearted benevolence toward men; nowhere else are duties and motives set forth with deeper feeling or with more moving eloquence; and nowhere else is it shown so fully how high and noble principles may be made to elevate and refine the entire life of the community.

Song and Blessing of Moses.

The Song of Moses, contained in chap. xxxii. 1–34, is a didactic poem, the aim of which (verses 4–6) is to exemplify the rectitude and faithfulness of Yhwh as manifested in His dealings with a corrupt and ungrateful nation. Looking back upon the past, the poet, after the exordium (verses 1–3), describes, first, the providence that had brought Israel safely through the wilderness, and planted it in a land blessed abundantly by the goodness of Yhwh (verses 7–14); secondly, Israel's ingratitude and lapse into idolatry (verses 15–18), which had obliged Yhwh to threaten it with national disaster, and to bring it almost to the verge of ruin (verses 19–30); and thirdly, Yhwh's determination not to allow an unworthy foe to triumph over His people, but by speaking to them through the extremity of their need to bring them to a better mind, and so to make it possible for Himself to interpose and save them (verses 31–43). The thought underlying the poem is thus the rescue of the people, by an act of grace, at the moment when annihilation seems imminent. The author develops this theme with a glow of impassioned earnestness, and also with great literary and artistic skill.

Chap. xxxiii. contains the "Blessing of Moses," consisting of a series of benedictions, or eulogies, pronounced upon the different tribes (Simeon excepted), with an exordium (verses 2–5) and a conclusion (verses 26–29). The method of the author is to signalize some distinctive feature in the character, or occupation, or geographical situation of each tribe, with allusion, by preference, to the theocratic function discharged by it, and at the same time to celebrate the felicity, material and spiritual, of the nation as a whole, secured to it originally by Yhwh's goodness in the wilderness (verses 2–5), and maintained afterward, through the continuance of his protecting care, in Canaan (verses 26–29). In general character it resembles the blessing of Jacob (Gen. xlix. 1–27): but if the two be compared attentively, there will be seen to be some noticeable points of difference. The most salient features in Deut. xxxiii. are the isolation and depression of Judah (verse 7; contrast the warm eulogy in Gen. xlix. 8–12), the honor and respect with which Levi is viewed (verses 8–11; contrast the unfavorable terms of Gen. xlix. 5–7), the strength and splendor of the double tribe of Joseph (verses 13–17; compare Gen. xlix. 22–26, with which there are some verbal resemblances), and the burst of grateful enthusiasm with which the poet celebrates the fortune of his nation, settled and secure, with the aid of its God, in its promised home. The tone of the blessing is very different from that of the song (xxxii.): the one reflects national happiness; the other, national disaster. The two, it is evident, must have been composed at times in which the circumstances of the nation were very different.

It is the unanimous opinion of modern critics that Deuteronomy is not the work of Moses, but that it was, in its main parts, written in the seventh century B.C., either during the reign of Manasseh, or during that of Josiah (but before his eighteenth year, the Book of the Law found in that year in the

Temple [see II Kings xxii.–xxiii.] clearly containing Deuteronomy, if indeed it included anything more).

Age and Authorship of Deuteronomy.

The reasons for this conclusion, stated here in the briefest outline, are as follows: (1) Even upon the assumption that JE in Exodus and Numbers is Mosaic, the historical discrepancies in Deut. i.–iv. and ix.–x., and the terms in which incidents belonging to the fortieth year of the Exodus are referred to, preclude the possibility of Deuteronomy being Mosaic likewise; while the use of the expression "beyond Jordan" in i. 1, 5; iii. 8; iv. 41, 46, 47, 49, for eastern Palestine, implies that the author was a resident in western Palestine. (2) The same conclusion follows, a fortiori, for those who allow that JE is a post-Mosaic document, from the fact, noticed above, that JE itself, both in the narrative parts and in the laws, is repeatedly quoted in Deuteronomy. (3) In Deuteronomy it is strictly laid down that sacrifice is to be offered at a single central sanctuary (xii. 5, 11, 14, etc.); whereas in Joshua to I Kings vi. sacrifices are frequently described as offered in various parts of the land (in accordance with the law of Ex. xx. 24), without any indication on the part of either the actor or the narrator that a law such as that of Deuteronomy is being infringed. (4) The other differences between the legislation of Deuteronomy and that of Ex. xxi.–xxiii. point with some cogency to the conclusion that the laws of Deuteronomy originated in a later and more highly developed stage of society than the laws of Exodus. (5) The law of the kingdom (xvii. 14–20) is colored by reminiscences of the monarchy of Solomon. (6) The forms of idolatry referred to—especially the worship of the "host of heaven" (iv. 19, xvii. 7)—point to a date not earlier than the reign of Ahaz, and more probably to one in the seventh century B.C. (7) The influence of Deuteronomy upon subsequent writers is clear and indisputable. It is remarkable that Amos, Hosea, and the undisputed portions of Isaiah show no certain traces of this influence, while Jeremiah exhibits marks of it on nearly every page. If Deuteronomy had been composed between Isaiah and Jeremiah, these facts would be exactly accounted for. (8) The language and style of Deuteronomy—clear and flowing, free from archaisms, but purer than that of Jeremiah—would suit the same period. (9) The prophetic teachings of Deuteronomy—the leading theological ideas and the principles which the author seeks to inculcate—exhibit many points of contact with that of Jeremiah and Ezekiel, and especially with the characteristic principles of the compiler of the Book of Kings (who must have lived in the same age).

Influence on Subsequent Writers.

Upon these grounds (which, when studied in detail, are seen to possess far greater cogency than can be conveyed by a mere summary) it is concluded by modern critics that Deuteronomy is in reality a work of the seventh century B.C. It is not difficult to realize the significance which the book must have had if it were written at this time. It was a great protest against the prevalent tendencies of the age. It laid down the lines of a great religious reform. The century was one in which—as Jeremiah and the Books of Kings sufficiently testify—heathenism was making serious encroachments in Judah. The Book of Deuteronomy was an endeavor by means of a dramatic use of the last words of Moses—based, not improbably, upon an actual tradition of a concluding address delivered by the great leader to his people—to reaffirm the fundamental principles of Israel's religion (namely, loyalty to Yhwh and the repudiation of all false gods) and to recall the people to a holier life and to a purer service of Yhwh. So far as its more distinctively legal parts are concerned, Deuteronomy may be described as the *prophetic reformulation and adaptation to new needs of an older legislation* (namely, the laws contained in JE). It is essentially the work not of a jurist or statesman, but of a prophet: a system of wise laws (iv. 6–8), consistently obeyed, is indeed, as explained above, a condition of the welfare of the community; but the points of view from which these laws are presented, the principles which the author evidently has at heart, the oratorical treatment, and the warm parenetic tone, are all characteristic of the prophet, and are all the creation of the prophetic spirit.

Its Composite Character.

[For reasons which can not be here developed, the discourses of Deuteronomy do not appear to be all from the same hand. The kernel of the book consists of ch. v.–xxvi. and xxviii.; and this, no doubt, constituted the book found in the Temple by Hilkiah. It was probably preceded by ch. i.–iv. (with the exception of a few verses here and there which seem to be of later origin), though most modern critics are of opinion that these chapters were prefixed to it afterward. Some little time after the kernel of Deuteronomy was composed, it appears to have been enlarged by a second Deuteronomic writer (D^2), who supplemented the work of his predecessor (D^1) by adding ch. xxvii., xxix. 10–29, xxx. 1–10, and some other short passages in xxix.–xxxiv., together with the song (xxxii. 1–43) and the historical notices belonging to it (xxxi. 16–22, xxxii. 44). Finally, at a still later date, the whole thus formed was brought formally into relation with the literary framework of the Hexateuch as an entirety by the addition of some brief extracts from P (i. 3, xxxiv. 1 and 5 [partly], 7–9). At what stage in the history of the text the blessing (xxxiii.) was introduced is uncertain. The song was probably written in the age of Jeremiah; the blessing is earlier, being assigned by most critics to the reign of Jeroboam II.]

Style of Deuteronomy.

The style of the Deuteronomic discourses is very marked. Not only do particular words and expressions, embodying often the writer's characteristic thoughts, recur with remarkable frequency, giving a distinctive coloring to every part of his work, but the long and rolling periods in which the author expresses himself—which have the effect of carrying the reader with them and holding him enthralled by their oratorical power—are a new feature in Hebrew literature. The author has a wonderful command of Hebrew style. His practical aims, and the parenetic treatment which as a rule his subject demands, oblige him naturally to expand and reiterate more than is usually the case with Hebrew writers; nevertheless, his discourse, while never (in the bad sense of the term) rhetorical, always maintains its freshness, and is never monotonous or prolix.

The influence of Deuteronomy upon the later literature of the Old Testament is very perceptible. Upon its promulgation it speedily became the book which both gave the religious ideals of the age and molded the phraseology in which these ideals were expressed. The style of Deuteronomy, when once it had been found, lent itself readily to adoption; and thus a school of writers, imbued with its spirit, quickly arose, who have stamped their mark upon many parts of the Old Testament. As has been just remarked, even the original Deuteronomy itself seems in places to have received expansion at the hands of a Deuteronomic editor (or editors). In the historical books, especially Joshua, Judges, and Kings, passages—consisting usually of speeches, or additions to speeches, placed in the mouths of prominent historical characters, or of reflections upon the religious aspects of the history—constantly recur, distinguished from the general current of the narrative by their strongly marked Deuteronomic phraseology, and evidently either composed entirely, or expanded from a narrative originally brief, by a distinct writer; namely, the Deuteronomic compiler or editor. Among the Prophets, Jeremiah, especially in his prose passages, shows most conspicuously the influence of Deuteronomy; but it is also perceptible in many later writings, as in parts of Chronicles, and in the prayers in Neh. i., ix., and Dan. ix.

BIBLIOGRAPHY: Of recent commentaries reference may be made to those of Dillmann (1886), Driver (1895; 2d ed., 1896), Steuernagel (1898), and Bertholet (1899); and with reference to sources, the *Oxford Hexateuch* (1900), i. 70–97, 200 *et seq.*, ii. 246 *et seq.*, may be mentioned.

J. JR. S. R. D.

——**Critical View: II.** Scientific criticism denies both the unity and the authenticity of Deuteronomy, and brings forward definite theories regarding its composition, date of writing, and place in the development of law and religion. The critical problems presented by this book are especially difficult, and the way in which they are solved is decisive not only for the criticism of the whole of the Pentateuch, but for the total conception of the religion of the O. T. and its development. The book is divided on the whole as follows: the Deuteronomic law proper, xii.–xxvi.; the parenetic introduction, v.–xi., and peroration, xxvii.(xxviii.)–xxx.; and the historical setting; that is, the introduction, i.–iv., and the peroration to the whole book, xxxi. to end.

Analysis of Sources.

Nearly all critics agree that the introduction, i.–iv. 40 (43), can not be the work of the author of v.–xi., or v.–xxvi., as (1) it contains contradictions to that portion, namely, ii. 14 (also i. 35–39) to v. 3 (also vii. 19—ix. 2–23, xi. 2), ii. 29 to xxiii. 5, and iv. 41–43 to xix. 2; (2) iv. 45–49, the superscription, is incompatible with that in i. 5; (3) the introduction i.–iv. is different in motive, being historic and not parenetic. This historical introduction was written by a Deuteronomist (D^2); that is, an author writing in the style and spirit of Deuteronomy at a time when the Jahvist-Elohist narrative (JE) of the preceding books, Exodus–Numbers, was not yet united with Deuteronomy (Reuss, Hollenberg, Kuenen, Wellhausen, Cornill, Steuernagel, etc.). But as, after the combination of JE with Deuteronomy the narrative portion in the latter was duplicated, the original narrative, which also included iv. 41–43 and ix. 25–x. 11, was, according to Dillmann, changed by the Deuteronomic editor (Rd) into a speech by Moses, excepting the passages ii. 10–12, 20–23; iii. 9, 11, 14; iv. 41–43; x. 6, 7, which were not suited for the purpose. Therefore i.–iii. are by the author of Deuteronomy and iv. 1–40 was added by Rd in order to give a parenetic ending to his speech of Moses. Horst also separates i.–iii. from iv. 1–40. Portions from ch. ix. and x. also belong to i.–iii., in the following sequence: ix. 9b, 11, 12–14, 25–29, 15, 16, 21, 18–20; x. 1–5, 10, 11; then followed i. 6–iii. 29, i. 6–8 preceding i. 9–18. Ch. ii. 10–12, 20–23; iii. 9, 11b, 13b–14; x. 6–9 are marginal notes by a learned reader. Ch. iii. 29 is followed by xxxi. 1–8, and ch. xxxiv. constitutes the end. Horst, in other words, constructs from the historical notes in i.–xi. a chronological account of the events in the wilderness after the Law had been promulgated. Steuernagel, finally, considers all the passages with the address in the singular (i. 21, 31a; ii. 7, etc.) as later interpolations.

All these source-analyses, and the separation of i.–iv. from the rest of the book, to which only Hoonacker has hitherto objected, are inadmissible, for (1) the supposed contradictions do not exist; (2) i. 5 is no superscription, while i. 1 is an epilogue to Num. (Knobel, Herxheimer, Klostermann); and (3) all the critics have misunderstood the import of the introduction, ch. i.–iv., which is not a historical or chronological account, but in its general character and in its details a single and continuous reproof based upon Israel's guilt contrasted with God's manifold mercies, and therefore as clearly of a parenetic nature as are the other parts of the book.

Variations of Analysis.

Ch. v.–xi.: Wellhausen holds that this passage does not belong to the original Deuteronomy as it is too long for an introduction: "Moses is forever trying to get at his point, but never gets to it." Wellhausen is followed by Valeton, who designates v. 5, vii. 17–26, ix. 18–20, 22, 23, x. 1–10a, 18–20, xi. 13–21 as interpolations, and by Cornill, who considers only x. 1–9 as such, and designates this parenetic introduction as Dp in contrast to the historical i.–iv., Dh.; D'Eichthal, on the other hand, distinguishes three documents: (1) a glorification of God and Israel—v. 1–3, 29 *et seq.*; vi. 1–25; vii. 7–24, 1–6, 25, 26; (2) exhortations to humility—viii. 1–20; ix. 1–8, 22–24; (3) a further glorification of Israel—x. 21 *et seq.*; xi. 1–28, 32. According to Horst, the Law begins in ch. v., into which parenetic insertions (vii. 6b–10, 17–24; viii.; ix. 1–9a, 10, 22–24; x. 12–xi. 12, 22–25 [26–32]) have been forced. Steuernagel distinguishes in v.–xi. two combined introductions to the Law—namely, one with the plural form of address: v. 1–4, 20–28; ix. 9, 11, 13–17, 21, 25–29; x. 1–5, 11, 16, 17; xi. 2–5, 7, 16–17, 22–28; and another with the singular form of address: vi. 4–5, 10–13, 15; vii. 1–4a, 6, 9, 12b–16a, 17–21, 23–24; viii. 2–5, 7–14, 17–18; ix. 1–4a, 5–7a; x. 12, 14–15, 21 (22?); xi. 10–12, 14–15. Kuenen, Oettli, König, and Strack ("Einleitung," 4th ed., p. 42) object to the separation of v.–xi., which is in fact entirely unnecessary, and makes of xii.–xxvi. a fragment, this splitting up into fragments resting on no other foundation than the fiction that a briefer original Deuteronomy had been in existence to accommodate an impatient reader limited in time.

Ch. xii.–xxvi.: Since the assertion of Wellhausen ("Composition des Hexateuchs," p. 194), that the main division of the book has also been worked over, sources, interpolations, etc., have likewise been discovered within this part. In ch. xii. Vater had already assumed two duplicates—verses 5-7 parallel to 11, 12, and 15-19 parallel to 20-28—this opinion being shared by Cornill and in part by Stade ("Gesch. Israels," i. 658). Steinthal even distinguishes seven fragments in this chapter: (1) 1-7; (2) 8-12; (3) 13-16; (4) 17-19; (5) 20, 26-28; (6) 21-25; (7) 29-31 and xiii. 1. Nearly the same is assumed by Stärk. D'Eichthal divides xii. into two documents: (1) 1-3, 29-31; (2) 4-28. Horst thinks that 4-28 is a combination of four different texts. Steuernagel divides the chapter thus: (1) 1; (2) 2-12, subdivided into (3) 2; (4) 4-7; (5) 8-10; (6) 13-27, subdivided into (7) 15, 16; (8) 22-25; and (9) 28. Underlying all these efforts to split its chapters into fragments and parts of fragments is a misconception of the style of Deuteronomy.

The following, among other criticisms, may be mentioned: Beginning with Wellhausen, almost all critics consider xv. 4, 5 as a gloss or correction to xv. 7, 11, because they do not take into account the meaning and connection. The passage xvi. 21-xvii. 7 is in the wrong place, according to Wellhausen, Cornill, Stärk, and others, while Valeton and Kuenen admit this only of xvi. 21-xvii. 1. Wellhausen, Stade, Cornill, and others do not include the "king's law," xvii. 4-20, in Deuteronomy. In ch. xxiii. verses 3-9 have been objected to by Geiger, Wellhausen, Stade, and Valeton, while Kuenen rejects their criticism. D'Eichthal finds contradictions between xxvi. 3, 4 and xxvi. 11; Horst, between xxvi. 1-15 and xiv. 22-29. The latest critics, Stärk and Steuernagel, have gone furthest in rearranging and cutting up the text. Starting with the twofold mode of address —singular and plural—both assume that two works were combined, each of which again, according to Steuernagel, was based on a number of different sources. These and other critics (1) forget that the categories of the critic are not necessarily those of the author; (2) fail to explain how the present discrepancies were derived from a previous orderly arrangement, for in view of the continual change of address a separation of passages based on it can be effected only by resorting to violence; (3) should first have examined whether the noteworthy changes in the forms of address have no internal warrant. While it is possible that xii.-xxvi. has been subjected to many revisions, changes, and interpolations, as a legal code naturally would be, nothing to that effect can be proved.

Supposed Sources of xxvii.-xxx.

Ch. xxvii.-xxx.: Kuenen criticizes xxvii. as follows: Not attributable to the Deuteronomist are: (1) 1-8, because they include an earlier account—5-7a; and (2) 11-13, because they refer back to xi. 29-30, although misunderstanding the passage. Verses 14-26 constitute a later interpolation; hence only 9, 10 remain for D^1. This opinion is shared by Ewald, Kleinert, Kayser, Dillmann. According to Wellhausen, xxviii. does not agree with xxvii.; xxviii.-xxx. are parallel to xxvii., each being a different conclusion to two different editions of the chief part, xii.-xxvi. corresponding to the two prefaces i.-iv. and v.-xi. Ch. xxviii. itself lacks unity. Valeton ascribes only 1-6, 15-19 to the author of the hortatory v.-xi., considering all else as later expansions. Kleinert considers 28-37 and 49-57 as later interpolations. Dillmann also assumes numerous interpolations by a later editor. In the two following chapters Kleinert considers xxix. 21-27 and xxx. 1-10 as interpolations. Kuenen ascribes both chapters to another author.

Ch. xxi.-xxxiv.: Not only the critics but also the apologists refuse to consider these closing chapters, wholly or in part, as due to the author of Deuteronomy proper. (1) xxxi. 1-8, parallel to Num. xxvii. 15-23, is a continuation of iii. 28 *et seq.*, by the same author; xxxi. 9-13 forms the close of the law-book, xxx. 20; (2) xxxi. 14-30 serves as introduction to the song of Moses, belonging with it to the passages incorporated later in Deuteronomy; ch. xxxii. 44-47 is the ending to the song, and to xxxi. 15-29; 48-52 are taken from the Priestly Code (P); (3) xxxiii. is an old document incorporated by the editor; (4) xxxiv., Moses' death, is combined from different accounts; the following verses are taken from P: 1a and 5 (revised), 7-9 (Dillmann); 1-7a, 8, 9 (Wellhausen); 1a, 8, 9, 1a, 7a, 8, 9 (Kuenen); 1a, 8, 9 (Cornill). To J belong: 1b, 4 (Dillmann); 1b-7 (Cornill). To JE belong: 10 (Dillmann); 2-7, 10-12 (Wellhausen; revised); 1b-3, 5-7b, 10 (Kuenen). To D belong: 1a β 6 (revised), 11, 12 (Dillmann); and 1b β 2-3, an interpolation. According to Wellhausen, 2-7, 10-12, Kuenen 4-6, 7a, 11-12, Cornill 10-12, are editorial interpolations.

Date and Tendency.

Ranke, Hävernick, Hengstenberg, Baumgarten, Fr. W. Schultz, Keil, Kühel, Bissel, and other apologists ascribe the book to Moses. This view is criticized on the following grounds: (1) The account of the discourses of Moses, their writing and transmission (xxxi. 9, 24-26; xxviii. 58, 61; xxix. 19, 20, 26; xxx. 11; xvii. 18 *et seq.*), can not be by Moses. (2) Moses can not possibly have written the story of his death, nor compared himself with later prophets (ch. xxxiv.). (3) A later time is indicated by ii. 12 ("as Israel did"), by iii. 9-11, 14 ("unto this day"; comp. Judges x. 4 and i. 44 with i. 17); and by xix. 14 ("of old time"). (4) The writer speaks of the country east of the Jordan as "on this side" (i. 1, 5; iv. 41-49), though referring in the speeches to the western country (iii. 20, 25; xi. 30: in iii. 8 vice versa): therefore, he is in Palestine. (5) Although Israel is represented as about to enter Canaan, the language necessitates the inference that Israel is already settled in that country, engaged in agriculture or living in cities, under an organized government. (6) The book assumes a long period of development as regards politics and the state ("king's law": supreme court), religion (allusions to fundamental religious principles and the law of the Prophets; emphasis on the centralization of worship), and worship (position of the priests and Levites; gifts to the sanctuary). (7) The book uses sources that can be proved to be post-Mosaic. The precise dates given, however, vary.

Kleinert is of the opinion that the book was composed about the end of the period of the Judges, perhaps even by Samuel or by a contemporary of Samuel, and certainly in a truly Mosaic spirit. The legislation occupies a middle ground in relation to that of the earlier books. As pre-Deuteronomic may be proved: Ex. xx.–xxiii., xxxiv. 11–26, xix. 5 *et seq.*, xiii. 1–13; Lev. xvii. 18 *et seq.*; Num. xxxiii. 50 *et seq.*, iii. 12 *et seq.*; the principal enactments in Lev. xviii.–xx.; the content of Ex. xii. 1–14, 21–23, 43–50; Lev. xiii. xiv. Post-Deuteronomic: Lev. xi., xv. 16 *et seq.*, xvii. 15 *et seq.*, xxii. 17 *et seq.*, xxiii., xxv. 39 *et seq.*, xxvii. 26–30 *et seq.*; Num. xv. 37 *et seq.*; xviii. 15, 21 *et seq.*; xxviii., xxix. Moses' blessing, xxxiii., dates from the early time of the Judges. Ch. xxxi. 14–29, xxxii. 1–43, 48–52, xxxiv. must be separated as non-Deuteronomic.

Different Dates Assigned.

The book is assumed to have been composed during the earlier, but post-Solomonic, time of the Kings, by Delitzsch and Oettli; under Hezekiah, by Vaihinger and König; under Manasseh, by Ewald, Riehm, W. R. Smith, Wildeboer, Kautzsch, Kittel, Dernier, Valeton; under Josiah, by De Wette, Bleek, George, Vatke, Graf, Wellhausen, Kuenen, Dillmann, Cornill, Stade, Reuss, and nearly all critics since Graf-Wellhausen. Gesenius and the more recent French critics, as D'Eichthal, Havet, Vernes, Horst, have assumed a date during, or later than, the Exile.

The assumption that the book was composed under Hezekiah, Manasseh, or Josiah is based on the hypothesis that the law-book which was discovered in the Temple by the priest Hilkiah in the eighteenth year of the reign of King Josiah, 621 B.C., as narrated in II Kings xxii. *et seq.*, was virtually the present Deuteronomy, the only difference of opinion being as to how long it had been composed. Most of the advocates of the Josianic period even say that the book was composed and hidden with the definite intention that it should be brought to light in that way. This hypothesis is difficult to maintain, for a number of improbabilities must be assumed in order to prove that the code found at the time of Josiah was Deuteronomy. All that can be claimed is that the narrator of the story of the finding and of the reforms attendant upon it adopts in part the language of Deut. This view is exposed to the insuperable objection that the religion which brought truth into the world can not have been founded upon a deception. That this fundamental book of religion, containing such a free and pure stream of truth, could be pseudepigraphic, and that the whole nation should have considered as of Mosaic origin and of divine authority, and have adopted at once, without objection or criticism, a book which was a forgery, of the existence of which no one knew anything before that time, and which demanded radical modifications of the religious life, and especially of worship, is inconceivable.

Those critics who recognize these objections, but for critical reasons hesitate to take Moses as the author, assert, therefore, that the book is in its essentials a faithful reproduction of the teaching of Moses, filling in the outlines given by the latter; and that there are no objections to assuming that inspired men, working in the spirit of Moses, and sustaining to him the uninterrupted relation of spiritual succession, should feel justified in rendering his teaching and his law comprehensible for their own time, supplementing and developing them, and that the book thus composed is none the less Mosaic in spirit. Modern criticism holds that the book was prepared for the purpose of realizing the ideals of the Prophets in the national life of Israel. It is the summary of the prophetic deliverances of the eighth and seventh centuries, though not altogether free from impairments of the prophetic ideals. Some critics (Cheyne, "Jeremiah," pp. 65 *et seq.*) consider it as a product of the priestly-prophetic circles, an assumption that is certainly correct (comp. xvii. 9 *et seq.*, xxiv. 8).

Sources and Redaction.

Although the place assigned traditionally to Deut. as containing the end of the Mosaic legislation, and as presupposing the existence of Ex.–Num., is disputed by modern criticism, yet all critics agree that it is based on previous sources that have in part been preserved. This applies certainly to J and to E, both in the narrative and the legal portions. J in the narrative: i. 8, comp. Gen. xv. 18; i. 45, comp. Num. xiv. 16; iii. 15 *et seq.*, comp. Num. xxxii. 29; otherwise the story is recapitulated from E. In the Law the close relation and connection with the Book of the Covenant contained in E (Ex. xx. 24–xxiii. 19) is most noticeable, Steuernagel being the only one to dispute this, and the so-called DECALOGUE in J (Ex. xxxiv.). It is a matter of dispute whether the author of Deuteronomy knew J and E as separate works, or after they had been united into JE and incorporated into the Tetrateuch. The priority of the Decalogue of Ex. xx. or that of Deut. v. is also a much disputed question. Deuteronomy takes a very independent stand toward its sources, the reproduction being a free modification or enlargement. Wellhausen and Stade have therefore assumed it to be an enlarged edition of the old Book of the Covenant, and Kuenen, followed especially by Cornill, has brought forward the hypothesis that Deut. supplanted the Book of the Covenant.

It is a very important question under discussion, whether the author of Deuteronomy was acquainted with P; whether, therefore, the latter was the earlier book, if not in its present codification, at least in content. P is asserted to be older by Dillmann, Delitzsch, Oettli, and, of course, by the traditionalists. As regards history they quote iv. 3 = Num. xxv. (leading astray of the Israelites); i. 37, iii. 26, iv. 21 (Aaron and Moses forbidden to enter Canaan) = Num. xx. 12, 24, xxvii. 14; i. 23 (number of the spies) = Num. xiii. 1 *et seq.*; x. 3 (the Ark of shittim-wood) = Ex. xxxvii. 1; x. 22 (the number "70") = Gen. xlvi. 27; xxxi. 2, xxxiv. 7 (the age of Moses) = Ex. vii. 7. In the Law the many allusions to the law of holiness belonging to P (Lev. xvii.–xxvi.), the assumption of several "torot," and especially Deut. xiv. in comparison with Lev. xi., confirm this view. According to other critics the historical references are derived from notes in JE, no longer extant, and as regards the Law they reverse the relation in every case. P presupposes Deut.; so that, for instance, Lev. xi. was modeled upon Deut. xiv.

The redaction of Deut. passed, according to Wellhausen, through three stages: (1) the original Deut. —xii.–xxvi.; (2) two enlarged editions independent of each other—i.-iv., xii.-xxvi., xvii., and v.-xi., xii.-xxvi., xxviii.-xxx.; (3) combination of the two editions and incorporation of the work so formed into the Hexateuchic code. Deuteronomy was in the first place combined only with JE; a later editor combined this work with P after the component parts of the latter had been put together. Dillmann assumes the following three stages of redaction down to Ezra: (1) Pg + E + J; (2) PgEJ + D; (3) PgEJD + Ph (law of holiness). The views in regard to the redaction depend on what is considered as the original Deut. and into what and how many parts it is divided.

According to the Graf-Wellhausen theory of the relation of Deut. to the Prophets, and its priority to P, the book marks a radical change in the Israelitic religion. Through the centralization of worship the popular exercise of religion, closely connected with the daily life, the home, and the house, is uprooted and all the sacred poetry of life destroyed. Worship is separated from life, and the sharp contrast of holy and profane arises between the two. The idea of the Church comes into existence; then a separate profession, that of the clergy, is created; and by transferring the priestly ideal to the whole people the way is prepared for the exclusive and particularistic character of later Judaism. As the prophetic ideas are formulated into concrete laws, religion is externalized and becomes a religion of law, an *opus operatum.* The people now know exactly what they have to do, for "it is written." Deuteronomy marks the beginning of the canon; religion becomes a book religion, an object of study, a theology. The people know what they may expect if they keep the Law. Religion assumes the nature of a covenant, a contract, and the doctrine of retribution becomes paramount. Further conclusions are then drawn by P as to post-exilic Judaism, Pharisaism, the Talmud, Rabbinism.

This whole conception is based on literary and religio-historical assumptions that are either wrong or doubtful. The doctrines and demands of Deut. have always been fundamental in Israel's religion. The book condemns and abolishes paganism. The alleged legitimacy of the decentralization and popularization of worship is based entirely upon a wrong interpretation of Ex. xx. 24. Centralization is the necessary consequence of monotheism and of the actual or ideal unity of the people. Law and prophecy are closely connected from the foundation of Judaism, beginning with Moses. The regulation of life according to divine law, the contrast between holy and profane, the rise of a canon and a theology, are incidental to the development of every religion that has ever controlled and modified the life of a people.

E. G. H. B. J.

DEUTERONOMY RABBAH. See Debarim Rabbah.

DEUTSCH, ALEXANDER: French financier; died April 18, 1889. He was head of the firm of A. Deutsch & Son, of Paris, and was one of the most prominent financiers in that city, his firm taking the lead in the organization of the mineral-light ("éclairage minéral") industry. He was also prominent in other industries, and his exertions in the industrial interests of France won for him the ribbon of the Legion of Honor. Deutsch took an active part in Jewish affairs, and contributed liberally to the charitable institutions of Paris.

Bibliography: *Archives Israélites*, 1889, pp. 141-142.

S. A. R.

DEUTSCH, ANTON: Hungarian journalist and politico-economic writer; born at Budapest Oct. 21, 1848. He studied in Budapest and Paris. Since 1870 he has worked with the "Pester Lloyd," the economic articles in which come from his pen. His most important writings are: "Fünfundzwanzig Jahre Ungarischer Volkswirtschaft und Finanzen" and "Magyar Vásárok Története" (History of the Hungarian Fairs).

Bibliography: *Szinnyei*; *Magyar Irók Tará*; *Pallas Lexicon*, iv.

S. M. W.

DEUTSCH, CAROLINE: German novelist; born at Namesto, a small Hungarian village, Feb. 23, 1846. Her father, a rabbi, was German in culture, and the German language and spirit prevailed in the family. While still very young, Caroline began to write verse, some appearing in Berlin newspapers. In 1870 she graduated as a public teacher, obtaining at the same time a permanent position on the "Jüdische Presse" of Berlin. Several novelettes from her pen were published in the Berlin "Volkszeitung."

In recent years she has written chiefly for the "Hamburger Nachrichten." The scenes of her novels are mostly laid in Hungary, and she vividly describes the life of the Hungarian peasant and small tradesman. In 1875 she married, and although her legal name was Caroline Weiss, she still wrote under her former name. Of her writings may be mentioned: "Ueber Klippen," a novel, in 2 vols., Dresden, 1894; "Aus Drang und Not," Prague, 1897; "Besiegt," "Die Tochter des Hirten," and "Ilonka," published in 2 vols., Hamburg; "In Letzter Stunde," Leipsic, 1897.

S. M. Z.

DEUTSCH, DAVID: German rabbi; born at Zülz, Silesia, 1810; died at Sohrau, Silesia, July 31, 1873. He was brought up by his relative Menahem Deutsch, at Breslau. He studied Talmud under Mordecai Benet at Nikolsburg, and under Moses Sofer at Presburg. Deutsch was called to the rabbinate of Myslowitz, Prussia, in 1838, and that of Sohrau in 1845. David Deutsch, like his older brother Israel Deutsch, was a champion of Orthodoxy, and led the protest against the nomination of Abraham Geiger as rabbi of Breslau. Deutsch contributed articles to most of the Jewish periodicals. The following are his works: "Ḥabakkuk Meturgam u-Mebo'ar" (Habakkuk Translated and Explained), a German translation with notes (Breslau, 1837); "Rücksprache mit Allen Gläubigen des Rabbinischen Judenthums" (Breslau, 1843), a reply, written in collaboration with his brother Israel Deutsch, to Abraham Geiger's pamphlet "Ansprache an Meine Gemeinde"; "Asof Asefah" (The Gathering of an Assembly), a protest against the rabbinical conferences at Brunswick in 1844 and at Frankfort in 1845 (Breslau, 1846);

"Die Orgel in die Synagoge," a refutation of the arguments of S. Löwe in favor of the use of the organ in the synagogue; a German translation of Isaac Troki's "Ḥizzuḳ Emunah," with critical notes (Breslau, 1865). Deutsch's sermons had a felicitous combination of the older style with modern rhetoric, and some of those delivered on public occasions were published.

J. M. Sel.

DEUTSCH (AARON), DAVID: Hungarian rabbi and Talmudic author; born in Raudnitz, Bohemia, about 1812; died at Balassa-Gyarmath, Hungary, April 26, 1878. He received his early education under his grandfather, Joseph Deutsch, who was rabbi in Raudnitz, and then frequented the yeshibot of Prague and Presburg, being one of the favored disciples of Moses Sofer. He lived subsequently in Irsa, where he married, and after the death of his wife moved to Budapest, where he lectured on Talmud to a small society. In 1846 he was called as rabbi to Sebes and in 1851 to Balassa-Gyarmath, where he officiated till his death.

In the Reform movement, which began with the Hungarian Jewish Congress of 1868, Deutsch was one of the most uncompromising leaders of Orthodoxy; and to his efforts the legal recognition of the autonomy of the Orthodox congregations in Hungary was largely due. He was a great ascetic, and was in sympathy with the Ḥasidim, although he did not adopt all their tenets. As typical of his views may be quoted the facts that he declared it sinful to pray in a synagogue in which the almemar was not in the center, and that he prohibited the winding up and setting of an alarm-clock on Friday so that it should ring on Saturday.

Of his works a collection of responsa, under the title "Goren Dawid" (David's Threshing-Floor), was published after his death by his sons (Pacs, 1885).

Bibliography: Preface to *Goren Dawid*.

S. D.

DEUTSCH, DAVID B. MENAHEM MANDEL: Hungarian rabbi and Talmudist; born about 1760; died in 1830 at Novo Mesto (Waag-Neustadtl), Hungary. He officiated first at Szerdahely, and subsequently, after 1810, at Waag-Neustadtl. One of the most prominent Hungarian rabbinical authorities of the early part of the nineteenth century, he was distinguished for his nobility of character. Stories on his high views of life are still current in many districts of Hungary. He was classed among the foremost of Jewish philanthropists. Deutsch often gave a poor applicant money without counting or even looking at it; and, if his purse was exhausted, he would give him any object of value that happened to be at hand. Deutsch was also celebrated for his wit and humor, of which he often made effective use in his capacity as preacher. His piety was such that he never raised his head, regarding it as inconsistent with true humility and the fear of God; and he never looked beyond his immediate surroundings —"the four cubits."

Deutsch was the author of the following works: (1) "Ohel Dawid" (Tent of David), Vienna, 1819-25, novellæ, in two volumes, to several Talmudic treatises, some of which appeared under the same title in 1822; (2) "Ohel Dawid," Presburg, 1836, novellæ to the treatises Shebu'ot and Yebamot; (3) halakic discussions in Aryeh Judah b. Samuel Ẓebi's "Ḥeleḳ Rishon mi-She'elot u-Teshubot ha-Geonim Batra'e," Prague, 1861; (4) halakic discussions in Wolf b. Löb Lasch's "Ḳedushat Yisrael II." (Vienna, 1829). Eleazar Shemen Roḳeaḥ, an old friend of Deutsch, collected posthumously all the responsa which the latter had addressed to him in the course of many years, printing them as a memorial to his friend. It may be noted as a bibliographical peculiarity of the "Ohel Dawid" that all the copies contain manuscript glosses by the author. Deutsch revised his book after it had been printed, and noted the corrections on the margins before the book left his hands.

L. G.

DEUTSCH, EMANUEL OSCAR MENAHEM: Orientalist; born at Neisse, in Silesia, Oct. 28, 1831; died at Alexandria, Egypt, May 12, 1873. His early training was conducted by his uncle, David Deutsch of Myslowitz, to whom he owed his wide acquaintance with Hebrew literature. His education was completed at the University of Berlin, where, under Boeckh and Meineke, he became an accurate classical scholar. From Berlin he went to London to accept an appointment in the British Museum, to which he had been recommended by Asher Asher. Thenceforward he was known for his labors in the British Museum and for the efforts he made to promote Semitic studies in the outside world. His work in the library is, of course, not on record in a separate form; and his best official monument is to be found in the "Phenician Inscriptions" published by the trustees, in which the editor, W. S. A. Vaux, received invaluable aid from him.

Deutsch's literary work outside the museum was of two kinds: either purely scientific essays, acute in criticism and lucid in statement—like the article on the Targumim and on the Samaritan Pentateuch in Smith's "Dictionary of the Bible"—or brilliant popular expositions of some learned work, like his famous essay on the Talmud in the "Quarterly Review" for Oct., 1867. This created probably a greater sensation than any other review article in England dealing with a purely literary subject, and caused that number of the "Quarterly" to be repeatedly reprinted. The article itself was translated into several languages, and contributed to create an interest in the Talmud wherever the essay was read. Though there was little that was new in the facts adduced—the literary history being derived from Wolf and the wise and witty sayings from Dukes—yet the skill with which the pertinent topics were grouped, the brilliancy of the style, and the underlying enthusiasm of the writer made it a striking performance. Some of its effect was due to the implied suggestion that the key to the life of the founder of Christianity was to be sought for in the surrounding ideas in Palestine. The renewed attention given to the Talmud in Christian circles, at any rate in England, was undoubtedly due to the article. The ambition of his life to produce a more exhaustive work on the Talmud was thus shadowed forth; but the failure of his health compelled him to abandon the project.

This famous essay was succeeded some time afterward by an article in the "Quarterly Review" on "Islam," which was not so successful because not dealing with so novel a subject and because Deutsch was not a special student of Arabic. He also contributed the article on "Versions" to Smith's "Dictionary of the Bible," and besides wrote more than 190 articles for "Chambers's Cyclopædia." Deutsch had an excellent faculty, cultivated by practise, of deciphering inscriptions. His letters to the "Times" respecting the discovery and contents of the Moabite Stone aroused considerable attention.

During the sittings of the Ecumenical Council at the Vatican, 1869–70, Deutsch acted as special correspondent of the "Times," and wrote a number of incisive letters on its deliberations.

J. G. L.—J.

DEUTSCH, GOTTHARD: Theologian; born at Kanitz, Austria, Jan. 31, 1859. The descendant of a rabbinical family (see Braunschweig, Jacob Eliezer) and the son of a Talmudist, he received an early training in rabbinical literature while he attended the school of his native city. In 1868 he entered the gymnasium of Nikolsburg, continuing his studies at home, and graduated in 1876. He subsequently attended the rabbinical seminary and the University of Breslau, where he remained until the year 1879. Continuing his studies in Vienna, he graduated from the university in 1881, receiving his rabbinical diploma from I. H. Weiss. Immediately thereafter he was called to teach the religious school of the congregation of Brünn, and upon the death of Daniel Ehrmann (1882) he was appointed by the state as teacher of religion in the German high schools of the Moravian capital. In 1887, simultaneously invited to the rabbinates of Boskowitz and Brüx, he chose the latter position, which he resigned in 1891 to accept the professorship of Jewish history and philosophy of religion in the Hebrew Union College of Cincinnati, which position he still (1903) occupies.

Deutsch has been a frequent contributor to the Jewish and to the secular press. Articles from his pen have appeared in "Allgemeine Zeitung des Judenthums," "Israelitische Wochenschrift," "Jüdisches Literaturblatt," and a great number of American periodicals, notably "Deborah," "American Israelite," "The Reform Advocate," "Jewish Comment," "The American Journal of Theology," "The New World," "The Yearbook of the Central Conference of American Rabbis," "New-Yorker Staatszeitung," and others. He has further published: "Symbolik in Cultus und Dichtung bei den Hebräern," Brünn, 1886; "Paradigmentafeln zur Hebräischen Grammatik," Brünn, 1886; "Gedenkrede an dem Sarge des Verewigten Dr. Aron Bärwald," Brüx, 1891; "Epochs of Jewish History," New York, 1894; "Theory of Oral Tradition," Cincinnati, 1896; "Philosophy of Jewish History," Cincinnati, 1897; "Andere Zeiten," a novel, Berlin, 1898; "Unlösbare Fesseln," a novel. He was the editor of the "Deborah," a German monthly, from the death of its founder, Isaac M. Wise, until the paper ceased publication (1903).

S.

DEUTSCH DE HATVAN, ALEXANDER: Hungarian merchant and financier; born at Arad Nov. 17, 1852. He was educated in Budapest and Berlin. As the head of the firm of Ignatz Deutsch & Sons, he rendered great service to the sugar industry in Hungary, establishing beet-sugar factories at Nagy Surany, Hatvan, and Garamvölgye. In recognition of his services his family was raised to the nobility in 1879.

DEUTSCH, HEINRICH: Hungarian educator; born at Trencsen-Bán June 12, 1819; died at Budapest Dec. 18, 1889. After teaching in the elementary schools of the provincial communities of Lovasberény and Kecskemét, he was called to the Talmud Torah school of Budapest in 1859. Enjoying a high reputation as an educator and a scholar by virtue of his attainments in Jewish science and his literary activity, he was appointed in 1868 director of the reorganized Jewish Teachers' College, and in 1876 professor of the Bible and Talmud in the lower division of the newly founded Rabbinical Seminary. Deutsch was the first in Hungary to lecture in the Hungarian language on the Talmud.

His chief works are: "A Hebrew Grammar" (in Hungarian, 1859); Hungarian translation of the prayer-book (seven editions since 1864); "Beleuchtung der Dogmentheorie Leopold Löw," Leipsic, 1871 (under the pseudonym "David Nieto Redivivus"); "Meḳor Ḥayyim," text-book of the Jewish religion, in four parts, Budapest, 1878; Hungarian translation of the Pentateuch with comments, 1887–1890.

Bibliography: *Pallas Nagy Lexicon*, s.v.

S. L. V.

DEUTSCH, ISRAEL: German rabbi; born in Zülz, Prussian Silesia, April 2, 1800; died in Beuthen June 7, 1853. From 1829 until his death he officiated as rabbi in Beuthen, achieving distinction as a preacher, Talmudist, and Hebraist. In the two treatises "Rücksprache mit Allen Gläubigen des Rabbinischen Judenthums, etc." (written in conjunction with his brother, David Deutsch), Breslau, 1843, and "Zur Würdigung der Braunschweiger Rabbinerversammlung," *ib.* 1845, he vigorously opposed the Reform movement. After his death his two brothers, Abraham, rabbi of Gleiwitz, and David, rabbi of Sohrau, published "Proben aus dem Literarischen Nachlasse des Israel Deutsch," Gleiwitz, 1855.

S. M. Ko.

DEUTSCH, JOEL: Hebraist and teacher of deaf-mutes; born in Nikolsburg, Moravia, March 20, 1813; died in Vienna May 1, 1899. Deutsch is remembered as a close student of rabbinical literature, and was an energetic collector of Hebrew books. He took great interest in the instruction of deaf-mutes; and when the "Allgemeines Oesterreichisch-

Israelitisches Taubstummen-Institut" was founded at Nikolsburg in 1844, he entered it as teacher. In 1852 this institution was moved to Vienna, and Deutsch became director, retiring in 1888. In 1859 he was decorated with the "Goldene Verdienstkranz," and in 1869 received the title "Kaiserlicher Rath." Pupils of Deutsch have been called to become teachers in the asylums of New York, London, and Budapest.

He was author of the following works: "Religionslehre für Israel. Taubstumme," Vienna, 1863; "Biblische Geschichte für Israel. Taubstumme," *ib.* 1863; "Wörtersammlung zur Gedächtnissübung für den Ersten Anschauungsunterricht Taubstummer Kinder," *ib.* 1881; "Wörter- und Aufgabensammlung für den Ersten Unterricht Taubstummer Kinder," *ib.* 1881; "Vorlege-Blätter zur Einleitung der Unentbehrlichsten Grammatischen Formen," Teplitz, 1877.

DEUTSCH, NIETO REDIVIVUS. See DEUTSCH, HEINRICH.

DEUTSCH, SIMON: Austrian Hebraist and revolutionist; died at Constantinople March 24, 1877. As a young man he devoted himself to Hebrew studies in Vienna, and catalogued in collaboration with A. Kraft the Hebrew manuscripts in the possession of the Vienna Imperial Library. In 1848 he sided with the revolution, escaping after its collapse to France. In Paris, through the assistance of Mme. Strauss, the friend of Börne, he entered upon a business career, in which he was successful. After the fall of the Commune Deutsch was denounced to the government as a Communist. He was arrested and thrown into the "Orangerie" prison of Versailles, and only the efforts of the Austrian ambassador saved his life. He died in Constantinople while there on business, but was interred in Paris.

L. G. M. SEL.

DEUTZ, EMMANUEL (Menahem): Chief rabbi of the Central Consistory of the Jews of France; born at Coblenz, in Rhenish Prussia, 1763; died Jan. 31, 1842. After studying for some years at the yeshibah at Mayence, he was appointed rabbi in his native town. He was a member of the assemblies of 1806 and 1807 (see SANHEDRIN), and, in conformity with the organization instituted by Napoleon I., he took his place in the Central Consistory beside David Sinzheim and Abraham de Cologna. From 1822 he was the only chief rabbi of the Consistory. He was a preacher of the old school, for, although he knew French, he never used it in the pulpit. His life was saddened by domestic sorrows, especially by his son's apostasy and unfortunate political rôle.

J. J. W.

DEVENISHKI: Village in the government of Wilna, Russia. The census of 1898 shows a population of 1,877, of whom 1,283 are Jews. Of the latter 277 are artisans. About 66 Jewish women and girls earn a livelihood by knitting stockings, which are sold in Wilna. About 93 people are employed as day-laborers. The remainder of the population are engaged in business. Among charitable institutions there are the poorhouse, the gemilut ḥasadim, the biḳḳur ḥolim, etc. The village possesses a Jewish library. There are a Jewish free school with 84 pupils, a Talmud Torah with 20 pupils, and 5 ḥadarim with 56 pupils.

DEVIL. See DEMONOLOGY and SATAN.

DEVOTION (כונה): The state of religious consecration. It is the most essential element in worship; so that a divine service without it is "like to a body without a soul." To such as pray to God without the spirit of fervent devotion, the stern sentence is applicable: "With their mouth and their lips they honored me, but their heart they removed far from me" (Isa. xxix. 13). Devotion is the entire dedication of the worshiper to the service of God, the banishment of all other thoughts from the mind and heart, so that the whole inner life centers in the one idea of God's greatness and goodness (Ber. 29b, 30a; Maimonides, "Yad," Tefillah, iv. 16). Every fulfilment of a divine commandment ("mizwah") requires devotion or consecration of mind and heart to the sacred work to be done ("mizwot ẓerikot kawwanah"; Ber. 13a, b; Meg. 20a; Ḥul. 31a, b; Yer. Yeb. viii., 9a). Hence the cabalists enjoined men, before fulfilling any commandment, to expressly consecrate the mind to the work by certain formulas (see KAWWANAH; LORIA, ISAAC).

The term "devotion" is also used for prayer itself, especially for the extra and occasional prayers added to the regular service (תחנה and בקשה, "supplication" and "petition"). Among pious Jewish people there is a strong craving for frequent communion with the Creator; the fixed and regular prayers and services can not satisfy such craving, and the recommendation of Rabbi Simeon (Abot ii. 18), "When thou prayest, do not make thy prayer a fixed reading, but let it be an appeal for divine mercy and grace," is understood to refer to this kind of devotion. Prayers are frequently compared to sacrifices (Ber. 26b), and as there were two kinds of sacrifices, "ḳorban ḥobah" (obligatory sacrifice) and "ḳorban nedabah" (voluntary or free-will sacrifice), so also prayers are of two kinds, "tefillat ḥobah" (obligatory prayer) and "tefillat nedabah" (voluntary prayer; compare "Yad," Tefillah, i. 9). The ancient Ḥasidim are said to have spent in silent meditation a short time before and after the service (*ib.* 32b).

Bibliography: Steinschneider, *Cat. Bodl.* col. 295.

K. M. F.

DEVOTIONAL LITERATURE: Aside from the regular prayers, which are treated under Liturgy, there exists a literature of private devotions, prayers offered on special occasions. Such devotions are strongly recommended in the Talmud, where private prayers composed by individuals on various occasions are to be found. R. Eliezer (Ber. iv. 4) says: "He who makes his prayer a fixed form ["ḳeba'"] has no true devotion." "This," say Rabbah and R. Joseph, "is because he fails to add thoughts or expressions of his own" (Ber. 29b). [Compare the so-called "Lord's Prayer," taught by Jesus (Luke xi. 2-4; Matt. vi. 9-13), and the parallels given in C. Taylor's "Sayings of the Jewish Fathers," pp. 128-129.—K.] Talmudic devotional prayers may be classified as: (1) general, (2) for forgiveness of sin, (3) when studying the Torah, (4) for the restoration of the Holy Temple. The following are examples of the several kinds:

1. R. Eliezer said: "May it be Thy will, O Lord our God, and God of our fathers, that no personal enmity or envy enter my heart or the hearts of others. May the Law be our occupation through the days of our life, and may our words of devotion come before Thee." R. Ḥiyyah b. Abba added: "May our hearts cleave to Thy Name in reverence. Keep us from things Thou hatest and bring us nearer to those that Thou lovest. O favor us for Thy Name's sake" (Yer. Ber. iv. 2).

2. "Lord of the worlds, Thou well knowest that our aim is to do Thy will. But what interferes? The leaven in the dough [bad inclinations] and the servitude of the ruling government. O may it be Thy will to save us from these, that we may do Thy will with a true heart."

3. R. Saphra: "O let peace reign between the heavenly and the earthly households, and between those who study the Torah for its own sake and those who study it for reward" (*ib.*).

4. "O let Him reveal and show His kingdom over us speedily. O let Him build His house in our days. O let Him grace the remnant of His people Israel with peace, loving-kindness, and mercy. For the sake of His great Name" (Massek. Soferim, xiv. 12). The morning devotion of the house of R. Jannai was as follows: "May it please Thee, O Lord my God, to grant me a good heart, a good lot, a good companion, a good name, a good [unbegrudging] eye, a humble soul, and a devout spirit. May Thy Name not be profaned through us, and let us not be a byword among the people. Let not our remainder be destroyed, nor our hope shattered. Let us not be under obligation to a human being, whose gift is insignificant and its humiliation great. Let our lot be with the Law and among those who do Thy will. O build Thy Holy City and Temple speedily in our days" (Yer. Ber. iv. 2, 7d). Devotional prayers from various rabbis (*ib.* pp. 16, 17, 29, 60) are copied in the prayer-book, including a prayer against bad dreams, that they may presage good results (Ber. 55b), which was inserted in congregational responses to the priest's blessing on holidays.

In the geonic period private devotional prayers developed side by side with the liturgy; and private prayers were inserted in the prayer-book of Amram Gaon (846 C.E.), as well as in the siddur of Saadia Gaon. One of these is quoted in the collection of private prayers, "Ḳeri'ah Ne'emanah," by Samuel David Ottolengi (Venice, 1715), which contains also a prayer composed by R. Nissim to be recited before the morning prayer of Yom Kippur. Judah ha-Ḥasid and his pupil, Eliezer of Worms, composed devotional prayers which were published under the titles "Tefillot R. Jehudah Ḥasid" and "Yoreh Ḥaṭṭaim."

Midnight Devotion.

Regarding the midnight prayer, חצות, for the restoration of the Jewish state and the rebuilding of the Temple (see Zohar, Wa-Yaḳhel; Shulḥan 'Aruk, Oraḥ Ḥayyim, 1), recited especially in the sixteenth, seventeenth, and eighteenth centuries, see Ḥaẓot. Collections of such prayers were made by Ẓebi b. Ḥayyim of Wilmersdorf under the title "Liḳḳuṭe Ẓebi," Sulzbach, 1797; by David Tevele Posner, Hamburg, 1715; and by Aaron Berechiah Modena, author of the collection of devotional prayers for various occasions entitled "Ma'abar Yabboḳ," and of "Seder Ashmurat ha-Boḳer" (matins) for the society known as "Me'ire Shaḥar" (Early Risers or Vigilants), Mantua, 1624. This, under the title "Shomerim la-Boḳer," was translated by Mrs. Ellusch in 1724. Joseph Jedidiah Carmi is the author of "Kenaf Renanim" (The Singers' Wing; Venice, 1626), containing devotions and hymns for every day in the week and for holidays.

From a literary point of view, Carmi's devotions have no equal among the Hebrew collections, and yet, while they were approved by the Rabbis and adopted by several Early Risers' societies in Italy, they were contested as an innovation and a superfluity before a council of rabbis, who finally decided to allow them, not as an addition to the prayer-book but as an adjunct for voluntary devotionalists (see decisions in the Preface, 6a, 12b).

Some devotions are composed of words all of which begin with the same letter. Thus, א in the prayer "Elef Alafim" (A Thousand Alefs) by Joseph b. Sheshet Latimi, first published with the "Iggeret" of Isaac Akrish, Constantinople, 1570; a similar one by Moses Zacuto in his "Iggeret," Leghorn, 1870; the letter ה in the prayer "Baḳḳashat ha-Hehin" by David Ulma (Benjacob, "Oẓar ha-Sefarim," pp. 82, 329); י in a prayer composed of Biblical verses beginning with "Lord" ("Siddur" of Amram, ii. 3a); ל in the "Baḳḳashat ha-Lamedin" of Meïr Hesse, Altona, 1829; מ in the "Baḳḳashat ha-Memin" of Jedaiah Bedersi, published with his "Beḥinat 'Olam," Mantua, 1556 (see "Ha-Sharon" to "Ha-Karmel," i., No. 42); ש in Aaron Voltera's "Baḳḳashah Ḥadashah" (A New Petition) or ש' ש"ן ("300 Words Beginning with ש"), Leghorn, 1740. Some parts of these alphabetical devotions are in pure and fluent Hebrew, while the style of the others is cramped and forced.

Divers devotional prayers were composed for Friday night and for Saturday, day and night. They are known as "Zemirot." Regarding the Tashlik prayer on New-Year's Day, see Tashlik; and for a prayer on entering the sukkah on the Feast of Tabernacles, see Tabernacles, Feast of.

A petition before saying the Psalms reads: "May Thy mercy attend us in reading the Psalms, as if David himself—peace be to him!—had uttered them; to cleanse us of sin and to forgive us as even Thou hast forgiven David," etc.

There are prayers by Naḥmanides on crossing the sea, and for children ("Liḳḳuṭe Ẓebi," p. 97b, Wilna, 1817) and by Abraham Galicchi against epidemics

("Moshia' Ḥosim," p. 33b, Venice, 1587). The "Ma'aneh Lashon," by Jacob ben Solomon Darshan, published first at Prague, 1615, is a collection of prayers to be recited for the sick, also on visiting cemeteries, and on similar occasions, which is very popular in Russia and Poland. Among other devotional prayers mention may be made of the following: Moses Rieti, "Ma'on ha-Sho'alim," Venice, 1550; Isaiah Hurwitz, "Refu'at ha-Nefesh," Amsterdam, 1672; "Yoreh Ḥaṭṭa'im"; Pinchas Monselice, "Magen Ḥayyim," Mantua, 1657; Nathan Naṭa' Hanover, "Sha'are Ẓiyyon," 1662.

Raphael Solomon's prayer against an epidemic among cattle in Italy in 1712 is found in the collection of Matthew Levi ("Zebaḥ Todah," Leghorn, 1829). Others are: by Leon Modena, for a prisoner, in David Sabibi, "Mazzil Nefashot," Venice, 1743; by Moses Zacuto, the poor man's devotion, in Nathan Benjamin of Gaza, "Ḥemdat ha-Yamim," v. 29a, Leghorn, 1764; by David b. Ḥassin, "Tefillah le-Dawid," hymns 4, 7, Amsterdam, 1807; by Abraham Danzig, "Tefillah Zakkah," on the eve of the Day of Atonement; Naḥman Breslov, "Liḳḳuṭe Tefillot," Warsaw, 1873.

Eliezer Papu's "Bet Tefillah" (Hebrew and Ladino, Belgrade, 1860) includes the following prayers: by a learned man for those who support him; for a bar mizwah; for a matrimonial suitor; on the marriage day; at a circumcision; for a teacher; for a shoḥeṭ; for a preacher to be able to deliver his sermons fluently and to please his audience. The prayers in a collection by Naḥman of Horodek ("Liḳḳuṭim," Korzec, 1809), all beginning with the words "Rab shel 'Olam" (Master of the World), are composed especially for Ḥasidim.

A modern Hebrew hymnal, "Zimrat Yah," by Moses Zele, Hamburg, 1857, intended to replace the old devotions, "which tend to degrade us in the eyes of the non-Jewish world," did not find recognition among the Jewish people, and is hardly known in devotional literature.

In the Vernacular: For those who could not read Hebrew, devotional works were composed in the vernacular. In the geonic period the Aramaic was the substitute (see Ber. 3a, Tosef.). A few of the Aramaic devotions are still in use in the seliḥot, such as "Raḥmana Eddekar Lanu," "May the Merciful remember us of the covenant of Abraham, the beloved," etc.; and the soliloquy "Maran de-bashamaya," "Our Master in heaven, to Thee we beg, even like a captive to his master. All captives are ransomed with money; but Thy people Israel, with mercy and supplication. O grant us our request and prayer, and let us not return from Thy presence in vain."

Most of the vernacular devotions are in the Judæo-German dialect, beginning with the seventeenth century, and were written mostly by women to supply the religious needs of their sex on various occasions. The earliest, "Teḥinnot u-Baḳḳashot" (Devotions and Petitions) was published at Basel in 1609 (Zedner, "Cat. Hebr. Books Brit. Mus." p. 448). A German pastor, Willemer of Gelnhausen, translated the "Teḥinnah," published at Amsterdam in 1650. The "Seder Teḥinnot," for week-days and holidays, published at Frankfort-on-the-Main in 1723, contains also prayers for removing the priests' share of the dough ("ḥallah"; p. 5); for baking the Sabbath cakes; for putting on Sabbath garments; before the immersion ("ṭebilah"); for the state of pregnancy, and before childbirth; for a rich woman seeking divine guidance in disposing of her fortune in good deeds (p. 12). Another teḥinnah, of Sulzbach, 1733, includes a petition for pious and scholarly children (p. 17b). A "Teḥinnah for Jewish Women," Vienna, 1838, for Sabbaths and holidays, includes a prayer to be recited on lighting the Sabbath candles, and a blessing on occasion of the approaching new moon.

Yiddish Teḥinnot.

The teḥinnot written in Yiddish are of late origin, and most of them have been published at Wilna from 1870 to date. The popular ones are: (1) "Teḥinnot Immahot" (The Matriarchs—Sarah, Rebekah, Rachel, and Leah), to be said during the month of Elul, composed by Seril, daughter of Jacob Dubno and wife of Mordecai Rapoport, Wilna, 1873. (2) "Teḥinnot Sheloshah She'arim" (Three Gates), by Sarah, daughter of Mordecai, former rabbi of Brest, Russia, for the following occasions: first gate, the precepts of חנ"ה, abbreviation of "ḥallah," "niddah," "hadlaḳah," for giving the priests' share of the dough, for observing the period of menstruation, and for lighting the Sabbath candles; second gate, for blessing the coming new moon; third gate, for the Penitential Days ("Yamim Nora'im"). The author's account of herself on the title-page reads: "Ich, Soreh, bass tovim, tuh es dem lieben Gott, boruch-hu wegen," etc. (I, Sarah, daughter of a good man, do this for the sake of the loving God, blessed be He) Wilna, 1873). (3) "Teḥinnot Sha'are Teshubah" (Gates of Penitence), for the month of Elul, by Mrs. Shifra, daughter of Judah Leib, rabbi of Lublin, Wilna, 1875. (4) "Ereẓ Yisrael" Teḥinnah, Wilna, 1875, credited to Deborah, wife of R. Naphtali, formerly chief (nasi) of Palestine. In other editions it is called "The Jerusalem Teḥinnot at the Wailing Wall."

The names of the authors are nearly all fictitious and high-sounding, and have been affixed in order to make the teḥinnot salable. It is known that some of the teḥinnot were written by indigent students of the Rabbinical Seminary of Wilna or Jitomir (among others, Naphtali Maskil le-Ethon), and by Selekowitz, for nominal sums, and that the publishers stipulated that the writers should fashion the composition in tearful and heart-rending phrases to suit the taste of the women readers. This forced cultivation of devotional feeling rendered the teḥinnot exaggerated and over-colored, and this did not escape the criticism and ridicule of the men against the women who were such devotees of the teḥinnot.

The first attempt made to edit the teḥinnot in a modern language was by Joshua Heshel Miro in his collection "Gebetbuch für Gebildete Frauenzimmer Mosaischer Religion," Breslau, 1833. This was in Hebrew characters; a later edition was transliterated into German type by S. Blogg.

Letteris' "Taḥnune Bat Yehudah," translated from the German into Dutch ("Gebeden voor Israelitische Vrouwen," Amsterdam, 1853), was dedicated to Lady Judith Montefiore. S. Baer published "Ḳol Bat Ẓiyyon" (The Voice of the Daughter of Zion), Rödelheim, 1856, prayers for every day in the year and for all circumstances of life, for married and unmarried women. Devotions in Hungarian have been written by Immanuel Löw, M. Stern, and A. Kiss.

A very popular compilation is that of Fanny Neuda (*née* Schmiedel), "Stunden der Andacht," Brünn, 1859, for girls and young women. It was translated into English by M. Mayer and published by L. H. Frank, New York, 1866. The best-known compilations in English are Ascher, "Book of Life," London, 1861; Bresslau, "Devotions for the Daughters of Israel," *ib.* 1861; Cohen, "Prayers for Family Use," *ib.* 1884; Miss Montagu, "Prayers for Jewish Working Girls"; Baroness L. D. Rothschild, "Prayers and Meditations," *ib.* 1869; Alice Lucas, "The Jewish Year," *ib.* 1898, 1903; Gustav Gottheil, "Sun and Shield," New York, 1898, taken chiefly from non-Jewish sources; Annie Josephine Levi, "Meditation of the Heart," New York, 1900 (also drawn from non-Jewish sources), with introduction by Gustav Gottheil.

K. J. D. E.

DEW (טל).—**Biblical Data:** Moisture condensed from the atmosphere and gathered in small drops, specially upon the upper surface of plants. In Palestine dew "falls" in cloudless nights during the summer, and refreshes the vegetation, which without it would suffer. The westerly winds sweeping across the sea in the late summer months deposit this moisture in the form of mist like fine spray upon the summer crops; hence, "the dew of Hermon that cometh down upon the mountains of Zion" (Ps. cxxxiii. 2, Hebr.). Dew and rain are closely related to each other in Hebrew literature as sources of fertility and of regeneration of life (Micah v. 6 [7]). In the rainless season "the dew assuages the heat" (Ecclus. [Sirach] xviii. 16, xliii. 22); it is therefore as precious as rain (Gen. xxvii. 28; Deut. xxxiii. 13, 28; Zech. viii. 12), and the withholding of it, as of rain, is a curse (II Sam. i. 21; I Kings xvii. 1; Hag. i. 10). The summer dew is so copious as to saturate the fleece of wool (Judges vi. 37 *et seq.*) or the hair of the wanderer (Cant. v. 2). Suddenly it falls (II Sam. xvii. 12), and gently (Deut. xxxii. 2; Prov. xix. 12); it lies all night (Job xxix. 19), and rises and disappears in the morning (Ex. xvi. 14; Hos. vi. 4). Dew as the vivifying power is used as a simile of God (Hos. xiv. 6 [5]); it also symbolizes freshness (Ps. cx. 3: "the dew of thy youth") and resurrection: "A dew of herbs is thy dew, and the earth shall cast off the spirits of the dead" (Isa. xxvi. 19, Hebr.).

——**In Post-Biblical Literature:** According to Enoch lx. 20, "the spirit of the dew dwells at the ends of the heaven, close to the chambers of the rain, and its course is in winter and in summer." Winds coming from the middle of the twelve portals bring beneficial dew of prosperity; from other portals, hurtful dew accompanied by locusts and other calamities (Enoch lxxvi. 8 *et seq.*). This is also in accordance with rabbinical tradition: "In the sixth heaven, Makon, there are treasuries of hurtful dews and of beneficial dewdrops" (עליית טללים רעים וע' אגלים; Ḥag. 12b). "Between Pesaḥ and Shabu'ot a prayer is offered that God may preserve the people from the hurtful dews" (Lev. R. xxviii., with reference to Jer. v. 24). The two loaves of bread offered on Shabu'ot are waved to and fro in symbolical petition to the Ruler of heaven and earth and of the four winds to keep off the unpropitious winds and dews (Suk. 37b; Lev. R. *l.c.*).

Only on account of Israel does dew come as a blessing upon the world: on account of Jacob, who studied the Torah, or for the sake of Job, whose doors were kept wide open for the needy (Gen. R. lxvi.). "God promised Abraham under an oath never to let dew cease to bless his descendants, and therefore Elijah could not stop its fall by his words" (Yer. Ta'an. i. 63d; compare Bab. 3a, b). According to Samuel bar Naḥmani, dew comes as a heavenly gift and by the merit of no man (Yer. Ta'an. *l.c.*; Ber. v. 9b, after Micah vi. 6). On the other hand, the opinion is expressed that since the destruction of the Temple no dew of unmixed blessing falls (Soṭah ix. 12), and this on account of the cessation of the heave-offering and the tithes (Shab. 32b).

Dew of the Resurrection.

But the "dew of the Resurrection" is also stored up in 'Arabot, the highest heaven (Ḥag. 12b). By this dew the dead are revived (Yer. Ber. v. 9b; Yer. Ta'an. i. 63d, with reference to Isa. xxvi. 19). In Ḥag. 12b, Ps. lxviii. 10 (9) is referred to: "Thou didst send a plentiful rain to revive thine inheritance" (Hebr.). This verse is construed to allude to an incident at the giving of the Law on Mount Sinai. "When God appeared amidst the trembling of the earth on Sinai, life fled from the people of Israel and from all the living people in the land of Israel; and the angels said: 'Dost Thou desire to give Thy Law unto the dead or unto the living?' Then God dropped the dew of Resurrection upon all, and they revived." Regarding the Prayer for Dew and the liturgical poetry of Kalir for the first day of Passover, which contains many allusions to the dew of Resurrection, see Ṭal, Prayer for.

DEW, THE PRAYER FOR. See Ṭal.

DEZA, DIEGO DE: Second inquisitor-general; Bishop of Salamanca, and professor of theology at the university of that city; subsequently Archbishop of Seville, in which city he died 1506; friend and protector of Christopher Columbus. After Tomas de Torquemada's death Deza was appointed inquisitor-general of all Spain (Sept. 1, 1499). While he held office, 1,664 persons were burned alive, and various penances and punishments were inflicted upon 52,456 persons. Deza was of Jewish descent, and in spite of the cruelty with which he persecuted his kindred, the Maranos, he was, toward the end of his life, publicly accused of being a Jew at heart.

He was buried in Seville Cathedral. Compare INQUISITION.

D. M. K.

Name and Religion.

DHU NUWAS, ZUR'AH YUSUF IBN TUBAN AS'AD ABI KARIB: Jewish King of Yemen, 515–525. According to the Arabian historians the name "Dhu Nuwas" was given him on account of his curly hair (Ibn Khaldun, "Prolegomena," p. 311; Ḥamzah of Ispahan, "Annals," i. 133). Von Kremer connects the name with a fortress "Nuwash" in southern Arabia ("Süd-Arab. Sage," p. 90); but the Arabic derivation is substantiated by the name "Masruk," given him in the Syriac translation of John Psaltes. In Greek sources he is known as *Δουναάν* (acc.) or *Δουναάς* (nom.); while the name אכסונדרון found in John of Ephesus has been explained by Von Gutschmid as the Greek *τῶν ἔξω 'Ινδῶν*. In Ethiopic accounts he is called "Phineas." If the contradictory and sometimes legendary accounts of the personality of Dhu Nuwas given by the Arabian writers can be trusted, he was not a Jew by birth, but embraced Judaism after ascending the throne, taking the name of "Joseph." Having killed the debauched usurper Khani'ah Yanuf Dhu Shanatir, who endeavored to maltreat him, Dhu Nuwas successfully propagated Judaism in Yemen.

His zeal for Judaism brought about his fall. Having heard of the persecutions of the Jews by the Byzantine emperors, he retaliated by putting to death some Byzantine merchants who were traveling on business through Himyara. This destroyed the trade of Yemen with Europe and involved Dhu Nuwas in a war with the heathen king Aidug, whose commercial interests were injured thereby. Dhu Nuwas was defeated (521), but succeeded in reestablishing his kingdom. Soon, however, he entangled himself in a new difficulty. He made war against the Christian city Najran, in Yemen, which was a dependency of his kingdom; and on its capitulation, in spite, it is said, of his promise of immunity from punishment, he offered the citizens the alternative of embracing Judaism or being put to death. As they refused to renounce their faith, he executed their chief, Ḥarith (Aretas) ibn Kaleb, and three hundred and forty chosen men.

Attacked from Abyssinia.

This event caused a great stir among the Christians; and the Roman emperor Justin I. requested the Negus Eleẓbaa of Ethiopia to march against the Jewish king. Accordingly an Ethiopian army crossed the Red Sea to Yemen. Dhu Nuwas endeavored unsuccessfully to prevent its landing. The ensuing engagement terminated disastrously for Dhu Nuwas. His city of Zafora (Thafar), together with his queen and the treasure, fell into the hands of the enemy. Preferring death to capture, Dhu Nuwas rode into the sea and was drowned.

The chief authority for these facts is the Syriac letter of Simeon of Bet-Arsham, which is found in the histories of John of Asia, Pseudo-Denys of Telmahre, and Zacharias, the best edition of which is that of Guidi ("Reale Acad. dei Lincei," 1881). Grätz, Pretorius (1870), George (1883), Halévy, and Pereira have thrown doubts upon the authenticity of the narrative, which has also found its way into the "Martyrium Arethæ." Halévy, especially, has tried to prove the apocryphal character of this letter, because of certain contradictions which it contains, and has endeavored to show that it was written at the time of Justinian and not of Justin. The consolatory epistle written in 519 to the Himyaritic Christians by Jacob of Serug ("Z. D. M. G." xxxi. 402 *et seq.*) merely speaks of their persecution, and says nothing about the conversion of the king. John Psaltes, Abbot of Beth Afthonius (d. 538), wrote a Greek hymn, which was afterward translated into Syriac, in which he speaks of the persecutions, but does not in any way mention the Jews. Neither Cosmas Indicopleustes, who was at Adulis when the Christian King of Aksum, Eleẓbaa, was preparing his expedition against the Himyarites, nor Procopius, the historian of Justinian's wars (d. 565), mentions the events at all. L. Duchesne, while accepting Halévy's criticism of the letter of Simeon, still holds to the historicity of the general facts, as do also Nöldeke and Dillmann. Glaser ("Skizze," p. 534) suspects that the stories told in regard to Dhu Nuwas' cruelties are pure fictions. Mohammed knew the story (sura 85); it is mentioned in the celebrated South Arabian "Ḳaṣidah" (see the ed. of Von Kremer, p. 20, Leipsic, 1865), and by the Himyarite Nashwan ibn Sa'id in his "Shams al-'Ulum" (D. H. Müller, "Süd-Arab. Studien," p. 8, Vienna, 1877). The unanimity of Arabian tradition, and the presence of Jews in Yemen as attested by the Jewish inscriptions found there by Glaser, lead to the belief that the account of the Jewish king may be in the main historical, though the particulars regarding his cruelty toward the Christians are probably largely exaggerated.

DIA, EL (= "The Day"): Title of a Jewish periodical written in Judæo-Spanish and printed in rabbinical characters. It was published at Philippopolis, Bulgaria, from June, 1897 until 1900; in 1903 its publication was begun again at Sofia.

G. M. FR.

A Disease of Civilization.

DIABETES MELLITUS: A constitutional disorder of nutrition, characterized by the persistent elimination of grape-sugar in the urine. It is considered to be a disease of the wealthier classes, and is more common in cities than in the country. Dr. Bertillon has demonstrated that the mortality from diabetes is higher in all the wealthy districts. Persons of a nervous temperament are very often affected, and it is not uncommon to find a history of insanity, consumption, and gout among the relatives of diabetics. Sudden emotional excitement, grief, terror, worry, and anxiety may each and all be followed so closely by diabetes that there is no room for doubt as to their having occasioned it. It is well known as a result of commercial disaster. "When stocks fall, diabetes rises in Wall Street," says Dr. Kleen. It has also been noticed that engine-drivers are especially subject to this disease; this fact is presumably due to the excessively anxious nature of their occupation.

Diabetes is met with, in varying degrees of frequency, in every country. It is stated to be extremely common among the educated classes of natives in India and Ceylon. The disease is almost unknown among the Chinese, the Japanese, and the negroes of Africa; but many cases have been observed among negroes in the United States. Many competent and reliable observers show that diabetes is more common among the Jews than among any other European races; and statistics prove conclusively that the disease occurs among Jews from two to six times as frequently as it does among non-Jews, as can be seen from an examination of the following tables:

Locality.	Period.	Percentage of Deaths Due to Diabetes.		Authority.
		Jews.	Gentiles.	
Frankfort-on-the-Main.	1876–90	1.9	0.4	Wallach, in "Med. Wochenschrift," 1893, p. 779.

Observer.	No. of Cases.	No. and Percentage of Jewish Patients.		Authority.
F. T. Frerich.	400	103	25	"Ueber den Diabetes," p. 185, Berlin, 1884.
Külz	692	123	17.8	"Klinische Erfahrungen über Diabetes Mellitus," pp. 2, 3, Jena, 1899.
Carl v. Noorden	650	252	38.8	"Die Zuckerkrankheit und Ihre Behandlung," p. 44, Berlin, 1901.
	328	119	36.3	

Other observers have given statistics showing that the German Jews are more liable to diabetes than non-Jews. On the other hand, these statistics have been objected to as valueless, because most of them relate to German bathing-resorts and sanitariums, where well-to-do patients from every country are apt to flock for relief. It is further shown that Jews are attracted to these resorts in relatively greater numbers than other races, because they more often seek relief of celebrated physicians and specialists. Thus, Dr. Arnold Pollatschek ("Zur Aetiologie des Diabetes Mellitus," in "Zeitschrift für Klinische Medizin," xxxii. 478-482, Berlin, 1901) shows that in the course of ten years (1891-1900) he treated 4,719 persons, of whom 2,381 were Christians, 2,333 Jews, and 5 Mohammedans. Of these patients 653 suffered from diabetes—289 Christians and 364 Jews. Of his entire clientele 13.8 per cent were diabetics, and there were 124 diabetic Christians per 1,000, as against 155 per 1,000 of Jewish origin. The slight relative excess of the Jewish diabetics is, according to Pollatschek, only apparent. He believes that the circumstance that Jews apply oftener than Christians to the sanitariums for treatment is due to their greater wealth, and that, consequently, as a bath physician in Carlsbad, he saw more patients of Jewish origin. He finally draws attention to the fact that the mortality from diabetes in England is quite high, although there are comparatively few Jews there, and claims that it is questionable whether Thomas, Willis, Dobson, and Rollo, who first observed and described diabetes, had Jewish material for their researches.

Both of these views—(1) that the Jews suffer more frequently from diabetes than other races, and (2) that they are not more often affected—are probably well founded. It is only a question of the nativity of the Jews: the Jews in Germany, for example, are decidedly more diabetic than those in Russia, England, and France; and the difference of opinion among physicians of experience is simply due to the fact that they usually neglect to consider the question of the nativity of the Jews under consideration. In the United States, where Jews arrive from various countries, diabetes is found to be extremely frequent among the German and Hungarian Jews; while among the Russian Jews it is certainly no more—perhaps it is even less—frequent than among other races.

Dr. Heinrich Stern ("The Mortality from Diabetes Mellitus in the City of New York During 1899," in "The Medical Record," lviii. 766-774), who has carefully analyzed the death-certificates of diabetics in New York, has found that of 202 deaths due to diabetes 54 were those of Jews, or over 25 per cent; of these, 21 were males and 33 females. New York city (Manhattan and the Bronx) in 1900 had a population of over 2,050,000, of which the Jews constituted 20 per cent. This would indicate that in these boroughs there were over 400,000 Jews, and 1,650,000 non-Jews. The following table shows the relative death-rate from diabetes in New York (Manhattan and Bronx) in 1899:

Race.	Population (Census of 1900).	Number of Deaths Due to Diabetes (1899).	Death-Rate of Diabetes per 100,000 Population.
All races	2,050,000	202	9.85
Non-Jews (80 per cent)	1,650,000	148	8.95
Jews (20 per cent).	400,000	54	13.50

From this table it is evident that the mortality from diabetes of the Jews in New York is relatively more than double that of the rest of the population of the city.

The morbidity of New York Jews from this disease has been investigated by Dr. Julius Rudisch ("Mount Sinai Hospital Report," 1898-99, pp. 26-29); and the following table gives his statistics of the cases of diabetes which were treated in Mount

Sinai Hospital during the years 1890–1900, compared with those of four other New York hospitals for the same period:

Hospital.	Total Number of Hospital Cases.	Percentage of Diabetics.	No. of Diabetics.	Race.		Sex.	
				Jews.	Gentiles.	Males.	Females.
Mt. Sinai..	29,166	.0021	62	52	10	43	19
Lebanon...	3,953	.0027	11	10	1	4	7
German ...	24,811	.0023	59	19	40	45	14
New York.	50,429	.0005	28	3	25	20	8
Roosevelt..	28,402	.0014	36	2	34	25	11
Total....	136,761		196	86	110	137	59

It will be seen that the total number of cases treated in the five hospitals in question during the ten years mentioned amounted to 136,767, of which 196 were diabetics, or 1 diabetic to 697 general cases. "If we assume," says Rudisch, "that upon the basis of population [of New York city] 15 per cent of the total number of patients were Jews, we find that 20,500 were treated. The whole number of diabetics was 196, and of these 86 were Hebrews—a matter of 43 per cent. If we now assume 20,500 as the total number of Jewish patients, we find that diabetes is nearly three times as prevalent among Hebrews as among any other race or creed."

Jews Endure Diabetes Better than Others.

It has been observed by many clinicians that the Jews bear diabetes better than other races; thus, Van Noorden (*l.c.* p. 176) states that it is remarkable how some patients will endure glycosuria for years without much discomfort, succumbing at last—perhaps after decades—to what is supposed to be heart-failure. This peculiar type of diabetes, and this remarkable endurance by the human body of the anomalous metabolism of diabetes, are more frequently met with among women than among men, and almost exclusively among Jews.

Dr. Stern has pointed out another peculiarity; viz., that Jews dying of diabetes succumb through coma more frequently than non-Jews. Thus, while the ratio of fatal coma cases occurring in New York city in 1899 to the total mortality from diabetes was as 60 to 202, or 29 per cent, coma occurred in 43 per cent of the cases of diabetes among Jews.

Not a Racial Disease.

It has also been shown that diabetes is not a racial disease of the Jews. Sée has observed that it is no more frequent among the Jews in France than among the rest of the population of that country. Rudisch says that while the total number of patients admitted into the Mount Sinai Hospital in New York is three times as large as that of patients who are natives of Germany, the striking feature is that the diabetic patients among the latter outnumber in the proportion of 6 to 1 those among the patients who are Russians. He attributes this to the circumstance that the Russo-Jewish patients of the hospital belong to the poorer laboring classes and are insufficiently nourished, whereas the majority of the German Jews represent the better classes of workmen as well as persons engaged in mercantile and professional pursuits.

The same fact is evidenced in the "Report on Vital Statistics of New York City" of the Eleventh Census, wherein the deaths for the six years ending May 31, 1890, are recorded. During the period in question the average mortality from diabetes per 100,000 population is seen to be as follows:

Native Country of Mothers of Patients.	Average Mortality (per cent) from Diabetes per 100,000 Population.	Native Country of Mothers of Patients.	Average Mortality (per cent) from Diabetes per 100,000 Population.
France.............	12.91	Ireland	4.58
England and Wales.	14.30	Russia (mostly Jews) and Poland	3.28
Germany...........	8.79	Bohemia...........	3.01
Scotland...........	8.45	Italy	1.28
Canada	7.70		
United States	7.18		

The Russian and Polish Jews in New York show a lower mortality from diabetes than many of their non-Jewish neighbors. Of the 54 Jewish diabetics who died in that city during 1899, as shown by Stern (*l.c.*), 17, or 31.48 per cent, were born in Russia; and it is well known that at least 65 per cent of the Jews in New York are natives of Russia or of Poland. These data tend to show that diabetes is most frequently met with among German Jews, and that Jews from other countries are not more liable to contract the disease than are the other inhabitants of the city.

Reasons Given.

Many reasons have been given for the excessive predisposition of Jews to diabetes. Consanguineous marriages, more frequent among the Jews than among most other races (see ANTHROPOLOGY and CONSANGUINITY), have been thought by some (Van Noorden, Stern, Frerich, and many others) to be the cause. Van Noorden ("Ueber Diabetes Mellitus," in "Berliner Klinische Wochenschrift," 1900, p. 1117) even thinks that the frequent intermixture of Jewish with Indo-Germanic blood has a great deal to do with the frequency of diabetes among Jews. These views are, however, untenable, because most modern authorities deny that consanguineous marriages, provided they are contracted between healthy individuals, are in any way detrimental to the offspring; and it is not known that racial intermixtures, which are frequent in modern civilized countries, have any etiological relation to the disease.

The alleged sedentary habits of the Jews are assigned by some authors (Saundby, Kleen, and others) as a predisposing cause. Diabetes is a disease brought about by high living, overfeeding, lack of proper exercise, etc., and most of the rich Jews who apply to the sanitariums for treatment are precisely of the class among which these conditions are most prevalent. This is disproved by Stern's statistics of the mortality from diabetes in New York city during the year 1899, which conclusively show that nearly 70 per cent of the deaths from that disease occurred in tenement-houses, 15 per cent in coroners' cases, and only 15 per cent in private houses, which would indicate that high living has practically little to do with diabetes (Stern, in "Jour. Am. Medical Assoc." Jan. 26, 1901).

With the present knowledge of the pathogenesis of diabetes, the only reasonable explanation of the frequency of the disease among Jews is their extreme nervousness, the Jews being known as the most nervous of civilized peoples.

It remains to be mentioned that throughout the world the Jews are principally town-dwellers, two-thirds of them living in large centers of population; and that diabetes seeks most of its victims among the people who live under the strain, hurry, and bustle of modern city life. "The Jews are the children and grandchildren of town-dwellers," says Bouchard. "In the long run the unfavorable hereditary influences are not rectified for them by the frequent intermarriage of the urban with the country people, as is the case with the rest of the population. The Jews marry exclusively among themselves; first cousins from the paternal or maternal side find no barrier to marriage, and immediately on being born the young Israelite receives the accumulated unfavorable (hereditary) influences, which he further develops during his lifetime, and which tend to the diseases that are generated by disturbed nutrition, particularly diabetes" ("Leç. sur les Maladies par Ralentissement de la Nutrition," Paris, 1892).

DIADEM. See Crown.

DIAL: Device for displaying the time by means of the shadow of a gnomon or style thrown by the rays of the sun on a graduated disk. It is generally agreed that by the "steps of Ahaz" (II Kings xxi. 9, 10; Isa. xxxviii. 8, Hebr.) some device for measuring time, in the form of a sun-clock, is intended. The expression was so understood by some of the old versions (Targ. אבן שעיא; Sym. *ὡρολόγιον*; Vulg. "horologium"); but there are no means of determining with certainty the nature, shape, and construction of the contrivance. The view that a dial in the stricter sense of the term—that is, a plane with a graduated scale and a vertical style or gnomon—is meant, is not supported by the text, since the usual and natural meaning of מעלות is "steps," not "degrees."

Following the literal and usual meaning of the words, most exegetes assume that the 'מ were actual steps; that is, a circular staircase leading up to a column or obelisk, the shadow of which, falling on a greater or smaller number of the steps, according as the sun was low or high, indicated the position of the sun, and thus the time of day. Such an obelisk was erected during the reign of Augustus, on the Campus Martius in Rome. As, according to the account in II Kings, the shadow could go forward or recede ten steps, the step-clock of Ahaz must have had at least twenty steps, each of which, therefore, did not mark a full hour of the day, but some smaller period of time. Herodotus (ii. 109) ascribes to the Babylonians the invention of the pole (*i.e.*, the concave dial) and the gnomon, and the division of the day into twelve parts. As Ahaz had intercourse with the Assyrians (compare II Kings xvi. 10), it is likely that he obtained from them a Babylonian model for his clock.

In 'Eduy. iii. 8 the stone-clock and its style (properly "nail") are mentioned (מסמר של אבן שעות). Maimonides, in his commentary, describes it as a circle on a broad, smooth stone set into the ground, and marked with straight lines, which bore the numbers of the hours. The style, the height of which was usually less than one-fourth the diameter of the disk, cast a shadow upon the lines and indicated the number of hours passed.

DIALECTIC, THE. See Periodicals.

DIALECTICS, RABBINICAL. See Pilpul.

DIALECTS: Under this heading are considered the various forms of those languages, other than Hebrew, which have been spoken or written by the Jews, and which have been modified by them, either through the introduction of Hebrew words, usages, and syntax, or by the conservation of older forms of speech which have gone out of use in the lands where the languages to which they belong were originally spoken. When the Jews lost their home and became a race without a country, they were naturally forced to adopt the languages of the peoples among whom they came to dwell; but Hebrew continued to be their language of prayer and of literary composition. They started out almost as bilinguists; for Aramaic is found not only in the Bible, but also in many of the oldest prayers (compare the use of the expressions "leshon hedyoṭ" [B. M. 104a] and "leshon ḥol" [Ber. 40b] to denote "Aramaic"). In a short time they became polyglots, while Hebrew, because of the Bible and their ritual, remained their holy language. Thus Judah ha-Levi refers to Abraham as using Hebrew as a sacred language and Aramaic as a profane tongue ("Cuzari," ed. Cassel, p. 175).

According to Abraham Abulafia, the Jews of Sicily used not only Italian and Greek, but also Arabic, which language they had adopted at the time when that island was under the dominion of the Arabs ("Rev. Etudes Juives," ix. 149). The first Jewish settlers in Corfu came from Greece: to these were added emigrants from Apulia, and in the fifteenth and sixteenth centuries others from Portugal; so that in the synagogues of Corfu the hymns are sung in Hebrew, Greek, Italian, and Portuguese ("Abhandl. des Fünften Intern. Orient.-Congresses," p. 228, Berlin, 1882).

Benfey's dictum, "The Jews have always spoken a jargon" ("Z. D. M. G." xxxvii. 606); Nöldeke's remark that wherever Jews live together in large numbers they peculiarly color the language they speak ("Alttest. Lit." p. 248); and Wellhausen's saying in regard to the Jews of northern Arabia, "The Jews spoke among themselves a gibberish which the Arabs found it difficult to understand" ("Skizzen," iv. 13), are only partially true, as in many communities in Europe Hebrew was spoken down to the eleventh century (Zunz, "Z. G." p. 187). And where the Jews of Europe wrote the languages spoken in the countries in which they dwelt, they wrote them, up to the fifteenth century, with remarkable exactness, though often using Hebrew characters (Abrahams, "Jewish Life in the Middle Ages," p. 359). Curious instances of what Steinschneider calls the "linguistically amphibious life of the Jews" ("Monatsschrift," xlii. 34) are: the macaronic verses written in Hebrew and Arabic by such South Arabian poets as Shibzi; some poems of Leo de Modena, veritable "tours de force," which can be read either as Hebrew or as Italian; the Hebrew-Arabic-Romance glossaries called "Maḳre Dardeḳe" (Schwab, in "Rev. Etudes Juives," xvi. 253 *et seq.*); and the Hebrew-English-Spanish "Vocabulary" by Jacob and Ḥayyim Moreira (Perles, "Beiträge zur Geschichte der Hebräischen und Aramäischen Studien," p. 143).

Characteristics.

Jewish dialects are characterized by foreign words treated as Hebrew; or by Hebrew words treated as foreign words; or by the use of words which have long since disappeared from the ordinary speech of the country; or by the retention of the ancient pronunciation of the language. Any one of these peculiarities will give a definite character to a Jewish dialect without its becoming of necessity a jargon, though some of the later developments of Judæo-German almost deserve that name. The Hebrew words introduced into the newly acquired language came largely from the Bible (which was the starting-point and foundation of all Jewish studies), from the liturgy as used in the synagogue and the home, and from peculiar Jewish social customs.

The earliest non-Hebrew language with which the Jews became acquainted was the Aramaic; but there is no information as to how far they modified that language in the course of time. The Aramaic portions of the Old Testament show some peculiarities, which are possibly due to the Masorites. The Aramaic which the Jews spoke in Babylon, and which Arabic writers are wont to call "Nabatæan" ("Jew. Quart. Rev." xii. 517), is proved by the Mandean dialect to have been similar to the language spoken by other peoples in that neighborhood; and the later development of a distinct Western Judæo-Aramaic in Palestine and Syria was due largely to the rivalry between Church and Synagogue. The Aramaic spoken by the Jews in New Testament times, as well as the dialect represented in the Palestinian Talmud and in some of the Targumim, probably differed little from the language of the non-Jewish population. How small these differences were, may be gaged from a study of the modern Aramaic dialects spoken in northern Mesopotamia. The Jews living near Lake Urmi, in western Persia, and even those across the Turkish border, still speak a form of Aramaic which is only differentiated from the other modern Aramaic dialects by the introduction of Hebrew words and phrases. This dialect is called by the Jews "Lishanah shel Ibrani" (Hebrew Tongue), or "Lishanat Jabali" (Mountain Tongue), or "Leshon Galut" (Tongue of the Exile; see Gottheil in "Jour. Amer. Or. Soc." xv. 297 *et seq.*). The language written and spoken by the Samaritans around Nablus, formerly believed to be a mixture of Aramaic and Hebrew, has been proved by later investigation to be a Western Aramaic dialect interspersed with a number of Hebrew words (compare Nöldeke in Cheyne and Black, "Encyclopædia Biblica," i. 284b).

Use of Greek by Jews.

From the time of Alexander the Great the Jews came largely under the influence of Hellenism, which affected not only the thought and the practises, but also the language of the Jews; and many Greek words and phrases found entrance into their vocabulary. In how far the Jews adopted Greek speech in the mother country, it is difficult to say; but in the Greek cities along the coast they must have heard that language spoken and must in many cases have used it. In the Diaspora, however, Greek soon succeeded in ousting Hebrew and Aramaic, and it became the vernacular of the Egyptian Jews. In former times it was held that Hellenistic Greek, which lived down to about the year 600, was the dialect of the Greek-speaking Jews in the Orient; but the study of Greek dialectology and the numerous finds of papyri and ostraka within recent years have convinced scholars that the Greek spoken by the Jews in Egypt and found in their literary productions is part and parcel of the general Hellenistic *κοινή*. Philo and the Jewish Alexandrian philosophers and poets differ as little in point of language from their non-Jewish neighbors as does Josephus from the other historians of his time who wrote in Greek. Even the translation of the Old Testament into Greek does not represent any special Jewish dialect of this *κοινή*. It is, of course, full of Hebrew words, expressions, and syntactical constructions; but these new elements are due, in the largest measure, to the attempt of the translators to adhere slavishly to the original Hebrew; and Blass is probably right in asserting that "no one ever spoke in this manner, not even the Jewish translators" ("Grammatik des Neutestamentlichen Griechisch," p. 2, Göttingen, 1902).

This is true of the New Testament also. Though Jewish theological ideas and even individual expressions have left their mark on the Greek where in some cases the books were translated from a Hebrew or Aramaic original, the language has in no measure the character of a Jewish dialect. Blass (*ib.* p. 3) calls it a moderated Attic Greek. Deissmann has very properly pointed out that the difference between a translation and an original in this Hellenistic Greek may be seen if the prologue to the Greek Book of Ecclesiasticus be compared with the body of the book itself (Herzog-Hauck, "Real-Encyc." vii. 638). It is therefore entirely wrong to speak of a Biblical Greek, a Septuagint Greek, a New Testament Greek, or a Judæo-Greek dialect. The same is true of later times, when Jews settled again in Greece and Constantinople. The Greek found in the

Bible translations published during the sixteenth century (see Jew. Encyc. iii. 185–197), though written in Hebrew letters, does not differ from the ordinary spoken Greek of the day ("Hebr. Bibl." xv. 40; "Rev. Etudes Juives," xxii. 258; "Jew. Chron." July 26, 1901, p. 25).

Use of Arabic.

When the Jews came under the influence of Arabic culture, they readily accepted the language of their masters, and, from Morocco in the west to Bagdad in the east, they spoke and wrote Arabic in all its various forms. The language of the old Jewish poets in Arabia differs in no respect from that of their heathen and Mohammedan contemporaries. But in course of time Arabic became a second mother tongue to the Jews of the Orient, such as only the Judæo-German became for the Jews in eastern Europe. In contradistinction to the latter, however, Arabic was also the literary language of the Oriental Jews; into which they not only translated their theological and religious books, but in which they also wrote upon all conceivable topics. It might, therefore, be proper to speak rather of Judæo-Arabic dialects than of one particular dialect. The term must not, however, be misunderstood. Saadia, in his Bible translation, uses many Arabic words in the sense of their Hebrew equivalents; but this is no criterion. In his philosophical work he writes, as did Judah ha-Levi, Maimonides, Ibn Ezra, and others, a pure Arabic; a degree more "vulgar" than that of his Mohammedan neighbors, but "Jewish" only in the introduction of Hebrew technical terms and Hebrew quotations (Friedländer, "Sprachgebrauch des Maimonides," p. x., Frankfort, 1902).

It has been customary to look down upon Judæo-Arabic as merely the "Middle Arabic" of the day interspersed with Hebrew words and phrases. But here again, as is the case with Judæo-German, many of the peculiarities observed are survivals of older forms of the spoken Arabic dialects (see Kampffmeyer in "W. Z. K. M." xiii. 247). Thus some of the peculiarities in the Arabic dialect of the Moroccan Jews may be survivals of the Arabic spoken in Spain, which the Jews carried with them at various times when they were banished from the peninsula; and this may explain what Talcott-Williams says of this dialect, that it "comes near being the worst and most obscure patois spoken anywhere and dignified by the name of Arabic" ("Beiträge zur Assyriologie," iii. 572).

The Jews in Persia also have developed a distinct form of Judæo-Persian. Wilhelm Geiger speaks of it as "jargon used as a vernacular" ("Grundriss der Iranischen Philologie," i. 408); but here again, although Hebrew theological and religious terms have crept in, older forms of Persian have been preserved which make the dialect an interesting one. It is in reality only a development of the New High Persian with local dialectic peculiarities. It occasionally shows striking coincidences with the Pazend; and Horn thinks that some of the translations of the Biblical books which have come down were made in neighborhoods in which Parsees lived.

Judæo-Persian.

Thanks to the labors of Bacher, Horn, Salemann, and others, renewed attention has of late years been paid to the Judæo-Persian. There are even various subdialects to be recognized. The mountain Jews in the Caucasus speak what they themselves call "Farsi-Tat," which differs in few respects from the Tat spoken in the province of Baku and the peninsula of Apsheron (see "Seventh Report of the Thirteenth International Oriental Congress," p. 12). The language of the Jews of Bokhara, which is also spoken by the Bokharan Jews in Jerusalem, has its origin in the Tadshiki spoken by the Iranians in central Asia. Quite an extensive literature exists in Judæo-Bokharan; and not a few books have been printed in this dialect. If Salemann is right ("Litteraturblatt für Orientalische Philologie," i. 187), there are two dialects to be distinguished in Bokharan, because the Jews of that place came originally from Tus and from Meshed. Of the Judæo-Persian, Nöldeke says ("Z. D. M. G." li. 70) that "the imitation of Hebrew has caused the most barbaric distortion of the Persian." J. de Morgan speaks of the language of the Jews of Siḥne ("Jour. Asiatique," 8th series, xix. 197); but further details have not been published.

Ladino.

Of the European dialects, in addition to the Greek, spoken by the Jews, mention must first be made of Judæo-Spanish. It had its origin in the Spanish peninsula itself; for Francisco Fernandez y Gonzalez published in 1884 ("Boletin Acad. Hist." v. 299; compare "Rev. Etudes Juives," x. 243) three letters written in Judæo-Spanish and in Hebrew characters by Jews living in Spain before the expulsion. As generally understood, however, the term signifies the Spanish language as used by the exiles from Spain in northern Africa, in the East, and in certain parts of Europe, where they settled. It is called also "Ladino," "Espanol," and "Spaniolic." A very large literature has grown up in this dialect, which does not differ from the regular Spanish except in the fact that occasional Arabic words are to be found, and older forms which have gone out of use in the modern developments of the language in the peninsula. According to Ticknor, a modern Judæo-Spanish newspaper could be read with perfect ease by a Spaniard of the time of Alfonso the Wise. It is interesting to note that parallel to the Judæo-Spanish there is an Arabic-Spanish literature, that of the Moriscos, descendants of the former masters of Spain (Grünbaum, "Neue Beiträge zur Semitischen Sagenkunde," p. 245; *idem*, "Jüdisch-Spanische Chrestomathie," pp. 1 *et seq.*).

The Jews were driven out of France in 1306; but before that time they had settled in large numbers both in the north and in the south. It was especially in Provence that during the early Middle Ages they developed a large literature, and evidently adopted the Provençal dialect which they heard spoken around them. Remnants of this Provençal are to be found not only in the 2,500 glosses in the commentaries of Rashi, Joseph Caro, Samuel ben Meïr, Eleazar of Beaugency, and the Tosafists (Schwab, "La Transcript. des Mots Europ. en Lettres Hebr." in "Mélanges Havet," p. 317, Paris, 1895), but also in original poems (*e.g.*, "The History of Esther" by Israel Caslari of Avignon, which was read on the Feast of Purim; "Romania," 1892) and in prose works and liturgies (*e.g.*, the elegy on the auto da fé at Troyes, 1288, by Jacob ben Judah of Lorraine; "Romania," iii.; "Rev. Etudes Juives," i.). These Provençal works are written in Hebrew script; and the Judæo-Provençal represented in such writings is a faithful reproduction of the Provençal language of the time, modified by the introduction of Hebrew words and by its transliteration into Hebrew characters (see Güdemann, "Geschichte des Erziehungswesens," i. 26, Vienna, 1880; Oesterreicher, "Beiträge zur Geschichte der Jüdisch-Französischen Sprache im Mittelalter," Czernowitz, 1896).

Strange to say, there are no traces of a Judæo-Italian dialect, even though some macaronic poems, as mentioned above, may be read as either Hebrew or Italian. The Jews in Italy very seldom wrote Italian in Hebrew characters; the "Tefillot Latine," Mordecai Dato's sermons, and Moses Catalano's poem being among the few cases in which they did (comp. "Rev. Et. Juives," x. 137). Italian literature began with Dante in the thirteenth century; and as it grew up under their very eyes, the Jews soon took part in its development, and did not mix the language with Hebrew (see Steinschneider, in "Monatsschrift," xlii. 116, 420; Güdemann, "Geschichte des Erziehungswesens . . . der Juden in Italien," p. 207).

Judæo-German.

The most important Jewish dialect is of course the Judæo-German. The name by which it was formerly known, "Iwri-Teitsch," shows at once that it is a more mixed dialect than any of those already mentioned. The Jews in the Rhine provinces originally used French for their daily intercourse (Güdemann, "Geschichte des Erziehungswesens . . . in Frankreich," pp. 114, 275). Whatever the character of this French may have been, it certainly influenced the German that was spoken by them during the period from the eleventh to the fourteenth century; for the frontier between France and Germany was open, and the persecution in the former country drove many to seek homes across the Rhine. With the exception of this French influence, the German Jews in the early Middle Ages were characterized by the purity of the German they spoke and wrote, though they transcribed it in Hebrew characters. This transcription arose from the desire to make it possible for women, young people, and the unlettered to read and enjoy literary productions ("Hebr. Bibl." viii. 15). The Hebrew script used for this purpose was the same as that employed for the commentaries on the Bible; and from the name of the chief commentator it soon became known as the "Rashi script."

This Middle High German of the Rhine provinces was carried eastward, especially into Poland, when the Jews were driven into the Slavonic lands after the Black Death (fourteenth century). The Jews came to Poland from all parts of Germany; and though High German was at the base of the language which they carried with them, there were also introduced many peculiarities of other dialects, both northern and southern. In Poland the Jews preserved their German dialect; and when they returned to Germany in the seventeenth and eighteenth centuries they brought with them their old Middle High German, modified not only by other German dialects, but also by a surprisingly large element of Hebrew. During the last two centuries Judæo-German has been carried over the world wherever the movement out of eastern Europe has brought the Jews from Slavonic lands. In its journey over the globe Judæo-German has suffered changes in various ways: in Poland, Polish words were incorporated; in Holland, Dutch words; in Turkey, Turkish; and, lastly, in English-speaking countries many English words have found their way into the vocabulary.

The introduction of words and phrases from so many different tongues makes Judæo-German appear to the superficial observer to be a language which knows neither grammatical rules nor lexicographic standards. It has therefore been customary to speak of it as "Mauschel-Deutsch," and those who use it have contributed to this misunderstanding by adopting the appellation "jargon" in place of the more correct and modern term, "Yiddish." See JUDÆO-GERMAN; LADINO.

G.

DIAS, FÉLIX: French painter; born at Bordeaux 1794; died May 29, 1817. From his earliest youth he betrayed marked talent for painting. Accordingly he was sent to the Academy, where he carried off several academic honors and took the first prize for composition in 1817. The few productions of his brush which he has left show a skilful blending of colors, a fine taste in arrangement, and great vigor of design.

DIAS (DIAZ), MOSES B. ISAAC: Author, publisher, and bookseller of Amsterdam. In 1695 he published Joseph Franco Serrano's Spanish translation of the Pentateuch, and, between that date and 1715, a number of Hebrew books. He is the author of "Meditaciones Sobre la Historia Sagrada del Genesis, con Ponderaciones Fundadas en las Explicaciones, y Comentos Diferentes de los Antiguos y Modernos Expositores" (Amsterdam, 1697), dedicated to Samuel Cohen Naṣi. A second and enlarged edition, dedicated to the Cavallero Selomo de Medina, appeared at Amsterdam in 1705.

L. G. M. K.

DIASPORA:* The Jews in their dispersion through the Greco-Roman world. In the present article the Jewish race is considered in its relations to the Hellenic and the Roman peoples. The geographical distribution of the race; the civil government to which it was subjected; its juridical system; the social and economic condition of its communities; the success of its propagandistic efforts, which prepared the way for Christianity; and, finally, the first effect upon its legal situation of the triumph of the new religion—these are the points to be summarily dealt with.

---

* The present article has been adapted from the author's paper "Judæi" in the "Dictionnaire des Antiquités," by kind permission of the publishers, Messrs. Hachette & Co.

The Diaspora.

I. The first and most remarkable phenomenon presented by Judaism during the Greco-Roman period is its dispersion along the shores of the Mediterranean. This dispersion was due to numerous causes, and those in part obscure; but one of the most important must be sought in the many vicissitudes, crowned by a final catastrophe, which Judaism encountered in the country of its origin.

After the overthrow in 588 B.C. of the kingdom of Judah by the Chaldeans, and the deportation of a considerable portion of its inhabitants to the valley of the Euphrates, the Jews had two principal rallying-points; viz., Babylonia and Palestine. But though a majority of the Jewish race—especially the wealthy families—were to be found in Babylonia, the existence it led there, under the successive rules of the Achæmenidæ, the Seleucids, the Parthians, and the Neo-Persians, or Sassanians, was obscure and devoid of political influence. The poorest but most fervent element among the exiles returned to Palestine during the reigns of the first Achæmenidæ. There, with the reconstructed Temple at Jerusalem as its center, it organized itself into a community, animated by a remarkable religious ardor and a tenacious attachment to the Bible, which thenceforth constituted the palladium of its nationality, and it enjoyed, under the direction of its high priests, a tolerably broad autonomy.

The Maccabees.

No sooner had this little nucleus increased in numbers with the accession of recruits from various quarters, than it awoke to a consciousness of itself, and strove for political enfranchisement. A tentative effort in this direction, under Artaxerxes Ochus, led to fresh deportations. In South Syria, however, the rule of the Persians passed first to the Macedonians (332 B.C.), who were succeeded by the Ptolemies in the third century B.C.—a period in which Syria was the theater of incessant wars—and finally, in the second century, by the Seleucids. The Ptolemies treated the sentiments and customs of the Jews with the same delicacy and consideration that they showed toward those of their other subjects. Thanks to their tolerance, the Hellenic civilization took root in Judea, and made there considerable advances. The Seleucids, on the contrary, under Antiochus Epiphanes, wished to force prematurely upon the Jews a transformation which could be achieved only in the course of centuries. Their ill-advised policy gave rise to violent reactions, both religious and political, culminating in the revolt of the Maccabees (167 B.C.).

After numerous vicissitudes, and especially owing to internal dissensions in the Seleucid dynasty, on the one hand, and to the interested support of the Romans, on the other, the cause of Jewish independence finally triumphed. Under the Hasmonean princes, who were at first high priests and then kings, the Jewish state displayed even a certain luster, and annexed several territories. Soon, however, discord in the royal family, and the growing disaffection of the pious, the soul of the nation, toward rulers who no longer evinced any appreciation of the real aspirations of their subjects, made the Jewish nation an easy prey to the ambition of the Romans, the successors of the Seleucids. In 63 B.C. Pompey invaded Jerusalem, and Gabinius subjected the Jewish people to tribute.

Many years, however, passed before Judea became definitely incorporated into the Roman empire. In Judea the Romans pursued the same vacillating and changeful policy as throughout the Orient. First they granted the Jews an ethnarch; then a king—a foreigner, it is true—the Idumean Herod, under whose rule the Jewish state attained its greatest material prosperity. After the death of Herod (4 B.C.), the dissolution of his dynasty, and the deposition of his son Archelaus (6 C.E.), Judea proper became a mere department of the province of Syria, governed by a special procurator residing in Cæsarea.

Vicissitudes of Roman Rule.

During this period the Jewish community possessed special privileges, both religious and juridical: in short, it constituted, as under the Achæmenidæ and the Lagides, a hierocracy under the protection of a foreign master. This régime, interrupted for several years (41-44) by the restoration of the Herodian dynasty in favor of Herod Agrippa, could be upheld only by dint of tact and precaution. The agents of Rome, like the Seleucids before them, were unable to satisfy a people at once so impressionable and turbulent. Repeated blunders brought about the formidable insurrection of 66-70, terminating in the capture of Jerusalem and the destruction of the Temple, the center of the national and religious life of the Jews throughout the world.

After this catastrophe, Judea formed a separate Roman province, governed by a legate, at first "pro prætore," and later, "pro consule," who was also the commander of the army of occupation. The complete destruction of the Holy City, and the settlement of several Grecian and Roman colonies in Judea, indicated the express intention of the Roman government to prevent the political regeneration of the Jewish nation. Nevertheless, forty years later the Jews put forth efforts to recover their former freedom. With Palestine exhausted, they strove, in the first place, to establish upon the ruins of Hellenism actual commonwealths in Cyrene, Cyprus, Egypt, and Mesopotamia. These efforts, resolute but unwise, were suppressed by Trajan (115-117); and under Hadrian the same fate befell the last and glorious attempt of the Jews of Palestine to regain their independence (133-135). From this time on, in spite of unimportant movements under Antoninus, Marcus Aurelius, and Severus, the Jews of Palestine, reduced in numbers, destitute, and crushed, lost their preponderance in the Jewish world. The Jews no longer had reason to cling to a soil where the recollection of their past grandeur only helped to render more bitter the spectacle of their present humiliation, where their metropolis had become, under the name "Ælia Capitolina," a Roman colony, a city entirely pagan, to enter which was forbidden the Jews, under pain of death.

Dispersion.

II. The vicissitudes just described exerted a decisive influence upon the dispersion of the Jewish people throughout the world. Successive revolutions in Cœle-Syria had caused, century after century, the emigration of Jews in great numbers, who, having combined with one of the competitors, chose to follow him in his retreat rather than to expose themselves to the vengeance of the conqueror. Thus, as far back as Jeremiah, a small diaspora was formed in Egypt (Jer. xxiv. 8, xxvi. 22, xlii.-xliv.). When Ptolemy I. evacuated Syria many of the Jews voluntarily followed him to his kingdom (Hecatæus, of Abdera, 14, cited by Josephus, "Contra Ap." i. 22; *idem*, "Ant." xii. 1). A similar thing occurred in 198 (Jerome, "Ad Dan.," xi. 708); and under Ptolemy VI. Philometor, the son of the high priest Onias, disappointed in his expectations, betook himself with a considerable number of followers to Egypt, and there set up a rival temple to that of Jerusalem ("Ant." xiii. 3). On the other hand, during the wars of the third and second centuries B.C., thousands of Jews were made captives and reduced to slavery, passing from owner to owner and from land to land until their enfranchisement. This enfranchisement indeed usually occurred very soon, it being precipitated by the fact that, through their unswerving attachment to their customs, they proved inefficient servants. Besides, owing to the close solidarity which is one of the lasting traits of the Jewish race, they had no difficulty in finding coreligionists who were willing to pay the amount of their ransom. The inscriptions of Delphi have preserved an instance of these enfranchisements of Jewish slaves by payment of money (Collitz, "Griech. Dialekt-inschr." ii. 2029; the amount paid was 4 minas, or about $80). The celebrated rhetorician Cecilius of Calacte was originally a Jewish slave (Suidas, *s.v.*); he was confounded by Plutarch with the questor of Verres, Cecilius Niger, who was perhaps his patron.

The Jews thus freed, instead of returning to Palestine, usually remained in the land of their former slavery, and there, in conjunction with their brethren in faith, established communities. According to the formal testimony of Philo ("Legatio ad Caium," § 23), the Jewish community in Rome owed its origin to released prisoners of war. The political importance which it had already acquired in the proceedings against Flaccus (59 B.C.) shows that it did not consist merely of a few captives brought by Pompey (63 B.C.), but rather of prisoners made in earlier wars—in Asia Minor, for instance. The great Jewish insurrections under Vespasian, Trajan, and Hadrian, terminating, as they did, so disastrously, threw upon the market myriads of Jewish captives. Transported to the West, they became the nuclei of communities in Italy, Spain, Gaul, etc. Among these captives was the historian of the Jewish people, Flavius Josephus. Under Domitian the Jewish slaves in Rome were sold at very low prices. Even the poet Martial, whose purse was never well filled, possessed one ("Epig." vii. 35; the interpretation, however, is uncertain). The names of many Jews found in the tumulary inscriptions in Rome betray their servile origin. To these sales of prisoners of war must be added, as further sources of the Diaspora, the deportations, more or less voluntary, effected by the various governments, either to chastise the rebels or to populate the uninhabited parts of their territories. Not to mention the great Babylonian exile, and the transportation of Jews to Hyrcania by Ochus (Syncellus, i. 486; Orosius, iii. 7), Ptolemy I., according to tradition, took with him to Egypt 30,000 (?) Jews, in order to garrison the frontiers (Pseudo-Aristæus, ed. Schmidt, p. 255; "Ant." xii. 1). The same king compelled Jews to settle in Cyrenaica ("Contra Ap." ii. 4). Antiochus the Great, it is said, transferred to the sparsely populated districts of Phrygia and Lydia 2,000 Jewish families drawn from Mesopotamia ("Ant." xii. 3, § 4). Tiberius sent 4,000 Jews of Rome to wage a war in Sardinia (Tacitus, "Annales," ii. 85), many of whom perished, while the survivors must have formed the nucleus of a Jewish community in that country. Many rulers, without resorting to violent measures, made successful efforts to attract Jewish colonists to the newly founded cities by conceding to them important privileges. Such was the policy, if not of Alexander, at any rate of Seleucus Nicator, Ptolemy Philadelphus, the successors of Antiochus Epiphanes (in Antioch), etc.

Deportations.

Fecundity of the Jews.

Nor must it be forgotten that the Jews were a prolific race. Their law made it their duty to rear all their children. Judea, a land by no means fertile, must quickly have become overpopulated. The need thus arose of spreading to the adjacent districts (Galilee, Peræa), which soon became Judaized; then to the neighboring countries (Egypt, Syria); and, finally, to places beyond the sea, and this upon the slightest hope of meeting there with coreligionists. This phenomenon is not a characteristic of the Jews alone; it is seen in the colonies of Egyptians, Syrians, and Phenicians in Greece, in Rome, and in the important commercial centers of Italy; and they, like the Jews, spread their national cults. But the Jew emigrates more readily, since his creed is linked to a book, not to a place.

Besides, owing to the barrier which their deeply rooted religious observances formed around them, the Jews never became absorbed in the surrounding populations. On the contrary, an active religious propaganda, to be treated more fully later on, caused each small group of Jewish families to become the center around which numerous proselytes of other races clustered. Many of these adherents afterward fully embraced the Jewish faith. It may be said that if proselytism was not the conscious design of the Diaspora, it at all events powerfully contributed toward its consolidation and expansion.

Thus, as early as the middle of the second century B.C. the Jewish author of the third book of the Oracula Sibyllina, addressing the "chosen people," says: "Every land is full of thee and every sea" (Sibyllines, iii. 271; compare I Macc. 15); and if these words contained some exaggeration, the prophecy became true in the subsequent century. The most diverse witnesses, such as Strabo, Philo, Seneca, the author of the Acts of the Apostles, and Josephus, all bear testimony to the fact that the Jewish race was disseminated over the whole civilized world (Strabo, frag. 6, cited by Josephus, "Ant." xiv. 7, § 2; Philo, "In Flaccum," 7; Seneca, frag. 41-43, in Augustine, "Civ. Dei," vi. 10; Acts ii. 9-11; Josephus, "B. J." ii. 16, § 4; vii. 3, § 3). King Agrippa, in a letter to Caligula, enumerates among the provinces of the Jewish Diaspora almost all the Hellenized and non-Hellenized countries of the Orient (Philo, "Legatio ad Caium," § 36); and this enumeration is far from being complete, as Italy and Cyrene are not included. The epigraphic discoveries from year to year augment the number of known Jewish communities.

The following table, which is doubtless incomplete, attempts to summarize modern knowledge concerning the geography of the Diaspora, according to the literary texts and the inscriptions:

ASIA.

Palestine: Ascalon, etc. *Arabia*: Yemen, Island Iotaba (Procopius, "Pers." i. 19). *Phenicia*: Aradus, Berytus (Le Bas-Waddington, No. 1854C). *Cœle-Syria*: Damascus (Josephus, "B. J." ii. 20, § 2; vii. 8, § 7). *Syria*: Antioch ("B. J." vii. 3, §§ 3 *et seq.*), Palmyra ("C. I. G." No. 4486; Le Bas-Waddington, Nos. 2619 *et seq.*), Tafas ("Bull. Corr. Hell." 1897, p. 47). *Mesopotamia*: Nisibis ("Ant." xviii. 9, § 1), Callinicum (Ambrosius, "Ep." xl.). *Babylonia*: Sura, Pumbedita, Nehardea ("Ant." xviii. 9, § 1), Seleucia (*ib.* xviii. 9, § 9), Ctesiphon (*ib.*). *Elam* (*Susiana*) (Acts ii. 9-11). *Parthia*. *Hyrcania* (Syncellus, i. 486; Orosius, iii. 7). *Media*. *Armenia* (Faustus of Byzantium, ed. Langlois, iv. 55).

ASIA MINOR.

Pontus (Philo, "Legatio ad Caium," § 36; Acts ii. 9-11, xviii. 2). *Bithynia* (ib.). *Mysia*: Adramyttium (Cicero, "Pro Flacco," 28), Pergamos (*ib.*; "Ant." xiv. 10, § 22), Parium (?) (*ib.* xiv. 10, § 8; read Παριανοί, not Πάριοι). *Ionia*: Smyrna ("C. I. G." No. 9897; "Vita Polycarpi," 12 *et seq.*; "Rev. Etudes Juives," vii. 161), Ephesus ("Ant." xiv. 10, §§ 25 *et seq.*; Acts xviii. 19 *et seq.*), Phocæa ("Bull. Corr. Hell." x. 327 = "Rev. Etudes Juives," xii. 236), Miletus ("Ant." xiv. 10, § 21), Samos (I Macc. xv.). *Lydia*: Sardes ("Ant." xiv. 10, §§ 17 *et seq.*), Thyatira ("C. I. G." No. 3509 [doubtful]; Acts xvi. 14; compare Schürer, "Abhandlungen . . . Weizsäcker," pp. 39 *et seq.*), Tralles ("Ant." xiv. 10, § 21), Hypæpa ("Rev. Etudes Juives," x. 74), Magnesia of Sipylus (*ib.* 76), Nysa ("Ath. Mitth." xxii. 484). *Caria*: Iasus (Le Bas-Waddington, No. 294), Halicarnassus ("Ant." xiv. 10, § 23), Cos (I Macc. xv.; "Ant." xiv. 7, § 2; 10, § 5), Myndos (I Macc. xv.; inscription in "Rev. Etudes Juives," xlii. 1), Cnidus (*ib.*), Rhodes (*ib.*). *Phrygia*: Apamea ("Pro

Flacco," 28; Ramsay, "Cities," i. 538, No. 399a: coins symbolizing the Ark of Noah), Laodicea ("Pro Flacc." 28; "Ant." xiv. 10, § 20), Acmonia (Ramsay, "Cities," i. 649 *et seq.*), Hierapolis (Ramsay, *ib.* i. 545, Nos. 411, 118, 28 [?]), Eumeneia (Ramsay, *ib.* i., No. 232, p. 386 [doubtful]). *Lycia*: Limyra ("Reisen in Lykien," ii. 66), Tlos ("Eranos Vindob." 99), Phaselis (I Macc. xv. 23), Corcyus ("Rev. Etudes Juives," x. 75). *Pisidia*: Antioch (Acts xiii. 14). *Pamphylia*: Side (I Macc. xv. 23). *Galatia*: Germa ("Bull. Corr. Hell." vii. 24 = "Rev. Etudes Juives," x. 77). *Lycaonia*: Iconium (Acts xiv. 1), Lystra (*ib.* xvi. 1). *Cappadocia*: Mazaca (Cæsarea). *Cilicia*: Tarsus, Elaioussa (?) ("Jour. Hell. Stud." xii. 234 [College of Σάββατισταί ?]). *Cyprus*: Salamis (Acts xiii. 5), Paphos (*ib.* verse 6).

EUROPE.

Cimmerian Bosporus: Panticapeum (Latyschew, "Inscr. Euxini," Nos. 52, 53), Gorgippia (*ib.* Nos. 400, 401; a combination of pagan and Jewish formulas), Tanais (*ib.* Nos. 449, 450, 452, 456 *et seq.*; fraternities of ἀδελφοὶ σειβόμενοι θεὸν ὕψιστον). *Scythia*: Olbia (Stephani, in "Bull. Acad. Petersb." 1860, i. 246; "C. I. G." No. 2079?). *Thrace*: Constantinople ("Rev. Etudes Juives," xxvi. 167 *et seq.*), Philippi (Acts xvi. 13). *Macedonia*: Thessalonica (Acts xvii. 2; "Rev. Etudes Juives," x. 78), Berœa (Acts xvii. 10). *Continental Greece*: Thessalia (Philo, "Legatio ad Caium," § 36; Acts xviii. 1 *et seq.*), Etolia (*ib.*), Bœotia (*ib.*), Athens (Acts xvii. 17; "C. I. A." iii. 2, Nos. 3545–3547), Corinth (Philo, *l.c.* § 36; Acts xviii. 1), Argos (*ib.*), Laconia ("Inscr. Brit. Mus." No. 149 = "Rev. Etudes Juives," x. 77), Mantinea ("Bull. Corr. Hell." 1896, p. 159, No. 27 = "Rev. Etudes Juives," xxiv. 148), Patras ("C. I. G." No. 9896). *Archipelago*: Eubœa (Philo, *l.c.* § 36; Acts xviii. 1), Ægina ("C. I. G." No. 9894), Syros (De Rossi, in "Bull. Crist." 1876, p. 116), Melos ("Ant." xvii. 12, § 1), Delos (*ib.* xiv. 10, § 14). *Crete*: Gortyna (I Macc. xv. 23). *Sicily*: Syracuse ("C. I. G." No. 9895), Messina (Gregory the Great, "Letters"), Agrigentum (*ib.*), Panormus (*ib.*). *Italy* (*South*): Apulia and Calabria ("Cod. Theod." xii. 1, 157), Venusia ("C. I. L." ix. 6195 *et seq.*, and Ascoli's monograph), Tarentum ("C. I. L." ix. 6400–6402), Fundi (*ib.* x. 6299), Capua (*ib.* 3905), Naples (*ib.* 1971). *Italy* (*Central*): Rome, Terracina (Gregory the Great, *l.c.*), Faleria (Rutilius Namatianus, v. 377 *et seq.*). *Italy* (*North, and Istria*): Ravenna (Anon. "Val." 81.), Bologna (Ambrose, "Exh. Virgin." 1), Milan (Cassiodorus, "Var." v. 37; "Rev. Archéologique," 1860, p. 348), Brescia ("C. I. L." v. 1, 4411), Genoa (Cassiodorus, *l.c.* ii. 27), Aquilea (Garrucci, "Cim. Randanini," p. 62), Pola ("C. I. L." v. 1, 88; a "metuens"). *Pannonia* ("C. I. L." iii. 1, 3688; "Eph. Epigr." ii., No. 593). *Gaul* (first mentioned in "Vita Hilarii" [d. 366]; Sidonius Apollinaris, iii. 4). *Germany*: Colonia Agrippina ("Cod. Theod." xvi. 8, 4). *Spain* ("Concil. Ilib. Can." 49, 50, 78): Adra ("C. I. L." ii. 1982), Minorca ("Epist. Severiani," in ed. Migne, xx. 730), Tortosa ("Inscr. Trilingual," in Chwolson, "C. I. H." No. 83).

AFRICA.

Egypt: Alexandria, Leontopolis, Athribis ("Bull. Corr. Hell." xiii. 178 = "Rev. Etudes Juives," xvii. 235), Arsinoite Nome ("Rev. Etudes Juives," xxxvii. 220), Oxyrhynchus (*ib.*), Thebaid. *Ethiopia*. *Cyrenaica*: Cyrene, Berenice ("C. I. G." No. 5361), Boreum (Procopius, "De Ædif." vi. 2). *Proconsular Africa* (Zeugitana, Byzacum, Tripolitene [Monceaux, in "Rev. Etudes Juives," xliv. 1 *et seq.*]): Carthage (Tertullian, "Adv. Jud. Init."; P. Delattre, "Gamart ou la Necropole Juive de Carthage"; "C. I. L." viii. 1091 [Addit. p. 929], Supp. 14,097–14,114), Naro (Hammam Lif; "C. I. L." viii., Supp. 12,511), Utica (*ib.* viii. 1205 [Addit. p. 931]), Simittæ (Shemton; "Migne Patrologia," xlvi. 881), Œa (Tripolis; Augustine, "Epist." 71, 3, 5), Locus Judæorum Augusti (Iscina, "Medinat al-Sultan" [Tab. Penting.]). *Numidia*: Hippo Regius (Augustine, "Serm." 196, 4), Cirta ("C. I. L." Nos. 7150, 7155, 7530 [Addit. p. 965], 7710), Henshir Fuara (*ib.* viii., Suppl. 1670; a "metuens," viii. 4321 [Addit. p. 956]). *Mauretania*; Sitifis ("C. I. L." viii. 8423, 8499), Cæsarea ("Acta Marcianæ," 4), Tipasa ("Passio Sanctæ Salsæ," 3), Volubilis (Berger, "Bull. Arch. Com. Trav. Hist." 1892, p. 94), Auzia ("C. I. L." viii., Suppl. 20,760).

There is only scant information of a precise character concerning the numerical significance of these diverse Jewish conglomerations; and this must be used with caution. After Palestine and Babylonia, it was in Syria, according to Josephus, that the Jewish population was densest; particularly in Antioch, and then in Damascus, in which latter place, at the time of the great insurrection, 10,000 (according to another version 18,000) Jews were massacred ("B. J." ii. 20, § 2; vii. 8, § 7). Philo ("In Flaccum," § 6) gives the number of Jewish inhabitants in Egypt as 1,000,000; one-eighth of the population. Alexandria was by far the most important Jewish community, the Jews in Philo's time inhabiting two of the five quarters of the city (*ib.* § 8). To judge by the accounts of wholesale massacres in 115, the number of Jewish residents in Cyrenaica, at Cyprus, and in Mesopotamia must also have been large. In Rome itself, at the commencement of the reign of Augustus, there were over 8,000 Jews: this is the number that escorted the envoys who came to demand the deposition of Archelaus. Finally, if the sums confiscated by the propretor Flaccus in 62 represented actually the tax of a didrachma per head for a single year, the inference may be safely drawn that in Asia Minor the Jewish population numbered 45,000 males, or a total of at least 180,000 persons (Cicero, "Pro Flacco," 28, § 68 [the sums confiscated amounted to more than 120 pounds of gold]).

Comparative Density of Jewish Populations.

III. This diffusion of Judaism throughout the Greco-Roman world could not but call forth vigorous resistance, especially in those parts where the Greek language and Greek civilization prevailed. Speaking broadly, the middle classes in the Greek cities were not favorably disposed toward the Jews. Their religious and racial peculiarities; their undisguised contempt of the Hellenic cults, pageants, and gymnastic displays—in short, of all that constituted the very essence of a Grecian city; perhaps, also, a secret apprehension that they might develop into commercial competitors; and, finally, the efficacy of their religious propagandism—all contributed toward the unpopularity of these newcomers. In certain cities, such as Parium and Tralles, the exercise of the Jewish cult and rites was prohibited by express decrees ("Ant." xiv. 10, § 8 [not "Paros"]). The cities of Ionia were several times on the point of expelling the Jewish inhabitants. At Seleucia in Babylonia, on one occasion, the Greeks together with the Syrians massacred more than 50,000 Jews (*ib.* xviii. 9, § 9). Throughout Syria they were attacked by the Greeks from the beginning of the war of 66; and when the war was terminated Antioch demanded their banishment.

Unfriendly Attitude of Greeks.

The butcheries that almost at the same moment were perpetrated under Trajan in Mesopotamia, Cyprus, and Cyrene, show the high pitch to which the antagonism between the races had risen. In Cyprus especially it was simply a war of extermination; the Jews massacred all the Greek inhabitants of Salamis; and when the uprising was suppressed, residence on the island was forbidden to Jews under pain of death (Dio Cassius, lxviii. 32). Nor were the relations more amicable in Alexandria, although Josephus maintains that they became strained only after the Grecian and Macedonian element of the middle class had been supplanted by the native. At times it was a silent rivalry and a desperate literary combat; at times a redoubtable popular outburst that caused blood to flow in torrents, as in the days of Caligula, Nero, and Trajan. As a result of one of these conflicts, the Roman prefect of Egypt, in conjunction with the leading Alexandrians, decided to shut off the Jews in a ghetto admitting of easy surveillance, "whence they could not burst forth suddenly, and fling themselves upon the illustrious city and make war upon it" (Louvre Papyrus, No. 2376 *bis*, col. vi. 15).

Attitude of the Rulers.

Against this attitude of revengeful intolerance on the part of the Greek middle class, the Jews found effective supporters, first in the Macedonian monarchs, and then in the Romans. It may be said that, without the broad and cosmopolitan views of the diadochi who favored, in the interest of their own power, the mingling and amalgamation of the various races, the Jewish Diaspora could neither have originated nor maintained itself. Apart from a few exceptions (Antiochus Epiphanes, Ptolemy Physcon), the Seleucids and the Lagids pursued a friendly policy toward the Jews, and met with a grateful attachment in return. Thus Seleucus Nicator granted them the privilege of settling in all his new colonies, with the rights of citizens; Ptolemy Soter entrusted them with the charge of the customhouse on the Nile; and Antiochus the Great installed them as planters and tax-gatherers in Lydia and Phrygia, while granting to them the free exercise of their customs ("Ant." xii. 3, § 4 [doubtful]). There is reason to believe that the kings of Pergamos were actuated by similar principles; otherwise it would be hard to account for the rapid growth of the Jewish communities in the cities of Ionia.

Roman Attitude.

At first the Romans showed little disposition to receive the Jews among them. In 139, at the time of their first appearance, they were expelled by the pretor Hispalus, in order to check their proselytizing endeavors (Val. Max. i. 32). Eighty years later, however, Rome possessed a large Jewish colony. Julius Cæsar, who prohibited foreign "collegia" in Rome, made a distinct exception in favor of the Jews, to whom he felt indebted ("Ant." xiv. 10, § 8), and who sincerely lamented his death. Augustus showed them similar good-will. Under Tiberius, in consequence of various scandals that attracted the attention of Sejanus, the Jews in 19 were expelled from Rome ("Ant." xviii. 3, § 5); while a "senatus consultum" ordered them to evacuate Italy if within a stated time they had not abjured their rites (Tacitus, "Annales," ii. 85; Suetonius, "Tiberius," 36); and, under the pretext of military service, 4,000 Jews were deported to the deadly climate of Sardinia. The edict of expulsion, however, was not long enforced; and after the death of Sejanus the Jews reappeared in Rome. Under Caligula these disgraces were wiped out. Claudius used the disorders occasioned by a certain Chrestos as a pretext for interdicting Jewish gatherings in Rome (Dio Cassius, lx. 6). It may indeed be the case that the whole account is inaccurate, and that a simple police measure is here represented as an edict of expulsion (Acts xviii. 2; Suetonius, "Claudius," 25; Orosius, vii. 6, 15). From that time on, the legal status of the Jews of Rome was never again disturbed, even at the height of the terrible insurrections under Vespasian, Trajan, and Hadrian.

At every period the Roman government kept their anti-Judaism for "home consumption." As far back as 161 B.C. (?) Rome formed an alliance with the Jews of Palestine—the first made by it with Orientals—and by virtue of this alliance, renewed several times and maintained at great cost, it incurred the moral obligation to defend the religious liberty of all the Jewish emigrants wherever it possessed influence. As early as 139 a circular note of the Roman government was issued to the friendly monarchies and republics on behalf of their new allies (I Macc. xxv. 16–24).

With the inheritance of Macedonia and Pergamos from the Seleucids and the Lagids, the duty devolved upon Rome of protecting the Jews, scattered in the various Greek cities now passing under its domination, against the malevolence of their inhabitants. It was, in particular, after Julius Cæsar that Rome took this duty to heart. Though undoubtedly the services which John Hyrcanus and Antipater rendered to the dictator during his campaign had something to do with his friendly attitude toward the Jews, still the latter was largely the result of his broad and humanitarian views rising above all distinctions of race and religion.

Influence of Cæsar.

His successors were actuated by similar sentiments; and as soon as an organized Jewish state came into existence, its rulers, Hyrcan, the Herods, and the Agrippas—personal friends of the triumvirate and of the successive emperors—were enabled to intercede successfully on behalf of their persecuted coreligionists. Thus it was that, upon the "invitation" of the Roman governors or emperors, several cities of Asia Minor (Laodicea, Miletus, Halicarnassus, Sardes, and Ephesus) issued decrees in behalf of the Jews, which Josephus has preserved ("Ant." xiv. 10); and thus, too, it was that Alexandria was compelled to perpetuate their rights by means of a bronze stele (Josephus, "Contra Ap." ii. 4; "Ant." xiv. 10, § 1). When, under Augustus, the cities of Ionia wished to expel the Jews on account of their refusal to abandon their rites, Agrippa, chosen as arbiter, gave a decision in favor of the latter ("Ant." xii. 3, § 2; xvi. 2, §§ 3–5).

Tiberius himself issued a circular letter to the local authorities (Philo, *l.c.* § 24); and, after the momentary crisis provoked by the monomania of Caligula, Claudius, immediately upon his accession, vouchsafed to the Jews a writ of tolerance covering the whole empire, which thenceforth constituted the unassailable charter of their privileges. It had only one condition attached to it; namely, that they should content themselves with exercising their own rites without showing contempt for those of others ("Ant." xix. 5, §§ 2–3). Even after the great insurrection of 66–70 the imperial government persevered in its policy of toleration, and turned a deaf ear to the supplications of the Greeks in Alexandria and Antioch, who demanded the expulsion of the Jews, or, at least, the abolition of their privileges. These were, on the contrary, formally confirmed by Alexander Severus ("Vita," xxii.). Altogether, Judaism, during the entire duration of the Roman empire, remained a recognized religion ("religio licita"); and, what is more, as will shortly be seen, a religion exceptionally privileged.

IV. These privileges were as follows:

Right of Residence.

1. From localities where they were legally established, the Jews could not be expelled except by means of a formal decision issued by the supreme authority (king or emperor)—a procedure followed under Tiberius with regard to Rome, under Trajan with regard to Cyprus, and under Hadrian with regard to Ælia. Occasionally at the time of their establishment in a city the Jews had special quarters assigned to them: thus, in Alexandria, the quarter called the "Delta," situated near the royal palace ("B. J." ii. 18, § 7; "Ant." xiv. 7, § 2; in Sardis, *ib.* 10, § 24): and, in Rome, the quarter "Trastevere." It does not appear, however, that their confinement to special quarters was strictly enforced; and there is evidence that in Alexandria—at all events up to the reign of Hadrian—they moved about freely.

Synagogues.

2. In the quarters inhabited by them the Jews possessed the privilege of erecting association halls for purposes of common worship and for the reading of the Law. These halls were, in fact, their synagogues, also termed *προσευχαί* and *σαββατεία* (the word *ἀνδρών* seems to denote a sort of synagogue reserved exclusively for the males: "Ant." xvi. 16, § 4), for the principal day of meeting was the Sabbath. The pagans, under certain conditions, could obtain admission to those halls (Acts xiii. 44; "Ant." xix. 6, § 3). The synagogues served also for purposes of manumission, or enfranchisement of slaves (Latyschew, ii., No. 52); and it is this fact that gave birth to the "manumissio in ecclesia" ("Cod. Theod." iv. 7). Each Jewish community of any importance whatever had its synagogue: some, as Damascus, Salamis in Cyprus, and Alexandria, had several. The synagogue in Antioch eclipsed all others by its magnificence ("B. J." vii. 3, § 3). Rome appears to have had as many synagogues as Jewish communities (viz., eight), all of which—at least up to the third century—were located outside of the "pomœrium." At times the authorities themselves designated the plot on which the synagogue was to be erected, in which cases the ground was doubtless given gratuitously (in Sardis, for instance, "Ant." x. 10, § 24). In maritime cities the custom seems to have been to build the synagogues near the sea (as in Halicarnassus, *ib.* § 23: *τὰς προσευχὰς ποιεῖσθαι πρὸς τῇ θαλάττῃ κατὰ τὸ πάτριον ἔθος*).

Certain synagogues are said to have had the right of sanctuary, like that which has been recently discovered in Lower Egypt. In this case the right granted by one of the Ptolemies (Euergetes, I. or II.) had been ratified by Zenobia ("C. I. L." iii., Suppl., 6583; compare Derenbourg in "Jour. Asiatique," 1869, p. 373; "Eph. Epig." iv. 26, No. 33). The synagogues were places of assembly and of prayer (as well as libraries; Jerome, "Epistolæ," 36), but not of sacrifice, as is erroneously stated in the decree of the Sardians. With the exception of Jerusalem, the sacrificial cult obtained only in the temple of Leontopolis in Lower Egypt, founded under Ptolemy Philometor (about 160 B.C.), and destroyed in 73 C.E. The cult there was conducted by priests who had emigrated from Palestine, and was always looked upon with suspicion by the orthodox.

Cemeteries.

Besides their synagogues, the ruins of some of which still exist, notably that of Hammam Lif, Tunis ("Rev. Et. Juives," xiii. 48), with its beautiful mosaic (see, also, the curious inscription of Phocæa [*ib.* xii. 237], and Renan, "Mission de Phénicie," p. 761), the Jews had special cemeteries, built in the same style as the Christian catacombs. The best known are those of Venusia in Apulia, of Gamart near Carthage, and the five cemeteries in Rome: three in the vicinity of the Via Appia (Vigna Randanini, discovered in 1859, inscriptions published in 1862 by Garrucci; Vigna Cimarra, discovered in 1867, inscriptions published by Rossi and Berliner; Vigna Pignatelli, discovered in 1855 by N. Müller, "Römische Mittheilungen," i. 49 *et seq.*); one in the Via Labicana for the Suburan quarter (discovered in 1883, inscriptions published in 1887 by Marucchi); and one, the earliest discovered (by Bossio in 1602), but lost to sight again a century ago, outside the Porta Portuensis, for the Jews of Trastevere. To these must be added the cemetery in Portus. The Jewish graves are of extreme simplicity, and contain nothing but lamps and a few vases of gilded glass. Some more elaborate sepulchers ("cubicula") are decorated with paintings, from which the figures of animals are not always excluded (cemetery of the Vigna Randanini, cemetery of Carthage). There are also some sculptured sarcophagi. The epitaphs, usually in faulty Greek, are accompanied by characteristic symbols; *e.g.*, chandelier with seven arms, palm and citron, oil-vases, trumpet ("shofar"), etc.

Both the synagogues and the cemeteries were placed under the protection of the laws. The synagogues, after the prevalence of Christianity, were frequently in danger from incendiaries, and energetic penal measures were needed to preserve them. An edict of Augustus places a theft of the sacred books of the Jews in the class of sacrilegious offenses. As for the graves, the Jews, in certain countries, borrowed from the pagans an efficacious device to protect them: an inscription apprised the violator that a heavy fine would be imposed upon him, to be paid altogether or in part either to the municipal or to the imperial treasury.

The Jewish Cult.

3. The cult, besides the daily meetings in the synagogue, embraced the celebration of the Sabbath and the other festal days, some of which latter were attended by banquets; the observance of the dietary laws and the laws of chastity; the rite of circumcision—in short, all that constituted "the customs of the fathers." The free exercise of these customs was legally assured to the Jews. In Halicarnassus, a decree, while recognizing the community, fixed a fine for any attempt, private or municipal, to obstruct the course of the law ("Ant." xiv. 10, § 23). For a deed of this character in Rome, the future pope, Calixtus, was condemned by the prefect of the city to forced labor in the Sardinian mines (Hippolytus, "Philosophumena," ix. 12). The observance of only one custom, circumcision, was for a

short time prohibited by Hadrian; and this prohibition was one of the causes of the revolt in 132 (Spartian, "Hadrian," 14). To the period of this interdiction the Smyrniot inscription, "C. I. G." No. 3148, may be assigned, where the Jews participating in a subscription term themselves (l. 30) *οἱ ποτὲ 'Ιουδαῖοι.* Later the interdiction was confined to the circumcision of non-Jews—a measure that was the outcome of another order of ideas. To the guaranties surrounding the religious liberty of the Jews may be added exemption from the worship of the emperors—which exemption was seriously menaced only under Caligula—and certain special decisions destined to reconcile their interest with their "superstition." Thus, Augustus decided that, in case the distributions of grain and money in which the Jews participated should fall on a Sabbath, their shares should be distributed among them on the following day (Philo, *l.c.* § 23). Likewise, in cities where the inhabitants were entitled to rations of oil—Antioch, for instance—the Jews received money instead, as the use of pagan oil was unlawful to them ("Ant." xii. 3, § 1).

4. Every Jewish community was authorized, at least tacitly, to form for itself an autonomous organization, administrative, financial, and judicial. From this, however, it must not be hastily concluded, as has sometimes been done, that in Greek countries the Jewish agglomerations were on the same level with the pagan religious associations (*θίασοι, ἔρανοι*), which enjoyed important juridical privileges. These privileges resembled those possessed in certain commercial centers by corporations of Oriental merchants—Egyptians, Sidonians, Tyrians, and Syrians—grouped around a national cult; but there was a great difference between this cult, associated closely with those in Greece and Rome, and the exclusive cult of the God of Israel. No official document furnishes the slightest ground for the assumption that, in Greek territories, the Jewish communities were classed with the thiasi. At the best this designation might be extended to those fraternities devoted to the cult of the Θεὸς ὕψιστος, in the Cimmerian Bosporus (notably in Tanais) and elsewhere—fraternities some of which seem to have been disguised synagogues, and some pagan "sodalicia" more or less impregnated with Jewish elements (Schürer, "Die Juden im Bosporischen Reiche," in "Sitzungsber. Akad." xiii., Berlin, 1897; compare Cumont, "Hypsistos," in "Rev. de l'Instruction Publique en Belgique," 1897, Supplement).

These thiasi were the predecessors of the Judæo-pagan sect of the Hypsistarians, who were spread over Cappadocia in the fourth century (Greg. Naz. "Or." xviii. 5). But in many localities, even outside of Syria, Θεὸς ὕψιστος did not mean YHWH; the name designated rather Helios or the Phrygian Sabazios, whom the Romans for a long time confounded with the God of the Jews (Valerius Maximus, i. 3, 2; Lydus, "De Mens." iv. 38). The status of the recognized Jewish colonies in Greek countries was comparable rather to that of groups of Roman citizens in Greek cities, in that they formed a small state within the state, and had their own constitution, laws, assemblies, and special magistrates, while enjoying the protection of the general laws. In this way the community in Alexandria is designated *πολιτεία αὐτοτελής*, while the Jews of Berenice (Cyrenaica) called themselves a *πολίτευμα*. Only one text, of Roman origin, seems to refer to the Jewish communities as "thiasi"; but here the word stands for the Latin "collegia" ("Ant." xiv. 10, § 8). Even so, they were but imperfect collegia, enjoying neither a corporate personality nor, in consequence, the privilege of possessing capital or real estate. A rescript of Caracalla declared void a legacy bequeathed to the "universitas" of the Jews of Antioch ("Cod. Just." i. 9, 1; compare i. 20, "Dig." xxxiv. 5).

The internal organization of these little Jewish colonies was modeled upon that of the Greek communes, and it remained faithful to the type, at least in appearance, even after the catastrophe of 70 C.E. had destroyed the national existence of the Jews.

Interior Organization.

The influence of this catastrophe upon the autonomy of the Jewish communities has been exaggerated (Mommsen, in "Historische Zeitschrift," 1890, pp. 424 *et seq.*). It could have been only temporary, like that exerted by the edicts of Hadrian. Almost everywhere existed, side by side with the general assembly of the faithful ones (*σύνοδος, σύλλογος, συναγωγή*), which was often of a periodic character, a council of elders (*γερουσία, γέροντες, πρεσβύτεροι*). At Hypæpa there were *'Ιουδαῖοι νεώτεροι* ("R. E. J.," x. 74). The president of the council of elders was called *γερουσιάρχης, γερουσιάρχων*, in one instance even *ἐπιστάτης τῶν παλαιῶν* (*ib.* xxvi. 168, Constantinople; the meaning is contested). The number of the elders was proportioned to the importance of the community; at Alexandria they numbered at least 38 (Philo, "In Flaccum," § 10).

Synagogue Officers.

At the head of the administration was a single *ἄρχων* (at Antioch, for instance, "B. J." vii. 3, § 3), or an assembly of *ἄρχοντες*; at Berenice these officials numbered nine ("C. I. G." No. 5361). The community of Alexandria had for a long time a single chief, styled the "ethnarch" or "genarch," who united the functions of supreme judge and administrator (Strabo, cited in "Ant." xiv. 7, § 2). Beginning with Augustus, these functions were divided between a gerusia and a committee of archons (Philo, "In Flaccum," §§ 10, 14; compare "Ant." xix. 5, § 2). Only in Rome, and probably as a simple police regulation, the Jewish population was broken up into a number of small communities or synagogues named after their patrons, or their quarters, or the native place of their members, etc. Of such communities eight are known: *Αὐγουστήσιοι, 'Αγριππήσιοι, Βολύμνιοι* (after Volumnius, prefect of Syria under Augustus?), *Καμπήσιοι* (from the Field of Mars), *Σιβουρήσιοι* (Subura), *'Εβραῖοι* (Samaritans? Palestinians?), *'Ελαίας* (Velia? Elea?), *Καρκαρήσιοι*, to which must perhaps be added the synagogue of the Rhodians (inscription in Garrucci, "Diss. Arch." ii. 185, No. 37). Juvenal, in a celebrated passage (iii. 10 *et seq.*), seems to allude to a synagogue situated in the wood of Egeria, outside the gate of Capene. Each of these little communities had its gerusia, its *γερουσιάρχης*, its archons, one or more. The *γερουσία* is not mentioned in the inscriptions, but its existence is implied in that of the *γερουσιάρχης*, who must not be taken as the head of the "assembly of archons." The language of the inscriptions would seem to favor the hypothesis that each community had one archon. At all events, it would hardly be safe to generalize the words of St. Chrysostom ("Hom. in S. Joh. Natal.") on the election of the archons in September and the annual duration of their functions. With reference to the nomination of the archons, the statement of the "Vita Alex. Sev." 45 is perhaps trustworthy; namely, that the names of the candidates were publicly posted, to invite objections. As a rule, the archon was not elected for life, as is shown in the mention of *δὶς ἄρχων* in the funeral inscriptions. This title was sometimes honorary, and extended to the children (*νήπιος ἄρχων, μελλάρχων*). Nevertheless, the *διὰ βίου* seems to have meant an archon for life.

Associated with the archon, chief of the administration, one finds in many communities one or probably several *ἀρχισυνάγωγοι*, chiefs of the synagogue (rabbis?). Sometimes the same person combined the functions of archon and archisynagogue ("C. I. L." x. 1893). The archisynagogue preached on the Sabbath (Justin, "Dial. cum Tryph." cxxxvii.). This title, however, did not always indicate an actual office-holder: in Smyrna and Myndus it was borne by a woman. The *ὑπερέτης* (ḥazzan) was an employee of the synagogue. The designation *γραμματεύς* was that of the official clerk; but occasionally this title, which was the equivalent of the Hebrew "sofer," seems to have been a merely honorary one. Persons versed in the Law were called *διδάσκαλος, νομομαθής, μαθητὴς σοφῶν*, etc. Probably these also were but honorary appellations, like the titles of *προστάτης, πατὴρ λαοῦ*, "pater" and "mater synagogæ" or "pateressa." A certain woman in Rome was "mater" of two synagogues. Another, in Phocæa, obtained the privilege of *προεδρία*, that is, of sitting on the foremost bench ("Bull. Corr. Hell." x. 327; "R. E. J.," xii. 237).

The large number of scattered Jewish communities were unconnected by any hieratic or administrative bond, unless the collecting of the didrachma (to be mentioned later) and the moral protectorate exercised over the Diaspora by the representatives of the Jewish state, as long as that was in existence, be so considered. After the dissolution of the commonwealth and the destruction of the Temple, the moral center of Judaism, the need was felt of a new center, at least for the maintenance of religious solidarity and of uniformity of legal practises. Such a center was the patriarchate of Tiberias, which was established toward the end of the second century, and became hereditary among the descendants of Hillel. Origen, with manifest exaggeration, compares the patriarch to a king ("Ep. ad Afric." 14). It would seem that in the fourth century, besides the patriarch of Palestine, there were in the Diaspora other dignitaries bearing the same title (compare, for example, "Cod. Theod." xvi. 8. 1, 2, where the plural is otherwise inexplicable; in *ib.* xvi. 8, 29, if the text is correct, there is mention of Occidental patriarchs). During the same period there are found religious functionaries designated "hiereis," whose precise functions are not known. In the inscription "C. I. G." No. 9906, the title *ἱερεύς* is equivalent to "kohen": the deceased was an "Aaronide." In a general way the propounders of the Law and the dignitaries of the Jewish cult bore the official appellations of "primates," "maiores," or "proceres."

"Fiscus Judaicus."

5. The Jewish communities possessed the right to levy taxes upon their members (this is the meaning of the word *αὐτοτελής* as applied to the Jewry in Alexandria) to defray the common expenses, especially in connection with the maintenance of the synagogue. Details as to the character of these taxes are wanting; but they seem to a large extent to have served the purpose of supplementing the voluntary contributions, as is attested by numerous inscriptions. The principal levy, dictated by the demands of the community, was that of the didrachma, an annual poll-tax of a Tyrian half-shekel (=2 Greek drachmas), payable by each adult male member, and destined to sustain the treasury of the Temple in Jerusalem. The amounts collected from the several communities were then combined, and, through special confidential envoys, were sent, either in the original coins or in a converted form, to Jerusalem (Philo, "Legatio ad Caium," § 23). This practise, which in time involved a considerable export of gold to Palestine, met with a vigorous opposition on the part of the Greek cities; while the Roman government also at first assumed a hostile attitude toward it. Under the republic the Senate, alarmed at the annual amount of gold sent by the Italian communities, several times prohibited all exportation of this metal, and the propretor Flaccus confiscated the sums collected in Asia Minor for the Temple (Cicero, "Pro Flacco," xxviii.). Later, edicts of Cæsar, confirmed by Augustus, again authorized the practise, both as to Rome and the provinces; and when the cities of Asia Minor and of Cyrene attempted to oppose it, Agrippa intervened in favor of the Jews, while a series of edicts broke the resistance of the Greek cities (14 B.C.; "Ant." xiv. 6, §§ 2–7; Philo, *l.c.* § 40).

After the fall of the Temple (70), the Roman government, instead of simply abolishing a tax which had no further object, decided to impose it for the benefit of the treasury of Jupiter Capitolinus in Rome ("B. J." vii. 6, § 6; Dio Cassius, lxvi. 7). This was the origin of the "fiscus Judaicus," a tax doubly irksome to the Jews; and the collection of which by the procurators *ad hoc* ("procuratores ad capitularia Judæorum"), according to the registers containing the names of those circumcised, was accompanied by the most odious vexations, notably under Domitian (Suetonius, "Domitian," 12). Nerva abolished the abuses and delations (there are still extant bronzes bearing the legend FISCI IVDAICI CALVMNIA SVBLATA), but not the tax itself, which was still collected in the time of Origen ("Epistola ad Afric." 14). There is reason to believe that it was gradually replaced by indefinite exactions, often levied without notice—a system of assessment which was finally abolished by Julian (Julian. Ep. 25; the text is obscure and doubtful). On this occasion, Julian destroyed the fiscal registers in which the names of the Jews were inscribed.

6. The Jewish communities possessed the privilege of settling their own legal affairs: they had

Books on Hygiene, Medical Science, Physical Culture, etc.

Volumes full of aids toward preventing disorders, attaining health, and prolonging life by scientific methods.

The Prevention of Disease

It furnishes the latest and most conclusively demonstrated facts and expert opinions on the prevention of every form of human disease. Its contributors are authorities of international reputation, and it is the only work of the kind in the English language. Translated from the German by WILMOT EVANS. Introduction by H. Timbrell Bulstrode, M.D., Cantab., D.P.H. Two volumes. 8vo, cloth, 1,081 pp. $3.75 per volume, *net*. Carriage, 36 cents.

Emergency Notes

Practical descriptions of the body and its functions. Simple directions for quick wits and deft hands before the surgeon or physician arrives, with simple rules and suggestions for immediate treatment of sudden afflictions of all descriptions. By GLENTWORTH R. BUTLER, M.D. 12mo, cloth, 101 pp., 18 illustrations. 50 cents.

"A valuable book of reference in any household." —***The Sun,*** New York.

Number One

And how to take care of him. Instructive chats on social and sanitary science. By JOSEPH J. POPE, M.R.C.S. 12mo, cloth, 160 pp. 75 cents.

"This series of talks on the art of preserving the health is marked by sterling common sense and a mastery of sanitary science."—***The Interior,*** Chicago.

Is Man Too Prolific?

A scientific and logical argument, disproving the Malthusian theory that population increases faster than means of subsistence. By H. S. POMEROY, M.D. 12mo, leatherette. 35 cents.

The Ethics of Marriage

The experienced physican who wrote "The Ethics of Marriage" speaks with the utmost directness, on: bars to parenthood, preparing for the child, the unborn child, and all other subjects related to the responsibilities of maternity. By H. S. POMEROY, M.D. 12mo, cloth. $1.00.

"The book should be conscientiously read by every parent in the land."—***Dr. George F. Shrady.***

Sleep and Dreams

And the analogy of insanity to sleep and dreams. From the German of Dr. FRIEDRICH SCHOLZ. Interesting discussions of sleep and its causes, dreams, sleeplessness and its prevention, etc., etc. 12mo, cloth, 148 pp. 75 cents.

Hold the Fort

Or the use of alcohol in sickness. By MARY P. HACK. 12mo, cloth, 50 cents.

What Our Girls Ought to Know

Talks on topics of interest and importance to girls including: A Sunny House; Carlyle on Clothes; Cause of Disease; Cleanliness; Hygiene of the Skin; Nerves and Nervousness; What to Eat, etc. By MARY J. STUDLEY. 12mo, cloth, 275 pp. $1.00.

"Every sensible mother will wish to place a book like this in her daughter's hands."—***School Journal,*** New York.

The Unconscious Mind

It seeks to show that the unconscious mind is the seat of character and of conscience and spirit life, and a most important factor in psychical and physical life. By ALFRED T. SCHOFIELD, M.D., M.R.C.S. 8vo, cloth, 451 pp. $2.00.

"It contains the *summum bonum* in psychological literature up to date."—***J. A. Hagemann, M.D.,*** Pittsburg.

The Springs of Character

A study of the sources and qualities of character, the object being to show the transcendent importance of character, its scientific foundations, and the soundest principles for development and improvement. By ALFRED T. SCHOFIELD, M.D., M.R.C.S. 8vo, cloth, 259 pp. $1.30.

"The influences that go to make character may be summed up in the two expressions—heredity and environment. The bringing out of the physical elements in these two great 'springs of character' is the distinctive merit in Dr. Schofield's book."—***James J. Walsh, M.D., LL.D.***

Hand-book of Medical and Orthopedic Gymnastics

The principles and application of Swedish gymnastics, massage, and orthopedics, with descriptions of many cases of illness helped or cured by gymnastic treatment. By ANDERS WIDE, M.D. 8vo, cloth, 382 pp., illustrated. $3.00, *net*.

"Dr. Wide's work should be in the library of every physician and in the hands of every layman who desires to develop himself toward physical perfection."—***Health Culture,*** New York.

A Brief of Necroscopy

And its medico-legal relation. A clear, concise, and thoroughly trustworthy manual of medical information giving with sufficient detail all practical facts connected with the study, diagnosis, technique, and medico-legal aspects of a post-mortem examination. By GUSTAV SCHMITT, M.D. Pocket size. 16mo, leather, 186 pp. $1.00, *net*.

"It is reliable and instructive."—***Medical Recorder,*** Chicago.

The Nutritive Cure

A statement of its principles and methods. By ROBERT WALTER, M.D. 8vo, paper, 70 pp. 15 cents.

Youthful Eccentricity A Precursor of Crime

It discusses the early causes of crime and contains expert advice for correcting prejudicial influences. By FORBES WINSLOW, D.C.L. 16mo, cloth, 103 pp. 50 cents.

"The book is worth perusal by those interested in the management and education of children, especially of those children who come of neurotic families."—***Lancet,*** London.

Opium

England's opium policy and its results in China and India, and the spread of opium smoking in America. By Rev. JOHN LIGGINS. 8vo, paper. 10 cents.

FUNK & WAGNALLS COMPANY, *Publishers,* NEW YORK and LONDON

DICTIONARIES AND EDUCATIONAL BOOKS

A list of books offering a variety of right-hand helps, side-lights, and supplementary reading for teachers and students of public and private schools, parents, and others.

The Funk & Wagnalls (Unabridged) Standard Dictionary

Edited by 247 of the world's leading philologists, lexicographers, and expert authorities in every department of knowledge. 304,000 vocabulary terms, 5,000 illustrations, 125,000 synonyms and antonyms, 88 pages maps. Cost over $1,000,000. Send for prospectus.

The Students' Standard Dictionary

Abridged from the Funk & Wagnalls Standard Dictionary. 62,284 vocabulary terms, 1,225 illustrations. Many exclusive educational features. Large 8vo, cloth, leather back, 922 pp., $2.50; full leather, $4.00.

Grammar-School Standard Dictionary

Abridged from the Funk & Wagnalls Standard Dictionary. 38,000 vocabulary terms, 800 illustrations. 8vo, cloth, 541 pp., $1.00.

The Introductory Standard Dictionary

Abridged from the Funk & Wagnalls Standard Dictionary. 28,000 words, 500 pictorial illustrations, etc. 16mo, cloth, 484 pp., 60 cents.

English Synonyms, Antonyms, and Prepositions

By James C. Fernald. More than 7,500 classified and discriminated synonyms of the English language and nearly 4,000 antonyms, with notes and illustrative examples on the correct use of prepositions. 12mo, cloth, 574 pp., $1.50.

English Compound Words and Phrases

Valuable principles and rules for compounding, together with a list of 40,000 compound words. By F. Horace Teall, Editor of "Compound Words" in the Standard Dictionary. 8vo, cloth, leather back, 311 pp., $2.50.

Cyclopedia of Practical Quotations

By J. K. Hoyt. Over 30,000 quotations; 86,000 lines of concordance. 8vo, 1,205 pp., buckram, $6; law sheep, $8.00; half morocco, $10; full morocco, $12.

Assimilative Memory; or How to Attend and Never Forget

By Prof. A. Loisette. The complete Loisette Memory System. Its aim is to increase the power of memory in much the same proportion as the power of the eye for vision is increased by means of the microscope and telescope. 12mo, cloth, 170 pp., $2.50.

Rosenthal Linguistry System

In French, German, and Spanish. By Dr. Richard S. Rosenthal. Each language, $6. Send for circular.

Hints on Early Education

And nursery discipline. 12mo, cloth, 60 cents.

Platform Pearls

Selections for declamations. By Lilian M. Heath. 12mo, cloth, 75 cents.

Standard First and Second Readers and Teachers' Manual

The most perfect readers yet published. Edited by Isaac K. Funk, LL.D., and Montrose J. Moses. First Reader, 12mo, cloth, illustrated, 35 cents. Special Phonetic Edition, 35 cents. Second Reader, 12mo, cloth, 50 cents. Teachers' Manual for First Reader, 16mo, cloth, 50 cents.

Cyclopedia of Classified Dates

By Rev. Charles E. Little. A ready-reference compendium of notable events in the history of all countries from B. C. 5004 to the present. 8vo, 1,462 pp., cloth, $10; sheep, $12.50; half morocco, $15; full morocco, $18.

Historical Lights

By Rev. Charles E. Little. 6,000 historical extracts, illustrating 30,000 topics. For ministers, lecturers, public speakers, writers, teachers, etc. 8vo, 964 pp., cloth, $5.00; sheep, $6.50.

Columbian Historical Novels

A history of America in story form. Twelve elegant volumes. By John R. Musick. Profusely illustrated. Over 5,000 pages, 300 illustrations, etc., etc. 13 volumes. Cloth, $21.75; half morocco, $32.50. Send 10 cents for handsomely illustrated quarto prospectus containing selections from the stories, etc., etc.

Hours with Living Men and Women of the Revolution

Chats on the incidents and people of the American Revolution. By Benson J. Lossing, LL.D. Illustrated. 12mo, cloth, 247 pp., $1.50.

The Essentials of Elocution

Novel ways by which to perfect every gesture and articulation when addressing the audience. By Alfred Ayres. 16mo, cloth, deckle edges, 75 cents.

Before An Audience

New and original principles for effective public speaking. By Nathan Sheppard. 12mo, cloth, 75 cents.

The Drill Book in Vocal Culture

A comprehensive study of the fundamental constituents of effective, graceful speaking. By Prof. Edward P. Thwing. 16mo, paper, illustrated, 25 cts.

Bell's Standard Elocutionist

Principles and exercises, readings in prose and poetry, religious, humorous, etc., for junior and senior pupils. By Prof. David Charles Bell. 12mo, cloth, 563 pp., $1.50.

Bell's Reader's Shakespeare

Especially adapted for use in schools and colleges. By Prof. David Charles Bell. 3 volumes. 12mo, buckram, per volume, $1.50.

The Stars and Constellations

It presents a simple method by which those who are not proficient in astronomical science may easily learn the names and places of the most conspicuous stars and constellations. By Royal Hill. 4to, cloth, 32 pp., $1.00.

Hand-book of Medical and Orthopedic Gymnastics

By Anders Wide, M.D., Lecturer in Medical Gymnastics and Orthopedy at the Royal Carolean Medico-Surgical Institute, Stockholm. The principles and applications of Swedish Gymnastics. 8vo, cloth, illustrated, $3.00.

Heroes of Faith

Simple studies in New Testament Greek. By Burris A. Jenkins. 8vo, cloth, 75 cts.; paper, 50 cts.

FUNK & WAGNALLS COMPANY, Publishers, NEW YORK and LONDON

Autonomy.

their own judges and their own code. This code—which was simply the Mosaic law, sedulously commented on by the Rabbis—was the sole study of the Jews and the Judaizers, to the exclusion of the Roman law—a fact mentioned with indignation by Juvenal ("Sat." xiv. 100 *et seq.*). In Alexandria the Jewish tribunal consisted for a long time of a single supreme judge, the ethnarch (Strabo, in "Ant." xiv. 7, § 2, *διαιτᾷ κρίσεις καὶ συμβολαίων ἐπιμελεῖται*). In Sardis, at the order of the Roman proquestor, the Jews were granted a court of their own (*ib.* xiv. 10, § 17). All these are but special instances of a general fact (Sanh. 32). In civil suits the autonomy of the Jewish courts applied only in cases where both parties were Jews; otherwise, even if the defendant was a Jew, the general local tribunal was alone competent, as is evident from the edict of Augustus restraining any court from ordering Jewish litigants to appear before it on the Sabbath ("Ant." xvi. 6, § 2). In penal cases, at the commencement of the common era, the Jewish magistrates exercised a wide disciplinary jurisdiction, including the right of incarcerating and flogging (Acts ix. 2, xviii. 12-17, xxii. 19, xxvi. 11; II Cor. xi. 24). It does not appear, however, that their jurisdiction extended to offenses against the common law: at any rate they did not have the right to inflict capital punishment.

The judicial autonomy of the Rabbis was kept up even after the admission of the Jews as Roman citizens. It was at this time that the supreme jurisdiction of the patriarch of Tiberias was at its height. Origen affirms that he pronounced death-sentences and had them executed ("Epistola ad Afric." 14); but such decisions, of course, had no legal force; and if they were carried out, it was in secret, like the decisions of the Vehmgericht in the Middle Ages. Origen himself avers that in Judea the criminal jurisdiction had passed into the hands of the Romans ("C. Cels." ed. Spencer, vii. 349). The "Theodosian Code" made of the rabbinical tribunals little more than courts of voluntary arbitration ("Codex. Theod." ii. 1, 10).

Exemption from Military Service.

7. The Hellenistic monarchies had compelled the Jews to perform military service; and this measure was productive of good results. Service in the field, however, was not compatible with a rigorous observance of the dietary laws and the Sabbath rest. On the Sabbath, according to the interpretation of the scholars, the faithful could neither carry arms nor traverse a distance of more than 2,000 ells (1,200 meters). Hence inconveniences frequently arose; as when the army of Antiochus Sidetes, which contained a contingent of Jewish soldiers, had to rest for two days because the festival of Pentecost fell on a Sunday (Nicolaus of Damascus, cited in "Ant." xiii. 8, § 4). Accordingly, the Romans, notwithstanding the effectual assistance which Cæsar obtained from the Jews, exempted them from military service, possibly in consideration of the payment of a pecuniary indemnity. This principle was proclaimed by the Pompeians in the year 49. At the commencement of the civil war, when the consul Lentulus raised two legions of Roman citizens in Asia, the Jews, at their own request, were exempted from the conscription; and instructions to this effect were forwarded to the local authorities ("Ant." xiv. 10, §§ 13 *et seq.*). In 43 Dolabella, proconsul of Asia, decided to the same effect; and his decisions were thereafter looked upon as precedents. The only levy of Jewish soldiers effected under the Roman empire was one under Tiberius, and that had a penal character (Suetonius, "Tiberius," 36).

Dis-abilities.

V. Such, then, in their essential provisions, were the privileges granted to the Jews in the Greco-Roman world—privileges important enough to induce more than one Christian to embrace the Jewish faith in order to shield himself in times of persecution. Nevertheless, the medal had its reverse. If the Jews were privileged "peregrini," they were still "peregrini"; that is to say, they were deprived of all the rights and honors to which a citizen, in the cities of Greece and in the Roman state, was entitled. Furthermore, besides the regular taxes, the Jews were subjected to the payment of special taxes, from which the citizens were exempt. Mention has already been made of the didrachma. Besides this tax, the Jews of Palestine had to pay a very heavy land-tax (Appian, Syr. 50; text obscure and probably corrupted), against which they vainly made complaints to Emperor Niger ("Vita," ch. vii.). Very likely, too, in the Greek cities they were required, as a matter of principle, to pay a tax imposed upon foreign residents, the *μετοίκιον* (a Jew is expressly classed among the *μέτοικοι* in the inscription of Iasus; Le Bas-Waddington, No. 294). All these encumbrances naturally inspired the Jews with the ambition of obtaining the privilege of citizenship, which alone could assure to them equality of treatment. This pretension, however, involved a contradiction: not that people in ancient times doubted that a man could be a citizen of two states at the same time, but because the Jews wished to combine the right of citizenship with the maintenance of their special prerogatives, their fiscal and judicial autonomy, their exemption from military service, etc. Moreover, the corporate life of the city in those days reposed essentially upon the worship of the deities common to all the inhabitants: and to this the Jews manifestly could not consent without surrendering their raison d'être.

In the Greek cities possessing republican institutions—and these were the only places where the right of citizenship had any value—the aspirations of the Jews remained unsuccessful—at any rate up to the time of the Roman conquest. The contrary assertions of Jewish historians have to be received with extreme caution. A typical instance of the kind is the affirmation of the Jews of Ionia, in the days of Augustus, that they had been granted by the diadochi the right of citizenship in the cities which Antiochus Theos (261-246) had enfranchised ("Contra Ap." ii. 4). It is true that the Jews won before Agrippa the case against the municipalities that wished to expel them; but, although they succeeded in having their right of residence and their other liberties recognized, this does not furnish any evidence that they possessed citizen's rights, nor even those of "indigeni" (native-born; "Ant." xii. 3, § 2; xvi. 2, §§ 3-5). The words *οἱ κατοικοῦντες ἐν τῇ πόλει Ἰουδαῖοι* [?] *πολῖται* in the decree issued at

Sardis in the time of Cæsar (*ib.* xiv. 10, § 24), must not be taken to mean that the Jewish residents of Sardis were considered citizens of that place, but only of Judea.

Right of Citizenship.

Likewise in Cyrene the Jews affirmed that they had obtained the "isonomia" of the Ptolemies ("Ant." xvi. 5, § 1); but this vague term must be construed in the sense of "isoteleia"; that is, equality in matters of taxation, which privilege had, in point of fact, been assured to them by Agrippa (*ib.* 6, § 5). The term certainly could not have indicated the right of citizenship in the proper sense. Strabo, in enumerating the four classes of inhabitants of the country, expressly separates the Jews from the citizens ("Ant." xiv. 7, § 2). There is more likelihood in the assertion of Josephus that Seleucus Nicator, in the cities founded by him, Antioch included, had granted to the Jews the rights of citizenship (*πολιτεία*) and social equality (*ἰσοτιμία*) along with the Greeks and the Macedonians ("Ant." xii. 3, § 1; "Contra Ap." ii. 4, § 39). However, as far as Antioch is concerned, this assertion is elsewhere qualified by Josephus himself, to the effect that it was only the successors of Antiochus Epiphanes who permitted to the Jews of Antioch *ἐξ ἴσου τῆς πόλεως τοῖς Ἕλλησι μετέχειν* ("B. J." vii. 3, § 3).

The privileges of the Jews of Antioch were engraved upon bronze steles, which Titus refused to destroy (*ib.* vii. 5, § 2); and the Jews continued to designate themselves as Ἀντιοχεῖς ("Contra Ap." *l.c.*). The question concerning the Ἀντιοχεῖς of Jerusalem under Antiochus Epiphanes (II Macc. iv. 9) is still unsettled. Be this as it may, these privileges do not seem to have included a participation in the government of the city—supposing that Antioch did actually have free institutions. The same assumption applies to the other foundations of Seleucus. So, likewise, in Alexandria, the fact that the Jews, with the express authorization of the Ptolemies, called themselves "Macedonians" and "Alexandrians" ("Contra Ap." ii. 4; "B. J." ii. 18, § 7; "Ant." xix. 5, § 2), does not imply the possession of the right of citizenship (a right which, in a city not having an elective assembly and council, was of little advantage), but simply testifies to the equality of the Jews with the Greeks before the courts, the boards of taxation, etc.—an equality formally confirmed by Cæsar (Josephus, "Contra Ap." *l.c.*; "Ant." xiv. 10, § 1) and then by Claudius ("Ant." xix. 5, § 2).

In short, the Jews in a certain number of Greek cities, particularly in those founded by the king, had been placed upon a footing of perfect equality with the Greeks in matters of taxation, the exercise of civil rights, the participation in the distributions, etc.; without, at the same time, possessing the privilege of full citizenship. Philo, with an affectation easily understood, declares that the Jews consider as their "real fatherland" the country they inhabit ("In Flaccum," 7); and it is possible that the rights of citizenship were accorded to individual Jews—St. Paul, for example, called himself a citizen of Tarsus (Acts xxi. 39 [the text is doubtful])—but no instance is known of a collective grant of this character.

Roman Citizenship.

In default of the right of Greek citizenship, the Jews fell back upon their right of Roman citizenship, which carried with it, even in Greek cities, numerous advantages. Altogether, in Roman cities they fared much better. From the time of Cicero there had been in Rome a compact group of Jewish citizens and electors. These were, no doubt, ancient slaves, enfranchised by one of those solemn ceremonials which conferred upon them the rights of citizenship in its plenitude (Philo, "Legatio ad Caium," § 23; Cicero, "Pro Flacco," 28; the *λιβερτῖνοι* of Jerusalem [Acts vi. 9] belong doubtless to the same category). In the same period there were in Ephesus, Sardis, and throughout Asia Minor, a considerable number of Jews who possessed the rights of Roman citizenship. By what means they obtained it is not known ("Ant." xiv. 10, §§ 13, 14, 16–19). In Tarsus, Paul was both a Roman citizen and a citizen of the town (Acts xvi. 37–39). In Jerusalem, in 66 C.E., there were Jews who were Roman knights ("B. J." ii. 14, § 9). The number of Jews admitted into Rome during the first two centuries of the empire can not be estimated; but it must have been considerable in view of the number of Jewish slaves that passed through Roman hands as the result of the three great insurrections. Still, the Jew who had become a Roman citizen does not appear to have possessed the "jus honorum," unless, indeed, he abjured, like Tiberius Alexander, nephew of Philo, his national customs; and the same thing held good of a Roman who embraced the Jewish faith. The law was not modified in this respect except by the constitution of Severus and Caracalla, which imposed upon the Jews certain contributions in forced labor ("necessitates") of a kind and degree compatible with their creed. From this time on the idea of local citizenship became greatly eclipsed by the wider conception of a Roman nationality—somewhat corresponding to a citizenship of the empire (Ulpian, L. 3, Dig. L. 2, § 3). Not long after this Caracalla's constitution made its appearance, which, for financial reasons, forced Roman citizenship upon all the subjects of the empire (L. 17, Dig. i. 5). By virtue of this constitution, the Jews obtained thereafter without difficulty the "jus honorum," and the exercise of all civil rights, "connubium, commercium, testamenti factio," and even the guardianship of non-Jews (Modestin, L. 15, § 6, Dig. xxvii. 1). Nevertheless, as formerly they had been privileged "peregrini," they were now in certain respects privileged "cives": they had all the rights of citizens, but they exercised only those which did not conflict with their religious liberties. This may be inferred especially from the text already cited, according to which Alexander Severus "confirmed the privileges of the Jews." Among these privileges there was for some time, besides the exemption from military service, relief from service, more burdensome than honorary, to the curia.

Social Condition.

VI. Having thus sketched the legal position of the Jews in the Greek states and in the Roman empire, it remains now to describe their social and economic condition, their occupations, and their relations with the pagans. On all these points save those which relate to Palestine and Babylonia and which do not come within the scope of the present article, information is singularly defective, even as regards the two most important communities, those of Alexandria and Rome.

Occupations.

In nearly every part of the Diaspora the Jews lived clustered together in the cities. They doubtless possessed farms and orchards in the suburbs; but agriculture was no longer, as in Judea, their almost exclusive occupation. In Alexandria they were engaged in commerce and navigation (compare a Jewish horse-dealer, Danooul, mentioned in one of the Grenfell papyri from Fayum), and especially in the mechanical trades (Philo, "In Flaccum," *passim*). At the gatherings in the synagogue it was by their respective handicrafts that the faithful were grouped. In Rome the Jewish population, mostly of slavish origin and living in wretched quarters, followed the humblest callings, which drew upon them the sarcasm of the satiric poets. These overdrawn pictures, however, should not lead to the belief that all the Jews of Italy and Greece were mendicants (Martial, xii. 57; compare Cleomedes, "Theor. Cycl." ii. 1; but the expression "Bohemian Jews" is derived only from a false interpretation of Juvenal, iii. 10 *et seq.*; compare Rönsch, "Neue Jahrbücher," 1881, p. 692, and 1885, p. 552), or fortune-tellers (Juvenal, vi. 542; compare Procopius, "Bell. Goth." i. 9), or venders of matches (Martial, i. 41; interpretation doubtful). The texts and the inscriptions refer to weavers, tent-makers, dealers in purple, butchers (Garrucci, "Cimitero Randanini," No. 44), tavern-keepers (Ambrose, "De Fide," iii. 10, 65), singers, comedians (Josephus, "Vita," § 3; Martial, vii. 82; sarcophagus of Faustina [Munk, in Breslauer's "Jahrbuch für Israeliten," ii. 85]), painters (Garrucci, "Diss. Arch." ii. 154), jewelers ("Rev. Etudes Juives," xiii. 57 [Naron]), physicians (Celsus, "De Medic." v. 19, 22; "C. I. L." ix. 6213 [Venusia]), and even poets (Martial, xi. 94) and men of letters (Cecilius, Josephus), without counting the preachers, lawyers, and theologians (Mattathias ben Heresh, etc.). At the end of the fourth century, in certain provinces of southern Italy, the "ordo" (highest class of citizens) of some cities seems to have been composed entirely, or at least principally, of Jews, a proof of their prosperity ("Cod. Theod." xii. 1, 158). In Egypt under the Ptolemies, from the ranks of the Jews came forth soldiers, farmers of the revenue (not only the famous Tobiad Joseph, but a certain Simon, son of Eleazar, mentioned on an ostrakon of Thebes [Willrich, "Jud. und Griech." p. 151]), civil functionaries (as the alabarchs Alexander and Demetrius), and generals (Onias, Desitheus, Helcias, Ananias). Later, however, Hadrian could or, perhaps, would find among them only "astrologers, soothsayers, and charlatans" ("Vita Saturnini," viii.). The days of glory for Judaism in Alexandria, which produced a Philo and indirectly a Josephus, were past (but compare Hippolytus, "Philosoph." ix. 12). It is worthy of remark that scarcely ever before the Middle Ages are the Jews referred to as money-lenders, bankers, or usurers. These, their imputed callings, seem to have been forced upon them much later by circumstances and as a result of special legislation.

VII. Theoretically the intercourse of the Jews with the pagans was confined to commercial relations merely, and even these were greatly trammeled through the "laws of purity." The Jews lived apart, most frequently in separate quarters, grouped around their synagogues. The pious Jew could neither dine at the table of a pagan nor receive him at his own table. He was not permitted to frequent the theaters, the circuses, the gymnasia, nor even to read a secular book, "unless it be at twilight." Mixed marriages were prohibited under severe penalties. These rules were not, however, always and everywhere observed with the same rigor. Evidence of this fact appears in the Judæo-Alexandrian literature with its strong Hellenic infusion; in some of the professions pursued by the Jews; in the general and almost exclusive employment of Greek by the Jews of the Diaspora, even for religious services. In Rome the tumulary inscriptions are first in Greek—faulty enough, it is true—then in Latin. The Hebrew words are limited to a few hallowed formulas; almost all the proper names are Greek or Latin. But above all it is by the activity of the religious propagandism that the intimate contact and the reciprocal penetration of the two civilizations manifest themselves.

Jewish Propagandism.

The fervor of proselytism was indeed one of the most distinctive traits of Judaism during the Greco-Roman epoch—a trait which it never possessed in the same degree either before or since. This zeal to make converts, which at first sight seems to be incompatible with the pride of the "chosen people" and with the contempt which the orthodox Jew professed for the foreigner, is attested by numerous documents (Esther viii. 17; Judith xiv. 10; Matt. xxiii. 15; Horace, "Sat." i. 4, 142), and, better still, by facts themselves. Various methods were employed to increase the flock of Israel. The most brutal was that of forced conversion—that is to say, circumcision—such as had been imposed by John Hyrcanus on the Idumeans ("Ant." xiii. 9, § 1; "B. J." i. 2, § 6; Ammonius, *s.v.* 'Ιδουμαῖοι), and by Aristobulus upon a portion of the Itureans (Galileans) ("Ant." xiii. 11, § 3). Next was the conversion of slaves owned by Jews as their individual property (Yer. Yeb. viii. 1). But it was especially the moral propaganda, by word, example, and book, which was most productive of success throughout the whole extent of the Diaspora. It must be admitted that Judaism lacked certain of those attractive features which drew the multitude to the cult of Mithras and of the Egyptian deities. Its physical exactions repulsed those wanting in stout courage; its cult, devoid of imagery and sensuous rites, presented only an austere poesy separating its adepts from the world, and cutting them off to some extent from communion with the cultured. But the practical and legal character of its doctrine, furnishing a rule of life for every occasion, could not but appeal to a disorganized society. The purity and simplicity of its theology captivated the high-minded; while the mystery and quaintness of its customs, the welcome Sabbath rest, the privileges enjoyed at the hand of the public authorities, recommended the Jewish faith to those more materialistically inclined. Moreover, it knew how to insinuate itself by a very clever literature, in part pseudepigraphic, in part apologetic, claiming as its allies and forerunners the greatest geniuses of ancient Greece, the poets, the thinkers, and the sibyls. It also called into play the famous oracles (Oracle of Claros, in Macrobius, "Sat." i. 18, 19 *et seq.*), and took on a Grecian aspect, while extenuating or concealing under the mantle of allegory and symbol those dogmas and observances that were shocking to rationalism. In brief, it was a religion essentially supple and elastic under an appearance of rigidity, and one which knew how to be at once authoritative and liberal, idealistic and materialistic, a philosophy for the strong, a superstition for the weak, and a hope of salvation for all.

Grades of Proselytes.

Finally, Judaism possessed the prudence and tact not to exact from its adepts at the outset full and complete adoption of the Jewish Law. The neophyte was at first simply a "friend" to the Jewish customs, observing the least enthralling ones—the Sabbath and the lighting of a fire on the previous evening; certain fast-days; abstention from pork. His sons frequented the synagogues and deserted the temples, studied the Law, and contributed their oboli to the treasury of Jerusalem. By degrees habit accomplished the rest. At last the proselyte took the decisive step: he received the rite of circumcision, took the bath of purity (Arian, "Diss. Epict." ii. 9), and offered, doubtless in money, the sacrifice which signalized his definitive entrance into the bosom of Israel. Occasionally, in order to accentuate his conversion, he even adopted a Hebraic name ("Veturia Paula . . . proselita ann. XVI. nomine Sara," Orell. 2522 ["C. I. L." vi. 29,756]; she was converted at the age of seventy). In the third generation, according to Deut. xxiii. 8, there existed no distinction between the Jew by race and the Jew by adoption, unless the latter belonged to one of the accursed races; before the period now under discussion, however, these had long been extinct. AQUILA, whose Greek translation of the Bible superseded in the synagogues that of the Septuagint, and Bar Giora, chief of the insurgents in Jerusalem, were proselytes or sons of proselytes.

This gradual entrance into the fold of Judaism must have been a frequent occurrence in the first and second centuries. Juvenal refers to it in his famous words: "Quidam sortiti metuentem sabbata patrem. Nil præter nubes et cæli numen adorant," etc. ("Sat." xiv. 96 *et seq.*; compare Persius, v. 179; Tertullian, "Ad Nat." i. 13). The term "metuens" itself is technical, being a translation of the Greek *φοβούμενοι, σεβόμενοι* (*i.e., τὸν θεόν*), by which the Greek texts usually designate the proselytes (Acts xiii. 16, 26, 43; xvii. 4; "Ant." xiv. 7, § 2; compare "Eph. Epigr." iv., No. 838, and Schürer, "Juden im Bosporischen Reiche," p. 20). Efforts have been made to establish a sharp distinction between the *σεβόμενοι* or *φοβούμενοι* and the proselytes proper, the "gerim" of the Hebrew texts (in this sense so early as II Chron. xxx. 25). It would seem more accurate to consider all these terms as synonymous, while admitting various degrees in proselytism. The simple Judaizers (*Ἰουδαΐζοντες*, "B. J." ii. 18, § 2; in Phenicia and in Palestine some autonomous communities of *θεοσεβεῖς* organized themselves [Cyril of Alexandria, in "Patrologiæ," lxviii. 282]; the "cælicolæ" of the fourth century are of the same class), the "improfessi" (Suetonius, "Domit." 12), were naturally more numerous than the newly circumcised inscribed upon the register. The number of female proselytes by far exceeded that of the males, a circumstance which is sufficiently accounted for by the fear of circumcision on the part of the latter.

Extent of Proselytism.

It can not be doubted that Judaism in this way made numerous converts during two or three centuries; but the statements of Josephus, Philo, and even of Seneca, who represent the whole world as rushing toward Jewish observances, must be regarded as fanciful exaggerations ("Contra Ap." ii. 39; Seneca, in "Aug. Civ. Dei," vi. 11; Philo, "De Vita Moysis," § 2 [ed. Mangey, ii. 137]). At the same time, it is an indisputable fact that proselytes were found in large numbers in every country of the Diaspora. The pagan authors, struck by this phenomenon, carefully distinguish the Jews by race from the Jews by adoption (Suetonius, "Tib." 36: "gentis eiusdem vel simila sectantes"; Dio Cassius, xxxvii. 17). In Antioch a large portion of the Greek population Judaized in the time of Josephus ("B. J." vii. 3, § 3); and although they turned Christians in the days of Chrysostom, they had not forgotten the way to the synagogues. The same holds true of certain districts in Spain. In Damascus "almost all the women" observed the Jewish usages (*ib.* i. 20, § 2). Paul met with proselytes in Antioch of Pisidia, in Thyatira, in Thessalonica, and in Athens. The coins of Apamea representing the Ark of Noah, and the numerous associations of *σεβόμενοι θεόν ὕψιστον*, attest the diffusion of Jewish ideas and legends in Asia Minor. These associations (as in Gorgippia) may even represent veritable synagogues under a pagan mask, assumed for prudence' sake. In Rome, where the Jewish propaganda had taken the first step at the time of the embassy of Numenius (139 B.C.), its efforts and successes are indicated by Horace, Persius, and Juvenal.

The enormous growth of the Jewish nation in Egypt, Cyprus, and Cyrene can not be accounted for without supposing an abundant infusion of Gentile blood. Proselytism swayed alike the upper and the lower classes of society. The great number of Jews passing through the state of slavery must, of course, have catechized their comrades rather than their masters. Yet one hears also of distinguished recruits, and even illustrious ones: in the Orient, the chamberlain of Queen Candace (Acts viii. 26), the royal family of Adiabene, and the kings of Emesa (Azizus) and of Cilicia (Polemo), united by marriage with the family of Herod ("Ant." xx. 7, §§ 1,3); in Rome, the patrician Fulvia ("Ant." xviii. 3, § 5), Flavius Clemens and Flavia Domitilla, cousins of Domitian (Dio Cassius, lxvii. 14; the text, read without preconception, leaves no doubt as to their conversion), and a page of Caracalla (Josephus, "Vita," § 1). The empress Poppea herself is termed *θεοσεβής* ("Ant." xx. 8, § 11); and if Heliogabalus was not a Jew, he had at least adopted several Jewish usages, and intended to include Judaism in that strange amal-gam in which he said all the existing cults should be reconciled under the auspices of the deity of Emesa.

The Jewish propaganda in the East did not meet with any other resistance than the attachment of the populations to their national religions. Thus Syllæus, minister of Obodas, king of the Nabatæans, when pressed to become a convert, declared that the Arabians would stone him ("Ant." xvi. 7, § 6). No Greek law can be cited designed to repress Jewish proselytism; but the Roman government showed less indulgence, especially after the great uprisings which laid bare the implacable hatred of the Jews toward their conquerors. While the religious liberty and the national customs of the Jews were scrupulously respected, severe measures were taken to prevent them from securing recruits, whom the Romans, in their patriotism, looked upon as real deserters. Under Domitian the crime of Judaizing, held to be identical with that of impiety or atheism, occasioned numerous forfeitures and condemnations to death or exile (Dio Cassius, lxvii. 14).

Prohibition of Circumcision.

Nerva put an end to these proceedings, which often occasioned scandal (*ib.* lxviii. 1); but though thereafter a partial adoption of Jewish customs was overlooked, a complete conversion continued to be prohibited. A rescript of Antoninus Pius, modifying a too general order of Hadrian, authorized the Jews to circumcise none except their own sons. The circumcision of a non-Jew, even if a slave, was punished with the same penalty as castration (L. ii .pr. Dig. xlviii. 8 [Modestin]); namely, death for the "humiliores," deportation to an island for the "honestiores," and confiscation for all (L. iii. § 5, iv. § 2; Paulus, "Sent." v. 22, § 4). Both the Roman citizen who submitted himself or who submitted his slave to this operation, and the surgeon who performed the operation, were punished: the one with deportation and confiscation; the other with death (Paulus, *ib.* § 3). This relentless legislation was again enforced by Septimius Severus ("Vita," ch. xvii.), and was maintained in full vigor up to the time of Origen ("Contra Cels." ii. 13).

The effect of these laws was far-reaching, but in a direction different from that purposed by their authors. It is true the increase of the Jewish sect was checked; all the more so since in Talmudic circles the tendencies hostile to proselytism gained decidedly the upper hand. The enfeebling of Judaism, however, did not work to the profit of the pagan religions, which no longer had any hold upon the population. The half-proselytes, having no chance of becoming complete Jews, lent a readier ear to the evangelical preaching; and it was among these that Christianity made its first and its most numerous conquests (as early as the time of Paul; Acts xvii. 17).

Popular Views About the Jews.

The manifest success of the Jewish propaganda, and the stringent laws which were necessary to check it, biased the judgments of the ancient writers upon the Jews. To read them one would believe that Judaism had been to nearly all antiquity simply an object of horror and contempt. Its religious particularism, represented as atheism; its social particularism, represented as unsociability (ἀμιξία), and even as a hatred of mankind; its origin, disfigured by absurd legends; its creed and usages, placed in a most malevolent light, often highly mendacious—all this presents a picture in which the ridiculous and the odious vie with each other. At the most, a few philosophic minds showed admiration for the monotheism of Israel, its rejection of idols, and its family virtues (see Reinach, "Textes d'Auteurs Grecs et Romains Relatifs au Judaïsme," Paris, 1895, especially the Preface; and Classical Writers and the Jews). On closer examination it becomes clear that this opinion of men of letters, almost unanimously unfavorable, derived its origin mainly from the Alexandrian controversy; and that the Alexandrian pamphleteers themselves were to a large extent under the influence of their Egyptian environment, where the hatred of the Jew had become a secular tradition. The truth is that, if Judaism lived in a continual antagonism to the champions of ultra-Hellenism and those of the old-school Romanism, it met, on the other hand, with wide-spread sympathy on the part of the masses, and of those of the élite who were free from national prejudices. It would have found even more appreciation if it had divested itself of its purely ethnic spirit; had sacrificed the accessary element (the manifold and vexatious usages) to the essential element (the religious and moral instruction); and had consummated at the proper time the transformation from a race to a religion—a transformation which is at once the program of its history and the problem of its destiny.

Relation to Christianity.

VIII. Failing to follow resolutely in this direction, Judaism did not succeed, any more than the religions sprung from Persia, Syria, and Egypt, in gathering up within itself the heritage of pagan classicism. Refusing to be absorbed in the new creed that sprang out of its own loins (the Romans perceived clearly this filiation from the time of Tacitus [in "Sulpicius Severus," ii. 30] up to that of Rutilius Namatianus [i. 389]), Judaism found itself, after the recent triumph of Christianity, in the precarious situation of a minority not yielding to coercion while suspected of a spirit of propagandism. The ancient exclusions based upon national differences were not resuscitated against Judaism. A century after the edict of Caracalla, there could be no question of diverse nationalities in the face of the all-embracing unity of the "orbis Romanus." The Jews were simply considered as a dissident sect, and classed in the same category as the heretics, the "cælicolæ," and even the pagans themselves. Such being the case in a society founded in an increasing degree upon the union of the Catholic Church with the state, Judaism could not fail to be the object of severe restrictions at the hands of the legislators. The progressive course of this severity can be traced through the numerous constitutions issued by the Christian emperors and preserved by the codes of Theodosius and Justinian: from the constitutions of Constantine, which still bear the imprint of a genuine spirit of tolerance and religious neutrality, to the measures, almost Draconian, of the sons and grandsons of Theodosius.

Naturally, account must also be taken of the individual dispositions of the emperors. Thus, against the attitude of the sons of Constantine must be set the humanity of Jovian and of Valentinian, not to mention Julian. The language went through the same process of evolution as the thought: it took on a tone increasingly contemptuous. Soon the very name of Judaism was not pronounced without the accompaniment of the most insulting epithets. The Jews were described as a sect which was baleful, disreputable, sacrilegious, perverse, abominable, whose assemblies were lacking in piety, etc. Only in rare instances was the word "sect" replaced by "nation"—an interesting proof that in the fourth century Judaism was on the point of putting off its national character, which it has only gradually reassumed under the pressure of restrictive legislation.

There is no need to enter into the details of this legislation, many points of which would call for an elaborate critical discussion, and which, moreover, no longer belong strictly to the period sketched in this article. A recapitulation of its principal provisions will suffice, grouped under three heads:

Protection of Judaism.

1. Measures Destined to Protect the Jewish Religion and Its Clergy: Judaism was a recognized religion ("Codex Theodosianus," xvi. 8, 9). Starting from this principle, which was never called into question, the emperors, even the least tolerant, ordered that Judaism be respected, and strove to shield its followers from insults on the part of the fanatics, particularly converts from Judaism, the most intractable of all. Of course, the Jews, in their turn, were required to respect the Christian religion and not to turn it into ridicule, even by indirect reference or by symbol—as, for example, at the Purim festival by burning a picture of Jesus under the name of Haman (*ib.* xvi. 8, 18 [in 408]; compare 21 [in 412]). On this condition the Jews could freely celebrate their festivals and Sabbaths. On these days they could not be made to appear in court; nor, conversely, could they require Christians to do so (Constitutions of the years 400 ["Codex Justinianus," i. 9, 13] and 412 ["Cod. Theod." xvi. 21]; compare "Codex Theodos." viii. 8, 8 and 20). Their assemblies were not to be disturbed (Law of 393, "Cod. Theod." xvi. 8, 9), nor their houses and synagogues pillaged and burned. The frequent renewal of this prohibition (*ib.* xvi. 8, 12 [in 397], 20 [in 412], 21, 25, 26) shows how laxly it was observed. This was the period when the Greeks, fanaticized by the bishop Cyril, drove the Jews out of Alexandria; when the violent actions of the Roman garrisons, under Constantius, provoked an alarming revolt in Palestine; and when Severus, Bishop of Minorca, forcibly converted the Jews of his diocese (418). Valentinian I. and Valens expressly conceded to the synagogues the character of "loca religiosa," and declared them exempt from military billeting (Law of 365, "Cod. Just." i. 9, 4 = "Cod. Theod." xvi. 8, 11).

The complement of these protective measures was the privileged situation accorded to the dignitaries and the employees of the synagogues. Placed on the same level with the members of the Catholic clergy, they were exempted from all burdensome services, from all contributions of forced labor, and particularly from the heavy responsibilities of the curia (Law of 397, "Cod. Theod." xvi. 8, 13). Their right to expel from their communities the "false brothers" who did them the most harm, was acknowledged (Law of 392, *ib.* xvi. 8, 8, and that of 416, *ib.* 23).

The patriarchate, particularly, was the object of most deferential treatment, the patriarch receiving a rank in the official hierarchy as "vir spectabilis." Insults addressed to him were severely punished (Law of 396, *ib.* xvi. 8, 11). For a long time he was authorized to collect through special envoys (Apostoli) a tax of "joyous accession" ("aurum coronarium"), which enabled him to display an almost royal pomp. However, the Apostolé, as the tax was called, already disadvised by Julian ("Epistola," xxv.), was interdicted, and its proceeds confiscated for the benefit of the imperial treasury by Arcadius and Honorius, in 399 ("Cod. Theod." xvi. 8, 24). It was reinstituted in 404 (*ib.* 17; in the same year the privileges of the Jewish dignitaries were again confirmed [ch. xv.]), but not for long.

The arrogance of the patriarch Gamaliel dealt a fatal blow to the institution of the patriarchate. In 415 Gamaliel was deprived of his rank and honors (*ib.* 22); and not long after—at his death, doubtless—the patriarchate was abolished. The apostolé, however, was continued; but in 429 it was converted into a tax for the benefit of the public treasury (*ib.* 29). Its history, it will be observed, strangely resembles that of the didrachma.

Status Under the Christian Emperors.

2. Civil and Political Status: After being for a long time privileged "peregrini," the Jews, by an edict of Caracalla, had become "cives," enjoying all the rights attaching to this title, and, in addition, certain special privileges by virtue of their religion. The Christian emperors respected this status in principle, opposing, for instance, the local attempts to impose special "governors" and a system of fixed sale-prices upon the Jewish merchants (Law of 396, "Cod. Theod." xvi. 8, 101), and likewise the attempts to compel the Jews of Rome to enter en bloc the burdensome corporation of the "navicularii" (*ib.* xiii. 5, 18; in the year 390).

But although no injury was done to the civil rights of the Jews—except, as will presently be seen, in regard to slavery and matrimony—the same was not the case with their political rights. The idea that Jews could legally give orders to Christians—that they could hold a particle of the sacred authority of the emperor—soon came to be intolerable. As early as the year 404 it had been decided that Jews could not be employed as "agentes in rebus"; that is to say, as functionaries of the police and of the treasury (*ib.* xvi.; the word "militia" in this text has been misunderstood: it in no way designates the military career, which never had been open to the Jews). In 418, in a general manner, they were shut out from all public employments ("Cod. Theod." xvi. 8, 24; compare "Constitutio Sirm." 6), while at the same time permitted to become advocates (this until the year 425 only) or decurions. This interdiction was renewed in a more explicit fashion in 438, and was extended to the judiciary offices and to the municipal dignities, particularly that of "defensor civitatis" ("Nov. Theod." ii. 3, 2="Cod. Just." i. 9, 19).

Liability to the Curia.

Moreover, the Jews were required to hold curial offices, more onerous than honorable, and which, in the pagan epoch, had been considered incompatible with their religion. This last measure, already attempted by Septimius Severus, met, it appears, with vigorous resistance. Beginning with the year 321, Constantine ordered that all the municipal councils could press into this service those Jews whose fortunes rendered them liable, excepting "two or three" in each community, "ad solacium pristinæ observationis" ("Cod. Theod." xvi. 8, 3). Later constitutions stated this exemption more precisely, while at the same time extending its range to priests, archisynagogues, chiefs, and functionaries of the Jewish synagogues (*ib.* xvi. 8, 2 [in the year 330], 4, 13; xii. 1, 99; "Cod. Just." i. 9, 5). But a law promulgated in the Orient—the date and author of which are unknown—reconsidered the reform, and exempted once again all the Jews from the curia. This law, in its turn, was abrogated, at least for the Occident, in 398 ("Cod. Theod." xii. 1, 158; compare "Cod. Just." i. 9, 5, as regards the first abrogation, in 383). The property of the Jews liable to the curia was formally alienated to the curia ("Cod. Just." i. 9, 10 [in 403]). It is worthy of note that even the curial Jews were considered as people of the lowest condition (*ib.* i. 9, 19). It is hard to explain, therefore, that in the time of Pope Gelasius (492–496) there were still Jewish "clarissimi" (Mansi, "Concil." viii. 131). Judicial autonomy disappeared at the same time as the curial privilege.

As early as the year 393, the Jews were required to conform in their marriages to the Roman laws, and polygamy was forbidden ("Cod. Just." i. 9, 7). A law in 398 ordained that in all matters not strictly religious in character the Jews were amenable thereafter to the Roman law and to the judge of the common law. No doubt the parties concerned were also entitled to submit their case to the decision of their rabbi, if they wished to do so; but this decision, in case it conflicted with that of the governor, the superior judge, had only the value of a simple arbitrament ("Cod. Theod." ii. 1, 10; this constitution is reproduced in "Cod. Just." i. 9, 8, with an omission, which seems to have attributed to the Roman judge jurisdiction even in litigations of a religious nature; but this omission can not be considered intentional). It must be assumed that, either through superstition or through respect for the judicial knowledge of the rabbis, many Christians in litigation with Jews consented to submit their contentions to the Jewish elders. This practise was forbidden by a constitution of 418 ("Cod. Just." i. 9, 15).

Converts and Slaves.

3. Measures of Defense and Attack of a Religious Character: Two principles are here dominant: (1) the prevention of the Jews from spreading their religion, especially to the detriment of Christianity; and (2) the encouragement of apostasy. To the first category belong the prohibition, under a penalty of a fine of 50 pounds in gold, of the erection of new synagogues, the preservation and maintenance of the old ones being, however, permitted ("Cod. Theod." xvi. 8, 25 [in 423], 27; "Nov. Theod." ii. 3, 3; "Cod. Just." i. 9, 19); the prohibition, under the death-penalty, of marriage with Christian women ("Cod. Just." i. 9, 6 [in 388]; "Cod. Theod." iii. 7, 2; ix. 7, 5), or even of having any contact with the women of the imperial gyneceum ("Cod. Theod." xvi. 8, 6 [in 339]; the sense is somewhat doubtful); and, finally, the prohibition, also under penalty of death, aggravated by confiscation, of the conversion of free Christians to the Jewish religion ("Cod. Just." i. 9, 16, 19 [in 439]; the convert, also, was punished with confiscation, "Cod. Theod." xvi. 8, 7 [in 357]; compare *ib.* xvi. 8, 1 [the date 315 is inaccurate]). A very delicate question, and one in regard to which legislation varied, concerned the detention by Jews of non-Jewish, especially Christian, slaves. Here the danger of seduction, or even of forcible circumcision, was a thing which was regarded as particularly to be dreaded. At first it was thought sufficient to renew the ancient law of Antoninus prohibiting the circumcision of even pagan slaves ("Const. Sirm." 4 [in 335], a renewal of a former constitution). The penalty for the master, it would appear, was only his loss of the slave, who was set free. But soon after, the emperor Constantius added thereto the death-penalty for the master, and in a general way forbade even the acquisition by Jews of slaves of another religion, under the penalty of their confiscation for the benefit of the treasury. In cases where the slaves were Christians, the confiscation of the owner's entire fortune was ordered ("Cod. Theod." xvi. 9, 2 [in 339]). This law, truly exorbitant, although renewed in 384, could not be enforced (*ib.* iii. 1, 5).

In 415 the Jews were formally authorized to own Christian slaves on the condition of not converting them (*ib.* xvi. 9, 3); but in 417 the influence of the clergy led—at least in the future—to the abrogation of this indulgent law. Christian slaves in actual detention by Jews could be retained by the latter, the death-penalty being applied to cases of attempted circumcision only (*ib.* 4; confirmed in 423 [*ib.* 5]); but even this provision was modified in 439 to exile and confiscation ("Cod. Just." i. 9, 16).

In the same manner that the legislation opposed all expansion of the Jewish religion, it encouraged, and no less energetically, the conversion of the Jews to Christianity. The Church, however, had no right to receive such apostates as desired, in invoking its right of asylum, simply to escape the payment of their debts ("Cod. Theod." ix. 45, 2 [in 397]). In the first place, of course, the newly converted were protected with the whole rigor of the law against the malice and cruelty of their former coreligionists ("Const. Sirm." 4; "Cod. Theod." xvi. 8, 1; "Cod. Just." i. 9, 3; this constitution, the date of which as handed down [315] is certainly false, threatens delinquents with the penalty of being burned alive). Still worse, the converted Jewish child could not be disinherited by its parents, nor even be curtailed in its portion; while a provision singularly odious was added, viz., the fourth part of the residue was assured to it, even though it might have been convicted of a capital crime against the "de cujus"; without prejudice, however, to the legal penalties ("Cod. Theod." xvi. 8, 28 [in 426]).

By means of these measures and others of the same kind, confirmed by the novellæ of Justinian (45 and 146), it became possible, if not to induce numerous conversions (compare Procopius, "De Æd." vi. 2), at all events to check definitively the spread of Judaism; to pen it up, both physically and morally, within the confines of Christian society; and, finally, to stamp upon it the seal of humiliation and terror which it was to bear, as a token of infamy, throughout the Middle Ages. The legislation of the councils that inspired most of the medieval laws concerning the Jews was but a reflection of the legislation of the Christian emperors. In Constantinople (Leo vi., "Constit." 55 [between 886 and 911]), as well as in the greater part of the Occidental states, such an attitude could not but bring about, sooner or later, a complete proscription of Judaism and its followers.

DIATHESIS: A predisposition to certain forms of disease. It has been observed by physicians at all times that some races are more prone to be affected by certain diseases than are other races. These peculiar tendencies have sometimes been due to somatic characteristics, and in such cases the diseases are designated as "racial." But in the majority of cases these diatheses are due to certain habits of life, diet, or environment, or to social causes; and the diseases which result from the diatheses can not be called "racial," because when the social conditions are changed the liability to the disease disappears.

The nervous diathesis has been universally observed by medical men to be peculiar to the Jews. Some physicians have even gone so far as to state that the majority of Jews are hysterical or neurasthenic—neuropathics or psychopathics. How far this is true will be found in the articles on Insanity and Nervous Diseases.

French writers like Charcot, Lancereaux, and Féré have said that rheumatic and gouty diathesis is more wide-spread among Jews than among any other European race. The groups of diseases recognized by the French under the names "arthritism" and "herpetism" are by some writers said to be common among the Jews. By "arthritism" they understand a certain group of diseases, usually due to disturbances of the normal metabolism, which manifest themselves primarily as chronic rheumatism and gout, but which also include other morbid processes, such as diabetes, gall-stones, stone in the kidneys, obesity, and some diseases of the skin. By "herpetism" is understood a group of diseases which manifest themselves in various forms of vasomotor disturbances, as some skin-eruptions, neuralgia, migraine, gastralgia, and nervous dyspepsia; various forms of trophoneurosis, pulmonary emphysema, and arteriosclerosis, with their sequelæ, apoplexy, softening of the brain, paralysis, etc.

These disease conditions are not so prevalent among the Jews as some French physicians assert. Some, as the functional neuroses, are actually very wide-spread among them; others, such as arteriosclerosis, apoplexy, etc., are no more common among Jews than among other civilized races. The diseases which are most often met with among Jews are not racial in the full sense of the word. In the majority of cases they are due to their mode of life, to the fact that Jews are almost exclusively town-dwellers, and to the anxieties of their occupations. See Apoplexy; Epilepsy; Insanity; Nervous Diseases; Skin-Diseases.

DIAZ (DIAS) DE SORIA: A family of Bordeaux which derived its name from the Spanish town Soria. There is nothing to definitely warrant the belief, held by Féret, that this family went to France as early as 1492. It is found for the first time, with the full patronymic "Dias de Soria," in 1756; although there were bearers of the name "Dias" and others of the name "Soria" in France long before. The family Diaz de Soria enjoys a great reputation, especially for the musicians it has produced.

Jacob de Soria: Born at Bordeaux April 27, 1762; died there Jan. 17, 1831. He was the leader of the choir of the synagogue in that place. He was also a captain of infantry, a rank with which he retired after serving in forty-four campaigns, especially in that of Saint Dominique, and receiving four wounds on various battle-fields.

His two grandsons, **Jacob-Fréderic** and **Julius**, both born at Bordeaux, the former Feb. 13, 1841, the latter April 28, 1843, are well known as singers and musicians. Gounod composed several pieces for Julius.

DIBBUḲIM: Transmigrated souls. "Dibbuḳ" (lit. "something that cleaves unto something else") is a colloquial equivalent, common among the superstitious Jews in eastern European countries, for a migrant soul. It represents the latest phase in the development of the belief in the transmigration of souls; namely, that the soul of a man who has lived a wicked life will enter the body of a living person and refuse to leave it. The exorciser, in such a case a "ba'al shem," or a wonder-working rabbi, is alone able to cast out this evil spirit, which usually goes out through the small toe, where a little orifice from which blood oozes marks the exact point of its exit. Full descriptions of such successful acts of exorcism, where, however, the dibbuḳ is still called by its older name "ruaḥ," are given in Manasseh b. Israel's "Nishmat Ḥayyim" (part iii., ch. 14; part iv., ch. 20). Another detailed description of a similar incident is reproduced in "Ha-Shaḥar" (vi. 459, 697) from Moses Prager's (Graf) "Zera' Ḳodesh" (Fürth, 1696), and is curious from the fact that R. David Oppenheim, the celebrated book-collector, who was then rabbi of Nikolsburg, Moravia, is one of the signatories to the narrative.

The first who wrote of the dibbuḳ under that name in modern Hebrew literature was P. Ruderman, but his "Ha-Dibbuḳ," of which the German title is "Uebersicht über die Idee der Seelenwanderung" (Warsaw, 1878), is of little value. The most interesting part of the book is the description of one of the dibbuḳim, which, according to his statement, were very common in Poland in those days. It proves that the manifestations of the dibbuḳ, and the belief in the power of practical cabalists to exorcise it, have undergone little change in the two centuries which have elapsed since the Nikolsburg incident referred to above. Dr. S. Rubin, in his "Gilgul Neshamot," the German title of which is "Die Metempsychose in Mythus und Kultur Aller Völker" (Cracow, 1898), points out the connection between the ancient belief in the transmigration of souls and in possession by evil spirits, and that in the dibbuḳim of modern times. He says at the end of his work (p. 29) that the belief in the wanderings of the soul "has come down to our time among the ẓaddikim and saints of the Ḥasidim, who cast out 'gilgulim' and 'dibbuḳim' from insane people." See Exorcism; Metempsychosis.

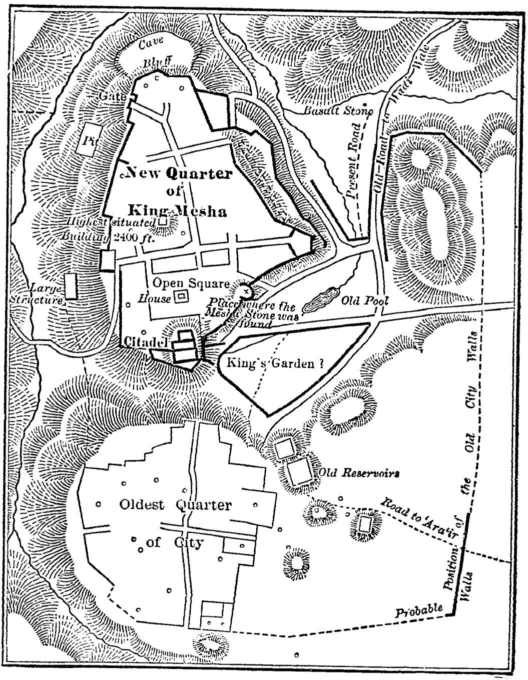
DIBLAH: According to the Masorah and Septuagint, which the R. V. follows, "Diblah" is the name of a place mentioned in Ezek. vi. 14. No place of this name corresponding with the requirements of the passage is known. J. D. Michaelis conjectured that it was a misreading for "Riblah," since in Jer. lii. 10 the Septuagint has the same misreading, though the Masorah is there correct. See Riblah.

E. G. H. G. A. B.

DIBON (דיבון): 1. A very ancient town, situated from three to five miles (Baedeker, "Palestine," p. 193) north of the River Arnon (Tristram, "The Land of Moab," pp. 132 *et seq.*). The true pronunciation seems to be "Daibon" (according to the Greek transliterations, *Δαιβών*, *Δηβών*; see Dillmann, on Num. xxi. 30, and Mayer, "Z. A. T. W." i. 128, note 2). It is the modern Diban, where in 1868 the Mesha Inscription was found, upon which the name of the town itself occurs (lines 21, 28). It is from Dibon that King Mesha derives his epithet הדיבני ("the Dibonite"; Mesha Inscription, line 1).

The town, originally under the dominion of Moab, was conquered by Sihon, king of the Amorites (Num. xxi. 27-30), but then wrested from his control by the Israelites. It appears to have been fortified by Gad (Num. xxxii. 3, 34); hence its description as "Dibon-gad" in Num. xxxiii. 45, 46, though it is possible that the second part of this compound refers to a local deity only. It was assigned to Reuben (Josh. xiii. 9, 17). In the tenth pre-Christian century it is again found under Moabite domination, and as the residence of King Mesha. According to his inscription the Moabites called it "Ḳarḥa," meaning a bald (untimbered) plateau. This was due to the fact that the town occupied two elevations; the higher one, this Ḳarḥa, had been surrounded by a wall, and constituted the "new city," containing a water reservoir and many cisterns, as well as the royal palace and a "height" ("bamah") for the god Chemosh. In Isaiah's prophecies (Isa. xv. 2) it is menaced as a Moabitish city before other towns, the writer playing upon the name "Dibon" (="Dimon," from "dam" = blood; Isa. xv. 9; "Madmen" in Jer. xlviii. 2 is a variant, if not a corruption) to predict its bloody fate. Dillmann, Duhm, and others reject the identification. Cheyne makes "Dimon" a corruption of "Nimrim" (compare "Zeitschrift des Deutsch. Palästina Vereins," ii. 8). Eusebius calls it a "large market-place" ("Onomasticon," 249, 43); but it is not mentioned by later medieval writers. Even now fragments of columns and ornaments strewn about witness to the town's former importance.



Plan of Ancient Dibon.

(After Schick, in "Zeit. Deut. Pal. Ver.")

2. A settlement of returning exiles in the Negeb (the South), in the tribal territory of Judah (Neh. xi. 25), in all likelihood identical with "Dimonah" in Josh. xv. 22, and represented by the modern Al-Dib (or Al-Dhaib; according to Robinson, Al-Daib; see Buhl, "Geographie des Alten Palästina," p. 182).

DICE. See Gambling.

DICK, ISAAC MAYER: Russian Hebraist and novelist; born in Wilna 1808 (of the various dates the one given by "Aḥiasaf" is probably most nearly correct); died there Jan. 24, 1893. His father, who was a ḥazzan, gave him the usual Talmudical education, and he was also instructed in the Bible and Hebrew. He married when very young, and while living with his wife's parents in Nishvezh, near Wilna, became acquainted with a Catholic priest who clandestinely taught him the German language. He also acquired a knowledge of Russian and Polish, and on his return to Wilna acted as private teacher of Hebrew and German, having for one of his pupils Mattathias Strashun, who remained his lifelong friend. In 1841 Dick became teacher of Hebrew in the newly founded government school for Jewish boys in Wilna.

The visit of Sir Moses Montefiore to Wilna in 1846 was the occasion of a great outburst of literary productions in his honor. Dick described the visit in "Ha-Oreaḥ" (The Guest), published at Königsberg 1860. He was one of the founders and for many years the "shammash" of the Synagogue Ṭohorat ha-Ḳodesh, modeled after the Shoḥare ha-Ṭob of Berlin of Mendelssohn's time, and known in Wilna as "Berliner Schul," because it dared introduce some slight reforms in accordance with the ideas of the Mendelssohnian "maskilim," who were called "Berliner." He was interested in the uplifting of the Jews of Russia by various means, and corresponded on that subject with Count Ouvaroff, minister of education under Nicholas I. Dick declared himself in favor of enforcing the ordinance compelling the Jews of Lithuania to dress in German or European fashion, though in his own dress and manners he remained an old-style Jew to the last, believing that he could thus do more good than if he broke with old associations and boldly joined the new generation.

Dick was a most pleasant conversationalist, his fame as a wit spreading far outside of Wilna, and innumerable humorous anecdotes being told in his name and about him to this day. In later years he was employed by the publishing house of Romm at a small weekly salary to write Yiddish stories; and his productions of that nature, of various sizes, are said to number nearly three hundred. In the chaotic condition of the Yiddish publishing trade in Russia, even an approach to a bibliography of works of that nature is an absolute impossibility. In his old age Dick lived comfortably, and was one of the most respected and popular men in the community.

In addition to that mentioned above, Dick wrote three Hebrew works: "Maḥazeh Mul Maḥazeh," a Purim story (Warsaw, 1861); "Siprono," a description of Jewish life in small cities (Wilna, 1868); and "Masseket 'Aniyyut" (Tractate Poverty), considered one of the best Talmudical parodies ever written. But his fame rests on his Yiddish novels, a field in which he was the first professional and the founder of a school. As he himself asserted many times, he wrote only for the purpose of spreading knowledge and morality among his readers, and in many cases he permitted this purpose to overshadow the story. Most of the modern critics condemn his style; his constant use of High-German words, explained, often wrongly, in parenthesis; his quotations from the Talmud and Midrashim with his own commentaries, retarding the flow of the narrative; and his pausing at a dialogue or other interesting point to insert a long sermon on the moral lesson to be drawn from incidents described in the story. But in spite of all verbosity and deviation, Dick was an excellent story-teller, having a power of description, an insight into human character, and a sympathetic humor which are given to few. His longer works are chiefly translations, and are the least worthy of his writings; but among the shorter ones are many original stories, some of which, if divested of superfluous matter, could well bear an English translation. "Der Yiddischer Posliannik" (The Jewish Ambassador), Wilna, 1880; "Note Ganaf" (Life of Nathan the Thief), *ib.* 1887; and "Die Schöne Minka," *ib.* 1886, have considerable merit; while some of his characters, such as "Shemaya Gut Yom-Ṭob Bitter" (the holiday visitor), "Chaitzikel Allein," or "Der Moiziter Bachur," rank among the best efforts of the present Yiddish writers.

DICK, LEOPOLD: German artist and professor of engraving; born 1817; died June 23, 1854. He studied art at the Royal Academy of Munich, and became well known through his lithographic illustrations of the Old Testament after Raphael. In 1848 he was appointed professor of the art of engraving at the Royal District Industrial School of Kaiserslautern in the Palatinate. He taught with great success, and was highly spoken of by the board of examiners in their annual reports.

S. A. R.

DICKENS, CHARLES: English novelist; born Feb. 7, 1812, at 387 Mile End Terrace, Commercial Road, Landport, Portsea; died June 9, 1870, at Gadshill, near Rochester, Kent. Dickens is of interest to the Jewish world principally through two of his novels: "Oliver Twist" (Jan., 1837 to March, 1839) and "Our Mutual Friend" (May, 1864 to Nov., 1865). These two works are characterized by a decided difference in the attitude of Dickens toward Jews. Few Jews in fiction are blacker and more repugnant in body and soul than *Fagin*, the thief, the coward, the all but murderer, and few bits of descriptive writing are more graphic than the narration of *Fagin's* last night on earth and his well-deserved punishment. Yet the name was derived from a Christian friend of Dickens' youth, the whole character from a well-known Christian "fence" of the period.

Fagin became the generally accepted type of the Jew; and "Oliver Twist" was considered as a direct hit at the Jew. Dickens evidently realized this, either through criticism or from personal contact with the real Jew; for when next he made use of a Hebrew in fiction, he drew *Riah* in "Our Mutual Friend," a character at the other extreme—almost impossibly, certainly improbably, good. In both "Oliver Twist" and "Our Mutual Friend" Dickens displays a lack of knowledge of the real characteristics of Jews.

J. E. Ms.

DICTIONARIES, BIBLE: Collections of articles in alphabetical order treating of the various biographical, archeological, geographical, and other subjects of the Bible. Up to within quite recent times Jews have taken very little part in such work. The earliest attempt at anything like a Bible dictionary is the work of Eusebius, Bishop of Cæsarea (d. 340), on the geographical names mentioned in the Old and New Testaments, entitled *Περὶ τῶν Τοπικῶν Ὀνομάτων τῶν ἔν τῃ Θείᾳ Γραφῇ* (ed. Lagarde, in "Onomastica Sacra," 2d ed., 1887; republished by Klostermanns in "Texte und Uebersetz." viii. 2). To this must be added the "Onomasticon" of Biblical proper names in Greek, also published by Lagarde. Jerome's "Liber Interpretationis Hebraicorum Nominum" and "De Situ et Nominibus Locorum Hebraicorum Liber" (ed. Lagarde, *l.c.*) are based on the work of Eusebius. The work of the Spanish priest Arias Montanus, entitled "Communes et Familiares Hebraicæ Linguæ," etc. (Antwerp, 1572), contains a large amount of material which, if put in alphabetical sequence, might have made a Biblical dictionary. Even the interest aroused in the Bible by the Reformation and the Humanist development (see Humanists) was largely philological in character; but the works of learned French, Dutch, and English Orientalists had brought out a large amount of material dealing with the social life of the Israelites, and the travels of some of them had increased the interest in the East as the best aid to an exposition of Biblical times. The first successful attempt to compile a dictionary of the Bible was made by the polyhistor and Protestant theologian Johann Heinrich Alsted (1588-1638), who wrote a universal encyclopedia and a "Triumphus Bibliorum Sacrorum seu Encyclopædia Biblica," Frankfort, 1625. Not many years later P. Ravenilli published his "Bibliotheca Sacra seu Thesaurus Scripturæ Canonicæ" (Geneva, 1650; 2d ed., 1660), which is in the proper form of a dictionary. This work might rather be called a dictionary to the Vulgate, just as the extract made of it in English, "A Complete Christian Dictionary of the O. and N. Test.," by Thomas Wilson, John Bagwell, and Andrew Simon (London, 1661), is rather a concordance to the English Bible. In 1693 J. Simon published at Lyons a "Dictionarium Biblicum," which was reprinted several times, the last in 1717. Simon, however, was ignorant of Hebrew, and it was for the purpose of correcting the many mistakes in his dictionary that the epoch-making work of Augustin Calmet, "La Sainte Bible en Latin et en François avec un Commentaire Littéral et Critique" (23 vols., Paris, 1707), was published. See Calmet, Augustin.

Calmet's Dictionary.

Calmet's dictionary, translated into English by D'Oyly and Corson (1732), was republished with many additions by Charles Taylor (London, 1793), but with the omission of all the rabbinic and Catholic material; and it reached an eighth edition in 1841. In a condensed form it was edited by Edward Robinson (7th ed., Boston, Mass., 1832-35). Calmet's dictionary was incorporated in the series of theological encyclopedias edited by Abbé Migne; and not only the text, but the illustrations also have served until quite recently to illustrate books dealing with the Bible or with the Jews. Upon Calmet is based also Daniel Schneider's "Allg. Bibl. Lexikon" (3 vols., Frankfort, 1728-31), containing much material from Geiers, Carpzov, Buxtorf, Bochart, Lightfoot, Selden, and Vitringa. Though very diffuse, this represents the first German attempt at a Bible dictionary, some of the articles being of special Jewish interest; *e.g.*, "Falsche Messias," "Falsche Christen," and "Gebot," in which last Schneider has added an incomplete list in German of the 613 commandments. W. F. Hezel's "Bibl. Reallexikon" (3 vols., Leipsic, 1783-85) also depends upon Calmet.

The rise of the critical school, especially as represented at Halle by the two Michaelis, Semler, Eichhorn, etc., finds its expression in the "Biblische Encyclopädie," published at Gotha (1793-98) by a company of learned scholars, which work, however, was never finished. The Gotha encyclopedia was completely overshadowed by G. B. Winer's "Biblisches Realwörterbuch" (2 vols., Leipsic, 1820, 1833, 1847), which has remained a standard work almost down to the present day. A number of popular presentations appeared in Germany during the first half of the nineteenth century; for example:

1829. Wörlein.—Encyk. Wörterbuch der Bibl. Grund-Realien. Nuremberg.
1836. Allgem. Wörterb. der Heil. Schrift. (Catholic). Regensburg.
1837. Gemmerli and Löhn.—Encyk. der Bibelkunde. Leipsic.
1846-50. Von Hoffmann and Redslob.—Allg. Volksbibellexikon. *Ib.*
1849. F. C. Oetinger.—Bibl. Wörterb. (purely theological). Stuttgart.
1856. H. Zeller.—Bibl. Wörterb. 2d ed., 1866.

The last-named was a protest against the rationalism of Winer and of Redslob (who followed Vatke's Biblical criticism). It was, however, fast becoming apparent that no more than an encyclopedia, could a real Bible dictionary be compiled by one man. The "Real-Encyklopädie für Protestantische Theologie und Kirche," edited by Herzog and a number of leading German scholars (Stuttgart, 1852-62; 2d ed., by Herzog and Plitt, 1877-88; 3d ed., by A. Hauck, 1896 *et seq.*), while not strictly a Bible dictionary, contains many valuable articles dealing with Biblical subjects and personages. Germany has, in modern times, published two Bible dictionaries in condensed form; namely, those of Schenkel and C. A. Riehm. Schenkel's "Bibel-Lexikon" (5 vols., 1869-75) was written in large part by Diestel, Dillmann, Hitzig, Holtzman, Merx, Nöldeke, Graf, Reuss, and Schrader. It omits subjects which are of minor importance. Riehm was assisted in his "Handwörterb. des Bibl. Alterthums" (2 vols., 1874) by Beischlag, Delitzsch, Ebers, Diestel, Kautzsch, Schrader, and others (2d ed., by F. Baethgen, 1894). Of other and more popular dictionaries published in Germany may be cited the following:

Johann Herzog.

1714. Ad. Rechenberg.—Hierolexicon Reale Collectum. 2 vols. Leipsic and Frankfort.
1776. J. A. Dalmasius.—Dict. Manuale Biblicum. 2 vols. Augsburg.
1793-96. G. L. Gebhardt.—Bibl. Wörterb. 3 vols. Lemgo.
1820-27. C. G. Haupt.—Bibl. Real und Verbal Encyk. 3 vols. Quedlinburg.
1828. C. A. Wahl.—Bibl. Handwörterb. 2 vols. Leipsic.
1837. C. L. Walbrecht.—Bibl. Wörterb. Göttingen.
1842. A. C. Hoffmann.—Allgem. Volksbibellexikon. Leipsic.
1866. H. Besser.—Bibl. Wörterb. Gotha.

John Kitto.

The first to break away from Calmet in England was John Kitto. He recast the whole work, being assisted by such scholars as Hävernick, Tholuck, Reginald Stuart Poole, and William Wright, and published "A Cyclopædia of Biblical Literature" (Edinburgh, 1843-45; 2d ed. by Burgess). The whole was rewritten for the third edition by William Lindsay Alexander (Philadelphia, 1865), with especial reference to the religion, literature, and archeology of the Hebrews. For the first time the scope of such dictionaries was enlarged by the addition of lives of prominent Biblical scholars and of articles upon distinctively Jewish subjects (*e.g.*, "Elijah Levita," "Jewish Printers," "Albelda," "Dunash," "Yosippon," "Tanḥuma," "Talmud," "Satanow," "Rashbam"). Among those contributing to this work were Bialloblotzky, Cairns, Samuel Davidson, Emanuel Deutsch, Farrar, Geikie, and D. Ginsburg. Potter's "Complete Bible Encyclopedia" (ed. William Blackwood, 3 vols., Philadelphia, 1875) was based upon Kitto and Ayre (see list). It is a Church dictionary as well as a Biblical one. J. A. Bartow's "Biblical Dict." (2 vols., London, 1845) was popular in character, but did not go further than the letter "L."

Much more scholarly than Kitto's dictionary is the "Dict. of the Bible," published by W. Smith and Aldis Wright (London, 1860). This was frankly stated to be not a dictionary of theology, but a Bible dictionary according to the Authorized Version. It was non-controversial; in certain cases it has several articles treating one and the same subject from different points of view. It was the first dictionary to contain a complete list of proper names in the Old and New Testaments and the Apocrypha. The first volume was republished in two parts (1893) with the help of Driver, Naville, Westcott, Ryle, Tristram, Wilson, etc. The first edition was republished in Boston (1863), and again by H. B. Hackett and Ezra Abbot in New York (1871). An abridgment, made by Smith himself, appeared at Hartford (1868). P. Fairbairn's "Imperial Bible Dict." (Edinb., 1865) is more popular in character and more theological. McClintock and Strong's "Cyclopædia of Biblical, Theological, and Ecclesiastical Literature" (12 vols., New York, 1867-87; rev. ed., 1895) has justly had a great vogue in the United States. It contains nearly all the material to be found in previous dictionaries, and a large number of articles dealing with rabbinical theology and rabbinical writers. Philip Schaff's name is connected with two Bible dictionaries: one published in Philadelphia and New York in 1880 (Italian translation by Enrico Meille, Florence, 1891), and a larger "Religious Encyclopædia: or Dictionary of Biblical, Historical, Doctrinal, and Practical Theology," based largely upon Herzog and Plitt's "Real-Encyc." To this he added an "Encyclopedia of Living Divines," the whole being published in a third edition (4 vols.) by Funk & Wagnalls, New York, 1891.

Robertson Smith.

Mention should be made here of the ninth edition of the "Encyclopædia Britannica." With Robertson Smith as editor, it is natural that it should contain a large number of articles dealing with the Bible, and largely written by Smith himself (see "Encyc. Bibl." Preface, p. vii.). The articles on Jewish literature were written by S. M. Schiller-Szinessy. It was Smith's intention to republish the Biblical articles, and, with the help of other scholars, to form an "Encyclopedia Biblica." The immense mass of archeological and critical material gathered since the appearance of the "Britannica" made this impossible; but the project paved the way for the "Encyc. Bibl." of T. K. Cheyne and T. S. Black (4 vols., New York and London, 1899 *et seq.*). All the leading Biblical scholars are contributors to this work, which reaches the highest standard of accuracy and completeness; but it has one great drawback in that it gives too much attention to conjectural Biblical criticism. The "Dict. of the Bible," published at the same time by J. Hastings in conjunction with John A. Selbie, A. B. Davidson, S. R. Driver, and H. B. Swete (4 vols., New York, 1898–1902), is meant for intelligent laymen as well as for scholars, and therefore contains much less purely technical matter. It contains also articles on specifically Jewish subjects written by W. Bacher and other Jewish scholars.

By the side of these works must be placed the "Dict. de la Bible," now in course of publication by F. Vigouroux (Paris, 1895 *et seq.*). Containing the work of a number of Catholic scholars and prefaced by an encyclical of Pope Leo XIII., this dictionary is an authoritative Catholic presentation. It embraces a number of subjects dealing with the theology and history of the Church; and it endeavors to combat from the Catholic standpoint modern Biblical criticism. The care employed in its compilation and the richness of its illustrations make it a valuable addition to the list of Biblical reference-books.

There are only three dictionaries by Jewish scholars to be recorded here. Ezekiel b. Joseph Mandelstamm compiled ("Sefer ha-Shemot," Warsaw, 1889) an alphabetic account in Hebrew of all persons and places mentioned in the Bible. In 1896 A. H. Rosenberg commenced the publication of a Bible dictionary in Hebrew, "Oẓar ha-Shemot." No topics or general subjects were treated, but only proper names and words occurring in the Hebrew text. The publication ceased after two parts had been issued (New York, 1896–99). A far more ambitious attempt is the "Real-Encyc. des Judenthums, Wörterb. für Gemeinde, Schule und Haus," of J. Hamburger, the first part of which (Strelitz, 1874) is devoted to the Bible. Hamburger attempts to treat the Biblical subjects entirely from a Jewish point of view, and with continual reference to the Talmud and Midrash, often with a practical end in view, as many of the topics treated were the subject of controversy within the Jewish body. Unfortunately, his references are not exact.

Quite different in character from all those above mentioned is James Inglis' "Bible Text Cyclopædia" (Philadelphia, 1877). This is a topical classification of Bible texts, the wording of which is given in full. A shorter work, but upon similar lines, is the "Bible Text-Book," published by the American Tract Society (n.d.). The following list comprises the chief Bible dictionaries published in modern times for more general use:

1769. J. Brown.—Dict. of the Holy Bible. 2 vols. London.
1779. A. Macbean.—Dict. of the Bible. *Ib.*
1784. P. Oliver.—Scripture Lexicon. Birmingham; London, 1843.
1793-98. F. G. Lenn.—Bibl. Encyc. 4 vols. Gotha.
1815-35. J. Robinson.—Theological, Biblical, and Ecclesiastical Dict. London.
1816. J. Brown.—Dict. of the Holy Bible. 2 vols., Albany; 1 vol., New York, 1846.
1829. W. Gurney.—Pocket Dict. of the Holy Bible. London.
1831. W. Jones.—Bibl. Cyc. 2 vols. *Ib.*
1831. R. Watson.—Bibl. and Theol. Dict. London.
1839, 1855. F. A. P.—Union Bible Dict. Philadelphia.
1840, 1860. S. Green.—Bibl. and Theol. Dict. London.
1848, 1849, 1853. J. Eadie.—Bibl. Cyc. London; Philadelphia, 1902.
1849. J. G. Lawson.—Bibl. Cyc. 3 vols. London.
1850. Alfred Jones.—Proper Names of the O. T. Scriptures Expounded and Illustrated. London.
1852. J. Farrar.—Bibl. and Theol. Dict. London.
1854. H. Malcolm.—Dict. of the Bible. *Ib.*
1859, 1886. Dict. of the Holy Bible for General Use. American Tract Soc., New York.
1863. G. S. Bowen.—Manual of Illustrations Gathered from Scriptural Figures, etc. New York.
1865. J. A. Bost.—Dict. de la Bible. Paris.
1866. J. Ayre.—Treasury of Bible Knowledge. London.
1877. James Inglis.—Bible Text Cyc. Philadelphia.
1880. Manrique Alonzo Lallave.—Diccionario Biblico. Part i. Seville.
1893. Edwin N. Rice.—People's Dict. of the Bible. Philadelphia.
1903. H. Guthe.—Kurzes Bibl. Wörterb. Tübingen and Leipsic.
n.d. W. Goodhue and W. C. Taylor.—Pictorial Dict. of the Holy Bible.
n.d. Index to the Holy Bible. American Sunday School Union, Philadelphia.
n.d. Bible Text-Book. American Tract Soc.

G.

DICTIONARIES, HEBREW: The earliest known work giving a lexical survey of part of the Hebrew language, with comments, is the dictionary of Biblical proper names (*'Ερμηνεία 'Εβραϊκῶν 'Ονομάτων*) ascribed to Philo of Alexandria, and in any case the work of a Greek Jew. Origen, in the third century, enlarged it, and Jerome, at the end of the fourth century, worked it over in Latin (P. de Lagarde, "Onomastica Sacra," 2d ed., 1887; Schürer, "Geschichte," 3d ed., iii. 540). Aside from these first lexical works on the Bible, which have been preserved only within the Christian Church, there are no traces of a similar attempt in pre-geonic times. The manner in which the Bible was expounded and its language handed down by tradition in the Jewish schools of Palestine and Babylon, precluded the need of lexical aids. Traditional literature, beginning with the tannaitic Midrash, contains, of course, numerous lexical comments on the words of the Bible; and this literature, including the old Bible translations, must be regarded as the earliest and most important source of Hebrew lexicology.

Talmudic Lexicons.

The first lexicon mentioned in Hebrew literature deals not with the Bible, but with the Talmud. Gaon Ẓemaḥ b. Paltoi of Pumbedita (last quarter of the ninth century) wrote a lexicon for the Babylonian Talmud, of which, however, only small fragments have been preserved in quotations (see Kohut, "Aruch Completum," Introduction, pp. xviii. *et seq.*). Perhaps Ẓemaḥ himself designated his work by the name 'Aruk (ערוך), which word (derived from the verb ערך, Job xxxii. 14) is the earliest term in Jewish literature for a lexicon, though it gained currency only through Nathan b. Jehiel's work (see below) of that title. The first known Hebrew lexicon is called "Agron" (אגרון, pronounced also "Igron"), meaning "a collection of words," from אגר, "to collect." It is a youthful work of Saadia, gaon of Sura, and was written in 913. It was intended, as Saadia says in the introduction (still extant), not only to promote the knowledge of the pure Biblical language, but also as an aid to writing poetry. Hence Saadia's "Agron" was a double lexicon, arranged, as were most of the original Arabic lexicons, according to the alphabetical sequence of the first and final letters of the roots and words, corresponding to the two formal requirements of the Hebrew versification of that time, acrostic and rime. Saadia, who originally had supplemented each word by only a Biblical passage in which it occurred, made a second, enlarged edition of the "Agron," in which he gave the Arabic equivalents for the words, besides also chapters in Arabic on various subjects useful for poets. He also changed the name of the work to "Book of Poetry," or "Book on the Principles of Poetry" (for the extant fragments see Harkavy, "Studien und Mittheilungen," v.). A smaller but likewise epoch-making work of Saadia's was his explanation, from the language of the Mishnah and Talmud, of 70 (or rather 90) words occurring seldom or only once in the Bible. This has been edited many times.

Judah ibn Ḳoraish.

Saadia's elder contemporary, Judah ibn Ḳoraish of Tahart, North Africa, composed a larger work along the lines of Saadia's small list of Biblical words. This work, which is still extant, was written in the form of a letter ("risalah") to the community of Fas (Fez), and has three chief divisions in lexical arrangement, containing comparisons of Hebrew words with (1) New-Hebrew words of the Mishnah, (2) Aramaic words, and (3) Arabic words. This is the first work on Semitic comparative linguistics, and it has held a permanent place in Hebrew philology (ed. Bargès and Goldberg, Paris, 1857). The third part, containing comparisons of Hebrew and Arabic words, was known separately as "Sefer ha-Yaḥas," or "Sefer Ab wa-Em," according to the initial words (Ibn Ezra, Introduction to his "M'oznayim"; Ibn Ezra's contemporary, Isaac b. Samuel, quotes "Agron Ab wa-Em"; see "Jew. Quart. Rev." x. 729). Ibn Ḳoraish also began a larger lexicon, which, however, was not carried beyond the roots beginning with alef (see Bacher, "Die Anfänge der Hebräischen Grammatik," p. 69; "Jew. Quart. Rev." *l.c.*). This work, which Menahem b. Saruḳ quotes as "Sefer Pitronim" (Book of Explanations), was, like Saadia's "Agron," doubtless written in Arabic, as was the "risalah."

David ben Abraham.

What Ibn Ḳoraish's lexicon would have been may be seen from that of David b. Abraham (tenth century), which has been preserved in an almost complete state. The latter author, called also Abu Sulaiman of Fas (Fez), belonged to the Karaite sect, and was probably stimulated by Ibn Ḳoraish's writings to undertake his own work, which, also, contained many Hebrew-Arabic comparisons. Like Saadia, the only author to whom he refers by name, David b. Abraham calls his lexicon (written in Arabic) "Agron," which he renders in Arabic by "Jami' al-Alfaẓ" (Collector of Words). Through him the Karaites came to prefer the word "agron" as a term for "lexicon." An author belonging to that sect, writing in Arabic in the beginning of the eleventh century, calls David b. Abraham's work "the chief representative of the Agron literature" (see "Rev. Etudes Juives," xxx. 252); and Judah Ḥadassi (twelfth century) mentions the "Agronot" or "Sifre ha-Agron" ("Monatsschrift," xl. 125). David b. Abraham also produced an abridgment of his lexicon, as did Levi b. Japheth later, whose work was made the basis of Ali b. Sulaiman's "Agron," written in the first half of the eleventh century (Pinsker, "Liḳḳuṭe Ḳadmoniyyot," i. 117, 183; "Rev. Etudes Juives," xxx. 125). Extracts from David b. Abraham's work, which was the only original contribution of the Karaites to Hebrew lexicography, have been published by Pinsker (*l.c.* pp. 117–162, 206–216; see also Neubauer, "Notice sur la Lexicographie Hébraïque," pp. 25–155). After David b. Abraham, Abu al-Faraj Harun only is to be mentioned: he is none other than the anonymous grammarian of Jerusalem mentioned by Ibn Ezra in the introduction to the "M'oznayim." The seventh part of his "Al-Mushtamil," completed in 1026, is a kind of root-lexicon, in which the triconsonantal roots are so treated that all the roots formed by combinations of the same three letters are arranged in one group; for example, all roots containing the letters ע, פ, and ר—namely, עפר, רעף, פרע, פער—are treated under ערף (see "Rev. Etudes Juives," xxx. 247 *et seq.*, xxxiii. 20 *et seq.*). A similar arrangement was also adopted about the same time by the leading rabbinical authority of the East, the gaon Hai, in his lexicon "Kitab al-Ḥawi" (Hebr. "Sefer ha-Me'assef," or "Sefer ha-Kolel"), of which only quotations and fragments are extant (see "Z. D. M. G." lv. 129 *et seq.*, 597 *et seq.*).

Long before Hai Gaon's time (d. 1038) a lexicon had inaugurated in the West a period of literary activity that made Spain the real home of Hebrew philology. About 960 Menahem ben Saruḳ wrote his "Maḥberet" (name derived from Ex. xxvi. 4), the first complete lexical treatment in the Hebrew language of the words in the Bible. In the arrangement of his lexicon Menahem rigidly adheres to the theory of roots current at that time. He includes roots of one and two letters, and adds a lengthy grammatical introduction together with longer and shorter excursus. On account of its Hebrew form this lexicon (ed. Filipowski, London, 1854) was for a long time the generally accepted lexical aid to Bible study in European countries where Arabic did not prevail; while in Spain itself it at first gave rise to lively polemics in the works of Dunash b. Labraṭ and of Menahem's and Dunasch's pupils. It was soon superseded, however, in the new era of Hebrew philology inaugurated by Menahem's pupil Judah b. David Ḥayyuj.

Abu al-Walid ibn Janaḥ.

Ḥayyuj (end of the tenth century) set forth his theory of roots and his fundamental view of verbal inflection in two works, in which the weak radicals and the radicals in which the second letter is doubled are grouped together in lexicographical order. The same arrangement obtains in the first work of Ḥayyuj's eminent successor, the "Kitab al-Mustalḥaḳ" (Hebr. "Sefer ha-Hassagah"), a critical supplement to Ḥayyuj's works by Abu al-Walid Merwan ibn Janaḥ. The chief work of Abu al-Walid (called R. Jonah in Hebrew; lived in the first half of the eleventh century) is divided into a grammar and a lexicon. The latter, entitled "Kitab al-Uṣul" ("Sefer ha-Shorashim"), is the high-water mark of the lexical activity of the Middle Ages, and is remarkable for the value of its contents as well as for the methodical arrangement of the material. Especially noteworthy are the comparative definitions of the words and the large number of Bible-exegetical details. This lexicon influenced directly or indirectly the entire later Hebrew lexicography: the Arabic original was edited by Neubauer (Oxford, 1875); and Bacher edited the Hebrew translation of Judah ibn Tibbon (Berlin, 1896).

Mention should be made here of the following works pertaining to the subject, and written in Arabic by Spanish Jews of the eleventh and twelfth centuries: Judah ibn Balaam's small treatises on the homonyms and particles; Abu Ibrahim ibn Barun's monograph "Kitab al-Muwazanah," on the relation of Hebrew to Arabic (edited, as far as extant, by Kokowzoff, St. Petersburg, 1894); "Kitab al-Kamil" (in Hebrew "Sefer ha-Shalem"), including a grammar and lexicon, by Jacob b. Eleazar of Toledo, known only through extracts.

The "'Aruk."

Outside the domain of Arabic culture the first great lexicon to traditional literature (Talmud, Midrash, and Targum) was contributed by Italy, the old seat of Talmudic scholarship. This work is the "'Aruk" of Nathan b. Jehiel of Rome, which was finished about 1100, and has remained up to the present time the most important lexical aid to Talmudic study. Nathan arranged the roots according to the early system followed by Menahem, and paid particular attention to rare expressions and borrowed words, following largely the Talmud exegesis handed down by the Geonim (first ed. in Italy before 1480; latest ed. by Kohut, 1878–92, 8 vols.). With the exception of Gaon Ẓemaḥ's "'Aruk," referred to above, the only work of this kind mentioned as preceding Nathan's is the "Alphabeton," a kind of glossary by Makir, the brother of Rabbenu Gershom (first half of the eleventh century; see Rapoport's biography of Nathan, note 12). Samuel b. Jacob Jam'a of North Africa made important additions to Nathan's "'Aruk" in the twelfth century ("Grätz Jubelschrift," Hebrew part, pp. 1–47).

The glossaries by the geonim Sherira and Hai accompanying the texts of certain Talmudic treatises do not come within the scope of this article (see Bacher, "Leben und Werke des Abulwalid," pp. 84 *et seq.*).

Menahem ben Solomon.

Half a century after Nathan b. Jehiel, Menahem b. Solomon, also of Rome, wrote a lexicon with the evident intention of upholding Ibn Saruḳ's reputation in the face of the system founded by the Spanish school, and at that time (1143) propagated in Italy by Abraham ibn Ezra. Menahem b. Solomon's lexicon is the chief part of his manual of Bible study, "Eben Boḥan" (Touchstone; see Bacher in "Grätz Jubelschrift," pp. 104–115). While this lexicon had little influence, that of Solomon ibn Parḥon, "Maḥberet he-'Aruk" (ed. S. G. Stern, Presburg, 1844), written somewhat later (1160) at Salerno, achieved a wide reputation. This work was in the main an enlarged extract from Abu al-Walid's lexicon, of which it has erroneously been regarded as a translation (see Bacher in Stade's "Zeitschrift," x. 120–150, xi. 35–99). Two other lexicons from two countries that otherwise have contributed little or nothing to the literature of Hebrew philology must also be mentioned. The first of these works, both of which drew upon Ibn Parḥon's lexicon, is the "Sefer ha-Shoham" (Onyx Book), written by Moses b. Isaac of London (end of the twelfth century), the beginning of which was edited by Collins, London, 1882. The author has been identified as the well-known punctator Moses ha-Naḳdan. The second work is the lexicon of the German Shimshon, who often defines the words also in German (see Geiger's "Wiss. Zeit. Jüd. Theol." v. 419–430).

The Ḳimḥis.

Southern France began to take the lead in Jewish literature in the second half of the twelfth century. About 1150 Joseph Ḳimḥi of Narbonne wrote the "Sefer ha-Galui" (Book of the Revelation; edited by Mathews, Berlin, 1887), containing chiefly lexical matter and a criticism of Menahem's lexicon. His son, David Ḳimḥi (1160–1235), wrote the "Miklol," which contained a grammar and a lexicon supplementary to Abu al-Walid's chief work, but revealed, especially in its method, a remarkable independence. The lexicon, "Sefer ha-Shorashim" (printed before the grammar, in Italy prior to 1480; also Naples, 1490, 1491; Constantinople, 1513; Venice, 1529; new ed., Berlin, 1847), is much superior to Abu al-Walid's lexicon, and was for centuries the standard work of Hebrew lexicography. In the latter half of the thirteenth century Abraham Bedersi of Bezières wrote the first book of Hebrew synonymy, "Ḥotem Toknit" (see Ezek. xxviii. 12), a large and valuable work, arranged in alphabetical order (edited by G. E. Polak, Amsterdam, 1865). In the first third of the fourteenth century the many-sided Joseph ibn Kaspi also wrote a lexicon, "Shorshot Kesef" (see Ex. xxviii. 22), in which he endeavored to deduce the secondary meanings from the general primary meaning of the root (see "Orient, Lit." viii., ix.; Neubauer, "Notice sur la Lexicogr. Hébraïque," pp. 208–211). "Menorat ha-Ma'or," the work of a Greek Jew, Joseph b. David ha-Yewani, of which only a fragment is extant in a single manuscript, dates from about the same time (see Neubauer, *l.c.* p. 207). The first Hebrew concordance, also a kind of lexicon (see CONCORDANCE), was produced in the first half of the fifteenth century by a Jew of southern France.

In Italy, Spain, and the East.

In Italy, where the scientific spirit among the Jews was especially active in the fifteenth century, Solomon b. Abraham of Urbino wrote (1480) a book of synonyms entitled "Ohel Mo'ed," Venice, 1548 (edited by Willheimer, Vienna, 1881), entirely different in character from Abraham Bedersi's work. In Spain, just before the expulsion of 1492, a Hebrew lexicon was written in Arabic by the learned rabbi of Granada, Saadia b. Maimun ibn Danan ("Rev. Et. Juives," xli. 268).

In the East the study of Maimonides' epoch-making work in the second half of the thirteenth century resulted in Tanḥum b. Joseph Yerushalmi's lexicon, "Al-Murshid al-Kafi" (The Sufficient Guide), written in Arabic. This work deals especially with Maimonides' "Mishneh Torah," but includes also some of the words of the Mishnah. A lexicon by Solomon b. Samuel of Gurganj (Urgenj, central Asia), completed in 1339, is a remarkable example of intellectual activity and wide literary knowledge from a region which is not otherwise mentioned in the history of Jewish literature. It presents in uniform alphabetical arrangement the vocabulary of the Bible, the Targum, the Talmudic-Midrashic literature, and some later works, in about 18,000 articles, most of which are very short. The author called his work "Sefer ha-Meliẓah," and sometimes "Agron" (see Bacher, "Ein Hebräisch-Persisches Wörterbuch aus dem 14. Jahrhundert," Strasburg, 1900). A century later Moses Shirwani of northern Persia completed (1459) a Hebrew-Persian lexicon which he called "Agron" (see Bacher in Stade's "Zeitschrift," xvi. 201–247). This is a popular aid to Bible study, as is also the "Maḳre Dardeḳe," a Hebrew-Arabic-Romanic (Italian, French, Provençal) glossary to the Bible which was produced about the same time in western Europe (printed at Naples about 1488).

Elijah Levita.

At the beginning of the sixteenth century a great and decisive change occurred in the history of Hebrew philology. From that time this science, hitherto cultivated exclusively by the Jews, took rank in the large circle of scientific activities inaugurated by the new humanism; and it soon became a mighty factor in the religious movement that revolutionized Germany. Protestantism, going back directly to the Bible, took up the study of the Hebrew language, which henceforth became an integral part of Protestant theology. But in Judaism itself the period beginning with this century was one of intellectual stagnation. The old classical literature of the preceding periods was more and more forgotten, and the one-sided study of the Talmud gradually displaced the study of the Bible and its language, rendering the literary productions in this field utterly unimportant. The beginning of this epoch of decadence was marked, however, by Elijah Levita's activity, with which the creative period of Hebrew philological literature within Judaism was worthily closed. His works include: "Sefer Zikronot," a Masoretic lexicon or, rather, a Masoretic concordance to the Bible, still in manuscript; "Tishbi," a small lexicon of 712 articles (published in 1541 *et seq.*), containing mostly New-Hebrew words; and "Meturgeman," the first lexicon to the Targumim (1541). Abraham de Balmes did not finish the lexicon of roots to which he refers several times in his grammar.

The paucity of production in the field of lexicography during the three centuries of Jewish literature from 1500 to 1800 may be seen in the following chronological lists of works issued during this period, which are short and served chiefly practical purposes. These, as well as the following lists, have been made with the help of Steinschneider's "Bibliographisches Handbuch" (compare the corrections and additions by Steinschneider and Porges in "Centralblatt für Bibliothekswesen," xiii., xv.):

Anshel, מרכבת המשנה, Cracow, 1534; reprinted under the title "Sefer Anshel," Cracow, 1584.
חשק שלמה, "Libro de Ladinos de los Verbios Caros di Toda la Mikra," Venice, 1588 and 1617.
דבר טוב, Hebr.-Germ.-Italian alphabetical glossary, Cracow, 1590.
David b. Abraham Modena, דבר טוב, Hebrew-Italian glossary, Venice, 1596 and 1606.
Judah Leon di Modena, גלות יהודה, "Novo Dittionario-Hebr. e Ital." Venice, 1612; Padua, 1640.
Solomon b. David Oliveyra, עץ חיים, Hebrew-Portuguese lexicon, Amsterdam, 1682; אילן שענפיו מרובין, Portuguese-Hebrew vocabulary, Amsterdam, 1683.
Judah b. Ẓebi Hirsch, אהלי יהודה (dealing especially with proper names), Jessnitz, 1719; גזע יהודה, "Compend. Concordanz," Offenbach, 1732.
Eleazar Soesman, מהר ישראל: part 1, grammar; part 2, Dutch-Hebrew dictionary; part 3, Hebrew-Dutch dictionary, Amsterdam, 1741; "Nomenclator op Hebr. en Nederd. Naamwoordenboek," *ib.* 1744.
Judah b. Joel Minden, מלים לאלוה, Hebrew lexicon, chiefly following Ḳimḥi, with High-German notes, Berlin, 1759-60.
Abraham b. Menahem Schwab, מלין יושר, Hebrew-German lexicon to the same author's דברי יושר, Amsterdam, 1767.
Phoebus b. Aryeh, מדרש מלים, Hebrew-German lexicon, Dyhernfurth, 1773.
Jacob Rodriguez Moreira, קהלת יעקב, "Vocabulary of Words in the Hebrew Language . . . . Done into English and Spanish," London, 1773.
Isaac b. Moses Satanow, שפת אמת, Hebrew-German lexicon, Berlin, 1787; Prague, 1804.
David Levi, "Lingua Sacra," in three parts, grammar and Hebrew-English and English-Hebrew lexicons, London, 1785-89, 1803.

The following lexicographic works to the Talmud must be added:

Anonymous, ערוך הקצר, Constantinople, 1511; Cracow, 1591; Prague, 1707.
David b. Isaac de Pomis, צמח דוד, "Lexicon Hebr. et Chald. Linguæ, Lat. et Ital. Expositum," Venice, 1587.
Menahem Lonsano, מעריך, explanations of difficult and foreign words in the Talmud (in the שתי ידות), Venice, 1618.
Benjamin Mussaphia, מוסף הערוך, additions to the 'Aruk in the Amsterdam ed. of 1655.
David Cohen b. Isaac de Lara, עיר דוד, "De Convenientia Vocabulorum Rabbinicorum cum Græcis et Quibusdam Aliis Linguis," Amsterdam, 1638; כתר כהונה, "De Convenientia Vocabulorum Talmudicorum et Rabbinicorum," etc., Hamburg, 1668.
Benjamin b. David, שערי בנימין, Hebrew-rabbinical lexicon, Zolkiev, 1752.
Benjamin b. Isaac Levi Leitmeritz, אמרות טהרות, an alphabetical glossary to the Zohar, Lublin, 1645.

During the same period (1500-1800) the need of lexical aids felt by Christians studying Hebrew called forth a large number of lexicons, the list of which is as follows:

Johannes Reuchlin, "Rudimenta Linguæ Hebraicæ una cum Lexico," Pforzheim, 1506; Basel, 1537.
Alfonsus Zamorensis (ex-Judæus), "Vocabularium Hebr. et Chald. V. T." (in vol. vi. of Complutensian Polyglot, 1515).

Christian Lexicographers.

Theodoricus Martinus (Dirck Martens), "Dictionarium Hebraicum," Louvain, *c.* 1520.
Sebastian Münster, "Dictionarium Hebraicum," Basel, 1523, 1525, 1535, 1539, 1548, 1564.
Sanctus (Xantes) Pagninus, "Thesaurus Linguæ Sanctæ," Leyden, 1529; ed. Rob. Stephanus, Paris, 1548; Leyden, 1575, 1577; Geneva, 1614.
Sebastian Münster, "Dictionarium Trilingue" (Latin, Greek, Hebrew), Basel, 1530, 1535, 1543, 1562.
Ant. Reuchlin, "Lexicon Hebr. Linguæ," Basel, 1556, 1569.
Jo. Förster (Forster, Vorstheimer), "Dictionarium Hebr. Novum," Basel, 1557, 1564.
Jo. Avenarius (Habermann), "Liber Radicum, seu Lexicon Hebr." Wittenberg, 1568, 1589.
Sanctus Pagninus, "Epitome Thesauri Linguæ Sacræ," Antwerp, 1570, 1572, 1578, 1588, 1599, 1609, 1616, 1670.
Ambrosius Calepinus, "Dictionarium Septem Linguarum," Geneva, 1578; Basel, 1584; "Dict. Undecim Lingu." Basel, 1590, 1598, 1605, 1616.
El. Hutter, "Cubus Alphabeticus Sanctæ Hebraicæ Linguæ," Hamburg, 1586, 1588, 1603.
Marcus Marinus, "Arca Noe, sive Thesaurus Linguæ Sanctæ Novus," Venice, 1593.
Johann Buxtorf the Elder, "Lexicon Hebr.-Chald." Basel, 1607, 1615, 1621, 1631, 1645, 1646, 1654, 1655, 1663, 1667, 1676, 1689, 1698, 1710, 1735; "Manuale Hebr.-Chald." Basel, 1612, 1619, 1630, 1631, 1634, 1658.
Valentine Schindler, "Lexicon Pentaglotton, Hebr., Chald., Syr., Talmudico-Rabbin., et Arab." Frankfort-on-the-Main, 1612, 1649, 1653, 1695.
Jos. Abudacnus (Barbatus), "Lexicon Hebr." Louvain, 1615.
Marius de Calasius, "Dictionarium Hebr." Rome, 1617.
Joh. Meelführer, "Manuale Lexici Hebr." Leipsic, 1617, 1657.
Chr. Helvicus, "Lexicon Hebr. Didacticum," Giessen, 1620.
Sixtus ab Amama, Hebrew lexicon (Dutch), Franeker, 1628.
Daniel Schwenterus, "Manipulus Linguæ Sanctæ, sive Lex. Hebr. ad Formam Cubi Hutteriani," Nuremberg, 1628, 1638; Leipsic, 1668.
Philip Aquinas (ex-Jud.), מעריך המערכת, "Dictionarium Absolutissimum Hebr., Chald., et Talm.-Rabbin." Paris, 1629.
Gregorius Francus (Franke), "Lexicon Sacrum," Hanover, 1634.
William Alabaster, "Spiraculum Tubarum . . . seu Schindleri Lexicon Pentaglottum in Compend. Redact." London, 1635.
Edward Leigh, "Critica Sacra," in two parts: (i.) observations on all the radical or primitive Hebrew words in the O. T. in alphabetical order, London, 1639, 1650, 1662; Latin, Amsterdam, 1678, 1688, 1696, 1706; French, *ib.* 1712.
Jo. Plantavitius, "Thesaurus Synonymicus Hebr.-Chald.-Rabbin." Lodève, 1644-45.
Sebastian Curtius, "Radices Linguæ S. Hebr." Geismar, 1645, 1648, 1649; Amsterdam, 1652.
William Robertson, "The Second Gate. . . a Compendious Hebr. Lexicon or Dictionary," London, 1654.
H. Hottinger, "Etymologicum Orientale, s. Lexicon Harmonicum Heptaglotton," Frankfort, 1661 (also "Talmud.-Rabbin.").

Jo. Chr. Fried. Schulz, "Hebr.-Deutsches Wörterbuch über das A. T."

To this list must be added the following lexicons on the language of the Talmud, written by Christians:

Sebastian Münster, "Dictionarium Chaldaicum, non tam ad Chald. Interpretes, quam Rabbinorum Intelligenda Commentaria Necessarium," Basel, 1527.
Johann Buxtorf the Elder, "Lexicon Chaldaicum Talmudicum," ed. Jo. Buxtorfius the Younger," Basel, 1639.
Joh. Henr. Otho, "Lex. Rabbin.-Philologicum," Geneva, 1675.
Ant. Zanolini, "Lexicon Chaldaico-Rabbinicum," Padua, 1747.
Bon. Girandeau, S. J., "Dictionarium Hebraicum, Chaldaicum, et Rabbinicum," Paris, 1778.

The Most Popular Dictionaries.

Among the seventy or more lexicons above enumerated that were called forth by the study of Hebrew among the Christian theologians down to the end of the eighteenth century, the following may be noted for the number of editions through which they have passed: the works of Sebastian Münster, S. Pagninus, Buxtorf, Coccejus, Reineccius, Simonis. Most of the lexicons deal also with the Aramaic portions of the Bible, the designation "Chaldaic" for this language having become current since Sebastian Münster's time, though even Dunash ibn Labraṭ calls the Aramaic לשון כשדי in his polemic against Saadia, No. 6. The comparison of Hebrew with its kindred languages, already indicated by William Postellus in the first half of the sixteenth century, and by Guichard, "L'Harmonie Etymologique des Langues Hébr.," etc., Paris, 1660, was first carried out lexically by Schindler, then by Hottinger, and more completely and on a more solid basis by Castelli. But it remained for Albert Schultens (died 1750), an eminent member of the distinguished Dutch school, to place the comparison of Hebrew with the Arabic on a more solid scientific foundation, the achievements of the Jewish philologists of the preceding centuries having been forgotten. Schultens himself compiled no dictionary; but his contributions to Hebrew lexicography are found in many treatises and commentaries. Attempts to translate the Hebrew into the vernacular instead of into Latin were first made in Dutch, then in English, Flemish, German, and French.

Gesenius.

The rapid development of philology in all its branches during the first decades of the nineteenth century also extended to Hebrew, which gradually occupied a position independent of theology. The labors of Wilhelm Gesenius marked a new epoch in grammar and lexicography. His lexicon, in the enlarged and modified later editions, has remained down to the present day the lexical manual most in demand for the study of the Bible—a proof of its excellence that was apparent even in the earlier editions. In its first form (Leipsic, 1810, 1812) it bore the title "Hebr.-Deutsches Handwörterbuch über die Schriften des A. T." This book became the basis for the large "Thesaurus Philolog.-Criticus," 1829–42, the last fasciculi of which were completed after Gesenius' death (in 1842) by Rödiger, 1853–1858. An abbreviated edition of the "Handwörterbuch" was issued under the title "Neues Hebr.-Deutsches Handwörterbuch," 1815; and this became the basis for the later editions, which, beginning with the second thoroughly revised edition (1825), bore the title "Hebr. und Chaldäisches Wörterbuch." Gesenius himself issued the third and fourth editions, 1828, 1834. The editors of the later editions were: Dietrich, 1857, 1863, 1868; Mühlau and Volck, 1883, 1886, 1890; F. Buhl, 1895, 1899. Gesenius also issued the third edition in Latin, under the title "Lexicon Manuale," Leipsic, 1832–33. An English translation of the first "Handwörterbuch" of 1810 was issued by Christ. Leo, Cambridge, 1825–28; the new "Handwörterbuch" of 1815 was issued in English by J. W. Gibbs, Andover, 1824; other editions, London, 1827, 1832; the "Lexicon Manuale" was translated into English by Edw. Robinson, Boston, 1836 (last ed., 1854); and by Tregellas, 1859. This is the basis of the Oxford lexicon, appearing since 1892 under the title of "A Hebrew and English Lexicon of the Old Testament," edited by Francis Brown, with the cooperation of S. R. Driver and Charles A. Briggs. The *Λεξικον Εβρ-Νεοελλην. της Παλαιας Διαδηκης*, Malta, 1842, is also based on Gesenius' work, of which a Swedish translation appeared at Upsala in 1829–32.

Other lexicons appeared in the course of the nineteenth century, of which the following is a list, Steinschneider's "Handbuch" furnishing the material down to 1859:

Th. Imm. Dindorf, "Novum Lex. Linguæ Hebr. et Chald." Leipsic, 1801, 1804.
Samuel Pike, "A Comparative Hebrew Lex." Glasgow, 1802.
Evr. Scheidius, "Lex. Hebr. et Chald. Man." Utrecht, 1805, 1810.
Aug. Fried. Pfeiffer, "Man. Bibl. Hebr. et Chald." Erlangen, 1809.
Chr. Gottlieb Elwert, "Deutsch-Hebr. Wörterbuch," Reutlingen, 1822.
E. F. C. Rosenmüller, "Vocabularium V. T. Hebr. et Chald." Halle, 1822, 1827.
James Andrew, "Hebrew Dict. and Grammar," London, 1823.

Jo. Fried. Schroeder, "Deutsch-Hebr. Wörterb." Leipsic, 1823.

Franc. Fontanella, "Vocabulario Ebreo-Ital. et Ital.-Ebreo," Venice, 1824.

L'Abbé Giraud, "Vocabulaire Hébr.-Français," Wilna, 1825.

J. B. Glaire, "Lex. Manuale Hebr. et Chald." Paris, 1830, 1843.

Joh. Ev. Stadler, "Lex. Manuale Hebr.-Latin," Munich, 1831.

Em. Fried. Leopold, "Lex. Hebr. et Chald." Leipsic, 1832.

J. H. L. Biesenthal, "Hebr. und Chald. Schulwörterbuch," Berlin, 1835–37.

W. L. Roy, "A Complete Hebrew and English Dictionary," New York, 1838.

Samuel Lee, "A Lex. Hebr., Chald., and English," London, 1840, 1844.

William Wallace Duncan, "A New Hebrew-English and English-Hebrew Lex." *ib.* 1841.

Ernst Meier, "Hebr. Wurzelwörterbuch," Mannheim, 1845.

Fr. Nork, "Vollständiges Hebr.-Chald.-Rabbinisches Wörterbuch," Grimma, 1842.

Fred. Bialloblotzky, "Lexicon Radicum Hebr." London, 1843.

William Osborn, "A New Hebrew-English Lexicon," *ib.* 1845.

B. Davidson, "The Analytical Hebrew and Chaldee Lexicon," *ib.* 1848.

Fr. J. V. D. Maurer, "Kurzgefasstes Hebr. und Chald. Handwörterbuch," Stuttgart, 1851.

G. Stier, "Hebräisches Vocabularium," Leipsic, 1857, 1859.

Benj. Davies, "Hebrew Lexicon," 2d ed., London, 1876.

A new arrangement of lexical matter is found in Carl Siegfried and B. Stade's "Hebräisches Wörterbuch zum Alten Testament," Leipsic, 1893, in which the comparison of the kindred languages is excluded, the etymology made secondary, and the introduction of so-called primary meanings avoided, while the vocabulary and idioms are given as completely as possible. Friedrich Delitzsch advocates the free use of Assyrian in his work, "Prolegomena eines Neuen Hebr.-Aram. Wörterbuches zum A. T." Leipsic, 1886 (see Nöldeke's exhaustive discussion in "Z. D. M. G." xl. 718–743).

Jewish Lexicographers of the Nineteenth Century.

The new stimulus given to the study of the Bible among the European Jews by Moses Mendelssohn and his followers was evident also in the demands for lexical aids to that study. The Hebrew lexicons written by Jews in the last decades of the eighteenth century have already been mentioned. J. Ben-Ze'eb's "Oẓar ha-Shorashim" (Treasury of Roots), Vienna, 1807, was very popular down to the second half of the century, and did good work in purifying the language in eastern Europe. The second edition appeared in 1816; the third, edited by Letteris, in 1839–1844; the fourth, in 1862–64. Jewish learning, which was developed to an unexpected degree by the generation of Jewish scholars following Mendelssohn's school, brought to light especially the works of classical scholars dealing with Hebrew philology and Bible exegesis, advancing thereby also modern Hebrew philology. The Hebrew lexicons of the past, edited or printed for the first time, have been mentioned above. Julius Fürst was most active as lexicographer, publishing a new edition of the Bible concordance. In 1842 he issued a Hebrew-Chaldee school lexicon; and in 1869 a Hebrew pocket-dictionary to the Old Testament. His "Hebräisch und Chaldäisches Handwörterbuch über das A. T." Leipsic, 1857–61 (2d ed., 1863; 3d ed., by Ryssel, 1876), "marked a great advance, evincing an assiduous and scholarly use of the many products of Old Testament exegesis" (Diestel). The work was translated into English by Davidson, the fifth edition appearing in 1885.

Following is a list of other Hebrew lexicons to the Bible which were written by Jews:

Hananiah Coen, מענה הלשון, "Vocabulario Compendioso Ebraico-Italiano," Reggio, 1811–12.

W. Heinemann, ראשית הלמוד, "Vocabulary Hebrew and English," London, 1823.

Van Embden, "Prospectus eines Hebr.-Deutschen und Deutsch-Hebr. Wörterbuches," Hamburg, 1823.

Judah Laz. Kron, דרך סלילה, "Hebr.-Deutsches Wörterbuch," Wilna, 1826.

D. Luzzatto, "Dizionario Compendiato Ebraico-Chald., Latino et Italiano," part i., Florence, 1827.

Marchand d'Ennery, "Hebr.-Franz. Wörterbuch," 1827.

Jos. Hirschfeld, שמות הנרדפים, "Neues Synonymisches Handwörterbuch zur Beförderung der Hebräischen Sprache," Frankfort-on-the-Oder, 1818, 1830.

Moses Lemans and Y. J. Mulder, "Hebr.-Nederduitsch Handwoordenboek," Amsterdam, 1829–31.

Abraham Buchner, אוצר לשון הקדש, grammar and lex., Warsaw, 1830.

M. I. Benlevi, מורה שרש העבר, "Tabellarisches Hebr.-Deutsches Wörterbuch," Hanover, 1833.

Selig Newmann, "Hebrew and English Lexicon," London, 1834; "English and Hebrew Lexicon," *ib.* 1832.

Michael Josephs, מדרש מלים, "An English and Hebrew Lexicon," *ib.* 1834.

Simḥa b. Ephraim, מי מלא, "Hebr. Lx. nach Neuer Methode," part i., Warsaw, 1839.

Joseph Johlsohn, ערך מלים, "Biblisch-Hebr. Wörterbuch," Frankfort-on-the-Main, 1840.

Isaac Nordheimer, "A Complete Hebrew and Chaldean Concordance to the O. T." part i., New York, 1842.

S. E. Heigmans, דברי קדש, "Hebr. en Nederduitsch Woordenboekje," Amsterdam, 1845.

Abigail Lindo, "A Hebrew-English and English-Hebrew Dictionary," London, 1846.

Emanuel Recanati, "Dizionario Ebr.-Chald. ed. Italiano," Verona, 1854–56.

W. G. Schauffler, אוצר דברי לשון הקדש, "Diccionario della Lengua Santa" (Ladino), Constantinople, 1855.

A. Luzzatto, לחם לפי הטף, "Vocabulario Italiano Hebr." Verona, 1856.

E. Bardach, מעריך המערכת, ed. Letteris, Vienna, 1868.

David Cassel, "Hebr.-Deutsches Wörterbuch," Berlin, 1871, 1885, 1886, 1889, 1898.

M. E. Stern, אוצר שפת הקדש, Vienna, 1871.

Ch. Pollak, "Héber-Magyar Teljes Szótár," Budapest, 1881.

J. Steinberg, אוצר המלים, "Hebr.-Deutsch-Russisches Wörterbuch," Wilna, 1897.

Jewish Dictionaries of Talmud.

Jewish learning of the nineteenth century has produced important works in the field of Talmudic lexicography, the most important of which are Jacob Levy's "Neuhebräisches und Chaldäisches Wörterbuch über die Talmudim und Midraschim," with additions by H. L. Fleischer, Leipsic, 1876–89; and his "Chaldäisches Wörterbuch über die Targumim," *ib.* 1886. M. Jastrow's work, "Dictionary of the Targumim, the Talmud Babli and Yerushalmi, and the Midrashic Literature," London and New York, 1886 *et seq.*, the concluding portion of which will shortly appear, is also of independent value. Alexander Kohut's edition of the 'Aruk, mentioned above, assumed the shape of an independent lexicon by reason of its size and wealth of material. J. M. Landau's edition of the 'Aruk, Prague, 1819–24, also containing many additions, was used for a long time. The foreign words, more especially of the Talmud, are explained in S. and M. Bondi's אור אסתר, Dessau, 1812; in J. B. Schönhak's "Ha-Mashbir," Warsaw, 1858; by A. Brüll in "Fremdsprachliche Redensarten in Talm. und Midr.," Leipsic, 1869; and in J. Fürst's "Glossarium Græco-Hebraicum, oder der Griechische Wörterschatz der Jüdischen Midraschwerke," Strasburg,

1890. An important supplement to the Talmudic lexicons, including the whole material, is S. Krauss's "Griechische und Lateinische Lehnwörter im Talmud, Midrasch, und Targum," with notes by Immanuel Löw, Berlin, 1898, 1899. Among other works on Talmudic lexicography, the following may be mentioned on account of their lexical form:

Isaiah Berlin, הפלאה שבערכין, glossary to the 'Aruk: i., Breslau, 1830; ii., Vienna, 1859.
M. Lattes, additions to Levy's lexicon, Milan, 1878, 1881; "Miscellanea Postuma," 1884, 1885.
J. H. Dessauer, לשון רבנן, short lexicons to the Talmud, Erlangen, 1839.
M. E. Stern, אוצר המלין, Vienna, 1863.
G. H. Dalman, ערוך החדש, "Aram.-Neuhebr. Wörterbuch zu Targum, Talmud, und Midrasch," Frankfort-on-the-Main, 1897, 1901, a very useful work.

No special lexical treatment of the Neo-Hebrew of the Midrashim has yet been undertaken, though a beginning is found in Hananiah Coen's שפת אמת, Reggio, 1822, and Geiger's glossary to his "Lehr- und Lesebuch der Sprache der Mischna," Breslau, 1845. Mention should also be made of the work of the non-Jewish scholar A. Th. Hartmann, "Thesaurus Linguæ Hebr. e Mischna Augendus," Rostock, 1825, 1826. David Löwy's lexicon, לשון חכמים, Prague, 1845, 1847, containing Hebrew words and idioms found in the Talmud, is carried only as far as the root גור. W. Bacher's "Die Aelteste Terminologie der Jüdischen Schriftauslegung. Ein Wörterbuch der Bibelexegetischen Kunstsprache der Tannaiten," Leipsic, 1899, is confined to one special field.

There is as yet no lexicon of the later form of Hebrew in post-Talmudic times, when the vocabulary was strongly influenced and enriched by the various sciences treated in the Hebrew language and by the translations from the Arabic. Jac. Goldenthal issued his "Grundzüge und Beiträge zu Einem Sprachvergleichenden Rabbinisch-Philologischen Wörterbuch," in the "Abhandlungen der Kais. Akademie der Wissenschaften," Vienna, 1849. Zunz, who included very instructive lists of words in his works on synagogal poetry, expressed in 1856 a "wish for a lexicon of the Hebrew language" (in "Z. D. M. G." x. 501-512; "Gesammelte Schriften," iii. 14-30); but this wish has not yet been fulfilled. See also Steinschneider, "Fremdsprachliche Elemente im Neuhebräischen," Prague, 1845.

Modern Hebrew.

In the last few decades the vocabulary of the Hebrew language, which is used in Russia and Poland as a literary language, and in certain regions of Palestine and the East as vernacular, has been materially increased, in many cases at the sacrifice of the models set by Biblical purity and historic tradition. This is due to the fact that it is used in journals and scientific works, so that modern objects and ideas must be expressed in the ancient language. The unscientific arbitrariness thus arising would be checked by a dictionary including the different phases of the development of the Hebrew language, in which the Hebrew of the Bible, of the Mishnah, of the medieval scientific and poetic literature, and, finally, the modern revived Hebrew should each be treated, and those words definitely adopted and standing the test of scientific investigation be lexically determined. The publication of two such lexicons has recently been undertaken, partly with scientific ends in view, partly to answer the practical needs of those writing in Hebrew; namely, S. I. Fuenn's "Ha-Oẓar," Warsaw (as far as the letter ח), and Ben Judah's "Ha-Millon," Jerusalem (only two fasciculi so far).

G. W. B.

DIDACHE, or **The Teaching of the Twelve Apostles** (*Διδαχὴ τῶν Δώδεκα Ἀποστόλων*): A manual of instruction for proselytes, adopted from the Synagogue by early Christianity, and transformed by alteration and amplification into a Church manual. Discovered among a collection of ancient Christian manuscripts in Constantinople by Bryennios in 1873, and published by him in 1883, it aroused great interest among scholars. The book, mentioned by Eusebius ("Hist. Eccl." iii. 25) and Athanasius ("Festal Letters," 39) in the fourth century, had apparently been lost since the ninth century. The most acceptable theory among the many proposed on the character and composition of the "Didache" is that proposed by Charles Taylor in 1886, and accepted in 1895 by A. Harnack (who in 1884 had most vigorously maintained its Christian origin)—that the first part of the "Didache," the teaching concerning the "Two Ways" ("Didache," ch. i.-vi.), was originally a manual of instruction used for the initiation of proselytes in the Synagogue, and was converted later into a Christian manual and ascribed to Jesus and the Apostles. To it were added rules concerning baptism, fasting, and prayer, the benedictions over the wine and the bread and after the communion meal, and regulations regarding the Christian community (ch. vii.-xvi.). The Jewish student is concerned chiefly with the first part, the title and contents of which are discussed here.

Title of the Book.

The composite character of the "Didache" is shown by the double title or heading. The first words, "Teaching of the Twelve Apostles," form the general title, and therefore need not now be considered. But of the second heading, which refers to the original book, ch. i.-vi., only the words "Teaching of the Lord to the Gentiles" (*Διδαχὴ Κυρίου τοῖς Ἔθνεσιν*) are genuinely Jewish; the words "through the Twelve Apostles," which assume that the word "Lord" refers to Jesus, are a Christian interpolation. The book known to Christians as the "Teaching of the Two Ways" corresponded probably with the "Hilkot Gerim" (Rules Regarding Proselytes) referred to in Ruth R. i. 7 and 16 as having been studied by Ruth under the direction of Naomi, the words דרך ("way") and הלך ("walk") in both verses being taken as indications that the necessary instruction in the "Two Ways" had been duly given to Ruth (compare Baraita Yeb. 47a, and Massek. Gerim, the abrupt beginning of which gives evidence of the existence of other rules concerning the admission of proselytes during the Temple time).

Contents of the "Didache."

The whole teaching is summarized in the first two verses (ch. i. 1-2): "There are two ways, one of life and one of death, and wide is the difference between. The way of life is this: First, thou shalt love God thy Maker [after Deut. vi. 5]; second, thou shalt love thy neighbor as thyself [after Lev. xix. 18]. Now the teaching of these two words is this: 'Whatsoever thou wouldst not have done unto thee, neither do thou to another.'"

Here is a great lacuna, nothing being said about what love of God implies; and what follows is only very loosely connected with the preceding verses. Whether taken from an old Essene document (see Hippolytus, "Refutatio Hæresium," ix. 23 [18]) or from some Christian collection of "Sayings" older than Matt. v. 39-48 and Luke vi. 27-39, verses 3-4 are certainly out of place; they interrupt the order. So do verses 4-5, in which "the commandment of charity" is treated from the Jewish point of view, though they have parallels in Matt. v. 26; Acts xx. 35.

Ch. ii. 1 begins as if the first part of the Decalogue, comprising the law of the love of God, had been treated in the preceding chapter: "And the second commandment of the Teaching [that is, love of our fellow man] is: Thou shalt not kill" (Ex. xx. 13; see verse 2).

2: "Thou shalt not commit adultery" (Ex. xx. 14). (This includes: "Thou shalt not commit sodomy nor fornication.") "Thou shalt not steal" (Ex. xx. 15). . . . "Thou shalt not use witchcraft nor practise sorcery" (Ex. xxii. 18; Lev. xix. 26). (This belongs obviously to the eliminated first part comprising the duties toward God.) "Thou shalt not procure abortion, nor shalt thou kill the new-born child" (compare Wisdom xii. 5). (This is the amplification of Ex. xx. 13, and belongs to verse 1.) "Thou shalt not covet thy neighbor's goods" (Ex. xx. 17; see verse 6).

3-5: "Thou shalt not forswear thyself." . . . (This again belongs to the eliminated first part.) "Thou shalt not bear false witness" (Ex. xx. 16). "Thou shalt not speak evil nor bear malice. Thou shalt not be doubled-minded nor double-tongued, for duplicity of tongue is a snare of death. Thy speech shall not be false nor vain, but filled with deed."

6: "Thou shalt not be covetous nor rapacious [amplification of Ex. xx. 17], nor a hyprocrite, nor malignant, nor haughty. Thou shalt not take evil counsel against thy neighbor" (amplification of Ex. xx. 16).

7: "Thou shalt not hate any one; but some thou shalt rebuke [Lev. xix. 17], and for some thou shalt pray [compare Tosef., B. Ḳ. ix. 29 with reference to Job xlii. 8; Gen. xx. 17; see Matt. v. 44], and some thou shalt love above thine own soul" (compare "Epistle of Barnabas," xix. 11, and another "Didache" version, Harnack and Gebhard, "Texte u. Untersuchungen," xiii. i. 7 *et seq.*). (This is the interpretation of Lev. xix. 18; compare above, i. 3.)

Ch. iii. 1 dwells on lighter sins, and begins by laying down the following principle: "My child, flee from every evil and from whatsoever is similar to it." This well-known maxim, לְעוֹלם יהא אדם בורח מן הכיעור ומן הדומה לכיעור, is ascribed in Tosef., Hul. ii. 24 to R. Eliezer of the second Christian century, and in Ab. R. N. ii. (ed. Schechter, pp. 8, 9) to Job, and is explained: "Avoid light sins in order to escape grosser sins" (compare also Ḥul. 44b; Derek Ereẓ Zuṭa, viii.; I Thess. v. 22; and Bacher, "Die Agada der Tannaiten," i. 113, 281). In this sense are the commandments of the Decalogue further amplified:

2 warns against anger and contention as leading to murder.

3, against lust, lascivious speeches and looks as leading to fornication and adultery.

4, against divination, astrology, and other heathen practises as leading to idolatry.

5, against lying, avarice, and vanity as leading to theft.

6-9, against an irreverential and presumptuous attitude toward God as leading to blasphemy.

10, enjoining the disciple to accept every seemingly evil happening as good because coming from God.

Ch. iv. 1-13 refers again to the duty toward God, stating that the honor of God includes the study of His Word; the honor of the teacher, the support of the students and practisers of the Law; the honor of the father, the support of the household; and after having positively enjoined hatred of hypocrisy and of whatever is evil (see Ab. R. N. xvi. [ed. Schechter, p. 64]), it declares in a genuinely Jewish spirit that "the commandments of the Lord should all be kept; none to be added, and none to be taken away" (compare Deut. iv. 2, xiii. 1 [xii. 32]).

Ch. v. recapitulates the prohibitory laws under the heading "This is the Way of Death"; the enumeration, however, shows lack of order.

Ch. vi. contains a warning against false teachers, and addressing the proselyte in verse 2, it says: "If thou art able to bear the whole yoke of the Lord, thou wilt be perfect; if not, do what thou canst." This is obviously an allusion to the two classes of proselytes Judaism recognized: the full proselyte, who accepted all the laws of the Torah, including circumcision, Sabbath, and the dietary laws; and the semi-proselyte, who accepted only the Noachian laws as binding. For the latter verse 3 contains the warning not to eat meat which has been offered to idols, which is forbidden also to the Noachidæ.

As a matter of course, this Jewish manual could not be used in its entirety by the Church from the moment when she deviated from Jewish practises and views. Just as the Shema' Yisrael in the saying of Jesus (Mark xii. 29) was dropped by the other Gospel writers, so was the whole first part of the "Didache," dealing with monotheism, tampered with by the Christian editor. The whole book has fallen into disorder, and much of it is misunderstood and misinterpreted by Christian scholars, who judge it only from the point of view of the Church.

The "Two Ways."

The fundamental ideas of the "Didache" are indisputably Jewish. The teaching of the "Two Ways," the one of life and the other of death, runs as a leading thought throughout Jewish literature. Just as Moses set before the people of Israel "life and good, death and evil" (Deut. xxx. 15-19; Jer. xxi. 8), so is the choice between the two roads to be made ever anew (Ps. i. 6; Prov. ii. 12-20, vi. 23; Ecclus. [Sirach] xv. 17; Slavonic Enoch, xxx. 15; IV Ezra iii. 7, iv. 4; Pirḳe R. El. xv.; Gen. R. viii., ix., xxi.; Targum to Gen. iii. 22; Enoch, xciv. 2 *et seq.*; Baruch iv. 2; Apoc. Baruch, xlii. 5 *et seq.*, lxxxv. 13; Book of Jubilees, xxii. 17-29; Testaments of the Twelve Patriarchs, Asher, 1; Abot R. N. xv.; Ber. 28b; Sifre, Debarim, 43, 54, based on דרך ["the way"]; Deut. xi. 28; Gen. R. lxx. to Gen. xxviii. 20 [דרך = see Targum]; Ex. R. xxx.; Deut. R. iv.; Midrash, Tehillim to Ps. ii. 3, with reference to דרך; Isa. ii. 3; Ps. xxvi. 5, xxxix. 2, xl. 2, lxviii. 21, cxix. 9, cxlvi. 9; Midrash Prov. i. 15 [דרך]. This twofold way was especially emphasized in the preaching to the Gentiles, who were to be won over to the right way (Sibyllines, Prooemium 24; iii. 11, 233, 721; viii. 399). And a faint reminiscence of the twofold way appears to be preserved in the later Halakah insisting that the applicant for admission into Judaism be informed of the death-penalties attached to certain transgressions (see Yeb. 47a, b; compare Ruth R. i. 17 with reference to the Biblical words "Where thou diest will I die"). Another leading idea of the "Didache" is the twofold duty: love of God and love of man; both being prefaced by the word ואהבת = "And thou shalt love" (Deut. vi. 4; Lev. xix. 18; see Sifre, Debarim, 32; Ab. R. N. xvi. [ed. Schechter, p. 64]; Gen. R. xxiv, end). Upon God as "the Maker of man" rests the claim of the fellow man to love (Job xxxi. 15).

It is noteworthy that the "golden rule" is given in the "Didache" according to the traditional Jewish interpretation—negatively: מה דעלך סני לחברך לא תעבד (see Targ. to Lev. xix. 18; Tobit iv. 15; Philo in Eusebius, "Præparatio Evangelica," viii. 7; "Apostolic Constitutions," i. 1; see DIDASCALIA; compare Taylor, "Sayings of the Jewish Fathers," 2d ed., p. 142), exactly as Hillel and Akiba taught it when instructing the proselyte regarding the chief commandment of the Law (Shab. 31b; Ab. R. N., B, xxvi. [ed. Schechter, p. 53]). On the other hand, the New Testament (Matt. vii. 12; Luke vi. 31) has it in a positive form (compare Matt. xxii. 35-40 and Mark xii. 29-31, which discussion is based on the "Didache," not vice versa).

Based on the Decalogue.

A third characteristic of the teaching is the use of the Decalogue as the exponent of ethics in its twofold aspect: duty to God, and duty to man (compare Taylor, *l.c.* pp. 216 *et seq.*). Evidently the original "Didache" contained a systematic exposition of the Ten Commandments, whereas the "Didache" in its present shape has preserved only fragments, and these in great disorder. Thus, for instance, iv. 9-11, and possibly iv. 1, 2, dwelling on the relations of the members of the household to one another, refers to the fifth commandment, nor is it likely that the Sabbath commandment was omitted (compare xiv. 1, where the Christian Sabbath is referred to). The Decalogue and the Shema', as fundamental elements of Judaism, were recited every morning in the Temple (Tamid v. 1), and only because the early Judæo-Christians (Minim; see Irenæus, "Adversus Hæreses," iv. 16) claimed divine revelation exclusively for the Ten Commandments, discarding the other Mosaic laws as temporary enactments, was the recital of the DECALOGUE in the daily morning liturgy afterward abolished (Yer. Ber. i. 3c). Philo still regarded the Decalogue as fundamental ("De Decem Oraculis"; compare Pes. R. xxi.-xxiv.; Num. R. xiii. 15). The later Halakah insists that the proselyte should be acquainted instead with the 613 commandments of the Law (Yeb. 47b), whereas the Christian Apostles laid all the greater stress on the second part of the Decalogue (Rom. xiii. 9).

A fourth distinguishing feature of the "Didache" is the accentuation of the lighter sins and lighter duties as leading to graver ones: "Flee from every evil and from whatsoever is similar to it" (iii. 1). This is not a proof of "the superiority of the Gospel ethics over the law" (Schaff, note *ad loc.*), but the very essence of the Pharisaic interpretation of the Law. The same idea is expressed in Ab. R. N. ii. (ed. Schechter, pp. 8, 9, 12; comp. Ab. i. 1): "Make a fence around the Law"; (Schaff, note *ad loc.*), and in the adage "Go around the vineyard, they say to the Nazarite, but dare not to enter it" (Shab. 13a). Upon this principle the whole rabbinical code of ethics is built up, of which the Sermon on the Mount is only the echo (see Ab. R. N. *l.c.*, and ETHICS; compare Taylor, "The Teaching of the Twelve Apostles," pp. 24 *et seq.*). The later Halakah also sets down the rule that the proselyte has to be made acquainted with some of the lighter and some of the graver commandments—מקצת מצות קלות ומקצת מצות חמורות (Yeb. 47a).

It must accordingly have been simply in imitation of the Jewish example which was offered by the "Didache" that the epistles of Paul, of Peter, and of John were made to close with moral exhortations, all of which point to a common source or archetype. Familiarity with the "Two Ways" of the "Didache" furthermore accounts for the term "way" or "way of God" given to the Christian religion as preached to Gentiles (Acts ix. 2; xviii. 25, 26; xix. 9, 23; xxii. 4; xxiv. 14, 22); and the expression "I am the Way and the Life" (John xiv. 6); also "the way of truth" and "the right way" (II Peter ii. 2, 15). Finally, the "Didache," after adaptation to Christian use, circulated in different versions. It was attached to the "Epistle of Barnabas" (xviii.-xx.); it was worked into the form of "Sayings of the Twelve Apostles" (Κάνονες 'Εκκλησιαστικοὶ τῶν 'Αγίων 'Αποστόλων), and as such propagated in the various churches of the East. An older version is attached to the "Didascalia" as the beginning of the seventh book of the "Apostolic Constitutions." Whether the latter part was also worked out after a Jewish model, or whether the whole Jewish "Didache" did not originally also contain rules concerning baptism, prayer, and thanksgiving similar to those of the Church manual, is difficult to say.

Dependence upon Jewish Custom.

Much speaks in favor of this hypothesis: on the one hand, the antagonistic spirit which transferred the Hebrew Ma'amadot fasts from Monday and Thursday, and on the other hand, the expression "Take the first-fruit and give according to the commandment" (xiii. 5, 7). But the dependence upon Jewish custom is especially indicated by the following thanksgiving formulas:

(1) Over the cup: "We give thanks to Thee, our Father, for the holy wine of David Thy servant which Thou hast made known to us through Jesus Thy servant." This strange formula is the Jewish benediction over the wine, "Blessed be Thou who hast created the fruit of the vine" Christianized (compare Ps. lxxx. 15, Targum; cxvi. 13 refers to David at the banquet of the future life; Pes. 119b; John xv. 1; compare Taylor, *l.c.* pp. 69, 129). (2) Over the broken bread: "We give thanks to Thee, our Father, for the life and knowledge which Thou hast made known to us through Jesus Thy servant. As this broken bread, scattered upon the mountains and gathered together, became one, so let Thy Church be gathered together from the ends of the earth into Thy Kingdom!" (compare the benediction "Raḥem" according to Rab Naḥman, which contains a reference to Ps. cxlvii. 2; Ber. 49a). (3) Over the meal: "We thank Thee, O holy Father, for Thy holy name, which Thou hast caused to dwell [κατεσκήνωσας, reference to the Shekinah] in our hearts, and for the knowledge and faith and immortality which Thou hast made known to us through Jesus Thy servant. Thou, Almighty Lord, didst make all things for Thy name's sake; Thou gavest food and drink to men for enjoyment that they might give thanks to Thee, but to us Thou didst freely give spiritual food and drink and life eternal through Thy servant. . . . Remember, O Lord, Thy Church to deliver her from all evil and to perfect her in love of Thee, and gather her together from the four winds, sanctified for Thy Kingdom which Thou didst prepare for her. Let grace come and let this world pass away! Hosanna to the Son of David" (ix.-x. 6).

The original Jewish benediction over the meal was a thanksgiving for the food and for the Word of God, the Torah as the spiritual nurture, and a prayer for the restitution of the kingdom of David. The Church transformed the Logos into the incarnated son of God, while expressing the wish for His speedy return to the united congregation (the Church). It is the prayer of the Judæo-Christian community of the first century, and this casts light upon the whole Christianized "Didache." As to the relation of the "Didache" to Phokylides, see PHOKYLIDES; see also DIDASCALIA.

DIDASCALI. See CATECHUMENS, HOUSE OF.

DIDASCALIA (*Διδασκαλία* = "Instruction"): A Greek work, in eight books, containing regulations of Church life, better known under the name of "Apostolic Constitutions," the full title being "Constitutions of the Holy Apostles [composed] by Clemens, Bishop and Citizen of Rome—Catholic Didascalia." Claiming to have been written by the Apostles, the work proves on closer examination to be based, like the DIDACHE, upon an original Jewish work, transformed by extensive interpolations and slight alterations into a Christian document of great authority. There exists another version, bearing the name "Didascalia," in Syriac, Coptic, Ethiopic, Arabic, and (incomplete) in Latin, which, since the appearance of Lagarde's edition of the Syriac "Didascalia" in 1854, most modern scholars consider to be the original work. On the other hand, Bickell ("Gesch. des Kirchenrechts," 1843, pp. 148–177) has given convincing proofs that the "Apostolic Constitutions" is the original work, and the so-called "Didascalia" a mere condensation. In the latter the Jewish elements are to a large extent eliminated, and the Christian character is more pronounced.

Jewish Original.

Only the first six books of the "Apostolic Constitutions," which correspond with the "Didascalia"—the latter consists of twenty-six chapters and is not divided into books—form the original work; the last two, which contain, besides a remodeled version of the "Didache," many liturgical pieces of very ancient character and indisputably of Jewish origin, are later additions, but seem to have belonged in part to the older Jewish original. The work is of very great value to the student of Jewish and Church history, as it contains a large amount of haggadic and halakic material derived from unknown Jewish sources, and casts a flood of light upon Talmudic and New Testament literature. The original writer quotes the Scripture after the Septuagint version, and many apocryphal verses from unknown works; and, as will be shown farther on, he furnished to Paul and to other New Testament writers the source for many of their dicta. His style is fresh and vigorous, bearing striking resemblance to that of the "Didache." The Christian interpolator, on the other hand, is easily recognized by interruptions of the context, by ill-fitting New Testament references, and by occasional outbursts of Jew-hatred in glaring contrast to the Jewish spirit of the main work. The name "God" was frequently changed by copyists into "Christ," as was occasionally noticed by Lagarde; at times "Christ" is used for "Logos" (the Word).

The name "Didascalia" (given in the Preface and found in ii. 39, 55; vi. 14, 18; vii. 36) was borrowed from the Jewish original, the introductory sentence of which, greatly amplified in the "Apostolic Constitutions" and still more in the Syriac "Didascalia," seems to have read as follows:

> "The plantation of God and His elect vineyard, those who believe in His unerring worship and hope to partake of His kingdom, sharing in His power and in the communion of His Holy Spirit . . . harken to His holy 'Instruction.' Take care, ye children of God, to do all things in obedience to God and to be agreeable in all things to the Lord our God. For if any man follow unrighteousness and act contrarily to the will of God, such a one will be regarded by God as a lawless heathen [*ὡς παράνομον ἔθνος* = גוי רשע]."

Book I.: Dealing with the conduct of individuals, this book begins with a warning against the lighter transgressions (מצות קלות; see DIDACHE), *e.g.*, covetousness (Ex. xx. 17), as coming from the Evil One (Test. Patr., Simeon, 3); the argument, based on the Targumic interpretation of Lev. xix. 18, as in the "Didache" (not the positive "golden rule" of the New Testament), has its exact parallel in Ab. R. N. xv.-xvi. (ed. Schechter, pp. 60, 62, 65). The monition in ch. ii. to bless him who curses is based on Num. xxiv. 9 and Prov. xx. 22; Luke vi. 28 and Matt. v. 44, 45 being obviously later interpolations. The warning against lascivious conduct of men, "which may cause the stumbling of women," is based on Ex. xx. 14, 17 (without reference to Matt. xviii. 7); and rules regarding modesty in the dressing of hair and beard, on Deut. xxii. 5 and Lev. xix. 27 (compare Sifra, Aḥare Mot, ix. 13). Ch. iv.-vi. recommend a useful occupation and the study of the Scriptures (Josh. i. 8; Deut. iv. 7; and verses from Wisdom and Proverbs), and warn against heathen and diabolical books. Ch. viii.-x. contain rules of conduct for women, beginning with a sentence of which Paul's dictum, I Cor. xi. 3, is evidently the copy, not the source (the interpolation made here disturbing the sense). The sentence is as follows:

> "Let the wife subordinate herself to her husband; for the head of the woman is the man, and of the man who walks in the way of righteousness, God, his Father, who is over all [compare "Didache," iv. 10]; therefore, next to God, O wife, fear and reverence thy husband."

With copious references to Proverbs, woman is warned not to cause men to "stumble" by her enticing attire. She is admonished to go about with covered head in the street; not to paint her face, as "all frivolous adornment of what God Himself made beautiful is an affront to the bounty of the Creator"; to walk with downward look and be veiled; to bathe only in places and at times reserved exclusively for women; and, finally, to conduct herself so as not to cause her husband to stumble. All these teachings may be termed "Hilkot Ẓeni'ut" (Rules of Modesty), and having many parallels in Massek. Kallah, ed. Coronel, Vienna, 1864, and in Massek. Derek 'Ereẓ, were conspicuous features in the life of the Essenes or Ẓenu'im (Ber. 62a, b; Shab. 118b, 140b; Ta'an. 21b, 22a; Meg. 12b; B. Ḳ. 82a).

Origin of the Institution of Bishops.

Book II.: Dwells on the functions and powers of the head of the congregation, called "episcopus" = "overseer," the Christian "bishop," the פרנס (= *πρόνοος* or *προνοήτης*) of rabbinical literature (Sifre, Bemidbar, 139; compare *προνοίαν ποιούμενος* in "Apost. Const." III. iii.). It begins with the rule: "The shepherd who is ordained overseer must be without blemish and not under fifty years of age" (compare Philo, "De Profugis," vi.; Ḥag. 14a; Sanh. 17a). The modification of this rule for small parishes, which follows, betrays the hand of Christian interpolators.

The qualities necessary for an overseer (based on Ex. xviii. 21; compare Mek., Yitro, *ad loc.*; Sifre, Bemidbar, 92; Debarim, 15; Sanh. 17a) are enumerated in ch. ii., and repeated in I Tim. iii. 2–7. One of these is that he should not be a proselyte (*νεόφυτος* = גר; compare Ḳid. 76b; A. V. "novice," I Tim. iii. 6, is incorrect). From Lev. xxi. 17 (compare Sanh. 36b) is derived the rule in ch. iii. that the overseer must be examined in order that it may be ascertained whether he is free from blemish; but chief stress is laid upon his being a compassionate friend of the widow and the stranger, eager and capable to administer to the poor, this being his principal task (ch. iv.).

In order to fulfil well his other task, that of instructing the people in the Law, he must (ch. v.–viii.) always be sober-minded (compare Sifra to Lev. x. 8; Sanh. 42a; 'Er. 64b); show no greediness, especially in dealing with Gentiles (the latter words are omitted in I Tim. iii. 3; compare, however, Yer. B. M. ii. 8c); suffer rather than inflict injury (compare Shab. 88b, הנעלבין ואינן עולבין); shun heathen festivals and heathen lusts; and as a good shepherd lead his flock by a good example (after Lev. xv. 31, LXX.; Hosea iv. 9, LXX.).

Episcopal Powers.

The name "episcopus," taken as "watchman" ("The shepherds should be good watchmen"; compare Jer. vi. 17, LXX., and Ezek. xxxiii. 6), is dwelt upon as enjoining him to expel bad sheep from the flock (ch. ix.–x., with references to Achan and Gehazi, but without mention of Ananias and Sapphira, Acts v. 1–10). Ch. xvi.–xix.: "One scabbed sheep, if not separated, infects the rest with disease"; "A little leaven infects the whole lump" (hence, also, Gal. v. 9); therefore sinners should be separated, like Miriam (Num. xii. 14; compare Sifre *ad loc.*, נזיפה), for longer or shorter periods, and avoid "the wrath of divine judgment pronounced by the overseer, the watchman of righteousness," who has the power of binding and loosing; who is like Moses and Aaron, being made to bear the sins of all (Num. xviii. 1); and who, as shepherd, is held to account for every single sheep of his flock (Ezek. xxxiv.). The whole disciplinary system in use among the Essenes and the Pharisees as well as among the early Christians (see ANATHEMA; EXCOMMUNICATION) is here (ch. xlii.–xliii. and xlvii.) fully presented, the excommunicated being characteristically called *ἀποσυνάγωγος* = "expelled from the synagogue" (ch. lxiii., p. 71, line 5, ed. Lagarde [compare p. 72, line 8]; book III., ch. viii., *id.*, p. 105, line 6; book IV., ch. viii., *id.*, p. 119, line 23).

The overseer also offers remission of sins to the transgressor who repents, exactly as, when David confessed his sin before God, the Holy Spirit answered (II Sam. xii. 13, LXX.): "The Lord also hath put away thy sin; be of good cheer, thou shalt not die" (ch. xviii. and xxii.). Moreover, "he who does not receive the penitent is a murderer of his brother, like Cain" (ch. xxi.). The sinner's claim upon compassion is especially illustrated by a remarkable portion of a Midrash relating more elaborately than in any other work the story of Manasseh's idolatry and repentance, Manasseh's prayer forming an integral part of the whole haggadic legend, while the fruitlessness of hypocritical repentance is illustrated by the singular story of Amon (see AMON; MANASSEH). Ch. xxii.–xxiv.: The weak, malapropos Apostolic testimony here added by the Christian redactor only serves to establish the Jewish character of the remainder.

Still more remarkable are ch. xii.–xv., which, dwelling upon the proper treatment of the penitent sinner, refer to Ezek. xxxiii. 11 *et seq.* Ch. xiv. and xviii. contain arguments in favor of mingling with the wicked in order to win them over to righteousness and to obtain God's pardon for them, without even a reference to the life-work of Jesus—a fact which excludes the very possibility of a Christian authorship of the book. On the contrary, remonstrating against those "relentless" fanatics who would let the wicked perish in their sin, the author says (ch. xiv.):

> "The lovers of God who commune with the sinners are not guilty of sin, but are imitators of their Father in heaven, who maketh His sun rise on the righteous and on the wicked, and sendeth His rain alike upon the evil and the good. [Compare Agadat Shir ha-Shirim, ed. Schechter, p. 4. This is the source also of Matt. v. 45 and of II Tim. ii. 5.] Victors and vanquished are in the same arena, and only those are crowned who have nobly striven." "Nor is the teacher defiled by coming nigh to the sinners [compare the controversy between the Shammaites and the Hillelites in Ab. R. N. iii. (ed. Schechter, p. 14), and Ber. 22a]. The sinners should be offered comfort and hope [Isa. xl. 1, LXX.]; and Noah, Lot, and Rahab are given as instances that conversation and association with the unrighteous do not condemn the righteous."

The Good Shepherd.

Likewise is the picture of the good shepherd, who "strengthens the weak, heals the sick, and seeks that which is lost" (derived from Ezek. xxxiv.), elaborately described in ch. xviii.–xx.; accounting for the New Testament similes (Luke xv. 4 and Matt. x. 6), as well as for the haggadic pictures of Moses and David (Ex. R. ii.; Tan., Shemot, ed. Buber, p. 6; Midr. Teh. to Ps. lxxviii. 71). "Like the gentle shepherd [Isa. xlii.], the overseer should endeavor to save all the members of his flock, and say to the sinner, 'Do thou but return, and I will accept death for thee.'" This is the original of "the good shepherd" who "giveth his life for the sheep" (John x. 11–13, quoted in the interpolated passage). "Like a father he should love them as his children, and rear them as the hen rears her chickens" (hence Matt. xxiii. 32).

A genuine piece of halakic legislation occurs in ch. xxiv.–xxv. concerning the use of charity-offerings: "The overseer should not use the godly things [הקדש] as if they were profane [חולין = *ἀλλότρια*], but with restraint;" he may, as "a man of God" (compare II Kings iv. 42; Ket. 105b; "Didache," xiii. 3–6), use as godly things the tithes, first-fruits, and all the freewill offerings brought in for the poor, the orphan, the widow, the sick, and the stranger, but may not misuse them in selfish greed. Here follows, with references to Num. xxxii. 22 (compare Yer. Sheḳ. iii. 47c), Ezek. xxxiv. 3, Isa. v. 8, and Lev. xix. 18 (34?), the passage which is obviously the source of Paul in I Cor. ix. 7–9. Referring to Deut. xxv. 4, it says:

> "In the same manner as the ox that labors on the threshing-floor without a muzzle eats indeed, but does not eat it all up, so do you who labor for the threshing-floor [גרן; compare Ḥul. 5a]—that is, for the congregation of God—eat of the congregation.

> In the same manner as the Levites who served in the Tabernacle partook of the things offered to God [Num. xviii.], should the administrators of charity be supported out of the charity gifts."

In the following passage, beneath "the Church of Jesus the Savior" (יהושע), there is discernible "the congregation of God that escaped the Ten Plagues and received the Ten Commandments, and has yod (=ten) as its first letter, while named after God (Yhwh), whose first letter is also yod (= ten)." Here the overseer is recommended to the people's love and reverence as their high priest, as "the father ["abba"; see Kohler in "Jew. Quart. Rev." xiii. 567 *et seq.*] who caused you to be born anew as God's children through baptism and the Holy Spirit" (see Essenes), and as "the earthly god," after Ps. lxxxii. 6; Ex. xxii. 27. As without the priest no one could approach the altar, so the means of support for the widows and orphans, which is a type of the altar of burnt offering, may not be offered without the overseer, lest punishment, as in I Sam. xiii. 13, II Chron. xxii. 16, and Num. xvi., follow (ch. xxv.–xxvii.). Ch. xxxii.: "The overseer, who adopts thee as God's child, is thy father, and his right hand, with which he imbues thee with the Holy Spirit, thy mother; so honor them as thy spiritual parents" (Ex. xx. 12; comp. B. M. ii. 11).

Jewish Courts of Justice.

Great stress is laid in ch. xlv. *et seq.* upon the avoidance of heathen courts of justice for the adjustment of differences (comp. Tan. Yelamdenu to Deut. xvi. 18; Yalḳ. to Ps. cxlvii., ערכאות של נכרים). On Sabbath no judicial debates should take place; peace only is to prevail; wherefore the court sessions should be on the second (and the fifth [?]) day of the Sabbaths, so that the controversy may be settled in the interval, and the contestants may have peace again on the Lord's Day (see Syriac "Didascalia," xi.; Ket. i. 1; Beẓah v. 2; compare "Didache," viii. 11 against the Jewish "Ma'amadot"). According to ch. lxvii., the assistants ("diacones") and elders give their votes as "men of God," and the overseer decides; God, whose Shekinah (the text has Χρίστος) is present, confirming the judgment (after Ps. lxxxii 1; compare Midr. Teh. *ad loc.*).

> "Even the heathen judge, before passing the final decree of capital punishment, lifts his hand toward the sun and swears that he is innocent of the blood of the culprit; so much the more should your verdict be given only after careful investigation."
>
> "Be, therefore, righteous judges, peacemakers, and free from anger. If it happen that by some evil influence you become angry at anybody, let not the sun go down upon your wrath; for, says David, 'Be angry, and sin not' [Ps. iv. 4, LXX.]; that is, 'Be soon reconciled, lest your wrath, lasting long, become hatred and work sin.' For 'The souls of those that bear a settled hatred are to death,' says Solomon [Prov. xii. 28, LXX.]." It is plain that Eph. iv. 26 is based upon this passage (compare Resch, "Agrapha," p. 210, Leipsic, 1899).
>
> "Wherefore, brethren, it is your duty to pray continually and to remove enmity. God hears not those who are at enmity with their brethren on account of unjust anger" (compare Ber. 19a).
>
> "Before the prayer which follows the reading from the Law and the psalm-singing and the instruction ["didascalia"] out of the Scriptures ["Hafṭarah"], should the assistant [deacon = חזן], while standing near you, say with a loud voice: 'Let no one have a quarrel with another. Let none come in hypocrisy!' For the greeting of peace [Isa. lvii.], offered on entering private houses, is all the more applicable to those that enter the congregation of God, as the name 'bet ha-keneset' ["synagogue"] indicates the gathering of all who belong to the Lord and the augmentation of the number of those 'saved by concord'" (ch. lv.).

Divine Service.

Divine service, under the direction of the overseer, "as the commander of a great ship" (compare Clement's Epistle to James xiv.–xv.; B. B. 91b; Ber. 28a; Levy, "Neuhebr. Wörterb." *s.v.* קברניט), and under the supervision of the deacons (חזנים), begins with the reading of the two lessons from the Torah and the Prophets, while "all stand in silence" (according to Deut. v. 28 [A. V. 31], xxvii. 9). This is followed by expositions by the seven elders, and finally by the overseer ("maftir"); then prayer is offered for the land and its produce, for the high priest and the king, and for the peace of the universe, the faces of all being turned eastward "toward the site of Paradise"; and the overseer then gives the closing benediction (ch. lvii.).

Ch. lviii. states that the overseer should enjoin the people to attend the service regularly, and not by their absence to cause the body of the divine glory, Shekinah (text, "Christ"), to lose a member (compare ממעט השכינה and Yeb. 64a; Ber. 6a, 8a); especially on the Sabbath day, on which "we pray thrice standing, in memory of the exodus from Egypt and the manna, and on which the reading of the Prophets takes place" (ch. lix.; see further regarding the Sabbath prayer). In ch. lx. it is stated that the people should emulate the heathen, who rally in the theaters, as in a synagogue, for "things that do not profit," while deprived of the power of the Word and of the power of the name "Judah," which is interpreted "confession" (יהודה; Ezek. v. 6, 7; xvi. 47; Jer. ii. 10, 11).

According to ch. lxii., the people should pursue their trades as by-work (טפל) and the worship of God as their main work (עקר), avoiding the shows and theaters of the Hellenes and the Hellenic oracles, and adhering to the congregation of the Lord, "the daughter of the Highest" (Ps. xxvi. 4, 5; l. 1, 2; Jer. xv. 17, LXX.; Job xxxi. 5, 6; compare 'Ab. Zarah 18b). They should also avoid the indecent spectacles, the sports, and the feasts of the heathen (Num. xxiii. 23; II Sam. xv. 23, LXX.; Lev. xix. 26; Jer. ix. 2). "There is no fellowship between God and Satan" (hence Cor. vi. 14, 15). Only for the sake of redeeming a captive and saving a soul (פדיון שבוים ופיקוח נפש) and other necessary objects may such places be visited (compare Shab. 150a).

Work.

"The younger men of the congregation should work for their own support and for that of the needy [Prov. vi. 6, LXX., xii. 11, xix. 24; Eccl. x. 18]: 'And if any one will not work, neither shall he eat among you,' for the Lord our God hateth the slothful. For no one of those who are dedicated to God [המתנדבים לי"י; Targ. to Judges v. 9; I Macc. ii. 42; see Deborah in Rabbinical Literature] ought to be idle." Here again Paul (II Thess. iii. 10) copies from the "Didascalia."

Books III. and IV.: These, as well as part of Book V., contain regulations concerning the support of widows, orphans, and other persons in distress; but the order in which they are presented is scarcely the original one. The fundamental idea underlying the book which deals with widows as a special class, or holy order, is that they are "types of the altar of God" (Book III., ch. vi., vii., xiv.; compare Book II., ch. xxvi., and ALTAR); they pray for him who gives alms (Book III., ch. xiii., xiv.).

Widows "the Altar of God."

The institution of pious widows spending their time in prayer goes back to pre-Christian times, and can not but be of Essene or Ḥasidic origin (see Luke ii. 36-38; ANNA and SERAH BAT ASHER); the Therapeutes had their class of aged women who led a holy life, and who were regarded as virgins because they would not marry a second time (Philo, "De Vita Contemplativa," § 8; see especially Conybeare in his edition, pp. 305 and 353; compare Kohler, "Testament of Job," in Kohut Memorial Volume, pp. 287-292). These "virgin widows," whose type was Judith (see Judith xi. 17, xii. 6-8, xvi. 22), are called "the pious women" (נשים צדקניות) that "save their generation" (Ex. R. i.; Num. R. xxi.; Targ. Yer. to Ex. xxxviii. 8; Soṭah 12a). These widows had to be sixty years of age (זקנות; compare Abot v. 21) before they were admitted into the order of women (hence I Tim. v. 9; the Syriac "Didascalia" has "sixty" changed into "fifty"). On entering the order they had to take the vow of virginity—that is, that they would not marry again; wherefore they were to be of an age when remarrying was no longer thought of. Exceptionally young widows after a brief marriage were admitted when they had an "especial gift of widowhood," to be blessed like (? Judith and) the widow of Sarepta mentioned in I Kings xvii. 9 (Book III., ch. i.). Widows not belonging to the order might marry a second time, lest they be ensnared by Satan (*ib.* ch. ii.). "The widows who are supported as consecrated to God must be sober, chaste, faithful, and pious; they must have been married only once, have brought up their children well, and have entertained strangers without blemish" (ch. iii.). The widow "should be meek and not hasty of speech, and leave to the rulers doctrinal questions to be answered for the young applicants. Only the unity of God she should defend against polytheistic errors, but in regard to the mysteries of the Shekinah [the text has "Christ"] she must use caution in order not to blaspheme God" (Isa. lii. 5, LXX.). "She should not teach in the assembly, but pray, and listen to those that teach" (hence Paul in I Cor. xiv. 34). "Being the altar of God, she should go to the houses of the faithful to obtain alms, not to the houses of strangers [Syriac "Didascalia": "to become a stumbling-block to men"]. Nor should she indulge in foolish prattle instead of going to the synagogue on the Day of the Lord for rest and watchfulness like the angels ["watchers"]. Nor should she, dissatisfied with her support by the congregation, be solicitous about mammon and make her bag her God, 'worshiping mammon instead of God' [hence Matt. vi. 24; compare Sifre to Deut. vi. 5]; but, like Judith, she should pray unceasingly for the congregation, remaining in her house, singing psalms, reading the Scripture, holding vigils and fasts, communing with God continually in songs and hymns; and let her take wool for work to help others, but not for her own use" (ch. vi.-vii.). "As little as the priests were allowed to accept free-will offerings from a rapacious person or a harlot [Deut. xxiii. 18; Mal. i. 13, 14], is the widow allowed to accept any gift from improper sources, nor indeed from any one who has been excommunicated from the Synagogue; for prayer ought not to be offered by the recipient for such a one, this being an offense against the Holy Spirit [the text has "Christ"]" (ch. viii.). "Any widow who fosters strife acts like Cain, and will be cast out of the kingdom of God and delivered to eternal punishment as doing the work of Satan" (ch. ix.). "It is by appointment of God that the overseer distributes the gifts among the widows, and they have to pray both for him and for the giver" (ch. xiii.-xiv.). In ch. iii.-iv. it is stated to be the overseer's duty, as the steward of God, to provide for the wants of all the needy, the widows and orphans, the friendless and the afflicted, without any partiality, and to mention the name of the giver so that the recipients may be able to pray for him (Isa. lviii. 7; Dan. iv. 27; Ps. xli. 2 [A. V. 1], cxii. 9; Prov. xvi. 6, xix. 17, xxi. 13). Also those who assist the overseer in the administration of the needy (שמוש אורחים; compare Kohler, "Testament of Job," in *l.c.* p. 318; hence "diacones" = "deacons") are required to be spotless like him and still more energetic (זריזים), ever ready to travel, to carry messages, and to minister to the needy. Women should attend to women in need. They should not be ashamed to attend to those in want, but, if needs be, should lay down their lives for a brother, imitating the Lord of heaven and earth (compare Targ. Yer. Gen. xxxv. 9), acting only for His name's sake. They should visit all who are in need of visitation, and report to the overseer (ch. xix.).

Of Book IV. the earlier chapters treat mainly of orphans:

> "When the son or daughter of any brother [the Christianized text has "Christian"] becomes an orphan, some one of the brethren should adopt the same, and, if feasible, marry the girl to his son. They who do so, perform a great work [מצוה גדולה] and will receive reward from God; and if, because such orphans are poor, he, being rich, is ashamed to do so, the Father of the fatherless and the 'judge of the widows' [Ps. lxviii. 6 (A. V. 5)] will provide for these, while the fortune of such a one will be spent by prodigal heirs" (Lev. xxvi. 16 or Eccl. vi. 2, according to Midrashic interpretation; Isa. i. 7).
>
> "While the overseers have, like husbands, to provide for the widows [compare Sirach (Ecclus.) iv. 10, Hebrew text]; to give work to the mechanics; to show compassion to the feeble; to give shelter to the strangers, food to the hungry, drink to the thirsty, clothing to the naked, visitation to the sick [בקור חולים], rescue to the imprisoned [פריון שבוים], they must take especial care of the orphans, give the marriageable maiden in marriage to a brother, and cause the young man to learn a trade [אומנות] in order to become self-supporting [see concerning the bringing up of orphans, מגדלי יתומים, Ex. R. xlv.; Sanh. 19b]. Both widows and orphans receiving gifts shall give thanks 'to the Lord who giveth food to the hungry' . . ." (Ps. civ. 14-15; cxlv. 15-16; Eccl. ii. 25, LXX.; Zech. ix. 17).

Peculiarly instructive are the regulations concerning the acceptance of charitable offerings. Being considered as holy sacrifices for the altar of God, the Law (Deut. xviii. 12, xxiii. 19 [A. V. 18]; Prov. xvii. 12) was applied, and no gift was to be received from unjust dealers in merchandise (קפילא; Ecclus. [Sirach] xxvi. 29; Isa. i. 22, 23), from fornicators or such as abuse their own female servants (נוהגים היתר בשפחות, Lev. R. xxv.), from sodomites, idol-makers, blasphemers, thieves, publicans, informers, any subverter of justice, usurer, or from any one acting against the will of God. Acceptance of gifts from any of the foregoing would

Forbidden Charitable Gifts.

evoke divine punishment, as in the case of the prophet (I Kings xiii. 1-5); and the prayer of those who received such gifts would not be heard (Jer. vii. 16, xv. 1). "Neither did Elisha accept gifts from Hazael nor Abijah from Jeroboam's wife" (II Kings viii. 10; I Kings xiv. 3). "Ye have received the gifts of the Levites and should not receive from the wicked. It is better to perish from want than to accept from the enemies of God" (Ps. cxiv. 5). "Receive only from such as are found, on examination, to walk in holiness, and not from those who are expelled from the Synagogue." "The Lord is honored only out of righteous labor" (Prov. iii. 9, LXX.). "Only righteous money is to be used for the ransom of captives and imprisoned ones" (Prov. xxiv. 11). "Should, however, the acceptance of money from ungodly persons be enforced upon any, it is to be used only for fuel, like the forbidden holy thing [פגול] which is to be consumed with fire, being evil not by nature, but only in the minds of those that offer it" (Lev. xix. 7; compare Sifra thereto). Compare with these regulations those regarding "ẓedaḳah" practised by the Jewish charity administrators (גבאי צדקה; Tosef., B. Ḳ. xi. 6-9; Sanh. 26b; B. B. 10b; see also Charity); the interpretation of the Law, אתנן זונה ומחיר כלב (Deut. xxiii. 19), with reference to charity, was a matter of controversy between the Christian Jacob the Gnostic, and the Rabbis ('Ab. Zarah 17a).

Of the four chapters which close Book IV., only partly preserved in the Syrian "Didascalia," the eleventh is, with the exception only of the words "and our divine words," certainly Jewish. It enjoins parents to train their children well, have them learn useful trades, familiarize them with holy Scripture, guard them against bad company, and, finally, to join them in wedlock in due time (compare Ḳid. 29a; Tosef., Ḳid. i. 11; Yeb. 62b).

Book V.: This book, treating of martyrdom, resurrection, heathenism, and the feast- and fast-days, rests, in spite of the pronounced Christian character which it now has, upon a Jewish substratum, "Christ" having often, and at times very awkwardly, been substituted for "God." The idea presented in ch. i.-iv. is that "he who is condemned by the heathen to the games and the beasts for the name of the Lord God is a holy martyr, the son of the Highest, and a vessel of the Holy Spirit" (compare the expression כלי לדברות in the Midr. ha-Gadol, quoted by I. Lewy in his "Ein Wort Ueber die 'Mechilta des R. Simon,'" p. 38, note), and "whosoever aids or rescues these martyrs by means of his work shares in their glorious martyrdom." "He who denies being God's in order not to be hated by men, loving his own life more than he does the Lord in whose hand his breath is held, is wretched, an enemy of God, who has his portion with the accursed and not with the saints, and inherits the eternal fire prepared for Satan and his angels, instead of the reward of the blessed" (compare Sifre, Debarim, 32; Philo, "Quod Omnis Probus Liber," xiii.; Wisdom iii. 11-19; Bousset, "Die Religion des Judenthums," 1902, p. 168).

The Essene principle is set forth in ch. vi.-vii.:

"Let us then renounce our parents, kinsmen, and friends, wife and children, all possessions and enjoyments of life, if they become an impediment to piety [compare Philo, "De Vita Contemplativa," § 2, and parallels in Conybeare's ed., p. 49]. For while it behooves us to pray that He may not lead us into temptation [Ber. 60b; Matt. vi. 13], yet when we are called upon to give testimony [as martyrs; compare LXX. to Isa. xliii. 10-12], while confessing His precious name with defiance [קדוש השם; Sifra, Emor, 9], let us rejoice, hastening toward immortality. And when persecuted, let us not be perplexed and let us love neither this world nor the praise of men nor the glory and honor of rulers; but let him who has been deemed worthy of martyrdom rejoice in the joy of the Lord as obtaining thereby a great crown, and ending life with a confession [שמע ישראל; compare Sifre, Deut., 32; Ber. 61b]. For the Almighty God will Himself raise us up, according to His infallible promise, and grant us a resurrection with all those that have slept from the beginning of the world [לישני עפר in the Eighteen Benedictions], whether we die in the sea, are scattered on earth, or torn to pieces by wild beasts or birds. He will raise us by His own power [compare גבורות in Eighteen Benedictions], for the whole world is held together by the hand of God." Here references are made to Dan. xii. 2-3; Eccl. xii. 14; Ezek. xxvii. 11; Isa. xxvi. 19, lxvi. 24; then to Enoch and Elisha, to the raising of the dead by Elijah and Elisha; to Jonah (ii. 11), to Daniel and his three youths (Dan. ii.-iii.), and finally, to convince heathen readers, to the Sibylline Oracles (iv. 178-190), and to the mythical phenix.

"In this hope we undergo stripes, persecutions, and deaths. Just as God by His will made heaven and earth [Gen. i. 1; Jer. i, 5; Zech. xii. 1; Job. x. 10; Ps. ciii. 14; cxix. 73; cxxxix. 5, 16], so will He raise all men by His will either to crown them or to punish them [Dan. xii. 3], man being His workmanship made by His word [Gen. i. 26 *et seq.*; text has "Christ"], just as He raises the wheat out of the ground [compare Sanh. 90b] and as He made Aaron's dry rod put forth buds [Num. xvii. 8]."

Martyrs should be held in honor, according to Ps. cxvi. 15; Prov. x. 7; Isa. lvii. 1, lxx. "A faithful martyr ["witness"] is he who strove by his own blood for the cause of faith" (ch. viii.-ix.).

On Sabbath and holy days, which are days of joy (Isa. lviii. 13), all obscene talk and song should be avoided, according to Ps. ii. 11: "Rejoice with trembling." Names of heathen gods are not to be mentioned, nor should one swear by any of the luminaries or elements (ch. x.-xi.).

On Heresies.

Book VI.: Ch. i.-iv. warn against heresies and schisms, dwelling at great length on the sedition of Dathan and Abiram against Moses—who "exhibited the Law of God in the perfect number of Ten Commandments," and of whom God said: "There arose not a prophet like unto Moses" (Deut. xxxiv. 10; no Christian could without considerable modification have written of Moses all that is stated here)—and on Sheba the son of Bichri (the name is twice misspelled almost beyond recognition); and on Joshua the son of Josedech, who also was tempted by Satan (Zech. iii. 1). In ch. vi. the Sadducees and Dositheans seem to have originally been characterized as heretics among the Jewish people. The present text enumerates all the Jewish sects, and what follows to the end of the book—with the exception of some parts of ch. xxvii.-xxix., which dwell on Levitical impurity in connection with prayer and the Holy Spirit (Ber. iii. 5; compare Kayser, "Die Canones Jacob's von Edessa," 1886, pp. 12, 81)—is altogether of Christian origin and anti-Jewish in character.

Books VII. and VIII.: These contain, besides third-century Church canons and the like, diverse subject-matter—probably thrown out by the late Christian redactor of the "Didascalia" on account of its Judæo-Christian character. The first thirty-two chapters of Book VII. contain a version of the "Didache," which, while betraying, like the rest of the "Didascalia," the hand of a Christian redactor, rests nevertheless upon a more complete Jewish original than the one discovered by Bryennios. Its whole tenor is characteristically Jewish in so far as it has each single precept or sentence based upon some Scriptural verse; and its mode of teaching, like any haggadic or halakic work, is argumentative. It begins the "Two Ways" with an apt reference to Deut. xxx. 15 and I Kings xviii. 21; the reference to Matt. vi. 24 is manifestly an interpolation. In ch. ii. the verse "Love the Lord thy God" (Deut. vi. 5) is given (compare Iselin's [Coptic] "Apostellehre," p. 6, Leipsic, 1895). The rule, "Love those that hate you, and ye shall have no enemy," in itself decidedly Jewish in tone (see Bousset, *l.c.* p. 393), is derived from Deut. xxiii. 7: "Thou shalt not hate any man, Egyptian or Edomite, as they all are the works of God" (כי אחיך הוא; compare "Apost. Const." II. xxxvi., V. vii.). Likewise is the precept "If any one give thee a stroke on the right cheek, turn to him the other also" based upon the argument "Not that revenge is evil, but that patience is more honorable"; and Ps. vii. 5 (A. V. 4) is referred to. This proves that Matt. v. 39 is not the source. Old Testament quotations and specific references to the Law are frequent throughout ch. vi.

The "Didache" in an Older Form.

The principle "Flee from all evil and whatever is similar to it" (הרחק מן הכיעור ומן הדומה לו) is derived from Isa. liv. 14: רחקי מעשק ("Abstain from injustice"), and the warning against anger and envy is illustrated by the fate of Cain, Saul, and Joab (ch. v.). The lesson of submission to God's decree is aptly illustrated by the example of Job—and very inaptly by the interpolator's reference to Lazarus (ch. viii.). In ch. ix. honor for the teacher is required, because "where there is teaching concerning God, there God is present" (Abot iii. 3; compare Matt. xviii. 20). The sedition of Korah is to warn man against making schisms; and the examples of Elijah Micaiah, Ebed-melech the Ethiopian, and Nathan, against taking presents from sinners that are to be reproved (ch. x.). Ch. xvii. contains as the last rule: "Thou shalt not proceed to thy house of prayer on a day of thy misfortune before thou hast laid aside thy bitterness"—a decidedly Jewish precept (Ber. 31a).

A striking parallel to the Mishnaic statement, "The ancient Hasidim used to spend a full hour in silent meditation before prayer in order to turn their hearts in true devotion to their Father in heaven" (Ber. v. 1), is preserved in ch. xxiv.: "Pray thrice a day, preparing yourselves beforehand that ye may be worthy of being received as children by the Father, lest, when you call Him 'Father' unworthily, you be reproached by Him, like Israel, 'If I be a Father, where is My glory? And if I be a Lord, where is My fear?'" (Mal. i. 6).

Irrefutable proof of the Jewish provenience of the "Didache" and, as will be seen, of the whole "Didascalia," is given in the words "O God of our holy and perfect fathers Abraham, Isaac, and Jacob, Thy faithful servants," preserved in the thanksgiving prayer after a meal (ch. xxvi.), which also contains a thanksgiving "for the Law which Thou hast planted in our souls" (compare ועל תורתך שלמדתנו, in Grace After Meals). The same characteristic words, "The God of our holy and perfect forefathers, the God of Abraham, Isaac, and Jacob" (אלהי אבותינו הקדושים והתמימים אלהי אברהם א' יצחק וא' יעקב), occur also in the prayer which follows in ch. xxxiii. This prayer is an older version of the first of the Eighteen (or Seven) Benedictions, called by the Rabbis אבות, and, with a few omissions, it reads as follows:

God of Our Fathers, etc.

"Our eternal Savior, King of the godly beings, who alone art the Almighty and Lord, God of all things, God of our holy and perfect forefathers, God of Abraham, Isaac, and Jacob, merciful and compassionate, long-suffering and abundant in mercy, to whom every heart is naked and every secret thought revealed, to Thee the souls of the righteous cry aloud; upon Thee do the hopes of the holy ones rest in confidence, Thou Father of the perfect, who hearest the prayer of those that call upon Thee in uprightness and knowest the supplication unuttered. . . . Thou hast made this world a place of combat for righteousness and hast opened to all the gate of mercy [הפותח שער רחמים], having shown to each man by the knowledge implanted [דעה], by natural judgment [בינה], and by the admonition of the Law [תורה], that riches, beauty, and strength vanish and only the guileless conscience of faith [אמונה] abides throughout the heavens, and walking with truth receives the right hand of victory, exulting in hope before even the world is regenerated. For Thou didst guide our forefather Abraham when he found the way of truth, and didst teach him in a vision what this world is, faith preceding his knowledge [γνῶσις]; and the covenant was the consequence of his faith [Gen. xv. 6, xxii. 17]. And when Thou gavest him Isaac as son, Thou saidst, 'I will be a God to thee' [Gen. xxvi. 3], and when our father Jacob was sent to Mesopotamia Thou showedst him the Word [text: "Christ"], and through him spakest, 'Behold I am with thee' [Gen. xxviii. 15]. And so spakest Thou to Moses, Thy faithful and holy servant, at the vision of the bush: 'I am He that is' [Ex. iii. 14, 15]. O Thou shield of the posterity of Abraham, be blessed forever" (= בא"י מגן אברהם; compare Midr. Teh. to Ps. i., ed. Buber, p. 5).

The prayer which follows in ch. xxxiv. is the second of the Seven Benedictions; it has not been preserved intact. It begins as follows:

"Blessed art Thou, O Lord, King of the worlds, who by the word [במאמרו; text has "Christ"] hast made the universe and by the same hast brought order into chaos." Here follows an enumeration of the whole work of Creation (מעשה בראשית), after Gen. i., closing with the formation by the divine Wisdom of man as "the citizen of the world," "the cosmos ["ornament"] of the cosmos" (κόσμου κόσμον); his body being formed of the four bodily elements, his soul endowed with five senses as a new creation out of nothing, and his mind being the charioteer of the soul. The closing sentence reads: "When man was disobedient Thou didst not destroy him forever, but laidst him to sleep for a time, and by an oath didst promise him resurrection and didst loose the bond of death. Blessed be Thou, O Reviver of the Dead" (מחיה המתים; "through Jesus Christ our hope" is the Christian addition).

The Seven Benedictions.

The prayer in ch. xxxv. begins, "Great art Thou, O Lord Almighty, and great is Thy power," exactly as the second of the Seven Benedictions in the Jewish ritual (אתה גבור לעולם יי), and enumerates the wondrous works of God's power—גבורות (Ta'an. l. 1; Ber. v. 2) —also characteristic of the same benediction. So this part evidently belongs to the preceding prayer. But it also contains, in an elaborate form, those portions which constitute the third benediction (קדושה). It describes the sanctification of God by the hosts of celestial beings—the holy seraphim and the six-winged cherubim, the angels and archangels; the thrones ("ofannim"), dominions, principalities, authorities, and powers—citing Isa. vi. 3; Dan. viii. 13; Ezek. iii. 12 (see Falashas); and then speaks of Israel as "Thy congregation selected from the nations on earth, emulating the heavenly powers night and day, and singing with a full heart and soul" (Ps. lxviii. 18 [A. V. 17]). After quotations from Deut. iv. 39; I Sam. ii. 2–4; and Deut. xxxiv. 2, the benediction closes thus:

"Thou art glorious and highly exalted, invisible and unsearchable; Thy life without want; Thy operation without toil; Thy work without assistance; Thy dominion unchangeable; Thy monarchy without succession; Thy kingdom without end; Thy strength irresistible; Thine army very numerous. Thou art the Father of Wisdom, the Creator of Creation, the Bestower of Providence, the Giver of Laws, the Supplier of Wants, the Punisher of the Ungodly, and the Rewarder of the Righteous, the God and Father [here "Christ" is interpolated] and Lord of those that worship Him whose promise is infallible, . . . whose thanksgiving is everlasting, to whom adoration is due from every rational and holy creature." Here the blessing formula, האל הקדוש, is omitted.

Ch. xxxvi. contains the following portions of the original Jewish prayers for Sabbath and festivals:

"O Lord Almighty, Thou hast created the world by Thy Word [text: "Christ"], and hast appointed the Sabbath as a memorial thereof, because on that day Thou hast made us rest from our works that we may meditate upon Thy laws.

Prayers for Sabbath and Festivals.

"Thou hast appointed festivals for the rejoicing of our souls, that we may remember the Wisdom created by Thee. . . . Wherefore we assemble on the Day of the Lord and rejoice with Thy Word which has lit up life and immortality. For through it Thou hast made Israel, the God-beloved, Thy peculiar people. For Thou, O Lord, didst bring our fathers out of the land of Egypt and didst deliver them out of the iron furnace, from brick-making, and didst redeem them out of the hands of Pharaoh and those under him, and didst lead them through the sea as through dry land, and feed them in the wilderness with all kinds of good things.

"Thou didst give them the Law, the Ten Words pronounced by Thy voice and written with Thy hand. Thou didst enjoin them to observe the Sabbath not for the sake of affording them an occasion of idleness, but as an opportunity of piety that they might learn to know Thy power: having, in order to prevent them from evil things, kept them as within a holy circuit [תחום שבת] for the sake of instruction that they might rejoice in the number seven (for there are the seventh day and the seven weeks and the seven months and the seventh year and the jubilee year for remission) [a marginal note probably; compare Philo, "De Septennario," §§ 7–8], so that men might have no cause for pretending ignorance. Wherefore, He permitted men to rest every Sabbath so that no one should send forth one word in anger on the Sabbath day; for the Sabbath is the cessation of the creation, the completion of the world, [given for] the study of the Law, and the thanksgiving hymn to God for the blessings bestowed upon men. As the Mediator, Provider, and Lawgiver of all this, does the Lord's Day hold forth the word of God as the first-born of the entire creation, so that the Lord's Day commands us to offer unto Thee, O Lord, thanksgiving for all."

Obviously the fourth benediction, מקדש השבת, has here assumed an Essene, or Gnostic, character, without, however, obscuring the features of the typical synagogue formula.

Ch. xxxvii., xxxviii., and Book VIII., ch. xxxvii., have preserved portions of the last three benedictions recited both in the synagogue and in the Temple, the עבודה, and הודאה, and ברכת כהנים.

The first commences: "Thou who hast fulfilled Thy promise made by the prophets, and hast had mercy on Jerusalem by exalting the throne of David Thy servant, do Thou now, O Lord God, accept the prayers of Thy people who call upon Thee in truth as Thou didst accept of the gifts of the righteous in their generations. [Here follows an enumeration of all the righteous men from Abel to Mattathias and his sons.] So receive Thou the prayers of Thy people, offered to Thee with knowledge [the phrase "through Christ" is a Christian addition; there is no mention of Christ in the prayer itself] in the Spirit."

The Last Three Temple Benedictions.

The Modim prayer begins exactly like the Jewish benediction: "We give thanks to Thee for all things, O Lord Almighty, that Thou hast not taken away Thy mercies and loving-kindnesses from us, but generation after generation dost Thou save, deliver, assist, and protect. Thou didst assist in the days of Enos and Enoch, of Moses and Joshua, of Samuel and Elijah, of David and the Kings, of Esther and Judith, and of Judas Maccabeus and his brethren ["Christ" very inappropriately interpolated here]. For He has delivered us from the sword and from famine, from sickness and from an evil tongue. . . . For all these things do we give Thee thanks [compare ועל כלם]." Here follows a special thanksgiving for the wonderful creation of man, for the immortal soul, and for the laws given to him, and for the promise of resurrection. The closing sentences are as follows: "What life is sufficient—what length of ages will be long enough for men to be thankful! For Thou hast delivered us from the impiety of polytheism. [Then follows a Christian addition quite characteristic, "and from the heresy of the murderers of Christ!"]. Thou hast delivered us from error and ignorance. Thou hast set angels over us, and hast put Satan to shame. Thou hast created us and provided for us. Thou measurest out life to us, and affordest us nourishment, and hast provided repentance. Glory and worship to Thee for all these things for ever and aye."

Of the closing benediction only the following portion has been preserved as the bishop's benediction:

"O God of our fathers, Lord of mercy, who didst form man by Thy Wisdom, . . . look down, O Lord Almighty, and cause Thy face to shine upon Thy people and bless them by Thy Word [text: "Christ"], through which Thou hast enlightened us with the light of Thy knowledge, and hast revealed Thyself unto us. Adoration is due to Thee from every rational and holy creature forever."

As all these prayers go back to pre-Christian times, they are of incalculable importance to the student of Jewish and Christian liturgy. Here is also the origin of such names as "the Lord's Day" for Sabbath (Sunday).

There are a number of other benediction formulas given in Books VII. and VIII. which betray an adaptation from Jewish prayers and anthems. Especially is the "Trisagion," or "Thrice Holy," in Book VIII., ch. xii.—which has, in more or less modified form, been universally adopted in the various churches—based on a somewhat older form of the Jewish sanctification than the one in ch. xxxv. of Book VII., mentioned above; while the prayers for penitents and for the various classes of people (Book VIII., ch. ix. and x.) have striking parallels in the older portion of the Jewish litanies (see SELIḤOT). See also ESSENES; GNOSTICISM; LITURGY; SABBATH.

K.

DIDEROT, DENIS: French philosopher and encyclopedist; born at Langres Oct. 5, 1713; died at Paris July 30, 1784. Although, like all the French encyclopedists, an apostle of tolerance, Diderot does not seem to have had much sympathy with the Jews and Judaism. He wrote the bright and interesting article on Jewish philosophy for the "Encyclopédie," but it shows a superficial acquaintance with the subject, and is not free from errors. The same criticism applies to a brilliant passage on the Jews of Amsterdam in his "Voyage en Hollande" (xvii. 431–433, ed. Assezat and Tourneux, Paris, 1875–79). In his "Neveu de Rameau" (v. 454, 479) there are two anecdotes, the heroes of which are Jews. The first refers to a renegade who abuses the confidence of a rich Jew of Avignon in order to rob him and denounce him to the Inquisition. The second, which is somewhat licentious, narrates the story of an

Orthodox Jew of Utrecht who signs a note in an infamous bargain. The first anecdote is improbable, for the Inquisition never forbade the Jews of the Comtat to follow their religion. The second anecdote, still more improbable, is also found in the "Voyage en Hollande," where the personages are Dutch citizens, and by substituting different names Diderot simply intended to make a striking antithesis between the piety of the Jew and his amorous escapades. This literary trifle must not be taken seriously; it shows only that Diderot was subject to the common prejudice against the Jews.

DIDRACHMA. See Numismatics and Weights and Measures.

DIEGO DE VALENCIA: Spanish troubadour of the fifteenth century; born of Jewish parentage at Valencia de Don Juan, in the kingdom of Leon. After his conversion to Christianity he became a Franciscan monk; and receiving the degree of doctor of theology, was known among his contemporaries as a very learned physician, astrologer, and master of sciences ("gran letrado, fisico, astrologo, é mecanico"). He was one of the leading Valencian poets, and most of his poems are contained in the "Cancionero de Baena." He did not consider it beneath his dignity to speak openly, in a number of flippant songs, of his intimacy with various classes of courtezans, nor did he hesitate, in his satirical poems on Jews and Maranos, to make use of Hebrew and rabbinic terms, though he thereby derided himself. Diego chose as the special target of his scoffings a certain Juan de España, who was considered an accomplished Talmudist, and who, after accepting baptism in 1413, wrote a short work on his conversion. The following lines may serve as specimens of Diego's satire:

"Johan de España, muy gran saña
  Fué aquesta de *Adonay*,
Pues la aljama se derrama
  Por culpa de *Barcelay*.
Todos fuemos espantados,
  Maestros, rabies, *cohenim*,
Ca les fueron sus pecados
  De este *sofarahenim*
  Pues quien non tiène *beçim*,
Quiso infinita faser,
Hora finque por mansel
Pues tan mal pertrecho tray."

G. M. K.

DIENA (DAYYENA), AZRIEL BEN SOLOMON: Rabbi at Sabbionetta; died 1536. He was a disciple of Nathaniel Trabotto, and is mentioned with respect by R. Meïr Katzenellenbogen. Azulai claims to have seen two volumes of his responsa—perhaps those referred to in "Magazin," ii. 16. MS. 911 in the Bodleian collection contains Diena's notes on הלכות טרפה according to the Roman rite (Neubauer, "Cat." col. 196); and MS. 948 contains some of his letters (*ib.* col. 205). MSS. 48, 135, 153, 166 of the Friedland collection in St. Petersburg contain some of Diena's decisions. He seems to have possessed valuable manuscripts; the 1550 ed. of Maimonides' "Yad" having followed his copy (Conforte, "Ḳore ha-Dorot," p. 34b). Diena became known by his opposition to the adventurer David Reubeni. Being of a positive and practical disposition, opposed to the current Messianic vagaries, Diena was alive to the danger resulting therefrom, and he decided to act against Reubeni. When the latter, after the execution of Molko, had increased his influence to such an extent that the Italian rabbis began to take his pretensions seriously, Diena called to his aid Abraham b. Moses Cohen, rabbi of Bologna, and both unmasked the impostor.

The veneration in which Diena was held may be seen from the elegies published at his death, one of which was by Abraham of Pisa, and two others by Samuel b. Moses Anav. His son's name was David (Nepi-Ghirondi, "Toledot Gedole Yisrael," p. 75).

G.

DIENA (DAYYENA), DAVID: Italian rabbi; he lived at Rovigo at the end of the seventeenth century. He was consulted on Talmudic matters by R. Nathaniel Segre; and his responsa appeared first in the collection "'Afar Ya'aḳob," from which it was copied by Isaac Lampronti into his "Paḥad Yiẓḥaḳ." David, in his responsa, mentions Azriel Diena as his grandfather. There is much confusion concerning his father. Ghirondi calls him David b. Azriel Diena, while Mortara speaks of two Davids, one being a grandson and the other a son of Azriel Diena. He was the grandfather of David Ḥayyim Diena, chief rabbi of Rovigo.

DIENESOHN, JACOB: Yiddish novelist; born in Zagory (Zagaren), Russia, in 1859. He is one of the most popular Yiddish novelists of the latter half of the nineteenth century. He began to write in 1877, when he published a story called "Ha-Ne'ehabim weha-Ne'imim" or "Der Schwartzer Junger Mantshik" (The Dark Young Man). Since then Dienesohn has written many novels, almost all of which have been widely read. Among the best known of his works is his "Eben Negef" (Stumbling-Stone). In his books Dienesohn pictures the struggle among the Jews of the older and the younger generation—between the "haskalah" and ḥasidism. He knew well the public for which he was writing, and avoided all violent expressions in denouncing fanaticism, describing merely the sufferings of the Maskilim. His later novels treat of the same themes, but are rather sketches from Jewish life than romantic stories. Dienesohn is also the author of the "Welt-Geschichte," in Yiddish. He has in addition contributed many articles to Yiddish periodicals, and is a good Hebrew writer, his contributions to "Ha-Shaḥar" having won him the favorable criticism even of such writers as Smolenskin.

G. M. Ra.

DIESSENHOFEN: City in the Swiss canton of Thurgau, connected by a bridge with the village of Gailingen in Baden. It attracted the Jews in early times by its favorable position. In 1348 the Jews here were accused of having poisoned the wells; their houses were plundered by the mob, and some of the Jews were burned at the stake. Over three hundred sought refuge in the fortress of Kyburg, where they were protected by the Austrian governor; but when he himself was threatened by the cities of Diessenhofen and Winterthur, the fugitives were either expelled and left to the mercy of their persecutors, or, as other authorities state, were burned by the governor on Sept. 18, 1349, to save the "innocent ones" from the fury of the mob (Pupikofer, "Gesch. des Thurgaus," i. 204; manuscript material in Löwenstein, "Gesch. der Juden am Bodensee," p. 81).

Jews settled in Diessenhofen again within half a century; but in 1401 a false accusation again gave rise to butcheries. The outrider of the governor had murdered Konrad, the four-year-old son of Councilor Hermann Lory of Diessenhofen. To save himself the man said that the Jew Michael Vinelmann (Veitelmann), who, with his son Gütlieb, had been admitted in 1396 on the condition of paying a yearly tax of eight gulden, had instigated the murder, and had promised three gulden "for the hot blood of the Christian child." The outrider was broken on the wheel; the Jew was burned alive without any examination; and little Konrad was sainted. On this occasion Jews at Schaffhausen, Winterthur, and other places were either burned or forced to accept baptism.

Contrary to all expectation Jews soon returned to Diessenhofen. As early as 1426, when its citizens "were in great debt and obliged to admit Jews and other people in order to better bear the great yearly tax," as one may read in the "ainunge" (town records) of Diessenhofen (Pupikofer, *l.c.* p. 63), a Jew was admitted as citizen, notwithstanding the objection of Junker Molli of Diessenhofen, an evil-minded person who had voted for the burning of Huss at the Council of Constance. The number of Jews in the city increased gradually. In 1453 the Jews Triefus (Dreifus) and Mennlis paid a tax of two pounds of heller each; the latter, who was in 1479 granted a safe-conduct for two years, settled in 1481 at Thiengen. As early as 1482 attempts were made to expel the Jews from Thurgau, but fortunately for them the governors were open to bribery. In 1489 the Jews of Diessenhofen were granted protection for three years, but in 1494 they had to leave the place with the other Jews of the canton.

Nothing is known of the religious condition of the Jews of Diessenhofen, except that they were forbidden to sell meat slaughtered according to ritual on the ordinary meat-stalls. The synagogue is said to have stood on the site now occupied by the house "Zum Erker." For several centuries no Jews lived here. Those that came from Gailingen on business had to pay the so-called Jews' tax, or Jews' stake-money, of from three to five batzen. Even toward the end of the eighteenth century the Jews were forbidden to pass across the Rheinbrücke on Sundays, except to the physician, apothecary, or midwife. In 1865 a Jew was granted the privilege of settling at Diessenhofen. In 1902 about twenty Jewish families were living in the city.

DIETARY LAWS (מאכלות אסורות)**:** Biblical and rabbinical regulations concerning forbidden food.

Vegetable Food.

A. The ancient Israelites lived chiefly on vegetable food and fruit, upon which the Bible places no restrictions (Gen. i. 29). With the development of the sacrificial system certain restrictions were placed on the use of the portions belonging to the priest, the Levite, and the poor (see Priestly Code; Poor-Laws). Besides these there were also some laws concerning vegetable and tree growths.

(1) "'Orlah": The fruit of a tree was forbidden during the first three years after its planting (Lev. xix. 23–25). In the fourth year the fruit was brought to Jerusalem and eaten there amid songs of thanksgiving ("neṭa' reba'i"). Those who lived at a distance from Jerusalem might redeem the fruit and bring the money to Jerusalem, and spend it in a similar manner. The law of 'orlah applied to all times and places ('Orlah iii. 9; Ḳid. 38b *et seq.*; Maimonides, "Yad," Ma'akalot Asurot, x. 9–18; Shulḥan 'Aruk, Yoreh De'ah, 294). See 'Orlah.

(2) "Ḥadash": The eating of new corn was forbidden until the second day of Passover, when the "'omer" was offered in the Temple (Lev. xxiii. 9–14). This prohibition also was extended to all times and places (Ḳid. *l.c.*; Men. 70a; Maimonides, *l.c.* 2–5; Yoreh De'ah, 293). See Ḥadash.

The reason for these laws seems to be contained in the sentence "The first of the first-fruits of thy land thou shalt bring into the house of the Lord thy God" (Ex. xxiii. 19).

(3) The use for any purpose whatever of the produce of two species of corn or of other vegetables sown in a vineyard was forbidden (Deut. xxii. 9). The sowing of mixed seed in gardens or in fields was also prohibited (Lev. xix. 19); but, if so sown, the produce was only forbidden in the case of a vineyard ("kile ha-kerem"). This prohibition applied originally only to Palestine, but was later extended by the Rabbis to all lands and times (Ḳid. 39a; Maimonides, *l.c.* 6–8; Yoreh De'ah, 295–297).

Animal Food.

B. Among the early Hebrews animal food was partaken of by the common people only on festive occasions, usually in connection with sacrifices. The permission given to Noah and to his children to eat animal food (Gen. ix. 2, 3) was conditioned upon the abstinence from blood (see Blood). Some of the Tannaim were of the opinion that during their journey through the wilderness the Israelites were permitted to eat the meat only of such animals as had previously been sacrificed, some portions of which had been burned on the altar, and some given to the priests; others thought differently (Ḥul. 17a; compare Ex. xvi. 3).

I. The Bible, in its legislative portions, makes explicit provisions for the distinction between clean and unclean animals mentioned earlier in connection with the Flood (Gen. vii. 2, 8). See Clean and Unclean Animals.

II. Forbidden as being unclean is also that which comes out of the unclean (Bek. 5b). This principle applies not only to the young, but to all animal products.

(1) It is therefore forbidden to use the milk of unclean animals or of animals which suffer from some visible malady which causes them to be legally unfit ("ṭerefah") for food. When, after the ritual slaughtering, an animal, apparently sound during its life, is found to have been diseased, its milk, or cheese made of its milk, is forbidden as food.

An adult may not suckle from the breasts of a woman, although, if placed in a vessel, woman's milk is not forbidden. A child may suckle until the end of its fourth year if healthy, or until the end of its fifth year if sickly. If, however, it was interrupted after the second year for three consecutive days with the intention of weaning it, it is not permitted to suckle again (Ket. 60a; Bek. 6a; Ḥul. 112b; Maimonides, *l.c.* 3; Yoreh De'ah, 81).

(2) Eggs of unclean birds, or of birds suffering from a visible sickness, which makes them ṭerefah, are forbidden. The following signs were laid down by the Rabbis, by which eggs of clean birds could be distinguished from those of unclean. If both ends of the egg are sharp or round, or if the yolk is outside and the white inside, it is of an unclean bird. If one end is sharp and the other round, and the white is outside and the yolk inside, reliance may be placed on the testimony of the seller, who must say of what species of birds it comes. As a rule, however, since most eggs sold are those of chickens, ducks, or geese, no questions need be asked (Ḥul. 64a; Maimonides, *l.c.* 7–11; Yoreh De'ah, 86).

Milk and Eggs.

A drop of blood found on the yolk of an egg is considered an indication that the process of hatching has already begun, and the egg is therefore forbidden. It is not necessary, however, to examine eggs before using them to see whether they contain any blood (Yoreh De'ah, 66, 2–8).

(3) The roe of unclean fishes is also forbidden. Pickled fish may be eaten, though preserved together with unclean fish ('Ab. Zarah 40a; Maimonides, *l.c.* 20–24; Yoreh De'ah, 83, 5–10).

(4) The honey of bees is permitted, since it is merely the secretion of the flower gathered by the bee and then discharged, and contains no portion of the insect. There is, however, a difference of opinion regarding honey produced by other insects (Bek. 7b; Maimonides, *l.c.* 3; Yoreh De'ah, 81, 8, 9).

III. The ancient Israelites looked with horror upon the custom prevalent among the surrounding nations of cutting off a limb or a piece of flesh from a living animal and eating it. Its prohibition is one of the seven Noachian laws (Sanh. 56a). If the limb was still partly attached to the body, but could never grow again, and the animal was legally slaughtered, this limb had to be thrown away (Ḥul. 101b; Maimonides, *l.c.* 5; Yoreh De'ah, 62; see also Cruelty to Animals).

IV. An animal that has died a natural death, or has been killed in any way other than that prescribed by the law of Sheḥiṭah, is called "nebelah," and makes impure all persons or things that it touches (Deut. xiv. 21). One torn by beasts (Ex. xxii. 30 [A. V. 31]) or subject to some mortal disease is called ṭerefah. Both of these are forbidden as food; "for thou art a holy people to the Lord thy God." The laws of ṭerefah are given in Ḥul. iii.; Maimonides, *l.c.* 5–11; Yoreh De'ah, 29–60. See Carcass and Ṭerefah.

V. Blood, which is supposed to contain the vital element (Gen. ix. 4), is repeatedly prohibited in the Bible (Lev. xvii. 11; Deut. xii. 16). It must not be eaten by Jews at any time or place (Lev. iii. 17). Not only blood itself, but flesh containing blood is also forbidden (Gen. ix. 4; see Blood). For the laws of blood see Ḥul. 111a, 117a; Ker. 2a, 20b; "Yad," Ma'akalot Asurot, vi.; Yoreh De'ah, 66–78.

Prohibition of Blood.

This prohibition applies only to the blood of mammals or of birds, not to the blood of fishes or of locusts. Only the blood which is contained in the veins, or congealed on the surface of the meat, or which has begun to flow from the meat, is forbidden; as long as it is a part of the meat it may be eaten. See Meliḥah.

VI. The fat ("ḥeleb") of ox, sheep, or goat is forbidden (Lev. vii. 23–25). The punishment decreed for transgression of this law is "karet." The fat of birds or of permitted wild animals is not forbidden. The fat of the young found within the womb of the mother after the latter has been legally killed, and its sinew "that shrank," are permitted. See Fat.

VII. The custom of refraining from eating the sinews of the hind legs of an animal arose, according to the Biblical narrative (Gen. xxxii. 32), from the incident of Jacob's wrestling with the angel, through which the patriarch became lame. It is not put in the form of a prohibition in the legal portions of the Bible, although the Rabbis considered it of Mosaic origin (Ḥul. 100b). Birds are excluded from this law.

C. The threefold repetition of the commandment prohibiting the seething of a kid in its mother's milk (Ex. xxiii. 19, xxxiv. 26; Deut. xiv. 21) is explained by the Rabbis as referring to three distinct prohibitions: cooking meat and milk together; eating such mixture; and deriving any benefit from such a mixture (Ḥul. 115b). See Milk.

Seething Kid in Mother's Milk.

D. In almost all cases of forbidden food, the transgressor was liable to punishment only when the portion which he ate was at least as large as an olive. The prohibition, however, extends at times farther than that (Yoma 73b, 80a), in some cases even to the taste and the odor. Hence, if a forbidden object falls into a boiling pot of permitted food, all the food contained in the pot is forbidden, unless no taste of the forbidden object can be detected in the food of the pot.

E. It is forbidden to derive any benefit from objects used for idolatrous purposes. Meat consecrated to an idol, wine of libation, spices, or anything else used in the idol's service is prohibited ('Ab. Zarah 29b); in fact, any animal slaughtered or wine touched by an idolater was prohibited to the Israelite, because it was supposed to be consecrated to his idol; and these prohibitions applied not only to eating or to drinking, but to any benefit derived from it. Even after the practise of idolatry lapsed, these prohibitions remained in force as rabbinic institutions; wherefore the wine of a non-Jew is forbidden.

On account of the apprehension of intermarriage, the Rabbis also prohibited eating the bread of a non-Jew, or a dish cooked by a non-Jew ('Ab. Zarah 35b, 38a). It is permitted, however, to buy bread of a non-Jewish baker. If part of the cooking was done by an Israelite, the dish may be eaten. Non-Jewish servants may cook for the families which they serve, for since they are in the house of the Jew, it is assumed that one of the household gives occasional assistance. Some authorities, however, object to permitting non-Jewish servants to cook (Yoreh De'ah, 113, 4, Isserles' gloss; compare "Sifte Kohen" and "Ṭure Zahab," *ad loc.*).

The non-Jew's testimony regarding these matters can not be relied upon, since he does not know the import of these laws to the Jew; wherefore not only meat, but also milk and cheese bought of a non-Jew are forbidden, because it is assumed that, by some carelessness or by a desire to improve, the milk may have been mixed with some forbidden ingredient. A Jew is therefore required to be present at the milking, and at the preparation of the cheese. Different customs prevail regarding butter bought of a non-Jew; and in regard to milk and cheese the later authorities are more lenient ('Ab. Zarah ii.; Maimonides, *l.c.* iii. 13, xi.-xiii., xvii. 9-26; Yoreh De'ah, 112-115, 123-138).

F. "Sakkanah," or danger to life, is given by the Rabbis as a reason for a number of prohibitions included in the dietary laws. An animal that ate poison is forbidden on account of sakkanah (Ḥul. 58b). Meat and fish should not be cooked or eaten together; for such a mixture is supposed to cause leprosy. It is therefore the custom to wash the mouth between eating a dish containing fish and one containing meat (Pes. 66b; Yoreh De'ah, 117, 2, 3). Water that was left uncovered overnight was not permitted as drink in olden times, because of the apprehension that a serpent might have left its venom in it. Where serpents are not found this prohibition does not exist (Jer. viii. 4; Yoreh De'ah, *l.c.* 1).

Regarding the custom to refrain from meat and wine during the first nine days of the month of Ab or from the seventeenth day of Tammuz till the tenth of Ab, see FAST-DAYS; see also PASSOVER.

S. S. J. H. G.

——**From the Traditional Point of View:** From the point of view of traditional or conservative Judaism, the dietary laws are divinely ordained, and the rejection of the yoke of these laws is tantamount to a rejection of the belief in Israel's redemption from Egypt (Sifra, Shemini, xii., based upon Lev. xi. 44-45). To eat pork was, therefore, considered as equivalent to apostasy in the Maccabean time and later (II Macc. vii. 1 *et seq.*; IV Macc. v.; Philo, "In Flaccum," § 11). One should abstain from it not only from personal aversion, but because "our Father in heaven has decreed that we should abstain from it" (Sifra, Ḳedoshim, xi.). "God showed to Moses the different species of animals, and said: 'These may ye eat, and these not'" (Sifra, Shemini, ii.; Ḥul. 42a). "The many rules regulating the Jew's diet are intended to test his piety and love for God" (Tan., Shemini, ed. Buber, 12, 13). "There is no other reason for all the dietary laws than that God gave them" (Samson Raphael Hirsch, "Horeb," 1837, p. 433). Thus says Lasch ("Die Goettlichen Gesetze," 1857, p. 173) in regard to the dietary laws: "He who truly fears God will observe His laws without inquiring into the reasons for them." Any question regarding the historical development of these laws is obviously excluded from the standpoint of traditional Judaism. "The dietary laws," says M. Friedländer ("The Jewish Religion," p. 237, London, 1891), "are exactly the same now as they were in the days of Moses."

Nevertheless a rational interpretation of the Biblical and Mosaic laws has at all times endeavored to find the dietary laws prophylactic of diseases of both body and soul. Indeed, many statisticians have declared that the observance of the dietary laws has greatly contributed to the longevity and physical as well as moral power of the Jewish race (see H. Behrend, "Communicability of Diseases from Animals to Man," London, 1895).

On the other hand, the cabalists hold that whosoever eats of the forbidden food becomes imbued with the spirit of impurity and is cast out of the realm of divine holiness (see Zohar iii. 41b). As to the aversion of the Jew to the eating to pork see SWINE.

——**Considered Historically and from the Critico-Historical and Reform Point of View:** According to Gen. i. 29, the human race was originally allowed to eat vegetable food only; after the Flood, however, animal food was permitted, but on condition that blood, which is the soul (Gen. ix. 3,4), should not be partaken of. The people of Israel were forbidden to eat the flesh of beasts found torn or that had died a natural death, as well as all kinds of animals declared unclean; the stated reason being that Israel should be "a holy people unto the Lord," "distinguished from other nations by the avoidance of unclean and abominable things that defile them" (Ex. xxii. 30 [A. V.], 31; Deut. xiv. 3-21; Lev. xi. 43, xx. 24). Various other reasons have been alleged by ancient and by modern writers: (1) hygienic ("Moreh Nebukim," ii. 48; Samuel b. Meïr on Lev. xi. 3; Michaelis, "Mosaisches Recht," iv. 202)—*e.g.*, the sturgeon and various scaleless fishes and the pig are instanced as producing diseases; (2) psychological, presupposing that the animals thus prohibited appeared loathsome; or that they, and more especially the carnivorous beasts and birds, beget a spirit of cruelty in persons that eat them (IV Macc. 5; Naḥmanides on Lev. xi.); (3) dualistic, holding that, like the Persians, the Israelites ascribed all the unclean animals to an evil power (Origen, "Contra Celsum," iv. 93; Bohlen, "Genesis," p. 88; De Wette, "Hebräische Archäologie," p. 188; Lengerke, "Canaan," i. 379); (4) national, maintain-

Alleged Reasons for Laws.

ing simply that the Israelites should be secluded from all other nations (Spencer, "De Legibus Hebræorum," 1732, p. 121; Michaelis, *l.c.*). None of these alleged reasons, however, can be considered as Scriptural. Really, the animals forbidden in the Mosaic law are almost the same as are prohibited to the priests or saints in the ancient Hindu, Babylonian, and Egyptian laws.

In the "Laws of Manu," v. 7, 11-20 ("S. B. E." xxv. 171 *et seq.*) carnivorous birds—those that feed striking with their beaks, or that scratch with their toes, or live on fish or meat—fishes that eat any kind of flesh, five-toed animals, and strange beasts or birds are forbidden; domestic animals that have teeth in one jaw only, except the camel, are eatable; also the porcupine, hedgehog, rhinoceros, tortoise, and hare are allowed; the village cock is forbidden, as is the milk of one-hoofed animals. In the "Laws of Apastamba," i. 5, 29-39 (*ib.* ii. 64), one-hoofed animals, camels, village pigs, and cattle are forbidden; also carnivorous birds that scratch with their feet, or feed thrusting forward their beaks, and the cock. Five-toed animals (with the exception of the boar, porcupine, rhinoceros, and hare), and misshapen and snake-headed fish or such as live on flesh only, are prohibited. Similarly, the "Laws of Vasishta," xiv. 38-48 (*ib.* xiv. 74), and those of Bandhayuna, i. 5, 12 (*ib.* xiv. 184).

The Ḥaranians may eat all animals that chew the cud, with the exception of the camel, and, with the exception of doves, all birds that are not birds of prey (Chwolson, "Die Szabier," 1856, ii. 7, 102). The Egyptian priests abstained from eating fish, one-hoofed quadrupeds or such as had more than two divisions in their hoofs and no horns, and all carnivorous birds (Porphyrius, "De Abstinentia," iv. 7). The law of Zoroaster contained probably the same prohibitions as the Hindu law, but the books are lost; and the classification of animals in "Bundahish," ch. xiv. ("S. B. E." v. 47), has no bearing on forbidden food.

Of the theories suggested for these various prohibitions of animals (see Porphyrius, *l.c.* i. 14; Spencer, *l.c.* pp. 82–92; and Sommer, "Biblische Abhandlungen," 1846, pp. 271–322) only that proposed by W. Robertson Smith ("Kinship and Marriage in Early Arabia," 1885, p. 306; *idem*, "Rel. of Sem." p. 270) seems to offer a plausible explanation. In view of the fact that almost every primitive tribe holds certain animals to be tabooed, the contention is that the forbidden or tabooed animal was originally regarded and worshiped as the totem of the clan; but the facts adduced do not sufficiently support the theory, especially in regard to the Semites, to allow it to be more than an ingenious conjecture, though Stade, "Gesch. des Volkes Israel," i. 485; Benzinger, "Arch." 1894, p. 484; Jacobs, "Studies in Biblical Archæology," p. 89; and Baentsch, "Exodus and Leviticus," 1900, p. 355, have adopted it (against Nöldeke, in "Z. D. M. G.," 1886, pp. 157 *et seq.*).

Priestly Sanctity of the Nation.

It is certain that the conception of clean and unclean animals did not originate with the Hebrew lawgiver, but, in accordance with Biblical tradition, goes back to prehistoric times, the distinction being assumed as existing in the days of Noah. These unclean (or tabooed?) animals were to be avoided by all those persons who laid special claim to holiness; wherefore the priests and saints of all ancient nations were commanded to shun them. Samson's mother, when she was to give birth to a Nazarite, was warned against eating anything unclean (Judges xiii. 4, 7, 14). The idea that the people of Israel were "a kingdom of priests and a holy nation" (Ex. xix. 6) could not be more impressively set forth than by laws which extended the universal priestly prohibition of unclean food to the entire people. This priest-idea is the only possible meaning of Lev. xx. 25, 26 (R. V.): "I have separated you from the peoples, that ye should be mine."

The precept given by the angel to Samson's mother shows, however, that the people in general did not heed the dietary laws. The same may be inferred from Ezekiel's words concerning himself as priest: "Ah, Lord God! behold my soul hath not been polluted: for from my youth up even till now have I not eaten of that which dieth of itself, or is torn of beasts; neither came there the flesh of a sacrificially loathsome thing [פגול; A. V. "abominable flesh"] into my mouth" (Ezek. iv. 14; compare Ḥul. 37b, where the rabbinical interpretation of the passage is given). In fact, Ezekiel desires the prohibition of Nebelah and Ṭerefah to be applied to priests only: "The priests shall not eat of anything that dieth of itself or is torn, whether it be fowl or beast" (Ezek. xliv. 31; see Men. 45a, "The prophet Elijah shall some day explain this problematic passage"). Thus it is simply an extension of the priestly law to the whole nation, as "holy to the Lord," which underlies the prohibition of nebelah and ṭerefah (Ex. xxii. 30 [A. V.], 31; Deut. xiv. 21; Lev. xvii. 15, xxii. 8).

Blood, Fat, etc.

On the other hand, the prohibition of blood and fat (Lev. iii. 17, vii. 24–27, xvii. 10–14; compare Gen. ix. 4) rests on different grounds. Maimonides ("Moreh," part iii., ch. xlvi., xlviii.) gives a rationalistic explanation. "Blood and fat belong to God, and must be brought upon the altar" (Targ. Yer. to Lev. iii. 17); they are divine property; neither Israelite nor non-Israelite is allowed to eat thereof; and the penalty for violation of this law is excision ("karet"). Therefore, the blood of every animal, even when it is unfit for the altar, must be "poured out . . . as water" (Deut. xii. 24), and the fat of the nebelah and ṭerefah is forbidden (Lev. vii. 24). In Deuteronomy (xii. 23 and elsewhere), however, fat is not mentioned (see Geiger, "Urschrift," p. 467, and Karaites). To the same category seems to belong also the ancient prohibition of the sciatic nerve, or rather the gluteal muscle ("sinew of the hip," גיד הנשה), which is upon the hollow of the thigh (Gen. xxxii. 32, R. V.; see Gunkel's commentary to the passage). This part, as representing the locomotive and, therefore, vital power of the animal, could easily be regarded as sacred to the Deity, just as the brain and the heart, and other vital parts of animals, were avoided by the Greeks (see Sommer, *l.c.* pp. 348, 349). The prohibition of eating together meat and milk is probably older than the rabbinical interpretation of the law, "Thou shalt not seethe the kid [feeding] upon its mother's milk (so the Karaites, "Eshkol," p. 240; Geiger, "Gesammelte Schriften," iii. 305; and Luther; A. V. "in its mother's milk," Ex. xxiii. 19 and parallels; see Dillmann's commentary *ad loc.*). It seems to rest on Temple practise, which avoided the mixing of dishes that required a different treatment from the Levitical point of view (Men. 73a). Hence as early as the schools of Hillel and Shammai the question was discussed whether cheese and fowl might be brought together on one table (Ḥul. viii. 1; 'Eduy. v. 2; compare Pes. 30a, 36a).

Haggadic and Halakic Views.

All these dietary laws, however, intended to give to the Jew the character of priestly sanctity, were declared to be "ḥukkim" (divine statutes), to which "the evil spirit ["yezer ha-ra'"] and the heathen nations object" (Sifra, Aḥare, 13). The allegorical interpretations followed by the Alexandrians (Aristeas' Letter, 140–170) are proof of a prevailing tendency to treat the dietary laws lightly; but the Maccabean reaction against Hellenism lent new importance to them (II Macc. vi. 18; IV Macc. *l.c.*; Sifra, Ḳedoshim, 11). At the same time, the view is expressed by the Rabbis that the forbidden meat shall again be allowed to Israel, as indeed it was believed to have been eaten by the Israelites before entering the Holy Land (see Midr. Teh. to Ps. cxlvi. 7; Lev. R. xiii.; Ḥul. 17a). The very fact that the whole list of forbidden animals is allegorized in the Midrash (Lev. R. xiii.) places the dietary laws in a peculiar light, and forcibly recalls their treatment in the patristic literature. See CLEAN AND UNCLEAN ANIMALS.

The Halakah recognized the maxim to abstain from whatever savored of any possible approach to the forbidden diet; the prohibitions became ever more numerous, so as to make the wall of separation between Jew and non-Jew well-nigh insurmountable. It is to be noted that those Jews who refused to accept these rabbinical prohibitions fled to the Samaritans (Josephus, "Ant." xi. 8, § 7). The rabbinical principle was consistent in so far as it tended to keep the Jew isolated from his idolatrous surroundings by prohibiting even the meal cooked by the heathen (בשול נכרים, 'Ab. Zarah 38a), as well as the wine served on the table (Shab. 17b; see HEATHENISM and IDOLATRY), and eating at the same table with them (Book of Jubilees, xxii. 16). In this the Pharisees had the scrupulous piety of the Jewish woman as their main support (Josephus, *l.c.* xvii. 2, § 4).

In the Middle Ages the dietary laws became the chief mark of distinction between the Jew and the Christian, whose antinomic maxim was: "There is nothing from without the man that going into him can defile him: but the things which proceed out of the man are those that defile the man" (Mark vii. 15, R. V.; compare Matt. xv. 10–20; Acts x. 15; I Cor. viii. 8), in all probability borrowed from the Gnostic teaching: "We are as little defiled by meats as is the sea by tainted influxes" (Porphyrius, *l.c.* i. 42; Bernays, "Theophrast's Schrift über Frömmigkeit," pp. 15 *et seq.*).

Attitude of Reform Judaism.

Reform Judaism claims that those laws affect differently the social position of the modern Jews, living in a world which is no longer idolatrous or hostile as in former days. They are no longer regarded as a symbolical expression of his being the consecrated priest or Nazarite among the nations, since the priests and saints of no other nation observe these laws as in Mosaic times. On the contrary, they tend to keep him from associating with his fellow citizens with the view of presenting to them his religious truth as "the light" and "the covenant" of the nations. Whether justified in doing so or not, the great majority of West European Jews have broken away from the dietary laws; and the question for the Reform rabbis of the nineteenth century was whether the religious consciousness of the modern Jew should be allowed to suffer from a continual transgression of these laws, or whether the laws themselves should be submitted to a careful scrutiny as to their meaning and purpose and be revised—that is, either modified or abrogated by the rabbinical authorities of the present time. A proposition to this effect was made at the Rabbinical Conference of Breslau (see CONFERENCES, RABBINICAL), and a committee consisting of Drs. Einhorn, Holdheim, A. Adler, S. Hirsch, and Herzfeld was appointed to report at the next conference, which, however, was never held. Dr. Einhorn's report, on behalf of the committee, was nevertheless published in "Sinai" (1859 and 1860). Its leading idea is that the dietary laws, with the exception of the prohibition of blood and of beasts that have died (or die) a natural death, are inseparably connected with the Levitical laws of purity and the priestly sacrificial laws, and are therefore of a mere temporary ceremonial character and not essentially religious or moral laws.

G. Wiener in an exhaustive work of 524 pages, M. Kalisch, and K. Kohler have pleaded for a revision of the dietary laws. S. R. Hirsch and M. Friedländer have written in favor of the full retention of the laws (see bibliography below). Sam Hirsch gives a symbolic and allegorical interpretation of these laws in his Catechism, 2d ed., pp. 55–64, Philadelphia, 1877. As a matter of course, this question of revising or abrogating Biblical and rabbinical laws has no bearing upon the majority of Jews, who believe in the immutability of the Law, both the written and the oral. See ABROGATION OF LAWS; ARTICLES OF FAITH; REFORM JUDAISM.

DIETARY LAWS IN ISLAM: The Mohammedan dietary laws are neither as rigorous nor as numerous as in Judaism. They were not introduced into the religious code until the Medinian period of Mohammed's career. He probably found it unwise to force dietary restrictions on converts, mostly recruited from the poorer classes, who did not despise the meanest food, and he therefore deferred such legislation to a more propitious time. Certain restrictions, however, were already known, as ancient custom forbade, under certain circumstances, the eating of camels (Koran, sura v. 102, vi. 144), but they were ignored by Mohammed. Swine were probably also held in abhorrence. For definite rules concerning diet, Mohammed followed Biblical models: "He has only forbidden you the carrion, and the blood, and swine's flesh, and that which has been hallowed to any other deity. But he who is forced by necessity, not wilfully transgressing, commits no sin; behold, Allah is forgiving, merciful" (sura ii. 168; see also sura vi. 146; xvi. 115, 116).

No clean animal is lawful food unless the name of

Allah was pronounced while it was slaughtered. Mohammedans are therefore allowed to eat the flesh of animals killed after the Jewish fashion. Game is also lawful if killed under the same conditions (sura. v. 95, 97). Fish and locusts, however, are exempt from this rule as in Jewish law. The prohibition of wine was introduced gradually. Drinking and gaming being equally productive of mischief, they were discussed together. At first Mohammed was satisfied with simply discouraging drinking and gaming (sura ii. 216); but later in a (Deuteronomic) revelation he says (sura v. 92): "O believers, wine, dice, images, and divining arrows are an abomination of the works of Satan; therefore avoid them that you may prosper." "In those who believe and do good works it is no sin that they tasted wine and game before they were forbidden" (sura v. 94). All intoxicants are included in this prohibition, and some theologians even go so far as to prohibit coffee and tobacco.

K. H. HIR.

DIGNE (Hebr. דינייא): Capital of the department of Basses-Alpes, France. There was a Jewish community here as early as the thirteenth century. Salve, a Jew of Digne, with Rotelus of Olobrega (Israel of Valabrègue) and Bonfils of Beaucaire, was one of the commissioners appointed to apportion the tax which, in 1299, the Jews had promised to the Count of Provence, to whom Digne belonged. In 1305 Baruch of Digne, an eminent rabbi, had a heated controversy with his former teacher, Isaac Cohen of Manosque, and was excommunicated by him. Baruch, refusing to submit to this punishment, went to France. Several Jews whose names indicated a connection with the town of Digne were established at Carpentras in the seventeenth century ("Rev. Et. Juives," xii. 213, 217, 225). Another Jew, Samson of Digne, was living at Forcalquier in the beginning of the fourteenth century (*ib.* xli. 274). About 1669 Solomon ben Moses of Milhaud, in one of his letters published by D. Kaufmann, praised the generosity of a certain Isaac דידיגניוה—a word which probably means "of Digne" (*ib.* xviii. 133).

DIJON (Hebr. דינגון): Chief town of the department of Côte-d'Or, France. Jews have been settled here from time immemorial. They occupied two special quarters: the first and most important comprised the whole Rue Buffon, a part of which bore, until the French Revolution, the name "Rue des Juifs"; the second, "La Petite Juiverie," comprised the Rue Piron, the lower part of the town, with a section of the Rue Amiral Roussin and of the Rue Charrue.

Before the Expulsion.

In 1196 Duke Eudes III. presented the Jews of the village of Fénay to the town of Dijon, and the same duke "gratified" a certain Vigier with the Jew Hélie and his family in 1197. In 1204 he ceded to the Jew Valin, his creditor, the use of certain revenues. A Jew of Dijon, Bandit, the son of Benion, was the creditor of Philippe, Abbot St. Loup of Troyes, in 1216; another Jew, Salamine, made important loans to the abbeys of Sainte-Bénigne and Sainte-Seine in 1223, for which, however, Duchess Alix of Vergy, widow of Eudes III., made him sign a bill of release. Eudes III. annulled a debt due to the Jew Jessuel (1217), and Hugues IV. another, due to Dedone, "Judæus meus" (1228). At the request of David Lévy and Joseph of St. Mihiel, Philip the Bold, Duke of Burgundy, permitted twelve Jewish families to settle in his duchy in 1374. In 1379 ten Jewish families settled at Dijon. The states of Burgundy demanded the expulsion of the Jews (1382–1384); but as the latter had lent to the duke 3,000 livres for the continuation of the war in Flanders, they were authorized to remain. The duke even conferred upon them certain privileges, in virtue of which fifty-two families were to be allowed to live in Burgundy during the following twelve years, provided they paid a certain sum annually. The leaders of the Jewish community at that time were Joseph of St. Mihiel and David and Solomon of Balme.

After the Expulsion.

The Jews were not eager to avail themselves of the favors granted them by Duke Philip the Bold. In 1387 only fifteen families were living in Burgundy. Notwithstanding the exile of 1397, there were still some Jews at Dijon after that time: Solomon of Balme was living there as late as 1417. The Parliament of Dijon in 1730 authorized Joseph Raphael of Lazia and other Jewish merchants of Bordeaux to trade for one month in every season of the year in all the towns in its jurisdiction; but the Council of State annulled the privilege in the following year. The present community of Dijon dates from 1789. It comprised 50 families in 1803, and about 400 individuals in 1902. Dijon belongs to the "Circonscription Consistoriale" of Lyons.

Synagogue and Cemetery.

The ancient synagogue was situated in the Rue Buffon. In the third year of the French Revolution it was in Rue Maison-Rouge; in 1795, in Rue des Champs; in 1820, in Place d'Armes; in 1829, in a part of the apartments of the Prince of Condé; in 1841, on the ground floor of the Hôtel de Ville. The present temple, the corner-stone of which was laid Sept. 21, 1873, was dedicated Sept. 11, 1879. It is situated on the Boulevard Carnot, in one of the finest quarters of the city. In addition to the synagogue, the Jews of Dijon in the Middle Ages possessed a large schoolhouse in Rue Buffon.

The ancient cemetery was situated in the Rue du Grand-Patet, behind the Jewish quarter. In 1331 Duke Eudes IV. presented to the abbey of Bussière a part of this cemetery, valued at 400 livres, an enormous sum for that time. In 1320 the cemetery was on the route to Beaune, in a place called "Les Baraques de Gevrey." Philip the Bold, in consideration of the sum of one franc in gold per capita, authorized the Jews of Dijon to own a cemetery close to the city (1373). In 1789, on their return to Dijon, the Jews bought a plot on the Chemin de Fontaine, northwest of the city, which was transformed into a cemetery; but it has, for hygienic reasons, been closed for some years.

About 1160 the scholars of Dijon took part in the synod of Troyes. Among the residents of Dijon in the thirteenth century were Rabbi of Dijon (1250),

Haggadic and Halakic Views.

All these dietary laws, however, intended to give to the Jew the character of priestly sanctity, were declared to be "ḥukkim" (divine statutes), to which "the evil spirit ["yezer ha-ra'"] and the heathen nations object" (Sifra, Aḥare, 13). The allegorical interpretations followed by the Alexandrians (Aristeas' Letter, 140–170) are proof of a prevailing tendency to treat the dietary laws lightly; but the Maccabean reaction against Hellenism lent new importance to them (II Macc. vi. 18; IV Macc. *l.c.*; Sifra, Ḳedoshim, 11). At the same time, the view is expressed by the Rabbis that the forbidden meat shall again be allowed to Israel, as indeed it was believed to have been eaten by the Israelites before entering the Holy Land (see Midr. Teh. to Ps. cxlvi. 7; Lev. R. xiii.; Ḥul. 17a). The very fact that the whole list of forbidden animals is allegorized in the Midrash (Lev. R. xiii.) places the dietary laws in a peculiar light, and forcibly recalls their treatment in the patristic literature. See Clean and Unclean Animals.

The Halakah recognized the maxim to abstain from whatever savored of any possible approach to the forbidden diet; the prohibitions became ever more numerous, so as to make the wall of separation between Jew and non-Jew well-nigh insurmountable. It is to be noted that those Jews who refused to accept these rabbinical prohibitions fled to the Samaritans (Josephus, "Ant." xi. 8, § 7). The rabbinical principle was consistent in so far as it tended to keep the Jew isolated from his idolatrous surroundings by prohibiting even the meal cooked by the heathen (בשול נכרים, 'Ab. Zarah 38a), as well as the wine served on the table (Shab. 17b; see Heathenism and Idolatry), and eating at the same table with them (Book of Jubilees, xxii. 16). In this the Pharisees had the scrupulous piety of the Jewish woman as their main support (Josephus, *l.c.* xvii. 2, § 4).

In the Middle Ages the dietary laws became the chief mark of distinction between the Jew and the Christian, whose antinomic maxim was: "There is nothing from without the man that going into him can defile him: but the things which proceed out of the man are those that defile the man" (Mark vii. 15, R. V.; compare Matt. xv. 10–20; Acts x. 15; I Cor. viii. 8), in all probability borrowed from the Gnostic teaching: "We are as little defiled by meats as is the sea by tainted influxes" (Porphyrius, *l.c.* i. 42; Bernays, "Theophrast's Schrift über Frömmigkeit," pp. 15 *et seq.*).

Attitude of Reform Judaism.

Reform Judaism claims that those laws affect differently the social position of the modern Jews, living in a world which is no longer idolatrous or hostile as in former days. They are no longer regarded as a symbolical expression of his being the consecrated priest or Nazarite among the nations, since the priests and saints of no other nation observe these laws as in Mosaic times. On the contrary, they tend to keep him from associating with his fellow citizens with the view of presenting to them his religious truth as "the light" and "the covenant" of the nations. Whether justified in doing so or not, the great majority of West European Jews have broken away from the dietary laws; and the question for the Reform rabbis of the nineteenth century was whether the religious consciousness of the modern Jew should be allowed to suffer from a continual transgression of these laws, or whether the laws themselves should be submitted to a careful scrutiny as to their meaning and purpose and be revised—that is, either modified or abrogated by the rabbinical authorities of the present time. A proposition to this effect was made at the Rabbinical Conference of Breslau (see Conferences, Rabbinical), and a committee consisting of Drs. Einhorn, Holdheim, A. Adler, S. Hirsch, and Herzfeld was appointed to report at the next conference, which, however, was never held. Dr. Einhorn's report, on behalf of the committee, was nevertheless published in "Sinai" (1859 and 1860). Its leading idea is that the dietary laws, with the exception of the prohibition of blood and of beasts that have died (or die) a natural death, are inseparably connected with the Levitical laws of purity and the priestly sacrificial laws, and are therefore of a mere temporary ceremonial character and not essentially religious or moral laws.

G. Wiener in an exhaustive work of 524 pages, M. Kalisch, and K. Kohler have pleaded for a revision of the dietary laws. S. R. Hirsch and M. Friedländer have written in favor of the full retention of the laws (see bibliography below). Sam Hirsch gives a symbolic and allegorical interpretation of these laws in his Catechism, 2d ed., pp. 55–64, Philadelphia, 1877. As a matter of course, this question of revising or abrogating Biblical and rabbinical laws has no bearing upon the majority of Jews, who believe in the immutability of the Law, both the written and the oral. See Abrogation of Laws; Articles of Faith; Reform Judaism.

DIETARY LAWS IN ISLAM: The Mohammedan dietary laws are neither as rigorous nor as numerous as in Judaism. They were not introduced into the religious code until the Medinian period of Mohammed's career. He probably found it unwise to force dietary restrictions on converts, mostly recruited from the poorer classes, who did not despise the meanest food, and he therefore deferred such legislation to a more propitious time. Certain restrictions, however, were already known, as ancient custom forbade, under certain circumstances, the eating of camels (Koran, sura v. 102, vi. 144), but they were ignored by Mohammed. Swine were probably also held in abhorrence. For definite rules concerning diet, Mohammed followed Biblical models: "He has only forbidden you the carrion, and the blood, and swine's flesh, and that which has been hallowed to any other deity. But he who is forced by necessity, not wilfully transgressing, commits no sin; behold, Allah is forgiving, merciful" (sura ii. 168; see also sura vi. 146; xvi. 115, 116).

No clean animal is lawful food unless the name of

DILLON, MARIA LVOVNA: Russian sculptress; born at St. Petersburg in 1859. She entered the Imperial Academy of Fine Arts at St. Petersburg in 1875, and was graduated thence in 1888 with a gold-medal for her statue "Andromeda." After the completion of her academic course she went abroad, first to Paris, and then to Italy.

Of the works which she has placed on exhibition since 1888, the most important are "Nyega" (Indulgence), "Nevolnitza" (The Slave), "Kapriznitza" (Capricious Women), "Tatyana," "Ophelia," The Bacchante "Lily" (purchased by Emperor Nicholas II.). The grand duke Alexis secured her statue "Golovka" (Little Head), and the grand duke Serge her statue "Nyega."

In a competition by twenty-eight sculptors she received the first premium and a medal for a design for the commemoration of the 200th anniversary of the founding of St. Petersburg. H. R.

DILLON, MARK LVOVICH: Russian jurist; born at Ponevyezh Feb., 1843; educated at the yeshibah of Wilna, the gymnasium of his native town, and the University of Moscow, graduating from the last in 1867. From 1868 to 1874 he occupied in turn the positions of assistant secretary, secretary, and chief secretary of the Senate. Subsequently Dillon was appointed adviser to the senator empowered to supervise the courts in the government of Saratov, the services he rendered in that capacity winning for him the ribbon of the Order of Saint Stanislas. From 1874 to 1896 he occupied various judicial positions in the circuit courts of Perm, Simbirsk, and Kazan. In 1883 he was made a knight of the Order of Anna, and in 1893 state councilor, which title in Russia raises its holder to the rank of the hereditary nobility. Owing to his religion, however, Dillon was barred from advancement to any higher judicial post, and he resigned from the judiciary. When in 1896 a ukase refused admission to the bar to Jewish advocates, an exception was made in the case of Dillon; he then removed from Kazan to St. Petersburg, where he practised law for two years only. On June 16, 1898, while defending a case in the Supreme Court, he was stricken with paralysis. By the advice of his physicians he removed to Germany and later to Montreux, Switzerland. Dillon is a great-grandson of Eliezer Dillon, and his father, Lev Yakovlivich Dillon, was one of the leading progressionists in Ponevyezh and a friend of the poet Leon Gordon. H. R.

DIMI (also called Abdimi and Abudimi): Amora of the fourth century who often carried Palestinian doctrinal and exegetical remarks to the Babylonian schools, and Babylonian teachings to Palestine (see Abdima Naḥota). In consequence of a decree of banishment issued by Constantius against the teachers of Judaism in Palestine, he finally settled in Babylonia (Ḥul. 106a; Grätz, "Gesch." 2d ed., iv. 338; against Grätz, however, see I. ha-Levi, "Dorot ha-Rishonim," ii. 468–473). Dimi was a perfect storehouse of diversified knowledge, which he diligently gathered and as freely disseminated; and he made the transmission of the teachings of his most prominent Palestinian predecessors his special mission. He reported in the names of Jannai, Ḥanina, Joshua ben Levi, Simeon ben Laḳish, Isaac, Eleazar, and, most frequently, R. Johanan; and almost as often he reported Palestinian observations with merely the introductory formula במערבא אמרי ("They say in the West"; Shab. 7a, 8b, 52a, 63b, 72a, 85b, 105a, 108b, 125b; 'Er. 3a; Yoma 55b; Ta'an. 10a; Ḥag. 15b; Meg. 18a; Yer. Ned. ix. 41b; B. Ḳ. 114b; B. M. 58b; B. B. 74b; Sanh. 7b, 56a, 63a; Men. 26b; Tem. 12b, 14a; 'Ar. 16a).

Abaye was the most appreciative recipient of Dimi's information, which ranged along the lines of the Halakah and the Haggadah, occasionally touching also physical geography, history, and ethics (Shab. 108a; Ket. 17a, 111b; Ber. 44a; Ḳid. 31a; 'Ab. Zarah 36b; B. M. 58b). When Abaye once inquired of him, "What do the Westerners [Palestinians] most strenuously avoid in their social intercourse?" Dimi replied, "Putting a neighbor to shame; for R. Ḥanina counts this sin among the three unpardonable ones" (the other two being adultery and calling nicknames) (B. M. 58b). Dimi was also opposed to the bestowal of overmuch praise, and thus illustrated the Biblical proverb (Prov. xxvii. 14), "He that blesseth his friend with a loud voice, rising early in the morning, it shall be counted a curse to him."

Usually Dimi communicated his knowledge personally; but where circumstances required it, he did so by messages. Thus, when on one occasion, having himself reported in Pumbedita a Halakah as construed by R. Johanan, he discovered on his arrival at Nehardea that he had been mistaken, he sent word to the misinformed, candidly confessing, "What I have told you is founded on an error" (Shab. 63b).

Bibliography: Grätz, *Gesch.* 2d ed., iv., note 29; Bacher, *Ag. Pal. Amor.* iii. 691; Heilprin, *Seder ha-Dorot*, ii., *s.v.*

Dimi: Babylonian scholar of the fourth century; brother of Rab Safra. According to the testimony of his contemporary, R. Abba, Dimi was not endowed with worldly goods (Ket. 85b), but was blessed with a clear conscience. In his last hours he was visited by his learned brother, to whom he remarked, "May it come home to me ["I deserve God's mercy," Jastrow, "Dict." p. 132a], because I have observed all the rules prescribed by the Rabbis"; and when asked, "Didst thou also refrain from sounding thy neighbor's praises, for in continually talking of one's virtues, a man incidentally refers to his vices?" he replied, "I have never heard of such a precept; and had I heard it, I should have followed it" ['Ar. 16a]. Another version makes Dimi himself the transmitter of that very rule (*ib.*; B. B. 164b; compare Dimi; "Semag," Prohibition 9; "Diḳduḳe Soferim," in B. B. *l.c.*).

Dimi of Ḥaifa (Meg. 29b; compare "Sheiltot Ḥanukkah," end): See Abdima of Ḥaifa.

Dimi b. Ḥama: See Abdima bar Ḥama.

Dimi b. Ḥinena: Babylonian amora of the fourth century; contemporary of Rab Safra ('Er. 61a) and of Ḥiyya b. Rabbah b. Naḥmani (R. H. 34b); also of Raba, before whom he and his brother Rabbah (Rabbin) b. Ḥinena once appeared as litigants (B. B. 13b). That he was prominent among the scholars of his age may be assumed from the fact that Rab Ḥisda cites a halakic decision of his (Zeb. 36b).

Dimi b. Huna of Damharia: Babylonian halakist of the sixth amoraic generation (fifth century); contemporary of Rabbina III. (Sanh. 29b; Men. 81a).

Dimi b. Isaac: Babylonian amora of the fourth generation; junior of Rab Judah b. Ezekiel, who gave him some lessons in comparative anatomy (Ḥul. 45b). Introducing a lecture on the Book of Esther, Dimi cites Ezra ix. 9, "Our God hath not forsaken us in our bondage, but hath extended mercy unto us in the sight of the kings of Persia." "When?" he asks; and answers, "In the days of Haman" (Meg. 10b; the Talmud manuscript in the Munich Library reads "Abudimi b. Isaac"; and instead of "Haman," some versions have "Mordecai and Esther"; see "Diḳduḳe Soferim" *ad loc.*).

Dimi b. Joseph: Babylonian scholar of the third amoraic generation (third century); disciple of Mar Samuel (Ket. 60a; Nid. 66a), and senior to Rab Ḥisda and Rab Sheshet (B. B. 53b). His sister sued him before Rab Naḥman for the restoration of a parcel of land which she had legally transferred to him in her illness. Probably because of Dimi's age and professional status, he refused to obey Naḥman's summons until he was threatened with excommunication (*ib.* 151a). When his son had the misfortune to lose a child within thirty days from its birth, and—contrary to the rabbinic rule, which does not impose mourning for an infant under thirty days of age—he had assumed ritualistic mourning, Dimi remonstrated with him, observing, "It is only because thou desirest to be regaled with delicacies that thou indulgest in ritualistic mourning for so young an infant" (Shab. 136a).

Dimi b. Levai: Babylonian scholar of the fourth century. On one occasion, the skies being overcast, he thought that the sun had set; and as the day was the eve of the Sabbath, he at once inaugurated the Sabbath. Subsequently the skies cleared, and he discovered his mistake. On his application for information on the law under such circumstances, Abaye declared that he might resume his daily occupations (Ber. 27b).

Dimi of Nehardea: Babylonian scholar of the fourth century; head of the Academy of Pumbedita (385–388). Prior to his elevation to the rectorate he was a produce-merchant; and the Talmud preserves an anecdote of that time which affords an insight into the economic laws of the age as well as an idea of Dimi's standing among the learned even in his youth. The law had provided that—except the dealer in spices or perfumes at any time, and the public generally while fairs were being held—no non-resident merchant might enter his wares in competition with local traders. A notable exception to this rule was the scholar. To him the market was always open; and to facilitate his sales and his return to study, the law gave him the rights of monopoly until he disposed of his goods. Now, Dimi once brought to Maḥuza a shipload of dried figs, when Raba was requested by the resh galuta (exilarch) "to tap Dimi's pitcher", *i.e.*, to examine him ascertain whether he was a scholar and consequently entitled to the special market privileges. Raba deputed Adda b. Abba (Ahaba) to examine Dimi; and Adda propounded to the newcomer a supposititious ritualistic question. Dimi thought that his interlocutor was Raba himself, and deferentially inquired, "Is not my master Raba?" The other, familiarly tapping him on the sandal, replied, "Between me and Raba there is a great difference. At any rate, I am thy superior, and Raba is thy superior's superior." The privileges of the market were not granted to Dimi, and eventually the figs spoiled. He then applied to Rab Joseph for redress; and the latter, provoked at the discomfiture of the scholar, exclaimed, "He who hath not failed to avenge the disgrace of the Edomite king [see II Kings iii. 27; Amos ii. 1] will not fail to avenge thy disgrace." It is added that shortly afterward Rab Adda died suddenly, and several rabbis, including Dimi, who had some grievances against him, reproached themselves with having been indirectly instrumental in his punishment (B. B. 22a).

As an educator Dimi acted on the maxim, "Rivalry among scholars advances scholarship"; therefore he approved Raba's rule not to remove a teacher because his rival makes better progress with his pupils, arguing that rivalry will induce more strenuous efforts and produce better results. On the other hand, Raba, believing that "mistakes will correct themselves," showed preference for the teacher that succeeded in imparting much knowledge, even if not very exact. Dimi opposed this with his maxim, "Where error has once crept in, it stays"; and he therefore looked for precision rather than for quantity (B. B. 21a).

Dimi seems to have confined himself to the cultivation of the Halakah; for in the comparatively few instances where he is cited in the Talmud (besides those quoted see M. Ḳ. 12a; Yeb. 121a; B. B. 138b; Men. 35a; Ḥul. 51b) he appears in connection with some Halakah, while no Haggadah appears to bear his name.

Dimi b. Nehemiah (Nahman) b. Joseph: Babylonian amora of uncertain age, and but rarely cited in rabbinical literature (Sanh. 23b, 24a). He is probably identical with Abdimi b. Neḥuniah, by whom the Psalmist's effusion (Ps. cxxxix. 14), "I will praise thee; for I am fearfully and wonderfully made: marvelous are thy works; and that my soul knoweth right well," is illustrated thus: "Some things are beneficial to the liver and deleterious to the windpipe; others are beneficial to the latter and deleterious to the former. There are ten organs in man: the windpipe [larynx] produces voice; the gullet conducts the food; the liver is the seat of anger; the lungs promote thirst; the gall, jealousy; the stomach, sleep; the first stomach grinds the food; the spleen promotes laughter; the kidneys counsel; and the heart decides—therefore does David glorify, 'I will praise thee,' etc. Therefore, too, does he elsewhere [Ps. ciii. 1] exhort, 'Bless the Lord, O my soul: and all that is within me, bless his holy name'" (Midr. Teh. *ad loc.*; compare Eccl. R. vii. 19).

L. G. S. M.

DIN (from "dun," to argue, to judge; a synonym for "mishpaṭ"): Signifies (1) argument; (2) judgment; (3) laws and rules which form the basis of arguments and judgments; (4) justice, the object of the judgment; (5) punishment, the execution of the judgment. The term is generally used in connection with proceedings in a court of law. "Din" is declared by Rabbi Simon ben Gamaliel (Ab. i.) to be one of the three things to which "the world owes its stability": truth, judgment—that is, authority vested in a person or persons to decide litigation—and peace. The judge who performs his duties conscientiously and delivers "din emet" (true judgment) is as great as if he had taken part in the creation of the world (Shab. 10).

The first lesson taught by the men of the Great Synagogue was, "Be slow in din"; *i.e.*, do not hurry to decide a question before it has been fully considered (Ab. i. 1). But on the other hand, the Rabbis warn also against the opposite and not less serious evil of unnecessarily protracting the legal proceedings, or holding back the final decision, and denounce it as "'innui ha-din" (suppression of judgment). Distinguished from "'innui ha-din" is "'iwwut ha-din" (perversion of justice) (Ab. v. 11). The parties are recommended not to stand on their rights, and he is praised as a good person who keeps "lifnim mishurat ha-din" (within the line of the right)—that is, who resigns part of his right for the sake of peace.

There may, again, be cases in which strict adherence to the law entails undeserved hardships. Rabbi Eliezer holds in such cases, "yiḳḳob ha-din et ha-har" (lit. "let the law pierce the mountain"): the law must be carried out whatever the consequences (Yeb. 92a). The legal proceedings differ according as the case is a mere question of property ("dine mammonot") or involves a criminal or even a capital charge ("dine ḳenasot" or "dine nefashot"). Cases of the latter kind are not tried outside Palestine, and not on Friday nor on the eve of a holy day. In "dine mammonot" the highest member, in "dine nefashot" the lowest member, of the court is first to give an opinion (Maimonides, "Mishneh Torah," xiv.; Sanh. xi., 1 *et seq.*).

S. S. M. F.

DINA, GIACOMO: Italian deputy and journalist; born at Turin in 1824; died there July 16, 1879. The son of poor parents, he became a teacher early in life. In 1848 he founded the "Opinione," a journal which, under his tactful editorship, covering a period of thirty years, gained great political influence. He was chosen deputy of Imola, Bologna, by the Progressive-monarchical party in 1867; of Cittá di Castello in 1871 and 1874.

S. M. K.

DINAH.—Biblical Data: "Dinah" (דִינָה) is the name of Jacob's daughter by Leah (Gen. xxx. 21). Shechem, the son of Hamor the Hivite, seduces her while she is visiting "to see the daughters of the land" (Gen. xxxiv. 1-31). Though he is anxious to marry her, his outrage upon her induces her brothers, notably Simeon and Levi, to take most treacherous and cruel revenge. Apparently acquiescing in the proposed marriage upon due settlement of the dowry, they insist upon the Shechemites being circumcised as a prerequisite condition; but on the third day after the operation, when the people "were sore," Simeon and Levi fall upon the defenseless city, killing Hamor and Shechem and despoiling the place. Jacob can not approve of their conduct, fearing it may bring evil results by causing the inhabitants of the land to act in concert against him. In Jacob's Blessing (Gen. xlix. 7) the dying patriarch censures the deed as cruel and inspired by fierce and unrighteous anger. Dinah is not mentioned again.

A late writer (Judith ix. 2 *et seq.*) praises God for having given Simeon strength to avenge the outrage done his virgin sister. Josephus omits all reference to the incident of the circumcision. Dinah having been attracted by a desire to see the "finery of the women" at a time when Shechem was keeping a festival, the brothers, described as "of one mother" with her, seized the opportunity presented by the fact that the inhabitants were engrossed in feasting, to despoil the city. God Himself allays Jacob's "astonishment" at the act. In the Test. Patr. (iii. 6-8) Levi consults his father and his brother Reuben, and they concoct the scheme to insist upon circumcision. Jacob, discovering that he has been duped, is wroth. Levi himself is taken sick, but learns that the destruction of Shechem was justified, since the people had been in the habit of outraging women. He also allays Jacob's apprehensions. Indeed, an angel had commanded Levi to avenge Dinah's wrongs (*ib.* iii. 5). In Gen. xlviii. 22 there seems to be an allusion to Jacob's own participation in the capturing of the city (see, however, Gunkel, "Genesis," p. 338). The Rabbis so construe it (Ber. R. to the passage; Midrash Hagadol, ed. Schechter, p. 527), and they also make the "holy spirit" (Midrash Hagadol, p. 525) urge the defilement of the girl, while God, as in Josephus, allays Jacob's apprehensions. See also Asenath.

E. K.—E. G. H.

——**In Rabbinical Literature:** Dinah is blamed for the affair with Shechem because she "went out" (Gen. xxxiv. 1), and her brothers had to drag her away from Shechem by force (Eccl. R. x. 8; Gen. R. lxxx.). When Jacob went to meet Esau, he first locked Dinah in a box, for fear that Esau would wish to marry her. Such action of his brought out the rebuke from God: "If thou hadst married off thy daughter in time she would not have been tempted to sin, and might, moreover, have exerted a beneficial influence upon her husband" (Gen. R. lxxx.). Her brother Simeon promised to marry her; but she did not wish to leave, Shechem, fearing that after her disgrace no one would take her to wife (Gen. R. *l.c.*); she was later married to Job however (B. B. 16b; Gen. R. *l.c.*). When she died, Simeon buried her in the land of Canaan. She is therefore referred to as "the Canaanitish woman" (Gen. xlvi. 10). Shaul (*ib.*) was her son by Shechem (Gen. R. *l.c.*).

L. G. C. L.

——**Critical View:** The narrative has been held to be unhistorical, and merely a reflection of old feuds arising from outrages committed against women; the story is valuable, therefore, for the light it throws upon primitive customs. The Dinah episode illustrates the custom which made it incumbent upon brothers to avenge any outrage perpetrated upon a sister. This is still an unwritten law among the nomadic Bedouins (see Tuch, "Genesis," p. 407). Why Levi and Simeon alone undertook to requite the insult without the aid of her other brothers—a circumstance noted even by the Rabbis (see Midrash Hagadol, *l.c.*)—and why Jacob should under such circumstances have disapproved of the act, the theory fails to consider.

Gunkel ("Genesis," pp. 336 *et seq.*) holds that Gen. xxxiv. is composed of two distinct accounts of one event: (1) Dinah, after being outraged, is not retained in the house of Shechem; the son pleads with his father to get him the girl for a wife; Hamor negotiates with Jacob, offers a general intermarriage, and submits to circumcision; the city is attacked and looted; God (Gen. xxxv. 5) advises Jacob to move away. (2) Dinah is captured and retained by Shechem; to allay her uneasiness the son through his father enters into negotiations with Jacob; Jacob is promised rich gifts; he waits for his sons to return before he decides; most of them acquiesce, though Levi and Simeon refuse; they (Levi and Simeon) must cleanse their sister's honor with blood. The story is not complete. It must have told of the failure of Levi and Simeon, and of their being killed in the fray. Gen. xlix. 5-7 alludes to a third variation, in which Jacob is incensed at the conduct of his sons, and proves that the incident was fraught with fatal consequences for the brothers. The historical facts underlying this episode are these: Dinah represents a clan; Shechem is the well-known city. The tribe Dinah had been made captive by Shechem, and the closely consanguineous tribes of Levi and Simeon, in an attempt to capture the city and release the sister clan, came to ignominious grief. This feud did not take place in the Patriarchal period, but at the beginning of that of the Judges, shortly after the first invasion of Canaan.

E. K.—E. G. H.

DINAITES (דינאי; Septuagint, *Δειναῖοι*; Vulgate, "Dinæi"): A tribe mentioned in Ezra iv. 9 as having settled in Samaria, and as opposing and denouncing the efforts of the Jews to rebuild Jerusalem. The Dinaites have thus far not been positively identified.

K. B. P.

DINHABAH (דנהבה): City mentioned in the Old Testament as the capital of Idumea, and probably the birthplace of Bela, son of Beor, King of Edom (Gen. xxxvi. 32; I Chron. i. 43). The efforts at locating the Dinhabah of Scripture have thus far been unsuccessful.

K. B. P.

DINIZ (= DENIS): King of Portugal (1279-1325), and styled "the father of his country"; one of the most tolerant rulers of his time, and well disposed toward the Jews. He took care that the judges did not encroach on their rights, and did not admit unlawful witnesses. He did not compel Jews to wear special badges or to pay tithes to the Church, although the canonical law demanded both; and he particularly enjoined upon the authorities that all privileges granted the Jews by him or any preceding king should be recognized. Diniz granted special favors to individuals and to communities, as, for instance, to Bragança. He in 1295 appointed Don Judah, the chief rabbi ("Arrabi Mor"), as his treasurer. Judah's son and successor, Don Gedaliah, treasurer to Queen Doña Britiz, enjoyed such favor with the king that the latter gave him two tracts of land (*terras*), or, according to another version, two towers (*torres*), in Beja. On account of such favors shown to the Jews the Portuguese clergy complained of the king to the pope, but without avail; for the king would not change his attitude.

G. M. K.

DIOCÆSAREA. See Sepphoris.

DIOCLETIAN: Roman emperor (285-305). Although he was the son of Dalmatian slaves (Eutropius, ix. 19), he rose to the highest honors by virtue of his personal qualities. The rabbinical sources have amplified the account of his lowly origin by reporting that he was a swineherd in his youth, even his original name, Diocles, being mentioned in this connection (Yer. Ter. 46c; Gen. R. lxiii. 8). According to these sources, he spent his youth in Palestine, where he was mocked by the Jewish schoolboys; and after he became emperor the Jews agreed that not even the most insignificant Roman ought to be derided (*ib.*). According to the Talmud Yerushalmi, Diocletian went to Paneas in Palestine, where, not so much from cruelty as from a tyrannous impulse, he gave the patriarch Judah II. at Tiberias a command which was apparently impossible of fulfilment. Judah, however, succeeded in carrying it out, either through the cleverness of a servant or through magic (*ib.*).

Diocletian's presence in Palestine, which is often mentioned in rabbinical sources, is connected by Graetz with the Persian war of 297-298. This connection, however, is not necessary, for the fact is that Diocletian was in Palestine in 286, in the time of Judah II. (comp. Mommsen in "Verhandlungen der Berliner Akademie," 1860, pp. 417 *et seq.*). It is reported that he was at Cæsarea (Eusebius, "Vita Constantini," i. 19; compare Gen. R. lxiii. 8) and in the region of Tyre (Yer. Ber. 6a; Yer. Naz. 56a), which is not far distant from Paneas. At this last-named place, where Lake Phiala (Birkat-Ram) is situated, Diocletian built certain water-works, as may be inferred from the confused rabbinical notices (according to the correct reading in Yalk. to Ps. 697; compare Midr. Ps. xxiv. 6; Yer. Kil. 32c; Yer. Ket.. 35b; B. B. 74b), and the lake may possibly have been called for a time "Lake of Diocletian."

His stay in Palestine is memorable for the edict issued by him that sacrifices should be offered everywhere to the national gods, the Jews alone being exempted, for even the Samaritans obeyed the edict (Yer. 'Ab. Zarah 44d). The Christians also suffered heavily (Eusebius, "De Martyribus Palæstinæ," § 3); although the date 303-304, given by Eusebius for the issue of the edict, is different from that given by the Rabbis, who clearly assume that Diocletian was present in Palestine at the time. Diocletian endeavored to improve the pagan worship, as may be seen from an inscription preserved in the Talmud: "I, Emperor Diocletian, established this panegyric of

Tyrus lasting eight days to the genius of my brother Herculius." "Herculius" was the surname of Maximian, Diocletian's associate emperor; Diocletian's surname was "Jovius." This inscription is valuable and significant as regards not only Diocletian, but also as evidence of the conditions in Palestine (Yer. 'Ab. Zarah 39b; compare Rapoport, "'Erek Millin," p. 230; I. Levi, in "Rev. Et. Juives," xliii. 196). It is also worthy of note that Diocletian led 120,000 men into Syria (Yer. Sheb. 34d), and that his measures were so severe that he drove the inhabitants of Paneas into exile, from which they returned after thirty years (Yer. Sheb. 38d). It is also said that Diocletian possessed a piece of virgin gold as large as a Gordianic denarius, and similar to that possessed by Hadrian (Num. R. xii. 4).

G. S. Kr.

DIODATUS (surnamed **Trypho** = Debauchee): Ruler of Syria 141–138 B.C.; born at Kasiana near Apamea. Originally an officer in the army of Alexander Balas, he opposed the claims of Demetrius II., putting on the throne Antiochus, the young son of Alexander, who was still a minor, with the help of deserters from Demetrius. Diodatus took the city of Antioch; and Jonathan the Hasmonean was willing to throw in his lot with Antiochus. Diodatus, however, had other plans, and feared that Jonathan would stand in his way. He inveigled him from Bethshean to Ptolemais, and put him to death at Baskama or Baska (Josephus, "Ant." xiii. 6, § 6). From Ptolemais, Diodatus went to Judea against Simon Maccabeus, who had followed Jonathan as head of the Jewish forces. His real design now came to light; the young Antiochus was put to death, and Diodatus assumed "the crown of Asia." Simon turned to Demetrius for aid, and from him gained the independence of the Jewish state. Demetrius was taken prisoner in Persia; but his place was taken by another son of Demetrius I., Antiochus VII. (Sidetes), who marched against Trypho, and with the help of Simon shut him up in the city of Dora (Tantura, between Cæsarea and Carmel). Diodatus fled to Orthosia (north of Tripoli), and was besieged by Antiochus in Apamea, where he took his own life.

G.

DIOGO, JUSTINIANO ALVARES DA ANNUNCIAÇÃO: Archbishop of Cranganor; born at Lisbon in 1654; died at Evora Oct. 28, 1713. Doctor of theology and canon in ordinary, he was charged with a special mission at Rome. Dom Pedro II. rewarded his services by appointing him archbishop of the Indian town of Cranganor, then a Portuguese possession (1692). Diogo never occupied his archiepiscopal seat, and resigned it in 1695 to become coadjutor of the Archbishop of Evora. Besides writing several sermons and separate discourses, he was the author of "Trofeo Evangelico," a collection of sermons, Lisbon, 1693–1713. He left various works in manuscript, among them a work entitled "Turris Davidica Contra Judæos," in which he seeks to demonstrate the coming of the Messiah. The sermon preached by Diogo on the occasion of the auto da fé in Lisbon, Sept. 6, 1705, caused an animated controversy. In 1709 there appeared in Portuguese under the title "Ante Exordio" a reply by an anonymous Jew, a work which must not be confounded with the "Respuesta" in Spanish, attributed to the haham David Nieto of London. The anonymous book, according to a note in the "Antiquities of Mexico," is said to be by Isaac Nieto. On the original copies the author is given as "Carlos Vero" (pseudonym), or as "the author of 'Noticias Reconditas.'"

Bibliography: Barbosa, *Bibl. Lusitana*, i. 631-632; Joaquim de Aranjo, *Judeus Portuguezes*, Famalicão, 1901; *Sermam do Auto da Fé que se Celebron nã Praza do Rocio de Lisboa, em 6 de Set. de 1705, Pregado pelo Ill^{mo} et Rev^{mo} Sr. D. Diogo da Annunciasam Justiniano*, Lisbon, 1705; *Ante Exordio a Resposta do Sermam que o Arcebispo de Cranganor Pregon . . . Feyta por hum Anonimo*, Turin, 1709; *Respuesta al Sermon Predicado pol el Arçebispo de Cranganor, por el Author de la Noticias Reconditas de la Inquisicion*; *Obra Posthuma Impressa en Villa Franca* [London] *por Carlo Vero*, n.d. The sermon and the *Respuesta* have been reprinted by Lord Kingsborough and A. Aglio, in *Antiquities of Mexico*, viii., Supplement, pp. 91, 117, London, 1848. They have also been translated into English by Moses Mocatta, under the title *The Inquisition and Judaism: A Sermon Addressed to Jewish Martyrs on the Occasion of an Auto da Fé at Lisbon, 1705, by the Archbishop of Cranganor*; and *A Reply to the Sermon by Carlo Vero*, 1845; reprinted in Philadelphia by I[saac] L[eeser] 5620 (1860).

G. C. de B.

DION CASSIUS: Historian; born about 155 at Nicæa in Bithynia; held the highest offices of state in the Roman empire; became consul in 221; died about 240. He wrote an extended work in Greek which dealt with the entire history of Rome, and also included Jewish history. Only books lxi.–lxxx. have been preserved intact, in the extract made by Xiphilinus in the eleventh century, the remainder existing merely in fragments. Most important for Jewish history are the fragments of books lx.–lxix., which contain highly valuable information on matters that would otherwise be entirely unknown.

Dion's references to Jewish affairs may be divided into the three following groups:

1. Scattered notices, such as the order against religious assemblies at Rome, under Claudius (book lx. 6); the punishment of the consul Flavius Clemens and others, "who followed Jewish customs and laws" (lxvii. 13); and the references to the Jewish princess Berenice (lxvi. 15).

2. Remarks on the Jewish war under Nero, Vespasian, and Titus (lxvi. 4–15). These because of their accuracy and impartiality, so far as such characteristics were possible in a Roman writing on Jewish matters, do not lose in value even when compared with the account of Josephus. Indeed, they are the only authentic notices of this important war besides Josephus' account, which is colored in favor of the Romans. Dion narrates, quite independently of Josephus, the difficulties of the besieging Romans in getting drinking-water, while the Jews had a plentiful supply. He also says that deserters from the Jewish camp poisoned the water of the Romans. As a similar statement is found in Sextus Julius Africanus (Κεστοί, § 3, in "Mathem. Veteres," p. 290), who probably drew his material from Justus of Tiberias, it is possible that Dion Cassius also used the work of the last-named historian.

Dion says, further, that Titus himself was wounded by a stone (a detail not mentioned by Josephus); that many Romans, believing the city to be impregnable, went over to the Jews; and that the Roman soldiers, because of the sanctity of the Temple, hesitated for days to enter it, even after a breach had been made. All these occurrences are materially toned down by Josephus. Dion describes how the people, the magistrates, and the priests were placed in defending the Temple; and he says that Jerusalem fell on a Sabbath (the Romans took the Sabbath to be a fast-day). In all these matters Dion shows that he had reliable and authentic information. Since Vespasian as well as Titus wrote "Recollections" of the Jewish war, Dion may have used them. Another of his sources is assumed to have been the account of Antoninus Julianus, a Roman general and rhetorician, who took an active part in the war.

3. For an account of the Jewish war under Trajan and Hadrian Dion is the most important source (lxviii. 32, lxix. 12–14), though his descriptions of the cruelties perpetrated by the Jews at Cyrene and on the island of Cyprus are probably exaggerated. While not free from errors, Dion's account is largely confirmed by the Rabbis and by the Church Fathers; and even the fifty walled cities with the capture of which he credits the Jews can be severally located. He is more accurate than Spartianus, one of the authors of the "Scriptores Historiæ Augustæ," who, like Dion, mentions the account of Emperor Hadrian; but of the two, Dion only seems to have taken the Jewish data directly from this authentic source.

Bibliography: The text of Dion Cassius is reprinted in Th. Reinach, *Textes d'Auteurs Grecs Rélatifs aux Juifs*, i.; the passages referring to the Bar Kokba war, in Münter, *Der Jüd. Krieg Unter Trajan und Hadrian*, 1824, pp. 106–110. For an enumeration of the fifty cities, see S. Krauss, in *Magazin*, 1892, xix. 227. For the connection with Antoninus, see Schlatter, *Zur Topographie und Gesch. Palästina's*, 1893, pp. 397 *et seq.*; and for that with Justus, see Büchler, in *Kaufmann Gedenkbuch*, 1900, p. 18. On Hadrian as source, see Schürer, *Gesch.* 3d ed., 1901, i. 674, note 72.

G. S. Kr.

DIONYSUS, FESTIVAL OF: Historic notices regarding a supposed festival of Dionysus in Judea do not antedate the time of the Maccabees. The general statement in I Maccabees (i. 51, 54, 55) that Antiochus Epiphanes forced the Jews to sacrifice in the Greek fashion, is amplified in II Maccabees (vi. 7; compare III Macc. ii. 29) into the statement that the Jews were forced to take part in the festivals of Dionysus and to deck themselves with ivy (κίσσος); hence Hippolytus ("De Antichristo," pp. 33–35, § 49), a Church father of the second century, regards Antiochus Epiphanes as the prototype of Antichrist. The entire story, however, is regarded as unhistorical. Even the account in III Maccabees, where Egyptian matters are referred to, is not plausible; for though Dionysus was the tutelar deity of the Egyptian Ptolemies, whereas the Syrian Seleucids always worshiped Zeus (Willrich, "Judaica," p. 163, Göttingen, 1900), the Dionysia were celebrated in every country that had come under the influence of Greek culture. Antiochus XI. even bore the by-name "Dionysus" (Josephus, "Ant." xiii. 15, § 1; "B. J." i. 4, § 7); and Nicanor, the general of Demetrius, threatened to consecrate a Temple at Jerusalem to Dionysus unless Judas Maccabeus was delivered to him (II Macc. xiv. 33). The Seleucids may therefore have forced the Jews to a similar worship.

II Maccabees.

It is certain (III Macc. ii. 29) that the Jews of Egypt were forced to worship Dionysus, although this religious persecution took place probably only within the nomos of Arsinoe. It is further said (*ib.* ii. 30): "Should any among them prefer to enter the community of those initiated into the mysteries, they shall receive the same civic rights as the Alexandrians." Hence the citizenship of the Egyptian Jews was dependent, under Ptolemy IV. Philopator, on their taking part in the worship of Dionysus (Lumbroso, "Ricerche Alessandrine," p. 49, Turin, 1871; Abrahams, in "Jew. Quart. Rev." ix. 56); and as the Jews could not accept this condition, they probably did not become full citizens under that king.

According to Plutarch.

A myth of Dionysus is connected with the Palestinian city of Scythopolis. Pliny ("Historia Naturalis," v. 18, § 74) and Solinus (ed. Mommsen, ch. 36) derive the name of this city from the Scythians, who were settled on that spot by Dionysus in order to protect the tomb of his nurse who was buried there. The Greeks and the Romans were firmly convinced that the Jews had a cult of Dionysus, basing this opinion on some external point of similarity. Plutarch thinks that the name of the Jewish Sabbath is derived from σάβος, the cry of the ecstatic Bacchantes. More important still is his further statement that the Jewish Feast of Tabernacles, as celebrated in the Temple at Jerusalem, was really a form of Dionysus worship. He reasons as follows: "The Jews celebrate their most important feast in the time of the vintage; they heap all sorts of fruit on their tables, and they live in tents and huts made chiefly from branches of the vine and from ivy; the first day of this festival they call the Feast of Tabernacles. A few days later they celebrate another feast, invoking Bacchus no longer through symbols, but calling upon him directly by name. They, furthermore, have a festival during which they carry branches of the fig-tree and the thyrsus; they enter the Temple, where they probably celebrate Bacchanalia, for they use small trumpets; and some among them, the Levites, play on the cythara" ("Symposium," iv. 5, § 3). Plutarch evidently had certain ceremonies of the Feast of Sukkot in mind. See Crown in Post-Biblical Times. The accusation of Tacitus ("Hist." v. 5) is similar:

> "As their priests sing to the accompaniment of flutes and kettle-drums, and as they deck themselves with laurel, and as a golden vine was found in their Temple, many people believe that they worship Bacchus, the conqueror of the East; but the two cults have nothing in common, for Bacchus has established a brilliant and joyous ritual, while the customs of the Jews are bizarre and morose."

Account of Tacitus.

The artificial vine, which Herod presented to the Temple, is also mentioned by Josephus ("Ant." xv. 11, § 3); it still existed at the destruction of the Temple (Mid. iii. 8), and was carried off by Titus ("B. J." v. 5, § 4). The account of Tacitus is thus based on fact, the same as that of Plutarch in regard to the ritual of the Feast of Tabernacles. Plutarch, furthermore, deduces the Jewish worship of Bacchus from the garment of the high priest, who wears bells on his mantle, like those that were used in the Bacchanalia at night; he refers also in ambiguous terms to a thyrsus and to drums (*τύμπανα*) which the high priest wears in front (on the frontlet or on the breastplate?) (*ib.*). Grätz ("Gesch." 2d ed., ii. 254) assumes a barrel-opening festival (*πιθοιγία* = "vinalia"), which, however, can not be substantiated.

In describing the garment of the high priest, Plutarch purposely uses expressions reminiscent of the Dionysus worship, and it is probable that just such equivocal expressions, which he may have read in a Hellenistic work, led him to make the impossible assertion that the Jews had a cult of Dionysus. As a matter of fact the palm-branch prescribed for the Feast of Tabernacles was called by the Hellenists *θύρσος* (Josephus, "Ant." xiii. 13, § 5; II Macc. x. 7), which could easily remind a Greek of the Dionysia. He also intimates that he knew something about the "Feast of the Drawing of Water," which in its free joyousness resembled the Bacchanalia (Suk. v. 2; Tosef.: iv. 1–5; Bab. 51b; Yer. 55b). Neither the statements of Tacitus nor those of Plutarch lead to the conclusion, as some scholars assert, that they used as their sources anti-Jewish Alexandrian works, for their statements contain nothing that is hostile to the Jews. A Greek, on the contrary, would consider it a vindication for the Jews if he could derive ceremonies of the Jewish worship from pagan practises.

In Talmud and Cabala.

Dionysus is not mentioned as a god in the rabbinical writings; it is possible, however, that in Haman's fictitious genealogy (I Targ. Esth. v. 1; II Targ. Esth. iii. 1) Dionysus figures as Haman's ancestor (Krauss, "Lehnwörter," ii. 200, Berlin, 1899). Jastrow's statement ("Dict." p. 1306) that the "Dionysia" may be traced in an obscure Talmudic word can not be accepted. In some prayers of the cabalists the name of Dionysus appears, together with other mystic names ("Mitteil. der Gesell. für Jüd. Volkskunde," v. 31, 58, 71). See Ass-Worship.

DIOSCORIDES, PEDACIUS or **PEDANIUS:** Greek physician of the first century. His "Materia Medica" is mentioned in a Hebrew medical work called "Midrash ha-Refu'ot," attributed to Asaf ben Berechiah, but compiled from Syriac sources, in the tenth or eleventh century. In the tenth century Ḥasdai ibn Shaprut, minister of finance to 'Abd al-Raḥman III., assisted in the translation of the work into Arabic. But no Hebrew translation is known; the only quotations found being reproductions of quotations in other authors. An attempt was made in Salonica to translate into Hebrew Mathioli's commentary on Dioscorides.

Only one short work of Dioscorides has been translated into Hebrew, by a French Jew, Azariah Bonafoux. It is an alphabetical index of drugs which can be substituted one for another. The translator says that he found the manuscript under the Greek title of *'Αντιβαλλομένων*, which he translated "Temurat ha-Sammim."

DISABILITIES, LEGAL. See Blemish; Evidence; Law.

DISABILITIES.—In Europe: J. E. Scherer in his "Die Rechtsverhältnisse der Juden in den Deutsch-Oesterreichischen Ländern" (Leipsic, 1901) has well pointed out that legislation concerning the Jews during the Middle Ages may be divided into two groups, based upon two different views. The first comprises those laws which treat the Jews as belonging to an alien creed opposed to the established church of the state, against the development of which the latter must be protected in part by preventive, in part by repressive, measures. This legislation afforded the Jews in religious matters a limited sufferance; it protected their lives, liberty, and property, but seriously restricted their civil rights. This principle, traces of which are perceptible in heathen Rome, permeates the Christian-Roman, Germanic-Christian, and Mohammedan systems of law. The second group of laws is based upon the view that the Jews are members of a foreign nation, and are accordingly to be treated as aliens. Early Teutonic law held that foreigners did not share in the rights accorded by the nation to its members; they might at any time be expelled from the country in which they had settled, and their property, which was regarded as belonging not to them, but to the sovereign, might be taken away from them. Rights were secured by them only through grants from the sovereign, and were limited by such grants. Such were the principles of law applied to the Jews in Germany, in the Carolingian empire, in most portions of Austria, and in Aragon, Castile, Portugal, England, France, and south Italy till the thirteenth or fourteenth century.

Principles of Treatment.

The disabilities which the Jews suffered prior to the common era in countries other than those dominated by Greece and Rome—of little direct importance in accounting for their legal status in the civilized world to-day—are treated in the articles on those countries. In regard to pre-Christian Greece and Rome it need only be remarked that their treatment of the Jews showed, though in a minor degree, traces of the antagonism toward aliens which was so common in primitive societies, and which in the case of the Jew the jealous precepts of Jewish monotheism tended to aggravate (see Diaspora). Under Caracalla (211-217) the Jews became Roman citizens; as such they were entitled to all civil and political rights, including even the right to hold public office, though certain obligations, which were regarded as inconsistent with their religion, were not imposed upon them, such as military service and liability to certain Church impositions. These conditions continued for about a century, until the Roman empire under the emperor Constantine began to yield to Christianizing influences. Some further immunities which they continued to enjoy under Caracalla and his successors carried with them features which may, in one way, be regarded as disabilities. The tax which the Jews in the Roman empire were allowed to collect for Palestine (see APOSTOLÉ) was at a later time appropriated by the government itself, and the tax therefore became increasingly hateful to the Jews. It was soon replaced by irregular exactions, until it was definitely abolished by Julian, and the registers were destroyed. There is reason to believe that other special Jewish taxes were occasionally levied, and that the exemption, or disqualification, from military service, dating from the Pompeys in 49 and Dolabella in 43, was connected with a special counterbalancing tax. However, this taxation can scarcely, in its origin, be regarded as of a discriminatory character.

Before Caracalla.

The period that preceded Caracalla was, however, even less favorable for the Jew, both in the Greek and in the Roman dominions. The Greek cities, certainly at first, did not receive the Jews favorably; in many of them the observance of Jewish rites was absolutely forbidden; in others, like ALEXANDRIA, they were required to live in a special district of the city, though this had been originally granted as a privilege. The Jews acquired in general the good-will, first of the Greek, then of the Roman authorities; and this afforded them a protection against the jealousy and antagonism of the populace. Under the Greeks they did not enjoy exemption from military service. Their fortunes and the degree of their liberties varied from time to time in the Greek cities, never becoming quite as complete as they became under Caracalla, and, generally speaking, they were never collectively Greek citizens. Of course, in the conquered Greek territories they acquired the same rights of citizenship as were enjoyed by their coreligionists in other parts of the Roman empire. In Rome they met with occasional harsh treatment, though their legal status gradually improved till the constitution of Caracalla made them Roman citizens. Hadrian, temporarily, prohibited circumcision; but this was soon changed to apply only to non-Jews, as a check, in the interests of the state religion, to Jewish proselytism. Before Caracalla's reign they were not fully privileged citizens, but "peregrini," and were not, it seems, eligible to public office, but occupied a position in some respects less, in others more, favorable than that of full Roman citizenship.

After the Christianization of Rome.

From the advent of Constantine, Jewish rights became more and more limited, and their disabilities increased. The state became Christian in character, and legislation in support of the state Church and in opposition to the Jews, who would not accept the new religion, became common. The thought that Jews might lawfully give orders to Christians became hateful to the latter, and hence, beginning in 404, it was decided that Jews could not hold public office. Their judicial autonomy was also reduced. The law sought to prevent the Jews from spreading their religion to the detriment of Christianity, by forbidding, under heavy penalties, the building of new synagogues; it forbade a Jew to marry a Christian woman, to convert free Christians, or to keep Christian slaves. The law also endeavored to encourage conversion from Judaism, particularly offensive being provisions forbidding Jewish parents to disinherit, in whole or in part, their converted children. Intercourse between Jew and Christian was also discouraged by law. Jews and heretics were made incompetent to testify against Christians, and offensive special Jewish oaths were prescribed.

In Teutonic lands Jews came to be regarded, in theory at least, as aliens outside the law of the various nations among whom they lived, and as such were entitled only to those rights which the king, by special grant, might choose to confer upon them, individually or collectively. Without such grants they were outside the law. No "Wehrgeld" could be exacted from the slayer when they were unlawfully killed, and the king could at any time lawfully appropriate their possessions. Accordingly they acquired from time to time special grants from the crown, some of which, dating back to the era of Charlemagne, have been handed down to us. In these, as a matter of favor merely, or in return for a consideration, they acquired rights which, in certain particulars, might be greater or less than those enjoyed by their non-Jewish compatriots. The practical application of the theory which denied to Jews all rights except such as the crown chose to confer upon them, is forcibly illustrated throughout the Middle Ages in the cancelation of debts owing to Jews without the consent of the creditors. Not only were the Jews the *servi cameræ* of the emperor, but the rights over them of lesser princes and overlords became generally recognized when the emperors began to convey their own rights over the Jews to their vassals, in this way depriving the Jews of their principal protector. These lesser lords granted, withdrew, or withheld privileges at will.

Historical and Economic Conditions.

It is, moreover, important to note that historical and economic conditions combined in the Middle Ages to curtail or to remove entirely any Jewish privileges or immunities which exceeded those enjoyed by non-Jews, the same causes frequently leading to extensions of their disabilities. These conditions were largely due to the Crusades, which stimulated religious animosities, and led to numerous popular anti-Jewish outbursts and even to massacres. The power of the crown, as against its greater vassals, becoming weaker, the Jews were also deprived of potential protectors against economic jealousy and mob violence. The economic conditions in question were due to the rise, after the pioneer work of the Jew had been performed, of rival traders, who organized themselves for self-protection into municipal corporations and trade-gilds, and secured anti-Jewish decrees when they were economically advanced enough to dispense, wholly or partially, with Jewish aid (see Roscher, "Die Juden im Mittelalter, Betrachtet vom Standpunkt der Allgemeinen Handelspolitik"). These decrees, in a measure at least, led to the exclusion of Jews from various industries and trades, the list of excluded occupations varying in different communities, and being determined largely by the political influence of various non-Jewish competing interests. Frequently all occupations were barred against Jews, except money-lending and pedling—even these at times being prohibited. The number of Jews or Jewish families permitted to reside in different places was limited; they were concentrated in ghettos, and were not allowed to own land; and they were subjected to discriminatory taxes on entering cities or districts other than their own (see Poll-Tax).

With the acceptance of more modern economic ideas many of these restrictions disappeared. Holland led the way in abolishing Jewish disabilities, and England followed next, though both were more liberal in their treatment of the Jews in their American possessions than they were toward those at home. Germany and France took steps in the same direction even before the French Revolution, though that great movement, as well as its American predecessor, accelerated Jewish emancipation throughout the European continent. The oppressive and comprehensive character of Jewish disabilities as they existed in Europe as late as 1781 are ably described by Dohm in his "Ueber die Bürgerliche Verbesserung der Juden," pp. 6-12:

Disabilities of the 18th Century.

> "In view of the energetic efforts of the nations to increase their population, it is strange that in most states an exception is still made with respect to a particular class of men. In nearly all the states of Europe the policy of the law and of the whole constitution of the state is directed to preventing as far as possible the increase in number of those unfortunate fugitives from Asia—the Jews. In several states their sojourn has been totally prohibited, and residence for a brief time (often for a night only) is permitted on condition of certain payments, and only to travelers enjoying privileges from the overlord. In most of the other states, the Jews have been received under the most burdensome conditions, not as citizens, but as inhabitants and dependents. The law generally permits that only a specified number of Jewish families shall settle in a country, and this permission is commonly limited to particular places and must be purchased from time to time by the payment of a considerable sum of money. In very many countries the possession of a fortune is an essential prerequisite for securing this necessary license. A large number of Jews find, accordingly, the portals of every city closed to them, are inhumanly turned back at every boundary, and nothing remains for them to do but to starve, or to still their hunger by the aid of crime. If a Jewish father have several sons, he will probably be able to relinquish to only one of them the license to sojourn in the country of his birth; the rest he is obliged to send away with a portion into foreign territory, where they must struggle with equal disabilities. Concerning his daughters, the question arises whether he will be fortunate enough to establish them in one of the families of his native place. Seldom, therefore, can a Jewish father enjoy the happiness of living among his children and grandchildren, or of establishing the fortunes of his family in a permanent manner. For even the wealthy are compelled to constantly divide their fortunes through the necessary separation from their children and the expense of their establishment in different places. If a Jew has acquired permission to remain in a country, he is obliged to repurchase the same annually by heavy payments; he is not permitted to marry without special permission, subject to peculiar conditions and heavy charges; every child increases the size of his tax, and almost all his dealings are thus affected. In every occupation in life the laws are directed against him with utmost rigor, and the mild treatment accorded to those among whom he is living makes his lot seem all the harsher. Besides all these varied imposts, the Jew's means of livelihood are restricted to the utmost. He is absolutely debarred from the honor of serving the state; the prime pursuit, agriculture, is closed to him, and scarcely anywhere may he own landed property in his own name. A gild would regard itself as disgraced if it received one of the circumcised into its membership, and for that reason the Jew is wholly excluded in almost every land from manual and mechanical pursuits. But seldom, among so many disabilities, can sufficient courage and zeal be found surviving—so seldom that, in considering the whole race, individual cases should be wholly disregarded—to undertake the pursuit of the fine arts and of science, of which only geometry, natural science, and medicine remain open to the Hebrew as a means of livelihood. Even those few men who succeed in attaining a high rank in science and art, as well as those who confer honor upon mankind through unblemished righteousness of conduct, can acquire the esteem of but few noble beings; among the mighty ones even supreme merit of mind and heart is canceled by that unpardonable fault—the fault of being a Jew. For this unfortunate being, who is countryless, whose activities are everywhere circumscribed, who is nowhere permitted to exercise his talents untrammeled, in whose virtue no one places credence, for whom scarcely one attainable distinction exists—for him no path leads to the enjoyment of a dignified and independent existence, or even to self-support, other than the path of trade. But here also discriminatory limitations and imposts beset him, and but few of this people have sufficient property to engage in wholesale trade. They are, therefore, mostly confined to a petty retail trade, in which only the constant duplication of small profits suffices to sustain a needy existence; or they are compelled to lend to others the money they can not employ themselves. But in what numerous ways is even this sole remaining pursuit restricted in nearly every country! Many kinds of trade are wholly closed to them; others are open only under legislative regulations concerning time, place, and person; the permitted trades are beset by so many imposts, hampered by so many investigations, and dependent on the caprices of so many petty officials, that the earnings of Jews are extremely small, and can attract only such as are accustomed to the most miserable existence. When in former days, because of such restrictions upon his own employment of his own property, it became necessary for the Jew to lend it to others, it was seen fit to declare such practise—which must, however, be regarded as the most natural consequence of these restrictions—as illegal; and to-day, also, lending money upon interest is scarcely regarded as an honest business. . . . And notwithstanding the fact that the lending of money has been forced upon the Jew, the law almost always favors the debtor, and the latter is compelled by his necessities only too often to drive the Jewish creditor to a violation of the law, and thus to expose him to incessant penalties."

As regards the present disabilities in Russia and Rumania, Leroy-Beaulieu says: "It is widely believed that almost all the Jews in the world, at any rate all European Jews, enjoy civil liberty and equality. This is a mistake. The Israelites who enjoy the rights of citizenship are probably still in the minority. A large number of the descendants of Abraham are still subject to special laws. There remain in Europe but two states (other than Spain and Portugal) which refuse to grant to the Jews the rights accorded to the Christians; but these two states, Russia and Rumania, contain more Jews than all the rest of Europe together. One of them, the Russian empire, holds perhaps fully one-half of all the Jews in the world" ("Israël Chez les Nations," pp. 4, 5). For detailed account of disabilities in Russia see Russia.

G. *

——**In Mohammedan Countries:** The basis of Mohammedan legislation concerning Jews was, and still is, in some countries, the group of laws known as the "Pact of Omar," attributed to Omar, the second calif. In taking Jerusalem he is said to have granted protection to the capitulating Christians under certain conditions, which were extended to Jews. The main points of these conditions, according to later Arabic writers, were: that they should not build new houses of worship nor restore the old ones; that they should admit the followers of Islam to their places of worship; that they should not pray aloud; that they should not teach their children the Koran; that they should entertain a traveling Mohammedan for three days; that they should not harbor a spy; that they should not hinder any one from embracing Islam; that they should show respect to Mohammedans whenever they met them; that their houses should not overtop the dwellings of the Mohammedans; that they should wear a distinct dress; that they should not drink wine in public, nor carry weapons, nor ride on horseback, nor make use of a signet-ring with Arabic inscriptions; that they should pay a poll-tax; that they could not hold public offices, nor have intercourse with Mohammedan women.

It is a matter of doubt whether all of these laws were enacted by Omar; for his subsequent bestowal of privileges upon the Babylonian Jews would have been an act of inconsistency which a man of his character would be very unlikely to commit. However that may have been, there is no trace of the enforcement of these enactments until Omar II. (717-720). This calif passed several restrictive laws similar to those contained in the "Pact of Omar." Only two califs of the Abbassid dynasty, Harun al-Rashid (786-809) and Mutawakkil (847-861), are known to have been guided by these laws with regard to both Jews and Christians, the former calif enforcing them partially, and the latter to their full extent. In Egypt, under the dynasty of the Fatimites, only Al-Ḥakim (996-1021) enforced them; he, however, not only enforced, but greatly amplified them. In Spain and Africa it was not until the time of the Almoravides that their observance became general. The last Mohammedan government to enforce, and the first to repeal, the "Pact of Omar" was the Sublime Porte.

Disabilities in Turkey.

Until the end of the seventeenth century the legal disabilities of the Jews in Turkey were but few. They began to multiply only under Mustafa II. (1695-1703), who compelled the Jews to wear black shoes and hats, in contrast to the yellow shoes and red head-gear of their Mohammedan compatriots. The testimony of Jews was not valid, and they were allowed to dwell only in specified districts. Residence in Jerusalem was practically rendered impossible by heavy taxes, which only the richest Jews were able to pay. Similar legislation prevailed in the Turkish possessions of Algeria and Tunis, where residence in certain cities, such as Kairwan, Hammamet, and Tunis, was forbidden to Jews. They were compelled to dress in black, and among other restrictions were forbidden the use of lanterns in the street. In passing before a mosque they had to take off their shoes.

In Morocco.

The abolition of Jewish legal disabilities in Turkey was effected by 'Abd al-Majid in 1840; in Algeria, when it was conquered by France; in Tunis, through the intervention of France in 1857, when the bey was compelled to emancipate them. Morocco and Persia are now the only Mohammedan countries where Jews are still subject to barbarous discriminating legislation. Not only was the "Pact of Omar" adopted in these countries, but it was used as a basis for new laws for the degradation of the Jews, who thereby became the prey of the mob and of every petty official. The following is a list of the principal disabilities still in force in Morocco: Where Mohammedans are concerned the testimony of a Jew is invalid. Jews can not reside outside the mellahs. They are not allowed to ride through any part of the town outside the mellah, on leaving which they are compelled to walk barefoot and to remove their head-dress. They are not allowed to carry a walking-stick, but the elderly and sick are permitted to use reeds as supports. In Moorish districts the Jew is not allowed to use the foot-paths, but must confine himself to the rougher parts of the highways. He is bound to pass the Moor on the left hand, and if he fail to do so he must retrace his steps. They are not allowed to build houses above a certain height, nor to own property outside the mellah. They are debarred from possessing stores or booths in the Moorish quarters. When government granaries or warehouses are overstocked, or their contents damaged, the Jews are forced to buy at the normal price of undamaged goods. Jews, with their wives and daughters, are compelled to work for any government official whenever ordered, even on Sabbaths and festivals, and to receive payment far below the market rates. They are compelled to do the work which the Moors refuse as degrading—cleaning sewers, carrying away carcasses from government stables, etc. When the heads of rebels or of criminals are to be exposed at the town gate, the Jews are made to salt them before they are exhibited. Jewish purveyors (butchers, grocers, bakers, etc.) are compelled to supply various functionaries gratuitously. A Jew can not appoint a Jewish attorney to plead before the ḳadi against a Moor. Neither is he allowed to act as attorney for a Moor.

Jews are not allowed to follow any of the liberal professions, and are disqualified for public offices or employments. They are required to wear a special costume, consisting of a black skull-cap and black shoes, and are not allowed to adopt any attire that might lead one to mistake them for Moors. They are not allowed to use the public baths, and are even denied the use of baths in the mellah; are not allowed to drink from the public fountains in Moorish quarters, nor to take water therefrom; and are not allowed to carry arms. A Jew's evidence is not admitted in a court of justice. A Jew's life, if taken by a Moor, is compensated by the payment of a sum equal to $300.

A Jew condemned to imprisonment or to flogging must pay the fees of all officials concerned in his punishment. In the prisons and jails they are not allowed the use of the common rooms, but are invariably confined in privies, or the like. If a Jew is suspected of immoral intercourse with a Moorish woman (though she be a prostitute), he is liable to imprisonment for an indefinite period. If he confess, even under torture, or if a witness establish the charge, he is punished by death. If Moors choose to assert that a Jew has abjured his faith, he is compelled to become a Moslem; and should he afterward attempt to conform to the Jewish ritual, he would be liable to be stoned or burned to death.

In Persia.

Almost all these disabilities are in force in Persia also. They have lately increased to such a degree in provinces distant from the capital, where the officials are not hindered from Jew-baiting by the protests of the ambassadors of European powers, that living under them is well-nigh impossible. As a specimen of these laws, the following, effective in Hamadan in 1892, may suffice: Jews may not leave their houses on rainy or snowy days (rain and snow are considered by Mohammedans as conductors of uncleanliness). Jewish women are not allowed to show themselves in public places with their faces veiled. Their "izar" (cloak) must be of two colors. Jews are limited to blue cotton clothing. They are not allowed to wear comfortable shoes. Every Jew is compelled to wear a piece of red cloth on his breast. A Jew must not precede a Moslem in public places, neither may he speak to him in a loud voice. A Jewish creditor must prefer his claim to a Mohammedan debtor in a respectful manner. A Jew insulted by a Moslem must bow his head in silence. A Jew buying meat must keep it covered from the sight of Moslems. Jews are forbidden to erect good buildings; neither may their houses overtop those of their Moslem neighbors. They may not calcimine their rooms. The entrances of their houses must be low. They must not wrap themselves in their cloaks, but must be content with wearing them rolled back under their arms. They are forbidden to cut their beards. They are not allowed to leave town nor to walk in the environs. Jewish physicians are not allowed to ride on horses. A Jew suspected of having recently drunk brandy is not allowed in the streets; otherwise he is liable to the punishment of death. Jewish weddings must be celebrated secretly. Jews are not allowed to eat undamaged fruit.

DISCOUNT. See Commerce.

DISEASES IN THE BIBLE AND TALMUD. See Medicine in Bible and Talmud.

DISHON (דִישׁוֹן): **1.** A son of Seir, and head of the aboriginal Idumean tribes (Gen. xxxvi. 21, 30; I Chron. i. 38; compare 41). **2.** A son of Anah, grandson of Seir, and brother of Aholibamah, Esau's second wife (Gen. xxxvi. 25; I Chron. i. 41). A list of Dishon's sons is given in Gen. xxxvi. 26.

K. B. P.

DISINTERMENT: The act of exhumation, or taking out of the earth or the grave. The removal of dead bodies from one place of burial to another has been a subject of controversy among Jewish authorities, and in recent times has become a cause of litigation in the secular courts. In cases where the relatives desired to transfer their dead to a place designed to serve as the family plot, representative leaders of Orthodox Judaism have forbidden the removal, while other rabbis have claimed that, according to the Jewish code of law, such procedure was not only permissible, but in a certain sense actually desirable. See Burial.

Guiding Rule.

The question hinges upon the interpretation of the halakic rule which says: "It is unlawful to remove the body or the remnants of bones from one place to another, whether from an honorable place to an equally honorable one, or from a lowly place to one equally lowly, or even from a lowly place to an honorable one, not to speak of the reverse. It is, however, permissible to remove the same if the dead is to be reinterred among his own; for it is pleasant for a man to repose alongside of his fathers" (Shulḥan 'Aruk, Yoreh De'ah, 362, 1, based upon Yer. M. Ḳ. ii. 81b; Massek. Semaḥot xiii.; Kol Bo cxiv.). Those rabbis who forbid the transfer of a body to unoccupied ground intended to serve as the family plot base their prohibition on the expression "eẓel abotaw" (alongside of his fathers); insisting on the occupancy of the place by the remains of relatives who had died previously, and excluding, therefore, a case where a family plot is to be initiated by the burial of the body to be disinterred. They claim that the desire for repose among one's own is supposed to be cherished only with reference to past generations and not with reference to future ones.

Those who favor removal in such a case take the words "it is pleasant for a man to repose alongside of his fathers" in a larger sense, conveying the idea that to be buried in a family plot is presumably desirable to any man, and it matters not whether the family plot has been already brought into use or is to be consecrated for future time. In corroboration of this view they refer to the fact that the older Baraita in Massek. Semaḥot *l.c.*, as well as the Kol Bo, makes no mention of "alongside of his fathers"; the former simply stating as the reason that "it is conferring an honor upon the dead" ("she-zeh hu kebodo").

R. Moses Sofer, in a responsum ("Ḥatam Sofer," vi. 37), permits disinterment, and calls it a meritorious act in case it was the wish of the dead to be buried in the burial-place of his fathers; he refers to Mak. 11a, a passage which, however, implies the occupancy of the ground by the remains of relatives who had died previously.

Cohn vs. Shearith Israel.

In the case of Cohn versus the Shearith Israel congregation of New York, which came before the New York courts and was discussed in "The American Hebrew" and "Jewish Exponent" for March and April, 1902, Dr. H. P. Mendes, rabbi of the Shearith Israel congregation, opposed the grant by the court of a permit for disinterment, and sustained his opposition by responsa from Dr. H. Adler, chief rabbi of the United Hebrew Congregations of the British empire; Dr. Gaster, chief rabbi of the Spanish and Portuguese Jews of England; Dr. Klein, rabbi of the First Hungarian Congregation of New York; Dr. B. Drachman, rabbi of Congregation Zichom Ephraim of New York; and Rev. M. De Sola, minister of the Spanish and Portuguese congregations, Montreal, Canada—all of whom declared that remains interred in a cemetery may not be removed for the purpose of reinterment in another cemetery in a plot which has been secured since the death of the deceased in question.

On the other hand, Dr. K. Kohler, rabbi of Temple Beth-El, New York, when consulted as to the view of the authorities of traditional (Orthodox) Judaism, declared that, inasmuch as the law excepts from the prohibition of disinterment every case in which the removal is a benefit to the dead and would be presumably desired by him, the transfer of the body to a family plot to be consecrated is just as lawful as its transfer to a family plot already occupied; the spirit and not the literal meaning of the words "alongside of his fathers" being the essential point. The courts, however, sustained the Congregation Shearith Israel, and the application for a permit for disinterment, contrary to the cemetery regulations of the congregation, was refused.

DISKIN, JOSHUA LÖB BEN BENJAMIN: Russian rabbi; born at Grodno, Russia, Dec. 10, 1818; died at Jerusalem Jan. 22, 1898. At thirteen he married Sarah, the daughter of a good family of Volkovisk, known later as "Die Brisker Rebitzin." Diskin obtained a rabbi's diploma at eighteen, and seven years later succeeded his father as rabbi of Lomza. He was successively rabbi at Meseritz, Minsk, Kovno, Sklow, and Brest-Litovsk, whence he was called "Der Brisker Rov." A profound and thorough student, he became a recognized authority on rabbinical law, his admirers comparing him to Akiba Eger. He was, if not aggressive, fearless when once convinced that a thing was right. Thus, when rabbi of Kovno, he insisted upon the dismissal of a meat-tax collector. The Russian government, however, did not share his views, but ordered him to leave the town within forty-eight hours. Again, in 1877, the last year of his rabbinical office at Brest-Litovsk, he gave a legacy decision against the civil authorities. Compelled again to leave the town, Diskin decided upon settling at Jerusalem. There, too, he became a center of controversy by forbidding in 1889, a Sabbatical year, the cultivation of land in Palestine, though several Russian rabbis, among whom was Isaac Elhanan Spector, had decided to the contrary. The statement that Diskin was opposed to colonization in Palestine is not correct; he was not opposed to those who went with sufficient capital to buy and till land. A tireless champion of Orthodox Judaism, he endeavored to counteract the influence of Jewish reformers and English missionaries. He founded at Jerusalem an orphan asylum in opposition to a similar institution established by the liberal Jews, prohibited the use of the English missionary hospital, and refused Jewish burial to patients who died there. He also founded the yeshibah Ohel Mosheh.

Diskin was once accused of having been guilty of actions unbecoming a rabbi, but the charges were groundless. The very men who had been accustomed to visit him, and in whom he had the greatest confidence, committed the deeds with which he was charged. It should be said, furthermore, that his wife was prominent in all the struggles between him and his adversaries.

L. G. M. SEL.

DISNA: Town in the government of Wilna, Russia. According to the census of 1897, it has a population of 6,739, about 5,600 being Jews. Most of these are traders. About 265 persons are employed as day-laborers. Truck-farming gives occupation to 8 families, working on 5 deciatines of rented land. About 437 deciatines in the vicinity of the town are owned and cultivated by Jews. There are the usual charitable institutions, and a Jewish public school for boys and girls, with a register of 170 pupils.

H. R. S. J.

DISPECK, DAVID BEN JOEL: Talmudic scholar and homilist; born about the year 1744. He studied in the yeshibah under Joshua Cohen, among his companions being Joseph Steinhard and Jacob BERLIN. Later he was named dayyan of Fürth, and in 1771 he became rabbi of Mering (Bavaria) and the Schwarzwald. In 1778 he was invited to direct the yeshibah of Metz, and finally, in 1785, he became rabbi of Beyersdorf and Baireuth. At Beyersdorf he collected his homilies into one book, entitled "Pardes Dawid" (The Garden of David), and arranged in the order of the parashiyyot. Besides the homilies the book contains 365 solutions of difficult passages in Maimonides' "Yad ha-Ḥazaḳah" (Sulzbach, 1786). A responsum of his is found in Jacob Berlin's "Be'er Ya'aḳob," ch. xiv., § 117.

DISPUTATIONS (ויכוחים): Public debates on religious subjects between Jews and non-Jews. Religious differences have at all times induced serious-minded men to exchange their views in order to win opponents over to their own side by appeals to reason. Abraham is represented in the Midrash as holding a religious debate with Nimrod (see JEW. ENCYC. i. 86). In Alexandria disputations between Jews and pagans were probably quite frequent. The first actual disputation before a worldly ruler took place at Alexandria about 150 B.C., under Ptolemy Philometor, between Andronicus ben Messalam (Meshullam), the Judean, and Sabbeus and Dositheus (Theodosius), Samaritans, with reference to the Scripture text which the Samaritans claimed had been omitted by the Jews in the Septuagint translations (Grätz, "Gesch." iii. 44, 650; compare Josephus, "Ant." xiii. 3, § 4). In the time of the emperor Caligula the first disputation between Jews and pagans before a ruling monarch took place at Rome, the erection of statues of Caligula in the synagogues of Alexandria having caused the Jews to send a deputation under Philo to the emperor, while the anti-Jewish party sent a deputation under Apion. It was typical of all later disputations, inasmuch as the defeat of the Jews was a foregone conclusion. Some of Philo's arguments are probably preserved in part in his "Legatio ad Caium" (§§ 20–45). Papyri fragments discovered in recent years contain records of disputations held before Claudius and a later emperor ("Rev. Et. Juives," xxxvii. 218–223; Schürer, "Gesch." 3d ed., i. 65–70).

Between Jews and Romans.

In 'Ab. Zarah iv. 7 and Baraita 'Ab. Zarah 54b is recorded a disputation held in Rome between pagan sages (פילוסופין) and four Jewish elders, whom Grätz properly identifies with Gamaliel II., Eleazar b. Azariah, Joshua b. Hananiah, and Akiba, who went to Rome to have Domitian's decree against the Jews withdrawn (Grätz, "Gesch." 3d ed., iv. 110). The following was the dialogue: "If your God hates idolatry, why, being omnipotent, does He not destroy it?" "Shall sun, moon, and stars, without which the world can not exist, be destroyed on account of the fools that worship them?" "But why are not other idols which are of no consequence destroyed?" "As well should seeds when stolen not grow in the soil, or a child conceived in adultery not be born. No; the world goes on in its prescribed course, and the transgressors shall meet their retribution" (compare Bacher, "Ag. Tan." i. 84). According to Eccl. R. i. 9, R. Meïr was delegated to represent the Jews at a public disputation with the government in Rome, the boar (חזיר), as the Roman emblem, being made the subject of the debate (compare Bacher, *l.c.* ii. 35 *et seq.*). R. Meïr also had disputes with the Samaritans (Gen. R. iv.; Bacher, *l.c.* pp. 32 *et seq.*).

Between Jews and Christians.

Of an altogether different nature were the disputations between Jews and Christians. At first these were bitter and sarcastic in tone, but, like quarrels between members of one household, harmless in their consequences. As they turned chiefly on Scripture interpretations, the Jew easily obtained the victory over his less skilled adversary. A number are recorded in the Talmud and Midrash between Christians called "minim" (heretics) or philosophers and R. Gamaliel II. (Yeb. 102b; Midr. Teh. to Ps. x.; Ex. R. xxx.; see Derenbourg, "Hist." 1867, p. 357; Bacher, *l.c.* i. 87) and R. Joshua b. Hananiah (Ḥag. 5b; see Bacher, *l.c.* i. 176). How prominent these disputations were in the early days of Christianity is shown by the number of fictitious dialogues written by Christians for apologetic purposes, and mainly copied one from the other, with references to the same Scriptural passages, and all of them ending in the same way: the Jew, who seldom knows how to answer, finally yields and embraces Christianity (see Origen, "Contra Celsum," iv. 52, where the disputation between Papiscus the Jew and Jason is referred to; Harnack, in "Texte und Untersuchungen," i. 1–3; Conybeare, "The Dialogues of Athanasius and Zaccheus and of Timothy and Aquila," Oxford, 1898; McGiffert, "A Dialogue Between a Christian and a Jew, Entitled *'Αντιβολὴ Παπίσκου καὶ Φίλωνος 'Ιουδαίων προς Μόναχόν τινα*," New York, 1889). Most valuable as a characteristic example of such a disputation is Justin Martyr's "Dialogue with Tryphon the Jew." The author, who frequently calls himself "philosopher," took the famous R. Tarfon (also pronounced, probably, "Tryphon": Derenbourg, *l.c.* p. 376; Grätz, *l.c.* iv. 58), noted for his fierce opposition to the Christian sect (Shab. 116a), as a typical representative of Jewish teaching, putting into his mouth rabbinical arguments for the sake of refuting them (see M. Friedländer, "Patristische und Talmudische Studien," pp. 20 *et seq.*, 80–137, Vienna, 1878; Goldfahn, "Justinus Martyr und die Agada," in "Monatsschrift," 1873, pp. 49, 104, 145, 194, 257). Often the Jew was horrified at the identification of "Christ" with the "Divine Shekinah," and termed it "blasphemy" (Friedländer, *l.c.* pp. 62 *et seq.*); and as the arguments taken from Gen. i. 26, and similar expressions regarding the Deity used in Scripture, were ever reiterated by these troublesome "heretics," he found these disputations "full of weariness" (Eccl. R. i. 9; compare Sanh. 38b, 105b; Yer. Ber. ix. 12d; Friedländer, *l.c.* pp. 62, 82). In the course of time, however, polemics became a fine art with some of the rabbis, Cæsarea, a place where Christians and Jews constantly met, being the chief school of controversy (Bacher, "Ag. Pal. Amor." i. 92). R. Simlai and R. Abahu were known as keen debaters (Bacher, *l.c.* i. 555, ii. 115). On the fictitious disputation in Rome between Pope Sylvester (314–335) and twelve Pharisaic doctors before the emperor Constantine, see Güdemann, "Gesch. des Erziehungswesens und der Cultur der Juden in Italien," 1884, pp. 39, 295.

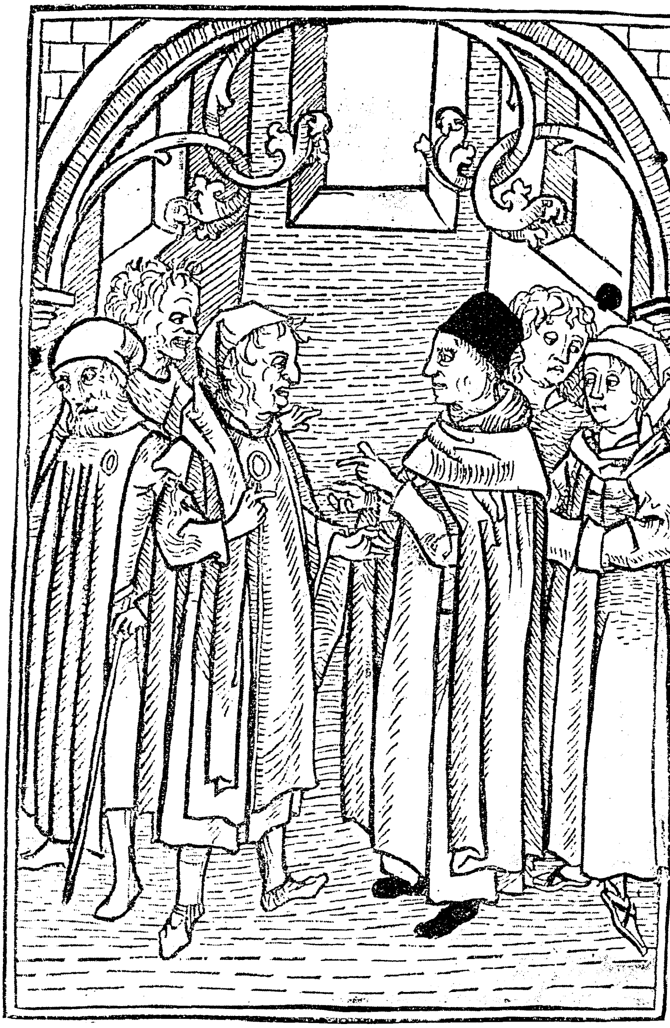
In the Middle Ages.

Learned disputations of a harmless nature took place frequently in Italy, and a controversial Jewish literature sprang up in the thirteenth century (see Güdemann, *l.c.* pp. 12, 24, 37, 39, 230) with the declared object of defending the truth without giving offense to the Christian Church (see POLEMICAL LITERATURE). Quite different was the tone of the disputations introduced in the Byzantine empire. Here Basil I., about 880, instituted such disputations, and the Jews were to be forced either to admit or to disprove "that Jesus is the culmination of the Law and the Prophets" (Grätz, *l.c.* v. 229), the result being generally expulsion and persecution. In the West, Jews and Christians disputed freely and on terms of mutual good-will in spite of occasional hostile attacks (see "Rev. Et. Juives," v. 238 *et seq.*). The impression prevailed among Christians that they were no match for the learned and witty Jews, while the latter frequently challenged the former, openly and frankly criticizing the dogmas of the Church. Among these NATHAN L'OFFICIAL and his son in France obtained about the close of the twelfth century great renown as bold and skilful debaters, and the disputes they had with popes, archbishops, and other prelates have been partly preserved (Grätz, *l.c.* vi. 143, 366; Güdemann, "Gesch. des Erziehungswesens und der Cultur der Juden in Frankreich und Deutschland," 1880, pp. 18, 140 *et seq.*).

It was only after Pope Innocent III. had infused the spirit of the Inquisition into Christendom, and the Dominicans had begun their warfare against every dissenter, that the disputations became associated with relentless persecution of the Jewish faith. Being turned into great spectacles by the presence of the dignitaries of Church and state—mock controversial tournaments in which the Jews were bound to suffer defeat—they became a direct menace to the literature and the very lives of the Jews. In order to secure to the Church the semblance of a victory, Jewish apostates lent themselves to the task of bringing malicious charges against their former coreligionists, supporting these by ferreting out every weak and ambiguous point in the Talmud or the Jewish liturgy that might be construed as a "blasphemy" or as defamation of Jesus and Christian dogma.

Paris and Barcelona.

The first of these famous disputations took place at the royal court of Louis IX. in Paris June 25–27, 1240, in the presence of the queen-mother Blanche and the prelates of Paris, the rabbis Jehiel of Paris, Moses of Coucy, Judah ben David of Melun, and Samuel ben Solomon of Château-Thierry being ranged against Nicholas Donin, the Jewish apostate. The four rabbis were to defend the Talmud against the accusations of Donin, turning mainly upon two points: that the Talmud containes immoral sentiments and blasphemous expressions against the Deity, and that it speaks in an offensive manner of Jesus. R. Jehiel, timid at first, was encouraged by the assurance of protection by the queen, and succeeded in refuting Donin's charges by proving that Jesus, the son of Panthera, can not be the Jesus of the New Testament; that the term "goy" in the Talmud does not refer to Christians; and that the Minim who are made an object of execration in the Jewish liturgy are not born Christians, but only born Jews who have become sectaries or heretics. R. Jehiel's defense, however successful for the moment, did not save twenty-four cartloads of copies of the Talmud from being consigned to the flames two years later in Paris (see Levin in "Monatsschrift," 1869, pp. 97 *et seq.*; Grätz, *l.c.* vii. 401; Loeb, in "Rev. Ét. Juives," i. 247, ii. 248, iii. 39).



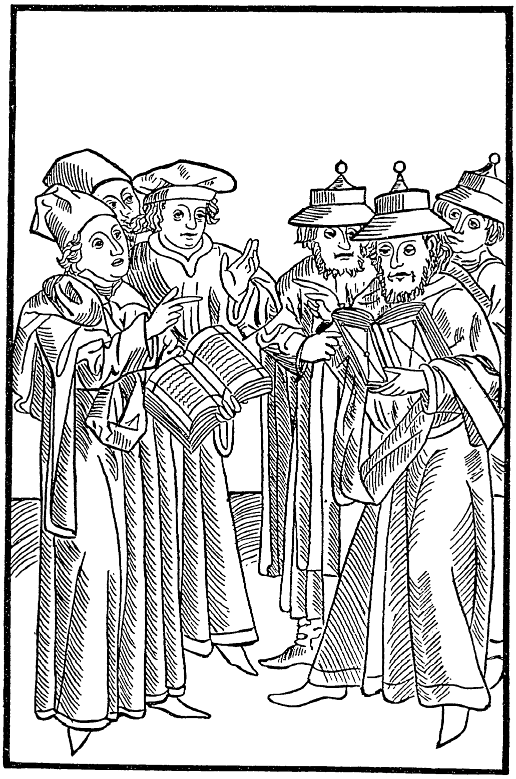
Disputation Between Jewish and Christian Theologians.

(From Peter Schwarz, "Der Stern Messhiah," 1477.)

The second disputation took place at Barcelona on July 20, 1263, at the royal palace, in the presence of James I. of Aragon and his court, and of many prominent ecclesiastics and knights, between Naḥmanides and Pablo Christiani, who, like Donin, was the accuser and the instigator. The debate turned on the questions whether the Messiah had appeared or not; whether, according to Scripture, the Messiah is a divine or a human being; and whether the Jews or the Christians held the true faith.

Differing from R. Jehiel of Paris, Naḥmanides met his antagonist with fearless courage and with the dignity of a true Spaniard; and when Pablo undertook to prove from various haggadic passages the Messianic character of Jesus, Naḥmanides frankly stated that he did not believe in all the haggadic passages of the Talmud, and he went so far as to declare that he had more regard for the Christian monarch than for the Messiah. As to the question whether the Messiah had come or not, he could not believe that he had come as long as the promised cessation of all warfare had not been realized. It was a triumph for the Jewish cause, yet all the more did both the Jewish and the Christian friends of Naḥmanides warn him against the peril threatening his brethren from the terrible power of the Dominicans in case of defeat, and so, at his own request, the disputation was interrupted on the fourth day. But the enemies of the Jews were not set at rest. They claimed the victory, and when Naḥmanides published the frank statements he had made, the king, who had dismissed him with presents and with expressions of his regard, could no longer protect him, and he had to leave the country. Again the Talmud was made the object of attack; but this time, instead of the whole Talmud being proscribed or burned, only the offending passages were singled out for erasure by a censorial committee appointed by the king (see Grätz, *l.c.* vii. 121–124).

Of literary rather than of historical importance are the public disputations held at Burgos and Avila in 1375 by Moses Cohen de Tordesillas with the apostates John of Valladolid and Abner of Burgos, and that held about the same time in Pampeluna by Shem-Ṭob ben Isaac Shaprut of Tudela with Cardinal Don Pedro de Luna, afterward Pope Benedict XIII., the disputations being made the subjects of the books "'Ezer ha-Emunah" (by Moses) and "Ibn Boḥan" (by Shem-Ṭob: see Polemics and Polemical Literature).



Religious Disputation Between Jews and Christians.
(From Kohut, "Geschichte der Deutschen Juden.")

Disputation of Tortosa.

The most remarkable disputation in Jewish history, for the pomp and splendor accompanying it, the time it lasted, and the number of Jews that took part therein, is the one held at the summons of the antipope Benedict XIII. in Tortosa. It began in Feb., 1413, and ended Nov., 1414, and was presided over by the pope in state, surrounded by the cardinals and dignitaries of the Church who still retained allegiance to him, while hundreds of monks and knights and men of all degrees were among the audience. Joshua Lorqui (Geronimo de Santa Fé), the apostate, was to prove from the Talmud that Jesus was the Messiah, and the twenty-two most distinguished rabbis and scholars of the kingdom of Aragon had the choice of refuting his arguments or—and this was the scarcely concealed purpose of the pope, anxious to regain power and prestige through the conversion of the Jews of Spain—espousing the Christian faith. To judge from the fragmentary records, there was no great erudition or acumen displayed either by the aggressor, who dwelt on a few haggadic passages concerning the Messiah, or by the defenders, who no longer possessed the courage and self-confidence shown by Naḥmanides. The sixty-nine sessions passed without any other result than that neither the blandishments nor the threats of the pope, nor the fierce attack on the Talmud made by Lorqui, the pope's physician and chief adviser, could induce the Jews to become traitors to their heritage. A papal bull (May, 1415) of eleven clauses, forbidding the study of the Talmud and inflicting all kinds of degradation upon the Jews, showed the spirit that had prompted the disputation (see Grätz, *l.c.* viii. 116, 406). Under James II. of Castile, about 1430, Joseph ben Shem-Ṭob and Ḥayyim ibn Musa held frequent disputations with learned Christians at the court of Granada, but henceforth disputations became rare and of no historical importance.

Friendly Disputations.

Belonging to the class of friendly disputations (*ib.* viii. 417, note 4) are those, whether authentic or embellished by legend, mentioned in Solomon ibn Verga's "Shebeṭ Yehudah": (1) Between Don Joseph ibn Yaḥya and King Alfonso V. of Portugal, (*a*) concerning Jesus' miraculous powers; (*b*) regarding the perpetual character of the Mosaic law; (*c*) as to the efficacy of the prayer of a non-Jew; (*d*) whether the hosts of angels are numerable or infinite; (*e*) why sorcery, being based on error, is so severely punished in Scripture. (2) Between three Jewish artisans taken from the street, and Don Joseph ibn Benveniste ha-Levi with Alfonso XI. of Castile, (*a*) on the qualities of God; (*b*) on the distance between earth and heaven; (*c*) on the sun's radiation of heat; (*d*) on the forbidden fat and blood of animals; (*e*) on the night's sleep; (*f*) on the immortality of the soul. (3) Between Don Samuel Abrabalia and Don Solomon ha-Levi and Pope Martin (Hebrew text has מרקן; see Grätz, *l.c.* viii. 128, note), (*a*) concerning the fierce words of Simon b. Yoḥai, "The best of the heathen deserves killing" (טוב שבגוים הרוג: Mek., Beshallaḥ, i.; Yer. Ḳid. iv. 66c; Massek., Soferim, xv. 9; see Müller's ed., note): (*b*) on Jer. l. 12 (Hebr.), "The end of the heathen is shame and desolation"; (*c*) on Simon b. Yoḥai's utterance, "You are called men, but the other nations are not called men" (B. M. 114b; Yeb. 61a; compare Lazarus, "Ethics of Judaism," i. 264, Philadelphia, 1900). (4) Between Don Pedro IV. of Aragon (1336–1387) and his physician, who, when asked why the Jews were not allowed to drink the wine touched by a Christian, had water brought to wash the king's feet, of which he then drank to show that the fear of impurity was not the reason of the prohibition (Grätz, *l.c.* i. 12). (5) Between Don Abraham Benveniste, Don Joseph ha-Nasi (ben Abraham ibn Benveniste) and R. Samuel ibn Shoshan of Ecija, and Don Alfonso XI. on the social conduct of the Jews, their usury and avarice, their musical accomplishments, their luxury, the Jewish sages ascribing Jewish usury to Christian legislation; as regards the dishonest means by which the Jews were said to have obtained wealth, they remarked, "We Jews are treated like the mice: one mouse eats the cheese, and people say, 'The mice have done it.' For the wrong-doing of one the whole race is made responsible" (*ib.* viii. 25–27). (6) Between a Christian and a Jew, before Don Alfonso (V.?) of Portugal, on the Messianic passages in Ps. xxii., and on the hyperbolical haggadic passages in the Talmud. (7) The remarkable disputation of Ephraim ben (Don) Sango (Sancho? more probably identical with the famous poet Don Santo de Carrion; see "Orient, Lit." 1851, xii., though disputed by Kayserling, "Sephardim," p. 328, note) with Don Pedro IV. on the question, Which religion is the better, the Jewish or the Christian? the Jewish sage answering with the parable of the two precious jewels and the two sons, obviously the original of the parable of the three rings, taken from Boccaccio by Lessing for his "Nathan the Wise" (see Wünsche, in Lessing-Mendelssohn's "Gedenkbuch," 1879, pp. 329 *et seq.*). The story of a disputation on the question, Which is the best religion? is, however, very old. One is said to have taken place about 740, before Bulan, the king of the Chazars, who, uncertain whether to exchange his heathen religion, which he had come to abhor, for Mohammedanism or Christianity, summoned representatives of these two creeds, as well as of Judaism, for a disputation. None could convince him of the superiority of his faith, and Bulan resolved to espouse the Jewish, since both Christian and Mohammedan referred to it as the basis of their own, and each recognized it as superior to the others (see CHAZARS). Upon this story the religious disputations in Judah ha-Levi's "Cuzari" are based. The story of a disputation occurs in Russian legends regarding Vladimir's conversion, but with a different result (see Karamsin, "History of Russia," bk. i., ch. vii.).

In Italy, Germany, and Poland.

In order to have a great spectacle to excite the passions of the ignorant masses, John Capistrano, the Franciscan Jew-baiter, arranged in 1450 a disputation at Rome with a certain Gamaliel called "Synagogæ Romanæ magister," but otherwise very little known (see Vogelstein and Rieger, "Gesch. der Juden in Rom," 1895, ii. 14). Disputations of a friendly character were held at the court of Ercole d'Este I. at Ferrara by Abraham FARISSOL with two learned monks, the one a Dominican, the other a Franciscan, the matter of which is produced in Farissol's "Magen Abraham" and "Wikkuaḥ ha-Dat" (see Grätz, *l.c.* ix. 45). In Germany it was the Jewish apostate Victor von KARBEN who, under the direction of Herrman, the Archbishop of Cologne, and in the presence of many courtiers, ecclesiastics, and knights, held a disputation with some Jews of the Rhine provinces about 1500, accusing them of blasphemy against the Christian religion; the consequence of this disputation was that the Jews were expelled from the lower Rhine district (*ib.* lx. 70).

An Eighteenth Century Disputation.

Quite different in tone and character were the disputations held by the Jews, both Rabbinites and Karaites, with Christians of various denominations in Poland at the close of the sixteenth century. Here the Jews, untrammeled by clerical or state despotism, freely criticized the various religious sects, and it was considered a difficult task for a Christian to convert a Jew (*ib.* ix. 456; see Isaac b. Abraham Troki). Occasionally disputations for conversionist purposes were arranged at German courts. One is reported to have taken place at the ducal court of Hanover, about 1700, in the presence of the duke, the dowager-duchess, the princes, clergy, and all the distinguished personages of the city, between Rabbi Joseph of Stadthagen and Eliezer Edzard, who had had been the instigator of the disputation. It ended in the complete victory of the rabbi, who not only refuted all the arguments of his antagonist from Scripture and the Midrash, but under the full approval of the court declined to answer under oath the question as to which religion was the best. He said: "We condemn no creed based upon the belief in the Creator of heaven and earth. We believe what we have been taught; let the Christians adhere to what they have been taught" (Bloch in "Oesterreichische Wochenschrift," 1902, p. 785).

Regarding the disputations between the rabbis and the Frankists before Bishop Dembowski at Kamenetz in 1757, and before the canon Nikulski at Lemberg in 1759, see FRANK, JACOB. For others, see Steinschneider in "Monatsschrift," 1883, pp. 80 *et seq.*, and his "Uebersetzungen," pp. 305, 461.

G. K.

D'ISRAELI, BENJAMIN: 1. English merchant and financier; born in Venice Sept. 22, 1730; died at Stoke Newington, London, in 1816. He went to England in 1748, and settled there as a merchant, though he did not take out papers of denization till 1801.

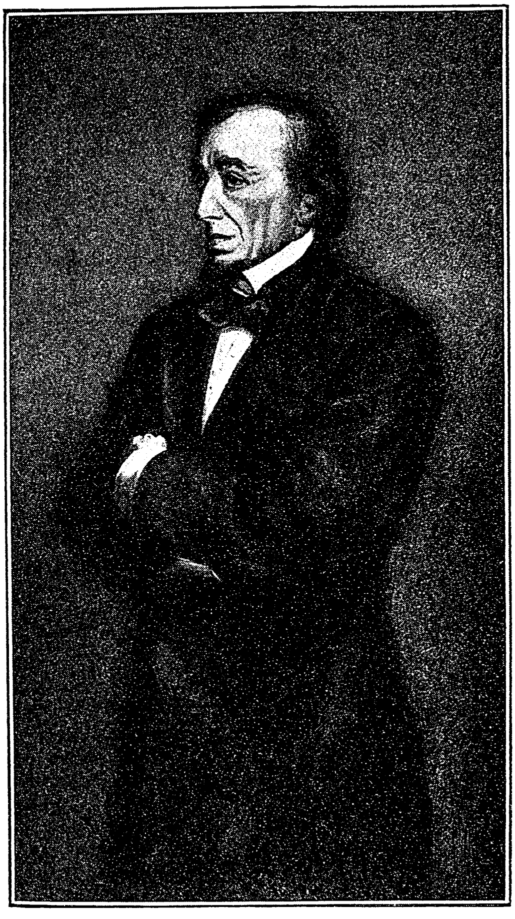
Though a conforming Jew, and though contributing liberally toward the support of the synagogue, D'Israeli appears never to have cordially or intimately mixed with the community; only on one occasion did he serve in a minor office—that of inspector of charity schools in the year 1782.

2. Public notary in Dublin, Ireland, 1788–96; died at Beechey Park, county of Carlow, Aug. 9, 1814, and was buried in St. Peter's churchyard, Dublin.

BIBLIOGRAPHY: B. Disraeli, Introduction to Isaac D'Israeli's *Collected Works*, 1858; Picciotto, *Sketches of Anglo-Jewish History*; *Dict. National Biography*, s.v. *D'Israeli, Isaac*; *Jewish World*, April 22, 1881.

J. G. L.

DISRAELI, BENJAMIN, EARL OF BEACONSFIELD: English statesman; born at London, England, Dec. 21, 1804; died there April 19, 1881. The son of Isaac D'Israeli, he was descended from a wealthy Sephardic family of Venice, his grandfather having come to England to engage in commerce. He was educated at a private school, at which he used to "stand back" when Christian prayers were recited; but at the suggestion of the poet Rogers was baptized in 1817, immediately after the death of his grandfather, Benjamin D'Israeli. At the age of seventeen Disraeli was articled to Swain & Stevenson, solicitors, in the Old Jewry, and in 1824 entered Lincoln's Inn, but withdrew his name in 1831. At the age of twenty-two Disraeli wrote the novel "Vivian Grey," a political satire, and leaped into sudden notoriety. His health giving way, he spent the next three years traveling in the East. On this journey he visited Jerusalem, whence he derived the impressions which distinguish "Tancred," and probably those which afterward determined his philo-Turkish policy. Returning to England, he unsuccessfully contested High Wycombe (1834) and Taunton (1835). At Taunton he attacked the policy of O'Connell, the Irish patriot, who had written him a commendatory letter when he stood for Wycombe. O'Connell, replying, spoke of "the impenitent thief who died on the cross, and whose name, I verily believe, must have been Disraeli." Disraeli challenged the son of O'Connell to a duel on behalf of his father, but the affair came to nothing.



B Disraeli

(After the painting by Sir J. E. Millais.)

By this time Disraeli was well known. He had written in 1828 "The Infernal Marriage," "Ixion in Heaven," and "Popanilla," satirical burlesques. In 1836 his "Letters from Runnymede," directed against the government, caused considerable comment. Disraeli now mingled in the best society, though handicapped by a tendency to obtrude his personality. He adopted eccentricities of dress and opinion which nearly ruined his political prospects. Between 1831 and 1839 he wrote "The Young Duke," "Contarini Fleming," "The Wondrous Tale of Alroy"—the only novel by him dealing entirely with a Jewish subject (see Alroy)—"The Rise of Iskander," "Vindication of the British Constitution," "The Revolutionary Epic," "Venetia," "Henrietta Temple," and "The Tragedy of Count Alarcos."

On the dissolution of 1837 Disraeli was returned for Maidstone with Mr. Wyndham Lewis. Disraeli's first speech in the House of Commons was a fiasco. His extraordinary appearance, his theatrical delivery, and above all the enmity of the O'Connell faction robbed him of the leniency usually shown to the maiden speeches of new members, and he was not allowed to finish; he sat down with the memorable prediction that the time would come when they would hear him. Sir Robert Peel, however, by no means acquiesced in the adverse judgment. In 1839 Disraeli married Mrs. Wyndham Lewis, the widow of his late colleague, and was thenceforth free from pecuniary cares. He now purchased the country estate of Hughenden, and in 1841 was returned for Shrewsbury as a follower of Peel. The alliance did not last long. Peel gradually turned toward free trade, though his party had been elected pledged to protection, Disraeli becoming the spokesman of the malcontents. About this time he published two remarkable novels, "Coningsby" and "Sybil." The main idea of "Coningsby" was that the crown, released by the Reform Bill from an aristocracy which had usurped its functions, might regain its suspended powers, and thus solve many of the difficulties of the time. But "Coningsby" contains more than that. The most impressive character in the book is Sidonia, a Jew of immense wealth, through whom Disraeli expounds many of his views. Disraeli was proud of his Hebrew descent. He regarded Christianity as developed Judaism. "One half the world worships a Jew and the other half a Jewess," he said. Disraeli classed the Jews among the Caucasian nations, and claimed that no amount of persecution could destroy an unmixed and splendidly organized race. The Jews, he claimed, were

Views on Judaism.

the aristocracy of nature. Disraeli did not plead for toleration, but for the admission of Jews to full privileges on account of their especial merits. "If the Jews had not prevailed upon the Romans to crucify our Lord, what would have become of the Atonement?" he asks in "Tancred." In "Coningsby" Sidonia says: "The Jews, independently of the capital qualities for citizenship which they possess, are a race essentially monarchical, deeply religious, and essentially Tories. The fact is, you can not crush a pure race of Caucasian organization. It is a physiological fact, a simple law of nature, which has baffled Egyptian and Assyrian kings, Roman emperors, and Christian inquisitors." He then remarks that the Jews lead all the intellectual movements in Europe, monopolize professorial chairs, and enter into political affairs. He, however, makes the blunder of classifying Soult and Masséna as Jews. Disraeli appears genuinely to have believed in Christianity as developed Judaism. He detested Colenso and the essayists of his school. In rejecting Darwinism he said: "I am on the side of the angels."

Advocates Jewish Emancipation.

In his "Life of Lord George Bentinck" Disraeli devotes a chapter to a statement of the Jewish case. He begins by declaring that the Roman massacres, and the fact that the Diaspora had begun long before the death of Christ, make it impossible that the Jews of to-day can be descended from those who attended the crucifixion. Further, he says, the theory that the Jews are now expiating their offense is not dogmatically sound. "The native tendency of the Jewish race," he continues, "is against the doctrine of the equality of man. They have also another characteristic—the faculty of acquisition. Thus it will be seen that all the tendencies of the Jewish race are conservative. Their bias is to religion, property, and natural aristocracy, and it should be the interest of statesmen that . . . their energies and creative powers should be enlisted in the cause of existing society." Disraeli consistently and honorably supported all the bills for the removal of Jewish disabilities, and his conduct in this regard earned him the admiration of his great rival, Mr. Gladstone. "Sybil" deals with the squalor and wretchedness of the factory-workers. Here the Church is to play the part ascribed to the crown in "Coningsby." In 1847 "Tancred" appeared. In this book the hero, a duke's son, of course, goes to Jerusalem to seek inspiration, and Disraeli then describes the scenes which he had visited in early life.

He now bade farewell to literature for nearly five and twenty years. In 1848 Isaac D'Israeli died, and in the same year the death of Lord George Bentinck gave the Conservative leadership to Disraeli. During the next three years he reorganized the party, and won back the Peelites to Conservatism. In 1852 Lord Derby came into office and Disraeli became chancellor of the exchequer; but his budget was defeated in the first few months of the administration, and the Coalition Cabinet came into power. In 1852 he wrote the "Life of Lord George Bentinck," in which, besides his plea for the Jews, he gives a graphic account of the free-trade struggle. During the war with Russia he loyally supported the Coalition, but when the Aberdeen ministry fell in consequence of the mismanagement of the war, Lord Derby refused to take office without the aid of Mr. Gladstone or Lord Palmerston. This scornful treatment of his own followers angered Disraeli exceedingly. Disraeli was then forty-five years of age: he had lost an opportunity which did not again come to him for many years. In 1858 he and Lord Derby took office for a few months, but were beaten on their new Reform Bill. This year was distinguished by the admission of Jews to Parliament. The elections failed to give Lord Derby a clear majority, and the ministry was turned out of office on the ground of its failure to prevent the war between France and Austria. In 1863 Disraeli came into possession of the fortune of Mrs. Brydges Willyams, a lady of Jewish parentage who had taken great interest in him owing to his Jewish birth and connection with the De Laras, with whom her own family, the Mendez da Costas, had intermarried.

In Office.

The great question which now agitated England was that of reform. In 1865 Lord Palmerston died, and the new premier, Lord John Russell, introduced a bill which was defeated on a matter of detail. He resigned, and Derby and Disraeli came into power. There had been some talk of ignoring Disraeli in favor of another leader, as he had made several tactical errors; but he had lived down his eccentricities and reconstructed his party, and though he had failed on the whole to win their confidence, he was too formidable to be overlooked. It was now that he made the celebrated "leap in the dark," which drew down upon him the wrath of Carlyle, who described him as "a superlative Hebrew conjurer, spellbinding all the great lords, great parties, great interests, of England." His new policy was bitterly denounced by many of his own party, but nevertheless restored the Conservatives to public confidence. Perceiving that reform was inevitable, he outbid the Whigs and introduced a bill of a far more radical nature than that proposed by his opponents. He lost three of his party in the process, Lord Cranborne (afterward Lord Salisbury), Lord Carnarvon, and General Peel; but the measure became law.

Lord Derby now retired from political life and Disraeli became premier. In 1869 the elections went against him, and he yielded office to Mr. Gladstone. Refusing a peerage on giving up office, he nevertheless had his wife created Viscountess of Beaconsfield in her own right; four years later she died. In 1874 he was once more returned to power. It was the first time there had been a clear Tory majority for more than thirty years; and since 1848 he had had no real chance to display his abilities. Now nearly seventy, he was compelled to exchange the House of Commons for the less strenuous atmosphere of the House of Lords, becoming Earl of Beaconsfield in 1876. At this time several Turkish provinces were in rebellion, and Russia, in defiance of treaty obligations, declared war upon the sultan. Public feeling was greatly excited against Turkey by the atrocities committed by the irregular troops in Bulgaria (which, however, were subsequently found to be greatly exaggerated), and Lord Beaconsfield was

THE BERLIN CONGRESS, 1878

BENJAMIN DISRAELI, EARL OF BEACONSFIELD IN CONFERENCE WITH PRINCE GORTSCHAKOFF

At Berlin Congress.

overruled in his desire to intervene on behalf of Turkey. His political enemies accused him of "Semitic instincts," though the Turks are not a Semitic race. But when Russia had practically effaced the Turkish empire in Europe by the treaty of San Stefano, Lord Beaconsfield sent the British fleet into the Dardanelles and brought Indian troops to Malta as an indication of the intentions of the British government. This latter act subjected him to the accusation of undermining the liberties of England by unconstitutional procedures. Russia submitted, and agreed to the discussion of the whole affair at the Congress of Berlin. Lord Beaconsfield went as a delegate, accompanied by the Marquis of Salisbury, and succeeded in compelling Russia to modify materially the terms of the treaty. By this congress it was decreed that Rumania should grant full religious freedom to her subjects. Disraeli's public interference on behalf of the Jews of Rumania consisted in supporting M. Waddington, who introduced the subject on behalf of France; but it is believed that he was more active, and took the initiative behind the diplomatic scenes. His whole conduct of affairs at the congress extorted the admiration of the assembled diplomats of Europe, and he had reason to boast on his return that he had brought back "peace with honor" (see Berlin Congress).

Among the other acts of Lord Beaconsfield during his administration was the enactment of the law by which Queen Victoria was proclaimed Empress of India. He annexed Cyprus, and in return for it guaranteed the protection of the Turkish dominions in Asia Minor. By a clever piece of business foresight he purchased a number of shares in the Suez Canal, which have since increased in value to an enormous extent. This was done at his own personal initiative, acting on a hint of Mr. Greenwood, and was carried through with the aid of the Rothschilds, who took some risks in buying the shares before Parliament had ratified the sale. Disraeli was on familiar terms with the Rothschild family, and would often listen at their table to the Hebrew grace after meals intoned according to the usual cantillation. "I like to listen to the old tunes," he remarked on one occasion.

In 1880 Mr. Gladstone was again returned on questions of domestic legislation. Lord Beaconsfield had no prospects of surviving Gladstone's administration, but nevertheless continued to direct the affairs of his party until his death. During his later years he wrote two more novels: "Lothair" (1870) and "Endymion" (1880). The anniversary of his death is celebrated as "Primrose Day," and in connection with it a large Conservative organization has grown up, known as the "Primrose League."

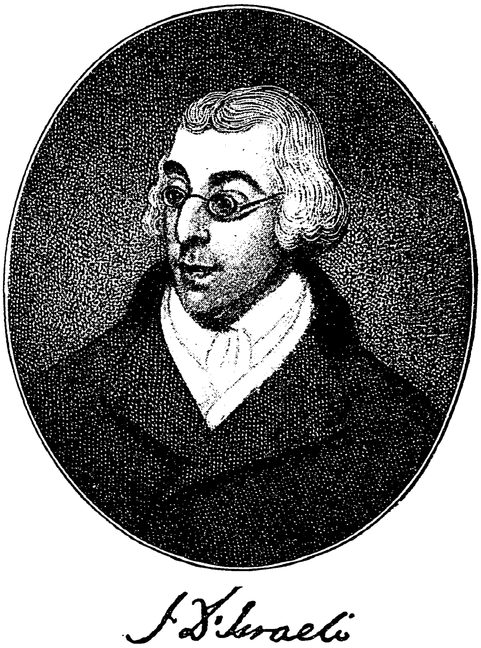
J. V. E.

D'ISRAELI, ISAAC: English author; born at Enfield, Middlesex, May, 1766; died at Bradenham Jan. 19, 1848. He was the only son of Benjamin D'Israeli, and after completing his studies and travels, he first appeared in print (Dec., 1786) with a vindication of Dr. Johnson's character in the "Gentleman's Magazine." In 1790 he published his first volume in verse, entitled "A Defense of Poetry." An attack on "Peter Pindar" (Dr. T. Wolcot) first drew attention to D'Israeli, and he soon obtained introductions to various literary men. Now finally adopting a literary career, the following twenty years of his life were spent in the production of a succession of literary works, which rapidly made his reputation and met with considerable success. In 1791 he issued anonymously a collection of ana entitled "Curiosities of Literature," which had an immediate vogue. He added a second volume in 1793, a third in 1817, two more in 1823, and a sixth in 1834. "A Dissertation on Anecdotes" appeared in 1793, "An Essay on the Literary Character" in 1795, "Miscellanies of Literary Recollections" in 1796, "Calamities of Authors" in 1812–13, and "Quarrels of Authors" in 1814. These works contain a large amount of interesting matter, not always very reliable, on the lives of authors, and have formed a fund of anecdotage from which succeeding writers have drawn copiously. Their accuracy was impugned by Bolton Corney, who opened with D'Israeli a fresh chapter of the "quarrels of authors" in 1837–38.



I. D'Israeli

(From a drawing by Drummond, published in the "Monthly Mirror," 1797.)

D'Israeli also tried his hand at romances; but these were never successful. In 1797 three were published—viz., "Vaurien: A Sketch of the Times"; "Flim-Flams, or the Life of My Uncle"; and "Mejnoun and Leila, the Arabian Petrarch and Laura," said to be the earliest Oriental romance in the English language and which was translated into German in 1804. D'Israeli's last novel, "Despotism, or the Fall of the Jesuits," appeared in 1811.

Meanwhile his reputation was growing apace. His article on Pope in the "Quarterly Review" for 1820 aroused a controversy in which Bowles, Byron, Roscoe, and Campbell took part. Between 1828 and 1830 appeared in 5 vols. D'Israeli's "Commentary on the Life and Reign of Charles I.," based on original documents. In recognition of this production he was made a D.C.L. at Oxford in 1832. In 1833 he issued anonymously the "Genius of Judaism," in which he wrote enthusiastically of Israel's past history, but deplored its social exclusiveness in his own day. He had expressed similar views in his "Vaurien" (1797), and in an article on Moses Mendelssohn in the "Monthly Review" for July, 1798.

Religiously, Isaac D'Israeli was a man far in advance of his times, and was perhaps the first English Jew who took the modern attitude toward Jewish ceremonial. In 1813 D'Israeli was elected warden of the Bevis Marks Synagogue, to which both he and his father had been attached. This office he declined, expressing surprise that he should have been elected at so late a period in his life. No notice was taken of his communication; and in accordance with established usage the recalcitrant was fined £40. Some correspondence ensued, in which D'Israeli, after expressing his unwillingness to pay the fine, finally saying: "I am under the painful necessity of wishing that my name be erased from the list of your members of Yehedim." D'Israeli never returned to the Jewish fold, and his sons and connections embraced the Christian faith. D'Israeli himself did not, however, receive baptism, and never evinced any desire to exchange Judaism for Christianity. He attended the inauguration ceremonies of the Reformed Synagogue at Berkeley street, London.

Toward the close of 1839 D'Israeli suffered from paralysis of the optic nerve; and he was totally blind for the rest of his life. He managed, however, to complete his "Amenities of Literature" (1840), which was followed by a revised edition of the "Curiosities" (1841) and a paper in the "Gentleman's Magazine," his last work.

D'Israeli married Maria Basevi, sister of Joshua Basevi, and left as issue four sons and one daughter, of whom the best known was Benjamin DISRAELI, Earl of Beaconsfield.

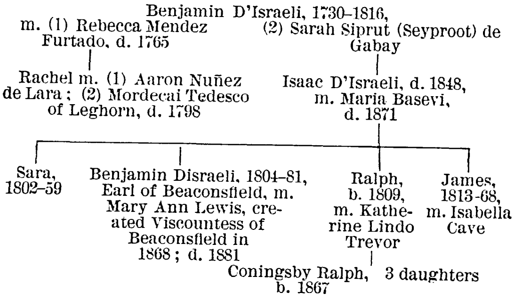
J. G. L.

DISRAELI PEDIGREE: The following is a genealogical tree of the Disraeli family:



Benjamin D'Israeli, 1730–1816,
m. (1) Rebecca Mendez Furtado, d. 1765
(2) Sarah Siprut (Seyproot) de Gabay
Rachel m. (1) Aaron Nuñez de Lara; (2) Mordecai Tedesco of Leghorn, d. 1798
Isaac D'Israeli, d. 1848, m. Maria Basevi, d. 1871
Sara, 1802–59
Benjamin Disraeli, 1804–81, Earl of Beaconsfield, m. Mary Ann Lewis, created Viscountess of Beaconsfield in 1868; d. 1881
Ralph, b. 1809, m. Katherine Lindo Trevor
James, 1813-68, m. Isabella Cave
Coningsby Ralph, b. 1867
3 daughters

Lord Beaconsfield could trace his ancestry only back to his grandfather of the same name, who arrived in England from Venice in 1759 (though he himself dated his grandfather's arrival 1748). Benjamin Disraeli, however, claimed that the Disraelis were of Sephardic stock, exiled from Spain in 1492, and that they had settled in Venice for the intervening 250 years. As will be seen from the pedigree, the English branch intermarried with the families of Mendez Furtado, Nuñez de Lara, Tedesco, Siprut, Basevi, and Lindo. A Benjamin Disraeli of Dublin (d. 1814) was also probably a relation, though the connection has not been defined.

DISTAFF: A stick on which flax or wool was wound ready for hand-spinning before the spinning-wheel came into use. It was held under the left arm, or stuck in the girdle, of the spinner. The fibers were drawn from it and twisted by the thumb and forefinger of the right hand. The thread so spun was wound on an oval reel, generally provided at its thickest part with a ring hanging from the thread and turning with it during spinning in order to insure regularity of the movement. In Israel the use of the distaff was deemed the "wisdom" of women (אין חכמה לאשה אלא בפלך, Yoma, 66b); and the articles manufactured were sold even in foreign countries (Pes. 50b; Ket. 106a; Prov. xxxi. 24). The spinning-women had a share in equipping the sanctuary (Ex. xxxv. 26). According to Parḥon, Prov. xxxi. 19 reads: "[The housewife] stretches her hands out to the distaff [כישור], and her fingers lay hold of the spindle [פלך]"; but Ḳimḥi and Abu al-Walid invert the meanings, "kishar" being the spindle or ring, and "pelek" the distaff (compare II Sam. iii. 29, Hebr., "pelek" = staff).

In the Talmud the distaff is known as אימה (עימה) (Kel. xi. 6, xxi. 1) and as ארנס or אורנס, the Arabic "'irnas" (Shab. 91b). An extended description of the spinning implements is given by Maimonides in his commentary on Parah xii. 8 (ed. Derenbourg, "Seder Ṭohorot," pp. 241 *et seq.*, Berlin, 1889).

M. Sc.—E. G. H.

DITTEL, LEOPOLD RITTER VON: Austrian surgeon; born at Fulneck, Moravia, May 15, 1815; died at Vienna July 28, 1898. He was educated at the gymnasia of Troppau and Brünn, and at the University of Vienna, whence he was graduated as doctor of medicine in 1840.

After acting for a short time as assistant physician at the gymnastic-orthopedic institute of Zink in Vienna, he engaged in practise as a physician at Trentschin-Teplitz, Hungary. Being busy only during the summer months, he studied during the winter in Vienna under Skoda, Rokitansky, and Hebra, and in 1852 became assistant to Dlauhy in Vienna. From 1853 to 1857 he was assistant to Dumreicher and assistant surgeon at the hospital of the University of Vienna. In 1856 he became privat-docent at the university; in 1861 he was appointed surgeon-in-chief of the Allgemeine Krankenhaus, and in 1865 he was made assistant professor. Dittel was the founder (1864) and for a long time chief of the surgical-anatomical institute of the university. Resigning his academic position in 1875, he refused in 1880 the appointment of professor at the university in succession to Dumreicher. Soon afterward he was ennobled.

Dittel made a special study of urinology, in which branch he was very eminent. In 1894 he made a report on 800 operations for stone performed by him. His greatest achievements were: the construction of a carrier for drugs for local treatment of the urethra; the endoscopic diagnosis, especially of tumors of the bladder; the electrical lamp instead of the platina wire on the end of the cystoscope; operations on the bladder through the rectum (see Albert's memorial speech on Dittel in "Wiener Klinische Wochenschrift," 1898, No. 42).

Dittel embraced the Catholic faith. He was a prolific writer. Of his many essays and works may be mentioned: "Ueber Klumpfuss," 1851; "Skoliose," 1853; "Beiträge zur Pathologie und Therapie der Männlichen Geschlechtstheile," 1859; "Sekundäre Luxation des Hüftgelenkes," 1861; "Der Kathederismus," 1864; "Beitrag zur Lehre der Hypertrophie der Prostata," in "Oesterreichischer Medizinischer Jahrbericht," 1867; "Der Steinsauger," in "Allgemeine Wiener Medizinische Zeitung," 1870; "Die Stricturen der Harnröhre," in Pitha-Billroth's "Handbuch der Chirurgie," ii., part 2, 1872; "Zur Behandlung der Hypertrophie der Vorsteherdrüse," in "Wiener Medizinische Wochenschrift," 1876; "Operationen der Blasensteine," *ib.* 1880; "Nierencalculose," *ib.* 1881.

S. F. T. H.

DIVEKAR, ABRAHAM SAMUEL: Beni-Israel soldier; born near Bombay about 1830. He enlisted in the Nineteenth Regiment native infantry March 1, 1851; was promoted to the rank of a jemedar Jan. 1, 1872; and was appointed subedar Sept. 10, 1878. Divekar was present at the battles of Multan, Gujarat, Punjab, and received a medal and two clasps. He was also in the Afghan war of 1878–80, where he lost his right arm in the battle of Deh-Khoja (Aug. 16, 1880), again obtaining a medal for bravery.

J. J. Hy.

DIVEKAR, SAMUEL EZEKIEL (Samajee Hasajee): Soldier in the service of the East India Company and second founder of the Beni-Israel congregation of Bombay; born at Cochin in 1730; died there in 1797. He enlisted in the East India Company's army about 1760, and rose to the rank of native commandant in the Sixth Battalion. While serving in the second Mysore war, under General Matthews, he was taken prisoner with several other Beni-Israel by Tippu Sahib, and he and his companions were about to be executed; but when they stated that they were Beni-Israel the mother of Tippu Sahib, who was familiar with that name in the Koran, begged their lives; and Divekar and his companions were cast into prison. He made a vow that if he were released he would devote his life to reviving Judaism among the Beni-Israel of Bombay; and on escaping in 1795, he went to that city, and by his exertions induced the Beni-Israel to build a synagogue and adopt the ritual and Jewish observances current in Cochin. A synagogue was erected in 1796; but Divekar died the following year in his native place, whither he had gone to obtain scrolls of the Law for the new congregation.

J.

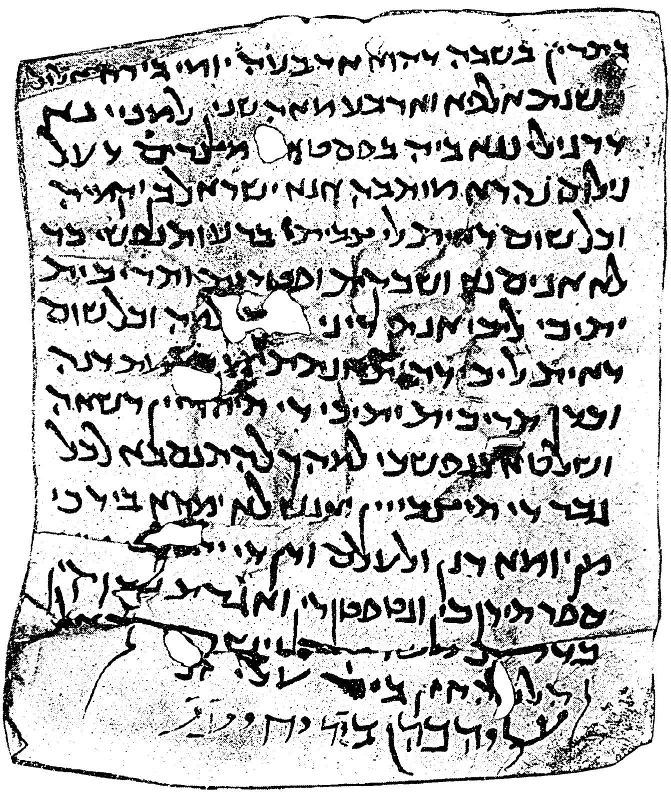
DIVINATION: The forecasting of the future by certain signs or movements of external things, or by visions in certain ecstatic states of the soul (see DREAMS and PROPHECY). Divination rests on the belief that spirits inhabit the various elements of life and are able to impart the knowledge of the future to man, and it is, like all idolatrous practises, forbidden by the Law. "Neither shall ye use enchantments nor practise augury." "Turn ye not unto them that have familiar spirits nor unto the wizards" (Lev. xix. 26, 31, Hebr.). "There shall not be found with thee . . . one that uses divination, one that practiseth augury, or an enchanter, or a sorcerer, or a charmer, or a consulter with a familiar spirit, or a wizard, or a necromancer. For whosoever doeth these things is an abomination unto the Lord, and because of these abominations the Lord thy God doth drive them out from before thee" (Deut. xviii. 10, 11, Hebr.).

The general term for "divination" in Hebrew is קסם (Deut. *l.c.*; I Sam. vi. 2, xv. 23 [A. V. "witchcraft"], xxviii. 8: קסמי נא לי באוב, "divine unto me by the familiar spirit"; Ezek. xii. 24; Isa. iii. 2 [A. V. "prudent"]; Zech. x. 2; and elsewhere). Balaam used divination (Num. xxii. 7, xxiii. 22; Josh. xiii. 22 [A. V. "soothsayer"]). For the original meaning or etymology of קסם reference has been made to Ezek. xxi. 26 (21), where Nebuchadnezzar is represented as standing at the parting of the ways and shaking the arrows to and fro to determine which way he should go, whether to Jerusalem or to the capital of the Ammonites. Accordingly "ḳasam" is explained after the Arabic "istaḳsam" (to obtain a divine decision), from "ḳasam" (distribute, or divide), as signifying the casting of lots by throwing the arrows from the quiver, a practise familiar to the Arab Bedouins (see Jerome to Ezek. *l.c.*; Herodotus, iv. 67; Gesenius, "Thesaurus," *s.v.*; W. R. Smith, in "Journal of Philology," xiii. 276; Wellhausen, "Skizzen und Vorarbeiten," 1887, pp. 126 *et seq.*).

Specific forms of divinations are mentioned in Lev. xix. 26 (מעונן, "enchantments"); Deut. xviii. 10, 14 (R. V. "augury"); Judges ix. 37 (Hebr. "the soothsayers' terebinth"); II Kings xxi. 6; Isa. ii. 6 ("the Philistines are filled with מקדם [probably to be emended to מקסם = "divination"] and soothsayers"); Isa. lvii. 3 (בני עוננה, A. V. "ye sons of the sorceress"); Jer. xxvii. 9; Micah v. 11 (12). The real meaning and etymology of the word are obscure. Smith (*l.c.*) explains it from the Arabic "'ann" (to murmur, or hum hoarsely), this being the practise of the Arabic soothsayer. The explanation suggested by the Hebrew and adopted by most commentators and lexicographers is "the observation of the movements of the clouds" (ענן; compare Jer. x. 2; Josephus, "B. J." vi. 5, § 3). Lenormant

("Magie und Wahrsagekunst," p. 456), quoting a Babylonian rule, "When bluish dark clouds rise on the horizon the wind will blow during the day," and a divination from the movement of the clouds from the time of the Byzantine emperor Leo I. favors this explanation of מעונן, offered also by Ibn Ezra on Lev. *ad loc.* Also the "terebinth of the soothsayers" (Judges *l.c.*; compare II Sam. v. 24) indicates "the practise of divination from the movements of air-currents (see Baudissin, "Studien zur Deutschen Religionsgeschichte," 1878, ii. 226). Luther's translation, "Tageswächter" (Observer of Auspicious Times; see Rashi *ad loc.*), rests on an etymological combination with עת, עונה (= "time").

מנחש (lit. "he that observes the movement or the hissing of the serpent," נחש; see Baudissin, *l.c.* i. 287) is a term used in general for one who observes omens (Gen. xliv. 5, 15, A. V. "divineth"; Lev. xix. 26, A. V. "augury"; Num. xxiii. 23, xxiv. 1; II Kings xvii. 17, xxi. 6, A. V. "enchantments"; compare Gen. xxx. 27; I Kings xx. 33). The term is applied in the story of Joseph (Gen. *l.c.*) to the observation of figures formed by water or oil in a cup, called by the Greeks "hydromancy." It was known also to the Romans, who ascribed its origin to the Persians, with whom the practise was especially in vogue, as may be learned from the cup of Jemshid in the Shah Nameh. But the Chaldeans and Arabians were also familiar with it (see Lenormant, *l.c.* pp. 463 *et seq.*; Lane, "Customs and Manners of the Modern Egyptians," ii. 362). Another form of divination is the casting of rods (see Hosea iv. 6): "My people ask counsel at their stock, and their staff declareth unto them"—a practise called "rhabdomancy" or "xylomancy" by the Greeks, and similar to the casting of arrows mentioned above (see the commentaries *ad loc.* and Wellhausen, *l.c.*).



Hebrew Bill of Divorce, or Get, from the Cairo Genizah, Dated 1400 Seleucid Era = 1088 C.E.
(In the New York Public Library.)

ראה בכבד (Ezek. *l.c.*), "looking in the liver," is the Greek "hepatoscopy." (See Lenormant, *l.c.* p. 453, for the Chaldean, Phenician, Greek, and Roman practises.) The convulsive motions of the lung and liver when taken from the sacrificial victim (the liver was regarded as the seat of life, Prov. vii. 23) were watched as a means of forecasting the future.

For other forms of divination and for divination in rabbinical literature see ASTROLOGY; AUGURY; NECROMANCY; SUPERSTITION; WITCHCRAFT.

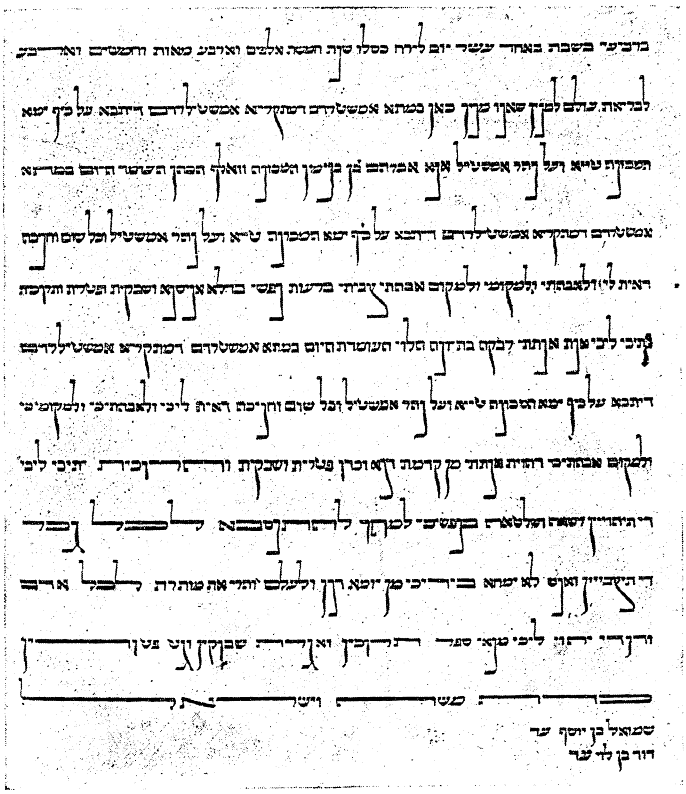
DIVINE JUDGMENT. See JUDGMENT, DIVINE.

DIVINE SERVICE. See LITURGY.

DIVORCE: Dissolution of marriage. The origin of the Jewish law of divorce is found in the constitution of the patriarchal family. The fundamental principle of its government was the absolute authority of the oldest male ascendent; hence the husband, as the head of the family, divorced the wife at his pleasure. The manner in which Hagar was dismissed by Abraham illustrates the exercise of this authority (Gen. xxi. 9-14). This ancient right of the husband to divorce his wife at his pleasure is the central thought in the entire system of Jewish divorce law. It was not set aside by the Rabbis, though its severity was tempered by numerous restrictive measures. It was not until the eleventh century that the absolute right of the husband to divorce his wife at will was formally abolished.

The earliest restrictions of this right are found in the Deuteronomic code. In two cases the law provided that the husband "shall not be at liberty to put her away all his days": (1) if he falsely accused her of antenuptial incontinence (Deut. xxii. 13-19); (2) if he had ravished her before marriage (Deut. xxii. 28, 29). In the Mishnaic period the theory of the law that the husband could divorce his wife at will was challenged by the school of Shammai. It interpreted the text of Deut. xxiv. 1 in such a manner as to reach the conclusion that the husband could not divorce his wife except for cause, and that the cause must be sexual immorality (Giṭ. ix. 10; Yer. Soṭah i. 1, 16b). The school of Hillel, however, held that the husband need not assign any reason whatever; that any act on her part which displeased him entitled him to give her a bill of divorce (Giṭ. *ib.*). The opinion of the school of Hillel prevailed. Philo of Alexandria ("Of Special Laws Relating to Adultery," etc., ch. v.; English ed., ii. 310, 311) and Josephus ("Ant." iv. 8) held this opinion. Jesus seems to have held the view of the school of Shammai (Matt. xix. 3-9).



Hebrew Bill of Divorce, or Geṭ.

(From Bodenschatz, "Kirchliche Verfassung," 1748.)

Although not overthrown, the ancient theory of the husband's unrestricted right was still further modified by the Mishnah. To the two restrictions mentioned in Deuteronomy the Mishnah adds three others. It provides that the husband can not divorce his wife, (1) when she is insane (Yeb. xiv. 1), (2) when she is in captivity (Ket. iv. 9), or (3) when she is a minor, so young as to be unable to understand or to take care of her geṭ, or bill of divorce (*ib.*). The Mishnah furthermore modified the right of the husband indirectly by making the divorce procedure difficult, and bristling with formalities in ordering, writing, attesting, and delivering the geṭ. The matter required the assistance of one learned in the law (Ḳid. 6a), whose duty it became to attempt to reconcile the parties, unless sufficient reason appeared for the divorce.

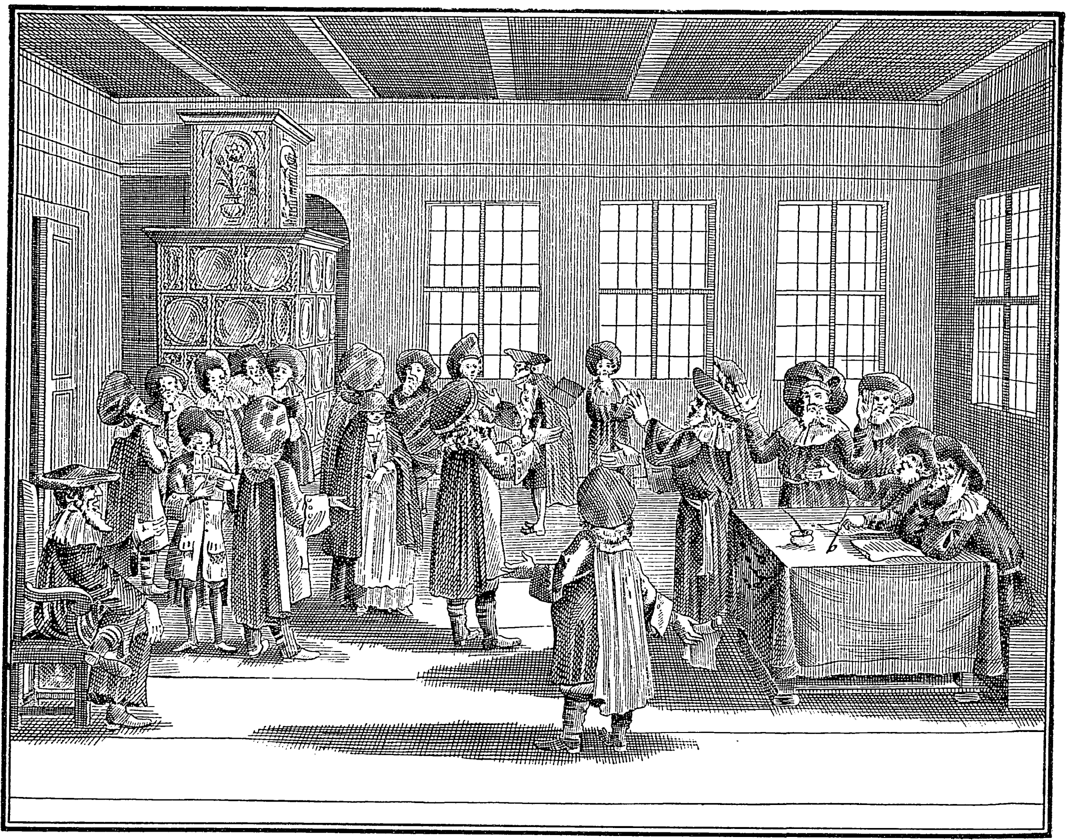
Modifications.

Another check on the exercise of the theoretical right of the husband to divorce his wife was the law compelling him to pay her the dowry or the amount of her KETUBAH. Rabban Gamaliel deprived the husband of the power to "annul" his geṭ (see CANCELATION OF DOCUMENTS) (Giṭ. iv. 2). If the husband was insane, he could not divorce his wife; and if he was temporarily deranged or delirious, or intoxicated, he was for the time being incapable of performing this as well as other legal acts (Yeb. xiv. 1; Giṭ. vii. 1, 67b). A deaf-mute could not divorce his wife unless he had married her after he had become a deaf-mute (Yeb. xiv. 1). These many qualifications of the theoretical right of the husband to give a geṭ to his wife at his pleasure, resulted in gradually eliminating from the popular mind the notion that such a right existed. The views of the moralists were opposed to divorce (Giṭ. 90b), and finally (as stated above), in the eleventh century, by a decree of Rabbi Gershon of Mayence, this theoretical right of the husband was formally declared to be at an end. The substance of this famous decree is thus stated (Responsa "Asheri," xlii. 1): "To assimilate the right of the woman to the right of the man, it is decreed that even as the man does not put away his wife except of his own free will, so shall the woman not be put away except by her own consent." Where either of the parties, however, shows good cause for divorce the marriage will be dissolved against the will of the guilty party (Shulḥan 'Aruk, Eben ha-'Ezer, 119, 6, gloss).

The wife's right to sue for divorce was unknown to the Biblical law. There is a germ of this right in Ex. xxi. 11, but it was not until the Mishnah that this right was established. The wife never obtained the right to give her husband a geṭ, but when the court decided that she was entitled to be divorced from him, he was forced to give her a geṭ. During the reign of the Herodians, under the influence of Roman practise, cases are recorded in which women sent bills of divorce to their husbands (Josephus, "Ant." xv. 11, xviii. 7). These were recognized as breaches of the law, and never became precedents. The following causes are recognized as entitling the wife to demand a bill of divorce from her husband: refusal of conjugal rights (Ket. v. 6); impotence (Ned. xi. 12); when the husband has some loathsome disease, or leprosy, or is engaged in some malodorous business (Ket. vii. 9); the husband's refusal to support her (Ket. 77a); cruel treatment and deprivation of her lawful liberty of person (Ket. vii. 2–5, v. 5); wife-beating (Eben ha-'Ezer, 154, 3, gloss); the husband's apostasy (Maimonides, "Yad," Ishut, iv. 15)—in the last-named case the Jewish courts, having lost their authority over him, could appeal to the courts of the Gentiles to carry out their mandate ("Bet Joseph," 134); the husband's licentiousness (Eben ha-'Ezer, 154, 1, gloss).

Re-marriage After Divorce.

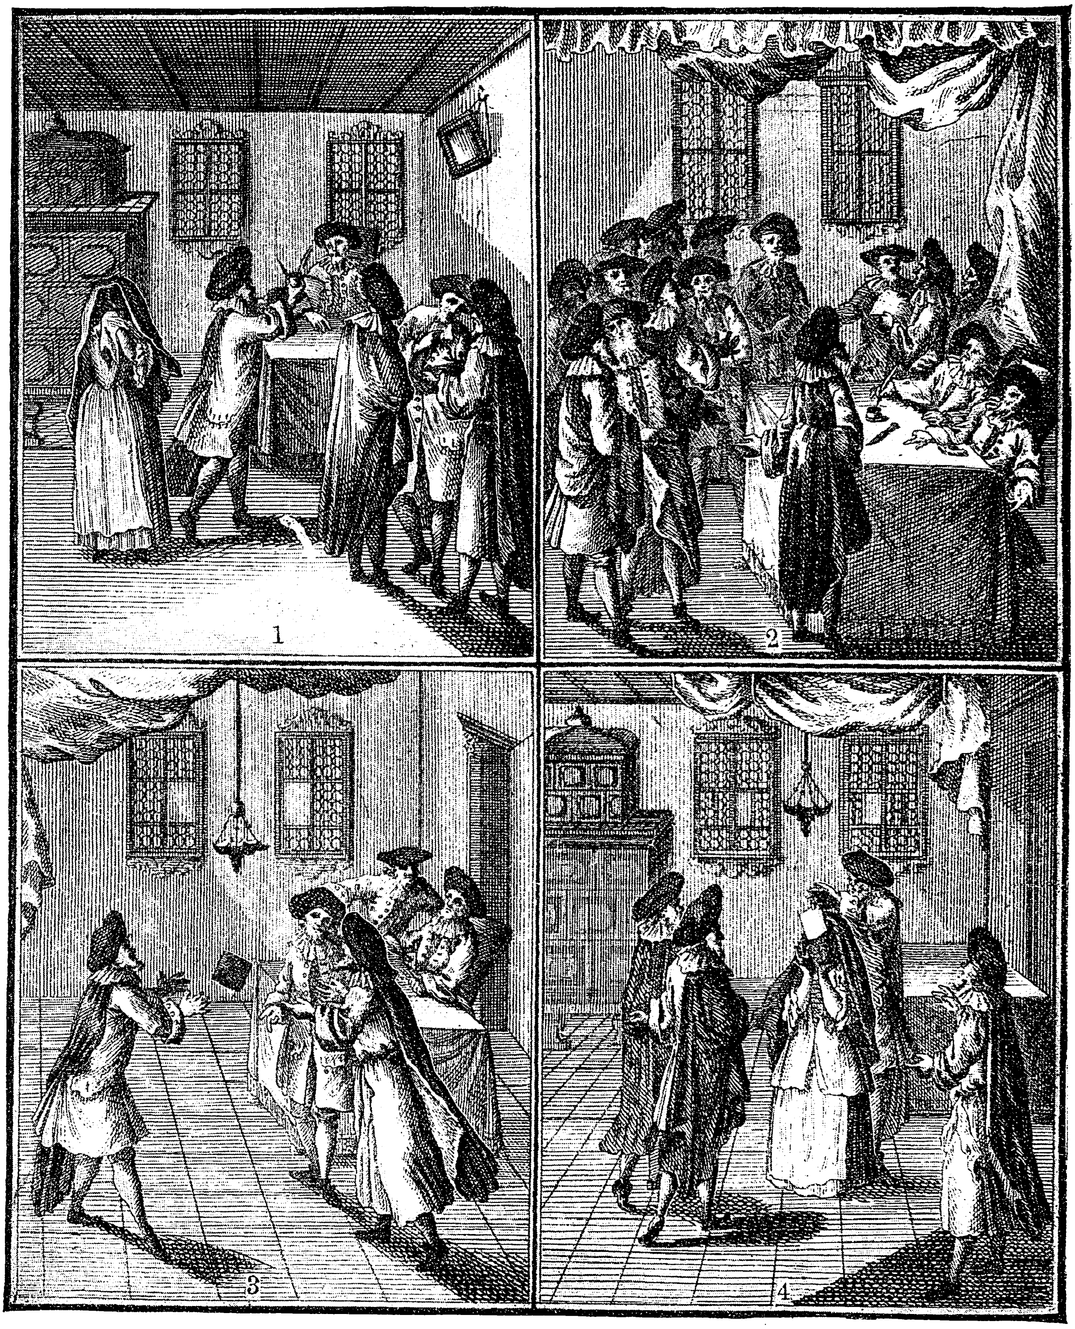
After the parties had been divorced, the law favored their remarriage ('Eduy. iv. 7). But if the wife had married another man after her divorce, she could never be remarried to her first husband (Deut. xxiv. 1–5). To this Biblical law forbidding remarriage of the parties, the Mishnah adds five other cases. They can not remarry after a divorce (1) if the woman has been divorced upon suspicion of adultery; (2) if she was divorced because she had subjected herself to the obligation of certain vows (Giṭ. iv. 7); (3) if she was divorced because of her barrenness (Giṭ. iv. 11); (4) if a third person had guaranteed the payment of her ketubah; the reason in this case being that a scheme to defraud might result through collusion of the husband and wife against the guarantor of the ketubah; she might receive the divorce, collect the amount of the ketubah from the guarantor, and then remarry her husband to enjoy the benefit of the fraud with him (B. B. x. 9); (5) if the husband has consecrated all his property to religious uses subject to his wife's ketubah ('Ar. vi. 2).



DIVORCE SCENE IN GERMANY.
(From Kirchner, "Jüdisches Ceremoniel," 1726.)

In some cases the courts will compel the separation of the husband and wife on grounds of public policy, against the will of both parties. Among these cases are the following: the marriage of persons within the prohibited degrees enumerated in Lev. xviii.; the marriage of a Jew and a non-Jew ('Ab. Zarah 36b); the marriage with a "mamzer" or a "natin" (Yeb. viii. 3); the marriage of an adulteress and her paramour (Soṭah v. 1; Yeb. ii. 8). The same rule applies if one of the parties becomes afflicted with leprosy (Ket. 77b); or if they have been married for ten years and no children are born to them (*ib.*), although the practise of enforcing separation in the latter case fell into abeyance (Eben ha-'Ezer 1, 3, gloss 154, 10).

The divorced woman was "sui juris," and could give herself in marriage to whom she pleased, with certain exceptions. She could not marry the man suspected of having committed adultery with her (Yeb. ii. 8), nor the messenger who brought her the get from her husband (*ib.* 9). She was not permitted to be remarried within three months after her divorce, in order that the paternity of the child with which



Scenes at Divorce.

(From Bodenschatz, "Kirchliche Verfassung," 1748.)

she might be pregnant might not be in doubt (Yeb. iv. 10).

The children of the divorced woman remained in her custody; but the custody of the boys could be claimed by the father after their sixth year (Ket. 65b, 102b). According to later decisions, however, the court awarded the custody of the children according to its discretion (Eben ha-'Ezer, 82, 7, gloss).

For further information concerning the bill of divorce, its preparation, attestation, and delivery, see Geṭ.

S. S. D. W. A.

DIZAHAB: Name occurring but once in the Bible—in the topographical description in Deut. i. 1. Its identity has not been successfully established. The context, locating it indefinitely in the trans-Jordanic region, and mentioning it among localities connected with similar difficulties, gives no clue. Inviting by its form etymological interpretations, the ancient versions have accordingly translated it *καταχρύσεα*, "ubi auri est plurimum," and **די זהב** ("a sufficiency of gold"). Onkelos expands it into a Midrash (on account of the golden calf), and is followed in this by Rashi.

This idea is still more fully enlarged upon by Targ. Yerushalmi and pseudo-Jonathan; they also see in it an allusion to the golden calf, but hold that the sin thus committed was pardoned in consideration of Israel's having covered the Ark of the Covenant with "shining gold." Ibn Ezra simply suggests that it and the other *ἅπαξ λεγόμενα* in this passage may be unusual designations for places otherwise denoted by different names. According to the school of Rabbi Jannai, Moses in this verse refers to the golden calf, "to make which Israel was tempted by the superabundance of gold and silver poured out over them by God until they protested 'it is enough'" (Ber. 32a). Cheyne proposes to emend into "Me-zahab," which Sayce among others has urged as corresponding, in Gen. xxxvi. 39, to "Di-zahab" in Deut. i. 1. This "Me-zahab," however, Cheyne holds again to be a corruption of "Miẓraim," the name for the northern Arabian land, Miẓri or Miẓrim, adjoining Edom. Burckhardt ("Travels in Syria," 1822, p. 523) suggests "Mina al-Dhahab" as its equivalent, but this view has been abandoned by modern commentators.

DLUGOSZ, JEAN. See Poland.

DLUGOSZ (דלונגטש: not **De Lantes**), **SAMUEL B. MOSES:** Biblical commentator and poet of the seventeenth century; born in Grodno, Lithuania. He edited the Prophets and the Hagiographa in the Judæo-German translation of the Bible, "Ha-Maggid," to which he added a commentary on the Book of Judges entitled "Aguddat Shemuel" (Amsterdam, 1699; Wandsbeck, 1737). He was also a liturgical poet; to his translation of the Bible (1699) he added an Aramaic seliḥah in rime, and two dirges, which were reprinted entire in the "Tiḳḳun Shobabim" (Mantua, 1732) and elsewhere.

DOB BAER B. JUDAH LOEB. See Treves, Dob Baer b. Judah Loeb.

DOB BAER B. LOEB: Polish rabbi; died in Lemberg 1779. In 1745 he was rabbi at Koznitz in the government of Lublin; in 1754, rabbi of Kroshnik, about which time he went to Yaroslav to meet the rabbis who defended the cause of Jonathan Eybeschütz against Jacob Emden. In 1758 he was rabbi of Reshaw. Finally he became rabbi and chief of the yeshibah of Lemberg, where he remained till his death.

DOBRITZ: Town in Bulgaria, twenty-six miles north of Varna. It contains about 200 Jews in a total population of 14,000. This little community, which was founded in 1870, is administered by three of the leading Jews. It has a synagogue, erected in 1897, and a small mixed school. The Jews are occupied as ironmongers, tinsmiths, watchmakers, and small traders. Four or five Jewish families live at Baltchik, not far from Dobritz.

DOBRUSKA, MOSES: Austrian writer and poet; born July 12, 1753, in Brünn, Moravia; guillotined April 5, 1793, at Paris. The son of a wealthy Jew, Dobruska was originally destined for the career of a rabbi, and accordingly received a careful Talmudic education. Later the acquaintance of a Jew engaged in the study of Hebrew poetry, rhetoric, and Oriental languages induced him to give up theological subjects and to devote himself to the humanities, but not until after a painful struggle with his father, who protested against his plans being so radically brought to naught. Having overcome the paternal opposition, Dobruska eagerly began to study the old German classics and poets. Especially the idyls of Gessner made a deep impression upon him and instigated him to the further study of the German poets. In his ardent pursuit of literary occupations he even succeeded in persuading his father to allow him a considerable sum of money (1,500 florins) for the purchase of books. Besides German he also studied English, French, and Italian.

On Dec. 17, 1773, Dobruska embraced the Roman Catholic faith, and at his baptism in Prague assumed the name of Franz Thomas Schönfeld. Subsequently, together with his brothers, he was raised to the nobility (1778); and for some time he held the position of associate director of the famous Garelli Library in Vienna. Nothing is known in regard to the cause of Dobruska's execution.

Besides several posthumous poems that appeared in Becker's "Taschenbuch zum Geselligen Vergnügen," Dobruska published: "Etliche Gedichte zur Probe," Vienna, 1773; "Schäferspiele," Prague, 1774; "Theorie der Schönen Wissenschaften," Prague; "Ueber die Poesie der Alten Hebräer," *ib.*;

"Ein Schäfergedicht in Hebräischer Sprache," *ib.*; "Eine Hebräische Poetische Uebersetzung des Pythagoras' Goldener Sprüche," Prague, 1775; "Gebet oder Christliche Ode in Psalmen," Vienna; "David's Kriegsgesänge, Deutsch aus dem Grundtexte," Vienna and Leipsic, 1789.

DOBSEWITCH (DOBSEVAGE), ABRAHAM BAER B. JOSEPH EZRA: Russian Hebraist and exegete; born in Pinsk Oct. 17, 1843; died in New York Jan. 14, 1900. At the age of thirteen he had written a commentary to the Canticles. In 1861 he went to Yekaterinoslav, where he settled as teacher of Hebrew and contributed to various Hebrew periodicals. In 1874 he removed to Kiev, where he became private tutor to the sons of Brodski and of other wealthy families. He went to the United States in 1891, and lived in New York, leaving it only for a short time in 1895.

Dobsewitch's chief published work is "Ha-Meẓaref" (The Refiner), a collection of rationalistic interpretations of various passages of the Aggadah, Odessa, 1870. Dobsewitch's two later works, "Be-Hada Maḥeta" (With One Sweep), a collection of articles, Cracow, 1888, and "Lo Dubbim we-lo Ya'ar" (Neither Bears nor Forest), Berdychev, 1890, as well as numerous articles in Hebrew periodicals, are devoted to criticisms directed against Shatzkes, Weissberg, and others. He continued his literary activity in the United States, and contributed to "Ha-'Ibri," "Ner ha-Ma'arabi," and various Yiddish publications. Some of his correspondence was published in "Ha-Modi'a le-Ḥadashim," i., New York, 1900.

Dobsewitch left several works in manuscript, including one on the Masorah, one on the Samaritan text of the Pentateuch, and one on the wit and humor of ancient Jewish literature. Short extracts from the last-named work were published in the United States.

DÓCZY (DUX), LUDWIG: Hungarian poet; born at Sopron [Oedenburg], Hungary, Nov. 30, 1845. After finishing his preliminary education he studied law in Vienna, joining at the same time the staff of the "Presse." His political articles, which advocated the "Ausgleich" (agreement) with Austria, were very favorably received, and on the recommendation of Balthasar Horváth, then minister of justice, he was appointed (1868) clerk in the office of the prime minister. When Count Julius Andrássy became minister of foreign affairs (1872) Dóczy accompanied him to Vienna, and was soon appointed "Sectionsrath," and later "Hofrath," at the Foreign Office. In 1899 he was elevated to the rank of baron, and in 1902 retired from public life. He resides at present (1903) in Budapest.

Dóczy's reputation rests not on the services he rendered to the state, but on his achievements as a dramatic writer and as a translator. "Csók" (The Kiss), his best-known comedy, which is played in German as well as in Hungarian theaters, gained the prize of the Hungarian Academy in 1871; the German translation was made by the author himself. Among his other plays are: "Utolsó Szerelem" (Last Love), 1879; "Széchy Mária," 1886; "Vegyes Párok" (Mixed Marriages), 1889; "Vera Grófnö," 1891; "Ellinor Királyleány," tragedy, 1897. Besides these he translated Schauffert's comedy "Schach dem König," 1873, and wrote the libretto to Goldmark's "Merlin" and to Strauss's "Ritter Pázmán." His Hungarian translation of Goethe's "Faust" and his German adaptation of Mádach's "Az Ember Tragédiája" were universally admired. His collected poems and novels appeared in 1890. His latest work is a Hungarian translation of Schiller's poems (1902). Dóczy is a convert to Christianity.

L. G. S. M.

DODANIM: Name of sons of Javan, brothers to Elishah, Tarshish, and the Kittim, in the ethnographic table in Genesis (x. 4). The ancestor being Javan (= Ionian), the Dodanim must represent also a Greek clan. This can not be Dodona in the interior of Epiros, as both the association with the Kittim (= Cyprians) and Gen. x. 5 indicate a people settled on the seashore. Dardanians (the northern Ionians) have been suggested, but it is not likely that the author of this list had such detailed knowledge of the subdivisions of the Greek population. In I Chron. i. 7 the reading is "Rodanim," as it is in the Samaritan, the Septuagint, and Jerome. In Gen. x. 4 these are the inhabitants of the island Rhodus, well known to the Phenicians of old (compare Homer's "Iliad," ii. 654). The only difficulty in the way of this identification is the long "o" in the Hebrew, where the Greek has the short sound. The modern commentators, Baentsch and Holzinger, accordingly change the ד (d) into a ר (r), and read "Rodanim." E. G. H.

DODAVAH (R.V. **Dodavahu,** "loved of God"): The father of Eliezer of Mareshah (II Chron. xx. 37). The latter preached against the alliance between Jehoshaphat and Ahaziah, and saw in the wreck of the ships sent out by Jehoshaphat divine punishment for the alliance. The Septuagint reads the name *Ωδεια*. It is perhaps a corruption of "Dodayahu."

E. G. H. G. B. L.

DODO (דודו): **1.** The father of Eleazar, "one of the three mighty men with David, when they defied the Philistines that were there gathered together to battle" (II Sam. xxiii. 9; R. V. "Dodai"). I Chron. xi. 12 reads "Dodo, the Ahohite," while in the Hebrew of the II Samuel passage he is termed "the son of an Ahohite." I Chron. xxvii. 4 gives "Dodai" as captain over a division of the army in service during the second month. These three passages seem to refer to one and the same person. The same name appears on the Moabite inscription, where it may be read either "Dodo" or "Dodah." The name "Dudu" is found on the Tell el-Amarna tablets as the name of an Egyptian official. **2.** The father of Elhanan (II Sam. xxiii. 24), one of David's thirty mighty men. **3.** Dodo, the father of Puah, the father of Tola, one of the judges of Israel (Judges x. 1).

E. G. H. I. M. P.

DOEG.—Biblical Data: An Edomite; chief of the herdsmen of Saul. When David, warned by Jonathan, fled from Saul to the priest Abimelech at Nob, he found Doeg there. On pretense of being on the king's service, David was hospitably entertained, received the sword of Goliath from Abimelech, and escaped (I Sam. xxi. 2–11). Saul, upon hearing of David's escape, accused his servants of aiding David, whereupon Doeg revealed what had taken place at Nob (*ib.* xxii. 6–10). Saul took Abimelech to task for what he had done (*ib.* 11–13), and ordered his runners to kill the priests of Nob (*ib.* 17); the runners refused to obey, and thereupon Doeg at Saul's command fell upon the priests, and also destroyed Nob (*ib.* 18, 19). Psalm lii., according to its introductory verse, is directed against Doeg.

J. JR. C. J. M.

——**In Rabbinical Literature:** Doeg is the subject of many rabbinical legends, the origin of which is to be found in part in Psalm lii. Though he died at the early age of thirty-four years (Sanh. 69b), he is regarded by the rabbis as the greatest scholar of his time, the epithet אדומי being supposed to have been applied to him because he made every one with whom he disputed "blush" (Midr. Teh. lii. 4; ed. Buber, p. 284). He could bring forward 300 different questions with reference to one single ritual case (Ḥag. 15b). But he was lacking in inward piety, so that God was "anxious" (דואג) concerning his end, and "mourned" (דויג) for him (Sanh. 106b). His most unfortunate qualities, however, were his malice, jealousy, and calumnious tongue. He sounded the praise of David before Saul (I Sam. xvi. 18) only in order to provoke his jealousy, ascribing to David qualities that Saul lacked (Sanh. 93b; compare Midr. Shemuel xix., end). He cherished a grudge against David, whose opinion prevailed over his own in determining the site for the Temple at Jerusalem (Zeb. 54b), and he had well-nigh succeeded in proving by his arguments that David, as a descendant of Ruth the Moabite, could not, according to the Law, belong to the congregation of Israel, when the prophet Samuel interposed in David's favor (Yeb. 76b, 77a; Midr. Shemuel xxii.). He also declared David's marriage with Michal to be invalid, and induced Saul to marry her to another.

Doeg not only disregarded the sanctity of marriage (התיר גלוי עריות), but he also slew with his own hands the priests of Nob, after Abner and Amasa, Saul's lieutenants, had refused to do so (Gen. R. xxxii.; Midr. Teh. lii. 4). As it often happens with those who strive for something to which they are not entitled, he lost that which he possessed (Gen. R. xx.). God sent the three "angels of destruction" (מלאכי חבלה) to Doeg; the first caused him to forget his learning, the second burned his soul, and the third scattered the ashes (Sanh. 106b; differently, Yer. Sanh. x. 29a). According to some he was slain by his own pupils when they found that he had forgotten his learning (Yalḳ., Sam. 131); others maintain that he was slain by David when he (Doeg) informed him of the death of Saul and of Jonathan (II Sam. i. 2; Pesiḳ., ed. Buber, iii. 28b; Ginzberg, "Die Haggada bei den Kirchenvätern," i. 38).

According to another Midrash, Doeg tried to preserve the life of Agag, the king of the Amalekites-Edomites, by interpreting Lev. xxii. 28 into a prohibition against the destruction of both the old and the young in war (Midr. Teh. lii. 4). Doeg is among those who have forfeited their portion in the future world by their wickedness (Sanh. x. 1; compare *ib.* 109b). Doeg is an instance of the evil consequences of calumny, because by calumniating the priests of Nob he lost his own life, and caused the death of Saul, Abimelech, and Abner (Yer. Peah i. 16a; Midr. Teh. cxx. 9 [ed. Buber, p. 504]).

E. C. L. G.

——**Critical View:** The Hebrew text of I Sam. xxi. 7 is difficult, and consequently the genuineness of that verse has been unnecessarily suspected; it is presupposed by xxii. 9 (see H. P. Smith, "Commentary on Samuel," p. 198). The designation, however, of Doeg as "mightiest of the shepherds" (הרעים) of Saul is unusual and unlikely. Budde ("S. B. O. T.") proposes "mightiest of the runners" (רצים) (after Grätz, "Gesch. der Juden," i. 183, note 4), while Lagarde ("Mittheilungen," iii. 350) reads "driver of the mules" (אוביל עירים)—a reading confirmed by xxii. 9 in Septuagint, and by Judges x. 4; I Sam. ix. 3; II Sam. xvi. 2; and I Chron. xxvii. 30. Doeg was probably detained at the sanctuary by a taboo when he saw David (compare W. R. Smith, "Religion of the Semites," 2d ed., p. 456). The mention of Doeg in the title of Ps. lii. is a late interpolation of no critical value.

J. JR. G. A. B.

DOG (כלב).—Biblical Data: The dog referred to in the Bible is the semisavage species seen throughout the East, held in contempt for its fierce, unsympathetic habits, and not yet recognized for his nobler qualities as the faithful companion of man. He is used chiefly by shepherds or farmers to watch their sheep or their houses and tents, and to warn them by his loud barking of any possible danger (Job xxx. 1; Isa. lvi. 10). He lives in the streets, where he acts as scavenger, feeding on animal flesh unfit for man, and often devouring even human bodies (Ex. xxii. 31; I Kings xiv. 11, xvi. 4, xxi. 23; II Kings ix. 10, 36; Jer. xv. 3). At night he wanders in troops from place to place, filling the air with the noise of his barking (Ps. lix. 7–14; compare Ex. xi. 7), and it is dangerous to seize him by the ear in order to stop him (Prov. xxvi. 17). He is of a fierce disposition (Isa. lvi. 11; A. V. "greedy")

Term of Contempt.

and therefore the type of violent men (Ps. xxii. 17 [A. V. 16], 21 [20]). Treacherous and filthy (Prov. xxvi. 11), his name is used as a term of reproach and self-humiliation in such expressions as: "What is thy servant, which is but a dog" (II Kings viii. 13, R. V.); or "Am I a dog's head?" (II Sam. iii. 8); or "After whom dost thou pursue? after a dead dog?" (I Sam. xxiv. 15 [A. V. 14]; compare II Sam. ix. 8, xvi. 9; Cheyne's emendation in "Encyc. Bibl." *s.v.* "Dog," seems unnecessary).

The dog known to the Hebrews in Biblical times was the so-called pariah dog, the shepherd-dog (Job xxx. 7) being the more ferocious species. The Assyrian hunter's dog was probably unknown. The A. V. translation of זרזיר מתנים ("well girt in the loins") in Prov. xxx. 31 by "greyhound" is incorrect; R. V. (margin) has more correctly "war-horse" (see commentaries *ad loc.*).

The dog being an unclean animal, "the breaking of a dog's neck," mentioned as a sacrificial rite in Isa. lxvi. 3 (compare Ex. xiii. 13), indicates an ancient Canaanite practise (see W. R. Smith, "Rel. of Sem." p. 273). The shamelessness of the dog in regard to sexual life gave rise to the name כלב ("dog") for the class of priests in the service of Astarte who practised sodomy ("kedeshim," called also by the Greeks *κυναίδοι*, Deut. xxiii. 19 [A. V. 18]; compare *ib.* 18 [17] and Rev. xxii. 15; see Driver *ad loc.*), though כלבם as the regular name of priests attached to the temple of Ashtoret at Larnaca has been found on the monuments (see "C. I. S." i., No. 86).

——**In Rabbinical Literature:** Two different dogs are mentioned: the ordinary dog and the small Cyprian (not, as commonly explained, "the farmers' dog," כלב הכופרי). The former species resembles the wolf; the latter the fox; and the crossing of these is forbidden as "kilayim" (mixture of species; Kil. i. 6; compare Aristotle, "Historia Animalium," viii. 27, 8, where the one species of dogs is declared to be a crossing of dogs and wolves, and the other [the Laconian] a crossing of dogs and foxes). While the ordinary dog is counted by R. Meïr among domestic animals ("behemah"), the Cyprian dog is declared to be a wild animal ("ḥayyah"; Yer. Kil. 27a). In the dusk the former is difficult to distinguish from the wolf (Ber. 9b).

As a rule, the dog does not scratch and tear like beasts of prey (Ḥul. 53a), but when driven by hunger he tears and devours young lambs (B. Ḳ. 15b); he bites men, but does not break a bone (Pes. 49b). "With his sharp scent he smells the bread hidden three fists deep in the soil" (Pes. 31b). Shepherd-dogs are fed on bread made of flour and bran (Ḥallah i. 8). Two shepherd-dogs are required to save the flock from the attack of wolves (B. M. vii. 9). While dogs hate one another, they are ready to unite against the attacking wolf (Pes. 113b; Sanh. 105a). The dog depends chiefly on the nourishment furnished him by man, but is as a rule greatly neglected, wherefore God has provided him with the faculty of retaining his food in the stomach for three days (Shab. 154b; Beẓah 21a). At times, however, he eats his excrement (B. Ḳ. 92b). The excrement of dogs is used for tanning (Ber. 25a; Ket. 77a).

The barking of dogs at midnight (Ber. 3a) gives people a feeling of safety, wherefore the rule is given: "Dwell not in a town where no barking of dogs is heard" (Pes. 113a). "A dog in a strange city will not bark, and it takes him seven years to feel at home" ('Er. 61a).

The Keeping of Dogs.

The dog is the most shameless of animals (חצוף בחיות, Ex. R. xlii.); he was one of those who would not abstain from cohabitation in the Ark (Gen. R. xxxvii.). The Mishnah (B. Ḳ. vii. 7) forbids the keeping of dogs unless they are chained; in cities, near the seacoast or the frontier, they may for safety's sake be let loose at night (B. Ḳ. 83a). According to Tosef., B. Ḳ. viii. 17, and B. Ḳ. 80b, the raising of small Cyprian dogs is allowed. These seem to be the little dogs (*κυνάρια*) that "eat of the crumbs which fall from their master's table" (Matt. xv. 26, 27).

In the time of the Amoraim the ordinary dog does not appear to have been regarded as ferocious; for it is said: "One should not raise a bad dog [כלב רע] in the house, this being a transgression of Deut. xxii. 8, 'Thou shalt not bring blood upon thine house'" (B. Ḳ. 16b, 46a; compare Shab. 63a; Yer. B. Ḳ. vii. 6a, with reference to Job vi. 14, Hebr., where למס is interpreted as *λαμὸς* = "dog"; see Krauss, "Lehnwörter," *s.v.*). "A dog before the house withholds kindness from one's neighbor, because no one can enter the house."

A wild dog (כלב אגריון = *ἄγριος*) is mentioned as dangerous to handle (Gen. R. lxxvii.), as is also a young dog ('Er. 86a). A mad dog is so dangerous that he may be killed even on Sabbath (Shab. 121b). Rabies is the effect of an evil spirit or of witchcraft; and its signs are: the dog keeps the mouth open; his saliva is constantly flowing; his ears hang down; his tail lies closely upon his loins; he walks on the sideways of the street, and does not bark (Yoma 83b). The cure for hydrophobia is the eating of a part of the dog's diaphragm (Yoma viii. 6; see Folk-Medicine).

The Faithful Dog.

In the course of time a certain affection for the dog seems to have been developed among the Jews. In Hor. 13a the dog is said to be distinguished from the cat in that he recognizes his master while the latter does not. In the more recent versions of Tobit vi. 1 and xi. 4 (see Grimm's commentary *ad loc.*; but compare Abrahams in "Jew. Quart. Rev." i. 288) the dog follows Tobias on his journey from home and back. According to Rab, in Gen. R. xxii., the sign given by God to Cain (Gen. iv. 15) is to be explained that he was given a dog as companion or guardian. Idle housewives were known to play with dogs (Ket. 61b). "For his friendly conduct at the exodus of the Hebrews when he did not 'move his tongue against man or beast' (Ex. xi. 7), God compensated the dog by telling the people that the meat forbidden to them should be cast unto him" (Mek., Mishpaṭim, 20, on Ex. xxii. 30).

Especially noteworthy is the fact that the story of the faithful dog which Dunlop ("History of Prose Fiction," ch. vii.; see Index, *s.v.* "Gellert") and Benfey ("Panchatantra," 1859, i. 482) have traced through the various literatures of the East and the West, is found for the first time in Yer. Ter. viii. 46a and Pesiḳ. x. 79b as one of R. Meïr's fables used as a haggadic illustration of Prov. xvi. 7. Some shepherds had curdled milk for a meal, when in their absence a serpent ate of it and thus (as was the belief) instilled poison into it. The dog, which had witnessed the act, began to bark when his masters, on their return, proceeded to eat it; but they would not heed his voice of warning. So he hastened to eat it all up and fell down dead, having thus saved his masters' lives. In gratitude, the shepherds reverently buried the faithful dog, and erected a monument to him which is still called "The Dog's Monument" (נפשא דכלבא).

The Jewish belief was that the howling of dogs (כלבים בוכים) betokened the presence of the angel of death, or death itself in the vicinity (compare Wuttke, "Der Deutsche Volksaberglaube," 1869, § 268); their cheerful (sportful) barking (כלבים משחקים), the presence of the prophet Elijah—that is, some joyful event (B. Ḳ. 60b). "If one goes out to select a wife for himself and hears the barking of dogs, he may divine in their voices an omen of good or of evil" (Gen. R. lix.; the reading, however, is doubtful).

Golden Dogs Barking.

The idol Nibhaz (II Kings xvii. 31; "Nibhan," נבחן, according to David Ḳimḥi) was taken to have been the image of a dog (Sanh. 63b). The name of "Pene Melek" (Moloch's Face) was to be changed into "Pene Keleb" (Dog's Face; 'Ab. Zarah 46a). The Egyptian dog or jackal-god, as guardian of the dead, together with the two golden images of dogs (jackals) which were used as symbols of the two hemispheres (Brugsch, "Religion und Mythologie der Alten Aegypter," 1888, p. 670), appears in the Haggadah in the following legendary form:

> "The Egyptians, in order to prevent Joseph's body from being taken from them, had two dogs of gold [or brass] placed on his tomb and endowed by witchcraft with the power of frightening away every intruder by their loud barking. When Moses came to take the bones of Joseph the two dogs began to bark, but he addressed them, saying: 'You are the work of deceit, and you would not move your tongues if you were genuine dogs'" (according to Ex. xi. 7; Pesiḳ. x. 86a; Ex. R. xx.; see Brüll's "Jahrb." i. 150; also p. 151, note, for cabalistic comments upon the passage).

"Dog" is also the synonym in rabbinical literature for shameless and relentless people, and therefore for wicked heathen. The time of general degeneracy is a time when "the generation will have the face of the dog" (Soṭah ix. 15). R. Joshua ben Levi compares the righteous to the guests invited to the king's table, and the wicked heathen to the dogs who obtain the crums that fall therefrom (Midr. Teh. to Ps. iv. 8, based upon Isa. lvi. 10, 11). R. Ishmael b. R. Jose called the Samaritans dogs, as "being as adhesive to idolatrous customs as the dog is to the flesh of carcasses" (Gen. R. lxxxi.). Just as the dog must be beaten by the master, so must the wicked be smitten by God (Ex. R. ix., with reference to Ps. lix. 7; compare Sanh. 109a: "As the dog scents food from afar, so do the wicked scent the bones of the rich for pillage"). The epithet "dog" used for heathen in the New Testament (Matt. xv. 26; Phil. iii. 2) is explained hereby; but the statement of Eisenmenger, "Entdecktes Judenthum," i. 714–716, that the Jews call non-Jews (Christians) "dogs," repeated often and referred to in Meyer's commentaries to Matthew, *l.c.*, as well as the Talmudical quotations in Herzog-Hauck's "Real-Encyc." *s.v.* "Hund," and in Cheyne and Black, "Encyc. Bibl." *s.v.* "Dog" (obviously based on the misunderstood passage in Wünsche, "Neue Beiträge zur Erläuterung der Evangelien," 1878, p. 189), are altogether incorrect. The epithet "keleb" (dog) is given as a nickname to miserly Jews (see Tendlau, "Sprichwörter und Redensarten," 1860, Nos. 270 and 909).

The dog is equally prominent in Jewish folk-lore and in Chaldean magic (see Lenormant, "Magie und Wahrsagekunst der Chaldäer," Jena, 1878, p. 471); being especially connected in mythology with death or the nether world (see the dogs of Hecate in Rhode, "Psyche," 1894, pp. 221, 363, 367, 375; the jackal dog-god Anubis in Egypt in Brugsch, *l.c.*, pp. 252, 670; Zend Avesta, Vendidad, v. 29, in "Sacred Books of the East," iv. 58; compare "Shayast la Shayast," ii. 1, x. 10; Nork, "Etymologisch-Symbolisch-Mythologisches Realwörterbuch," *s.v.* "Hund").

S. S. K.

DOHM, CHRISTIAN WILHELM VON: German historian and political writer; advocate of the Jews, and friend of Moses Mendelssohn; born in Lemgo Dec. 11, 1751; died on his estate near Nordhausen May 29, 1820. Dohm, who was deeply moved by the humanitarian ideals of the era of enlightenment, wrote a work in two volumes on Jewish emancipation in 1781. He did this at the suggestion of Mendelssohn, to whom the Alsatian Jews had appealed for aid, but who thought that such a work would produce a better effect if written by a Christian. Dohm's work dealt not only with French Jews, but with the condition of the Jews in the different stages of their history, and argued for their political equality on grounds of humanity and justice. The work appeared at Berlin under the title "Ueber die Bürgerliche Verbesserung der Juden," and passed rapidly through two editions. Dohm demanded that the Jews be treated as human beings, and declared that his work was no apology for them. Their religious convictions would not prevent their performance of the duties of citizenship. His book aroused wide interest, and he was even accused of standing in Jewish pay. He was fêted by the Jews, and the communities of Berlin, Halberstadt, and Surinam passed votes of thanks. The adverse criticisms of Dohm's work, moreover, drew Mendelssohn into the arena, and he expressed his views on Jewish emancipation in the preface to Marcus Herz's translation of Menasseh ben Israel's "Vindiciæ Judæorum." Mendelssohn criticized some of Dohm's contentions, especially those in which he sought to favor the legislation initiated by Frederick the Great. Dohm also wrote an article in French on the colony of Surinam.

D. A. M. F.

DOKSHITZY: Town in the government of Minsk, Russia. The census of 1897 shows a population of 3,647 (other authorities place it at 5,720), of whom more than 3,000 are Jews; in 1860, according to Semenov, "Slovar Rossiskoi Imperii," there were only 790 Jews. The latter are engaged in commerce and trades. There are 368 artisans. Since 1893 the stocking-making industry has developed in the town. The remuneration of labor, particularly of female labor, is very low. For this reason merchants from Wilna find it profitable to supply Jewish girls with machinery and raw material for the making of stockings. The annual value of the stockings made there and sent to Wilna is 25,000 rubles. The abundance of flax in the district enables about 120 Jews to find employment in cleaning it, and there are about 207 day-laborers.

H. R. S. J.

DOLAN BELLAN: French physician; lived at Carcassonne in the fourteenth century. He was a contemporary of the physician Jacob de Lunel, who removed from Carcassonne to Tarascon, where he practised in 1424. Dolan Bellan is probably identical with Maystre Bellant, a surgeon who, with Bênêdit du Canet of Arles (Maestro Bendig) and Moses Marveaux or Marnan of Marseilles, was summoned to attend King Louis XI. in 1419–20. A Jew called "Bellan" was known in Carpentras in 1357 ("Rev. Et. Juives," xii. 193).

G. S. K.

DOLARO, SELINA: Anglo-American actress and singer; born at London in 1852; died in New York city Jan. 23, 1889. She studied music at the Paris Conservatoire under Auber, and made her début Jan. 20, 1870, as the Spanish princess in "Chilperic" at the Lyceum Theater, London. On account of her good voice she was selected to sing in the première of a production of "Carmen" in English, and subsequently as *Clarette* in "Mme. Angot," *Geneviève de Brabant*, and in an English version of "Les Dragons de Villars." Then she leased the Haymarket Theater, London, and produced Gilbert and Sullivan's "Trial by Jury." In 1877 she went to the United States as a member of Colonel Mapleson's Opera Company; but her voice lacking strength, she severed her connection with the impresario. In 1879 she appeared at the Folly Theater, New York, as the heroine in "The First Night." Four years later Mme. Dolaro appeared as *Olivette* in Planquette's opera of that name at the Bijou Theater. Her voice failing, she forsook opera and joined the company of Mrs. Fiske (then Minnie Maddern), supporting her in Sardou's "Agnes."

Mme. Dolaro wrote two plays, "Justice" and "Fashion"; a novel, "Bella Demoina"; and an autobiography under the rather startling title "Mes Amours."

A. E. Ms.

DOLITZKI, MENAHEM MENDEL: Russian Hebrew poet; born in Byelostok April 3, 1856. He began to compose poetry and prose very early, often supplementing and spicing the quarrels of his schoolmates with lampoons in Biblical Hebrew. In 1880 Dolitzki left Byelostok, and after spending some time in Kiev settled as a teacher in Moscow. In 1892 he went to the United States, and settled in New York.

His first considerable work was the satirical poem "Likkuy Shene ha-Meorot," which appeared in "Ha-Shaḥar" (ix.). It was afterward published separately (Vienna, 1879). His model letter-writer, "Shebeṭ Sofer," was published in Vienna in 1883; and his "Betok Leba'im" (St. Petersburg, 1884), a novel, first appeared serially in "Ha-Meliẓ." Another novel, "Mi-Bayit umi-Ḥuẓ" (Wilna, 1891), describing the persecutions of the Jews in Rumania, is considered a masterpiece (see Perez in "Jüdische Bibliothek," ii. 69, Warsaw, 1892). His other model letter-writer, "Nib Sefatayim" (Wilna, 1892), has been reprinted many times. The first attempt to collect his poetical works was made in America, "Kol Shire Menaḥem" appearing in New York (1895), followed by "Shire Menaḥem" (*ib.* 1899). They contain poems which have appeared in various Hebrew periodicals in America and abroad. In America Dolitzki also essayed works of fiction in Yiddish, and some of his novels, as "Der Gebildeter Merder" (Chicago, 1897), or "Shtarker von Eisen" (New York), attained popularity. He furthermore edited the Yiddish monthly magazine "Die Zeit," which appeared in New York from Dec., 1897, to Sept., 1898. The unfinished poem "Ha-Ḥalom we-Shibro," which appeared in "Ha-'Ibri," 1893, Nos. 8–19, and which describes the sufferings of a Jewish Cantonist, is considered by him to be the best of his poems.

DOMAIN, PUBLIC (רשות הרבים, literally, "of the many"): As distinguished from private domain (ר" היחיד), public domain is prominent in many branches of rabbinic lore, especially in the law of Sabbath observance; for on the Sabbath it is forbidden to carry anything but one's clothing and ornaments from the private into the public domain, or vice versa; or from one man's private domain to that of another; or for a distance of four cubits within the public domain. But the character of the place, whether public or private, may also affect property rights, as is pointed out in the article Accident and Alienation, where it is shown that the "semita" (סימטא), or sidewalk near the houses, which probably, along with its Latin name, came into vogue under the Roman occupation, has a character and effect of its own.

It appears from the whole tenor of the Mishnah (compare Community, Organization of; Cor-

PORATION) that in the cities of Palestine the smaller houses were grouped around an open place; this place, or the whole group of buildings with it, being known as a court (חצר), which had one covered entrance (מבוי). A court having more than one entrance from the street, or even a house with more than one opening, seems to have been exceptional.

Besides the small houses thus grouped around an open court, mention is made of a many-roomed house (בירה, literally "a palace") corresponding to the "insula" of the Romans. Each of such houses had at its front from eight to twelve pillars, the space between which was part of the private domain. Between the pillars was the well for the house, so that water might lawfully be drawn from it and brought into the house on the Sabbath. Minute directions concerning both "courts" and "palaces" are given in the treatise 'Erubin (ch. i., ii.; houses with two openings are referred to in ix. 3), which directions must be followed to raise the desired character of privacy for Sabbatic purposes.

Speaking generally, the highways—that is, streets and public places in the town, and roads in the settled part of the country—are public domain. But the wilderness, or unsettled country, having generally no private owner, is preeminently "domain of the many" beyond any other spot; yet within the wilderness a private domain can be improvised by forming a corral of the wagons and other implements of a caravan (שיירא); this with the space enclosed is treated like a court within a town ('Er. i. 8).

A navigable body of water is public domain; but here the laws, either civil or ritual, are not fully applicable. A ship is for all purposes private domain. Compare SABBATH.

DOMBROVA. See GRODNO.

DOMBROVITZA: Town in the government of Volhynia, Russia. It has a total population of about 25,000, including 6,000 Jews, about 1,000 of whom are artisans. The most general occupations are tailoring and shoemaking, each employing about 195 persons. The manufacturing output of the town is sold at the neighboring fairs. There are about 600 day-laborers, who receive from fifteen to twenty cents a day as wages. Considerable attention is paid to the culture of tobacco, in which 260 Jews are engaged. There are 19 Jewish gardeners, 40 truck-farmers, and 27 dairy-farmers.

H. R. S. J.

DOMEIER, ESTHER. See BERNARD, ESTHER.

DOMICIL: Place of abode; dwelling; the place where a man has his true, fixed, permanent home and principal establishment, and to which, whenever he is absent, he has the intention of returning.

The place in which a man establishes himself with the intention of remaining there permanently, becomes, according to Jewish law, his domicil for all purposes, civil as well as religious. This intention may be either avowed or implied. When the intention is avowed he is immediately considered in all respects a member of the locality in which he has settled, and he is obliged to follow all the laws and customs peculiar to it. If the intention is not avowed it may be implied in different ways, as will be demonstrated.

One who had lived in a place for twelve months, or who had bought a dwelling-house for himself, was compelled to share in the taxes and all other imposts levied on the people of that place (see COMMUNITY, ORGANIZATION OF). If, however, he inherited a house, or a house was given to him in that town, it did not become his domicil, and he was exempt from the obligations placed on the citizens of the town. A residence of twelve months made the place his domicil only when he remained of his own free will. If he was compelled to stay there on account of sickness or the like, it was not considered his domicil (B. B. 7b; Maimonides, "Yad," Shekenim, vi. 5; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 163, 2, Isserles' gloss).

Regarding Membership of Community.

Regarding a man's obligation to contribute to the different charitable organizations of the town, the law varied. One who had lived in a place for thirty days was compelled to contribute to the free kitchen ("tamḥuy"); for three months, also to the general charity; for six months, also to the funds for providing garments for the poor; for nine months, also to the funds for defraying the funeral expenses of the poor; for twelve months, to all the expenses of the community (B. B. 8b; compare "Yad," Mattenot 'Aniyim, ix. 12; Shulḥan 'Aruk, Yoreh De'ah, 266, 5).

Two distinct classes of residents were recognized by the Rabbis: (*a*) the men of the town, comprising all those who had lived there more than twelve months, and (*b*) the inhabitants of the town, or all those who had lived there more than thirty days, but less than twelve months. Hence, one who vowed not to derive any benefit from the "inhabitants" of a certain place, included in his vow all the people that had lived there more than thirty days. But if he said in his vow "the men of the place," he might still derive benefits from all those who had lived there less than twelve months (Yer. Ned. iv. 5; Sanh. 112a; "Yad," Nedarim, ix. 17; Yoreh De'ah, 217, 32). If a man lived for thirty days in a place whose inhabitants turned to idolatry, and he joined in their worship of idols, he was killed by the sword, the punishment for communal apostasy, and not by stoning, the punishment for individual apostasy; the Biblical expression in that connection being (Deut. xiii. 16): "Thou shalt surely smite the *inhabitants* of that city with the edge of the sword" (Sanh. 112a; Maimonides, "Yad," 'Ab. Zarah, iv. 9).

Domicil of Married Women.

A married woman was obliged to make her domicil with her husband; and if she refused to follow him he might divorce her and decline to pay the stipulated sum of her marriage contract ("ketubah"). He could not, however, compel her to change her domicil from a large to a small city, or vice versa, or from a costly to a cheap house, or vice versa. If he wished to go to Palestine, she had to follow him under all circumstances, unless she pleaded the danger of travel on certain roads (Ket. 110a; "Yad," Ishut, xiii. 17; Shulḥan 'Aruk, Eben ha-'Ezer, 75).

The privacy of one's domicil could not be violated. Neither the creditor nor the court-messenger could enter one's house to take a pledge for a debt of money (Deut. xxiv. 10). If it was a debt of wages or of hire of any kind, the creditor might enter the debtor's house to take a pledge (B. M. 115a; compare Sifre, Deut. *ad loc.*). In all cases the house of the surety might be entered for the purpose of taking a pledge (B. M. 113a; "Yad," Malweh, iii. 4, 7; Ḥoshen Mishpaṭ, 97, 6, 14).

On the Sabbath one might walk two thousand cubits on all sides from the place of his residence. By a legal fiction, the Rabbis decided that if before the Sabbath a man placed food for two meals in some safe place, such place became his domicil for that day, and he might walk two thousand cubits from that point on all four sides ("'Erube Teḥumim"; "Yad," Shabbat, xxvii.; Shulḥan 'Aruk, Oraḥ Ḥayyim, 408 *et seq.*).

L. G. J. H. G.

DOMINICANS. See FRIARS.

DOMINICO IROSOLIMITANO or **HIEROSOLYMITANO** (דומיניקו ירושלמי): Talmudist, physician, author, and expurgator of Hebrew books; born in Safed, Palestine, about 1550; died in Italy about 1620. He was educated at the rabbinical college in his native city, studying not only Talmud, but also medicine. After having been granted the degree of doctor and the title of "Rab," he lectured on Talmudic law in Safed. His fame as a physician spread far and wide, and finally reached the ears of the Sultan of Turkey, who summoned him to Constantinople as court physician.

Yerushalmi subsequently became a convert to Christianity; he went to Rome, and was received at the College of the Neophytes, where he taught Hebrew. During the most active period of the expurgation of Hebrew books under the Inquisition in Italy Dominico's services were in great demand; and first in Venice (1578-92 ?), later as chief reviser of the censorship commission in Mantua (1595-97), he had opportunity for placing his signature in more books and manuscripts than any other of the Italian expurgators. His activity in this direction continued at intervals—in places, however, not yet identified—almost until his death.

Dominico's works included, according to his own statement, "Ma'ayan Gannim" (Fountain of the Gardens), on the fundamental principles of the Christian faith. He also translated into Hebrew the whole of the New Testament, and most of the Apocryphal books (1615-17). He was the compiler of the "Sefer ha-Zikkuk" (Book of Expurgation), still in manuscript, one copy of which (in the library of Cardinal Berberini, Rome) shows revision by him as late as 1619.

Bartolocci dates Dominico's conversion at the beginning of the seventeenth century, at about his fiftieth year. But even if it be assumed that the dates of his earliest censorship have been misread, it is certain that he acted as censor before 1595. Furthermore, Bartolocci and Wolf state that Nicolaus Mursius in his "Relatione della Città di Constantinopoli" (Bologna, 1671) mentions as court physician of the Turkish sultan a Jew who later became converted under the name of "Dominico Ierosolymitano." Wolf holds that he is identical with the subject of this article; Bartolocci, on the other hand, states that Mursius speaks of one whom he (Mursius) had himself seen in his travels, and who was still living as a Christian in Constantinople in direst poverty, though as a Jew he had held, under the name of Pelaso, third place among the sultan's physicians.

DOMITIAN (Titus Flavius Domitianus): Roman emperor 81-96; born in 51; assassinated in 96. In 69, when his father Vespasian was proclaimed emperor, Domitian was the center of the Flavian party in Rome. Succeeding his brother Titus in the government, he provoked the vigorous resistance of the aristocracy by his despotic measures, which aimed at the complete supersession of the powers of the Senate. His mistrust and financial embarrassment drove him, after a short period of moderation and good administration, to sanguinary measures. He maintained the pagan faith against the various dissenting sects; and twice (89 and 95) expelled the philosophers from Rome. He dealt most severely with converts to either Judaism or Christianity, the penalty being either death or confiscation of property. Even his cousin, the consul Flavius Clemens, was put to death for embracing the Jewish faith; while the latter's wife Domitilla was exiled to the isle of Pandataria (95). The severe measures projected at this time against the Jews, which occasioned the journey to Rome of R. Gamaliel and his colleagues, were frustrated probably by Domitian's assassination. During his reign the Jew-tax was collected in a most cruel manner. Characteristic of his distrust of Judaism and Christianity is the fact that he summoned the descendants of David to appear before him, and released them only after he had satisfied himself of their harmlessness.

DOMITILLA, FLAVIA. See FLAVIA DOMITILLA.

DOMNINUS or **DOMNUS:** Jewish philosopher; lived between 400 and 480. He was a native of Laodicea, or Larissa, in Syria; the pupil of Syrian, whom he perhaps succeeded as teacher of the Neoplatonic school at Athens. He was a contemporary of the philosopher Proclus, whose pupil Marinus often mentions Domninus. His own pupil Gesius, who supplanted him in his old age, is identical with the Jasius whom Arabian writers mention. The sources speak of him as a Jew, and Suidas relates that when Domninus was afflicted at Athens with "blood-spitting," he did not hesitate to eat pork, while his companion Plutarchus, a pagan, who also was ill, refrained from that remedy. Suidas therefore does not consider Domninus as a true philosopher; he is credited with being a fine mathematician, but superficial in other branches of philosophy. A follower of Plato, and therefore attacked by Proclus, he defended himself in a work entitled *Καθαρτικὴ τῶν Δογμάτων Πλάτωνος* ("A Purge of Plato's Theories").

Not one of his works is extant. Like other Neoplatonists, Domninus practised theurgy. He died at an advanced age, probably at Athens.

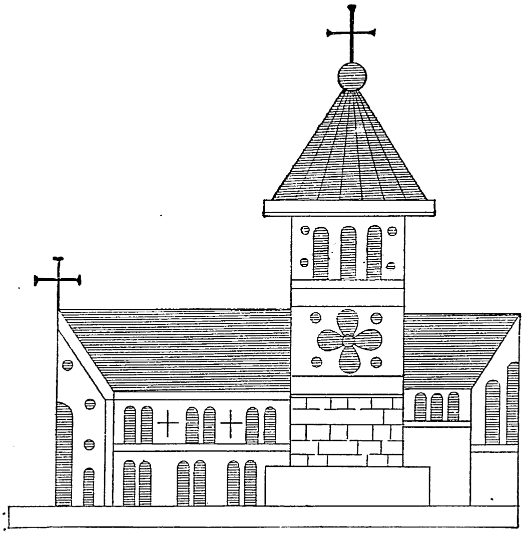
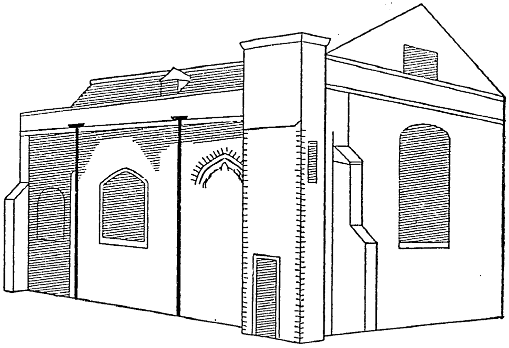
DOMUS CONVERSORUM: House in London founded by order of Henry III. in the year 1232 to provide a home and free maintenance for Jews converted to Christianity. As, up to 1280, on conversion all their property was escheated to the king, they were left destitute. The buildings and the chapel attached to them were erected in Chancery Lane, London, on the site now occupied by the rolls office. The hope was entertained that by the establishment of this refuge there would result a conversion en masse of the English Jews. The conception of the scheme for the Domus originated with the clergy, a similar institution on a much more modest scale having been commenced by the clergy of Southwark in 1213. A chaplain was appointed to instruct the converts, and a warden ("custos"; in Norman French, "le gardien") to attend to their temporal affairs. Each male inmate received 1½*d.*, equal to about 2*s.* 6*d.* of the present currency, and each female 1*d.* During the fifty-eight years that elapsed from the time of the founding of the Domus until the year of the great expulsion (1290), about a hundred Jews in all participated in the benefits of the institution—a small proportion of weaklings out of the 16,000 Jews in England. All the expenses of the Domus were borne by the royal treasury, while some of the bishops left bequests to augment its funds. In addition to these sources of income a poll-tax, called the "chevage," was levied upon all Jews above the age of twelve in support of their converted brethren. The treasury grant amounted annually to £202.0.4 (in present currency about £4,000). At times this contribution was not forthcoming; and the "conversi" were reduced to sore straits of poverty. In 1271 the king addressed a letter to the mayor of London and to the warden of the Domus, complaining of numerous irregularities in the management of the house; and it was not until the year 1280, under the custos John de St. Denys, that definite regulations for the control of the institution were drafted. In 1281 a rabbi of Oxford, Belager by name, entered the home. Nine years later, when the expulsion of the English Jews took place, the number of converts stood at eighty.



Domus Conversorum, London.
(After a drawing by Matthew Paris.)



Rolls Chapel, Chancery Lane, London, Formerly Part of the Domus Conversorum.

After the Expulsion.

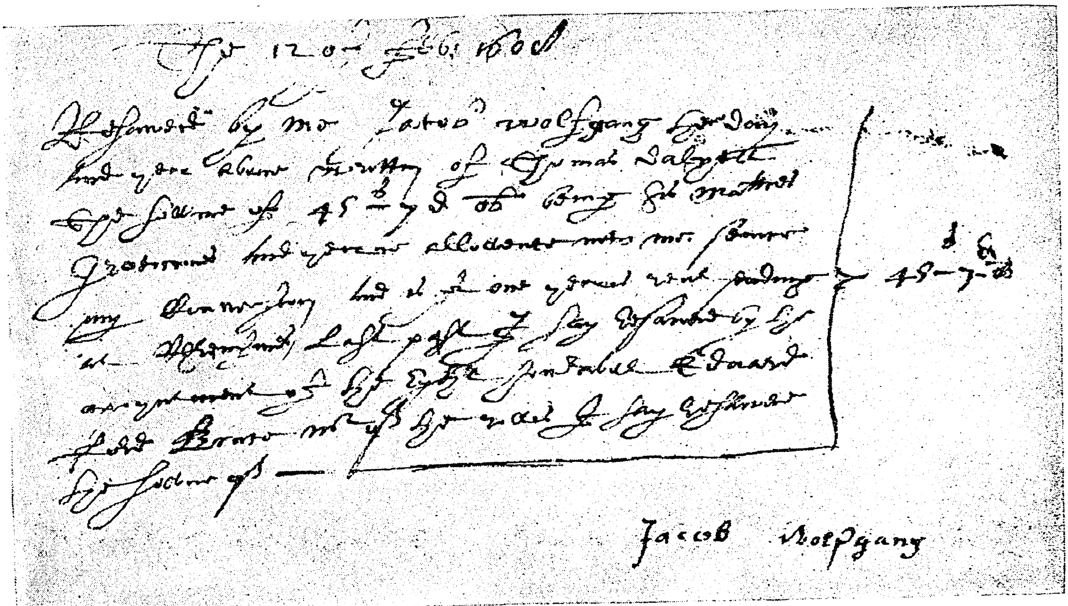
The value of the history of the Domus after the year 1290 consists in the testimony that its records afford of the steady stream of Jews into England in spite of the edict of expulsion. A few of these persons allowed themselves to be baptized, and accepted the shelter of the Domus. These people came from France, Spain, Portugal, Germany, and the Barbary states.

In 1305 there were twenty-three men and twenty-eight women, whose baptismal names are all known, residing in the Domus. From 1331 there exists a series of manuscripts in the rolls office giving valuable information upon the important subject of the presence of Jews in England from the reign of Edward I. to that of James I. These documents range themselves under three heads: (1) orders for the admission of a convert, frequently supplying personal details; (2) the statement of annual expenses of the warden, who from about the year 1330 also held the post of master of the rolls (in these returns the names of the converts are inserted); (3) a large number of receipts, some signed in Hebrew, given once a year by the converts.

In 1330 there still remained eight men and thirteen women from the pre-expulsion period. By the year 1353 the Domus possessed only one convert, a woman named Claricia of Exeter, who had been admitted several years before the expulsion. She died in 1356; and a month after her death a Spanish Jew, John of Castile, found his way to England and the Domus. From the year 1330 until 1393 eighteen men and two women were admitted. Two of these, Aseti Briarti and Perota Briarti, of France, were husband and wife; while Thomas Levyn (Levi), of Spain, ran away suddenly after a stay of thirty-two days. In 1399 a woman named Elizabeth, described as the daughter of Rabbi Moses, "episcopus Judæorum," joined the converts. She remained for seventeen years, and married a London tailor named David Pole. In 1409 two women, a mother and her daughter, who had apparently been living in Dartmouth for some time, were admitted into the Domus. There is no indication in the records of how they came to be in Dartmouth or of their native country. The mother, Johanna, died after a stay of forty years, and the daughter, Alice, after forty-five years. The longest period of residence was that of Martin, son of Henry of Woodstock (1413–68); while other converts who lived in the Domus for many years were John de Sancta Maria of Spain (1371–1405), Henry of Stratford (1416–41), John Durdragt of Dordrecht, Holland (1425–55), John Seyt (1448–88), Edward of Westminster (1461–1503), and John Fernando of Spain (1487–1503). In the year 1400 there were two inmates; by 1450 this number had grown to five; and in 1500 there were four converts. The expulsions from Spain and Portugal appear to have had little effect in increasing the number of residents of the Domus. A woman called Elizabeth Portingale (of Portugal) is mentioned in the records from the year 1492 to 1538, Edward Scales from 1503 to 1527, and Elizabeth Baptista from 1504 to 1532. In the latter year two women were admitted, and were given the names "Katherine Wheteley" and "Mary Cook." In 1506 Thomas Cromwell, the vicar-general of Henry VIII., who had been appointed master of the rolls and warden of the Domus Conversorum, lived in the home.

Names of Converts.

After 1551, in which year Mary Cook died, the Domus remained empty until 1578, when an interesting convert, Nathaniel Menda (formerly called Jehooda Menda), was admitted. He remained till 1608. This man had come from the Barbary states and had been publicly baptized in London by John Foxe, the author of the "Book of Martyrs." The receipts given by Menda for his annual pension are, with one exception, all signed in Hebrew characters.



Jacob Wolfgang

Receipt for 45s. 7½d. Paid by the Domus Conversorum of London to Jacob Wolfgang (1608).

In 1581 Fortunati Massa (originally "Cooba," *i.e.*, Jacob, Massa) joined Menda until 1598. The presence of these two quondam Jews in the Chancery Lane home is coincident with the production of Marlowe's "Jew of Malta" and Shakespeare's "Merchant of Venice."

In 1598 Philip Ferdinandus, a learned Polish Jew, became a recipient of the benefits of the Domus. This man had been professor of Hebrew at Oxford and Cambridge, and later on at Leyden University. He died in the Domus in 1600; and three years later there entered Elizabeth Ferdinando, perhaps the widow of Philip. In the year of the Gunpowder Plot, Arthur Antoe was admitted, and in the following year, Jacob Wolfgang, a German.

Philip Ferdinandus.

The records end at the year 1608; and summing up the results of these investigations it is found that from the year 1331 to 1608 thirty-eight men and ten women entered the Domus Conversorum, while mention is made in the records of the period of four other converts of whom nothing is said in the archives of the Domus.

As late as the year 1717 a London converted Jew petitioned King George I. for a grant from the funds of the Domus. The buildings once occupied by the converts were later used as storehouses for the rolls of Chancery, and have since been demolished. It is a curious fact that in the year 1873 Sir George Jessel, a professing Jew, was appointed to the post of master of the rolls, which formerly was combined with the office of warden of the home for converted Jews. The last trace of the Domus was legally swept away by an act of the year 1891.

DONATH, EDUARD: Austrian chemist; born in Wsetin, Moravia, Dec. 8, 1848. He became assistant in Zinřek's chemical institute in Berlin, 1869; assistant at the technical high school in Brünn, 1870; assistant agricultural chemist at the experiment station in Vienna, 1874; and associate at the Bergakademie in Leoben, 1875. At present he is professor at the technical high school in Brünn. He embraced the Christian faith in 1876.

Besides papers in various chemical journals, he has published: "Monographie der Alkohol-Gährung als Einleitung in das Studium der Gärungstechnik," Brünn, 1874; "Die Prüfung der Schmiermaterialien," Leoben, 1879; (with K. Pollak) "Neuerungen in der Chemie des Kohlenstoffes und Seiner Anorganischen Verbindungen," in "Sammlung Chemischer und Chemisch-Technischer Vorträge," Stuttgart, 1898; (with B. M. Margoscher) "Das Wollfett, Seine Gewinnung, Zusammensetzung," etc., *ib.* 1901.

DONATH, LEOPOLD: Rabbi; born 1845 at Waag-Neustadtl, Hungary; died 1876 at Güstrow, Mecklenburg; pupil of Israel Hildesheimer. After studying at Berlin University, he took his degree at Rostock, and became rabbi and preacher at Güstrow, Mecklenburg. He wrote, in addition to various articles in Berliner's "Magazin für Jüdische Geschichte und Litteratur," the following: "Die Alexandersage in Talmud und Midrasch," Fulda, 1873; "Geschichte der Juden in Mecklenburg von den Aeltesten Zeiten bis zur Gegenwart," Leipsic, 1874; "Aus der Zeit auf der Kanzel," five short sermons, Fulda (no date).

S. A. BLA.

DONATI, CESARE: Italian novelist; born at Lugo, Romagna, Sept. 21, 1826. Persecuted by the Austrian government for having taken part in the revolution of 1848, he left his home in Finale in 1849 and went with his family to Toscana. He completed the study of law at Pisa (1852), but on account of his father's death studied journalism in order to support his widowed mother and his brothers and sisters. In 1859 he was received into the Ministry of Education, was afterward made director of museums and art galleries in Florence, and finally became chief of the department. He was also created a knight of the Cross of Merit of Savoy. Besides contributing to the "Spettatore," "Indicatore Letterario," "Nuova Antologia," and "L'Eco d' Europea," Donati wrote a collection of novels, "Foglie Secche," 2d ed., Florence, 1884; "Rivoluzione in Miniatura," his best work (1876); "Bozzetti Romani," Rome, 1884; "Storie Bizzarre," 1888. Donati now (1903) lives at Rome.

S. I. E.

DONATI, MARCO: Italian lawyer; born in Padua Sept. 4, 1842; died at Terni June 11, 1901. Before he had completed his academic career he left the university in order to fight under Garibaldi. He served in the war with distinction, and on his return completed his law studies, and then opened an office at Padua, where he soon became one of the most popular lawyers. For many years he sat in the Italian Chamber, representing first Belluno and then Conegliano. For some years he was president of the Jewish community of Padua. He was created commander of the Order of the Crown of Italy.

Donati published a small volume on the art of advocacy and a memorial oration on King Humbert I.

DONATO D'ORVIETO. See NATHAN JEDIDIAH BEN ELIEZER.

DONIN, NICHOLAS, OF LA ROCHELLE: Jewish convert to Christianity; lived at Paris in the first half of the thirteenth century. Having expressed his doubts as to the value of the oral tradition, he was in 1225 excommunicated by R. Jehiel of Paris in the presence of the whole congregation and with the usual ceremonies. Having for ten years lived in the state of excommunication, though still clinging to Judaism, he became dissatisfied at last with his position, and embraced Christianity, probably under the influence of Christian propagandists, who saw the benefit they could derive from such a recruit, embittered as he was against his coreligionists. Donin joined the Franciscan order. His first act of retaliation was to stir up the Crusaders to the bloody persecutions in Brittany, Poitou, and Anjou, in which 3,000 Jews were killed, 500 accepting the alternative of baptism. In 1238 Donin went to Rome, presented himself before Pope Gregory IX., and denounced the Talmud. Thirty-five articles were drawn up, in which Donin stated his charges.

The pope was easily convinced of the truth of the accusation, and despatched to the authorities of the Church transcripts of the charges formulated by Donin, accompanied by an order to seize all copies of the Talmud and deposit them with the Dominicans and Franciscans. If an examination substantiated the charges of Donin, the books were to be burned. This order was generally disregarded, except in France, where the Jews were compelled under pain of death to surrender their Talmuds

(March, 1240). Louis IX. ordered four of the most distinguished rabbis of France—Jehiel of Paris, Moses of Coucy, David of Melun, and Samuel ben Solomon of Château-Thierry—to answer Donin in a public disputation. In vain did the rabbis disprove the charges of blasphemy and immorality which were the main points of Donin's arraignment. The commission condemned the Talmud to be burned.

K. I. BR.

DÖNMEH: A sect of crypto-Jews, descendants of the followers of Shabbethai Ẓebi, living to-day mostly in Salonica, European Turkey: the name (Turkish) signifies "apostates." The members call themselves "Ma'aminim" (Believers), "Ḥaberim" (Associates), or "Ba'ale Milḥamah" (Warriors); but at Adrianople they are known as "Sazanicos" (Little Carps)—a name derived either from the fish-market, near which their first mosque is supposed to have been situated, or because of a prophecy of Shabbethai that the Jews would be delivered under the zodiacal sign of the fish. The Dönmeh are said to have originated with Jacob Ẓebi Querido, who was believed to have been a reincarnation of Shabbethai.

The community is outwardly Mohammedan (following the example set by Shabbethai); but in secret observes certain Jewish rites, though in no way making common cause with the Jews, whom they call "koferim" (infidels). The Dönmeh are evidently descendants of Spanish exiles. Their prayers, as published by Danon, are partly in Hebrew (which few seem to understand) and partly in Ladino. They live in sets of houses which are contiguous, or which are secretly connected; and for each block of houses there is a secret meeting-place or "kal" ("ḳahal"), where the "payyeṭan" reads the prayers. Their houses are lit by green-shaded lamps to render them less conspicuous. The women wear the "yashmak" (veil); the men have two sets of names: a religious one, which they keep secret, and a secular one for purposes of commercial intercourse. They are assiduous in visiting the mosque and in fasting during Ramadhan, and at intervals they even send one of their number on the "ḥajj" (pilgrimage) to Mecca. But they do not intermarry with the Turks.

They are all well-to-do, and are prompt to help any unfortunate brother. They smoke openly on the Sabbath day, on which day they serve the other Jews, lighting their fires and cooking their food. They work for the Turks when a religious observance prevents other Jews from doing so, and for the Christians on Sunday. They are expert "katibs" or writers, and are employed as such in the bazaars and in the inferior government positions. They have the monopoly of the barber-shops. The Dönmeh are divided into three subsects, which, according to Bendt, are: the Ismirlis, or direct followers of Shabbethai Ẓebi of Smyrna, numbering 2,500; the Ya'ḳubis, or followers of Jacob Querido, brother-in-law of Shabbethai, who number 4,000; and the Kuniosos, or followers of Othman Baba, who lived in the middle of the eighteenth century. The last-named sect numbers 3,500. Each subsect has its own cemetery. Bendt says that the first shave the chin; the second, the head; but the third allow the hair to grow upon both. Danon calls the first "Tarpushlis," those who wear a special form of turban; the second, "Cavalieros," who wear a peculiar pointed shoe; the third, "Honiosos" or "Camus," who can be distinguished by their flat noses.

The ordinances which govern the Dönmeh, as given by Grätz and Bendt, number sixteen; but as Danon has published them in Ladino, they number eighteen (אינקומי נדאנסאס סדרים). These refer to the unity of God, to Shabbethai His Messiah, to abstention from murder, to the reunion on the Sixteenth of Kislew to study the mysteries of the Messiah; they forbid fornication, false testimony, forced conversion, intermarriage with Mohammedans, and covetousness; and enjoin charity, daily reading of the Psalms in secret, observance of the new moon, Mohammedan usages, and circumcision. Danon also gives a list of their twelve festivals, the most sacred of which are the Ninth of Ab, the birthday of Shabbethai; and the Sixteenth of Kislew. The latter is preceded by a fast-day. During their festivals they transact their business as usual. It is only in the evening that, with lighted candles and closed doors, they rejoice. The Dönmeh communities are administered by rabbis appointed by the ab bet din. These rabbis are well versed in Holy Scripture, they know almost by heart the Zohar, and understand Judæo-Spanish, which they regard as a holy language. Children are left in ignorance of their true religion, and are not initiated therein, among the Ismirlis and the Kuniosos, till the age of thirteen, and among the Ya'ḳubis at marriage. Neither the Ismirlis nor the Ya'ḳubis believe in the death of their respective saints, and they are always awaiting their return. Every Saturday the Ya'ḳubis send a woman and her children to the seashore to inquire whether the ship which is to bring Jacob is sighted; and every morning the elders scrutinize the horizon for a similar purpose.

K. G.

DONNOLO (*Δομνουλος*, diminutive of "Dominus"), or **Shabbethai b. Abraham b. Joel:** Italian physician, and writer on medicine and astrology; born at Oria, in 913; died after 982. When twelve years of age he was made prisoner by the Arabs under the leadership of the Fatimite Abu Aḥmad Ja'far ibn 'Ubaid; but was ransomed by his relatives at Otranto, while the rest of his family was carried to Palermo and North Africa. He turned to medicine and astrology for a livelihood, studying the sciences of "the Greeks, Arabs, Babylonians, and Indians." As no Jews busied themselves with these subjects, he traveled in Italy in search of learned non-Jews. His especial teacher was an Arab from Bagdad. According to the biography of Nilus, abbot of Rossano, he practised medicine for some time in that city. The alleged gravestone of Donnolo, found by Firkovich in the Crimea, is evidently spurious.

Donnolo is the earliest Jewish writer on medicine, and one of the few Jewish scholars of South Italy at this early time. What remains of his medical work, "Sefer ha-Yaḳar" (Precious Book), was published by Steinschneider in 1867, from MS. 37, Plut. 88, in the Mediceean Library at Florence, and contains an "antidotarium," or book of practical directions for preparing medicinal roots. Donnolo's medical science is based upon Greco-Latin sources; only one Arabic plant-name occurs. He cites Asaph. In addition, he wrote a commentary to the "Sefer Yeẓirah," dealing almost wholly with astrology, and called "Ḥakemani" (in one manuscript, "Taḥkemoni"; see II Sam. xxiii. 8; I Chron. xi. 11). At the end of the preface is a table giving the position of the heavenly bodies in Elul, 946. The treatise published by Neubauer ("Rev. Et. Juives," xxii. 214) is part of a religio-astrological commentary on Gen. i. 26 (written in 982), which probably formed a sort of introduction to the "Ḥakemani," in which the idea that man is a microcosm is worked out. Parts of this introduction are found word for word in the anonymous "Orḥot Ẓaddiḳim" (or "Sefer Middot") and the "Shebeṭ Musar" of Elijah Kohen. It was published separately by Jellinek ("Der Mensch als Ebenbild Gottes," Leipsic, 1845). The style of Donnolo is worthy of note; many Hebrew forms and words are here found for the first time. He uses the acrostic freely, giving his own name not only in the poetic mosaic of passages from the Book of Proverbs in the Bodleian fragment, but also in the rimed prose introduction to the "Ḥakemani." He is also the first to cite the Midrash Tillim. In the Pseudo-Saadia commentary to "Yeẓirah" there are many citations from Donnolo, notably from a lost commentary of his on the Baraita of Samuel. A. Epstein has shown that extensive extracts from Donnolo are also to be found in Eleazar Roḳeaḥ's "Yeẓirah" commentary (ed. Przemysl, 1889), even to the extent of the tables and illustrations. He is also mentioned by Rashi (to 'Er. 56a), by Samuel of Accho (who calls the "Ḥakemani" the "Sefer ha-Mazzalot"), and by Solomon b. Judah (1424) in his "Ḥesheḳ Shelomoh" to Ha-Levi's "Cuzari."

Bibliography: Preface to *Hakemani*, published by Geiger, in *Melo Chofnajim*, p. 29 (p. 95 of German text), the whole by D. Castelli; *Il Commenti di Sabb. Donnolo sul Libro della Creazione*, Florence, 1880 (reprinted in *Sefer Yeẓirah*, pp. 121-148, Warsaw, 1884). Text of medical fragments, edited by Steinschneider—*Donnolo, Fragment des Aeltesten Med. Werkes*, etc., 1867; translation in idem, *Donnolo* (Berlin, 1868; from *Archiv für Pathologische Anatomie*, vols. xxxviii.-xlii.). G.

DOOR AND DOOR-POST (דלת): Doors were suspended and moved by means of pivots of wood ("potot") which projected from the ends of the two folds above and below. The pivots were inserted in sockets ("ẓirim," Prov. xxvi. 14). Doors were fastened by a lock (מנעול, Cant. v. 5; Neh. iii. 3) or by a bar (בריח, Judges xvi. 3; Job xxxviii. 10), and were opened by a key, called "mafteaḥ" (Judges iii. 25), generally of wood. The rich and powerful probably used keys of metal, which may sometimes have been adorned with an ivory handle. Such a key may have been the one assigned to the steward of the royal palace as a mark of his office, and which he carried on his shoulder (Isa. xxii. 22).

The expression "door-post" occurs twice in the Old Testament, rendering two different terms; viz., "saf" (Ezek. xli. 16), "sill," or, as translated in Judges xix. 27, "threshold," and "mashḳof" (Ex. xii. 7), also rendered (Ex. xii. 22, 23) as "lintel." In Ex. xii. 7, 22 the Israelites were commanded to sprinkle the blood of the Passover lamb on the lintel and side-posts of their houses; and in Deut. vi. 9 Moses enjoined the Israelites to write the divine commands "upon the posts ["mezuzot"] of thy house."

E. G. H. B. P.

These injunctions prove that among the Hebrews, as among many other peoples, the door-posts were an important feature in the religious and superstitious rites, the purpose of which was to protect the house and its inmates against evil spirits and notably against the evil eye. The Deuteronomic law clearly presupposes the practise, and intends the replacing of obnoxious idolatrous inscriptions by the words here given. In modern Mohammedan countries it is still the custom to write over or on the door quotations from the Koran (Lane, "Modern Egyptians," 5th ed., 1871, i. 7, 319, quoted by Driver, "Deuteronomy," p. 93). A similar device to secure "a good abode" is reported of the ancient Egyptians (Wilkinson-Birch, "Ancient Egyptians," 2d ed., 1878, p. 361, in Driver, *l.c.*).

The nailing over the door of a horseshoe, or the hanging of a sprig with appropriate inscriptions, has been generally in vogue among the Teutonic races, and survived even after the introduction of Christianity. Of the Sephardic Jews in Palestine and Africa it is reported that they paint on their door in red a hand with five outspread fingers to secure immunity from the evil eye (Luncz, "Jerusalem," i. p. 19 of Hebrew part, Vienna, 1882). For the rabbinical interpretation of the Deuteronomic law see Mezuzah.

E. G. H.

DORBOLO or **DURBAL** (דורבל, דורבאלי, דורבאלו), **ISAAC BEN**: Rabbi about 1150; he traveled much, and knew Poland, Russia, Bohemia, France, and Germany from his own observations. Some time after 1140 he visited R. Tam in Rameru. In Worms, where he remained for some time, he reports having seen a responsum from the rabbis of Palestine in answer to a question addressed to them in 960 (at the time of Otto I.) by the Rhenish rabbis concerning the reported appearance of the Messiah. Though this responsum is mentioned in different sources—the Bern MS. of the small 'Aruk ("Grätz Jubelschrift," p. 31) and Liwa Kirchheim's "Minhage Worms" ("Kaufmann Gedenkbuch," p. 297)—its historical character has been questioned (Brüll's "Jahrbuch," ii. 77; "Jubelschrift," *l.c.*; but see Rev. Et. Juives, xliv. 237). Several additions to the Maḥzor Vitry are in the name of Isaac Dorbolo; he is not the compiler of the Maḥzor, as C. Taylor supposes. They are indicated either by the author's full name or by a simple ת (= Tosefet). According to Zunz ("G.

S." ii. 32), Isaac's father is identical with the correspondent of Rashi and the martyr of the First Crusade of the same name; but this is chronologically impossible. Rapoport wrongly connected Isaac with R. Isaac of Ourville, author of the lost "Sefer ha-Menahel"; and Schiller-Szinessy, with Isaac of Russia.

Isaac is also mentioned in the "Sefer Asufot" (Berliner's "Magazin," x. 75), in "Shibbole ha-Leket," and in "Kol Bo" ("Monatsschrift," xli. 307).

Hurwitz, p. 36; Berliner, *ib.*, pp. 176, 177; Epstein, in *Monatsschrift*, xli. 307; C. Taylor, *Appendix to the Sayings of the Jewish Fathers*, pp. 12 *et seq.*, Cambridge, 1900.

I. E.—G.

DORIS: First wife of Herod, whom he married about 45 B.C. The names of her parents are not mentioned, probably because they belonged to the masses, for Josephus says expressly ("Ant." xiv. 12, § 1) that Doris came from the people (*δημότις*) and that she was a Jewess (*ἐκ τοῦ ἔθνους*), this statement contradicting "B. J." i. 12, § 3, where it is said that she was not of mean origin (*οὐκ ἄσημος*); she was a native of Jerusalem ("B. J." i. 22, § 1). After Herod came to the throne in 37 B.C., he put Doris, by whom he had his eldest son Antipater, away, and married the princess Mariamne (*ib.*). But he preferred Antipater, and recalled Doris in order to humiliate Mariamne's sons ("Ant." xvi. 3, § 3; "B. J." i. 23, §§ 1, 2). Doris, as Antipater's mother, was now much honored at court ("B. J." i. 24, § 2), but she was the first to feel the king's wrath. Herod being aroused by a conspiracy, she was deprived of all her jewels, worth several talents, and was again put away (*ib.* i. 30, § 4); however, she still found means to warn her son against his father's anger (*ib.* i. 32, § 1). Her subsequent fate is unknown.

Bibliography: Grätz, *Gesch.* 4th ed., iii. 195; Schürer, *Gesch.* 3d ed., i. 407.

G. S. Kr.

DORMIDO, DAVID ABRAVANEL (also known as **Manuel Martinez Dormido**): Warden of the Jewish communities at Amsterdam and London in the seventeenth century; born in one of the principal cities of Andalusia (Spain), where he held the offices of alderman and life-treasurer of the customs and of the royal revenues. He was, however, imprisoned for five years (1627–32) by the Inquisition, and tortured, together with his wife and sister. On his release he went to Bordeaux, and after staying there eight years went to Amsterdam (1640), where he engaged in Brazilian trade. The conquest of Pernambuco by the Portuguese in 1654 ruined him. At this time the question of the readmission of the Jews to England came up, and Dormido was entrusted with the negotiations by Manasseh ben Israel. He went to London; and on Nov. 3, 1654, presented a petition to Cromwell, which the latter recommended to the Council. Cromwell also interceded with the King of Portugal for the restitution of Dormido's fortune. In 1663 Dormido settled in London, where he became president of the first synagogue. His son Solomon was allowed to become a broker of the city of London in 1657, without taking the usual Christological oath.

G. S. Kr.

DORTMUND (Latin, **Tremonia**; Hebrew, טירמוניא): Capital of the circle of the same name, in the district of Arnsberg and the Prussian province of Westphalia, situated on the Emster. That there were Jews in Dortmund in the middle of the twelfth century is shown by the fact that several Jews living at Cologne at that time were designated as natives of Dortmund (compare Höninger, "Das Judenschreinbuch der Laurenzpfarre zu Köln," p. 9). A letter of protection was granted to the Jews of the city in 1250 by Archbishop Conrad of Cologne, Dortmund having been pledged to him in 1248 by King William of Holland. For this they were to pay 25 marks in Cologne pfennigs. They had also to pay to the king a tax of 84 marks sterling every eighteen months. About 1250 the municipality issued regulations concerning the form and ceremonial to be observed in administering an oath to Jews (see Oath).

The jurisdiction of the Archbishop of Cologne over the Dortmund Jews was confirmed by Albrecht I. in 1298. A year later, in consequence of extortions on the part of the followers of the Margrave of Mark, many Jews left the city. Albrecht rebuked the municipal authorities for having allowed these extortions, and ordered them to recall the Jews and give them adequate protection.

Like many other German communities, that of Dortmund was wiped out in 1349, at the time of the Black Death. But in 1372 Engelbert of Mark allowed the municipality to admit Jews. But every Jew who wished to settle at Dortmund had to conclude an agreement with the municipality, fixing the amount of his taxes. In 1596 the municipality decreed the banishment of the Jews. It is uncertain whether this decree was carried out; and if so, for how long a time. Jews lived at Dortmund at the beginning of the eighteenth century, as is shown by an edict of the municipality dated 1705, forbidding the Jews to trade in horses.

During the eighteenth century the municipality of Dortmund was remorselessly severe in enforcing the poll-tax; and on festivals and Sundays the city was closed to Jews.

During the first fifteen years of the nineteenth century the Dortmund Jews enjoyed the rights of French citizens. From 1815 the history of the community of Dortmund differs in no essential particular from that of other German communities. The Dortmund Jews in 1898 numbered 998 in a total population of 66,544; in 1901, 1,950 in a total of 142,418.

G. I. BR.

DOSA (or **DOSAI**; an abbreviated form of "Dosithai" or "Dositheos," Δοσίθεος): Father of the tannaite ḤANINA B. DOSA, famous for his piety.

S. S. W. B.

DOSA (also known as **Dosai**): Palestinian amora, probably of the fourth century. The Jerusalem Talmud has preserved two of his halakic decisions, and Midrashic literature several of his haggadic utterances. Among the latter is the assertion that the dangerous "snare" from which God will protect man (Prov. iii. 26) is the function of judging in matters of religious law. Dosa died on the new moon of Nisan. This date was especially recorded, because on that occasion refreshments were offered to the mourners (Yer. Mek., end), a custom not usually observed on semi-holidays.

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* iii. 693.

S. S. W. B.

DOSA BEN SAADIA: Son of Saadia Alfayyumi. Dosa was a Talmudic scholar and philosopher, but he did not succeed his father as gaon. A responsum by him has been preserved. According to Abraham ibn Daud's chronicle, he entered into correspondence with the nasi Ḥasdai ibn Shaprut of Spain, and Judah Almadari in his commentary on Alfasi includes him in the list of gaons; while in a glossary to Maimonides' "Moreh Nebukim" he is counted among the philosophers who combated the Greek conception of the eternity of the universe. Some scholars declare Dosa identical with David ben Saadia, who wrote a Talmudic work in Arabic (cited in Bezalel Ashkenazi's "Shiṭṭah Meḳubbeẓet" to B. M. 104b) which concerns itself with the refutation of several decisions found in the "Halakot Gedolot," and which contains a reference to another work written by David in Arabic on oath-taking.

G. A. K.

DOSA B. ṬEBET: Palestinian amora of the fourth century, in whose name the following curious sentences on the two most dangerous instincts of man are handed down by the eminent haggadist Huna (Cant. R. vii. 8): "In His world God has created two instincts, that of idolatry and that of illicit love. The first one has long since been uprooted [in Israel]; the second still exists. 'Whomsoever,' says God, 'can resist this latter instinct I shall consider as having resisted both.'" The father's name, "Ṭebet," which does not occur elsewhere, is an interesting example of the use of names of months as surnames.

BIBLIOGRAPHY: Bacher, *Ag. Pal. Amor.* iii. 694.

S. S. W. B.

DOSETAI or **DOSITHEUS** (Δοσίθεος): A name, corresponding to the Hebrew "Mattaniah" or "Nethaneel," which seems to have been a favorite one both in Palestine and in Alexandria (Josephus, "Ant." xiii. 9, § 2; xiv. 10, § 18; xv. 6, § 2). It has been borne by the following:

Dosetai of Kefar-Yatma, a pupil of Shammai ('Orlah ii. 5). **Dosetai b. Matun,** a tannaite mentioned in a Baraita (Ber. 7b; Meg. 6b) as the author of a haggadic sentence, which in another place (Derek Ereẓ, ii.) is ascribed to **Dosetai b. Judah.** According to Yoma 30b, an amora, Dosetai b. Matun, handed down a sentence of Johanan's; but the correct reading is "Justai b. Matun," which is found in the parallel passage, Zeb. 99a, and is confirmed by the Jerusalem Talmud (Yer. B. Ḳ. vii. 6a). On **Abba Jose b. Dosetai** see Bacher, "Ag. Tan." ii. 388.

Of those from the time of the Amoraim who have borne the name the following may be mentioned:

Dosetai, the father of Apotriḳi or Patriḳi. (Ḥul. 64b; compare B. M. 5a). He is perhaps the same Patriḳi or Patriḳ who is mentioned as the brother of Derosa (Yer. Yoma iv. 41d). **Dosetai the Elder** (Yer. Ned. x. 42b; Yer. Ḥag. i. 76d), mentioned with a younger Dosetai. He is probably the Dosetai frequently referred to in Midrashic literature as having handed down the sentences of Samuel b. Naḥman and of Levi (Bacher, "Ag. Pal. Amor." i. 488, 492, 503; ii. 431; iii. 695).

Dosetai b. Jannai: Tanna of the latter half of the second century, known especially as having handed down sentences of the tannaim Meïr, Jose b. Ḥalafta, and Eleazar b. Shammu'a. On a journey to Babylon he was ill-treated at Nehardea by the Jewish-Persian authorities, and took revenge by giving a satirical description of the latter. The account of the affair is preserved in two different versions (Giṭ. 14a, b; Yer. Giṭ. i. 43d; Yer. Ḳid. iii. 64a).

Examples of Dosetai's humor are to be found in his answers to his pupils' questions on the differences between man and woman (Niddah 31b), and in his reply to the question why Jerusalem did not have thermæ like Tiberias: "If Jerusalem had warm springs," he answered, "the pilgrims coming up for the feasts would have dwelt on the pleasures of the baths offered them, instead of considering how best to fulfil the regulations for the pilgrimage" (Pes. 8b). The words of Eccl. xi. 6 ("In the morning sow thy seed," etc.) he explained as a reminder to the farmer to be diligent in his sowing and planting (Ab. R. N. iii.). In another sentence (*ib.* xi.) he showed how the person who does not work during the six week-days will soon find himself compelled to work on the Sabbath. One of Dosetai's sermons praises almsgiving, interpreting Ps. xvii. 15 thus: "Through charity shall I see thy face, and enjoy thy sight on awakening" (B. B. 10a).

In a later Midrashic legend (Tan., Wayesheb, 2; Pirḳe R. El. xxxviii.) **Dosetai b. Jannai** is the name of one of the two teachers sent by the Assyrian king to convert the pagans who had settled in

Israel (later on, the Samaritans). The name was probably suggested by its similarity to that of the Samaritan sect of the Dositheans (Bacher, "Ag. Tan." ii. 385–387). Compare Dositheus.

Dosetai b. Judah: Tanna of the latter half of the second century. He was the author of several halakic sentences (see B. Ḳ. 83b; Ḳid. 69a, and parallels) and transmitted those of Simon b. Joḥai. On one occasion Dosetai's opinion was opposed to that of Judah I., the patriarch ('Ar. 30a). Four interpretations of Deut. xxxii. bear his name (Sifre, Deut. 306, 309, 318, 320; comp. Bacher, "Ag. Tan." ii. 390 *et seq.*).

Dosetai of Biri: Palestinian amora of the early part of the fourth century. 'Ulla, a native of Biri in Galilee, once addressed a halakic question to him ('Ab. Zarah 40a). The Babylonian Talmud contains three interpretations of Scripture from Dosetai's sermons, which were perhaps handed down in the schools of Babylon by 'Ulla, who had come up from Palestine. One of these refers to Num. x. 36 (B. Ḳ. 83a; compare Sifre to Num. lxxxiv., and the Baraita, Yeb. 64a); another, to I Sam. xxii. 1 *et seq.* ('Er. 45a); while the third is an original exposition showing how David in Ps. xix. 13 *et seq.* gradually begs forgiveness for his sins, like a Samaritan peddler unfolding his wares one after the other (Sanh. 107a). Palestinian sources do not mention Dosetai of Biri (Bacher, "Ag. Pal. Amor." iii. 695; Krauss, in "Monatsschrift," xli. 561).

Dosetai of Kokaba: Contemporary of the tanna Meïr. He asked the latter what was meant by the sentence, "The belly of the wicked shall want" (Prov. xiii. 25), and Meïr answered by relating an incident characteristic of the pagan's vain and intemperate love of pleasure (Pesiḳ. vi. 59b; Pesiḳ. R. xxvi. 82b; Midr. Mishle xiii. 25 [where instead of Kokaba, Be-Yeshebab is mentioned as the home of Dosetai]; Tan., Pinḥas, 13; Num. R. xxi.). According to another version of this story, Meïr was the questioner and Dosetai the narrator. It is unnecessary to assume (compare Oppenheim in Berliner's "Magazin," i. 68, and Goldberg in "Ha-Maggid," xii. 62) that "Dosetai" is here a generic term, meaning a Dosithean (Bacher, "Ag. Tan." ii. 32).

J. SR. W. B.

DOSITHEUS: Founder of a Samaritan sect; lived probably in the first century of the common era. According to Pseudo-Tertullian ("Adversus Omnes Hæreses," i.), he was the first to deny the Prophets—a heresy that gave rise to the party of the Sadducees. Jerome gives the same account ("Contra Luciferianos," xxiii.). Hippolytus I. begins his enumeration of the thirty-two heresies by mentioning Dositheus; hence this sect is made to appear older than the Sadducees (compare Clement of Rome, "Recognitiones," i. 54), and on this heresy is based the system of Philaster ("De Hæresibus," §§ 4, 5). The Samaritan chronicler Abu al-Fatḥ of the fourteenth century, who used reliable native sources, places the origin of the Dosithean sect in the time before Alexander the Great (Abu al-Fatḥ, "Annales," ed. E. Vilmar, 1865, p. 82). The rabbinical sources also (Tan., Wayesheb, 2; Pirḳe R. El. xxxviii.) contain obscure references to Dositheus and Sabbæus as the two founders respectively of the Samaritan sects of the Dositheans and Sabuæans (compare Epiphanius, "Hæres." 11, 12, 13 [14]). These have been identified with the Samaritans Sabbæus and Theodosius, of whom Josephus relates ("Ant." xiii. 3, § 4; compare "Chronicon Paschale," in Migne, "Patrologiæ," Greek series, xcii. 441) that they defended before the Egyptian king Ptolemæus Philometor, against Andronicus, the advocate of the Jews, the sanctity of Mt. Gerizim (Grätz, "Gesch." 4th ed., iii. 45). The Samaritan chronicles (the Book of Joshua and Abu al-Fatḥ's "Annales") recount a similar discussion between Zerubbabel and Sanballat. As Josephus says that the Samaritans had two advocates, he doubtless meant the two apostles Dositheus and Sabbæus, whose doctrine—including the sanctity of Mt. Gerizim, rejection of the prophetical books of the Old Testament, and denial of the resurrection—was on the whole identical with that of the Samaritans.

Founder of the Dositheans.

A Samaritan Messiah.

According to Hegesippus (Eusebius, "Hist. Eccl." iv. 22, § 5), Dositheus lived later than Simon Magus, the first heresiarch of the Church; other authors speak of him as the teacher of Simon (Clement of Rome, *l.c.* ii. 8; several passages in Origen; Epiphanius, *l.c.*), at the same time confounding him with Simon Magus, connecting his name with Helena, and stating that he was the "being" (ἑστώς = "stans"). Origen says that Dositheus pretended to be the Christ (Messiah), applying Deut. xviii. 15 to himself, and he compares him with Theudas and Judas the Galilean (see "Contra Celsum," i. 57, vi. 11; in Matth. Comm. ser. xxxiii.; "Homil." xxv. in Lucam; "De Principiis," iv. 17). Origen also says that Dositheus' disciples pretended to possess books by him, and related concerning him that he never suffered death, but was still alive ("In Joann." xiii. 27). To this must be compared the story of Epiphanius ("Hæres." 13) regarding his death by starvation in a cave. Epiphanius adds that while some of the Dositheans lead loose lives, others preserve a rigid morality, refrain from the use of meat, observe the rite of circumcision, and are very strict in keeping the Sabbath and in observing the laws of Levitical purity. These statements may, however, refer to another Dositheus, who belonged to the Encratites (Harnack, "Gesch. der Altchristlichen Litteratur bis Eusebius," i. 152, Leipsic, 1893).

Origen says ("Contra Celsum," vi. 11) that the Dositheans were never in a flourishing state, and that in his time they had almost entirely disappeared, scarcely thirty of them being left. The Midrash, however, speaks of Dositheans, with whom Rabbi Meïr had dealings (Pesiḳ., ed. Buber, 59b; Pesiḳ. R. 16; Midr. Mishle xiii. 25, Yalḳuṭ § 950), and two names, "Dosion and Dosthion," are also mentioned (Ab. R. N., ed. Schechter, p. 37; compare "Shibbole ha-Leḳeṭ," ed. Buber, p. 266), which either refer to two Dosithean sectarians or form a double designation for the heretic Dositheus. Yet the fact that the patriarch Eulogius of Alexandria (who probably lived 582–603) disputed successfully against the Samaritan followers of Dostan (Δοσθήν) or Dositheus, and wrote a work expressly against them (Photius, "Bibliotheca," cod. 230), shows that the

Dositheans existed and even exercised a certain power in the sixth century. Origen possibly refers to a Christian sect of the Dositheans, who in fact left no traces, while the Samaritan sect certainly continued to exist. In Egypt especially, this sect was probably numerous enough to induce the Christian patriarch of Alexandria to engage in polemics against it.

In Arabic Sources.

In Egypt the Arabic writers may have become acquainted with the Dositheans, though some may have survived also in Syria and Palestine, as is evident from the rabbinical sources. Mas'udi, of the tenth century, says that the Samaritans were divided into two sects—that of the Kushan, or ordinary Samaritans (= "Kuthim"), and that of the Dostan (Dositheans; compare Δυσθήν). Shahrastani (ed. Cureton, i. 170; Haarbrücker's transl., i. 258) calls them "Kusaniyyah" and "Dusitaniyyah." Abu al-Fatḥ (*l.c.*; compare p. 151, and "Chronique Samaritaine," ed. Neubauer, p. 21, Paris, 1873, דוסתים, "Dosthis") says of the Dostan—*i.e.*, the Samaritan Dositheans—that they abolished the festivals instituted by the Mosaic law, as well as the astronomical tables, counting thirty days in every month, without variation. This reminds one of the Sadducees (A. Geiger, "Urschrift und Uebersetzungen der Bibel," p. 149; see Judah Hadassi, "Eshkol ha-Kofer," § 97), and is a further proof that the Dositheans were their spiritual predecessors. The statement that the festivals were abolished, probably means that the Dositheans celebrated them on other days than the Jews; but as, according to a trustworthy statement of Epiphanius, the Dositheans celebrated the festivals together with the Pharisaic Jews, an approximation may well be assumed toward the Karaites, a sect with which the Samaritans had much in common in later times. The determination of the months by means of the testimony of witnesses may also have been a Karaite custom, although that practise may go back to a time before the opposite view of the Pharisees existed. Under the Abbassid califs the Samaritans persecuted the Dositheans, although they themselves had to suffer much. Under Ibrahim (218–227 of the Hegira) the synagogue of the Samaritans and Dositheans at Nablus was burned by heretics, but it was subsequently rebuilt. Yusuf ibn Dasi, governor of Palestine, entirely forbade the worship of the Dositheans; and the sect may in consequence have been absorbed by the Samaritans.

K. S. Kr.

DOSTOYEVSKI. See Russia.

DOUGH. See Ḥallah.

DOVE: One of the most familiar species of pigeon. The most common term for dove in the O. T. is "yonah," comprising the whole family of *Columbidæ*, but in particular denoting the dove (*Columba*), as distinguished from the turtle-dove (*Turtur*), for which "tor" is used exclusively. The dove is first mentioned in the account of the Deluge (Gen. viii. 8–12) as one of the birds sent out from the Ark. In the sacrificial code the dove and turtle-dove were the only birds admitted as sacrifices (Lev. v. 8; xii. 6, 8; xiv. 5, 22; xv. 14, 29). The dove seems to have been early domesticated in Palestine (compare Isa. lx. 8, where the dove-cot ["arubbah"] is referred to). Four species of *Columbæ* and three of *Turtur* at present inhabit Palestine in large numbers (see Tristram, "The Natural History of the Bible," pp. 214, 216, London, 1889).

The Talmud mentions about ten species or varieties of *Columbidæ*, among them being: "tasil" or "ta'ẓil" (Ḥul. 62a, 140b; B. B. 75a); "ẓulẓalta" and "ẓilẓela," abbreviated into "ẓuẓla" (Sanh. 100a; Shab. 80b); "ḥamimta" (Giṭ. 69b); "daẓipe" and "kupshana," explained to be "turtles of the street" (Ḥul. 62a); "torin shel rehabah" (= half-tamed doves). The young dove is called "ben yonah" or "bar gozala" (Ḥul. 22a, 76b). More specific terms for the young of a dove are "pargeyot" and "peridah" (B. M. 24b, 84b; compare Rashi); "niful" denotes the unfledged dove, while "gozal," as in the Bible, indicates the young of any bird, and is even used of helpless babes (Pes. 49a). Of domesticated doves three varieties are mentioned: (1) those kept in the dove-cot ("shobak"); (2) those kept in the house (properly the attic, "'aliyyah"); and (3) Herodian doves ("hordesi'ot"; Beẓah 24a; Shab. 155b; Ḥul. 138b). The last variety is so named because Herod was accustomed to keep them in pigeon-towers in the gardens surrounding his palace (compare Josephus, "B. J." v. 4, § 4). For the regulations concerning the breeding and rearing of doves see B. Ḳ. 79b; B. B. 22b, 24b; Shab. 155b.

Betting on the swiftness and endurance of doves was well known in Talmudic times, and those who practised it ("mafriḥe yonim") were placed in one category with gamblers and usurers, and were not admitted as witnesses in court (Sanh. 24b; R. H. 22a). According to Rashi to B. B. 80a, the dove begins to lay when it is two months old, and breeds every month, with the exception of the month of Adar (compare Cant. R. i. 15, iv. 1). For illustrations of the fertility of the dove see Ber. 44a; Lam. R. ii. 4; and Ker. 28a. Mustard is considered the favored food of doves (Shab. 128a). The Temple had a special officer to care for the doves ("ḳinnin") used for sacrifice (Yer. Sheḳ. v. 1). Turtle-doves were preferred for sacrifices because mentioned in the first place in the sacrificial code (Ker. 28a).

The gentleness and grace of the dove make it a favorite simile for female beauty and tenderness (Cant. i. 15; iv. 1; v. 2, 12; vi. 9; compare Ber. 56b), and its faithfulness to its mate is a symbol of conjugal fidelity and devotion ('Er. 100b). It is especially an emblem of unjustly persecuted Israel (Ps. lxxiv. 19; compare B. Ḳ. 93a), and its wings, iridescent with silver and gold (Ps. lxviii. 13), are compared with the commandments which hedge around and protect Israel (Ber. 53b; Shab. 49a, 130a). For a detailed comparison of the dove with Israel see Cant. R. i. 15, iv. 1. It is often contrasted with the cunning and treacherous raven (Giṭ. 45a; Ḳid. 70b; compare Sanh. 100b). It is also an image of the Spirit of God (Ḥag. 15a; Targ. to Cant. ii. 12; Rashi to Gen. i. 2; compare Sanh. 108b).

The anecdote of the Samaritans having worshiped the image of a dove on Mt. Gerizim (Ḥul. 6a; compare Yer. 'Ab. Zarah v. 44d) probably arose from the fact that after Hadrian the Romans erected a brazen bird there (compare Jost, "Gesch. der Juden," i. 61, 75; Herzfeld, "Gesch. Israels," ii. 596).

E. G. H. I. M. C.

DOWRY (Aramaic, **Nedunya**): The portion or property which a wife brings to her husband in marriage. In patriarchal times the dowry was not known. As among all other nations of antiquity, in Israel the bridegroom named a price or ransom ("mohar") to the father of the bride (Gen. xxiv. 12; Ex. xxii. 17; compare Hos. iii. 2). It is, however, doubtful whether this mohar was given in the form of a ransom to the father or of a gift to the bride. Both cases are mentioned in the Bible; *e.g.*, Eliezer, the servant of Abraham, brought costly gifts to Rebekah when he betrothed her for his master's son; while Jacob served Laban for fourteen years for his two daughters (see Marriage; compare Saalschütz, "Das Mosaische Recht," cii., § 3).

Gifts to Daughters.

Besides this custom of the bridegroom making gifts to the bride or paying a ransom to her father the Bible also makes frequent mention of property which the woman brought to her husband at marriage. Rebekah brought to her new home female slaves from her father's household (Gen. xxiv. 59, 61). Laban made similar gifts to Leah and to Rachel (Gen. xxix. 24, 29). Othniel at marriage received from his father-in-law, Caleb, a field of springs (Judges i. 15). Solomon received from Pharaoh, his father-in-law, a city as the portion ("shilluḥim") of the princess (I Kings ix. 16). Later, the practise of giving a dowry to a daughter, as it is now understood, entirely superseded the gift or ransom given by the groom; so that in Talmudic times it ("nedunya") is spoken of as a long-established custom.

The Rabbis ordained that a man must give some of his property to his daughter when about to be married. The minimum amount was fifty zuzim (Ket. 67a); but every parent was obliged to give in proportion to his means. The minimum amount was paid to a poor girl out of the charity funds of the community, even when they were not in a flourishing condition. Although the court could compel a father to give his daughter in marriage, it could not compel him to pay a set dowry as long as he secured a husband for his daughter without it, or by paying a smaller sum (Shulḥan 'Aruk, Eben ha-'Ezer, 71, 1, Isserles' gloss). If the groom agreed not to ask for the dowry, he was obliged—even while the bride was still in her father's house, in the period between betrothal and marriage—to provide her with all necessary garments (Ket. 67a). The dowry might be withheld by the bride's father if the groom maltreated his bride during the period of betrothal. In such a case the money was deposited with a trustee until peace was established in the family (Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 73, 8, Isserles' gloss, and "Sifte Kohen," *ad loc.*).

Paid from Estate.

If, after the father's death, the heirs gave their minor sister in marriage, and paid her a dowry amounting to the minimum sum fixed by the Rabbis, she might, on attaining her majority, collect from the estate the balance due to her. The court usually estimated how much the father would have given to his daughter if he had been living, according to his position in society, or his generosity, or his action with regard to previous marriages of his daughters; and this sum was taken out of the estate (Ket. 68a). If there was nothing to guide the court in its estimate, the Rabbis ordained that a tenth of the estate be given to each daughter at her marriage, to be paid by the heirs in money or in valuables. If a number of daughters were about to be married at the same time, a sum made up of a tenth of the estate for the oldest, a tenth of the remainder for the second, and so on, was divided equally among them (Maimonides, "Yad," Ishut, xx. 4; Shulḥan 'Aruk, Eben ha-'Ezer, 113, 4).

If the father was unable to pay the sum he had promised as a dowry to his daughter, the groom could not on that account postpone the marriage, but had either to marry or to divorce his bride. But if the promise was made by the bride herself and she was unable to fulfil it, the groom might let her "sit until her hair became gray"; that is, until she could pay the sum which she had promised (Ket. 109a). Insistence upon the payment of a dowry, however, was much decried by later authorities (Eben ha-'Ezer, 2, 1).

There is also frequent mention of the custom of the groom's father contributing to the dowry (Ket. 102b); and at present the custom prevails, in all cases where a dowry is agreed upon, that the groom's father subscribes a proportional sum to the dowry, usually much less than that given by the bride's father. If the bridegroom died after betrothal, and, according to the Mosaic law, the bride became betrothed to his brother (see Levirate), her father need not pay to the latter the dowry promised to his brother (Ket. 66a).

In Marriage Contract.

The dowry that the woman brought to her husband, whether real estate, slaves, or movable property, was recorded in the marriage contract (Ketubah). Custom decided whether the sum mentioned in the marriage contract should be exactly the same as the dowry was really worth, or more or less. In some places the custom prevailed of recording an amount one-third or one-fifth more than the value of the actual dowry; in others, less than the value of the dowry (*ib.*; Ishut, xxiii. 11; Eben ha-'Ezer, 66, 11). This sum then became a claim upon the husband's property equally with the ketubah itself; so that when he died or divorced her, the woman could collect from his estate both the sum stipulated in the marriage contract and the value of her dowry. During the husband's life, however, the dowry belonged to him, and he might derive all benefits from it. He might even sell it for the period of his lifetime. The laws governing the relation of the husband to the dowry vary with the manner in which the woman has acquired that property.

Kinds of Property.

"Nikse ẓon barzel" (the property of iron sheep) is the name applied to the dowry given to the woman at marriage by her father or his heirs, and detailed in the marriage contract. All rents, fruits, and increments of this property belonged to the husband; and he became responsible for the principal in case of loss or damage. At his death, or in the case of divorce, the woman received the value of that property as estimated on her wedding-day. Like iron, it could not be destroyed or damaged, and like sheep, the husband might derive all profit (wool) from it.

"Nikse melug" (the property of plucking) is the term designating property which the woman obtained during her betrothal, by inheritance or by gift. The husband was entitled to all the fruits and profits thereof, although he was not held responsible for its loss or deterioration. He might "pluck" it (have the usufruct during his life), and need not answer for any damage that might occur to it.

The husband was made the usufructuary of the foregoing two classes of his wife's property by a decree of the Rabbis, in consideration of his being obliged to redeem his wife whenever she might be taken captive (Ket. 47b). The wife should not sell any part of her property while her husband was living, and if she did sell, he could collect from the buyer all the improvements or profits that the property bore during his life. If the husband became involved in a lawsuit regarding his wife's property, he needed a power of attorney from her to act in her name. When, however, the case also involved the profits of the property, he did not require a power of attorney; for, being entitled to the profit, he might also claim the property itself (Giṭ. 48b; "Yad," Sheluḥin, iii. 4; Eben ha-'Ezer, 81, 4).

Property which the husband gave to his wife after marriage, or which a third person gave to her with the express understanding that it be used exclusively by her, or which she obtained by selling her marriage contract, was considered entirely beyond the husband's control. She could not, however, sell or give away the property given to her by her husband; while with the other kinds she might do as she desired (Eben ha-'Ezer, 85, 7).

According to the rabbinic law, the husband became the sole heir of his wife's property of all these three classes (see INHERITANCE). In regard to the dowry that the woman brought from her father's household, this law was modified by a decree of R. Jacob Tam (1100–1171 C.E.), who enacted that if the wife died childless within the first year after marriage, the whole amount of the dowry should be returned to her father or to his heirs. Subsequently this was still further modified by a decree of the rabbinical synod of the communities of Speyer, Worms, and Mayence ("Taḳḳanat ShWM"), to the effect that if she died childless during the second year after marriage, one-half of the dowry should be returned to her father or to his heirs. This became the custom throughout Germany, and later was adopted by the Polish Jews also. In 1761, at a conference of rabbis held in Slutsk, Russia, this enactment was again modified to the disadvantage of the husband. As found in the records (§ 24) of the Grodno Jewish community, it reads as follows:

> "Concerning the enactment of Speyer, Worms, and Mayence ('ShWM') in the case when the daughter died, we have established the following decree in accordance with the requirements of the time and of the place. If the wife dies within *three* years after marriage, everything should be returned to her relatives, even her garments. If she dies within *five* years of marriage, half of her dowry should be returned to her relatives. After that period the husband becomes the sole heir."

Only the first half of this decree has been accepted by all later authorities of Russia and Poland (Eben ha-'Ezer, 53, 4; Eisenstadt, "Pitḥe Teshubah," *ad loc.*).

DOXOLOGY. See LITURGY.

DRABKIN, ABRAHAM: Chief rabbi of St. Petersburg, Russia; born of an old-established family at Mohilev on the Dnieper in 1844. When only a boy he devoted himself to the study of the Talmud and of Jewish literature, attending the best Jewish schools of the time. He also received instruction in the Cabala from several Ḥasidic rabbis. Having graduated as rabbi from the rabbinical institute at Wilna, he acted as teacher there for some time. In 1871 the Society for the Promotion of Culture Among the Jews of Russia presented him with a scholarship, enabling him to continue his studies at Breslau. Here, at the rabbinical seminary, and at the university under Grätz, Frankel, and others, he acquired a knowledge of philosophy, history, theology, and Oriental learning. After attaining the degree of doctor in 1875, he returned to Russia.

He was chosen (1876) chief rabbi of the community at St. Petersburg. Both in this capacity and as a representative of the interests of Russian Judaism at the time when the anti-Semitic movement was developing, he had a difficult and responsible task. Through his forceful personal representations to the heads of the Russian government, through his interviews with Count Ignatiev during the anti-Jewish riots of 1882, and through his vehement pulpit declamations against anti-Semitism, the name of Drabkin became widely known.

Drabkin was one of the first Jewish rabbis to preach in Russian. To his initiative is due the establishment of a number of educational and charitable institutions by the community of St. Petersburg. He went with the deputations sent on various occasions by that community to wait upon Alexander III. and Nicholas II. At the latter's coronation in 1896 Drabkin, together with the rabbis of Moscow and Warsaw, was chosen by the government to represent the Jews of Russia, and was later decorated by the czar. He was a member of several commissions, including that appointed to consider the question of circumcision among the Jews (1892), and that organized under the chairmanship of Prince Oldenburgski to prevent the spread of the plague.

Drabkin is the author of "Die Russische Gesetzgebung in Bezug auf die Juden," in "Monatsschrift," July and Aug., 1875; and he has contributed to the Russian-Jewish magazines "Vyestnik Russkikh Yevreyev" and "Razsvyet."

H. R. I. Dr.

DRACH, DAVID PAUL: Librarian of the Propaganda in Rome; born at Strasburg March 6, 1791; died in Rome Jan., 1865. Drach received his early education from his father, who was a rabbi. After spending some time in various Talmudic schools, he became a teacher at Rappoltsweiler, though only sixteen years of age. The love of the secular sciences brought him to Paris, where he was welcomed by his coreligionists, and became tutor in a wealthy Jewish family. His reputation as a teacher brought him Christian pupils; and this may have had some influence on his subsequent conversion; in fact, he had always manifested some leaning toward Christianity.

Drach had already begun the study of Greek and Latin so as to become acquainted with the Christian doctrines in their original sources. Struck by the accusation of some of the Fathers that the Jews had corrupted the Hebrew text, he began a comparative study of the Hebrew and the Septuagint, which study he continued in spite of the remonstrances of the president of the Central Consistory. Drach was received into the Catholic faith in 1823, together with his two daughters and his son **Paul,** who afterward became a priest and a distinguished Biblical scholar.

In 1827 Drach accepted the position of librarian of the Propaganda in Rome, which position he held until the year of his death.

Drach's principal works are the following: An edition of the "Bible de Venice," 27 vols., with copious and learned notes, Paris, 1827-33; "Relation de la Conversion de M. Hyacinthe (Simon) Deutz, Baptisé à Rome, le 3 Février 1826, Précédée de Quelques Considérations sur le Retour d'Israel dans l'Eglise de Dieu," Paris, 1828; "Du Divorce dans la Synagogue," Rome, 1840; "Notice Concernant l'Origine et les Progrès de l'Hospice Apostolique de St. Michel," Rome, 1842; "De l'Harmonie Entre l'Eglise et la Synagogue, ou Perpétuité de la Foi de la Réligion Chrétienne," 2 vols., Paris, 1844; "Lexicon Catholicum Hebraicum et Chaldaicum in V. T. Libros, hoc est, Gulielmi Gesenii Lexicon Manuale Hebræo-Latinum Ordine Alphabetico Digestum," Paris, 1848; "Le Pieux Hébraisant," a work containing the principal Christian prayers and a summary of the Catholic catechism in Hebrew and Latin, Paris, 1853; "Documents Nouveaux sur les Restes des Anciens Samaritains" (from "Annales de Philosophie Chrétienne," Nov., 1853), Paris, 1854.

BIBLIOGRAPHY: Wetzer and Welte, *Kirchenlexikon*; Migne, *Dictionnaire des Conversions*. An autobiography is contained in Drach's *Harmonie Entre l'Eglise et la Synagogue*.

DRACHMA. See NUMISMATICS and WEIGHTS.

DRACHMAN, BERNARD: American educator and rabbi; born in New York city June 27, 1861. He is a descendant of a rabbinical family, and was educated at the High School, Jersey City, N. J.; the Hebrew Preparatory School, and Columbia College, New York, whence he graduated in 1882. Continuing his studies in Europe, he entered the Breslau seminary, and matriculated at the University of that place, taking the degree of Ph.D. at Heidelberg (*multa cum laude*) in 1884. Drachman received his rabbinical diploma from Manuel Joel, rabbi at Breslau (1885). Returning to America, he first officiated as rabbi to the Oheb Sholom congregation in Newark, N. J. (1885-87). Next he accepted the office of rabbi to the Congregation Beth Israel Bikkur Cholim, New York city (1887-89), and later to that of the congregation Zichron Ephraim, of which he is still (1903) the incumbent. Drachman assisted Dr. Sabato Morais in founding the Jewish Theological Seminary (1886), and was appointed preceptor in Biblical exegesis, Hebrew grammar, and Jewish philosophy. In 1889 he was elected dean of the faculty, which position he held until the founding of the Jewish Theological Seminary of America in New York in 1902, when Drachman accepted the office of instructor in Bible and Hebrew grammar and the appointment of acting reader in codes in that institution. To him was due the inception of the Jewish Endeavor Society.

Among his writings may be mentioned: "Die Stellung und Bedeutung des Jehudah Hajjug in der Geschichte der Hebräischen Grammatik" (Breslau, 1885), and "Neo-Hebraic Literature in America" (in the Seventh Biennial Report of the Jewish Theological Seminary Association, New York, 1900). Also he translated from the German "The Nineteen Letters of Ben Uziel" by Samson Raphael Hirsch (New York, 1899).

DRAGOMAN, EL: Title of a Jewish periodical written in Judæo-Spanish and printed in square Hebrew characters, published in Vienna in 1856.

G. M. Fr.

DRAGON (δράκων): The usual translation of the Septuagint for תנין, dangerous monster whose bite is poisonous ("dragons' poison") (Deut. xxxii. 33; Ps. xci. 13). Nowhere distinctly described, they must be imagined as of composite form, resembling, according to some passages, the snake. Thus in Ex. vii. 9 (Hebr.) the staff of Moses is turned into a "dragon"; according to Ex. iv. 3 (Hebr.), into a "snake." Their home is in the water; they are mentioned together with the waves of the sea (Ps. cxlviii. 7), and were created by God with the fishes (Gen. i. 21). Originally they are mythological personifications of the floods (תהמות). In the vicinity of Jerusalem a "dragon's spring" was located, in which, according to ancient belief, a dragon lived as the spirit of the well (Neh. ii. 13). Especially interesting are the passages that speak of a single dragon: the "dragon that is in the sea" (Isa. xxvii. 1); "the great dragon that lieth in the midst of his rivers" (Ezek. xxix. 3); or simply "dragon" (Job vii. 12 [Hebr.]; Jer. li. 34; Ps. xliv. 19, read תנין). Such a dragon is also referred to as "Rahab" (Isa. li. 9 *et seq.*). LEVIATHAN (לויתן) probably also means a dragon of this kind (compare Isa. xxvii. 1).

Sometimes considerable information is given of these monsters. "In the beginning of things Yhwh overpowered them in creating the world." It is clear that this story, which is found only in fragments in the O. T., was originally a myth, representing God's victory over the seas (תהום; Isa. li. 9 *et seq.*), or the hemming in of the Nile (Ezek. xxix. 3). The Babylonian story of Marduk's victory over the dragon of the sea, Tiamat, is analogous; but other traditions, especially those of Egypt, may also have influenced the story. The Hebrew poets and Prophets were fond of using this old myth to symbolize the destruction of Israel's enemies.

In post-canonical times also similar traditions are often referred to. Psalms of Solomon (ii.) describe, under the image of a dragon, Pompey's greatness and fall; Apocr. Esther (i. 4 *et seq.*) describes the conflict between Haman and Mordecai as a battle between two dragons; the legend of Bel and the Dragon, a reproduction of the old Marduk monster, in the Septuagint version of Daniel, narrates how the prophet made cakes of pitch and put them in the dragon's mouth, with the result that the "dragon burst in sunder." Especially important is the mystical story of the persecution of the divine child and its heavenly mother by the great red dragon (Test. Job xii.). In its present form the story is explained as referring to the attacks of the devil on the Messiah, but it is based on an old Oriental myth of the enmity of the dragon for the child of the sun.

DRAGUIGNAN (Hebrew, דרגינייא): Capital of the department of Var, France. There was a Jewish community here in the thirteenth century. The poet Isaac Gorni, who visited it in the beginning of the fourteenth century, complained bitterly of the rich Jews of Draguignan, who did not know enough to appreciate his talent. He called the place מקום תנין ("dragon's lair"). In 1350-1400 two Jews, Cresquet and Crescas, who had come from "Draguinham," lived at Tarascon. About the same time Crégut Ḥayyim, a Jew from Draguignan, lived at Hyères, France. In 1427 the Jews of Draguignan were persecuted, and compelled to wear a badge in the shape of a wheel, on pain of being fined twenty-five silver marks. In 1475, however, they were authorized to maintain a synagogue on condition of paying four pounds of wax annually to the Bishop of Fréjus.

DRAMA: City of European Turkey in the vilayet of Salonica, 25 miles from Serrès. It is the ancient Drabescus. Its small Jewish community, which was founded in 1860 by immigrants from Serrès and Monastir, possesses a synagogue, and a boys' school with fifty pupils. Aside from several well-to-do families, the greater part of the Jews live by pedling in the neighboring villages. There are sixty-two Jewish families in a total population of 9,000.

D. M. Fr.

DRAMA, HEBREW: The origin of the Hebrew drama may be traced back to a very early period. The ancient Hebrews, like other nations of antiquity, were wont to express their emotions in the form of dialogue interspersed with songs. Miriam, with a drum in her hand, singing the deliverance of Israel, while the other women answer her in chorus, suggests vividly the strophes and antistrophes of the later Greek. The song of Moses is of the same nature. The Song of Solomon, according to many scholars, is a regular drama, the heroine of which is the Shulamite, and in which the other dramatis personæ are: Solomon; a shepherd; chorus; watchmen, etc. (see Renan's translation of the Song of Solomon). To the foregoing may be added the Book of Job, which, if not so elaborate in dramatic form as the Canticles, yet represents several persons as acting, namely: Job; his wife; the messengers; Eliphaz, Bildad, and Zophar (Job's three friends); Elihu; and God. These few crude dramas of the Biblical epoch had no immediate successors. Till the seventeenth century C.E. not a single drama in Hebrew is known. It is true that in the second century B.C. Ezekiel the Alexandrian, inspired by Euripides, wrote a drama in Greek, "The Exodus"; but other Jews did not imitate him. With the fall of pagan Rome a new era of culture began, in which the Jews actively participated, producing a considerable quantity of dramatic literature, though written in secular languages (Kayserling, "Sephardim; Romanische Poesien der Juden in Spanien").

It was the city of Amsterdam, where the Jews found freedom from persecution, and where Jewish libraries and literary societies existed, that gave birth to the modern Hebrew drama.

The subject may be divided into: (1) dramas written in Hebrew; and (2) those translated or adapted into Hebrew from other languages. Of the former the earliest were written about the middle of the seventeenth century, and the production of their successors continued with some interruption for about two hundred years. Translations began to be made at the end of the eighteenth century, but reached their highest excellence at the end of the nineteenth century. The translation into Hebrew of dramas written in other languages is still carried on with great activity.

The First Hebrew Drama.

I. Of the dramas written in Hebrew the oldest is יסוד עולם ("The Eternal Foundation"), written by Moses Zacuto at Amsterdam about 1642 (Franz Delitzsch, "Gesch. der Jüdischen Poesie," p. 75). The subject is the legend that Abraham destroyed the idols of his father, leaving only the large one. On being brought by his father before Nimrod, he is sentenced to be thrown with his brother Haran into a fiery furnace. Haran perishes in the flames, but Abraham is rescued by an angel. The style is very fluent and agreeable. Sometimes the author gives to Hebrew roots forms which are not found in the Bible. The long pieces have one and the same rime, a system common in Arabic poetry. In the short pieces, as in the Persian "mesnevi," the two hemistichs usually rime together. The drama was published by Berliner, with an introduction, at Breslau, 1872, and by David J. Maroni at Leghorn in the same year.

אסירי התקוה ("The Prisoners of Hope"), by Joseph b. Isaac Penzo, 1667, was printed at Amsterdam in 1673. The argument is as follows: A king who takes a serious view of his responsibilities is led astray, now by his own impulses ("yeẓer"), now by his wife ("ishshah"), and now by Satan. Finally his own understanding ("sekel"), Providence ("hashgaḥah"), and an angel endeavor to lead him in the right way.

The author was only seventeen years old when he composed the work, which was somewhat beyond his powers, although several poets have praised in verse the talent of the young dramatist.

The aim of both Penzo and Zacuto was to direct the attention of the Maranos to the Hebrew language and to draw them away from profane literature, to which they had exclusively devoted themselves.

During the seventy years which followed no Hebrew drama appeared. Some insignificant farces were written in Judæo-Spanish and afterward burned, but it was not till the first half of the eighteenth century that a revival of the Hebrew drama took place.

שמשון ופלשתים ("Samson and the Philistines"), by Moses Ḥayyim Luzzatto, was published at the end of his "Leshon Limmudim" (Sudzilkov, 1836).

מגדל עז ("Tower of Strength"), is an epithalamium written by the same author to celebrate the wedding of his uncle Israel Basan. This is an allegorical drama in four acts, and was composed when the author was young and full of poetic ardor. He was chiefly inspired by Guarini's "Pastor Fido"; but, as he says in his preface, he took the topic from the Midrash, where the Torah is compared to the young daughter of a king hidden in a stronghold, who shows herself only to her lover. The moral is the same as that of the "La-Yesharim Tehillah" (see below); namely, the triumph of truth over falsehood. The play was edited 100 years later by Franz Delitzsch, with notes by S. D. Luzzatto and M. Letteris (Leipsic, 1837).

לישרים תהלה ("Praise to the Righteous"), also an epithalamium by Moses Ḥayyim Luzzatto, was written on the occasion of the wedding of his friend and pupil Jacob di Gavis (Amsterdam, 1743). The title is a play on the word "Tehillah," which is the name of the heroine. The drama is an allegory in three acts, in which the chief actors are *Yosher* ("Rectitude"), *Tehillah* ("Praise"), and *Rahab* ("Pride"). The last, assisted by his friend *Tarmit* ("Falsehood"), tries to win for himself *Tehillah*, who has been promised to *Yosher*. He is frustrated in his design, and *Tehillah* is wedded to *Yosher*. This was Luzzatto's third drama, and though perhaps inferior in elegance to its predecessors, it evidences a much riper genius. It is more philosophical, and the tone throughout is Biblical. Luzzatto's language, as Franz Delitzsch says (*l.c.* p. 92), is not a mere mosaic of Biblical sentences, but an enamel of the finest and rarest Biblical elegancies.

ילדות ובחרות ("Childhood and Boyhood"), by Mendel Bresselau (Berlin, 1786), is a didactic poem in the form of a dialogue. The author imitated Luzzatto, whom he approached very closely.

הקולות יחדלון ("The Voices Cease"), by Samuel Romanelli of Mantua (Berlin, 1791), is an allegorical melodrama which he wrote in celebration of the marriage of a friend. He borrowed the mechanism of this work from classical mythology (Delitzsch, *l.c.* p. 92), and followed Luzzatto even more closely than did Bresselau.

אביגיל ("Abigail"), by R. Joshua, son-in-law of R. Isaiah Berlin (has never been published). The author died in 1806.

אסתר ("Esther"), by Joseph Haltern, 1795 (published in Heinemann's "Archiv," 1841), is an imitation of Racine's drama.

מלכות שאול ("The Reign of Saul"), by Joseph Efrati, is a Biblical drama in six parts, the hero of which is King Saul (published for the first time at Vienna, 1794).

מלחמה בשלום ("War in Peace"), by Ḥayyim Abraham b. Aryeh, is a play divided into two parts. The first, "Token 'Alilot" (The Weighing of Actions), describes the sale of Joseph by his brethren and the journey of the latter into Egypt to buy grain. The second part, "Tokaḥat Megullah" (An Open Warning), deals with the discussions between Jacob's sons and the Egyptian magicians, and describes how Joseph was recognized by his brothers. This work was published the first time at Sklow, Russia, in 1795. It was translated into Polish, and produced at Warsaw before Prince Paskevich. The women present were so much affected that several of them fainted, and the government forbade further performance of the drama.

Nineteenth Century.

בית רבי ("The House of Rabbi"), by Moses Konitz (Vienna, 1805), is a dramatized life of R. Judah ha-Nasi, the compiler of the Mishnah; included in the play is all that is told about Rabbi in the Babylonian and Jerusalem Talmuds.

בת יפתח ("The Daughter of Jephthah"), by Moses Neumann (Vienna, 1806), is a Biblical drama.

נבות היזרעאלי ("Naboth of Jezreel"), by Shalom ha-Kohen, was printed with his "Maṭṭa'e Ḳedem" (Rödelheim, 1807).

עמל ותרצה ("'Amal and Tirzah") is an allegorical drama in three acts, by the same author (Rödelheim, 1812). It is a sequel to Luzzatto's "La-Yesharim Tehillah," employing the same dramatis personæ. The author was induced to complete Luzzatto's work, which presented only the triumph of the good, and omitted the punishment of the wicked. The play was reedited by M. Letteris, Warsaw, 1862.

The remaining dramas are:

צפורה ("Zipporah"), by Gabriel Berger, in "Neuer Sammler" (Königsberg, 1809); Biblical drama.

אמנון ותמר ("Amnon and Tamar"), by Eliezer Raschkow (Breslau, 1812 [?]); Biblical drama.

יוסף ואסנת ("Joseph and Asenath"), by Süsskind Raschkow (*ib.* 1817); Biblical drama in five acts.

החרוץ והעצל ("The Industrious and the Idle"), by David Samoscz (*ib.* 1817).

פלגש בגבעה ("The Concubine at Gibeah"), by the same author; Biblical drama, the heroine of which is the Levite's concubine who caused the war between the tribes of Israel and that of Benjamin (*ib.* 1818).

גורל הצדיקים, or, according to Zeitlin, גמול הצדיקים ("The Lot of the Just"), by Kalman Kohen Bistritz (Vienna, 1821); Biblical drama in three acts, the hero and heroine being Mordecai and Esther.

שארית יהודה ("The Remnant of Judah"), by Solomon Judah Rapoport; a free adaptation of Racine's "Esther," in four acts, with an introduction (published in the "Bikkure ha-'Ittim," 1827).

חנניה מישאל ועזריה ("Ḥananiah, Mishael, and Azariah"), by Samuel David Luzzatto (published in the "Bikkure ha-'Ittim," 1875).

און בן פלת ("On, Son of Pelet"), by the same author (*ib.*).

תולדות משה ("The History of Moses"), by Isaac b. Saul Kandia (Warsaw, 1829); drama in two acts.

גדולת יוסף ("The Greatness of Joseph"), by Nathan R. Kalkar, in his "Niṭ'e Sha'ashu'im" (Copenhagen, 1834); Biblical drama.

בעז ורות ("Boaz and Ruth"), by Israel Jehoiada Cohen (Breslau, 1834).

אפיק נהרים ("The Torrent of Rivers"), by Aaron David Gordon (Wilna, 1836); an allegorical drama in three parts. It is a satire upon the conditions of the time, in which the author flays those who indulge in drinking on the anniversary of a parent's death. He was afterward persecuted by the class at which he aimed his shafts.

גזע ישי ("The Trunk of Jesse"), by M. Letteris (Vienna, 1836); a tragedy in five acts, the heroine of which is Athalia.

מפלת סיסרא ("The Fall of Sisera"), by Naḥman Isaac Fishmann (Lemberg, 1841); Biblical drama in two acts.

שלום אסתר ("The Peace of Esther"), by M. Letteris (Prague, 1843); tragedy in three acts.

על חומות ירושלים ("On the Walls of Jerusalem"), by Phinehas Kraemer (Vienna, 1865); a tragedy dealing with an episode of the destruction of the Second Temple by the Romans.

אשת חיל ("A Virtuous Woman"), by Elias Levin (Wilna, 1866); Biblical drama in one act, the principal characters being David and Abigail.

תפארת לבני בינה ("Glory to the Intelligent"), by A. B. Gottlober (Jitomir, 1867); an imitation of Luzzatto's "La-Yesharim Tehillah."

משל ומליצה ("Fable and Satire"), by Meïr Löb Malbim (Paris, 1867, and Warsaw, 1877); allegorical drama in four parts.

תבוסת אבשלום ("The Fall of Absalom"), by Joshua Bank (Odessa, 1868 and 1878); Biblical tragedy.

אמת ואמונה ("Truth and Belief"), by Ab. B. Lebensohn (Adam ha-Kohen) (Wilna, 1867 and 1870); an allegory in three acts and twelve scenes, attacking superstition.

אלישע בן אבויה ("Elishah, Son of Abuyah"), the teacher of R. Meïr, who was baptized (Vienna, 1868); an adaptation of Goethe's "Faust."

פחד בלילות ("Terror of the Nights"), a Talmudic tragedy, the heroes and heroine of which are King Solomon, Asmodeus, and the Queen of Sheba. The subject is the Talmudic legend of the dethronement of Solomon by Asmodeus. This work has not been published (see "Orient," x. 635).

קשר שבנא ("The Conspiracy of Shebna"), by N. Fishmann (Lemberg, 1870); Biblical drama in five acts.

נבל הצדיק ("Nabal the Righteous"), by A. D. Wechsler (Lemberg, 1874); comedy in five acts, denouncing the hypocrisy of the day. It is an adaptation from Molière's "Tartuffe."

הדסה ("Hadasa or Esther"), by G. Gitelevicz (Warsaw, 1875); Biblical drama in twelve scenes.

סמל האהבה והקנאה ("The Emblem of Love and of Jealousy"), by Aron Margolis (Vienna, 1877); Biblical tragedy, the hero and heroine of which are Amnon and Tamar.

כשרון החכמה ("The Advantage of Wisdom"), by S. Apfel (Czernowitz, 1882); drama in four parts.

הנרדף מארץ רוסיה ("The Russian Emigrant"), by Osias Atlas (Przemysl, 1883); tragedy in three acts.

בר כוכבא ("Bar Kokba"), by L. Landau (Lemberg, 1884); tragedy in five acts, the hero of which is Bar Kokba, leader of the revolt against Hadrian.

אמונה והשכלה ("Belief and Enlightening" [Rationalism]), by D. M. Andermann (Drohobycz, 1887); an allegory in five acts; the author imitates Luzzatto.

Several other dramas written by Russian Jews have not yet been published.

II. Berliner in his (Preface to "Yesod 'Olam," p. xix.) makes the statement that Letteris was the first translator of dramas into Hebrew. But if the adaptations of Letteris are considered to be translations merely, the priority must be given to David Franco-Mendes, of the end of the eighteenth century, who wrote "Gemul 'Atalyah" (The Punishment of Athalia), a Biblical drama in three acts adapted from Racine and Metastasio (Amsterdam, 1770). It was in the nineteenth century, and especially in its second half, that Hebrew literature was enriched by numerous translations of dramas. Meïr Letteris was certainly the first translator or adapter in the nineteenth century. His translations, or rather his adaptions, are mentioned above, namely: (1) Racine's "Esther" into Hebrew under the title "Shelom Ester"; (2) "Athalie," of the same author, under the title "Geza' Yishai"; (3) "Ben Abuyah," an adaptation of Goethe's "Faust." Racine's "Esther" was also translated by Joseph Haltern and by Solomon J. Rapoport (see above) in four acts (Vienna, 1827). Two other translated dramas have to be added to those of the first half of the nineteenth century: Metastasio's "Isacco," translated by Elijah Bardach under the title "'Aḳedat Yiẓḥaḳ" (The Sacrifice of Isaac; Vienna, 1833); and Kotzebue's "Der Schatz," translated by David Rosenhand under the title of "Ha-Oẓar," or "Le-Yishre Leb Simḥah" (Joy to the Righteous), in two acts (Warsaw, 1845).

During the second half of the nineteenth century very many translations were made. The favorite author was Schiller, seven of whose dramas have been translated into Hebrew: (1) "Die Braut von Messina," under the title "Medanim ben Aḥim" (Quarrels Between Brothers), by Jacob Levin (Brody, 1868); (2) "Die Räuber," under the title "Ha-Shodedim," by Moses Schulbaum (Lemberg, 1871); (3) "Wilhelm Tell," in prose, by David Radner, (Wilna, 1878); (4) "Don Carlos," in prose, by the same (*ib.* 1879); (5) "Marie Stuart," by Solomon Kovner (*ib.* 1879); (6) "Turandot," under the title "Tirẓah," by Osias Atlas (Przemysl, 1879); (7) "Fiesco, oder die Verschwörung zu Genua," under the title "Ḳesher Fiesko," by Samuel Apfel (Drohobycz, 1889). Five of Lessing's dramas have been translated: (1) "Nathan der Weise," under the title "Natan he-Ḥakam," by S. Bacher (Vienna, 1866); also by A. B. Gottlober, who versified the Hebrew in the same meter as the original (*ib.* 1874); "Philotas," under the title "Abinadab," by J. Falkovich (Odessa, 1868); (3) "Die Juden," under the title "Ha-Yehudim," in prose, by Jacob Kohn (Warsaw, 1875), also in verse by Hirsch Teller (Vienna, 1881); (4) "Der Freigeist," under the title "Ḥonen we-Noten," by D. Kohn (Przemysl, 1886); (5) "Miss Sara Sampson," under the title "Sarah bat Shimshon," by Isr. Frenkel (Warsaw, 1887).

Of other translations the following may be mentioned:

Gutzkow's "Uriel Acosta," by Sol. Rubin (Vienna, 1856).
Ludwig Philippson's "Jojachin," a tragedy in four acts, by S. Bacher (Vienna, 1859).
Shakespeare's "Othello," by Isaac E. Salkinson, under the title "Itiel" (Vienna, 1874).
The same author's "Romeo and Juliet," by Isaac E. Salkinson, under the title "Ram we-Ya'el" (Vienna, 1878).
Rich. Cumberland's "The Jew," drama in five acts, by Joseph Brill, under the title "Ish Yehudah" (Wilna, 1878).
Mosenthal's "Debora," by David Radner (*ib.* 1880).
Shakespeare's "Macbeth," by Isaac Rabb (Drohobycz, 1883).
Kotzebue's "Der Arme Poet," by Isidor Brüstiger, under the title "Ha-Meshorer he-'Ani" (Lemberg, 1884).
Scribe's "La Juive," by Zusmann Marik, under the title "Raḥel ha-Yehudiyyah" (Wilna, 1886).
Kozlovski's "Esterka," Polish drama in five acts, by Israel Frenkel, under the title "Massa' Ester" (Warsaw, 1889).

Finally, the following two poems arranged in dialogue form may be added: Dante's "Divina Commedia," under the title "Mar'ot Elohim" (Apparitions of God), translated by Saul Farmiggini (Triest, 1869); and Milton's "Paradise Lost," under the title "Wa-Yegaresh et ha-Adam" (And He Drove Adam Out), by Isaac E. Salkinson (Vienna, 1871). The two Warsaw literary societies, "Aḥiasaf" and "Tushiyah," are continuing the publication of dramas translated into Hebrew.

G. M. SEL.

DRAMA, THE JEW IN MODERN: The modern drama, which may be said to date from Christopher Marlowe and Shakespeare, has made liberal use of the Jew as a stage character. From the time of these authors until the present, dramatists have utilized the Jew, either libeling him as a human atrocity, with all the vices of a materialized devil, or, going to the other extreme, making him a perfect man. Few have struck the happy medium and shown the Jew as an ordinary human being.

General Characteristics.

The abusers of the Jew have been responsible, to a great extent, for the popular conception of Jewish character; for they have depicted him as hideous as his bitterest enemy could wish. Avarice, hatred, venality, murder, bigotry—in fact, all of the worse passions have been attributed to the stage Jew. In England, in Germany, in France, in Austria, on all stages, the Jew, probably because of his strong personality, has been a favorite theme with the dramatists. Shakespeare, in England, conceived a SHYLOCK; Stephanie, in Austria, a *Pinkus*, *Shylock's* opposite; Dugué, in France, *Bambaccia*, a thief; Iffland, in Hamburg, *Baruch*, a good angel. Every dramatist had his own idea of the Jew and his character, and represented him accordingly.

In English Plays.

In England the first of the modern plays to utilize the Jew was Marlowe's "The Rich Jew of Malta" (see BARABAS), which was not attributable to hatred of Jews in general, but of one Jew in particular; namely, Queen Elizabeth's physician, Roderigo LOPEZ, who was hanged in 1593 for treason. Lopez was undoubtedly the inspiration for several plays with Jewish villains, which appeared shortly after his trial and death. In 1594 Philip Henslow, the most enterprising theatrical manager of that day, produced two such dramas.

"The Merchant of Venice" followed in 1596—a dramatization of the tales of Ser Giovanni, "Il Pecorone," written in 1378 and published in Milan in 1558. The next play was Fletcher's "Women Pleased," the Jew being *Lopez*, a curious coincidence when Dr. Lopez is recalled. Beaumont and Fletcher's "Custom of the Country" followed in 1628. *Zabulon*, a male pander, is the Jew in this instance; and a more repulsive creation it would be difficult to imagine. *Rutilio*, a Christian, is, however, just as disgusting; yet, when *Zabulon* offers money to *Rutilio* to debase himself, he refuses the proffered gold with: "Because you are a Jew, sir, and courtesies come sooner from the devil than any of your nation." Before this (1610) Ben Jonson's "Alchemist" had been acted by the king's servants; but the part of the Jew, *Abel Drugger*, is so innocuous when compared with *Barabas* and *Zabulon* that it calls for no special comment.

Elizabethan Dramas.

After "Custom of the Country" came a steady stream of plays containing Jewish characters. Gosson's "School of Abuse" (1579) mentions a play, "The Jew Shewn at the Bull"; but no copy of the work is extant. "The Jewish Gentleman" was played in 1640; Dekker's "Jew of Venice," in 1653; William Henninge's "The Jew's Tragedy," in 1662; Lord Lansdowne's "The Jew of Venice," in 1701; "The Jew Decoy'd," a ballad opera, founded on "The Harlot's Progress," in 1773; "Jewish Education," in 1784; "The Israelite," in 1785; "Jewish Courtship," in 1787; "The Wandering Jew," in 1797; Dibdin's "The Jew and the Doctor," in 1798; "The Jew of Magadore," in 1808; Penley's version of "The Rich Jew of Malta," in 1818; "The Jew of Lubeck," in 1819; "The Hebrew," in 1820; a version of "Ivanhoe," with Edmund Kean as the *Jew of York*, in the same year; another version, "The Maid of Judah," in 1829; C. Z. Barnett's "The Rise of the Rothschilds, or the Honest Jew of Frankfort," and "The Ways of Our Tribe, or the Rich Man of Frankfort," in 1830; and Sheridan Knowles' "The Maid of Mariendorpt," in 1839.

Later Plays.

In addition there were numerous dramatic compositions, each containing a Jewish character. In Robert Greene's "The First Part of the Tragicall Raigne of Selimus, Emperour of the Turks," the Jew *Abraham* poisons *Bajazet* at the instigation of *Selimus*, and then kills himself. *Signor Rogero*, in John Marston's "Insatiate Countess," is accused of being a Jew; while in Webster's "The Devil's Law Case," a Christian merchant disguises himself as a Jew in order to carry out his nefarious schemes. John O'Keefe, in "The Little Hunchback," shows *Zebede* and his nephew *Absolom* converted; while Leman Rede exhibits still another type in "The Skeleton Witness," in which *Simon Levi* is duped by the Christians. Then, too, there are *Ichabod* and *Isaac*, in Douglas Jerrold's "The Painter of Ghent"; *Beau Mordecai*, in Macklin's "Marriage à la Mode"; *Ephraim*, in Dibdin's "School for Prejudice"; *Isaac Mendoza*, in the comic opera "The Duenna"; *Shilric*, in Macfarren's comic opera "Malorina"; *Levi Lyons*, in "Will Watch"; *Abanazor*, in "The Jewess"; *Abraham Mendez*, in "Jack Sheppard"; *Boaz*, in Jerrold's "Prisoner of War"; *Bokes*, in Shirley Brooks's "The Creole"; and *Melter Moss*, in "The Ticket-of-Leave Man."

More modern English dramatists have more or less neglected the Jew. Potter's dramatization of "Trilby" shows the exaggerated type in *Svengali*, a Jewish Cagliostro, charlatan, and scoundrel in one. Henry Arthur Jones produced a strong contrast to *Svengali* in his *Judah Llewellyn*, the half-Jewish hero of his "Judah"—a passionate, honorable dreamer-preacher. Zangwill, with his "Children of the Ghetto," also went to the extreme, in that he exposed the ghetto-dwellers to the light of day with a fidelity which at times is absolutely unpleasant. The other ghetto play, Fernald's "The Ghetto," goes a step further; and its gloom is even more oppressively realistic.

In French Literature.

France, until the anti-Semitic outbreaks of the last ten years, had treated the Jew more gently than had any other Continental nation. One of its first stage Jews was *Shylock*, in "Le Juif de Venise"—a translation of "The Merchant of Venice" by M. Dugué. Next came Théophile Gautier's "La Juive de Constantine." Perhaps the strangest play of this character ever concocted was Merville and Maillau's "Juif Errant," produced at the Ambigu, Paris, July 31, 1834. In this play the principal characters are *Isaac Ahasvérus, Satan, Simon, The Archangel Michael, Barabas, Louis XV., Jean du Barry, Puck, Ariel, Napoleon, Franklin, Marcus Aurelius, Esther, Rachel, Mme. du Barry, Mme. de Pompadour, Lilith, Death,* and *The Seven Deadly Sins.* It is scarcely necessary to say that it was not successful.

Other French plays on Jewish subjects were Anicet Bourgeois' "L'Impératrice et la Juive"; Catulle Mendes' "Les Mères Ennemies" (introducing a *rabbi*); Désaugier's "Juif" (produced at the Porte-Saint-Martin May 14, 1823); Dumas' "Femme de Claude" (*Daniel* and his daughter *Rebeccah*); Dugué's "Salvator Rosa"; Erckmann-Chatrian's "L'Ami Fritz" (the *rabbi*); and Daudet's "Roi en Exil," dramatized as "La Juive," in which the *Leemans* of the novel is metamorphosed into an old-clothes man, and his daughter *Sarah* into *Dona Florinde,* who plays havoc with the feelings of *Don John* of Austria. "Le Juif Polonais," by Erckmann-Chatrian ("The Bells," in English), contains a Jewish character who is not seen, being killed behind the scenes by *Matthieu.*

Early German Plays.

Germany has been the most prolific of all the nations in stage Jews. The first play to introduce them was the celebrated "Das Endinger Judenspiel," produced in the public square of Endingen in Baden April 21, 1616. It relates the history of a family of Christians who are murdered by *Rabbi Elias* and his companions. Eight years later their bodies are found, and the murderers are stoned and burned. Next came Gryphius' "Horribilicribrifax," which shows the Jew *Issachar* as a great boaster. Lessing treated the Jew more kindly in his "Die Juden" (1755), although the *Traveler* conceals his race to the last. Stephanie's "Der Neue Weiberfeind und die Schöne Jüdin" (1773) holds up to view the pretty Jewess *Esther*, whom the hitherto woman-hating count loves, but deserts on discovering her race. The same author's "Die Abgedankten Offiziere" (1770), a comedy in imitation of Lessing's "Minna von Barnhelm," deals with *Pinkus*, a good-natured Shylock. Following this, in 1774, came Pauerbach's dramatization of "The Rural Probity" (published in "The London Magazine," Aug., 1773), entitled "Der Redliche Bauer und der Grossmütige Jude," in which *Moses* is resplendent as a good angel. This was succeeded by Booger's "Post" (with *Moses*, a coward). Then came H. L. Wagner's "Reue Nach der That" (1775), in which a Christian causes his dog to bite a Jew, and regrets it later; Plümike's "Volontär" (1775), with a Jew as a jolly soldier; "Der Adelige Tagelöhner" (1776), wherein *Isaac* helps the poor hero to frustrate the villain, *Von Malverse.*

Müller created an utter coward in *Mauschel*, the Jew, in his version of "Faust" (1778); but the stage Jew was fully redeemed a year later, when Lessing's "Nathan der Weise" (see Nathan the Wise) saw the light. Next followed Bischoff's "Der Judenfeind" (1780), in which *Rachel* is killed by her father, *Salomo*, for the sake of 200 thalers. The year 1781 saw "Albertine," in which *Abraham* is pictured as a swindler; and the year following, Pfranger's "Der Mönch von Libanon," a refutation and continuation of "Nathan der Weise"; the monk who confounds *Nathan* being *Saladin's* supposedly dead brother, *Assad.* Lerchenheim's "Der Jude, oder Betrug für Betrug" (with *Simon*, a cheat), and Törring-Seefeld's "Der Teure Ring" (with *Abraham*), were produced in 1783. In the following year Heinrich Reinicke, in his "Nathan der Deutsche," shows *Nathan* to be a benevolent type of Jew; and J. K. Latich acknowledged the authorship of "Wer War Wohl Mehr Jude," a plagiarism of "Nathan der Weise," in which *Carl Reichert*, the banker's son, loves *Marie*, the adopted daughter of the Jew *Wolf.*

In the next three years German authors produced: "Menschen und Menschen-Situationen" (Karl Steinberg), which also copies "Nathan der Weise," in which *Recha*, the Christian, is the adopted daughter of *Isaac Mendel*; "Liebe und Philosophie" (Leipziger); and "Die Lüderlichen," in which *Schmül*, the money-lender, plays a prominent part.

In 1792 Hensler's "Das Judenmädchen von Prag" created a stir, for it portrayed the Jew *Isaak* paying the debts of a Christian. The same year saw the creation of *Ephraim*, a comedy rôle in "Weltklugheit und Herzensgüte." Iffland's "Dienstpflicht" (1795) pictures *Baruch* as the guardian angel of the poor hero.

Nineteenth Century.

The first few years of the nineteenth century witnessed the productions of Bischoff's "Dina, das Judenmädchen aus Franken" (1802), which was written to combat the anti-Semitism of the day, and which exploits the love of *Albert*, a Christian, for *Dina*, the Jewess, the latter meeting death at the hands of *Albert's* cousin, *Bianca*; "Der Wuchernde Jude am Pranger" (1804), in which usurer and Jew are painted as synonymous; and Aresto's (Burchardi's) "Soldaten" (1804), wherein *Moses* declares that when dealing with honest Christians he is an honest Jew.

Similar plays of that period are Ziegelhauser's "Die Juden" (1807), which extols Jewish charity during a flood near Vienna; Sessa's "Unser Verkehr" (1815), a caricature of Jewish life, with *Jakob Hirsch*, who imagines himself to be a poet, as the hero; Voss's "Euer Verkehr," an answer to the last-named play, in which *Herr Levin* stops the production of "Unser Verkehr," and foils an attempt to blackmail the Jews; "Der Weisenknabe" (1825), in which a Jewish lottery-ticket seller unites two poor lovers; Schröder's "Die Heirat Durch ein Wochenblatt" (based on Boursault's "Comédie Sans Titre");

"Sie Fehlen Alle" (with *Moses*, the money-lender); "Spielerglück," in which the son of a Jew and of a French milliner poses as the *Marquis de Richesource*; and many farces by Richard Voss.

Present Plays.

Of the newer German productions the best known is Gutzkow's "Uriel Acosta" (1847), based on the same author's "Der Sadducäer von Amsterdam" (1833), which is a play of great power. "Leah, the Forsaken," is another drama dealing with Jewish character. In still more recent times "Heine's Junge Leiden" by A. Mels, which is entirely Jewish—for every character in it is that of a Jew—made its great success because of the sympathetic conception of the youthful poet and the humorous character of *Hirsch*, the wandering chiropodist and lottery-ticket agent. This play was one of the first, if not the first, to show the Jew of to-day as he really is. Max Nordau's "Dr. Kohn," with its pedantic hero and its priggish villains, while possibly true to life in such German society as is portrayed in the play, is an unfair conception of the Jew. Dr. Herzl's "New Ghetto" is perhaps a too realistic depiction of the objectionable type of Jew.

As for the melodramas and the comic operas of the day, there is scarcely one that does not contain at least one Hebrew. The Jew is a stock character with the lower grade of dramatists, whose lack of originality and inventiveness prevents them from creating a conception barely different from the usurer, the hook-nosed race-track tout, and the bediamonded lady with a dubious past, whose sole ambition is to lead some innocent Christian maiden from the path of virtue.

The conceptions of the Jew by the mummers are as varied as the characters created by the playwrights' fancies. Until 1741 the stage Jew was a buffoon or low comedian. In that year Macklin defied tradition and played *Shylock* as a vindictive, revengeful being, contending: "This was the Jew that Shakespeare drew." Before Macklin, Alleyne had played *Barabas* with a huge nose. Kean made his *Shylock* a somewhat sympathetic character. Other actors run the entire gamut of conception, from wildest farce to deepest tragedy.

G. E. Ms.

DRAMA, YIDDISH: The dramatic part of Yiddish literature has had a less independent development than any other of its parts, and is consequently poorer, both in quality and in quantity. There are probably less than fifty printed Yiddish dramas, and the entire number of written dramas of which there is any record hardly exceeds five hundred. Of these at least nine-tenths are translations or adaptations. The earliest Yiddish dramas originated in Germany. Schudt, in his "Jüd. Merckwürdigkeiten," vi., ch. 35, tells of a troupe of Judæo-German performers in Frankfort-on-the-Main at the beginning of the eighteenth century, of which the director and "regisseur" was Baerman Limburg, author of the drama "Mekirat Yosef" (Sale of Joseph), which was played under his supervision. That drama was published in the above-mentioned city in 1711 (see "Oẓar ha-Sefarim," p. 326), and forms the beginning of the Yiddish drama. Numerous other dramatizations of the story of Joseph, of the Exodus, and of Esther and Ahasuerus were written in the succeeding two centuries; but, with the exception of the Esther plays by Goldfaden and Shaikevich, are of interest to bibliographers only. Saphir's farce, "Der Falsche Kaschtan" (1820), may be mentioned here because it was written to criticize Jewish communal affairs, while M. Miller's "Esther, oder die Belohnte Tugend" (Vienna, 1849), which is also written in German, but with Hebrew characters, may be cited as one of the latest productions not intended for the Yiddish-speaking masses.

Earliest Examples.

A certain Schertspierer of Vienna wrote a drama, "Moses," which was played in the newly established Jewish theater in Warsaw in 1838 ("Allg. Zeit. des Jud. 1838, No. 155). Of a later pre-Goldfaden Jewish theater, the one temporarily existing in Odessa in 1864, it is known only that the dramas "Esther" and "Athalia" were performed there ("Israelite," Cincinnati, vol. ii., No. 3). Aksenfeld's dramas mark the beginning of the Russian Yiddish drama, the main purpose of which is the glorification of the "Haskalah" or progressive movement. Gottlober's "Decktuch" (Warsaw, 1876) and Ettinger's "Serkele" (Johannesberg, 1861; Warsaw, 1875), which were written between 1830 and 1840, belong to the same class, to which also may be added I. B. Falkovich's "Reb Chaimele der Koẓin" (Odessa, 1866) and "Rochel die Singerin" (Jitomir, 1868). Abramowitsch, in his masterpiece "Die Takse" (*ib.* 1869), like the true artist, spares neither friend nor foe; but this work, like Zunser's extremely long "Mekirat Yosef" (Wilna, 1893), was not intended for the stage, and the dramatic form is only secondary.

The Modern Phase.

The real Yiddish drama begins with Goldfaden, who has not yet been surpassed. When he first established a permanent Yiddish theater, about 1875, he composed about fifteen farce comedies, some entirely original and some adapted from the German, but all containing actual Jewish characters and excellent caricatures. "Die Rekruten," "Die Babe mit dem Enikel," "Shmendrik," "Die Kishufmacherin," and "Die Zwei Kune-Lemels" are the best known of these. Of his later and more serious works, "Shulamit" and "Bar Kochba" are probably the best two plays in the entire Yiddish dramatic literature; they have been reprinted many times and translated into several European languages. His "Dr. Almasada" (adapted from the German), his "König Ahasuerus," and several dramas which he wrote while in New York, are still favorites with both actors and public.

Next to Goldfaden in point of time, and to some extent also in excellence, stands N. M. Shaikevich (Shomer), who began to write for the Yiddish stage soon after it was established. His "Jüdischer Poritz," "Der Revizor" (a parody of Gogol's work of that name), "Der Lebendiger Todter," and "Die Kokete Damen," written about 1879-80, possess considerable merit, and his "Spanische Inquisition" was translated into Spanish and played in Argentina. Another of the earliest writers for the Yiddish stage is Ossip M. Lerner, who, among other translations, has furnished a very good one of Gutzkow's "Uriel Acosta." L. Lewinsohn's "Weibersche Knüplach," which gives a droll description of the scare caused among the Jewish women of a certain community by the prospective repeal of "the ban of R. Gershom" which enjoins monogamy, went through at least three editions (Warsaw, 1877; Wilna, 1881). Epstein's "Geschmissener Apikores" (Warsaw, 1879) and Ulrich Kalmus' "Geschichte fun a Seltenem Berit un a Genarte Chasune" (Warsaw, 1882) are crude, but possess some merit and originality. Katzenellenbogen's "Rashi," Lilienblum's "Discontist," and Mrs. H. E. Abramowich's translation of Lessing's "Die Juden" also belong to this period.

New York.

The Yiddish theater in London never attained much importance, and like similar theaters in Galicia or in some towns of the United States outside of New York, it depended almost entirely on dramatic productions composed in Russia and, later, on those composed in New York. Jacobs, the author or translator of the "Leichtsinnige" and of "Rahel and Leah," both about 1888, and Rakov, author of a "Dreyfus" play, are the only London Yiddish dramatists of whom we have information. The real productivity began in New York, where every well-established Yiddish theater has its own playwright to provide new plays at short intervals. Joseph Lateiner, one of the earliest Yiddish dramatists of this generation, was the first to arrive here with a troupe (1883), and is considered the best of his kind. He began his career in Europe; his first productions here were "Esther and Haman" and "Joseph and His Brethren" (1884). He has since then written more than fifty plays, including comedies, tragedies, historical operas, melodramas, etc., most of which are a compound of several dramatic forms, and in which the staging is of more importance than the literary character.

M. Hurwitz, who arrived three years after Lateiner, has written about as many and as various pieces. Titles like "Tisza Eslar," "Shelome ha-Melek," "Shabbethai Ẓebi," "Capital und Arbeit," "Mabul fun Johnstown," "Cuba," "Der Rambam," "Jonah ha-Nabi," "Mary Berberi," show the scope and the variety of his dramatic works. Goldfaden while in New York also composed several plays, which, however, did not approach his former masterpieces. Shaikevich has also been active in New York for several years, and some of his comedies, *e.g.* "Die Emigranten" (1902), enjoy much popularity.

Jacob Gordin, who has written for the New York stage since 1891, is somewhat above the average of Yiddish playwrights. His adaptation, "Der Jüdischer König Lear," and its counterpart, "Mirele Efrot," and some other of his twenty odd pieces, have produced a strong, though hardly a lasting, impression. M. Seifert is the author of about fifteen or twenty pieces, of which an excellent short farce comedy, "Die Gele Redactie" (The Editorial Room of a "Yellow" Journal, 1902), deserves to be mentioned. Rubens Weissman, author of "Sarah," "Don Yiẓḥaḳ Abravanel," and a few other pieces, possesses considerable talent. John Paley is the author of the "Nihilisten"; Morris Rosenfeld, the poet, of "Der Letzter Kohen Godol"; and Jacob Ter, among others, has written a considerable number of dramatic works. Another Yiddish poet, A. M. Sharkanski, is the author of the historical dramas "Kol Nidre" and "Unetane Tokef." L. Kobrin and B. Gorin have written several dramatic works which are not devoid of literary merit, while D. M. Hermalin represents the ultrarealistic school on the Yiddish stage.

Several actors, like Thomashefski and Feinman, have also written plays, but none has succeeded so well as Rudolph Marks, author of "Ḥayyim in America," "Der Bowery Tramp," etc., who has given to the Yiddish stage some of the cleverest adaptations of American character-plays. Life in America is, next to Biblical subjects, the most popular theme with authors and audiences, and plays which portray the humorous side of it are among the most popular of contemporary Yiddish dramas.

DRAWER OF WATER: A proverbial expression always found in connection with "hewer of wood" (Deut. xxix. 11; Josh. ix. 21, 23, 27). When the fraud practised by the Gibeonites was discovered, the Israelites, since they had taken an oath to defend them, and therefore could not put them to death (see COVENANT), made the Gibeonites perform the menial work of drawing the water and cutting and gathering the wood for the Tabernacle and later for the Temple service. The water was drawn from the well, put into goatskins, and so carried. If the man had a donkey, two goatskins could be carried at one time, slung across the animal's back. The drawer of water is still a familiar figure in the Orient. See GIBEON; NETHINIM.

DREAMS.—Biblical Data: Dreams have at all times and among all peoples received much attention. In the youth of a nation, as in the youth of an individual, dreams are so vivid that they appear to be hardly distinguishable from reality. "In the primitive stages of human development, when all insight into the laws of nature and of the human mind was lacking, dream-images were taken to be actual realities" (Lehmann, "Aberglaube und Zauberei," p. 414, Stuttgart, 1898). Dreams were not explained physiologically or psychologically, but were ascribed to intercourse with spirits or taken to be inspirations of the gods. As spirits and gods were supposed to be conversant with the things that are hidden, yet unborn, dreams were looked upon as their whisperings, having the value of divinations and predictions. Since the language of spirits and gods, however, is not like the speech of men, it became necessary that dreams should be interpreted, which was possible only to the "wise man" who had intercourse with spirits and gods. In this way the "science" of dreams and dream-interpretation came into existence.

It is sufficient for the comprehension of the Biblical and Talmudical stories summarized below to compare them with the oneiromancy and oneirocriticism of the ancient world, which are amply treated in Lehmann's book, as well as in the various dictionaries of antiquities, such as Daremberg and Saglio's "Dictionnaire des Antiquités Grecques et Romaines" (ii. 306-308) and Ennemoser's "Gesch. der Magie" (pp. 132-141, Leipsic, 1844). Tylor, in "Primitive Culture" (i. 122, 303, 439; ii. 411), discusses the question from the ethnographic point of view.

The Bible attaches importance to dreams, as is shown by well-known instances in Genesis. But in conformity with its strict monotheism, it is always God who speaks through dreams, either to make known His will or to announce future events. It must be noted, furthermore, that the dreams recorded in the Bible are, almost without exception, intended for the benefit of the race in general and not for that of single individuals (Gen. xx. 3; xxviii. 12; xxxi. 10, 24; xxxvii. 5, 9; xl.; xli.; Judges vii. 13; I Kings iii. 5, 15; Dan. ii. and iv.). The two interpreters of dreams mentioned by name, Joseph and Daniel, expressly refer to the inspiration of God in their interpretations (Gen. xli. 16, 25; Dan. ii. 19). Daniel even has dreams and interpretations in a "vision of the night." Dreams were also taken as divine revelations even if they referred only to the dreamer himself (compare Job xxxiii. 14 *et seq.*).

Dreams and Prophecy.

Job looks upon the disquieting dreams and the dreadful visions of sleep as terrors sent by God (vii. 14). The prophet also received his prophecies during sleep: in some cases God spoke with him; in others, God caused him to behold a vision (Dan. i. 17). Only Moses spoke with God face to face, without the intervention of dreams, visions, or riddles (Num. xii. 5 *et seq.*).

Prophets and dreamers are mentioned together because of the connection between prophecy and dreams (I Sam. xxviii. 6, 15; Deut. xiii. 2, 4; Jer. xxiii. 25-32, xxvii. 9, xxix. 8). "I will pour out my spirit upon all flesh; and your sons and your daughters shall prophesy, your old men shall dream dreams, and your young men shall see visions" (Joel ii. 28). There is nothing to indicate how the dreams of the true prophets were distinguished from those of the false ones. The higher kind of prophet, however, beheld the vision while awake, either by day or by night (Zech. i. 8, iv. 1; Gen. xv. 12; I Sam. iii. 3, 4; II Sam. vii. 4 *et seq.*; Dillmann, "Handbuch der Alttestamentlichen Theologie," pp. 476 *et seq.*, Leipsic, 1895).

Interpretation of Dreams.

The interpretations of dreams in the Bible are not dependent upon astrology nor upon any other occult science, but are simple and ingenuous. The dreams are interpreted symbolically. Seven fat kine mean seven fat years, etc. The recurrence of the dream means that it will surely come to pass within a short time (Gen. xli. 32). The dreams of Nebuchadnezzar (Dan. ii. and iv.) are huger and more fantastic, and their interpretation, especially that of the second one, may be termed allegorical. Judges vii. 13 is also interpreted symbolically.

E. G. H.

——**In Rabbinical Literature:** Jewish tradition furnishes abundant material relating to dreams, the Babylonian Talmud—which originated (200-500) in the home of the Chaldeans, the magicians of the ancient world—being especially rich in them. Berakot (55-58) is a veritable storehouse of dream-interpretations. The following selections will present the views of Palestinian and Babylonian Jews during the first five centuries of the common era.

The fact that the most famous teachers frequently discuss dreams and enunciate doctrines regarding them, shows the strong hold dreams had upon the minds even of the intellectual leaders of Judaism. Belief in dreams was the rule; doubt concerning them, the exception.

Johanan ben Zakkai dreamed that his sister's sons would lose 700 denarii in that year. He therefore pressed them to give alms frequently, so that they might lose that sum gradually in a noble way (B. B. 10a). A man felt some compunction regarding the money left him by his father, which he suspected to be tithe-money. The dispenser of dreams (בעל החלום) appeared to him, and named the place, the sum, and the uses to which the money was to be put. The scholars held that in such cases dreams could not be taken seriously, and declared the money to be secular (Tosef., Ma'aser Sheni, v. 9; Sanh. 30a). In a similar story it was the father instead of the dispenser of dreams who appeared to the son (Yer. Ma'aser Sheni 55b). Although God had turned His face from Israel, He yet spoke in dreams to individuals (Ḥag. 5b). In conformity with this view, dreams have been regarded as suggestions from Heaven. The patriarch Gamaliel II.'s qualms of conscience were allayed in a dream (Ber. 28a). In the same way the opposing scholars were enjoined to make their peace with the patriarch Simon ben Gamaliel (Hor. 13b).

Meïr had no confidence in a certain innkeeper with an ill-omened name; but two of his colleagues made light of his suspicions; whereupon Meïr was warned against the man in a dream (Yoma 83b). Hints through Biblical passages were given in dreams (Yeb. 93b; Soṭah 31a; etc.). Ḥanina had a dream in which Rab was hanged on a tree: he interpreted this to mean that Rab would be his successor, and therefore treated him as an implacable enemy (Yoma 87b). When R. Naḥma spoke irreverently of Saul, terrifying angels appeared to him in a dream (*ib.* 22b). For a similar reason King Manasseh appeared to R. Ashi in a dream (Sanh. 102b). When Raba forced rain to come, his father appeared in a dream and scolded him (Ta'an. 24b). One whom R. Judah had honored in death came to thank him in a dream (Shab. 152b). Even an idol appeared in a dream, at a time when there was drought ('Ab. Zarah 55b). Raba prayed that he might receive in a dream the answer to a difficult question (Men. 67a). This actually happened in the case of R. Johanan (Men. 84b, *passim*). Many teachers of the Law desired to see famous authorities of past ages in their dreams, and had their wishes granted (Eccl. R. ix. 10). If any one was put under ban in a dream, ten persons had to absolve him (Ned. 8a); but if a pagan wished to embrace Judaism because he had been advised in a dream to do so, he was not accepted (Yeb. 24b).

Good and Evil Dreams.

A distinction was made between good and evil dreams. He who goes to bed in a cheerful frame of mind "is shown" a good dream (Shab. 30b), which may come to pass within twenty-two years (Ber. 55b). Good persons do not have good dreams, nor have bad ones evil dreams (*ib.*). As evil dreams naturally caused anxiety, people prayed not to be disturbed by them (Ber. 60b). The most common and efficient preventive of evil dreams was fasting (תענית חלום), still practised by many persons (Shab. 11a). It is not always clear what constitutes a good or an evil dream.

A skilful interpretation consisted in an ingenious answer, that often explained two similar dreams in entirely opposite ways. A man came to R. Jose ben Ḥalafta, saying: "I was told in a dream to go to Ḳapudḳia [Cappadocia], where I should find the money of my deceased father." Jose explained the dream as follows: "Count ten beams in your house, and in the tenth you will find the treasure, for 'Kapudkia' means קפא [= "beam"] and דקוריא [= "decuria," "ten"]" (for a similar analysis of the same name see Krauss, "Lehnwörter," ii. 459a). The same famous teacher of the Law interpreted a dream of an olive-wreath to mean that the dreamer would advance in the world; while he said to another man who had had a like dream, that he would be beaten. When the latter asked him why his interpretations differed, Jose replied: "The other man saw the olives growing, whereas you saw them after they had been picked", the latter idea being expressed in Hebrew by the words meaning "to beat down" (Yer. Ma'aser Sheni 55b). Such interpretations are generally based on folk-etymology, a striking example of which is given in Blau's "Altjüdisches Zauberwesen" (p. 166). The personality of the dreamer was also considered, so that the same dream (for instance, of drinking wine) might mean success in the case of a scholar, and misfortune in the case of an unlettered person (*ib.*).

Interpreters of Dreams.

The dreamer as a rule was unable to interpret his own dream (Yoma 28b). Hence the need of interpreters, who were numerous, and asked payment for their skill. The good-will of the interpreter was sought by presents, for it was believed that all dreams came true according to the interpretation (Yer. Ma'aser Sheni 57c; compare Bacher in "Rev. Et. Juives," xxvii. 141). Even teachers of the Law demanded a fee for interpreting a dream. They were consulted also by pagans, just as Jews consulted pagan "Chaldeans." Raba and Abaye, two Babylonian leaders of schools in the first half of the fourth century, laid their dreams before a Chaldean of the name of Bar Hedia, whose avarice and lying were denounced. "Whoever gave him a fee got a favorable answer, and whoever gave no fee got an unfavorable one" (Ber. 56a). He was held up to ridicule, and yet in spite of it was taken seriously.

Rules Concerning Dreams.

Ḥisda, a Babylonian of the third century, laid down the following rules: Every dream, excepting those which occur during fasting, means something. A dream not interpreted is like a letter unread. Neither good nor evil dreams come true entirely. An evil dream is better than a good one, since it leads to repentance; the former is annulled by the pain it causes, and the latter by the joy (Ber. 55a). Similar views are expressed by other Babylonian amoraim. An evil dream can be turned away, according to R. Johanan, by saying to three persons: "I have had a good dream"; they replying: "Yes, it is good; let it be good; may God change it to good," etc. The evil dream can also be annulled by means of certain Bible verses. The prayer for good dreams, which the congregation still pronounces after the first and second blessings of the priest, is recommended as early as the Talmud (Ber. 55b). In addition to learned interpretations—for instance, on the meanings of Biblical passages occurring in dreams—there are also those of a folk-lore character; *e.g.*, a red horse is an ill omen and a white horse a good omen (Sanh. 93a). A ט, the initial letter of טוב ("good"), is a good omen (B. Ḳ.). The diversity of dreams made the profession of interpreter remunerative. The fee paid for an interpretation was generally one denarius. There were twenty-four interpreters in Jerusalem, each one of whom would, of course, interpret a dream differently from the others.

Belief in dreams was criticized as early as Ecclesiastes, in which it is declared to be vanity (ch. v.). In view of the general and implicit belief in dreams obtaining in the ancient world, Sirach's disbelief in them is proof of his advanced thought. He expresses his views as follows (xxxi. [xxxiv.] 1-8, R. V.):

> Vain and false hopes are for a man void of understanding; and dreams give wings to fools.
>
> As one that catcheth at a shadow, and followeth after the wind, so is he that setteth his mind on dreams.
>
> The vision of dreams is as this thing against that, the likeness of a face over against a face.
>
> Of an unclean thing what shall be cleansed? And of that which is false what shall be true?
>
> Divinations and soothsayings and dreams are vain; and the heart fancieth, as a woman's in travail.
>
> If they be not sent from the Most High in thy visitation, give not thy heart unto them.
>
> For dreams have led many astray; and they have failed by putting their hope in them.
>
> Without lying shall the Law be accomplished; and wisdom is perfection to a faithful mouth.

The criticism of R. Simon ben Yoḥai (*c.* 150), however, shows a certain belief in the meaning of dreams; he says: "As there is no grain without chaff, so there is no dream without vain things." But his contemporary R. Meïr says, "Dreams do not help nor harm" (Hor. 13b). It is noteworthy that Philo wrote five books on dreams (Schürer, "Gesch." 3d ed., iii. 510, note 61). In view of these facts the psychologic interpretations of dreams by the wise rabbi Joshua ben Ḥananya (*c.* 100) are worthy of note. As Nebuchadnezzar once asked the Chaldeans, so a Roman emperor (probably Hadrian) asked Joshua what he (Hadrian) was going to dream. Joshua answered: "You shall dream that the Persians will vanquish and ill-treat you." Reflecting on this the whole day, the emperor dreamed accordingly (Ber. 56a). Samuel (d. 257) gave a similar and equally effective answer to the Persian king. Notwithstanding these exceptions, it may be said that the Jews of antiquity held almost the same views regarding dreams as did other ancient peoples.

S. S. L. B.

——**In Jewish Folk-Lore:** Uncultured Jews share with, and in most cases derive from, their neighbors most of their superstitions relating to dreams. The general principle seems to be that dreams go by contraries. Thus, if you dream of death, it is a sign that you will live. This belief is common to English, Dutch, and Russian Jews. On the other hand, there is a saying that a sixtieth part of every dream is true, since a dream is that part of prophecy (Ber. 57b). But not all dreams follow the rule of contraries; thus, if a Russian Jew dreams that a dog attempts to bite him, it is regarded as a sign that his enemies wish to harm him. It is generally thought that the dead pay visits to the living in dreams; this is current among the German peasantry (Grimm, list of superstitions at the end of "Teutonic Mythology," No. 633). To dream that a dead person brings fruit with him is regarded as a sign that he is in paradise. It would also appear that Jewish popular thought regards the dream-world as in direct communication with heaven, for the familiar dream-experience of a sudden fall is regarded as a sign that the soul has been suddenly ejected from heaven. On the other hand, it is considered unlucky to accept in a dream a present from one dead. This is found as early as the thirteenth century in the "Ẓawwa'ah" of Judah Ḥasid, § 13. If an unpropitious or in other ways "bad" dream occurs to a pious Jew, he will fast the next day. It is therefore considered an evil omen to have a bad dream on Yom Kippur, when fasting is obligatory, and the dreamer can not ward off the ill effects of his dream by a special fast for that purpose. Hence the curious recipe for preventing bad dreams found among the Jews of Minsk, who say, "Got is a har, Der holem is a nar; Wos vet mir zich haintige nacht holemen, Wel ich morgen nit fasten" (God is master, The dream is a fool; Whatever I may dream to-night, I will not fast to-morrow). The assumption is that the ruler of dreams, finding that he can not force the dreamer to fast, will not take the trouble to send him a bad dream. Dreams are supposed to result in the way they are interpreted, and accordingly it is unwise to tell your dream to a fool; he might interpret it in an unfavorable way.

Dream-Book.

The Jews of eastern Europe have still their special dream-book, a Yiddish translation of Almoli's "Pitron Ḥalomot," an edition of which was published as late as 1902 in Brooklyn, New York. This classifies dreams in accordance with their subjects —as animals, plants, angels, or the dead; or milk, cheese, butter, etc. A few examples will suffice to indicate the character of the work. If you dream that an ox gores you, you will live long; that you see demons, you will earn a great deal of money; that you drink milk, you will fall ill, but rapidly recover. These puerilities are probably derived from medieval dream-books of the Mohammedans, since Solomon ben Jacob Almoli lived in Constantinople.

A. J.

DREIFUS, MARKUS G.: Swiss teacher and editor; born at Endingen, canton Aargau, Switzerland, 1812; died at Zurich May 30, 1877. After attending the Talmud school and the seminary at Karlsruhe, and studying for a few terms at the University of Basel, he became in 1835 a teacher in the Hebrew parochial school of Endingen; holding that position, with temporary interruptions, until 1870. For a few years he was a teacher at Geneva, and for a short time editor of a political paper, "Der Landbote," at Winterthur. The last years of his life he spent as teacher of religion at Zurich, where he died. Dreifus, who was a grandson of R. Abraham Ris, was courageously and incessantly active in behalf of the civic and social betterment of his Swiss coreligionists; he and his friend M. Bernheim, teacher in Lengnau, being enthusiastic pioneers of religious reform. He endeavored to further the emancipation of the Swiss Jews by several small works and many articles in various Swiss journals. He published "Zur Würdigung des Judenthums Unter Seinen Nichtbekennern," Winterthur, 1860; 2d ed., with preface by M. Kayserling, *ib.* 1862.

S. M. K.

DREIFUS, MENAHEM BEN ABRAHAM: German rabbi and writer; he belonged to the widely related Treves family and signed himself טריוש. For many decades he was rabbi in Sulzburg, Baden, where he died in 1880. He is the author of a code giving the individual duties incumbent on an Israelite, published under the title "Oraḥ Mesharim," Mülhausen, 1858; 2d ed., Mayence, 1878. A Hebrew eulogy on the author by his brother-in-law Raphael Wormser, rabbi in Soulz, Alsace, forms a prelude to the work.

Bibliography: *Hebr. Bibl.* i. 54 *et seq.*

S. M. K.

DRESCHFELD, LEOPOLD: Physician and communal worker; born in Bamberg, Bavaria, 1824; died at Manchester, England, Oct. 21, 1897. He studied medicine and dental surgery in Germany. fought in the Revolution of 1848, and subsequently settled down in Manchester, where he became one of the leading dental practitioners. Dreschfeld identified himself with all educational movements for the advancement of his profession; was one of the founders of the Victoria Dental Hospital; was elected president of the Odontological Society (1888); and wrote a treatise on "Dentistry Among the Ancients." He was also elected president of the Students' Society; was on the committee of Owens College; was consulting surgeon to the Victoria Hospital, and a life member of the Odontological Society.

Dreschfeld was one of the original founders of the Park Place Synagogue; was associated with the Reform movement from its inception, and for over thirty years was one of the committee of the Jewish board of guardians. He was likewise one of the founders of several social institutions, including the Schiller-Anstalt and the Liedertafel.

BIBLIOGRAPHY: *Jewish Chronicle*, London, Oct. 27, 1897.

J. G. L.

DRESDEN: Capital of the kingdom of Saxony; situated on both banks of the Elbe. The presence of Jews in the city or in its vicinity as early as the beginning of the eleventh century is evidenced by the proceedings against Margrave Gunzelin (1010), who, among others, was accused of selling Christian slaves to Jewish merchants. The first official document, however, directly concerning the Jews of Dresden, as well as those of the other cities of Meissen, is dated 1265. In that year Henry the Illustrious regulated the differences between Christians and Jews. From these regulations it may be inferred that the main occupation of the Dresden Jews was money-lending.

According to an old chronicle, a great auto da fé of the Dresden Jews took place on Shrove Tuesday, 1349 ("Chron. Parvum Dresdense," in Menken's "Script. Rer. Germ." ii. 332). It is possible that this was connected with the Black Death, although Dresden was but slightly attacked by the plague.

Jews Banished.

The Dresden Jews figure again in official documents in 1368, with regard to special taxes imposed upon them, amounting to 1,000 gulden every other year. In 1425 Duke Frederick reduced these to 875 gulden, with the stipulation that the sum should be paid in gold of good quality and of a certain weight. Accused, in 1430 or 1432, of favoring the Hussites, the Jews were banished from Dresden, and their synagogue, situated in the place which still bears the name "Judenhof," was transformed into a distillery. The banishment, however, seems not to have been general, as exceptions were made in favor of those Jews whose services to the city were recognized. Thus in 1448 the princes Ernst and Albrecht granted to a Jewish physician named Waroch (probably Baruk), with his two sons Meïr and Moses, the privilege of settling in Dresden on the condition that Waroch should attend all the patients committed to his care by the princes. For this service he was to receive yearly thirty bushels of corn, one cask of wine, and a cow.

In 1700 the court factors of August II., Berends Lehman and Jonas Meyer, who had hitherto lived at Hamburg, settled in Dresden. They were soon followed by many other Jews, whom they took under their protection. During the following twenty-five years the number of Jews living at Dresden must have greatly increased; for in 1725 the government, which endeavored to enforce the decree of banishment, thought it necessary to issue an order forbidding to those Jews who did not belong to the households of the court factors the right to sojourn in Dresden, except while fairs were being held. Ten years later the Christian merchants of Dresden lodged with the government a complaint against Jewish competition.

New Regulations.

In 1746 new regulations were issued, rendering residence in the city unbearable to those Jews who by special permission had settled there. They were not allowed to build a synagogue, but had to meet privately and to preserve the strictest silence. A heavy poll-tax was imposed, which was further increased in 1749. Still the community gradually increased, and at length the absence of a Jewish cemetery was keenly felt. After many negotiations the Jews obtained from the government a plot of ground in Neustadt for the sum of 1,000 thalers, paying 5 thalers for each interment. The first to be buried in the cemetery was the widow of Isaac Meyer, bullion contractor to the mint.

The government continued to hamper the development of the community. New laws were enacted in 1772, restricting still further the right of settlement in Dresden. No Jew was allowed to reside in the city without special permission. In order that no unprivileged Jew might be clandestinely harbored, each Jewish family was subjected to a monthly police visitation. The poll-tax was increased; every adult male being assessed 70 thalers annually, in addition to a tax upon his wife and children. The price of a permit for a Jewish marriage was 40 thalers. Every means of gaining a livelihood was barred to the Jews, with the exception of money-lending and of rag-dealing in the Judenhof. Many were thus unable to pay their taxes, and in 1777 several hundreds would have been banished but for the intervention of Moses Mendelssohn.

Successive Rabbis.

Still, in spite of all these restrictions, at the end of the eighteenth century there were about 900 Jews in Dresden. In 1803 the community organized, and nominated as rabbi David Wolf Landau of Lissa, who filled the office for fifteen years. He was assisted by the leaders, Mendel Schie, Samuel Kaim, and Hirsh Beer. From 1820 to 1861 Dr. Bernhard Beer was very active in promoting both the spiritual and material welfare of the community. Landau was succeeded in the rabbinate by Abraham Levy, who in 1835 was followed by Zacharias Fränkel. Owing to the great abilities and zeal of the latter, the community obtained in 1837 permission to build a synagogue, which was inaugurated in 1840.

The political situation of the Dresden Jews remained precarious. Some trades and handicrafts were opened to them by the decree of 1838; but their disabilities were still very numerous, and the repeated petitions of the community and the intervention on their behalf of some Christian notables, as the philosopher Krug, were of little avail. The government of Saxony remained deaf to all solicitations, despite examples of more favorable treatment of the Jews shown by neighboring countries. It was not till 1868 that the Dresden Jews, after a long and persistent struggle, secured all the rights of citizenship.

On the removal of Fränkel to Breslau in 1854, Dr. Wolf Landau succeeded him, and in 1886 the present rabbi, Dr. Jacob Winter, was elected. In 1901 the Jewish population of Dresden aggregated 2,547. The community has ten charitable institutions, most of which date from the end of the eight-

'eenth century; it also has a large number of private foundations.

DREUX (Hebr. דרוייש or דרום): Chief town of the arrondissement of the department of Eure-et-Loire, France. From the twelfth century, Jews were living in this locality, where they were considered the property of the Countess of Dreux. In accordance with a convention concluded between King Louis and the barons at Melun in 1230, the Jews could be brought back to their old homes by force in case they had emigrated. This happened in 1234, when Louis ordered Thibaud, Count of Champagne, to restore to the Countess of Dreux the Jews that he held unlawfully, and the ownership of whom would be for her a source of revenue.

Abraham ibn Ezra was in Dreux from 1155 to 1157. Scholars of Dreux attended the synod of Troyes in 1160. In the thirteenth century it was the residence of many eminent rabbis, including Solomon, surnamed "the Saint," chief of the academy, and esteemed as a Tosafist; Joseph ben Solomon; Pereẓ ben Menahem; Menahem Vardimas, a contemporary of Sire Léon and of Jehiel of Paris; and Cresbia or Cresbito, who is by some identified with Berechiah ha-Naḳdan (see Jew. Encyc. iii. 53 *et seq.*).

G. S. K.

DREYFUS, ABRAHAM: French journalist and dramatist; born at Paris June 21, 1847. His first literary efforts took the form of two poetic fantasies (1870). To these were added the following plays, mostly comedies: "Un Monsieur en Habit Noir" (1872), in one act and with only one personage, brought out at the Vaudeville; "Mariages Riches" (Vaudeville, 1876); "Chez Elle" (with Charles Narray, Vaudeville, 1877); "Un Crâne sous une Tempête" (Gaîté, 1878); "Pour Sauver une Jeune Femme du Monde," "La Victime," and "La Gifle" (Palais Royal, 1878–80); "Le Klephte" (Odéon, 1881); "L'Institution Sainte-Cathérine" (Odéon, 1881); "Battez Philidor" (Opéra Comique, 1882); and "Une Rupture" (Théâtre Français, 1885); "Les Amis" (Théâtre Antoine, 1898); "De 1 Heures à 3 Heures," a comedy.

Some of these pieces have been collected by the author in three volumes entitled "Jouons la Comédie" (1887), "Scènes de la Vie de Théâtre" (Paris, 1879), and "L'Incendie des Folies Plastiques" (1886). He has published two volumes of notes on the theatrical world, and other articles have appeared in "La Vie Parisienne," "Le XIX^e Siècle," "L'Illustration," "Gil Blas," "Le Temps," and "Revue Littéraire et Politique." In this last journal, under the nom de plume "Monsieur Yosse," Dreyfus wrote a series of humorous reflections on the city and the theater. Mention may also be made of two lectures given by Dreyfus, one at Brussels—"Comment se Fait une Pièce de Théâtre," and the other before the Société des Etudes Juives—"Le Juif au Théâtre."

Dreyfus is a man of heart as well as of brains, as he has proved during the anti-Semitic agitations and in the celebrated Dreyfus case. He has not hesitated to use his pen in the service of his coreligionists, and his polemic waged in "L'Aurore" was marked by acuteness as well as by a frank expression of opinion; other articles by him on the Jewish question have appeared in the "Siècle" and "Le Soir."

S. M. Bl.

DREYFUS, CAPTAIN ALFRED. See Dreyfus Case.

DREYFUS, FERDINAND: French politician and deputy; born at Paris May 5, 1849. He became editor of the "Siècle," and was elected by the Republican party (March, 1880) as district deputy of Rambouillet (Seine-et-Oise). He was reelected in August, 1881, but lost his seat in 1885, and was defeated again in 1889. He is the author of the "Manuel Populaire du Conseiller Municipal" (Paris, 1884).

S. V. E.

DREYFUS, FERDINAND-CAMILLE: French politician; born in Paris Aug. 19, 1851. After a classical and commercial education he prepared himself for the Ecole Polytechnique, but on the outbreak of the Franco-Prussian war left his studies to serve as a volunteer. In 1873 he became editor of "L'Avenir de la Sarthe," and served five months in prison for opposing the dictatorship of MacMahon. He afterward controlled "Le Libéral de la Vendée." In 1879 he became chief of the bureau of the financial under-secretary, and later represented the government at the Brussels Exhibition.

Becoming editor of "La Lanterne" in 1882, he founded two years later "Le Matin." In Dec., 1882, he was chosen to represent the Gros-Caillon quarter in the Paris Municipal Council, and was reelected in 1884. Dreyfus in this position showed a remarkable aptitude for finance. In Oct., 1885, he was elected deputy by the department of the Seine, and was reelected, for the Twelfth District, in 1889, in opposition to a Boulangist candidate. A radical, with wide schemes of reform, Dreyfus sat with the Extreme Left. He was appointed a member of the army commission, and also on that of espionage. He has fought many duels, one with the late Marquis de Morès, the anti-Semite. His publications include: "Une Dictature" (Le Mans, 1874); "Giboyer à Saint-Pélagie" (Paris, 1875); "L'Evolution des Mondes et des Sociétés" (Paris, 1888); "Les Traités de Commerce" (Tours, 1879); "Le Tunnel du Simplon et les Intérêts Français" (Paris, 1879); "L'Angleterre, son Gouvernement, ses Institutions" (Paris, 1881); "La Guerre Nécessaire, Réponse d'un Français à M. de Bismarck" (Paris, 1890). Dreyfus is also secretary and part founder of "La Grande Encyclopédie." He is a member of the Legion of Honor.

DREYFUS, SAMUEL: Rabbi of Mülhausen, Alsace; died June, 1870. He was one of the earliest pupils of the rabbinical school of Metz, having been among the first matriculates. An excellent Hebraist and preacher, he was ambitious to become a chief rabbi. He did not succeed, however, and felt his disappointment keenly. He published several works, contributed to "L'Univers Israélite," and founded a monthly, "Le Lien," which was not successful, and was soon discontinued.

DREYFUS CASE ("L'Affaire Dreyfus"): Memorable trials of Capt. Alfred Dreyfus, officer in the French army, in 1894 and 1899, involving political complications and convulsions of the highest importance, rending France into two sections, and attracting the attention of the whole civilized world for nearly two years. As probably the best-known "cause célèbre" of modern times, which involved the fate of ministries, and even of presidents of the French republic, it deserves full treatment in these pages, as the Jewish aspects of the case were from first to last its leading feature.

difficile à se procurer et je ne puis
l'avoir à ma disposition que très peu
de jours. Le ministre de la guerre

THE BORDEREAU, UPON WHICH DREYFUS WAS CONVICTED (Continued on following page).

I. The virulence of the passions aroused by the case was indirectly the result of the spread of ANTI-SEMITISM in France, due partly to the failure of the Union Générale—a Catholic banking establishment which aimed at superseding Jewish finance—in 1885, and partly to the publication of Drumont's book "La France Juive" in 1886. But the case itself was more immediately the outcome of the continuous attack made upon the presence of the Jews as officers in the French army by Drumont and others in the journal "La Libre Parole," founded with the help of the Jesuits in 1892.

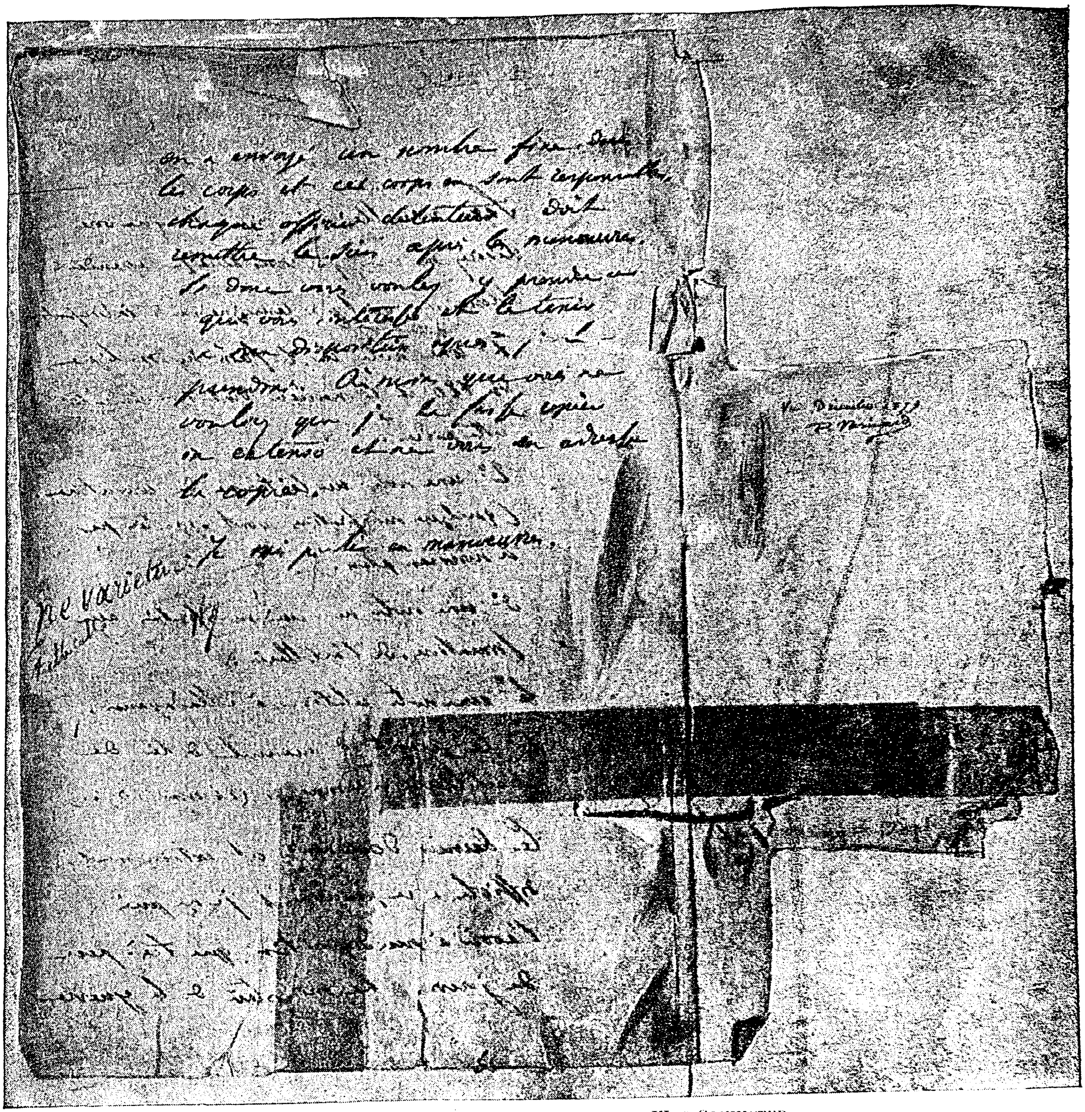
Origin of the Case.

The articles of the "Libre Parole," which denounced the Jewish officers as intriguers and future traitors, led a Jewish captain of dragoons, CRÉMIEU-

Foa, to declare that he resented as a personal insult the slanderous assault made upon the body of Jewish officers. He fought a duel, first with Drumont, then with Lamase, under whose name the articles had appeared. It had been agreed that the report of the proceedings should not be made public. The brother of Crémieu-Foa, following the advice of Captain Esterhazy, one of the Jewish captain's seconds, communicated the report to the "Matin."

Crémieu-Foa and Mayer Duels.

The Marquis de Morès, who had been chief second of Lamase, and was a well-known anti-Semite and famous duelist, held Captain Mayer, chief second of Crémieu-Foa, responsible for the inadvertence. Though totally innocent of any part in the matter, Mayer accepted a challenge from the marquis. The duel was fought on June 23, the Jewish captain being mortally wounded at the second attack; he died a few days after the duel. Owing to the sensation that was caused by this event, the "Libre Parole" thought it wise to stop the campaign against the Jewish officers until further orders. But the desired result had been obtained: anti-Semitism had received its baptism of blood.



The Bordereau, upon Which Dreyfus Was Convicted.

II. Among the military services reorganized after the war of 1870 was that of the Intelligence Department (the secret service), which had as one of its principal occupations to watch the German embassy. The ambassador, Count Münster, owing to an affair involving the German military attaché, had promised on his word of honor that for the future his attachés should have nothing to do with the French officers or officials. But it was known at the Intelligence

The Intelligence Department.

Office that the new attaché, Colonel Schwarzkoppen, probably without the knowledge of the ambassador, continued to entertain paid spies, being in direct correspondence with the War Office in Berlin. According to indications furnished by a former Spanish military attaché, Señor Val Carlos, Schwarzkoppen and the Italian military representative, Colonel Panizzardi, had come to an agreement to exchange the results of whatever discoveries they might make; and to keep an eye on this plotting the Intelligence Office succeeded in securing the help of a charwoman employed at the German embassy, a Madame Bastian, who collected carefully all the scraps of paper, torn up or half-burnt, which she found in the waste-paper baskets or in the fireplace of Schwarzkoppen's office, put them all in a paper bag, and once or twice a month took them or had them taken to the "section de statistique." There the pieces were carefully fitted together and gummed. By this means it was ascertained that since 1892 certain secret information concerning national defense had leaked out. Some large plans of the fortress at Nice had been given up by an individual who was alluded to in one of Schwarzkoppen's notes as "that scoundrel D——" (*ce canaille de D*——), a poor wretch who had assumed the name of "Dubois." The fragments of another memorandum of Schwarzkoppen conveyed the idea that the German attaché had found an informant who pretended to bring him the documents just as issued from the War Office. There was therefore a wolf in the fold; Val Carlos was certain of it.

The Bordereau.

During the summer of 1894 there arrived at the Intelligence Office a document which was far more alarming than any which had preceded it, and which was credited to the German embassy. This was the anonymous letter which has since become celebrated under the name of the "bordereau." This letter, written on so-called "papier pelure" (thin foreign note-paper), ruled in squares and almost transparent, was torn from top to bottom in two places, but was otherwise intact. The writing was upon the two sides of the first page. According to the official version, which was long believed to be the true one, the paper had arrived by the usual means, through Madame Bastian; but the appearance of the document, which was hardly torn, makes this story unlikely. It would appear from other disclosures that the letter was taken intact from the letter-box of Colonel Schwarzkoppen in the porter's lodge at the embassy, and brought to the office by an agent named Brucker, who had formerly acted as a go-between for Madame Bastian and the Intelligence Office. The documents which the letter announced as being sent off did not reach the War Office; and the envelope of the letter has never been produced. Here is the text of this famous document:

"Being without information as to whether you desire to see me, I send you nevertheless, monsieur, some interesting information, viz.:

"1. A note concerning the hydraulic brake of the 120, and the way this gun is managed.

[The reference is to the hydropneumatic brake of the gun called "120 court." It was a heavy field-piece, recently brought into use; the mechanism of the brake which overcame the recoil of the gun was a profound secret.]

"2. A note upon the 'troupes de couverture' (some modifications will be carried out, according to the new plan [of mobilization No. xiii.]).

[The troops called to the frontier at the commencement of mobilization are referred to. They were destined to "cover" the concentration of the rest of the army; hence their name.]

"3. A note concerning a modification in the formations of artillery.

[Most likely the "formations de manœuvre," which were just about to be altered by the new regulations.]

"4. A note relative to Madagascar.

[The War Office was preparing an expedition destined to conquer that island.]

"5. The proposed 'manuel de tir' of field-artillery (March 14, 1894).

"This document is exceedingly difficult to get hold of, and I can only have it at my disposal for a very few days. The minister of war has distributed a certain number of copies among the troops, and the corps are held responsible for them.

"Each officer holding a copy is required to return it after the maneuvers.

"Therefore if you will glean from it whatever interests you, and let me have it again as soon as possible, I will manage to obtain possession of it. Unless you would prefer that I have it copied in extenso, and send you the copy.

"I am just starting for the maneuvers."

Date of Writing and of Delivery.

This communication was clearly written during the month of August, 1894, at the latest. For the "manuel de tir" for field-artillery is the résumé of the methods designed to regulate the actual firing of ordnance on the battle-field; this actual shooting, of course, never takes place during the grand maneuvers in September, but only during the "écoles à feu," which begin in May and finish in August. It is these "écoles à feu" that the writer incorrectly designates as "maneuvers," and it is probable that the word has the same meaning in the last sentence of the letter.

It seems evident that the bordereau was handed over to Major Henry, who, with Major Cordier, was then assisting Colonel Sandherr, the head of the Intelligence Office. According to General Mercier, the letter in question arrived at the office with other documents whose dates ranged from Aug. 21 to Sept. 2; it is probable that Henry kept it in his possession a considerable time, which makes it the more surprising that he did not recognize the writing—in no way disguised—of one of his former fellow soldiers, Major Esterhazy. It was not until Sept. 24 that he spoke concerning the document to his fellow workers and to his chief, Colonel Sandherr, who immediately apprised the head of the staff, General de Boisdeffre, and the secretary of war, General Mercier. The feeling was intense. The informant of the German military attaché was a French officer; still further, they concluded from the tone of the letter that he was a staff-officer. Nothing justified this last supposition. On the contrary, the wording of the bordereau, technically and grammatically incorrect; the difficulty which the author had in procuring the "manuel de tir" (which was distributed freely among the staff); the small importance which his correspondent appeared to attach to his disclosures, often leaving him for a considerable time "without information"—everything would have shown to unprejudiced minds how unreasonable it was to attribute the bordereau to a staff-officer. Nevertheless, this fixed idea, this "first falsehood," suggested perhaps by the previous warnings of Val Carlos, was

The Search for the Handwriting.

accepted without discussion; so that from the very commencement the investigations were started on a false scent. At first no result was obtained from an examination of handwritings in the bureaus of the department. But on Oct. 6 Lieutenant-Colonel d'Aboville suggested to his chief, Colonel Fabre, the idea that the bordereau, dealing as it did with questions which were under the jurisdiction of different departments, must be the work of one of the officers going through their "stage" (*i.e.*, staff-schooling), they being the only men who passed successively through the various branches to complete their military education; moreover, as, out of the five documents mentioned, three had reference to artillery, it was probable that the officer belonged to this branch of the army. The circle thus limited, it only remained to consult the list of the "stage" officers on the staff who had come from the artillery. While looking through it, the two colonels came to a halt before the name of a Jewish officer, Captain Dreyfus. Colonel Fabre, in whose office he had been during the second quarter of 1893, remembered having given him a bad record on the report of Lieutenant-Colonel Roget and Major Bertin Mourot; Dreyfus had given these gentlemen the impression (upon the most superficial grounds) of being presuming and overbearing, of neglecting the routine of service to go into matters which were kept secret. Fabre and D'Aboville immediately began to search for papers bearing the writing of Dreyfus; by a strange fatality it showed a likeness to the writing of the bordereau; these officers, inexperienced and prejudiced, mistook a vague resemblance for real identity.

Alfred Dreyfus.

III. Alfred Dreyfus, born at Mülhausen in Alsace on Oct. 10, 1859, was the third son of a manufacturer, Raphael Dreyfus (native of Rixheim in the Haut-Rhin), who managed an important spinning-factory at Mülhausen. He had three brothers (James, Matthew, and Léon) and three sisters. When France lost Alsace by the treaty of Frankfort, the Dreyfus family, like many others at the same period, divided into two parts. The eldest son, James, remained alone at Mülhausen to manage the factory; the others chose to take up their abode in France, and soon settled in Paris. Alfred entered the Polytechnic School, the training-school of French officers, in 1878. He left there a student-officer of artillery, then passed through the Ecole d'Application at Fontainebleau, and afterward through the garrisons of Le Mans and of Paris, where his reports showed him to be the best lieutenant of his section of field-artillery. Promoted captain (second in command) in 1889, he remained for some months at the School of Pyrotechnics at Bourges; the following year he married Lucy Hadamard, daughter of a wealthy diamond-merchant, and passed with success the difficult examination for the Ecole Supérieure de Guerre, which he entered with the number 67. There he felt his ambition awaken, worked with tremendous ardor, and gained a considerable number of ranks. At the examination on leaving the school (1892) his friends expected to see him rank among the very first, and, consequently, be attached to the general staff. However, one of the members of the jury, General Bonnefond, under the pretext that "Jews were not desired" on the staff, lowered the total of his marks by making a very bad report; he did the same thing for another Jewish candidate, Lieut. E. Picard. Informed of this injustice, the two officers lodged a protest with the director of the school, Gen. Lebelin de Dionne, who expressed his regret for what had occurred, but was powerless to take any steps in the matter. Notwithstanding all drawbacks, Dreyfus graduated ninth, a fact which opened the doors of the general staff to him.

Appearance and Character.

From the end of 1892 to September, 1894, Dreyfus went through his "stage" in the Staff Office, receiving excellent reports on all hands, except from Colonel Fabre. From Oct. 1, 1894, he went through a "stage" in a body of troops, the Thirty-ninth Regiment of the line, in Paris. His personal characteristics, little fitting him to command, and his slightly foreign accent, combined to prejudice people against him; he had also a rather haughty demeanor, associated little with his military companions, and appeared rather too self-confident. But his comrades and superiors, without being much attached to him, recognized his keen intelligence, his retentive memory, his remarkable capacity for work; he was known as a well-informed officer, a daring and vigorous horseman, with decided opinions, which he knew how to set forth skilfully and to uphold under discussion. In short, he was a brilliant and correct officer, and seemed marked out for a glorious future. Added to all this, he possessed a comfortable private fortune (which brought him an income of $5,000 or $6,000 a year) soundly invested in his brothers' business; he was without any expensive vices, if not without failings, and was leading a settled life. It is difficult to imagine what motive could possibly have incited him to the vile traffic of which he was destined to be suspected.

His patriotic sentiments were those of a soldier and an Alsatian emigrant—that is to say, fervent almost to Jingoism. He had also come under the influence of the Boulangist movement, which, for many of his equals, meant revenge on Germany.

Only the most rabid anti-Semitism could have originated the idea that this Alsatian Jingo was a traitor. Even the wording of the bordereau, if read calmly, should have shown the absurdity of this supposition; for no artilleryman could have committed such gross blunders in expression. And how could Dreyfus in August or September, 1894, possibly have written, "I am just starting for the maneuvers," since that year none of the "stage" officers went to the maneuvers, having been officially advised by a circular on May 17 not to do so?

Without pausing to consider these conclusive objections, Fabre and D'Aboville hastened to communicate their "discovery" to General Gonse, deputy-chief of the staff, and to Colonel Sandherr, an anti-Semite of long standing, who exclaimed, "I ought to have suspected it!" General de Boisdeffre, informed in his turn, told the story to the secretary of war. General Mercier had held this office since December, 1893. Brought face to face with the bordereau, his

Action of Mercier.

The Experts in Handwriting.

main idea was that whatever there was to be done must be done quickly, because, if the affair came to be known before he had taken any steps in the matter, he would be reproached for having shielded a traitor. This fear, and also the unavowed hope of being able to pose, by the capture of the new "Judas," as the savior of his country, decided his plan of action: once started there was no turning back—he was forced to go on to the bitter end. For the sake of appearances, however, he sought the opinion (Oct. 11) of a small council formed of the president of the cabinet (Charles Dupuy), the minister of foreign affairs (Hanotaux), the keeper of the seals (Guérin), and himself. The council only authorized him to proceed to a careful inquiry; he ordered an examination by an expert in handwriting. The matter was entrusted to Gobert, an expert of the Bank of France, who had been recommended to him some days previously by the keeper of the seals. With great conscientiousness Gobert pointed out the striking differences between the writing of the bordereau and that of the documents which were given to him for comparison, the "personal folio" of Dreyfus, from which his name had been erased but the dates left, so that it was easy to identify him from the army list; there were some letters which struck the experienced eye at once, such as the open *g* (made like a *y*) and the double *s* made in the form *ſs*, features which were to be found only in the bordereau. Gobert concluded (Oct. 13) "that the anonymous letter might be from a person other than the one suspected." This opinion, too discreetly worded, was pronounced "neutral"; a second inquiry was called for, and this time a functionary was chosen whose qualifications for the task were doubtful—Alphonse Bertillon, head of the "service de l'identité judiciaire" at the Prefecture of Police, whom Gobert had already entrusted with certain photographic enlargements of the bordereau. This improvised graphologist, to whom the guilt of the suspected man was spoken of as certain, as established by other irrefutable signs, sent in his report the same day. His inference was as follows: "If we set aside the idea of a document forged with the greatest care, it is manifestly evident that the same person has written all the papers given for examination, including the incriminating document." Sheltered by this opinion, Mercier no longer hesitated to order the arrest of Dreyfus, of whose guilt he had been persuaded from the first. The arrest was conducted in a melodramatic fashion, according to the plans of Major Du Paty de Clam, who, as an amateur graphologist, had been initiated from the very beginning in all the details of the affair.

The Arrest.

Dreyfus was ordered to appear before the minister of war on the morning of Oct. 15, in mufti, under pretense of an "inspection of the 'stage' officers." He went without suspicion in answer to this summons. Introduced into the bureau of the head of the staff, he found himself in the presence of Du Paty and of three persons, also in civil dress, whom he did not know at all; they were Gribelin (the archivist of the Intelligence Office), the "chef de la sûreté," Cochefert, and the latter's secretary. While awaiting the general, Du Paty, pretending that he had hurt his finger, asked Dreyfus to write from his dictation a letter which he wished to present for signature. The wording of it was most extraordinary; it was addressed to an unknown person, and asked him to send back the documents which had been lent to him by the writer before "starting for the maneuvers"; then followed the enumeration of these documents, taken word for word from the bordereau. Du Paty had flattered himself that the culprit—and he had no doubt that Dreyfus *was* the culprit—on hearing this list, which put, so to speak, his crime before his eyes, would burst out with an overwhelming confession; a loaded revolver lay on a table to allow him to execute justice upon himself.

Asseverations of Innocence.

Things did not turn out quite as Du Paty had expected. Dreyfus, strange as the missive was, wrote tranquilly on under the major's dictation. There was a moment, however, when Du Paty, who was closely watching him, fancied he saw his hand tremble, and remarked sharply upon it to Dreyfus, who replied, "My fingers are cold." The facsimile of the letter which has since been published shows not the least sign of disturbance of any kind in the writing, hardly even a slight deviation of one line. After having dictated a few more lines, during which, he himself owns, "Dreyfus entirely regained his composure," he ceased the experiment, and placing his hand heavily on the captain's shoulder, he cried with a voice of thunder: "In the name of the law I arrest you; you are accused of the crime of high treason!" Dreyfus, in his stupefaction, hardly found articulate words to protest his innocence. He pushed away indignantly the revolver offered to him. He allowed himself to be searched without resistance, saying: "Take my keys, examine everything in my house; I am innocent." Du Paty and his associates then held a summary examination; without showing him a single document, they were content with assuring him that a "long inquiry" made against him had resulted in "incontestable proofs" which would be communicated to him later on. Then he was given into the hands of Major Henry, who had heard all that had taken place from the next room, and whose mission it was to deliver him over to the military prison of Cherche-Midi. In the cab that took them there, Dreyfus renewed his protestations of innocence, and asserted that he had not even been told what were the documents in question, or to whom he was accused of having given them.

At Cherche-Midi Dreyfus was turned over to the governor of the prison, Major Forzinetti, who had received orders to keep his incarceration a profound secret, even from his chief, General Saussier—an unheard-of measure. Apparently, the minister had still some doubts as to the guilt of Dreyfus, and did not wish to publish his arrest until the inquiry should have furnished some decisive proofs.

IV. The conduct of the inquiry was entrusted to Major Du Paty de Clam. Immediately after the arrest he went to the house of Madame Dreyfus, told

The Search for Proofs.

her of it, and ordered her, under the most terrible threats, to keep the matter secret, even from her brothers-in-law. He then devoted himself to a minute search of the rooms, which furnished no incriminating evidence whatever: no suspicious document, not a shred of "papier pelure" (foreign note-paper) was found—nothing but accounts regularly kept and testifying to a mode of life in accordance with the resources of the household. A similar search made in the house of M. Hadamard (Dreyfus' father-in-law) ended in the same failure.

Du Paty repeatedly visited Dreyfus in prison. He made him write standing up, seated, lying down, in gloves—all without obtaining any characteristics identical with those of the bordereau. He showed him loose fragments of a photograph of that document, mixed up with fragments and photographs of Dreyfus' own handwriting. The accused distinguished them with very little trouble. Du Paty questioned him without obtaining any other result than protestations of innocence broken by cries of despair. The suddenness of the catastrophe, and the uncertainty in which he was left as to its cause, reduced the wretched man to such a terrible state of mind that his reason was threatened. For several days he refused to take any food: his nights passed like a frightful nightmare. The governor of the prison, Forzinetti, warned the minister of the alarming state of his prisoner, and declared to General de Boisdeffre that he firmly believed he was innocent.

Not until Oct. 29 did Du Paty show the entire text of the bordereau to Dreyfus, and then he made him copy it.

The prisoner protested more forcibly than ever that it was *not* his writing, and regaining all the clearness of his intellect when faced by a definite accusation, tried to prove to his interlocutor that out of five documents mentioned in the bordereau, three were absolutely unknown to him.

Renewed Examination by Experts.

He asked to see the minister: consent was given only on condition that "he start on the road to a confession!" In the mean time writing-experts had proceeded with further examinations. Bertillon, to whom the name of the prisoner had now been revealed, set to work again. To explain at the same time the resemblances and the differences between the writing of Dreyfus and that of the bordereau, he supposed a most intricate system: Dreyfus, he thought, must have imitated or traced his own handwriting, leaving in it enough of its natural character for his correspondent to recognize it, but introducing into it, for greater safety, alterations borrowed from the hands of his brother Matthew and his sister-in-law Alice, in one of whose letters they had discovered the double *s* made as in the bordereau! This is the hypothesis of "autoforgery," which he complicated later on by a supposed mechanism of "key-words," of "gabarits," of measurements by the "kutsch," of turns and twists.

Bertillon's provisional report, submitted on Oct. 20, inferred "without any reservation whatever" that Dreyfus was guilty. Mercier, ill-satisfied with this lucubration, had the prefect of police appoint three new experts, Charavay, Pelletier, and Teyssonnières; Bertillon was put at their disposal to furnish them with photographic enlargements.

Pelletier simply studied the bordereau and the documents given for comparison, and concluded that the writing of the bordereau was in no way disguised, and that it was *not* that of the prisoner.

The two others, influenced by Bertillon, declared themselves, on the contrary, in favor of the theory of identity. Teyssonnières, an expert of no great repute, spoke of feigned writing. Charavay, a distinguished paleographer, judged the prisoner guilty, unless it was a case of "sosie en écritures"—a most extraordinary resemblance of handwriting. He also spoke of simulation to explain away the palpable differences. On Oct. 31 Du Paty finished his inquiry, and handed in his report, which, while bringing charges against Dreyfus, left it to the minister to decide what further steps should be taken in the matter.

The Parisian Press.

But at this moment General Mercier was no longer free to decide; the press had come upon the scene. On Oct. 28 Papillaud, a contributor to the "Libre Parole," received a note signed "Henry"—under which pseudonym he recognized without hesitation the major of that name; "Henry" revealed to him the name and address of the arrested officer, adding falsely, "All Israel is astir."

The very next day the "Libre Parole" narrated in carefully veiled words the secret arrest of an individual suspected of espionage. Other newspapers were more precise; on Nov. 1 Drumont's special edition announced in huge type the arrest of "the Jewish officer A. Dreyfus"; there was, it declared, "absolute proof that he had sold our secrets to Germany"; and what was more, he had "made full confession." All this was very awkward for General Mercier; he was in a corner. If ever he had had the idea of dropping the case, it was too late now; he would have hazarded his position as a minister by doing so. He summoned a council of ministers, and and, without revealing any other charge than that concerning the bordereau, declared that the documents mentioned in the memorandum *could* only have been procured by Dreyfus. The ministers, most of whom now heard the story for the first time, unanimously decided to institute proceedings. The papers were at once made over to the governor of Paris, who gave the order to investigate (Nov. 3).

No sooner had the name of Dreyfus been pronounced than the military attachés of Germany and Italy—to whom it was new—began to wonder if by chance he had been in direct correspondence with the War Office of either country. They made inquiries at Berlin and at Rome, and received answers in the negative. In his impatience, Panizzardi had telegraphed in cipher on Nov. 2: "If Captain Dreyfus has had no intercourse with you, it would be to the purpose to let the ambassador publish an official denial, in order to forestall comments by the press." This telegram, written in cipher, and of course copied at the post-office, was sent to the Foreign Office to be deciphered. The first attempt left the last words uncertain; they were thus translated: "our secret agent is warned." This version, communicated to Colonel Sandherr, seemed to him a new proof against Dreyfus. But a few days later the real interpretation was discovered, of which Sandherr himself established the accuracy by a decisive verification. From that time it became morally impossible to bring home to Captain Dreyfus any document which would infer that the traitor was in communication with Panizzardi.

Judicial Inquiry.

The judicial inquiry had been entrusted to Major Bexon d'Ormescheville, judge-advocate of the first court martial of the department of the Seine. He failed to discover a single new fact. The comrades of Dreyfus, feeling that things were going against him, remembered, or thought they remembered, that in his past conduct he had shown certain signs of immoderate curiosity, of "strange action." One officer was sure that he had lent him the "manuel de tir" for several days, but that was in July, whereas the bordereau was now believed to have been written in April! An agent named Guénée, charged by Major Henry with the task of inquiring into the question of his morals, picked up in different bars and cafés a collection of tales which represented Dreyfus as a gambler and a libertine, whose family had been obliged several times to pay his debts. But another inquiry by the Prefecture of Police showed the inanity of these allegations: Dreyfus was unknown in gambling-houses, and Guénée's informants had confused him with one of his numerous Parisian namesakes! The alleged treason was without support; without any visible motive; without precedent of any kind; without psychological or moral probability; the accusation rested solely on a scrap of paper which two experts out of five had refused to recognize as having been written by Dreyfus.

Public Opinion.

But public opinion had already condemned him. The press, misinformed, magnified the crime; notwithstanding the semi-official notes that reduced it to an unimportant communication of inoffensive documents, it was understood that Dreyfus had delivered up the secret of mobilization, and thereby exposed the system of national defense. All the treachery that had remained untraced, all the arrests of French agents abroad, were laid at his door. People were indignant that the penalty of death for political crimes (and treason was considered as such) had been abolished by the constitution of 1848; even death seemed too light a punishment for such a wretch. The only excuse that they found for him was but a further insult: it was his race which had predisposed him to commit an act of treason, the "fatalité du type."

The yellow press, which let loose its fury against Dreyfus, in the beginning did not spare the minister of war. It was looked upon as a crime that during a fortnight the arrest had been kept a secret, doubtless in the hope of being able to hush up the affair; he had been in league with "the Jews," he was still negotiating with them! Mercier was not the man to brave these attacks. In the same manner as the arraignment had been imposed upon him by "La Libre Parole," he understood now that the condemnation of Dreyfus was for him simply a question of political life or death; convinced or not, he determined to establish the man's guilt at any cost. On Nov. 28, in defiance of the most elementary usages, he declared in an interview with the "Figaro" that Dreyfus' guilt was "absolutely certain." Then, aware of the defects of D'Ormescheville's "proofs," he ordered that a secret dossier should be prepared by collecting from the drawers of the Intelligence Department whatever documents concerning spies could more or less be ascribed to Dreyfus. This dossier, revised and put into a sealed envelope by Mercier himself, with the cooperation of Boisdeffre and of Sandherr, was to be communicated only to the judges in the room where they held their deliberations, without either the accused or his counsel having been able to take cognizance of it or to inquire into the allegations—a procedure worthy of the Inquisition.

As soon as it had become known that Mercier had decided to go to the bitter end, there was a change in the language of the demagogues regarding him. "He has certainly done something for his country," they said. "One must be for Mercier or for Dreyfus," proclaimed General Rin. And Cassagnac, who, as a personal friend of Dreyfus' lawyer, maintained some doubts as to his guilt, summed up the situation in these words: "If Dreyfus is acquitted, no punishment would be too severe for Mercier!"

The Trial.

Thus stated, the question went beyond the intelligence and the courage of the military judges; there could be no doubt about the issue. The report of Major d'Ormescheville, handed in on Dec. 3, was prejudiced and illogical; out of a heap of "possibilities" and numberless insinuations, he vainly tried to deduce a proof of some sort. Edgar Demange, whom the Dreyfus family had chosen as their lawyer, accepted this task only on the condition that the perusal of the papers should convince him of the emptiness of the accusation; he was convinced. His absorbing idea was to obtain a public hearing; he promised on his honor not to raise, in that case, any delicate questions which might lead to a diplomatic contest. The brothers of Dreyfus and certain statesmen made urgent application in the same direction. All was in vain. The private hearing having been decided on in the minister's own mind, as being required by "state policy," he announced this conviction to the president of the court martial; such an announcement was equivalent to an order.

The case began on Dec. 19 at Cherche-Midi, and lasted four days. Seven judges, not one of them an artilleryman, composed the court; the president was Colonel Maurel. From the start the commissary of the government, Major Brisset, demanded a secret trial. The protests of Demange, who endeavored at least to make it known that the accusation was based on a single document, were overruled by the president, and a secret trial was unanimously agreed to. In the court-room there remained, besides the judges, only the accused and his attorney, the prefect of police Lépine, and Major Picquart, entrusted with the duty of giving an account of the proceedings to the head of the staff and to the minister. The case dragged along with hardly any incident worthy of remark. The "colorless" voice of Dreyfus, his unsympathetic appearance, his military correctness bordering on stiffness, weakened the effect of his persistent denials. On the other hand, the "moral proofs" would not bear discussion. Du Paty got entangled in his description of the scene of the dictation; Bertillon brought forward a revised and much enlarged edition of his report, the *supposed* defense of Dreyfus being represented in the form of a strange fortress, of which each bastion was an argument on handwriting! The only testimony which produced any impression was that of Major Henry. After his first statement he asked to be recalled. Then, in a loud voice, he declared that long before the arrival of the bordereau an honorable person (meaning Val Carlos) had warned the Intelligence Department that an officer of the ministry, an officer of the second bureau, was betraying his country. "And that traitor, there he is!" With his finger he pointed out Dreyfus. And when the president asked him if the "honorable person" had named Dreyfus, Henry, not drawing back even from a false oath, stretched out his hand toward the crucifix and declared, "I swear it!"

The last hearing (Dec. 22) was devoted to the public prosecutor's address and to the pleading of Demange, who strove for three hours to prove that the very contents of the bordereau showed that it could not be the work of Dreyfus. In his reply, Brisset, abandoning the moral proofs, was satisfied with asking the judges to take their "magnifying-glasses." A calm listener, Major Picquart, imagined then that the result was very doubtful unless help came from the secret dossier. This dossier was given up, still sealed, by Major Du Paty (who was ignorant of the exact contents) to Colonel Maurel, and the latter immediately entered the room where the judges were deliberating on the case, and communicated it to his colleagues. The recollections of the military judges being rather vague on the subject, it has not been possible to reconstitute with certainty the substance of the portfolio. It is known, however, that it included at least the document "canaille de D . . ." (a commonplace initial which it was absurd, after Panizzardi's telegram, to attribute to Dreyfus), and a sort of military biography of Dreyfus, based on, but not identical with, a memorandum from Du Paty, who had been told to make the various documents of the secret dossier coincide with one another. This biography represented Dreyfus as a traitor by birth, having commenced his abominable calling on his first entry into the service; at the school at Bourges it would appear that he had delivered up to the Germans the secret of the melinite shell!

Among the other papers of the secret dossier may be mentioned the fragments of Schwarzkoppen's note alluding to an informant who pretended to take his knowledge from the ministry, and, according to Commander Freystaetter, the *first and false interpretation* of Panizzardi's despatch! After judgment had been pronounced the dossier was given back to Mercier, who had it pulled to pieces, and later on destroyed the biographical notice. But, contrary to instructions, Major Henry reconstituted the secret dossier, added to it Du Paty's explanatory note (which last was destroyed by Mercier in 1897), and locked it in the iron chest where Picquart afterward found it. Allusion has been made several times (since 1894) to a second dossier, "ultra-secret," which was composed of photographs of papers stolen from, and then given up to, the German embassy; namely, seven letters from Dreyfus, and one said to be from the Emperor of Germany to Count Münster, naming Dreyfus. If such a dossier was ever in existence, it certainly contained nothing but a mass of ridiculous forgeries.

The conviction of the judges, already more than half decided by the experts and by Henry, could not withstand this new assault. Dreyfus was unanimously pronounced guilty; the sentence was transportation for life to a fortress, preceded by military degradation. Upon hearing this decision, which was communicated to him by the clerk of the court, the unhappy man, who firmly believed that he would be acquitted, stood as if struck by a thunderbolt. Taken back to prison, he was seized with a fit of despair, and begged for a revolver. Forzinetti, who had not lost faith in his innocence, succeeded with great difficulty in calming him. More than that, the heroic and touching letters from his wife made him accept life as a duty he owed to his own family.

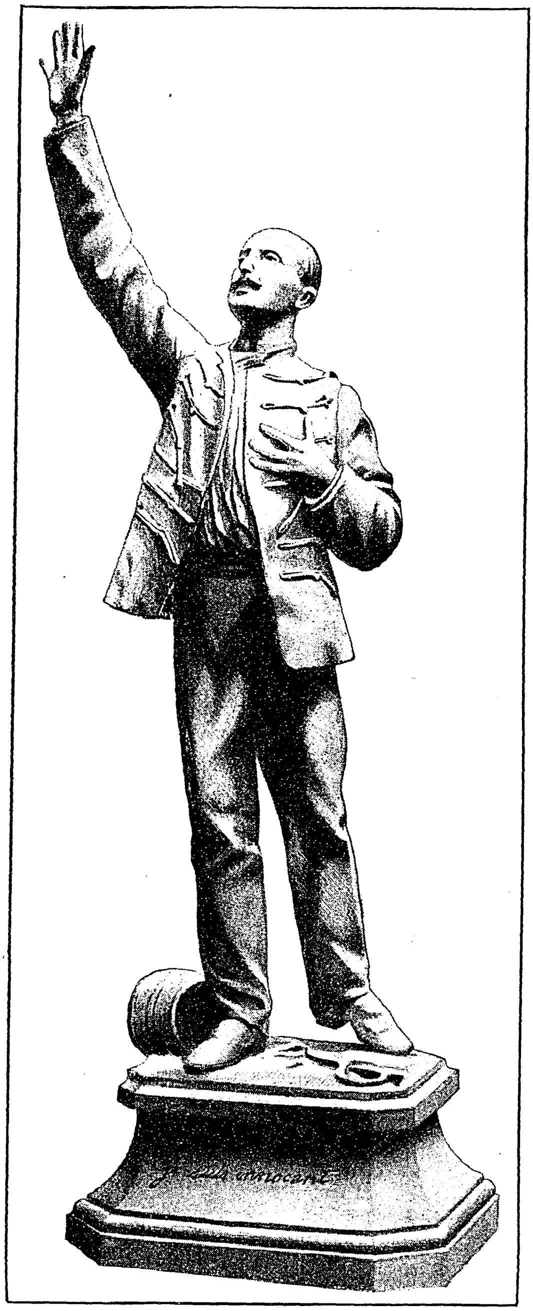
V. The appeal of Dreyfus to the military court of revision—a simple formality—was rejected on Dec. 31. The same day the condemned man received a visit from Du Paty de Clam, who had been sent by the minister of war with the mission to declare to Dreyfus that if he would only begin to make a confession, and reveal exactly the nature of his indiscretions, he might obtain a mitigation of his sentence. Dreyfus answered that he had nothing to confess, nothing to reproach himself with, not even the smallest attempt at holding out a bait; he only asked that the investigations might be continued so as to discover the real criminal. Du Paty, somewhat moved, said to him on going out: "If you are innocent, you are the greatest martyr of all time." Dreyfus wrote an account of this interview to the minister; he finished with these words: "Once I am gone, let them go on searching; it is the only favor I ask."

The Degradation.

The military degradation took place on the Champ de Mars on Jan. 5. Dreyfus drank the cup of bitterness to its very dregs. During the parade of "execution" he preserved an attitude wholly military which shocked some of the onlookers. But when General Darras had pronounced the accustomed formula, he cried out in a loud voice: "You are degrading an innocent man! Long live France! Long live the army!" He repeated this cry while the adjutant on duty was tearing off his stripes and breaking his sword, and again while passing before the crowd, which was shrieking that he should be put to death, and before the journalists, who yelled at the new Judas.

If the unanimous verdict of seven judges dissipated the doubts that might have existed among a portion of the public, the reiterated protestations of the condemned man were of a nature to make them spring to life again. The report was then spread about that he had made a confession. While waiting for the parade, locked up with Lebrun Renault, the captain of gendarmerie on service, he was supposed to have said: "The minister knows that I am innocent; and that, *if I have given up any documents to Germany*, it was only to get more important ones in return; before three years are over the truth will be known." This tale had its origin in the obscure or unintelligent account which Lebrun Renault had rendered of his conversation with Dreyfus; in reality, the latter had merely related his interview with Du Paty and once more protested his innocence. Lebrun Renault himself, in an interview which he granted to some one at a ball at the Moulin Rouge, related, in the words of Dreyfus, the origin of the bordereau, but of confession not a word. However that may be, this idle talk, changing as it passed from lip to lip, greedily welcomed by the newspapers, made the staff uneasy, because it brought into the case the German embassy, which just at this time was showing signs of indignation. In short, General Gonse called on Lebrun Renault and took him successively to General Mercier and to the president of the republic, Casimir-Perier, who severely reprimanded him, and imposed upon him absolute silence for the future.

In the mean time serious complications with Germany were expected. The German government, once assured by Schwarzkoppen and by the War Office at Berlin that Dreyfus was utterly unknown to them, had thought it a matter of honor to protest publicly against the statements in the newspapers which persisted in bringing Germany into the case.



Capt. Alfred Dreyfus.
(From the statuette by Caccia.)

Germany Concerned.

Several times after the arrest of Dreyfus semi-official notes of protest had been inserted in the different organs of the press; Count Münster, the German ambassador, denied to Hanotaux that Germany had taken any part in the affair. These declarations, politely received, left the French government absolutely skeptical, for it knew from a positive source the origin of the bordereau.

A note from the Havas Agency (Nov. 30) put the foreign embassies out of the case; but the press continued to incriminate Germany, whereupon, at the beginning of December, Münster, by the express order of the German emperor, invited Hanotaux to call at the embassy and repeated his protestations. The report was spread abroad that Germany had demanded and obtained the restoration of the documents which established the traitor's guilt! Provoked by the persistence of these attacks, the German embassy inserted in the "Figaro" of Dec. 26 a fresh notice denying formally that it had had with Dreyfus "the least intercourse, either direct or indirect." And as this notice also seemed to have little or no effect, the emperor telegraphed to Münster on Jan. 5 to go personally to Casimir-Perier and say, "If it be proved that the German embassy has never been implicated in the Dreyfus case, I hope the government will not hesitate to declare the fact." Otherwise, it was given to be understood that the ambassador would leave Paris. This despatch, communicated by Münster to Dupuy, who was then temporarily engaged at the Foreign Office, had the appearance of an ultimatum. The president of the republic up to this time had known very little of the details of the case, and had been kept by Hanotaux in complete ignorance of Münster's previous communications; but now he had the contents of the legal documents shown to him. After having read them, he granted to Münster the audience which had been requested. Then, considering honesty to be the best policy, he asserted very frankly that the criminal letter had been taken from the German embassy, but that it was not an important document and that nothing proved that it had been "solicited."

Resignation of Casimir-Perier.

After having referred the matter to Berlin, Münster consented to the drawing up of a notice by the Havas Agency which once more put all the embassies out of the case, and terminated the incident (Jan. 9, 1895). Mercier did not long enjoy his triumph. On Jan. 15, under pretext of a ministerial crisis, in which his friends abandoned him, Casimir-Perier handed in his resignation as president of the republic; the mysteries and the unpleasantnesses of the Dreyfus affair had not a little to do with hastening this determination. At the congress called together to elect a new president, printed ballots were passed about in favor of General Mercier; one handbill even set him down as the savior of the republic for having had the traitor Dreyfus condemned in spite of all difficulties. He obtained three votes! Ribot, entrusted by the new president (Félix Faure) with forming a cabinet, did not appeal to an assistant so compromising as Mercier; the office of minister of war was given to General Zurlinden.

Two days later, during the night of Jan. 17, in bitterly cold weather, Dreyfus, dragged from the prison of La Santé, was transferred by rail to La Rochelle, thence to the island of Ré, into a military reformatory. The populace, recognizing him, followed him thirsting for his blood; an officer struck him; stoical, he forgave his tormentors, whose indignation against such a traitor as he was supposed to be he understood and shared.

At Ré, as at La Santé, he was authorized to receive a few visits from his wife, but the authorities managed, by the most minute precautions, to make them as short and as painful as possible.

A law passed ad hoc had just instituted as the place of transportation for political crimes the Iles du Salut off French Guiana, instead of the peninsula of Ducos (New Caledonia), where, it was said, supervision was difficult; it has been suggested that in reality vengeance was being taken upon Dreyfus for his obstinate refusal to confess his crime. The notice drawn up by the War Office for the use of his guardians denounced him as "a hardened malefactor, quite unworthy of pity." This word to the wise was to be only too well understood and carried out. On the evening of Feb. 21 the unhappy man, taken hurriedly from his cell, was embarked on the "Ville de St. Nazaire," which was to carry him across the Atlantic to a place of exile.

Devil's Island.

VI. The Iles du Salut, where Dreyfus was landed on March 15, compose a small archipelago situated twenty-seven miles off Cayenne, opposite the mouth of the River Kourou. Notwithstanding its name ("salus," health) it is a most unhealthy region. Incessant heat, continuous rain for five months of the year, the effluvia arising from the marshy land are sufficient to undermine the strongest constitution. The smallest island of the group, Devil's Island, which had until Dreyfus' arrival been occupied by a leper hospital, was destined to be his abode. On the summit of a desolate rock, far from the few palm-trees on the shore, a small hut of four cubic yards was built for him; night and day an inspector stood guard at the door, with strict orders not to address a word to him. In the daytime the prisoner was permitted to exercise until sunset in a small rectangular space of about two hundred yards, near his hut.

Treatment in Prison.

Madame Dreyfus had asked permission to follow her husband to his place of exile; the wording of the law seemed to point to it as her right; nevertheless, the ministry refused her even this favor, alleging that the rules to which the condemned man was subject were incompatible with it. Dreyfus had therefore no company except that of his jailers. The governor of the islands, although distrustful, showed at least some humanity; but the head warder Lebars, who had received instructions from the minister to enforce harsh measures, went even beyond his orders. Badly fed, especially at the beginning of his term of exile, obliged to do all sorts of dirty work, living by day among vermin and filth, and by night in a state of perpetual hallucination, Dreyfus, as was to be expected, soon fell a prey to fever. The doctor interfered and obtained an amelioration of the rules. Dreyfus himself, clearly convinced that it was his duty to live, fought energetically against the lethargy which forced itself upon him. To keep up his physical strength he compelled himself to take regular exercise; to prevent his intellect from getting dulled he had books sent to him which he read and reread, wrote out résumés, learned English, took up his mathematical studies again; to employ the long hours of leisure that still remained he kept a diary. He could correspond with only his own family, and even to them might refer only to domestic matters. His letters, examined by the administration, were one long cry for justice. Sometimes he begged his wife to go, leading her children by the hand, to entreat for justice from the president of the republic. He wrote himself to the president, to Du Paty, to General Boisdeffre, without receiving any replies. Little by little the horrible climate did its work. Fever consumed him; from never employing it he almost lost the power of speech; even his brain wasted away. On May 5, 1896, he wrote in his diary: "I have no longer anything to say; everything is alike in its horrible cruelty." His gentleness, his resignation, his exact observance of all rules had not been without making an impression on his jailers; several of them believed him innocent; no punishment for rebellion against discipline was inflicted on him. Early in Sept., 1896, the false report of his escape was set afloat by an English paper. This rumor was really circulated by Matthew Dreyfus in the hope of shaking up the sluggishness of public opinion and to prepare the way for the pamphlet of Bernard Lazare demanding a fresh hearing of the case of 1894. Although contradicted at once, the rumor roused public opinion. Rochefort and Drumont proclaimed the existence of a syndicate to free him, published some false information about the rules that the condemned man had to obey, affirmed that with a little money it was the easiest thing imaginable to accomplish his rescue. The colonial secretary, André Lebon, took fright. It did not matter that these tales were absolutely without foundation, that the prisoner was of irreproachable conduct; to make assurance doubly sure, he cabled instructions to the governor of Guiana to surround the outer boundary of Dreyfus' exercising-ground with a solid fence, and in addition to the sentinel at the door to post one outside. Until this work was finished, the prisoner was to be secured day and night in his hut, and at night, until further orders, he was to be subjected to the penalty of the "double buckle": gyves in which the prisoner's feet were shackled, and which were then firmly fixed to his bedstead, so that he was condemned either to absolute immobility or to dreadful torture. This order, barbarous and, moreover, illegal, was strictly carried out, to the equal astonishment of Dreyfus and of his warders. For twenty-four sultry nights the wretched man was upon the rack; for two months he was not allowed to stir out of his disgusting and suffocating hovel. When the cabin was opened once again it was encircled by a wall which hid even the sky; behind this wall his exercising-ground, hemmed in by a wooden fence over six feet high, was no more than a sort of narrow passage from which he could no longer see the sea.

The poor victim was now utterly depressed. On Sept. 10, 1896, he stopped keeping his diary, writing that he could not foresee on what day his brain would burst! His family was no longer allowed to send him books. The letters of his wife were forwarded to him no longer in the original hand, but in copies only. On June 6, 1897, a sail having been sighted during the night, alarm-guns were fired, and Dreyfus, startled in his sleep, saw his keepers with loaded rifles ready to shoot him down if he made one suspicious movement. In August the authorities ascertained that the heat and moisture in his stifling hut were really unbearable, and had the man transferred to a new cabin, larger than the first, but quite as dismal. A signal-tower was erected close by mounted with a Hotchkiss gun. Happily for Dreyfus his moral fortitude, after a temporary eclipse, had recovered its strength; and from Jan., 1898, the letters of his wife, although containing no particulars, roused his hopes by a tone of confidence which could not be mistaken. Eventful incidents had taken place during those three awful years.

Matthew Dreyfus.

VII. The family of Dreyfus, faithful to the charge he had left them when he went away, had not ceased their efforts to discover the real culprit. Matthew Dreyfus undertook the direction of these researches; he worked with an untiring devotion, an affecting zeal, and a fruitful imagination that was not always seconded by sound judgment. The primary elements of a thorough inquiry were lacking; the Staff Office, far from seconding his efforts, had him jealously watched; intriguers set traps for him; he felt that he was spied upon; at his first false step the new law of espionage—a very strict and extremely elastic one—would find an excuse for getting him out of the way. As for the politicians whom he tried to interest in his cause, the greater part refused to enter into the question, or, intimidated by the minister of war, gave up the search after the very first investigation. The only threads he had to guide him were some of his brother's notes and a copy of the indictment that had been deposited abroad. He knew, further, from Dr. Gibert of Havre, to whom Félix Faure had confided the matter, that Dreyfus had been condemned on the evidence of a secret document, which had not been shown to the counsel for the defense. This information was corroborated by some remarks made by certain of the judges of 1894. One of them spoke of the case to an old lawyer named Salles, who repeated the conversation (on Oct. 29, 1896) to Demange. Before that Hanotaux had confided to Trarieux, and Trarieux to Demange, that the conclusive document contained the initial of Dreyfus' name (meaning the paper "canaille de D . . ."). Matthew Dreyfus started with the idea, plausible but false, that this document really had reference to the author of the bordereau, and that the initial was not fictitious; and from that idea arose his persistent search for an officer the initial letter of whose name was "D." He followed up several clues, none of which bore any result. The light was to come from an altogether different quarter.

Colonel Picquart.

Not long after the condemnation of Dreyfus the Intelligence Office had changed its chief. Sandherr, incapacitated by general paralysis, had resigned his post simultaneously with his assistant, Cordier (July 1, 1895); Major Henry, who aspired to the position although he did not speak a single foreign language, was not appointed Sandherr's successor; but in his stead Major Picquart, who had been ordered to report the debates in the Dreyfus case in order to send an account of the proceedings to the minister and to the chief of the staff, received the appointment. He was a young and brilliant officer, of Alsatian origin, hard-working, well-informed, with a clear intellect, a ready speech, and who, moreover, appeared to share all the prejudices of his surroundings; he was promoted to the rank of lieutenant-colonel on April 6, 1896, and was the youngest officer of that grade in the army. Immediately upon his arrival at the office he reorganized the service, which the prolonged illness of Sandherr had caused to be neglected. He required in particular that the paper bags in which Madame Bastian continued to collect the waste papers from the German embassy, and which she brought to Major Henry, should pass through his hands before being confided to Captain Lauth, whose work it was to piece and paste them together. These bags, however, never brought anything of importance to light, though they showed that the leakage of secret information had not ceased since the condemnation of Dreyfus.

The chief of the staff, Boisdeffre, on transferring the service into Picquart's hands, had declared to him that in his opinion the Dreyfus affair was not definitely settled. They must be on the lookout for a counter-attack from the Jews. In 1894 they had not been able to discover a motive for the treason; there was therefore every reason for continuing the researches to "strengthen the dossier."

In the month of March, 1896, Henry, much occupied by the state of his mother's health and by different matters he had to attend to in the country, made only short and infrequent visits to Paris.

One day he sent Madame Bastian's paper bag—particularly bulky on this occasion—to Picquart without even having had time to glance at it. Picquart, likewise without inspecting it, passed it on to Lauth. Some hours afterward the latter came back much affected, bringing to his chief a pneumatic-tube telegram (commonly known as a "petit bleu"), the fragments of which he had found in the bag; pasted together, they contained the following words:

The "Petit Bleu."

> To Major Esterhazy, 27 Rue de la Bienfaisance,
> Paris.
>
> *Sir*: I am awaiting first of all a more detailed explanation [than] that which you gave me the other day on the subject in question. Consequently I beg you to send it to me in writing that I may judge whether I can continue my relations with the firm R. or not.
> *C.*

The writing of this note was disguised, but the place it came from left no room for doubting that it emanated from Colonel Schwarzkoppen; the office possessed another document, known to have been written by him, and signed with the same initial "C." The "petit bleu" had not been sent by mail; apparently, after having written or dictated it, Schwarzkoppen reconsidered his determination and had thrown the note into the waste-paper basket, taking care to tear it up into very small pieces—there were more than fifty of them; he had foreseen neither the tricks of Madame Bastian nor the patient industry of the Intelligence Department.

"It is fearful," said Captain Lauth on delivering it. "Can there possibly be another one?"—meaning another traitor among the officers. Picquart could share only the same impression; but determined upon avoiding the indiscretions and the blunders which had been committed in 1894, he resolved to undertake personally a secret inquiry before spreading abroad the news of his discovery. He put the "petit bleu" away in his strong-box, and shortly afterward had photographs of it taken by Lauth, in which he strove to remove the traces of the rents.

The object of this precaution, which was afterward laid to Picquart's charge as a crime, was both to render the reading of the photograph more easy and to prevent the officers (necessarily numerous) who would handle these photographs later on, from guessing immediately the origin of the document.

VIII. Picquart began by getting information about the personality of Major Esterhazy, to whom the "petit bleu" was addressed. To this end he applied to his friend Major Curé, one of Esterhazy's fellow soldiers. The details he gathered through this source were not creditable to Esterhazy.

Major Esterhazy.

Ferdinand Walsin Esterhazy, born in Paris on Dec. 16, 1847, belonged to an illustrious Hungarian family, a branch of which had established itself in France at the end of the seventeenth century, and the head of which had organized there a regiment of hussars. His great-grandmother had an illegitimate son, who was brought up under the name of Walsin, but who, after she had acknowledged him during the Revolution, took the name of Esterhazy and settled as a merchant at Nîmes. Two of the sons of this man followed a military career with distinction, and both became generals of division during the Crimean war. One of these two (Ferdinand) was the father of Major Esterhazy. Left an orphan at an early age, after some schooling at the Lycée Bonaparte in Paris, Ferdinand Esterhazy disappeared in 1865. In 1869 he was found engaged in the Roman legion, in the service of the pope; in 1870, in the foreign legion, which his uncle's influence enabled him to enter with the rank of ensign; he then assumed the title of count, to which it is claimed he was not entitled. At this time came the war with Germany. There being a dearth of officers after the catastrophe of Sedan, Esterhazy was able to pass muster as a French lieutenant, then as a captain, and went through the campaigns of the Loire and of the Jura. Though set back after peace was declared, he still remained in the army. In 1876 he was employed to translate German at the Intelligence Office; then, under various pretexts, at the War Office. He never appeared in his regiment at Beauvais, and for about five years led a life of dissipation in Paris, as a result of which his small fortune was soon squandered. In 1881 he was attached to the expedition sent to Tunis, and did nothing whatever to distinguish himself in it; employed later in the Intelligence Department, then in the native affairs of the regency, on his own authority he inserted in the official records a citation of his "exploits in war," the falseness of which was recognized later. Returning to France in 1885, he remained in garrison at Marseilles for a long time. Having come to the end of his resources, he married in 1886; but he soon spent his wife's dowry, and in 1888 she was forced to demand a separation. In 1892, through the influence of General Saussier, Esterhazy succeeded in getting a nomination as garrison-major in the Seventy-fourth Regiment of the line at Rouen. Being thus in the neighborhood of Paris, he plunged afresh into a life of speculation and excess, which soon completed his ruin.

His inheritance squandered, Esterhazy had tried to retrieve his fortune in gambling-houses and on the stock-exchange; hard pressed by his creditors, he had recourse to the most desperate measures. Having seconded Crémieu-Foa in his duel with Drumont in 1892, he pretended that this chivalrous rôle had made his family, as well as his chiefs, quarrel with him; he produced false letters to support his words, threatened to kill both himself and his children, and thus obtained, through the medium of Zadoc Kahn, chief rabbi of France, assistance from the Rothschilds (June, 1894); this did not prevent him from being on the best of terms with the editors of "La Libre Parole," even to the extent of supplying them with information.

His Career.

For an officer who had come from the ranks Esterhazy's military advancement had been unusually rapid: lieutenant in 1874, captain in 1880, decorated in 1882, major in 1892, his reports were generally excellent. Nevertheless, he considered himself wronged. In his letters he continually launched into recrimination and abuse against his chiefs; he went still further, bespattering with mud the whole French army, and even France herself, for which he predicted and hoped that new disasters were in store. Such a man, a regular landsknecht of yore, without a single spark of patriotism, was destined to become the prey of treason. Fate decreed that he should sink to the degradation of a paid spy; he sank. In Tunis he was judged to have become too intimate with the German military attaché; in 1892 he was the object of an accusation made to the head of the staff, General Brault; in 1893 he entered Schwarzkoppen's service.

According to later disclosures he received from the German attaché a monthly pension of 2,000 marks ($480). He furnished him in the first place with some interesting information about the artillery; he pretended that he got his information from Major Henry, who had been his comrade in the Intelligence Office in 1876. But Henry, limited to a very special branch of the service, was hardly in a position to furnish details on technical questions; Esterhazy must have had other informants, who were not necessarily his accomplices—for example, his intimate friend Maurice Weil, district orderly officer to General Saussier, and a distinguished military writer and a regular news-hunter. The information furnished by Esterhazy soon became of so little importance that Panizzardi (to whom Schwarzkoppen communicated it without divulging the name of his informant) began to doubt his qualifications as an officer; to convince the attaché it was necessary for Esterhazy to show himself one day in uniform, galloping behind a well-known general! The garrison-major, being entrusted with the duties of mobilization, is always well informed in regard to the details of this subject; but as far as the artillery is concerned (the improvements in which department especially interested the German officials), the difficulties which Esterhazy experienced in getting information were very apparent in the text of the bordereau, and in the attempt which he made (in Aug., 1894) to borrow the "manuel de tir" from Lieutenant Bernheim (of Le Mans), whose acquaintance he had made by chance.

Picquart did not at once fathom all the details of Esterhazy's relations with the German attaché, of which the "petit bleu" had given him but a glimpse. Picquart did know, however, all the corruptions and scandals of Esterhazy's private life, the suspicions of malversation (in Tunis) and of espionage which had tainted his character; he learned further—a characteristic detail—that Major Esterhazy, a neglectful officer, constantly absent from his garrison, showed himself, nevertheless, extremely fond of getting information on confidential military questions, particularly those concerning mobilization and artillery. He diligently frequented artillery tests, and when he could not succeed in being ordered to attend the "écoles à feu," went there at his own expense. This is what he had done notably in 1894, the year of the bordereau. He also borrowed books and documents, and had them copied by his secretaries.

Picquart's Investigations.

IX. At first Picquart did not establish any connection in his own mind between the "petit bleu" and the bordereau; he simply thought he was on the track of a fresh traitor, and hoped to catch him in the act. Different circumstances prevented him from pursuing his investigations. Besides, Esterhazy had been warned, and not only was it impossible to surprise him in any compromising visit, but he showed himself openly at the German embassy, to which he went to ask for a passport for his colonel. He even carried his audacity to the point of insisting that he be allowed to return to the War Office, in preference to the Intelligence Department, and was able to urge his request through the highest parliamentary and military influence. However, a fresh incident occurred to strengthen Picquart's suspicions. The French military attaché at Berlin, Foucault, informed him of a curious conversation he had had with one Richard Cuers, a spy who wavered between France and Germany. Cuers told Foucault that Germany had never employed Dreyfus—that the only French officer who was in Germany's pay was a major of infantry who had furnished some sheets from lectures held at the "école de tir" at Châlons.

Picquart acquainted General de Boisdeffre with his discovery, and upon the order of the general and of the minister of war, General Billot, he was directed to continue his inquiry as quietly as possible; still, Boisdeffre seemed from that time little disposed to recommend judicial proceedings. If Esterhazy were really a traitor, he would be dismissed from the army quietly; another Dreyfus affair was to be avoided. Picquart now set to work in earnest to get samples of Esterhazy's handwriting, and he succeeded in obtaining two letters which the major had written to the chiefs of Billot's cabinet. On looking at them Picquart was startled; the writing was identical with that of the bordereau attributed to Dreyfus. He wished to make sure of his impression, so he showed some photographs of these letters (from which he had removed the proper names) to Du Paty and Bertillon. Du Paty declared: "They are from Matthew Dreyfus"; Bertillon said: "It is the writing of the bordereau." And when Picquart assured him that these letters were of recent date, he declared: "The Jews have, for the past year, been training some one to imitate the writing; he has succeded in making a perfect reproduction." The connection between the letters and the bordereau flashed across the mind of the colonel in all its terrible certainty. If Esterhazy, as the handwriting seemed to indicate, were the author of the latter, Dreyfus must be the victim of a judicial error. For a moment he clung to the idea that he must have further proofs of Esterhazy's guilt; where could they be if not in the secret dossier, communicated to the judges in 1894, and in which he had also placed blind confidence, without the least knowledge of its contents? This dossier, notwithstanding Mercier's orders, had not been destroyed; it was still in Henry's safe.

The Secret Dossier.

During the latter's absence Picquart had the dossier brought to him by Gribelin, the keeper of the records; he turned it over in feverish haste, but this masterpiece of the "bureau" contained absolutely nothing that applied, or could be made to apply, to Dreyfus. Of the only two papers that were of any importance, one, the document "canaille de D . . .," did not in any way concern any officer, but only a poor scribbler who had assumed the name of Dubois, while the other, the memorandum of Schwarzkoppen, almost certainly pointed to Esterhazy. As to Du Paty's commentary, this was a mass of wild suppositions (Aug. 31). Later this commentary was claimed by General Mercier as his private property and quietly destroyed by him.

Much concerned, but still confident of the honesty of his chiefs, Picquart immediately drew up a report and brought it to Boisdeffre, who ordered Picquart to go and relate his story to the deputy-chief of the staff, General Gonse. The general received the colonel, listened without flinching to his revelations, and concluded that they must "separate the two affairs," that of Dreyfus and that of Esterhazy. These instructions, confirmed by Boisdeffre, seemed absurd to Picquart, since the bordereau established an indissoluble bond between the two cases; he should have understood from that moment that his superiors had determined not to permit at any cost the reopening of the Dreyfus affair.

Father Du Lac.

Boisdeffre had for spiritual adviser Father Du Lac, an influential Jesuit, who appears to have played an important though secret part in all this story. Perhaps the officers would not admit even among themselves that under their pompous formulas was hidden, above everything, the fear of seeing their positions in the military world melt away if they publicly confessed the part they had taken in the error and illegal act of 1894; for the innocence of Dreyfus once established, the communication of the secret dossier would appear to everybody what it was in reality—an odious crime. As to General Billot, to whom Picquart, following Boisdeffre's orders, made a complete report of the case, he appeared deeply moved. He had not the same reasons as his companions to defend the judgment of 1894 at any cost, for he had had nothing to do with it, and learned for the first time the story of the secret dossier. But this soldier-politician lived in terror of his surroundings; he did not dare to see the affair clearly, and took for his motto the words of the comedy: "Je suis leur chef; il faut que je les suive" (I am their leader; I am bound to follow them).

Against the young chief of the Intelligence Office there was from this time forward on the part of his superiors secret strife which was bound to end in rupture, but of which Picquart was for a long time unconscious. He did not perceive that in his own office he was jealously spied upon, opposed, and deceived by his fellow workers, Henry, Lauth, and Gribelin. One of them, Henry, had some mysterious motives besides the desire to please his superiors. Since 1876, when they had served together at the Intelligence Office, he had been the comrade, the friend, and even the debtor of Esterhazy, although he pretended to know very little about him. Between these two men there existed a bond the exact nature of which has remained unknown, but which must have been very powerful to involve Henry in the falsehood, deceit, and forgeries which were unveiled later. If it is not certain that Henry was Esterhazy's accomplice, it seems very probable that from the end of 1894 he knew him to be the author of the bordereau, and knew also that the traitor had him in his power.

X. In Sept., 1896, the rumor of the prisoner's escape brought the case abruptly back to public notice. The anti-Jewish press inveighed against the accomplices, the protectors of the traitor; a member of the Chamber, Castelin, announced that at the opening of the next session he would interpellate the ministry on this subject. Moreover, it was known at the Staff Office that the Dreyfus family was pursuing an inquiry and was getting ready to publish a pamphlet demanding the revision of the case.

The Castelin Interpellation.

Picquart, now that his eyes had been opened, was much preoccupied with all these plots. He believed Castelin to be working for the Dreyfus family. He had also been affected by a strange forgery, quite inexplicable to him, which had come into his hands early in September: a letter in a feigned handwriting, and in the style of a German, pretending to be addressed to Dreyfus by a friend, Weiss or Weill, and referring to imaginary "interesting documents" written in sympathetic ink, easily legible to expert eyes. This was probably the beginning of the plot to discredit Picquart, who insisted to Gonse that the initiative should come from the Staff Office. Gonse answered by vaguely advising him to act with prudence, and was opposed to the "expertises" in handwriting that the colonel demanded. In the mean time the bombshell burst. On Sept. 14 "L'Eclair" published under the title "The Traitor" a retrospective article which pretended to bring to light the real motives for the judgment of 1894. The article revealed for the first time the fact of the communication to the judges of a secret document, but this document—the letter "canaille de D . . ."—now became a "letter in cipher" in which the following phrase was found: "This creature Dreyfus is becoming decidedly too exacting." This article had been brought to "L'Eclair" by a contributor to the "Petit Journal," where Henry had some acquaintances; nothing further is known concerning it. Picquart attributed it to the Dreyfus family, and desired to take proceedings, which his chiefs would not authorize. This only caused him to insist more firmly that immediate steps should be taken. Then took place between General Gonse and Picquart this memorable dialogue:

> "What can it matter to you," said the general, "whether this Jew remains at Devil's Island or not?"
>
> "But he is innocent."
>
> "That is an affair that can not be reopened; General Mercier and General Saussier are involved in it."
>
> "Still, what would be our position if the family ever found out the real culprit?"
>
> "If you say nothing, nobody will ever know it."
>
> "What you have just said is abominable, general. I do not know yet what course I shall take, but in any case I will not carry this secret with me to the grave." ["Le Procès Dreyfus Devant le Conseil de Guerre de Rennes," I. 440, 441, Paris, 1900.]

From that day Picquart's removal was decided. He was authorized for the sake of appearances to continue his investigations concerning Esterhazy, but he was forbidden to take any decisive step, or, above all, to have the man arrested. With an adversary so cunning, ordinary measures—secret searches in his rooms, opening of his correspondence, examination of his desks—were of no avail, and never would be. For Esterhazy had been warned. He went to Drumont some time before the appearance of Lazare's pamphlet, and said that they desired to reopen the Dreyfus affair, and to involve him in it in order to retard his promotion.

Henry's Confirmatory Letter.

Meanwhile, Henry insinuated to General Gonse that it would be well to put the secret dossier (of the Dreyfus case) out of the way, for indiscretions might arise—perhaps had already arisen—because of it (an allusion to the article in "L'Eclair," which he wished to be attributed to Picquart). Gonse did not need to be told twice, and removed the dossier (Oct. 30). A very few days later Henry triumphantly brought him a letter from Panizzardi, in blue pencil, which, he said, he had just found among some scraps in Madame Bastian's paper bag (Oct. 31). It was thus worded:

> *My dear friend:* I have read that a deputy is going to ask several questions on the Dreyfus affair. If they request any new explanations at Rome, I shall say that I never had any dealings with this Jew. That is understood. If they question you make the same reply, for nobody must ever know what has happened to him. *Alexandrine.*

The writing was apparently Panizzardi's, and in order to compare it Henry produced an earlier letter, supposed to have been taken from the waste of the secret dossier, written with the same pencil, on the same sort of paper ruled in squares, and containing the same signature. In reality, the letter brought for comparison contained fraudulent additions hinting at a Jewish traitor, while the new document was a forgery from beginning to end, executed by one of Henry's customary forgers, probably Seeman, called Lemercier-Picard, who later admitted to Count Tornielli that he had written it. Gonse and Boisdeffre believed or pretended to believe in its authenticity, and likewise convinced General Billot thereof. When Colonel Picquart expressed his doubts to Gonse the latter answered: "When a minister tells me anything I always believe it."

On Nov. 6 the memoir which had been prepared by the Dreyfus family, and which had been written by Bernard LAZARE, appeared at Brussels. He laid bare the inconclusive character of the incriminating document (without, however, publishing it), confirmed the communication of the secret document, but affirmed, in opposition to "L'Eclair," that it bore only the initial "D" and not the name of "Dreyfus" in full. The pamphlet, distributed to the members of the Chamber, received from the press a cold welcome. But a few days later (Nov. 10) "Le Matin" published the facsimile of the famous bordereau attributed to Dreyfus. It became known later that it had been obtained from the expert Teyssonnières, who alone had kept the photograph of the bordereau confided to all the writing-experts in 1894. The publicity given to this facsimile would allow writing-experts all the world over to prove the differences that existed between the writing of the bordereau and that of Dreyfus; it might also meet the eyes of people who would recognize the writing of the true culprit, and that is exactly what happened. Esterhazy's handwriting was recognized particularly by Schwarzkoppen (who only then understood the drama of 1894), by Maurice Weil, and by a solicitor's clerk, the son of the chief rabbi Zadoc Kahn. The confusion at the Staff Office was now great; it grew worse confounded when Maurice Weil, one of Esterhazy's intimate friends, sent to the minister of war an anonymous letter which he had just received and which warned him that Castelin intended to denounce Esterhazy and Weil as accomplices of Dreyfus. The Staff Office pretended to recognize Picquart's hand in all these incidents, or at any rate to regard them as the result of his alleged indiscretions. His immediate departure was resolved upon. He had already been told that he would be sent to inspect the intelligence service in the east of France. Boisdeffre went with him to the minister, who rebuked Picquart soundly for having let information leak out and for having seized Esterhazy's correspondence without authorization. In recognition of his services in the past, he was not disgraced, but was ordered to set out immediately, and to resign his position to General Gonse. He did not protest, but started on Nov. 16. Two days later Castelin's interpellation, which had become a decided bugbear to the Staff Office, was made, but it failed of its purpose. Castelin demanded that proceedings should be instituted against the accomplices of the traitor, among whom he named Dreyfus' father-in-law Hadamard, the naval officer Emile Weyl, and Bernard Lazare. General Billot, who had addressed the Chamber before Castelin, affirmed the perfect regularity of the action of 1894, and made an appeal to the patriotism of the assembly to terminate a "dangerous debate." After a short and confused argument the Chamber voted an "ordre du jour" of confidence, inviting the government to inquire into the matter and to take proceedings *if there were cause.* A petition from Madame Dreyfus, invoking, with the support of the article in "L'Eclair," the communication of the secret document, was put aside by the judicial committee for want of sufficient proof.

Machinations Against Picquart.

XI. Meanwhile, under pretext of organizing the Information Department, Picquart was hurried off to Tunis, and kept out of prominence by being attached to the Fourth Regiment of sharpshooters in garrison at Susa. Gonse wrote to him letters dwelling upon the question of money, as if to suggest purchasing his silence. Picquart recorded in a codicil to his will the history of his discovery, which he intended for the president of the republic; in this way he was sure "not to take his secret with him to the grave."

Henry, though under the nominal direction of Gonse, had become the real head of the Intelligence Office, where he quietly prepared a whole series of forgeries, designed, when the opportunity presented itself, to crush Picquart if he ever attempted to cause trouble. After having put at rest the mistrust of his former chief by pretended protestations of devotion, in June, 1897, he suddenly flung off his mask. Picquart, irritated at continually receiving missives from the agents of his former service, wrote a rather hasty note to Henry, in which he denounced "the lies and the mysteries" with which his pretended mission had been surrounded during the past six months. Henry, after having consulted his superiors, answered, declaring that as far as "mysteries" were concerned he knew only that the following facts had been established against Picquart

Scheurer-Kestner's Inquiries.

by an "inquiry": (1) The opening of correspondence unconnected with the service. (2) A proposal to two officers to testify, should such action be necessary, that a paper, registered as belonging to the service, and emanating from a well-known person, had been seized in the mails—a reference to a suggestion of Lauth's to Picquart that the "petit bleu" addressed to Esterhazy should be stamped with the regular post-office stamp. (3) The opening of a secret dossier, followed by disclosures. This letter, to which Picquart replied by a brief protest, opened his eyes; he understood the plot that was being hatched against him, the dangers which threatened him for having been too discerning. He asked for leave, went to Paris, and disclosed his affair to his old friend and comrade Leblois, a lawyer. Without revealing to Leblois any secret document, even the "petit bleu," he told him that he had discovered Esterhazy's crime and the innocence of Dreyfus; he authorized him, in case of necessity, to inform the government, but absolutely forbade him to apprise either the brother or the lawyer of Dreyfus. Leblois did not long remain the only recipient of the secret. A few days later chance brought him in contact with one of the few statesmen who had shown any sympathy with the researches of Matthew Dreyfus—the Alsatian Scheurer-Kestner, former member of the Chamber of Deputies for Alsace and coworker with Gambetta, and now vice-president of the Senate and one of the most justly esteemed men of the Republican party. Since 1895 Scheurer-Kestner, induced by the deputy Ranc and by Matthew Dreyfus, had made some inquiries. In 1897 the friends of Dreyfus returned to the charge. Scheurer-Kestner was surprised to find that all the so-called moral proofs, the tales that were brought forward to explain the crime of Dreyfus, did not bear investigation. The expert Teyssonnières, sent to him by his friend and colleague Trarieux, former minister of justice, did not succeed in convincing him that the bordereau was in the writing of Dreyfus. In great distress, he went to tell his old comrade Billot of his suspicions; the general reassured him: a secret document discovered since the condemnation, at the moment of Castelin's interpellation, had removed all doubts; Billot related the substance of it to him without letting him see it. This "crushing blow," which he kept in reserve for the partizans of Dreyfus, was Major Henry's forgery.

Scheurer-Kestner was at this point of his inquiry when Leblois, who had met him at dinner one evening, conceived the idea of having recourse to him as the medium by which to save Dreyfus and, through Dreyfus, Picquart. Going to Scheurer-Kestner's house, Leblois told all he knew, and showed him Gonse's letters. Scheurer-Kestner was finally convinced, and swore to devote himself to the defense of the innocent (July 13, 1897). But he was much puzzled as to what course to pursue. Leblois had forbidden him to mention Picquart's name, and Picquart had forbidden that the Dreyfus family should be told. In this perplexity, born of the initial mistake of Picquart, Scheurer-Kestner pursued the most unlucky tactics imaginable; instead of quietly gathering together all his documents and uniting his forces with those of Matthew Dreyfus, he allowed the rumor of his convictions to be spread abroad, and thus put the Staff Office on the alert, gave them time to prepare themselves, and allowed the hostile press to bring discredit upon him and to weaken beforehand by premature and mutilated revelations the force of his arguments.

Tactics of the Staff Office.

Billot soon began to feel uneasy; he conjured his "old friend" to do nothing without having seen him; that is to say, until the end of the parliamentary recess. Scheurer-Kestner, without suspecting anything, gave him his word, leaving a clear field to Esterhazy's protectors. In the mean while this personage had been quietly dismissed from active service. Billot, who it is claimed looked upon him as "a scoundrel, a vagabond," perhaps even as the accomplice of Dreyfus, had indignantly opposed his readmission into the War Office. On Aug. 17 Esterhazy was put on the retired list "for temporary infirmities"; but, that done, there remained the prevention of his being "substituted" for Dreyfus. That it was Scheurer-Kestner's plan to demand this substitution, the Staff Office did not doubt for a moment, for Henry's secret police had followed Picquart to Leblois' house, and then Leblois to Scheurer-Kestner's. It was even fancied that Scheurer-Kestner was much more fully informed than was really the case. Toward the middle of October a meeting was held at the War Office, in anticipation of Scheurer-Kestner's impending campaign. Gonse, Henry, Lauth, Du Paty de Clam, were all present; the last, although having nothing to do with the Intelligence Office, had been summoned to it as the principal worker in the condemnation of Dreyfus, and as interested therefore more than any one in maintaining it. Gonse set forth the plot "of the Jews" to substitute for Dreyfus Esterhazy, an officer of doubtful character, but whom a minute inquiry had cleared of all suspicion of treachery: who was, however, a nervous man, and who, under the blow of a sudden denunciation, might lose his head and take flight or even kill himself; and that would mean catastrophe, war, and disaster. Esterhazy must then be warned, to prevent him from going quite mad. But how was it to be done? It was decided to send him an anonymous letter in order that he might take courage. Billot objected to this proceeding; it seems, however, that somebody disregarded the objection, for Esterhazy received (or pretended to have received) a letter signed *Espérance*, warning him that the *Dreffus* family, informed by a certain Colonel *Picart*, intended to accuse him of treason. One fact is certain—that he settled in Paris, went to see Schwarzkoppen, and told him that all was lost if he (Schwarzkoppen) did not go and declare to Madame Dreyfus that her husband was guilty; on the indignant refusal of Schwarzkoppen he threatened to blow his brains out. At the Staff Office Henry and Du Paty, understanding at once the wishes of Boisdeffre and of Gonse, resolved to join forces with Esterhazy. The keeper of the records, Gribelin, went in disguise to take a letter to Esterhazy fixing a rendezvous in the park of Montsouris. There, while Henry (fearing, as he said, recognition by his former comrade) kept watch, Du Paty, who was also disguised, told Esterhazy that he was known to be innocent, and that he would be defended on condition that he conformed rigorously to the instructions that would be given to him. After this interview Esterhazy went to Schwarzkoppen quite cheered up, and told him that the staff was entering into a campaign for his defense. A week later Schwarzkoppen had himself recalled to Berlin; it was the discreet but significant avowal that "his man was taken." Meanwhile Esterhazy, as agreed upon, was receiving his daily instructions from the Staff Office. Every evening from this time on Gribelin brought to him at the Military Club the program for the next day; Du Paty and Henry, whose connection with the affair Esterhazy soon knew, saw him several times, sometimes at the Montmartre cemetery, sometimes on the Pont d'Alexandre III. Later on, when these meetings were considered too dangerous, they corresponded with him through the medium of his mistress, of his lawyer, or of his cousin Christian.

Following instructions, Esterhazy wrote to Billot, ending his letter with the threat that if he were not defended he would apply to the German emperor. He wrote in the same strain to the president of the republic, claiming that a lady—afterward mysteriously referred to as the "veiled lady"—had given him a photograph of a very important document which Picquart had acquired from an embassy and which seriously compromised persons of high diplomatic rank. This braggadocio was taken so seriously that General Leclerc received an order at Tunis to question Picquart on having given to an outsider—the "veiled lady"—the "document of deliverance." Receiving no answer, Esterhazy, in his third letter (Nov. 5), virtually held the knife at the president's throat: the stolen document proved the rascality of Dreyfus; if he should publish it, it would be war or humiliation for France. This time they made up their minds to listen to him. General Saussier was charged with interrogating Esterhazy in regard to the "document of deliverance"; he obtained no details from him, but made him promise to send back the document to the minister. On Nov. 15 (the day when Matthew Dreyfus wrote his denunciation) it was "restored" to Saussier in a triple envelope, sealed with Esterhazy's arms: the "document of deliverance," as Esterhazy called it, was a photograph of the document "canaille de D . . ." There is nothing to prove that Esterhazy had ever had it in his hands. Billot acknowledged the receipt by the hand of his "chef de cabinet," General Torcy. By these barefaced stratagems Esterhazy and his defenders on the staff made certain of the complicity of the minister and of the president of the republic, while they compromised Picquart more deeply.

With the latter they proceeded to further measures. At the end of October Boisdeffre had ordered General Leclerc, commanding the corps of occupation in Tunis, to send Picquart to reconnoiter on the frontier of Tripoli, from which quarter pretended gatherings of the local tribes were reported. It was a dangerous region, where Morès had met his death; General Leclerc was astonished at the order, and, having heard from Picquart the cause of his disgrace, forbade him to go farther than Gabes. Some days later Picquart had to clear himself of the accusation of allowing a woman to purloin the "document of deliverance" of Esterhazy. Then, on Nov. 11 and 12, he received one after the other two telegrams worded: (1) "Arrest the demigod; all is discovered; very serious affair. Speranza." (2) "It has been proved that the 'bleu' was forged by Georges. Blanche." The obscure allusions and the names in these forgeries were derived from Picquart's private correspondence, which had been looked through, and were intended to produce the impression that Picquart was in some plot to release Dreyfus; the "demigod," it was pretended, referred to Scheurer-Kestner. The two telegrams, copied before they left Paris, had convinced the Sûreté Générale that Picquart was the moving spirit in the plot. On receiving them, and afterward an anonymous letter in the same style, Picquart sent a complaint to General Billot, and asked that inquiries be made regarding the author of these forgeries.

The "Speranza" and "Blanche" Telegrams.

During this time Scheurer-Kestner was being deceived by his "old friend" Billot. On Oct. 30 he had a long conference with Billot, at which he accused Esterhazy. Billot declared that in spite of persistent investigations nobody had been able to find any proofs against Esterhazy, but that there were positive proofs against Dreyfus. Scheurer-Kestner implored him to distrust suspicious documents, and finally gave him a fortnight in which to make an honest and thorough investigation, promising that he himself would not speak during that time.

Silence of Scheurer-Kestner.

He kept his word; Billot did not. During the fortnight not only was the collusion between the staff and the traitor fully organized, but the press, furnished with more or less news by the War Office, spoke openly of Scheurer-Kestner's futile visit to Billot and launched a veritable tempest against the "Jewish syndicate," which had bought a "man of straw" as a substitute for Dreyfus in order to dishonor the army. Scheurer-Kestner, patient but much distressed by the tempest, persisted in his fixed idea of acting only through the government. He saw Méline, the president of the council, several times, but Méline would have nothing to do with his dossier, and advised him to address to the minister of justice a direct petition for revision. This was not bad advice. According to the new law of 1895, a petition for revision founded on a new fact (discovered after the sentence) could only be submitted to the Court of Cassation by the keeper of the seals, after the latter had taken the advice of a special commission. The disposition of the minister (Darlan) was not unfavorable to the adoption of this course; and it is worthy of note that the new facts which were allowed later by the court were at that moment easy to establish; namely, the resemblance between Esterhazy's writing and that of the bordereau and the communication of the secret dossier to the judges.

The pursuit of such a course would also have had the advantage of taking the matter out of the hands of military justice and of placing it in those of the civil judges, who were less prejudiced. However, Scheurer-Kestner did not dare to pursue this course; he thought his documents not sufficiently complete. Official notes from the ministry (Nov. 6 and 9) stated the attitude which the government was resolved to take—it determined to respect the "chose jugée" (the matter adjudicated). As for the legal proceedings to secure revision, the notice added that Captain Dreyfus had been "regularly and justly" condemned—a formula which soon became the burden of General Billot's song. Matters might still have dragged on had it not been for chance. At the instance of the Dreyfus family, Bernard Lazare had prepared a second and more detailed pamphlet, in which had been gathered the opinions of a large number of French and foreign experts upon the writing of the bordereau as compared with that of Dreyfus. The unanimous conclusion of these experts was that the handwritings were not identical; but while some of them maintained that the writing of the bordereau was natural, others saw in it a forgery. At the same time that this brochure was published, Matthew Dreyfus ordered handbills reproducing in facsimile the bordereau and a letter of his brother's, which were offered for sale. One of these handbills fell into the hands of a stockbroker, Castro, who had had business relations with Esterhazy; he immediately recognized the bordereau as the writing of his former client, and informed Matthew Dreyfus of the fact. The latter hastened to Scheurer-Kestner and asked him: "Is that the same name?" "Yes," the latter replied (Nov. 11).

Conjunction of Matthew Dreyfus and Scheurer-Kestner.

For four days they hesitated as to the course to pursue, Scheurer-Kestner still persisting in keeping the fortnight's silence promised to Billot on Oct. 31. In the interim, by means of the press the public mind had been influenced by indications as to the real traitor and by counter-declarations by Esterhazy in "La Libre Parole" concerning the conspiracy of the Jews and of "X. Y." (Picquart).

On the night of Nov. 15, in a letter to the minister of war which was published at once, Matthew Dreyfus denounced "Count" Walsin Esterhazy as the writer of the bordereau and as the author of the treason for which his brother had been condemned.

Trial of Esterhazy.

XII. The hasty denunciation of Esterhazy by Matthew Dreyfus was a tactical though perhaps an unavoidable blunder. To accuse Esterhazy formally of the *treason* imputed to Dreyfus—and not simply of having written the bordereau (perhaps as a hoax or a swindle)—was to subject the revision of the case of 1894 to the preliminary condemnation of Esterhazy. With the staff and the War Office fully enlisted against Dreyfus, the court martial which Esterhazy himself at once demanded was of necessity a veritable comedy. Not only was the accused allowed his liberty until the last day but one, not only did his protectors in the Staff Office continue to communicate indirectly with him and to dictate the answers he should make, but the general entrusted with the preliminary as well as with the judicial inquiry, M. de Pellieux, showed him an unchanging friendliness and accepted without examination all his inventions.

Convinced of the guilt of Dreyfus through the assurances of the staff, and before long by Henry's forged document, Pellieux refused at the outset to examine the bordereau, on the subject of which there was "chose jugée." Even after the formal order to prosecute, an interpellation of Scheurer-Kestner to the Senate (Dec. 7) was necessary to induce General Billot to promise that all the documents, including the famous bordereau, should be produced for examination. On this occasion also, as he had done some days before in the Chamber of Deputies (Dec. 4), the minister did not fail to proclaim on his soul and conscience the guilt of Dreyfus, thus bringing to bear the whole weight of his high office on the verdict of the future judges of Esterhazy. Premier Méline, on his part, gained applause for declaring "that there was no Dreyfus affair," and the Chamber in its "ordre du jour" stigmatized "the ringleaders of the odious campaign which troubled the public conscience."

Attitude of the Press.

Against this "odious campaign" was set in motion a whole band of newspapers connected with the Staff Office, and which received from it either subsidies or communications. Among the most violent are to be noted "La Libre Parole" (Drumont), "L'Intransigeant" (Rochefort), "L'Echo de Paris" (Lepelletier), "Le Jour" (Vervoort), "La Patrie" (Millevoye), "Le Petit Journal" (Judet), "L'Eclair" (Alphonse Humbert). Two Jews, Arthur Meyer in "Le Gaulois" and G. Pollonnais in "Le Soir," also took part in this concert. Boisdeffre's orderly officer, Pauffin de St. Morel, was even caught one day bearing the "staff gospel" to Henry Rochefort (Nov. 16); nobody was deceived by the punishment for breach of discipline which he had to undergo for the sake of appearances.

An extraordinary piece of information—which was immediately contradicted—was printed by "L'Intransigeant" (Dec. 12–14); it was attributed to the confidences of Pauffin, and it dealt with the "ultra-secret" dossier (the photographs of letters from and to Emperor William about Dreyfus).

The Revisionist press, reduced to a small number of organs which were accused of being in the service of a syndicate, did not remain inactive. It consisted of "Le Siècle" (Yves Guyot, Joseph Reinach), "L'Aurore" (Vaughan, Clémenceau, Pressensé), and "Le Rappel," to which were joined later "La Petite République" (Jaurès) and "Les Droits de l'Homme" (Ajalbert). The "Figaro," losing most of its subscribers, changed its politics on Dec. 18, but became once more "Dreyfusard" after the discovery of Henry's forgery. "L'Autorité" (Cassagnac) and "Le Soleil" (Hervé de Kerohant) were the only newspapers among the reactionary press which were more or less in favor of revision. Some of these, falling into the trap that was laid for them, widened the scope of the debate and gave it the character of an insulting campaign against the chiefs of the army, which hurt the feelings of many sincere patriots and drove them over to the other side. Public opinion was deeply moved by two publications: one, that of the indictment of Dreyfus (in "Le Siècle," Jan. 6, 1898), which was absolutely remarkable for its lack of proof; the other ("Figaro," Nov. 28, 1897), that of letters written twelve years before by Esterhazy to his mistress, Madame de Boulancy, in which he launched furious invectives against his "cowardly and ignorant" chiefs, against "the fine army of France," against the entire French nation. One of these letters especially, which soon became famous under the name of the "lettre du Hulan" (Uhlan), surpassed in its unpatriotic violence anything that can be imagined.

The "Lettre du Hulan."

> "If some one came to me this evening," it ran, "and told me that I should be killed to-morrow as captain of Uhlans, while hewing down Frenchmen, I should be perfectly happy. . . . What a sad figure these people would make under a blood-red sun over the battle-field, Paris taken by storm and given up to the pillage of a hundred thousand drunken soldiers! That is the fête that I long for!"

Esterhazy hastened to deny the authorship of the letter, which was submitted to examination by experts. While silence was imposed on the officers of Esterhazy's regiment, suspicions were thrown on the defenders of Dreyfus. The director of the prison of Cherche-Midi, Forzinetti, who persisted in proclaiming his prisoner's innocence, was dismissed. But, above all, the Staff Office struggled to bring Picquart into disrepute. Scheurer-Kestner insisted on having his evidence; they were forced to bring him back from Tunis. The day before his arrival a search was instituted among his belongings, which was as fruitless as it was unusual; an officer escorted him from Marseilles to Paris (Nov. 25). General de Pellieux, who had been made to believe by a series of forgeries that Picquart had for some time been the moving spirit of the "syndicate," treated him more as the accused than as a witness; it was understood that he would soon be behind bolts and bars.

Ravary's Report.

The general entrusted with the investigation concluded that there was no evidence against Esterhazy. However, Esterhazy was instructed to write a letter asking as a favor to be brought up for trial, the rough copy of which was corrected by Pellieux himself. Accordingly General Saussier, governor of Paris, instituted a regular inquiry (Dec. 4). But the officer empowered to conduct it, Major Ravary, did so in the same spirit as Pellieux. Esterhazy's system of defense was a mixture of audacious avowals and ridiculous inventions. He acknowledged his relations with Schwarzkoppen, but gave to them a purely social character. The "petit bleu" was, according to him, an absurd forgery, highly improbable, and most likely the work of Picquart himself. He did not deny the striking resemblance between his writing and that of the bordereau, but explained it by alleging that Dreyfus must have fraudulently obtained one of his letters to imitate his handwriting and so incriminate him. As for the documents enumerated in the bordereau, Esterhazy denied that he could possibly have known them, especially at the time to which they now had agreed to assign the bordereau (April, 1894). He certainly had borrowed the "manuel de tir" from Lieutenant Bernheim of Le Mans, whom he had met at Rouen, but in the month of September; later on, he retracted and said, in agreement with Bernheim, that it was not the real manual, but a similar regulation already available in the bookstores.

This mass of deceptions, to which was added the romance of the "veiled lady"—supposed to be a mistress of Picquart—was taken seriously by Ravary. Three experts were found (Conard, Belhomme, Varinard) who swore that the bordereau was not in Esterhazy's hand, though apparently traced in part over his writing (Dec. 26). These men had to be coached by the staff. Du Paty writes to Esterhazy: "The experts have been appointed. You will have their names to-morrow. They shall be spoken to; be quiet!" Thereupon Ravary wrote out, or signed, a long report in which, after having given an exact summary of the charges set forth against Esterhazy, he concluded by saying that, while the private life of the major was not a model to be recommended "to our young officers," there was nothing to prove that he was guilty of treason. The bordereau was not in his writing; the "petit bleu" was not genuine. He stigmatized Picquart as the instigator of the whole campaign, and denounced his subterfuges and indiscretions to his superiors.

The Esterhazy Court Martial.

Ravary concluded that the case should be dismissed at once (Jan. 1). However, Saussier ordered the affair to be thoroughly cleared up before a court martial presided over by General Luxer. The hearing took place at the Cherche-Midi on Jan. 10 and 11, 1898. From the commencement the Dreyfus family, who had appointed two lawyers (Ferdinand Labori and Demange), were refused the right of being represented in court. The reading of the indictment, the superficial examination of Esterhazy (who contradicted himself several times), the testimony of the civil witnesses (Matthew Dreyfus, Scheurer-Kestner, etc.), were conducted in public; then a hearing behind closed doors was ordered, doubtless to stifle Colonel Picquart's evidence. The public knew nothing of Picquart's deposition, or of that of the other military witnesses, of Leblois, or of the experts, and nothing of the Revisionists' case in general. General de Pellieux, seated behind the judges, interfered more than once in the debates, and whispered to the president. Picquart was so harshly treated that one judge exclaimed: "I see that the real accused is Colonel Picquart!"

Finally, as everybody knew beforehand would be the case, Esterhazy was acquitted unanimously and acclaimed with frenzy by the "patriots" outside. Pellieux wrote to the "dear major" to stigmatize the "abominable campaign" of which he had been the victim, and to authorize him to prosecute those who dared to attribute the "Uhlan" letter to him. As to Picquart, he was, to begin with, punished with sixty days' imprisonment, being confined on Mont Valérien; it was understood that he would be arraigned before a council of inquiry (Jan. 13).

Emile Zola's "J'Accuse."

XIII. Esterhazy's acquittal closed the door on revision for the time being; but the Revisionists did not consider themselves defeated. For two months their ranks had been increased by a large number of literary men, professors, and scholars who had been convinced by the evidence given; it was one of these "intellectuels," the novelist Emile Zola, who took up the gauntlet. Almost from the first he had enlisted among the advocates of revision. He had written in the "Figaro" brilliant articles against the anti-Semites and in favor of Scheurer-Kestner, whom he termed "a soul of crystal." "Truth is afoot," he said; "nothing will stop her." On Jan. 13 he published in "L'Aurore," under the title "J'Accuse," an open letter to the president of the republic, an eloquent philippic against the enemies "of truth and justice." Gathering together with the prophetic imagination of the novelist all the details of a story of which up to then the outlines had hardly been discerned, he threw into relief, not without a good deal of exaggeration, the "diabolical rôle" of Colonel Du Paty. He charged the generals with a "crime of high treason against humanity," Pellieux and Ravary with "villainous inquiry," the experts with "lying and fraudulent reports." The acquittal of Esterhazy was "a supreme blow ["soufflet"] to all truth, to all justice"; the court of justice which had pronounced it was "necessarily criminal"; and he finished the long recital of his accusations with these words:

> "I accuse the first court martial of having violated the law in condemning the accused upon the evidence of a document which remained secret. And I accuse the second court martial of having screened this illegality by order, committing in its turn the judicial crime of wilfully and knowingly acquitting a guilty person."

Zola's audacious action created a tremendous stir. It was, he owned himself, a revolutionary deed destined to provoke proceedings which would hasten "an outburst of truth and justice," and in that respect he was not deceived. His philippic raised such an outcry in the press and in the Chamber of Deputies that the War Office was forced to enter upon proceedings. A complaint was lodged against the defamatory phrases with regard to the court martial which had acquitted Esterhazy. The case was tried before the jury of the Seine, and lasted from Feb. 7 to 23, 1898.

First Zola Trial.

The "patriots" in the cafés, the "camelots" selling songs and broadsides, the professional anti-Semites who were masters of the streets under the friendly eye of the police, threatened and hooted all the "enemies of the army," applauded the generals and even the most insignificant officers in uniform, not excepting Major Esterhazy, to whom Prince Henry of Orleans asked to be presented. Scuffles took place between the anti-Revisionists and the handful of "Dreyfusards" who served as a body-guard to Zola. Even in the audience-chamber, "arranged" with care by the staff and its friends at the bar, officers in civil dress caused a stir and gave vent to noisy manifestations. There was fighting in the lobbies. Cries of "Death to the Jews!" were uttered on all sides.

Zola's lawyers, Ferdinand Labori and Albert Clémenceau, had summoned a large number of witnesses. The greater number of the military witnesses declined at first to reply to the summons, but the court did not admit their power to refuse, and they were obliged to submit. However, in order that the "chose jugée" should receive due respect, the court decided not to allow any document, any evidence which bore upon facts foreign to the accusation, to be produced.

The president, Delegorgue, in applying this principle, observed a subtle, almost absurd, distinction; he admitted all that could prove Esterhazy's guilt but not Dreyfus' innocence or the irregularity of his condemnation; his formula, "The question will not be admitted," soon became proverbial. In reality, it was exceedingly difficult to trace a dividing-line between the two classes of facts; and the line was constantly overstepped, now under the pretext of establishing the "good faith" of the accused, now to justify the incriminating phrase that the second court martial had covered by order the *illegality* committed by the first. It was thus that Demange was able to bring out, in a rapid sentence, the fact of the communication of the secret document, which fact he learned from his fellow advocate, Salles.

Picquart's Evidence.

Concerning the Dreyfus affair, the most important testimony was that of Colonel Picquart, who appeared for the first time in public, and gained numerous sympathizers by his calm, dignified, and reserved attitude. Without letting himself be either intimidated or flattered, he related clearly and sincerely, but avoiding all unnecessary disclosures, the story of his discovery. His adversaries, Gonse, Henry, Lauth, Gribelin, did not leave a stone unturned to weaken the force of his evidence and to assert that from the very commencement he had been haunted by the idea of substituting Esterhazy for Dreyfus. There was a long dispute over his supposed plan of having the "petit bleu" stamped during the suspected visits that Leblois had paid him at the ministry. Gribelin pretended that he had seen them seated at a table with two secret dossiers in front of them, one concerning carrier-pigeons, the other concerning the Dreyfus affair. Henry (appointed lieutenant-colonel for the occasion) declared that he had seen, in the presence of Leblois, the document "canaille de D . . ." taken from its envelope. Picquart denied the truth of this statement, which the dates contradicted; Henry thereupon replied: "Colonel Picquart has told a lie." Picquart kept his temper, but at the end of the trial sent his seconds to Henry, and fought a duel with him, in which Henry was slightly wounded. As to Esterhazy, who also tried to pick a quarrel with him, Picquart refused to grant him the honor of a meeting. "That man," said he, "belongs to the justice of his country." In this trial the important part played by Henry began to appear; till then he had purposely kept in the background, and concealed a deep cunning beneath the blunt appearance of a peasant-soldier. One day (Feb. 13), as if to warn his chiefs that he had the upper hand of them, he revealed the formation of the secret dossier; he also spoke, but vaguely, of a supposed ultra-secret dossier, two letters which (he pretended) had been shown him by Colonel Sandherr. These were apparently two of the forged letters attributed to the German emperor, which were whispered about sub rosa in order to convince refractory opinions.

Among the civil witnesses, the experts in handwriting occupied the longest time before the court. Besides the professional experts, eminent savants such as Paul Meyer, A. Giry, Louis Havet, and Molinier, affirmed and proved that the writing and the style of the bordereau were those of Esterhazy. Their adversaries refused to admit this evidence on the ground of the supposed difference between the original and the published facsimiles, of which many, according to Pellieux, resembled forgeries. The lawyers then asked that the original bordereau might be produced, but the court refused to give the order.

The "Thunderbolt" Quoted.

The Sentence Annulled.

General de Pellieux had established himself counsel for the Staff Office. An elegant officer, gifted with an easy and biting eloquence, he addressed the court at almost every hearing, sometimes congratulating himself with having contributed to Esterhazy's acquittal, sometimes warning the jurymen that if they overthrew the confidence of the country in the chiefs of the army, their sons would be brought "to butchery." Like Henry, but with less mental reservation, he ended one day by divulging a secret. On Feb. 17 he had had a prolonged discussion with Picquart as to whether Esterhazy could possibly have been acquainted with the documents of the bordereau, the real date of which was now acknowledged (September, and not April, 1894). Suddenly, as if unnerved, he declared that, setting the bordereau aside, there was a proof, subsequent in date but positive, of the guilt of Dreyfus, and this proof he had had before his eyes; it was a paper in which the attaché "A" wrote to the attaché "B": "Never mention the dealings we have had with this Jew." General Gonse immediately confirmed this sensational evidence. This was the first time that the document forged by Henry—the "thunderbolt" of Billot—had been publicly produced. The impression this admission created was intense. Labori protested against this garbled quotation, and demanded that the document should either be brought before the court or should not be used at all. Then Pellieux, turning toward an orderly officer, cried: "Take a cab, and go and fetch General de Boisdeffre." While waiting for the head of the staff the hearing was adjourned; it was arranged not to resume it that day, for in the interval the government, informed of the incident, had opposed the production of a document which brought the foreign embassies into the case, and of which Hanotaux, the minister for foreign affairs, warned by the Italian ambassador, Tornielli, suspected the genuineness. At the next day's hearing Boisdeffre was content with confirming the deposition of Pellieux on every point as "accurate and authentic," and cynically put the question of confidence to the jury. The president declared the incident closed. In vain did Picquart, questioned by the lawyers, declare that he considered the document a forgery. Pellieux was content with styling him scornfully "a gentleman who *still* bore the uniform of the French army and who dared charge three generals with a forgery!" From that moment the debates were curtailed. The jury, deliberating under fear of physical violence, declared the defendants guilty without extenuating circumstances. In consequence Zola was condemned to the maximum punishment—one year's imprisonment and a fine of 3,000 francs. The publisher of "L'Aurore"—defended by George Clémenceau—was sentenced to four months' imprisonment and a similar fine (Feb. 23, 1898). The prisoners appealed to the Court of Cassation for annulment of the judgment. Contrary to their expectation and to that of the public the Criminal Court admitted the plea on the formal ground that the complaint should have been lodged by the court martial which had been slandered, and not by the minister of war. The sentence was therefore annulled (April 2). Chambaraud, the judge-advocate, as well as Manau, the attorney-general, let it be understood that it would be better not to resume proceedings, at the same time allowing a discreet sympathy for the cause of revision to appear. But the War Office, urged on by the deputies, had gone too far to draw back. The court martial, immediately assembled, decided to lodge a civil complaint. This time only three lines from the article were retained as count of the indictment, and the case was deferred to the Court of Assizes of Seine and Oise at Versailles. Zola protested against the competence of this court, but the Court of Cassation overruled him. The case was not called until July 18, under a new ministry. At the last moment Zola declared he would not appear, and fled to England to avoid hearing the sentence, which would then become final. The court condemned him without debate to the maximum punishment, the same as had already been pronounced by the jury of the Seine. His name was also struck from the list of the Legion of Honor. The experts, on their part, slandered by him, brought an action against him which ended in his being condemned to pay 30,000 francs ($6,000) damages.

Political Aspects of the "Affaire."

XIV. The excitement which accompanied the Zola case had been echoed in the Chamber of Deputies. The different parties began to make the most of the "affaire" for their political ends. A very small phalanx of Socialists grouped round Jaurès, whose generous nature proved more clear-sighted than the shrewdness of his colleagues, and accused the government of delivering the republic up to the generals. A more numerous group of Radicals with "Nationalist" tendencies reproached them, on the contrary, with not having done what was necessary to defend the honor of the army and to nip in the bud a dangerous agitation. The chief spokesman of this group was the "austere intriguer" Godfrey Cavaignac, descended from a former candidate for the presidency of the republic, and himself suspected of a similar ambition. Between these two shoals the premier Méline steered his course, holding fast to the principle of "respect for the judgment pronounced." Prudently refusing to enter into the discussion of the proofs of Dreyfus' guilt, he gave satisfaction to the anti-Revisionists by energetically denouncing the Revisionists. Thus it was that on Jan. 15 and 22, Cavaignac having called upon the government to publish a document "both decisive and without danger"—the alleged report of Gonse upon the supposed avowals of Dreyfus to Lebrun-Renault—Méline flatly declined to follow this track, which he called "la revision à la tribune." After a stormy debate, during which blows were exchanged on the platform, the Chamber decided in Méline's favor (Jan. 24). Again, on Feb. 12, in response to a question concerning "his dealings with the Dreyfus family," General Billot declared that if the revision took place he would not remain a moment longer at the War Office.

On Feb. 24 the ministry were challenged as to the attitude which certain generals had assumed during the Zola trial. Méline, without approving of the errors of speech, explained them as the natural result of the exasperation caused by such an incessant campaign of invective and outrage. But this campaign was about to end: "It must absolutely cease!" he cried, with the applause of the Chamber, and he gave it to be understood that the mad obstinacy of the "intellectuels"—as the advocates of revision were contemptuously called—would only end in bringing about a religious persecution. At the same time he made known a whole series of disciplinary measures demanded by circumstances. By the end of January a council of inquiry had declared for Colonel Picquart's retirement on account of his professional indiscretions in connection with Leblois. The ministerial decision had been left in suspense—it is easy to understand in whose interest—during the Zola trial; now it was put into execution, and Picquart's name was struck off the army list. His "accomplice" Leblois was dismissed from his duties as "maire adjoint," and suspended for six months from the practise of his profession as a lawyer.

Two Favorable Symptoms.

During the four months which followed the first verdict against Zola the cause of the Revisionists was at the lowest ebb. The only effect that their campaign seemed to have had was to divide French society. On the one side were the army, nearly all the leading classes, and the "social forces," without considering the rabble; on the other, a handful of intellectual men and of Socialists. Nationalism, another form of Boulangism, resumed its sway, associated with anti-Semitism, whose exploits resulted in filling the streets of Algiers with blood. The battle continued in the press, and the League of the Rights of Man (president, Senator Trarieux) concentrated the partizans of revision. But from a judicial point of view all the avenues seemed henceforward barred. Apart from the epilogue of the Zola trial only two cases, which received scant notice, maintained a feeble spark of hope despite the darkness. On the one hand, Colonel Picquart, after having vainly knocked at all the doors of military justice, had decided to lay a complaint before a civil court against the unknown authors of the forged "Speranza" letter and of the forged telegrams which he had received in Tunis. On the other hand, a cousin of Major Esterhazy, Christian Esterhazy, lodged a complaint against his relative, who, under pretense of investing their money "with his friend Rothschild," had swindled Christian and his mother out of a considerable part of their small fortune. The same examining magistrate, Bertulus, was entrusted with the two cases; each one threw light upon the other. Christian had been one of the intermediate agents in the collusion between Esterhazy and his protectors in the Staff Office, and he divulged some edifying details on this subject.

In the month of May the elections took place. The new Chamber was as mixed in its representation as had been its predecessor, with the addition of a few more Nationalists and anti-Semites. It did not include a single open Dreyfusard: some (Jaurès, J. Reinach) had not been returned; others had not even faced the struggle. Besides, during the electoral period the recognized attitude of all parties had been to keep silent on the "affaire" and to exaggerate the formulas of enthusiasm for the army; later on, a few provincial councils called for strong measures against the agitators.

At its first meeting with the Chamber Méline's ministry was put in the minority, and a Radical cabinet was formed (June 30). It had for president Henry Brisson, who had just failed as candidate for the presidency of the Chamber. Brisson had remained, and persisted in remaining, completely unacquainted with the "affaire"; but he took as minister of war Godfrey Cavaignac, who would be of use to him as a security with regard to the Nationalists, and leave him full power on this delicate question.

Second Castelin Interpellation.

The leader of the Patriots' League, Déroulède, congratulated Brisson on having taken in partnership a man "who would know how to make the honor of the army respected." Indeed, Cavaignac, true to his promises as a deputy, announced his intention of "muzzling" the impenitent Dreyfusards. But first of all he meant to be sure that he had the cooperation of the Chamber. On July 7 he was challenged by the deputy Castelin, who demanded fresh proceedings against Picquart, Zola, and the "syndicate." Cavaignac addressed the Chamber. His speech, very different from Méline's prudent reserve and Billot's empty formulas, constituted, as he thought, a demonstration in due form of the guilt of Dreyfus, founded principally on the new proofs which had been revealed since his condemnation. Of course, Cavaignac laid stress upon the "confessions" of Dreyfus, established by Gonse's report—antedated—and by a loose leaf (sic!) from Lebrun-Renault's note-book, afterward destroyed by him—a very suspicious act. Cavaignac laid before the Chamber a whole dossier of secret papers: (1) The document "canaille de D . . .". (2) A document of March, 1894, in which one of the military attachés wrote "D. has brought me several interesting things." (It was discovered later that the letter "D" covered something which had been erased, and one could see the traces of one or several different letters.) (3) A document which had fallen from the skies in 1896, and which Pellieux had referred to in the discussion at Zola's trial. Cavaignac, whom Hanotaux and Méline had not thought fit to acquaint with Count Tornielli's protest, gave the entire text of this document for the first time, all except one sentence which he omitted on the ground of diplomatic propriety. He maintained that he had weighed its "material and moral authenticity." Cavaignac's demonstration, apparently mathematically exact, and made with angry conviction, reassured and won over the Chamber, which voted unanimously that his speech should be posted up in every commune throughout France. It was remarked that Méline was among

Picquart's Reply to Cavaignac.

the few who did not vote. The "Figaro" proclaimed the Dreyfus case a "buried matter." But the next day Picquart threw cold water on all this enthusiasm. He wrote a public letter to Brisson, offering to prove before any competent jurisdiction that the documents of 1894, quoted by Cavaignac, did not apply to Dreyfus, and that the document of 1896 "had every appearance of being a forgery." The answer to this audacious manifestation was not long in coming. In the Chamber Cavaignac treated with contempt a man who dared to argue that "a document which he had never seen" could be a forgery. At the same time he wrote to the keeper of the seals to lodge a complaint against Picquart and Leblois, by virtue of the law on espionage (July 12). This was the accusation against Picquart already brought by Henry, Lauth, and Gribelin during Zola's trial, for having (1) examined with Leblois the dossier of a spy named Beulot, and a secret dossier respecting carrier-pigeons, and (2) communicated to Leblois the secret dossiers of the actions against Dreyfus and Esterhazy. Picquart denied that he had shown Leblois any document either secret or concerning the national defense. Moreover, some of these "facts" had been denounced at the council of inquiry which had ordered his dismissal from the army. Therefore the principle "Non bis in idem" should have made fresh proceedings impossible; but the minister, bitterly resenting the doubt cast on his sincerity, did not stop to take these considerations into account. Picquart was arrested and incarcerated in the civil prison of La Santé (July 13). The inquiry, entrusted to the judge Albert Fabre, soon took a turn favorable to the prisoner, whose adversaries became confused by perpetually contradicting facts and dates. On the same day as this arrest the examining magistrate Bertulus, disregarding the threats and entreaties of which he had been the object, on his own initiative (as an official note put it) sent Major Esterhazy and his mistress, Marguerite Pays, to prison, accused of the crime of forgery and of using forgeries; he had in fact become convinced that the "Speranza" telegram was the work of Madame Pays, and that they were not altogether innocent of the sending of the "Blanche" telegram. Then, when Bertulus had decided to send Esterhazy and his mistress before the Assize Court, the Chambre des Mises en Accusation interfered and gave them the benefit of insufficient evidence (Aug. 12), and also declared the complicity of Du Paty insufficiently proved.

Trial of Esterhazy for Forgery.

After the decision pronounced in his favor, Esterhazy had been set at liberty; but he did not come out of this troublesome adventure unscathed. Already, in his speech of July 7, Cavaignac had announced that this officer would be "smitten with the disciplinary punishments that he had deserved," and he gave him into the hands of a council of inquiry. Before this council, presided over by General de St. Germain, Esterhazy, to avenge himself, made revelations which were most compromising for himself as well as for his protectors. He told of his collusion with the staff, and of his threatening letters to the president of the republic. Nevertheless, the council declined to find him guilty of having failed either in discipline or in matters of honor; they sustained only (and by a majority of one) the charge of "habitual misconduct." Notwithstanding a letter from General Zurlinden, military governor of Paris, recommending indulgent measures, Esterhazy's name was struck off the army lists by the minister of war (Aug. 31).

The Henry Forgery.

But just at this time an incident of far greater importance occurred to change the aspect of affairs. Cavaignac, in spite of his assurance, had none the less been agitated by the doubts expressed on all sides as to the authenticity of certain documents in his dossier. In order to ease his mind he ordered a general revision and a reclassification of the secret dossier. In the course of this operation Major Cuignet, working by lamplight, noticed an alarming peculiarity in the "document Henry": the lines of the paper—which was ruled in squares—were not of the same color at the top and at the bottom as they were in the middle. When he looked at the document produced by Henry himself for comparison—an invitation to dinner (falsified) dating from 1894—he ascertained, by comparing the ruled squares, that the heading and the lower part of the latter document belonged in reality to the "document Henry," and vice versa. If the two papers had been contemporary, this inversion might have been attributed to a pardonable error in gumming them together; but such was not the case: one was supposed to have been put together in 1894, the other in 1896; therefore the documents had evidently been tampered with at this latter date. Much concerned by his discovery, Cuignet apprised the chief of the cabinet (General Roget) and the minister, who recognized the accuracy of it. Their conviction, which the nonsense and the improbability of the "Vercingétorix document"—as Esterhazy had called it—had not been able to shake, gave way before the divergence of the squares ruled on the paper. Cavaignac, for motives still unknown, kept the matter secret for a fortnight. Then, as Henry was passing through Paris, he summoned him to the War Office, and questioned him in the presence of Generals de Boisdeffre, Gonse, and Roget. Henry commenced by swearing that the document was authentic, then got entangled in confused explanations, then admitted that he had completed certain parts of it "from oral information" he had received; in the end, conquered by the evidence against him, he owned that he had invented the whole thing. But they knew well why and for whom; and he threw an anxious glance on Generals Boisdeffre and Gonse, who in 1896 had accepted this timely forgery without question; these generals kept frigid silence. Abandoned by the chiefs who had tacitly driven him to the crime, Henry gave way entirely. By order of the minister he was immediately put under arrest and confined in Mont Valérien. The next day he cut his throat with a razor left in his possession, taking with him to the grave his secret and that of a great part of the "affaire" (Aug. 31, 1898). On the same day Esterhazy prudently disappeared from Paris; it was

Suicide of Henry.

known that he had taken refuge in Brussels, and then in London. Colonel Henry's avowal gravely affected General Boisdeffre's position, for he had publicly proclaimed and affirmed to the minister the authenticity of the document. He immediately tendered his resignation as head of the staff, and, despite Cavaignac's entreaties, insisted on its acceptance.

This double "coup de théâtre," at once made public, created a tremendous sensation at first. The enemies of revision were overwhelmed; it was several days before they had sufficiently recovered to rally round the theory of the "patriotic forgery" imagined by a contributor to the "Gazette de France," Charles Mourras. According to him, Henry had forged this document as a sort of résumé for the public, because the "real proofs" could not be revealed without danger. This absurd theory (for if ever a document were intended exclusively for "internal use," as Pressensé put it, it was that one!) was generally accepted by the Nationalists.

But public opinion had changed considerably, or was at least shaken. The revision of the Dreyfus case thenceforward seemed inevitable; the council of ministers investigated the matter. It was evident that if Colonel Henry had been obliged to forge a false proof of the guilt of Dreyfus in 1896, the dossier did not contain a single one that could be considered as decisive. Cavaignac refused to draw this inference—too honest to hush up Henry's forgery, he was too obstinate to retract his speech of July 7. He declared that he was more convinced than ever of Dreyfus' guilt, and tendered his resignation, led to this decision by Brisson's firmly expressed determination to take steps toward revision (Sept. 4).

Zurlinden Succeeds Cavaignac.

Ministerial Changes.

General Zurlinden, governor of Paris, accepted the vacant post in the War Office at the personal request of the president of the republic. He was an honest soldier, but narrow-minded; the press of the staff loaded him with insults, which did not fail to affect him. The revision founded upon the discovery of a "new fact" could only be demanded by the keeper of the seals. As early as Sept. 3 Madame Dreyfus had laid before him a request to take this initiative. She alleged two "new facts": (1) the expert's examination of the bordereau, which she was informed had not given the same results as in 1894; (2) the confession of Henry's crime, which consequently annulled his all-important evidence in the action against her husband. As a result of this claim the keeper of the seals, Sarrien, demanded that the secretary of war should communicate the Dreyfus dossier. To the general surprise, Zurlinden sent it to him with a long notice unfavorable to revision. However, after a prolonged discussion, the ministry decided to proceed and to lay the matter before the judicial commission, which they were bound to consult in such a case. Thereupon Zurlinden tendered his resignation, and was followed in his retirement by the minister of public works, Tillaye (Sept. 17). Zurlinden was reinstated as governor of Paris; General Chanoine inherited his position in the War Office, as well as the insults of the anti-Revisionist press. During his short term of office Zurlinden, with an impartiality that showed more uprightness than discretion, had smitten two of the principal actors of the drama. It resulted from Esterhazy's declarations before his council of discipline, and from an inquiry opened in consequence, that Colonel Du Paty de Clam had sided with Esterhazy before and during his action. Du Paty took upon himself all the responsibility for his conduct, and asserted that he had acted without reference to his chiefs; this was chivalrous, but only half true. However that may be, the assistance thus given to Esterhazy was judged "reprehensible from a military point of view": Du Paty was retired and put on half-pay for punishment (Sept. 12). After Du Paty came Picquart. Zurlinden, having become acquainted with his dossier, proposed to the council of ministers to arraign Picquart before a court martial on the charge, already drawn up by Esterhazy, of having fabricated the "petit bleu." The only possible basis for such an accusation consisted in certain signs of erasure in the document which had not existed in the photographs taken of it in 1896. The council appeared little in favor of these proceedings, but Zurlinden, acting as governor of Paris, almost immediately after tendering his resignation, presented to his successor a warrant of inquiry, which the latter signed without paying much attention to it. The reason of this haste was that the keeper of seals had asked Picquart for a "mémoir" on the fitness of revision; the military party was therefore eager to discredit his testimony by a charge of forgery. On Sept. 21, the day on which the case of Picquart and Leblois was brought before the "tribunal correctionnel," the government attorney demanded the adjournment of the affair, first, on account of the Dreyfus revision, which might modify the aspect of the deeds with which Picquart was charged; and secondly, on account of the new and serious accusation which had been brought against the latter. Picquart then rose and warned his judges and the public, saying: "To-night perhaps I shall go to the Cherche-Midi, and this is probably the last time that I will be able to speak in public. I would have the world know that if there be found in my cell the rope of Lemercier-Picard or the razor of Henry, I shall have been assassinated. No man like myself can for a moment think of suicide." Lemercier-Picard was one of Henry's agents, whose real name was Leeman, and who had probably been concerned in the forgery of 1896; he had afterward hanged himself under mysterious circumstances from the window-fastening of a furnished house. The next day Picquart was taken from the civil prison of La Santé and enrolled on the register at the Cherche-Midi, where he was put into the strictest solitary confinement.

Some days after, the vote of the commission charged with giving a preliminary opinion upon the demand for a revision was made known: opinion was equally divided. This division legally inferred rejection; but the minister of war was not bound to accept the opinion of the commission. He wished, however, to shield himself behind a vote of the council of ministers. After four hours of deliberation it was decided, at the instance of Brisson, seconded by Bourgeois, that the keeper of the seals should lay the affair before the Court of Cassation.

Thus the proceedings for revision were definitely inaugurated (Sept. 27).

Resignation of Brisson's Ministry.

XV. Now that, thanks to the manly resolution of Brisson, the obstinate defenders of the work of 1894 had been deprived of support, their only remaining hope lay in the revolutionary action of the army, of the people, or of the Chamber of Deputies. It will be seen how they used successively each of these three means. They found help, on the one hand, in the thoughtless violence of certain apostles of revision who persisted in including the whole army in the fault committed by some of its chiefs. The most extreme of these was Urbain Gohier, who was prosecuted (under Dupuy's ministry) for his collection of articles, "The Army Against the Nation," and acquitted by a jury of the Seine. On the other hand, the anti-Revisionists were encouraged by the strange inactivity of the president of the republic. The day before the reopening of the Chamber of Deputies, sudden and suspicious strikes, noisy public meetings, struggles in the streets, reports of a military conspiracy, all contributed to overexcite the temper of the public. The very day of the reopening of the Chamber of Deputies (Oct. 25) Brisson's ministry was defeated on a motion which virtually accused the government of permitting the attacks upon the army, and it resigned forthwith.

It was replaced on Nov. 3 by a cabinet of "republican union" presided over by Charles Dupuy, with Freycinet at the War Office and Lebret keeper of the seals. The Criminal Chamber of the Court of Cassation, having the demand for a revision laid before it, held public audience on Oct. 27 and 28 to express its opinion upon the admissibility of the demand. The attorney-general Manau and the councilor Bard, the latter in a very remarkable report, both pronounced themselves in favor of the claim. They adopted the two motives for the request presented by Madame Dreyfus. The avowed forgery of Colonel Henry covered his evidence of 1894, and even the origin of the bordereau which had been through his hands, with justifiable suspicion; the report of the experts of 1897, the purport of which was revealed on this occasion, tended to establish the belief that the bordereau was not in Dreyfus' handwriting, as had been claimed in 1894, but was "a tracing of the writing of Esterhazy." The attorney-general, an old republican, was in favor of immediately annulling the sentence of 1894 and suspending the punishment of Dreyfus; the councilor Bard, taking into consideration the resistance of military authority, whose motives were enumerated in Zurlinden's letter, proposed simply that the Criminal Chamber should declare the claim "formally admissible" and should proceed to an inquiry which would throw further light on the matter and set people's minds at rest. It was this last expedient that commended itself to the Criminal Chamber (Oct. 29); and it was further decided (Nov. 3) that instead of appointing a special commission, the court as a whole should hold this supplementary examination. They began at once and heard, in greatest secrecy, a long series of witnesses, not excepting Esterhazy, who, having been threatened with an action for swindling his cousin Christian, obtained a safe-conduct to come to Paris without fear of being arrested. On Nov. 15 the Criminal Chamber decided that Dreyfus should be informed of the commencement of proceedings for the revision, and invited to present his means of defense. This was the first news that the unhappy man had heard of the campaign begun in his behalf.

Trial Before the Court of Cassation.

Before the Court of Cassation, as in the actions against both Esterhazy and Zola, the principal witness for the revision was to be Colonel Picquart. To weaken the importance of his evidence and to retaliate for the revision, the military party wished to force the colonel's condemnation beforehand. The inquiry into his case, entrusted to Captain Tavernier, was quickly ended. On Nov. 24 General Zurlinden, governor of Paris, signed the order demanding his trial before the court martial; he was charged with forging the "petit bleu," with using other forgeries, and with communicating secret documents concerning national defense. Numerous petitions from "intellectuels" protested against these hasty measures, and demanded that the judgment of Picquart should be delayed until the result of the inquiry in the Court of Cassation should have put in its true light the part he had played in all this affair. The same opinion was expressed in the Chamber of Deputies by the deputies Bos, Milleraud, and Poincaré, one of the ministers of 1894, who took advantage of this opportunity to "unburden his conscience"—a little late in the day (Nov. 28).

Freycinet and Dupuy refused to postpone the court martial, but were willing to hamper it by allowing the Court of Cassation to claim the Picquart dossier. Finally, after a fruitless attempt by Waldeck-Rousseau to pass a law suspending the case of Picquart, who was awaiting trial before both the "tribunal correctionnel" and the court martial, the Court of Cassation, on the colonel's application, ordered that the two dossiers should be communicated to it, thus indefinitely postponing the meeting of the court martial. (After the close of the inquiry, on March 3, 1899, the court decided that the Civil Court alone was concerned with the accusations against Picquart, in consequence of which decision he was transferred from the military prison at Cherche-Midi to the civil prison of La Santé.)

After having almost terminated the hearing of the witnesses, the Criminal Chamber insisted upon having the secret dossier, withheld by military authority, communicated to it. This request met with strenuous opposition; the matter was even taken before the Chamber of Deputies (Dec. 19). The government, however, before deciding, required guaranties of such a nature as to insure it from indiscreet publication; these guaranties, accepted by the Court of Cassation (Dec. 27), consisted in an officer of the War Office being charged to carry the dossier every day to the court and to bring it back to the War Office in the evening.

While the Criminal Court was proceeding with its inquiry, notwithstanding the secrecy with which all its movements were surrounded, the report was spread abroad that the decision would be favorable to the claim for revision. To avoid this catastro-

Attacks on the Court.

phe at any price, the enemies of revision commenced a violent campaign in the newspapers, defaming the magistrates of the Criminal Chamber, who were represented as having been required to sell themselves to the cause of Dreyfus. The Ligue de la Patrie Française, founded in Jan., 1899, under the auspices of the academicians François Coppée and Jules Lemaitre, energetically seconded this campaign and demanded that these "disqualified" judges should be discharged from the cognizance of the case. The president of the Civil Chamber of the court, Quesnay de Beaurepaire, was found ready to lend the support of his high dignity to these calumnies; he tendered his resignation as a judge (Jan. 8, 1899), and began in "L'Echo de Paris" a series of articles against his colleagues. His most serious charge was that President Loew, at the end of a long and tiring sitting, had sent Picquart a glass of hot grog.

The astonishment of the public was intensified when on Jan. 30 the government presented a bill demanding that the affair should be judged by the united sections of the whole Court of Cassation! Dupuy asserted that the bill was a measure of pacification; it was necessary that the decision—and why did the Revisionists fear that the whole Court of Cassation would disavow the Criminal Chamber?—should have such force that nobody but "fools or rebels" would be found to contest it. These arguments, and above all the fear of provoking a ministerial crisis, triumphed over the resistance of a part of the republicans. The "loi de dessaisissement" was passed by the Chamber of Deputies (Feb. 10), and a little later by the Senate (Feb. 28).

The Death of Félix Faure.

In the interval between the taking of these two votes an important event had occurred—the sudden death of the president, Félix Faure (Feb. 16). The congress which immediately assembled set aside the candidateship of all those who had been to a greater or less degree involved in the Dreyfus affair (Méline, Brisson, Dupuy), and fixed its choice on the president of the Senate, Emile Loubet, who had preserved up to that time, and who continued to preserve, a consistently neutral attitude. Nevertheless, as he was the choice of the Senate and of the Revisionists in the Chamber, his nomination awakened the fury of the Nationalists, anti-Semites, and reactionists. On different sides conspirators tried to take advantage of the general disorder and attempted a decisive stroke. The Orleanist pretender advanced closer to the frontier. At Félix Faure's funeral (Feb. 23) the leaders of the League of Patriots, Déroulède and Marcel Habert, tried to induce General Roget's brigade to proceed to the Elysée. The two agitators were arrested, brought before the jury of the Seine for "misdemeanor in the press," and acquitted (May 31).

The Criminal Chamber had terminated its inquiry on Feb. 9; immediately after the vote for the "loi de dessaisissement" the whole proceeding was turned over to the Court of Cassation. This latter accepted without question the results obtained, heard several new witnesses, and had the secret dossiers, both military and diplomatic, laid before it. It was still engaged in studying them when the "Figaro" succeeded in obtaining, and published, beginning with March 31, the complete reports of the proceedings of the inquiry which had been put in print for the private use of the councilors. The effect of this publication was wide-spread. For the first time the general public had all the factors of the case before its eyes and could reason out an opinion for itself. The characteristic result of the inquiry was the melting away of all the pretended proofs of the guilt of Dreyfus, inferred from the secret dossier: not a single one had withstood an impartial examination, and in the course of the inquiry many documents had been recognized as false or as having been tampered with.

The spokesmen of the Staff Office, General Roget, Major Cuignet, and Cavaignac, now returned to the bordereau, and struggled to show that the documents enumerated therein could have been betrayed only by Dreyfus. But the attributing of the bordereau to Dreyfus clashed with the declaration of the new experts appointed by the Criminal Chamber (Paul Meyer, Giry, Molinier), who were unanimous in attributing it to Esterhazy. Charavay, one of the experts of 1894 who had decided against Dreyfus, retracted his previous decision when Esterhazy's writing was put before him. Lastly, a search, made as early as the month of November, put the court in possession of two letters acknowledged by Esterhazy, written on the same "pelure" paper (foreign note-paper) as the bordereau; a search had been made in vain for samples of this paper in Dreyfus' house, and in 1897 Esterhazy had denied that he had ever used it.

The Panizzardi Telegram.

Before the united courts the most remarkable incident was that of the Panizzardi telegram of Nov. 2, 1894. Instead of the true interpretation of this telegram, which quite exonerated Dreyfus, the secret military dossier communicated to the Court of Cassation contained only a false version of it, put together from memory in 1898 by Colonel Henry. In the course of his deposition Major Cuignet tried to justify this false version, and accused the Foreign Office of dishonorable conduct. A somewhat animated correspondence took place between the two ministries on this subject. However, the delegate of the Foreign Office, Paléologue, had no trouble in confounding his opponent, and on April 27 Cuignet and General Chamoin, in the name of the War Office, signed a warrant recognizing the accuracy of the official interpretation. This incident had a parliamentary echo. On May 5 De Freycinet tendered his resignation from the War Office rather abruptly. He was replaced by Krantz, until then minister of public works.

Notwithstanding the remarkable prejudices of a considerable number of the councilors who were charged with the examination of the case, the inquiry of the united courts only confirmed in a striking manner the results of the inquiry of the Criminal Chamber. The president of the Civil Chamber, Ballot-Beaupré, was entrusted with the report, which he read in the open court on May 29. Visibly affected, he declared that the bordereau was the work of Esterhazy: this fact being proved, even if it did not allow of Esterhazy's acquittal being overthrown, was sufficient to demonstrate Dreyfus' innocence; and this was, according to Ballot-Beaupré, the new fact required by the law. Manau, the attorney-general, in his address to the court brought forward a second "new fact"—Henry's forgery. After a masterly speech by Mornard, acting on behalf of the Dreyfus family, the Court of Cassation retired for deliberation. In their decision, rendered June 3, they set aside the "fins de non recevoir" (refusal to admittance) inferred either from the secret dossier or from the pretended confessions of Dreyfus, which they judged not proved and improbable. They retained two "new facts": one, recognized by all, the fresh attribution of the bordereau; the other, the secret communication made to the judges of Dreyfus, of the document "canaille de D . . .," now considered by every one as inapplicable to the prisoner. Accordingly, the Court of Cassation annulled the sentence of 1894, and ordered that Dreyfus be tried again before a court martial at Rennes.

The very day before this memorable decree Esterhazy declared to a reporter of "Le Matin" that he was indeed the author of the bordereau; but he asserted that he had written it "by order," to furnish his friend, Colonel Sandherr (whose secret agent he pretended to have been), with a material proof against the traitor Dreyfus.

The Court Martial at Rennes.

XVI. The presumptions that had been admitted by the Court of Cassation in favor of the innocence of Dreyfus, were so powerful that, according to general opinion, the judgment of the court martial at Rennes could be nothing but a mere formality, destined to procure for Dreyfus the supreme satisfaction of being rehabilitated by his peers. But after the lies, the hatred, the insults which had accumulated during the last two years, after the work of demoralization accomplished by the press of both parties, the overexcited army had now reached the point of identifying its own honor with the shame of Dreyfus. Its suspicions having been successfully roused against civil justice, it refused to bow down before the work of the latter, although it was so straightforward; and, as Renault Morlière had foretold, the only effect that the "loi de dessaisissement" had was to direct upon the whole Court of Cassation the suspicions and the invectives reserved up to this time for the Criminal Chamber alone.

The first victim of this fresh outburst of passion was the Dupuy ministry. This "ministère de bascule" (trimming ministry), after having done everything in its power to retard the work of justice, now seemed to accept it without any reserve, and to be ready to draw any inference from it. The cruiser "Sfax," stationed at La Martinique, had been ordered to bring Dreyfus back to France. Du Paty de Clam was arrested on the charge of having taken part in the Henry forgery, an accusation rashly made by Major Cuignet, and which was bound to be rejected for lack of evidence.

General Pellieux was brought before a council of inquiry for collusion with Esterhazy; Esterhazy himself was prosecuted for the affair of the "liberating document." The cabinet felt itself threatened by the indignation of all sections of the Republican party, and made fresh advances to the "Dreyfusards." On June 5 the Chamber of Deputies voted the public placarding of the decision of the Court of Cassation—a necessary step in view of similar action taken in the case of Cavaignac's speech. Still further, the cabinet proposed to the Chamber to bring before the Senate an action against General Mercier, on the ground of the secret communication made to the judges of 1894.

But the Chamber, which had acclaimed Cavaignac and overthrown Brisson, hesitated to start upon the course of retaliation into which Dupuy was urging it. It found a deputy (Ribot) to declare that the ministry was encroaching upon its prerogatives, and another (Pourquery de Boisserin) to propose the postponement of any decision until the court martial of Rennes had rendered its decree. This last proposition rallied the majority; nobody observed that, in thus connecting Mercier's safety with a fresh condemnation of Dreyfus, a false character was being given in advance to the trial at Rennes: out of a simple legal debate was being formed a duel between a captain and a general.

Defeat of Dupuy Ministry.

Dupuy's cabinet was finally overthrown (June 12), and the groups on the Left, in presence of the danger of a military pronunciamento that threatened them, decided merely to uphold a ministry of "Republican defense." On June 22 Waldeck-Rousseau succeeded in forming a cabinet, in which General the Marquis de Galliffet was minister of war.

The cruiser "Sfax" landed Dreyfus on July 1 at Port Houliguen, near Quiberon. Hurriedly disembarked on a stormy night, he was immediately transferred to the military prison of Rennes. After five years of physical and moral torture, which he had survived only by a miracle of will-power, the unhappy man had been reduced to a pitiable state of bodily and mental exhaustion. For five weeks the attorneys chosen by his family, Demange and Labori, were busy in acquainting him as far as was possible with the remarkable events that had occurred during his absence; his attitude while the trial was progressing proved the difficulty he had in realizing the situation.

His trial began on Aug. 7, in one of the rooms of the lycée at Rennes. The court martial was composed entirely of artillery officers, except the president, Colonel Jouaust, who belonged to the corps of engineers. The public prosecutor was Major Carrière, a retired gendarme, who at the age of sixty had begun to study law. In accordance with legal requirements, the indictment was in substance the same as at the previous trial; but the only question put to the court was whether Dreyfus had delivered up the documents enumerated in the bordereau. It appeared, therefore, that only witnesses who could give evidence on this point would be heard, and such, in fact, were the instructions given by the War Office to the government commissary; but these directions were not respected by him nor by the defense. Hence the Rennes trial was but a repetition of the interminable string of witnesses who had already been heard at Zola's trial and in the Court of

Cassation, the greater part of whom only brought forward opinions, suppositions, or tales absolutely foreign to the question. The generals, forming a compact group which this time worked under Mercier's personal direction, delivered regular harangues and interfered in the debate continually; the president, overawed by his superior officers, exhibited as much deference to them as he showed harshness and sharpness to Dreyfus. From beginning to end of the trial he made no pretense of keeping account of the facts duly established by the Court of Cassation. Esterhazy's avowals, intermixed, it is true, with lies, were held as being null and void. The voluminous correspondence which he addressed to Jouaust and to Carrière was thrown into the waste-paper basket. The questions asked by one of the judges make it appear probable that some one had spoken to him of the pretended original bordereau, written on thick note-paper, and said to have been annotated by the Emperor William.

The examination of Dreyfus himself was without interest; he confined himself to denials, and preserved an entirely military attitude, the exaggerated correctness of which did not arouse any sympathy. Several hearings with closed doors were devoted to the examination of the military and diplomatic secret dossiers. General Chamoin, delegate of the War Office, had (as explained by him later, through inadvertence) incorporated in them again the false rendering of the Panizzardi telegram, together with a commentary from Du Paty.

General Mercier's evidence (Aug. 12), which had been announced with much parade and bustle, was put forward in a clever speech, but brought out nothing new, unless it were a note from the Austrian military attaché, Schneider, which Mercier had procured by unavowed means. In this note the Austrian diplomat declared that he persisted in "believing" in the guilt of Dreyfus. The note was of the year 1895 or 1896; but a false date had been written on the copy, "Nov. 30, 1897"—a date later than the discovery of Esterhazy's handwriting, and at which, as a matter of fact, Schneider had completely changed his opinion! Called upon to explain the part he played in 1894, Mercier admitted, this time without hesitation, the communication of the secret dossier, took the credit of it to himself, and declared that if necessary he was ready to do it again.

Labori Shot.

On Aug. 14 an unknown person, who succeeded in escaping, fired a revolver at Labori and wounded him severely in the back. For more than a week the intrepid advocate was prevented from attending the hearing.

One can not enter into the endless details of all the evidence, which continued for nearly a month longer at the rate of two sittings a day. The most notable witnesses were Casimir-Perier, Commander Freystaetter (one of the judges of 1894)—both in violent opposition to Mercier—Charavay, who, though seriously ill, came loyally forward to acknowledge his error of 1894, and Bertillon, who repeated his claims as to the "autoforgery" of the bordereau, together with fresh complications. At the last moment Colonel Jouaust, using his discretionary power, heard with closed doors, and without putting him on his oath, a Servian named Czernucki, formerly an Austrian officer. This man, who was generally considered to be half-mad, related in an obscure way that a civil official and an officer of the staff "of a power of central Europe" had certified to him that Dreyfus was a spy. Although this story was of no value, Labori took advantage of it to demand in turn that the evidence of Schwarzkoppen and Panizzardi should be received. This was refused. However, the German government inserted a notice in the official newspaper of Berlin (Sept. 8), repeating in formal terms the declaration made by the chancellor Von Bülow on Jan. 24, 1898 before a commission of the Reichstag, and proclaiming that the government had never had any dealings whatever with Dreyfus.

Major Carrière's address to the court assumed that Dreyfus was guilty. He affirmed that at the beginning of the trial he had hoped to be able to demonstrate his innocence, but "this mass of witnesses who have come to give us information and personal opinions" had destroyed that hope. Of Dreyfus' two attorneys only Demange addressed the court. His speech was long, well reasoned, and touching, but he weakened it by making it too polite and by speaking too gently of all the officers, not excepting the late Colonel Henry.

In his rejoinder Carrière asked the judges to group the witnesses into two divisions and to weigh them. Demange begged them not to raise to the dignity of proof such "possibilities of presumptions" as had been brought to them. Finally, Dreyfus uttered these simple words:

> "I am absolutely sure, I affirm before my country and before the army, that I am innocent. It is with the sole aim of saving the honor of my name, and of the name that my children bear, that for five years I have undergone the most frightful tortures. I am convinced that I shall attain this aim to-day, thanks to your honesty and to your sense of justice."

The Verdict.

An hour later he heard the verdict that ruined all his hopes and those of justice: by five votes to two the court martial declared him guilty. It was asserted that the two votes were those of Colonel Jouaust (who throughout the trial had carefully concealed his opinion) and of Lieutenant-Colonel de Bréon, a fervent Catholic, the brother of a Paris curate. As if, however, to acknowledge its doubts, the court admitted that there were "extenuating circumstances"—a thing unheard of and incomprehensible in a matter of treason. The sentence pronounced was detention for ten years: it was known that the judges had recommended the condemned man to the indulgence of the War Office (Sept. 9, 1899).

XVII. The whole of the civilized world was amazed and indignant on the announcement of the sentence. In France itself nobody was satisfied, except General Mercier, who was delivered by this halting pronouncement from all fear of punishment. For several days the ministry hesitated as to what course to pursue. Finally, the idea of immediately pardoning Dreyfus, started by some of the prisoner's friends, who were alarmed at his state of health, prevailed in the government councils. They had some trouble in inducing the president of the republic to grant the pardon, and Dreyfus to accept it; for in order to avail himself of it the prisoner was forced to withdraw the appeal he had laid before the council of revision. Later on, the disingenuousness of political parties saw in this relinquishment the avowal of his crime! On Sept. 19, the very day on which Scheurer-Kestner died, appeared the presidential decree remitting the whole of the punishment of Dreyfus, including the military degradation. The decree was preceded by a report from the minister of war, reciting various reasons for clemency. Then by an "ordre du jour," which he did not communicate even to the president of the council, General Galliffet announced to the army that the incident was closed.

On Sept. 20 Dreyfus was set at liberty. He immediately wrote to the president of the republic a letter in which he declared anew his innocence, together with his resolve to know no rest or peace until his honor was restored. He retired with his family to Carpentras, then to Geneva, and finally went back to settle in Paris, without causing the slightest public demonstration. Thus ended in a paradoxical result this long struggle for right. Dreyfus, liberated and restored to his family, innocent in the eyes of the world, remained excluded from the army and legally dishonored. In the senatorial elections of 1900 all the notable "Dreyfusards" (Ranc, Siegfried, Thévenet) remained unelected; it was only at the legislative elections of 1902 that the tide began to turn and some of the champions of revision (Pressensé, Jaurès, Buisson) were returned to the Chamber of Deputies.

Pardon and Amnesty.

The sentence of Rennes left unsettled several actions which were more or less connected with the Dreyfus case: proceedings against Picquart for infraction of the law against espionage; an action for libel by Henry's widow against Joseph Reinach; an action against Zola (whose condemnation by default was not definitive); eventual proceedings against General Mercier, etc. Waldeck-Rousseau's ministry considered that the people were tired of an "affaire" that had paralyzed the business of the country, and had brought it to the brink of a civil war; for it had become known that if Dreyfus had been acquitted the leaders of the anti-Revisionists—Déroulède, Marcel Habert, Jules Guérin—had determined on a "coup." To prevent this they had been arrested (Aug. 12) for conspiracy against the state, and condemned to banishment or prison. The ministry reported a bill which declared that all actions for matters connected with the Dreyfus affair, excepting those for the crimes of murder and treason, were canceled. It was the "policy of the sponge" praised by the journalist Cornély. It met with keen opposition from the convinced adherents of Dreyfus; they saw in it an immoral stifling of justice, and they succeeded in protracting the discussion of the bill. In the mean time all the actions remained unsettled. But events convinced Waldeck-Roasseau still further of the necessity for the pacific measure. In the month of May, 1900, the mere insinuation of a revival of the "affaire" had favored the success of the Nationalist candidates in the municipal elections of Paris. The resignation of General Galliffet, May 30, 1900, on a side issue of the "affaire," and the almost unanimous vote by the Chamber of an "ordre du jour" against the reopening of the case, encouraged the government to insist on the voting for the bill. After long debate it was definitely adopted on Dec. 24, 1900.

In the course of the discussion Waldeck-Rousseau had stigmatized General Mercier's conduct in 1894, and consoled the defenders of Dreyfus by making appeal to the justice of history. Of the three most notable champions of revision, Scheurer-Kestner had already gone to the grave; Zola returned to France, where he died from an accident Sept. 29, 1902; as to Colonel Picquart, indignant at the law of amnesty, he abandoned the appeal that he had lodged against the decision—very much open to criticism—of the council of inquiry which had struck him from the lists, and definitely left the army by way of protestation.

The Dreyfus case has rendered one service to the French democracy by bringing into full light the danger of an alliance between anti-Semitism, nationalism, militarism, clericalism—different terms which express the various forms of the spirit of intolerance and counter-revolution. It has, besides, been a lesson to the whole world of the danger of letting religious prejudice interfere with the sacred prerogative of justice.

The declaration of Esterhazy before the consul of France at London (end of 1900) was published in the *Siècle* and the *Indépendance Belge* in May, 1901.

The principal polemical writings are those of Bernard Lazare, Jean Jaurès (*Les Preuves*), Joseph Reinach ("Junius": *Les Faussaires*; *Tout le Crime*, etc.), E. Zola (*La Vérité en Marche*), G. Clémenceau, J. Cornély, Jean Ajalbert, A. Réville, Urbain Gohier, Yves Guyot, E. Duclaux ("Un Intellectuel": *Gonse Pilate*), Michel Colline, P. Quillard (*Le Monument Henry*), all favorable to Dreyfus; on the opposite side there are hardly any to name, except the collection of articles of Maurice Barrès. The work of E. de Haime (pseudonym), *Les Faits Acquis à l'Histoire* (Paris, 1898), contains letters and declarations from various publicists.

The histories of the affair which appeared during its course can not be much relied on. These are: in French, the volumes signed "Captain Paul Marin" and "Ch. Dubois" (translated into Italian); in English, those of F. Conybeare and of G. Barlow. Mention may also be made of F. de Pressensé, *Un Héros, le Lieutenant-Colonel Picquart* (Paris, 1898), and Esterhazy, *Les Dessous de l'Affaire Dreyfus* (1899). The standard work is the *Histoire de l'Affaire Dreyfus*, by Joseph Reinach, in course of publication (tome i., *Le Procès de 1894*, 1901; tome ii., *Esterhazy*, Paris, 1903). The complete work will be in four volumes.

As short epitomes may be mentioned: Pierre Molé, *Exposé Impartial de l'Affaire Dreyfus* (1898); Sir Godfrey Lushington, *The Conspiracy Against Captain Dreyfus* (*National Review*, June, 1899). Consult also the seventh volume of Lavalée's *L'Histoire des Français*, ed. F. Lock and M. Dreyfous, Paris, 1901, and several volumes of André Daniel's (Lebon's) *Année Politique* (Charpentier).

Chief Rabbi of Padua; Professor of Hebrew at the University, Padua, Italy.

IMMANUEL LÖW, Ph.D.,
Chief Rabbi of Szegedin, Hungary; Author of "Die Aramäischen Pflanzennamen."

S. H. MARGULIES, Ph.D.,
Principal of the Jewish Theological Seminary; Chief Rabbi of Florence, Italy.

H. OORT, D.D.,
Professor of Hebrew Language and Archeology at the State University, Leyden, Holland.

ABBÉ PIETRO PERREAU,
Formerly Librarian of the Reale Biblioteca Palatina, Parma, Italy.

MARTIN PHILIPPSON, Ph.D.,
Formerly Professor of History at the Universities of Bonn and Brussels; President of the Deutsch-Jüdische Gemeindebund, Berlin, Germany.

SAMUEL POZNANSKI, Ph.D.,
Rabbi in Warsaw, Russia.

E. SCHWARZFELD, LL.D.,
Secretary-General of the Jewish Colonization Association, Paris, France.

LUDWIG STEIN, Ph.D.,
Professor of Philosophy, University of Bern, Switzerland; Editor of "Archiv für Geschichte der Philosophie," etc.

HERMANN L. STRACK, Ph.D.,
Professor of Old Testament Exegesis and Semitic Languages, University of Berlin, Germany.

CHARLES TAYLOR, D.D., LL.D.,
Master of St. John's College, Cambridge, England; Editor of "Sayings of the Jewish Fathers," etc.

SYSTEMS OF TRANSLITERATION AND OF CITATION OF PROPER NAMES*

A.—Rules for the Transliteration of Hebrew and Aramaic.

1. All important names which occur in the Bible are cited as found in the authorized King James version; *e.g.*, *Moses*, not Mosheh; *Isaac*, not Yiẓḥaḳ; *Saul*, not Sha'ul or Shaül; *Solomon*, not Shelomoh, etc.

2. Names that have gained currency in English books on Jewish subjects, or that have become familiar to English readers, are always retained and cross-references given, though the topic be treated under the form transliterated according to the system tabulated below.

3. Hebrew subject-headings are transcribed according to the scheme of transliteration; cross-references are made as in the case of personal names.

4. The following system of transliteration has been used for Hebrew and Aramaic:

א *Not noted at the beginning or the end of a word; otherwise ' or by dieresis; e.g., Ze'eb or Meïr.*

ב *b*	ז *z*	ל *l*	פּ *with dagesh, p*	שׁ *sh*
ג *g*	ח *ḥ*	מ *m*	פ *without dagesh, f*	שׂ *s*
ד *d*	ט *ṭ*	נ *n*	צ *ẓ*	ת *t*
ה *h*	י *y*	ס *s*	ק *ḳ*	
ו *w*	כ *k*	ע '	ר *r*	

Note: The presence of dagesh lene is not noted except in the case of *pe*. Dagesh forte is indicated by doubling the letter.

5. The vowels have been transcribed as follows:

◌ָ *a*	◌ֻ *u*	◌ַ *a*	◌ֱ *e*	וֹ *o*
◌ֵ *e*	◌ֶ *e*	◌ֳ *o*	◌ִי *i*	
◌ִ *i*	◌ְ *e*	◌ֲ *a*	וּ *u*	

Ḳameẓ ḥaṭuf is represented by *o*.

The so-called "Continental" pronunciation of the English vowels is implied.

6. The Hebrew article is transcribed as *ha*, followed by a hyphen, without doubling the following letter. [Not *hak-Kohen* or *hak-Cohen*, nor *Rosh ha-shshanah.*]

B.—Rules for the Transliteration of Arabic.

1. All Arabic names and words except such as have become familiar to English readers in another form, as *Mohammed, Koran, mosque,* are transliterated according to the following system:

أ *See* א *above*	خ *kh*	ش *sh*	غ *gh*	ن *n*
ب *b*	د *d*	ص *ṣ*	ف *f*	ه *h*
ت *t*	ذ *dh*	ض *ḍ*	ق *ḳ*	و *w*
ث *th*	ر *r*	ط *ṭ*	ك *k*	ي *y*
ج *j*	ز *z*	ظ *ẓ*	ل *l*	
ح *ḥ*	س *s*	ع '	م *m*	

2. Only the three vowels—a, i, u—are represented:

◌َ *a*	◌ِ *i*	◌ُ *u*

No account has been taken of the *imālah; i* has not been written *e*, nor *u* written *o*.

---

* In all other matters of orthography the spelling preferred by the Standard Dictionary has usually been followed. Typographical exigencies have rendered occasional deviations from these systems necessary.

3. The Arabic article is invariably written *al;* no account being taken of the assimilation of the *l* to the following letter; *e.g.*, *Abū al-Salt*, not *Abu-l-Salt; Nafīs al-Daulah*, not *Nafīs ad-Daulah.* The article is joined by a hyphen to the following word.

4. At the end of words the feminine termination is written *ah;* but, when followed by a genitive, *at; e.g.*, *Risālah dhāt al-Kursiyy*, but *Hī'at al-Aflāk.*

5. No account is taken of the overhanging vowels which distinguish the cases; *e.g.*, *‘Amr*, not *‘Amru* or *‘Amrun; Ya‘ḳūb*, not *Ya‘ḳūbun;* or in a title, *Kitāb al-Amānāt wal-I‘tiḳādāt.*

C.—Rules for the Transliteration of Russian.

All Russian names and words, except such as have become familiar to English readers in another form, as *Czar*, *Alexander*, *deciatine*, *Moscow*, are transliterated according to the following system:

А а	*a*	Н н	*n*	Щ щ	*shch*
Б б	*b*	О о	*o*	Ъ ъ	mute
В в	*v*	П п	*p*	Ы ы	*y*
Г г	*h, v,* or *g*	Р р	*r*	Ь ь	halfmute
Д д	*d*	С с	*s*	Ѣ ѣ	*ye*
Е е	*e* and *ye* at the beginning.	Т т	*t*	Э э	*e*
Ж ж	*zh*	У у	*u*	Ю ю	*yu*
З з	*z*	Ф ф	*f*	Я я	*ya*
И и І і	*i*	Х х	*kh*	Ѳ ѳ	*F*
К к	*k*	Ц ц	*tz*	Ѵ ѵ	*œ*
Л л	*l*	Ч ч	*ch*	Й й	*i*
М м	*m*	Ш ш	*sh*		

Rules for the Citation of Proper Names, Personal and Otherwise.

1. Whenever possible, an author is cited under his most specific name; *e.g.*, Moses Nigrin under *Nigrin;* Moses Zacuto under *Zacuto;* Moses Rieti under *Rieti;* all the Ḳimḥis (or Ḳamḥis) under *Ḳimḥi;* Israel ben Joseph Drohobiczer under *Drohobiczer.* Cross-references are freely made from any other form to the most specific one; *e.g.*, to Moses *Vidal* from Moses *Narboni;* to Solomon Nathan *Vidal* from Menahem *Meïri;* to Samuel *Kansi* from Samuel Astruc *Dascola;* to Jedaiah *Penini* from both *Bedersi* and *En Bonet;* to *John* of Avignon from Moses de *Roquemaure.*

2. When a person is not referred to as above, he is cited under his own personal name followed by his official or other title; or, where he has borne no such title, by "of" followed by the place of his birth or residence; *e.g.*, *Johanan* ha-Sandlar; *Samuel* ha-Nagid; *Judah* ha-Ḥasid; *Gershom* of Metz; *Isaac* of Corbeil.

3. Names containing the word *d'*, *de*, *da*, *di*, or *van*, *von*, *y*, are arranged under the letter of the name following this word; *e.g.*, de Pomis under *Pomis*, de Barrios under *Barrios*, Jacob d'Illescas under *Illescas.*

4. In arranging the alphabetical order of personal names *ben*, *da*, *de*, *di*, *ha-*, *ibn**, *of* have not been taken into account. These names thus follow the order of the next succeeding capital letter:

Abraham of Augsburg
Abraham of Avila
Abraham ben Azriel
Abraham de Balmes
Abraham ben Baruch
Abraham of Beja
Abraham ben Benjamin Aaron
Abraham ben Benjamin Ze'eb
Abraham Benveniste

---

* When Ibn has come to be a specific part of a name, as Ibn Ezra, such name is treated in its alphabetical place under "I."

THE
JEWISH ENCYCLOPEDIA

DREYFUS-BRISAC, LOUIS LUCIEN: French physician; born at Strasburg Feb. 3, 1849; died May 5, 1903; studied in his native city, and afterward at the Paris Faculté de Médecine, where he became house surgeon in 1873, and titular physician in 1878. He was clinic superintendent for ailments of children in 1879. In 1894 he became physician at the Lariboisière Hospital. He was appointed a member of the Superior Council for Public Aid at its formation in 1888, and was mainly instrumental in securing the passage, in 1893, of the law providing free medical aid. Dreyfus-Brisac is a member of the medical commission of the Women's Union of France. At the Paris Exposition of 1900 he was appointed vice-president of the second section of the Congress of Public Aid. Among his publications are: "De l'Ictère Hémaphéique" (1878); "De l'Asphyxie Non Toxique" (1882); "Traitement du Diabète Sucré" (1894); "De la Phthisie Aiguë" (in collaboration, 1892). He is also the author of papers in the "Gazette Hebdomadaire" and elsewhere. He has been Chevalier of the Legion of Honor since 1893.

DRIBIN. See MOHILEV GOVERNMENT.

DRINK-OFFERING. See SACRIFICE, THE.

DRINKING-VESSELS: Less is known of the form and material of the drinking-vessels of the Hebrews than of those of the Greeks and the Romans. The water-skin ("ḥemet," Gen. xxi. 15, 19; "ob," Job xxxii. 19; and "nod," Judges iv. 19), made of the hide of the goat and the kid, and still used among the Bedouins, certainly dates from very early times. It served both as a receptacle for water and for milk and as a drinking-vessel. The Israelites probably first saw earthen drinking-vessels in Palestine, where they were used by the common people. The wealthy had metal—usually silver—ones (Gen. xliv. 2), while those of the kings were of gold (I Kings x. 21; II Chron. ix. 21 [A. V. 20]) or probably of bronze. It may be safely assumed that these metal vessels were first imported by the Phenicians, and that the Israelites learned from them how to work the metals (compare I Kings vii. 12 *et seq.* [A. V. 13]); hence it is probable that the drinking-vessels of the Israelites resembled very closely those in use among the Phenicians.

In regard to form the vessels may be divided into two groups; viz., (1) cups and (2) bowls. A cup was usually called "kos," a designation applied both to the cup of the poor man (II Sam. xii. 3) and to that of the king (Gen. xl. 11, 13, 21). I Kings vii. 26 shows that the rim was often bent, and Isa. li. 17, 22 indicates that the sides were bulging. In Gen. xliv. 2, 12, 16 *et seq.* the term "gabi'a" is used to designate "Joseph's cup," which, according to Jer. xxxv. 5, seems to have been larger than a kos, and was probably a chalice or a goblet. The same applies perhaps to "ḳubba'at" (Isa. li. 17), to which the accompanying word "kos" is probably a gloss. "Kefor" (I Chron. xxviii. 17; Ezra i. 10, viii. 27) means "cup," as is evident from the Assyrian "kapru," and from the Neo-Hebraic and Judæo-Aramaic "kefor" (compare Euting's combination with כפר = "bulging," in Nabatæan Inscription No. 27).

The bowl, which was called "sefel," was used for holding milk (Judges v. 25) and for drawing water (Judges vi. 38). Judges v. 25 shows that in addition to the bowls of ordinary size there were larger ones, evidently designed for guests of honor, who were served with double portions (Gen. xliii. 34; I Sam. ix. 23 *et seq.*), not only of meat, but also of drink; hence the use of the phrase "sefel addirim" (lordly dish).

The word "saf" mentioned in I Kings vii. 50; II Kings xii. 14; and Jer. lii. 19 probably refers to a bowl also. In Ex. xii. 22 and Zech. xii. 2 a saf is used at the sacrifice. The "aggan" mentioned in Cant. vii. 3 is not a bowl for drinking, but rather for mixing wine with spices; hence *κρατήρ* in Septuagint. The "kad"—mentioned in Gen. xxiv. 14 *et seq.*, which was carried on the shoulder, and from which Rebekah gave Eliezer water (Gen. xxiv. 18)—was used for drawing water (comp. Eccl. xii. 6) rather than as a drinking-vessel (comp. "deli," Isa. xl. 15). Jugs were also used as drinking-vessels; in I Sam. xxvi. 12, 16 a "ẓappaḥat" (cruse) is mentioned, probably a bulging jug carried on journeys as a drinking-vessel. "Nebel," which has a similar meaning, may have originally designated a water-skin (I Sam. i. 24, x. 3, etc.), but later it undoubtedly signified an earthen vessel (Isa. xxx. 14; Lam. iv. 2). "Baḳbuḳ" (Jer. xix. 1, 10; I Kings xiv. 3), also meaning an earthen vessel, was perhaps used for drinking purposes.

E. G. H. W. N.

DRISSA: Russian city in the government of Vitebsk. The population in 1897 was 4,237, of whom 2,856 were Jews. There were 657 artisans (including 229 masters) and 158 day-laborers. Among its charitable institutions may be noted the Biḳḳur Ḥolim, and among its educational institutions a county school with 120 pupils (7 of whom are Jews) and a day-school with 70 pupils (12 of whom are Jews).

Drissa existed as early as the fourteenth century, and Jews are mentioned there in connection with the lumber trade in 1547 ("Regesty i Nadpisi," No. 464). Situated on the Drissa, an affluent of the Düna, Drissa was a center for the export of lumber and grain to Riga and Danzig, a trade which was entirely in the hands of the Jews.

H. R. S. J.—M. R.

DRIVER, SAMUEL ROLLES: English Christian Hebraist; born at Southampton Oct. 2, 1846; regius professor of Hebrew (in succession to Pusey), and canon of Christ Church, Oxford, since 1883; member of the Old Testament Revision Company, 1876–84.

Together with T. K. Cheyne and Robertson Smith, Driver has been one of the foremost champions of Biblical criticism in England. Driver approached it from its linguistic side ("Jour. of Phil." 1882, pp. 201–236). His first contribution, "A Treatise on the Use of the Tenses in Hebrew" (Oxford, 1874; 3d ed., 1892), has remained the most complete presentation of the subject. Driver has defended his position before several Church congresses (*e.g.*, in 1883); his attitude has frequently been criticized from a theological point of view (see, for example, "The Guardian," 1890, pp. 1419 *et seq.*; Robinson, "Early Religion," p. xii.), while Cheyne complains that Driver is not a sufficiently representative exponent of modern higher criticism ("Introduction to the Book of Isaiah," p. xi.). In matters of criticism Driver has always taken a conservative view, showing much moderation and sympathy with the orthodox position. For him "the Old Testament is not a systematic treatise on theology, but the record of a historical revelation, which, just because it was historical, passed through many successive phases, and was completed gradually"; and the conclusions at which he arrives "affect, not the fact of revelation, but only its form. They help to determine the stages through which it passed, the different phases which it assumed, and the process by which the record of it was built up. They do not touch either the authority or the inspiration of the scriptures of the Old Testament" (compare his "Isaiah," Preface, and "Introduction," p. vii., New York, 1891). He takes a similar position in regard to the results of archeological and anthropological research; holding that though these results have taken the Hebrews out of the isolated position which they, as a nation, seem previously to have held, they "do not, in any degree, detract from that religious preeminence which has always been deemed the inalienable characteristic of the Hebrew race" ("Hebrew Authority," p. 7).

Driver's critical works deal with the most important books of the Old Testament, and his "Introduction" is still the standard English work on the subject. Driver's chief productions are his contributions to "The Holy Bible with Various Renderings and Readings" (together with Cheyne, 1876); known from the 3d ed. onward as "The Variorum Bible," 1888; "Notes on the Hebrew Text of the Books of Samuel," Oxford, 1890; "An Introduction to the Literature of the Old Testament," 1891; 6th ed., 1897; "Sermons on Subjects Connected with the Old Testament," 1892; "Isaiah: His Life and Times," in the "Men of the Bible" series, 1893; "Critical and Exegetical Commentary on Deuteronomy," 1895, in the "International Critical Commentary" series; "Joel and Amos," 1897, and "Daniel," 1900, in the "Cambridge Bible for Schools"; "The Parallel Psalter," 1898, and a critical edition of Leviticus, in the "Sacred Books of the Old Testament," ed. Haupt, 1894; "Hebrew Authority," in "Authority and Archæology, Sacred and Profane," ed. D. G. Hogarth, 1899. To the "Studia Biblica" (vol. i., Oxford, 1885) Driver has contributed a paper on "Recent Theories on the Origin and Nature of the Tetragrammaton"; to the "Jew. Quart. Rev." (i. 258 *et seq.*), an article on "The Origin and Structure of the Book of Judges"; and to Neubauer and Cowley's edition of Ben Sira he has added a glossary and some notes ("Original Hebrew of Ecclesiasticus," 1897, p. xv.; compare "Oxford Magazine," viii., Nos. 11 and 12, 1890; and "The Guardian," 1896, p. 1029).

Driver has edited two small rabbinical works: a commentary on Jeremiah and Ezekiel by Moses ben Sheshet, London, 1871, and one on Proverbs, attributed to Abraham ibn Ezra, Oxford, 1880. He has also been a collaborator on the second edition of Smith's "Bible Dictionary," on Hasting's "Dictionary of the Bible," and on Cheyne and Black's "Encyclopædia Biblica," and is coeditor, with Professors Brown and Briggs, of the Clarendon press edition of Gesenius.

J. G.

DROHOBICZER, ISRAEL NAḤMAN BEN JOSEPH: Talmudic scholar and preacher of Stanislaw (according to Ghirondi he came from Ostrog, Russia); died at Safed early in the nineteenth century. He was a pupil of Israel Ba'al Shem-Ṭob, and after having been rabbi and rosh yeshibah in several towns of Germany, he undertook a long journey in order to publish his works. He stayed for several years at Leghorn, where his books were printed; and then went to Palestine, where he died. He wrote the following works: "Emet le-Ya'aḳob," funeral dirges, 1704; "Ḥemdat Yisrael," a commentary on Ecclesiastes, on "Elef Alfin," and on "Alef Bet" of Elijah ha-Levi, 1820; "Peḳuddat ha-Melek," containing novellæ on Maimonides, and funeral dirges, 2 vols.

BIBLIOGRAPHY: Steinschneider, *Cat. Bodl.* col. 1166; Nepi-Ghirondi, *Toledot Gedole Yisrael*, pp. 170, 180; Zedner, *Cat. Hebr. Books Brit. Mus.* p. 211.

L. G. M. SEL.

DROMEDARY: A variety or choice breed of the camel proper, or one-humped camel; much taller and longer in the leg than the ordinary camel, of a more slender shape, and generally of a very light color. Its speed is considerable, reaching eighty miles a day. Zoologists include all varieties of one-humped camel under the name *Camelus dromedarius*, in contradistinction to the *Camelus bactrianus*, or two-humped camel. As the two species interbreed successfully and the offspring is able to procreate, some assume that they are only two varieties of one species; but as the *Camelus dromedarius* has not yet been found in a wild state, the question can not be settled.

The word "dromedary" occurs four times in the English versions; viz., twice in both the Authorized and the Revised Version as a rendering of the Hebrew "beker" (Isa. lx. 6) or "bikrah" (Jer. ii. 23), and twice in the Authorized Version alone, to render the Hebrew "rekesh" (I Kings v. 8 [A. V. iv. 28] and Esth. viii. 10). But in neither case is the rendering correct. "Rekesh" means rather a swift steed, as the Revised Version has it; and "beker" designates the young of the camel up to nine years, and not any special variety or breed.

E. G. H. H. H.

DROPSIE, MOSES AARON: American lawyer, and president of Gratz College; born in Philadelphia, Pa., March 9, 1821. Beginning life as a storeboy, he first learned watchmaking, and afterward studied law under Benjamin Harris Brewster, subsequently attorney-general of the United States. After his admission to the bar (in 1851) he took an active interest in public affairs, was the candidate of the Whig party for mayor of the Northern Liberties district of Philadelphia in 1852, and, like most members of the party, was strongly opposed to slavery.

Dropsie has been instrumental in the development of railways in Philadelphia; and after acting as president of the Lombard and South Street Passenger Railroad (1862–82), he became (1888) president of the Green and Coates Street Passenger Railroad, which position he still holds (1903).

In 1870 he became chairman of the commission appointed by the legislature for the construction of a bridge over the Schuylkill River.

Dropsie has always taken a deep interest in Jewish charitable and educational work. He has been a director of the Hebrew Fuel Society; a member of the board of "adjunta" (directors) of the Sephardic Congregation Mickvé Israel; and was one of the charter members, and for more than forty years an officer, of the Hebrew Education Society of Philadelphia, having acted as secretary, vice-president, and (twice) president. He is now (1903) an honorary life-member of the board of officers.

Dropsie was also president of Maimonides College from 1867 to 1873, and has been president of the Philadelphia branch of the Alliance Israélite Universelle since 1883 and of Gratz College since its foundation in 1893. From 1856 to 1861 he was president of the Mercantile Club.

Owing to failing eyesight, Dropsie in 1885 retired from the practise of the law. He has translated and edited Mackeldey's "Handbook of the Roman Law" (1883), and in addition has published (1892) a separate work on "The Roman Law of Testaments, Codicils, and Gifts in the Event of Death (Mortis Causa Donationes)."

Besides a "Panegyric on the Life of the Rev. Isaac Leeser," Dropsie has written pamphlets on "The Life of Jesus from and Including the Accusation Until the Alleged Resurrection, with an Account of the Cross-Crown of Thorns," and "Reform Judaism and the Study of Hebrew."

DRUCKER, ḤAYYIM B. JACOB (also known as **Arbich**): Printer of Amsterdam at the end of the seventeenth and the beginning of the eighteenth century. His activity as a typesetter, publisher, author, and translator extends from 1680 to 1724. He worked successively in the printing establishments of David Tartas, of Moses Mendez, and of Asher Anshel & Co. He edited in 1690 a Judæo-German translation of Manasseh b. Israel's "Miḳweh Yisrael," and of the "Masse'ot Binyamin" (Itinerary of Benjamin of Tudela). He published the following works: in 1706, his own "Leb Ḥakamim" containing a treatise on morals, together with the ethical work "Leb Ṭob," by Isaac b. Eliakim of Posen, both in Judæo-German; in 1711, a new edition of the "Ẓe'enah u-Re'enah"; in 1718, a calendar for the year 5479 (=1719); and in 1722, Isaac Aboab's "Menorat ha-Ma'or," with the Judæo-German translation of Moses Frankfurter, which Frankfurter himself revised. Drucker had two sons, Hendel Elhanan and Jacob, both of whom were the printers and publishers of Judæo-German translations of various works.

DRUCKER, MICHAEL: Musician; born in Russian Poland Dec. 31, 1861. At the age of five he began the study of the violin under his father, and in 1875 attended the Kiev Conservatorium. He became concert-director in Kiev in 1877, and later leader of the orchestra at the operetta theater there. He then went to Warsaw to complete his studies. After making extended concert tours in Sweden, Norway, France, and Germany, he became concert-director at the Lemberg opera-house (1880), where he remained for thirteen years. Then he removed to Vienna, where he is (1903) active as a virtuoso and music-teacher.

DRUISK. See Kovno.

DRUMONT, EDOUARD ADOLPHE: French anti-Semitic author and former deputy from Algeria; born at Paris on May 3, 1844. Drumont's ancestry is not Jewish, as has been sometimes asserted. His ancestors came from Lille, where they were porcelain-painters. Drumont studied at the Lycée. When Drumont was but seventeen his father died, and left him to earn his own livelihood.

He entered the Préfecture de la Seine, but soon left this for the profession of letters. At first he worked on the staff of several daily, weekly, and monthly periodicals. He was one of the chief collaborators on the "Liberté," "Gaulois," and "Petit Journal." During the seventies he published several volumes dealing with historical and theatrical themes.

In 1886 Drumont withdrew from the staff of the "Liberté" (owned by Péreire, a Jew), claiming that the newspapers were unduly controlled by the Jews. He then issued his famous work in two volumes, "La France Juive," a book which may be regarded as the beginning of the anti-Semitic movement in France. It gives an account of the Jews of that country, and analyzes the Jewish element of the French nation. The work, of course, is written from an intensely prejudiced point of view. It has passed through more than one hundred editions, arousing wide-spread interest, and was soon translated into several languages. Because of it, Drumont fought several duels, notably with Charles Laurent and Arthur Meyer. In addition, Drumont wrote the following books to explain his previous work: "La France Juive Devant l'Opinion" (1886), "La Fin d'un Monde" (1888), "Dernière Bataille," "Testament d'un Antisémite" (1889), etc.

Meantime the Panama affair, in which several Jewish financiers were prominently involved, gave to Drumont's agitation great popularity, and in September, 1892, he founded the "Libre Parole," a daily journal of rabid anti-Semitic tendencies. For his anti-Panama articles, Drumont was condemned to three months' imprisonment. In 1893 he was an unsuccessful candidate for the representation of Amiens; the following year he retired to Brussels. The Dreyfus affair helped him to regain popularity, and in 1898 he returned to France and was elected deputy for the first division of Algiers, but was defeated as a candidate for reelection in 1902.

D. A. M. F.

DRUNKENNESS IN LAW: The Talmud speaks only once of drunkenness in its relation to responsibility for contracts or for crimes; namely, in the following baraita ('Er. 65a):

> "A drunken man's purchase is a purchase; his sale is a sale; if he commits a capital offense, they put him to death; if he does an act punishable by stripes, they flog him; in a word, he is deemed of sound mind for all purposes, except that he is free from prayer [elsewhere the recital of the prayer is forbidden to the drunken man]. R. Ḥanina says: 'All this is true only until the man has gone as far in his drunkenness as Lot went; but when he has gone as far as Lot, he is free from everything.'"

These rules are followed by all the codes; *e.g.*, Maimonides, "Yad," Mekirah, xxix.; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 222, 22.

Speaking broadly, these principles agree with those of the English-American law. Compare, however, Fraud and Mistake, Law of.

L. G. L. N. D.

DRUSILLA: Daughter of Agrippa I. and Cypros (Josephus, "Ant." xviii. 5, § 4; *idem*, "B. J." ii. 11, § 6); born in 38. She was only six years old at her father's death (44), and was subjected to the insult of having the portraits of herself and two sisters, Berenice and Mariamne, carried into the houses of ill-fame of Cæsarea by the Roman soldiers, who rejoiced over Agrippa's death ("Ant." xix. 9, § 1). The sisters did not enjoy a good reputation, the beautiful Drusilla being even worse than her elder sisters. Her father had betrothed her to Epiphanes, son of Antiochus of Commagene; but as Epiphanes refused after Agrippa's death to keep his promise to embrace Judaism, Drusilla was married by her brother Agrippa II. to Azizos, King of Emesa, who accepted the Abrahamic covenant ("Ant." xx. 7, § 1).

Drusilla dissolved her marriage with Azizos about the year 53, the newly appointed procurator of Judea, Felix, having fallen in love with her. With the help of a Cypriote magician, whose name is variously given as "Atomos" and "Simon," he induced her to follow him, though a pagan, and to become his wife, contrary to the laws of her people (Acts xxiv. 24). Envy of her sister Berenice aided in driving Drusilla to this step.

By Felix, Drusilla had a son, Agrippa, who, together with his wife, perished during the eruption of Vesuvius in 79 ("Ant." xx. 7, § 2).

DUAL: Form of a noun or verb indicating its application to two persons or things. Arabic is the only Semitic language that has the dual form for the verb as well as for the noun; in Syriac only a few traces of the dual have been preserved. In Hebrew the dual has been preserved in the case of the noun only, its suffix being "ayim." It is used chiefly to designate objects that are found naturally in pairs, especially members of the human body or of the bodies of animals. It is also used of the teeth, because they form a pair of rows ("shinnayim"). In addition, the dual is used for those products of human skill which are constructed in such a way that the singular would not apply to them; *e.g.*, "melkaḥayim" (tongs), "misparayim" (scissors). The numeral "shenayim" (two) is likewise a natural dual, as are also such expressions as "kiflayim" (twofold), "kil'ayim" (two kinds; corresponding to the Ethiopian numeral for "two").

But the dual is occasionally used to indicate two objects not naturally connected; *e.g.*, "yomayim" (two days), "shebu'ayim" (two weeks), "shenatayim" (two years), "ammatayim" (two ells), Neo-Hebrew "ṭefaḥayim" (two spans). The numbers 200 and 2,000 are also designated by the dual: "matayim," "alpayim." A special group of the dual is formed by geographical names, principally those of cities ending in "ayim"; for example, "Ramatayim" (A. V. "Ramathaim"), "Ḥoronayim" (A. V. "Horonaim"), "Ḳiryatayim" (A. V. "Kirjathaim," "Kiriathaim"), etc. In one of such names the dual form has been contracted to "an"; namely, "Dothan" for "Dothayin" (Gen. xxxvii. 17). To this group belongs also the Hebrew name of Egypt, "Miẓrayim" (A. V. "Mizraim" = Upper Egypt and Lower Egypt); also "Aram-Naharayim" (A. V. "Aram-naharaim" = the Aram of the two rivers Euphrates and Tigris, or, according to a recent view, Euphrates and Chaboras). "Yerushalayim," however, the name of Jerusalem, according to the Masoretic reading of the name ירושלם, must not be explained as a dual, as it is one of several words having the suffix "ayim" that are not duals. Thus, "mayim" (water) and "shamayim" (heaven) are plural forms, the "y" preceding the plural ending "im" being radical. This was recognized by as early a grammarian as Abu al-Walid ("Luma'," pp. 285 *et seq.* = "Riḳmah," pp. 172 *et seq.*); while Abraham ibn Ezra ("Sefer ha-Shem," i.; commentary to Gen. i. 2) holds that they are duals, and attempts to explain them as such on the ground of natural philosophy.

Ḥayyuj and Abu al-Walid have borrowed a term from Arabic grammar for the dual, "tathniyyah." Abu al-Walid devotes to the dual, as a variant of the plural, a short chapter of his chief work, "Luma'" (pp. 247 *et seq.* = "Riḳmah," pp. 148 *et seq.*). Ibn Ezra calls the dual "leshon shenayim"; the later Jewish grammarians use the term "ribbui ha-zugi"; *i.e.*, "paired plural."

G. W. B.

DUALISM: The system in theology which explains the existence of evil by assuming two coeternal principles—one good, the other evil. This dualism is the chief characteristic of the religion of Zoroaster, which assigns all that is good to Ahura-mazda (Ormuzd), and all that is evil to Angro-mainyush (Ahriman; see Zoroastrianism). Against this dualism, which may have some basic elements in Chaldean mythology, the seer of the Exile protests when accentuating the doctrine that the Lord "formed the light and created darkness," that He "is the Maker of peace and the Creator of evil" (Isa. xlv. 7). The verse has found a place in the daily liturgy (see Liturgy), but with the change of the word "ra'" (evil) into "ha-kol" (all), prompted by an aversion to having "evil" directly associated with the name of God (see Ber. 11b; compare Num. R. xi. 16). The same idea occurs in Lam. (iii. 38, Hebr.): "Out of the mouth of the Most High cometh there not evil and good?" No less emphatic are the Rabbis in their opposition to the dualistic views of Parseeism when they teach that both death and the evil desire ("yeẓer ha-ra'") are agencies working for the good (Gen. R. ix.; compare Sanh. 39a, 91b; Shab. 77b; Maimonides' preface to Mishnah commentary; see Sin).

Zeller ("Gesch. der Philosophie," 2d ed., iii. 250) mistakenly ascribes dualistic notions to the Essenes (Hilgenfeld, "Ketzergesch. des Urchristenthums," 1884, p. 109; see Essenes). On the contrary, Philo ("Quod Omnis Probus Liber," § 12) says that according to them "God only produces what is good, and nothing that is evil." They beheld in life only certain contrasts—opposing tendencies of purity and impurity, of good and evil—and, following ancient Chaldean traditions, placed the one to the right (toward the light) and the other to the left (toward the night) (Josephus, "B. J." ii. 8, § 9; "Clementine Homilies," ii. 15, 33; xix. 12; "Recognitiones," iii. 24)—views which are found also among the Gnostics and the Cabalists (see Jew. Encyc. iii. 458, *s.v.* Cabala). Of course, the tendency toward evil was found by them, as well as by Philo, in matter—the things of the senses—in contradistinction to the spiritual world (Zeller, *l.c.* p. 348; see Philo); but this does not contradict the belief in God as Creator of the visible world. There were, however, Gnostics who would ascribe the creation of the visible world to the demiurge ("artificer"), an inferior god mentioned in Plato's "Timæus" (§ 29); and this doctrine of "two powers" (שתי רשויות), frequently alluded to in Talmud and Midrash (Ḥag. 15a; Gen. R. i.; Eccl. R. ii. 12; see Elisha ben Abuyah), actually led its followers to the dualistic view ascribing evil to the inferior god. Thus dualism became the chief doctrine, on the one hand, of the Manicheans, a sect founded on Zoroastrianism, and, on the other hand, of the anti-Judean Christian Gnostics, who opposed the Old Testament as recording the dispensation of an inferior god, the author of evil (Hilgenfeld, *l.c.* pp. 192, 209, 332, 383, 526; see Gnosticism; God; Manicheans).

Among Jewish philosophers Saadia ("Emunot we-De'ot," ii.) takes especial pains to demonstrate the untenability of dualistic definitions of the God-head. Were there two creators, it must be assumed that only with the help of the other could each create, and that therefore neither is omnipotent. Light and darkness do not prove the contrary, for darkness is only a negation of light (see Saadia). In the Maimonidean system the difficulty of reconciling the existence of evil with God's unity is solved by the assumption that evil is only negative ("Moreh," iii. 8). K.—E. G. H.

DUARTE, LUIS (*alias* **Luis Noble**): Chilean Marano; born in Evora, Portugal, at the end of the sixteenth century. He served for six years in the Chilean army, and, being accused of stealing a crucifix, was imprisoned by order of the Inquisition in Callao. A Jesuit induced him to confess, promising him speedy acquittal. He, accordingly, admitted (Aug., 1614) his secret adherence to Judaism. As a concession to his voluntary self-denunciation, he was admitted to "secret reconciliation"; and was sentenced to do "spiritual penance." The alcaldes, considering this punishment inadequate, had him whipped and sent to the galleys.

DUARTE DE PINEL. See Usque, Abraham.

DUBLIN: Chief city of Ireland. The Jewish community in Dublin is one of the oldest of those which have been founded in Great Britain since the Resettlement, having been established in the first half of the eighteenth century. In the year 1748 Michael Phillips acquired some freehold ground at Drumcondra, opposite Ballybough Bridge, which he presented to the Jews of Dublin for a cemetery. Some years later the Jews of Dublin sought pecuniary assistance from their Polish and German coreligionists in London, for the purpose of building a wall round their cemetery. Their applications were refused, but they received the desired help from the Bevis Marks congregation, which, besides defraying the expenses of the work, sent an agent from London to supervise it. The title-deeds of the Dublin Jewish cemetery were then deposited at Bevis Marks, with the archives of which congregation they are still to be found.

Toward the end of the eighteenth century (about 1791) the Dublin community worshiped in Marlborough street, "in the yard of the glass-works." But the congregation fell into decay, and its effects were seized and sold for rent. Two scrolls of the Law were, however, rescued, and for some time they remained in the possession of "the brothers Cohen." Other scrolls, which had been borrowed from the Bevis Marks congregation, appear to have been previously returned.

The congregation was resuscitated in 1822, when the few remaining families joined to open a place of worship at 40 Stafford street, the residence of J. W. Cohen. In 1829 this place of worship was enlarged, and about the same time "the brothers Cohen" presented to the congregation the two scrolls of the Law which they had rescued from the former building. Six years later the congregation removed to Mary's Abbey, where it had bought a meeting-house for £300. In 1842 the Mary's Abbey congregation expressed a wish to affiliate with the Portuguese Synagogue of London, but nothing appears to have resulted from the negotiations. Subsequently the congregation removed to their present building in Adelaide Road.

In recent times, in addition to the principal synagogue in Adelaide Road, there have grown up a number of minor synagogues, or "hebrahs," of which at present there are five, situated respectively in St. Kevin's Parade, Camden street, Lennox street, Oakfield Place, and Lombard street. The principal ministers have been J. Sandheim, Philip Bender, and L. Mendelsohn.

Other Jewish institutions are: the Board of Guardians (founded 1882), the Ladies' Benevolent Society, Hachnosath Orechim, and Medical Relief Society (founded 1888), and the National and Hebrew School (founded 1893), in Adelaide Road, which enrolls 160 scholars. The present Jewish population of Dublin is about 2,700. The Dublin community has for many years included a large number of cultured Jews, who have taken the highest distinctions at Trinity College.

DUBNER MAGGID. See Jacob ben Wolf Kranz of Dubno.

DUBNICZA: Bulgarian town; 22 miles south of Sofia, and on the left bank of the Jerma. In tracing the origin of its population by the names of the families at present found there, one discovers French, Spanish, Arabian, Hungarian, and other elements. It is known that there were Jews at Dubnicza in 1536. Among the chief rabbis of Dubnicza were Solomon Moreno (1680–1750) and Abraham b. Samuel Alkalai (1793–1811). The Kirjali, a band of brigands that terrorized the Balkans at the end of the eighteenth century, occupied the town several times. In 1793 and again in 1794, a tribute was imposed amounting to 3,000 piasters on the first occasion, and 300 on the second. The share contributed by the wealthier Jews was determined by the assessments of Chief Rabbi Alkalai. It also appears from "Ḥesed le-Abraham" that the community of Dubnicza paid two classes of taxes not demanded from Jews anywhere else. Abraham Alkalai (1741–1811), a celebrated rabbi who was born at Salonica, first became prominent at Dubnicza, where he officiated for twenty years. The town esteemed him so highly that his tomb has become an object of pilgrimage.

Dubnicza has a population of 8,000, about 1,150 being Jews. The latter are chiefly engaged in various trading and mechanical occupations, and the carpet-weaving industry is entirely in their hands. The synagogue dates from 1825. There are a boys' school with an attendance of 216, and two societies, a biḳḳur ḥolim and an association of Zionists. The cemetery at Dubnicza contains a tombstone bearing the date 5330 (1569) and the name "Mosse b. Mordekhai Frances." There are also some synagogue appurtenances dating from 1740.

Bibliography: *Rumanian Jewish Year-Book*, Bucharest, 1888.

D. M. Fr.

DUBNO: Town in the government of Volhynia, Russia. According to the census of 1897 it had a population of 13,785, including 5,608 Jews. The chief sources of income for the latter are in trading and industrial occupations. There are 902 artisans, 147 day-laborers, 27 factory and workshop employees, and 6 families cultivate 90 deciatines of land. The town has a Jewish hospital, but no educational institutions except several ḥadarim. The earliest date given in connection with the Jews of Dubno is the beginning of the seventeenth century. In 1650 there were in Dubno 47 Jewish and 141 Christian taxable households.

Rabbis.

The following list of Dubno rabbis extends from 1600 to the present time: Isaiah ha-Levi Hurwitz (1600–06), author of "Shene Luḥot ha-Berit." Samuel b. Aaron ha-Levi Hurwitz (1625–30), cousin of Isaiah Hurwitz. Ẓebi (Hirsch) b. Ozer, son-in-law of Abraham Ḥayyim Shor, chief rabbi of Satanow; author of ב״ח. Meïr b. Moses Ashkenazi, the father of Shabbethai Kohen (ShaK); died at Dubno Nov. 25, 1649. Judah ha-Ḥasid, martyred 1649. Abraham Heilprin (1660–62), son-in-law of the physician Jehiel Michael Epstein. Naḥman b. Meïr ha-Kohen Rapoport (also called Naḥman Lifsches); died in 1674; previously rabbi of Kremenetz (Volhynia) and Belz (Galicia); took part in the Council of Four Lands at the fair of Jaroslaw. Moses b. Joseph, died at Lemberg May 22, 1684. Israel b. Mordecai Yolis (also called Israel Swinhar). Simḥah b. Naḥman ha-Kohen Rapoport, died at Szebreczin July 15, 1717; son-in-law of Israel b. Mordecai; replaced the latter in the rabbinate of Dubno from 1682 to 1688; rabbi of Grodno to 1714, of Lublin to 1717; called to the rabbinate of Lemberg in the same year; he died on his way there. Joseph b. Judah Yüdel of Lublin, died April 13, 1706; wrote a work entitled "Ne'imah Ḳedoshah," containing moral precepts and a poem for the Sabbath. Samuel b. Shalom Shakna of Cracow, died at Brody June 22, 1729. Isaac b. Saul Ginzburg (1712–15). Eleazar b. Issachar Baer of Cracow (1715–1719), maternal grandfather of Ezekiel Landau. Heschel b. Eleazar (also called R. Heschel "der Kleiner"), died July 25, 1729. Zalman Ephraim b. Saul. Abraham b. Samuel Kahana, died 1741; previously rabbi of Brody and Ostrog (Volhynia). Isaac

Moses b. Abraham Kahana (d. 1745). Saul b. Aryeh Löb, born at Reischo 1717; died at Amsterdam June 19, 1790; son-in-law of Abraham Kahana and author of "Binyan Ariel" (1745-55). Naphtali Herz b. Ẓebi Hirsch (d. May 17, 1777). Ze'eb Wolf b. Naphtali Herz, born at Brody 1745; died at Dubno 1800; previously rabbi of Radzivil, Volhynia; his responsa were published in the "Tif'eret Ẓebi" of Ẓebi Hirsch, rabbi of Brody (Lemberg, 1811). Nathan ha-Levi Hurwitz. Ḥayyim Mordecai Margaliot, brother-in-law of Nathan Hurwitz and author of "Sha'are Teshubah." Ḥayyim Jacob b. Ze'eb Wolf, previously rabbi of Rovno, Volhynia; died Sept. 25, 1849. David Ẓebi Auerbach, son-in-law of Ḥayyim Jacob and author of "Malbushe Ṭaharah" (unpublished). Menahem Mendel Auerbach, son of David Ẓebi, is the present (1903) incumbent.

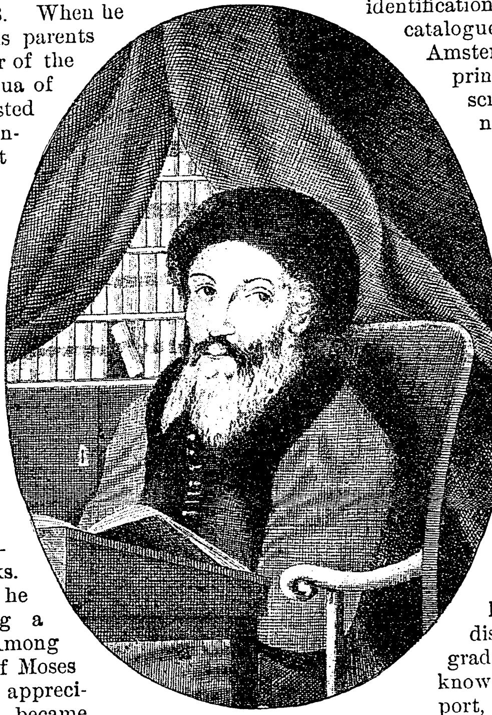
H. R. S. J.—M. SEL.

DUBNO, SOLOMON BEN JOEL: Russian poet, grammarian, and student of the Masorah; born at Dubno, Volhynia, Oct., 1738; died at Amsterdam June 26, 1813. When he was fourteen years old his parents married him to the daughter of the Talmudist Simḥah ben Joshua of Volozhin. Having exhausted the knowledge of his Volhynian instructors, Dubno went to Galicia, studying there for several years Biblical exegesis and grammar under the direction of Rabbi Solomon of Cholm. Dubno soon became proficient in these branches of Jewish science, and was charged by his master with the revision and publication of his work on the Hebrew accents, "Sha'are Ne'imah" (Frankfort-on-the-Main, 1766).



Solomon Dubno.

From 1767 to 1772 Dubno lived at Amsterdam, attracted by its rich collections of Hebrew books. On leaving Amsterdam he settled in Berlin, earning a livelihood by teaching. Among his pupils was the son of Moses Mendelssohn, who, highly appreciating Dubno's scholarship, became his patron and friend. Dubno wrote a commentary for Mendelssohn's translation of the Bible, of which only a portion—the "'Alim li-Terufah" (Amsterdam, 1778)—was published. See JEW. ENCYC. iii. 192, *s.v.* BIBLE TRANSLATIONS.

During his stay at Wilna Dubno wrote a poem, preceded by a dissertation on the writing of the Scrolls, entitled "Birkat Yosef" (The Benediction of Joseph), published at Dyhernfurth, 1783. After the death of Mendelssohn, Dubno stopped for a short time in Frankfort-on-the-Main, and then returned to Amsterdam. There, at first fêted, and later ignored, deriving a scanty income from the loan of the books from his rich library, he remained until his death.

In addition to the works mentioned above, Dubno wrote the following: (1) Poems, appearing (p. 34) among those of Immanuel, published by Löb Wolf at Berlin, 1776; in the "Bikkure To'elet" (pp. 4, 114), published by the Anshe To'elet Society of Amsterdam; and in Heidenheim's "Sefer Ḳerobot." (2) "Ebel Yaḥid," an elegy on the death of Jacob Emden, published at Berlin, 1776. (3) A preface to Moses Ḥayyim Luzzatto's poem "La-Yesharim Tehillah," *ib.* 1780. (4) A work on the geography of Palestine, promised by him in his commentary on Genesis, where he displayed a profound knowledge of the subject. Luncz ("Jerusalem," 1892, pp. 137 *et seq.*) identifies this work with the "Ahabat Ẓiyyon" of Dubno's father-in-law, Simḥah ben Joshua; but as this is a mere plagiarism from the Karaite Samuel ben David's story of his voyage to Palestine, published in Gurland's "Ginze Yisrael," it is probable that Lehren ("Catalogue," p. 247) is right in doubting the identification. (5) "Reshimah" (Register), catalogue of his library, published at Amsterdam, 1814. It contains 2,076 printed works and 106 manuscripts. Dubno left a great number of essays, poems, etc., which are still extant in manuscript.

L. G. I. BR.

DUBNOW, SIMON (SEMION MARKOVICH): Russo-Jewish historian; born at Mstislavl, government of Mohilev, 1860. He attended the Jewish government school of his native town, and then the district school, whence he was graduated in 1877. In search of knowledge and the means of support, Dubnow moved from place to place, visiting Wilna, Dünaburg, Mohilev, and Smolensk. He earned his livelihood by tutoring, and at the same time prepared himself for university work. In 1880 he settled in St. Petersburg, where he soon became a contributor to the "Russki Yevrei," publishing his first article on the historical development of Jewish thought under the title "Glavnyye Momenty iz Istorii Yevreiskoi Mysli." About this time (1881) he also assumed charge of the foreign news department of the Russo-Jewish periodical "Razsvyet." Disapproving the pan-Palestinian policy of this periodical, Dubnow in 1882 transferred his literary activity to the "Voskhod," on which periodical he has since remained an active collaborator in the field of Russo-

His Journalistic Activity.

Jewish history and Russian Judaism in general. Among the more important of his early contributions are his articles on Shabbethai Ẓebi, under the title "Sabbatai Zewi i Pseudomessianizm v XVII. Vyekye" (in "Voskhod," 1883, Nos. 9–12), and on the Frankists, entitled "Frank i Yevo Sekta Christianstvuyushchikh" (*ib.* 1883, Nos. 1–10). In 1883 he assumed charge of the critical department of the "Voskhod." He also wrote an essay on reform in the Jewish religion, entitled "Kakaya Samoemancipatziya Nuzhna Yevreyam" (*ib.* 1883, Nos. 5–8), which created a stir in Orthodox circles. Among his other valuable contributions on the Jewish question may be numbered his articles on the civic condition of the Jews and on the reform of Jewish school education in Russia, and his critical reviews in "Voskhod," 1885 to 1887. Another important work of Dubnow's is his monograph on the history of Ḥasidism ("Istoriya Chassidizma," in "Voskhod," 1888–93). This work is based on the study of original and hitherto unexploited sources.

Dubnow as Historian.

In 1891 Dubnow set himself to the task of creating among the Russian Jews an interest in their history. For this purpose he published a series of articles in "Voskhod," outlining a plan for the study of the history of the Jews in Russia, and advocating the establishment of a Russo-Jewish historical society. These articles were afterward printed in book form under the title "Ob Izuchenii Istorii Russkikh Yevreyev," St. Petersburg, 1891. Although the appeal made by Dubnow did not create such a widespread interest as he had anticipated, his efforts were seconded by many persons interested in the history of the Jews in Russia. From the many unpublished documents gathered by Dubnow from libraries and from the "pinḳeses" of Jewish communities, he prepared a series of contributions bearing the title "Istoricheskiya Soobscheniya" (in "Voskhod," 1893–95).

Among Dubnow's other historical studies may be mentioned his articles on the part taken by Jews in the French Revolution (in "Voskhod," 1889) and on the Jewish historian Grätz (*ib.* 1892, Nos. 2–9). In 1893 he published (in "Voskhod," pp. 9–12) a philosophic-historical study, "Chto Takoe Yevreiskaya Istoria"; a German translation by I. F. [Friedländer] appeared in Berlin, 1898, and an English translation was published by the Jewish Publication Society of America in 1903. His "Yevreiskaya Istoria," Odessa, 1897, a two-volume work on the history of the Jews from the beginning of the post-Biblical period up to 1882, is an adaptation of the handbooks of Jewish history by S. Baeck and M. Brann, but it also contains original contributions to the history of the Jews in Poland and in Russia. In 1900 Dubnow published a brief history of the Jews for the Jewish youth, entitled "Uchebnik Yevreiskoi Istorii Dlya Yevreiskavo Yunoshestva," in three parts (*ib.* 1900–01). In the same year appeared the first part of his larger history of the Jews from the earliest to the present time, entitled "Vseobschaya Istoriya Yevreiyev" (*ib.* 1901). The second part, dealing with the period beginning with the Babylonian captivity, is now (1902) appearing as a supplement to the monthly edition of the "Voskhod." Dubnow's recent labors, apart from his historical researches, consist in a series of letters devoted to the discussion of ancient and modern Judaism as regards the development of its national consciousness. These have been published in the "Voskhod" since 1897 under the title "Pisma o Starom i Novom Yevreistvye."

Dubnow's works are all characterized by elegance of literary style. He is also a fluent writer in Hebrew, and has contributed valuable articles to the Russo-Hebrew periodicals, among them his articles "Ha-Ḥasidim ha-Rishim ba-Ereẓ Yisrael," in "Pardes," ii. 201, Kiev, 1894; "Naḥpesah we-Naḥkorah," *ib.* i. 221; and "Ḥasidim Parze Geder," in "Ha-Shiloah," v. 7. He is also a contributor to Brockhaus' "Lexikon" and to Efron's "Russian Encyclopedia," for which he wrote the articles on the Frankists and the Ḥasidim.

Since 1890 Dubnow has been a resident of Odessa.

H. R.

DUBOSARY: Village in the government of Kherson, Russia. In 1897 it had a population of 13,276, of whom about 5,000 were Jews. A considerable number of the latter are engaged in tobacco growing, while many others are occupied in wine-making and fruit-growing. Dried fruits and tobacco are the chief articles of trade. There are 940 artisans, 186 day-laborers, and a number engaged in agriculture and bee-keeping. There are the usual charitable institutions in the village, and a hospital and dispensary. There are also a Talmud Torah with 130 pupils, a private school with 580 Jewish pupils, and 18 ḥadarim.

H. R. S. J.

DUBOVO. See Kiev.

DUBROVNA: Village on the banks of the Dnieper, government of Mohilev, Russia. In 1898 it had 8,687 inhabitants, of whom 4,559 were Jews. Dubrovna is known as the first and almost the only place to manufacture woolen ṭallits. This occupation dates back many years. It is known that in 1750 a factory for their manufacture existed in Dubrovna, but they had been made here even earlier. The artisans work in their own homes, and are often helped by their wives and children. There are about 600 families so engaged. The dyers, who dye the woolen thread a dark blue ("tekelet"), earn from eight to ten rubles a month. The more numerous class of weavers, with the hard, incessant work of their families, even of children of six or seven years, earn less than the dyers. The launderers (10 or 12 families), who wash the ṭallits, earn more than the others—sometimes five rubles a week. The shavers ("goler"; about 20 families), who cut the nap from the surface of the ṭallits, receive the least of all. The work is carried on amid very unsanitary surroundings. The peasants are exploited by the dealers who supply them with wool and purchase the finished article. The dealers (there are only three or four of them) have agencies in all important commercial centers, and their agents cover every town and village within the Pale of Settlement. The Dubrovna ṭallit was formerly sold abroad, even in America; but within the last ten years the machine-made ṭallit of South Russia and Lithuania is supplanting that made in Dubrovna.

The pitiable condition of the weavers has lately attracted the attention of their Jewish coreligionists. Thanks to the cooperation of the Jewish Colonization Association, several Jewish capitalists have organized the "Aktzionernoye Obshchestvo Dnieprovskoi Manufaktury" (a stock company for the development of Dnieper manufactures), with a capital of 1,200,000 rubles. Two-thirds of the shares have been taken by the Jewish Colonization Association. The ultimate purpose of this undertaking is to reorganize and raise the level of the weaving industry among the Jews in Dubrovna and to furnish employment to those needing work. Besides the weavers there are in Dubrovna 270 Jewish artisans and 24 day-laborers.

The local charitable institutions are: a society for the aid of the poor, founded by the governor of the province; a biḳḳur ḥolim; and a leḥem ebyonim. The Jewish children are taught in the Talmud Torah (72 pupils). There are twenty-six ḥadarim (210 pupils), a yeshibah (60 pupils), a government school (175 pupils, part of whom also attend the yeshibah or the ḥadarim), and the district school, with 36 pupils in the industrial departments.

DUDERSTADT: A city in Eichsfelde, province of Hanover. Jews have lived there as early as the beginning of the fourteenth century, as appears from the renewal of the privileges for that town by Duke Henry II. on Nov. 17, 1314. They enjoyed the rights of citizenship, which fact was emphasized by the dukes Henry, Ernest, and William in their confirmation of the privileges on July 15, 1324. A synagogue and a school in Duderstadt are mentioned in a document dated May 1 of the year 1338, according to which the Jew Samuel sold before the city council a yearly interest on that building amounting to one farthing. The Jews of Duderstadt were involved in the calamities which followed the Black Death (1348–49). After some decades a Jew of the name of Benedict settled again in Duderstadt, who, according to an entry in the revenue records, paid one mark as Jewish protection money ("Jodinschot"). He was followed by other Jews in the fifteenth century. In 1435 the council of the place made a contract with Isaac of Amöneburg and his son Fivis to receive them into the city upon a payment of 120 gulden; in 1457 it defined the rights and duties of Jews when it granted certain of them, such as the children of "Nachtmann and Schalammes," the privilege of settlement for three years. The number of Jews in Duderstadt from 1450 to 1460 was 12, and their annual payments averaged from 5 to 14 marks. The council in 1465 received "Abraham de Jodde myt syner moder" (Abraham the Jew with his mother) for seven years, and in 1489 Nathan, Jacob, the "Nathanite woman," and Meïr of Würzburg (Nathan's brother) for six years. At that time a synagogue was erected again, and its inventory for the years 1435–42 and 1466 has been preserved. A special street was assigned to the Jews, which is first mentioned in 1497. There is also documentary evidence of a "Jews' Gate" (first in 1469) and of a "Jodenborn" (Jews' bath, 1495). Only scanty records exist for the following centuries. In 1902 the community numbered about 100 souls. Its new temple was dedicated Aug. 24, 1898.

G. A. LEW.

DUEREN, ISAAC BEN MEÏR: German rabbi and codifier; lived in the second half of the thirteenth century at Dueren, from which place he took his name. He was one of the leading German Talmudical authorities of his time; and his work "Sha'are Dura," on the dietary laws, is the standard code. Several high authorities who lived after him, among them Israel Isserlein, Solomon Luria, R. Nathan Shapiro, and Isserles, added to his book notes and explanations, with which it has often been published: Cracow, 1538; Venice, 1547, 1564; Constantinople, 1553; Lublin, 1575, 1699; Basel, 1599; Jessnitz, 1724; and many times in the nineteenth century.

According to Zunz, Dueren may be the Isaac b. Meïr he-Ḥasid ("the Pious") who wrote "Tiḳḳun Sheṭarot," a work containing the forms and laws of documents and deeds. It is still extant in manuscript in the Vienna Royal Library.

DUKAN (דוכן, דוכנא): The "platform" upon which (1) the Temple priests stood to pronounce the benediction (Mid. ii. 6), (2) the Levites stood during their singing (hence, also, name for the Levitical service: compare Meg. 3a), and (3) the teacher or assistant teacher sat while instructing the children (B. B. 21a). The name "dukan," however, in the course of time, came to be applied chiefly to the priestly blessing. The call to the priest to recite the blessing was, "Go up to the dukan" (Shab. 118b; compare Targ. Yer. to Num. vi. 23); hence "dukenen" or "duchenen." See BLESSING, PRIESTLY.

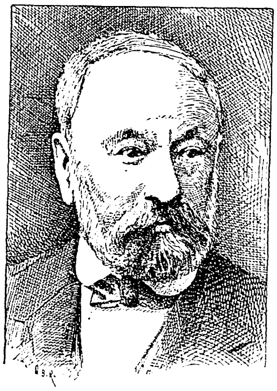
S. S. K.

DUKES, LEOPOLD: Hungarian historian of Jewish literature; born at Presburg, Hungary, 1810; died at Vienna Aug. 3, 1891. He studied Talmudical literature in the yeshibah of Moses Sofer, rabbi of Presburg; but his passion for Biblical studies, which found no sympathy in his native town, led him to the yeshibah of Würzburg, where he also devoted himself to the acquisition of a secular education. After a prolonged stay at Würzburg he returned home; but displeased with the manners of his fellow citizens, and impelled by a thirst for knowledge, he visited the principal European cities in which there were libraries containing Hebrew manuscripts. He lived successively at Munich, Tübingen, Hanover, Hamburg, Paris, Leipsic, Oxford, and then spent about twenty years in London.

Dukes was an original character, a fact due probably to his solitary life and privations. His scholarship was extensive and exact, and his works cover the fields of exegesis, Haggadah, grammar, Masorah, the history of literature, ethics, and poetry. In all of these he made many ingenious and important discoveries; and his books became indispensable supplements to those of Zunz, Rapoport, and Krochmal.



Leopold Dukes.

Dukes was the author of the following works:

"Raschi zum Pentateuch," translated into German (in Hebrew characters) and explained, 5 vols., Prague, 1833-38; "Ehrensäulen und Denksteine zu einem Künftigen Pantheon Hebräischer Dichter und Dichtungen," Vienna, 1837; "Moses ibn Ezra," Altona, 1839; "Zur Kenntniss der Neuhebräischen Religiösen Poesie," Frankfort-on-the-Main, 1842; "Rabbinische Blumenlese," Leipsic, 1844; three "beiträge," published by Ewald and Dukes: I. "Beiträge zur Geschichte der Aeltesten Auslegung und Spracherklärung des A. T."; II. "Literatur-Historische Mittheilungen über die Aeltesten Hebräischen Exegeten, Grammatiker, und Lexicographen," Stuttgart, 1844; III. "Ueber die Arabisch Geschriebenen Werke Jüdischer Sprachgelehrten," Stuttgart, 1844; "Sefer Diḳduḳ, die Grammatischen Schriften des Jehuda Chajjug," Frankfort, 1844; "Ḳonteros ha-Masorah," Tübingen, 1845; "Ḳobeẓ 'al Yad, Handschriftliche Inedita über Lexicographie," Esslingen, 1846; "Die Sprache der Mischna," *ib.* 1846; "Shir 'al Mot," etc., elegy on the death of Meyer Joseph Königsberg, London, 1847; "Les Proverbes de Salomon" (historical introduction), in Cahen's Bible translation, Paris, 1851; "Ginze Oxford," extracts from manuscripts, in collaboration with H. Edelmann, London, 1850; "Naḥal Ḳedumim," on the history of Hebrew poetry in the Middle Ages, in two parts, Hanover, 1858; "Zur Rabbinischen Spruchkunde," Vienna, 1858; "Shire Shelomoh," Hebrew poems of Solomon ibn Gabirol, Hanover, 1858; "Salomo ben Gabirol aus Malaga und die Ethischen Werke Desselben," *ib.* 1860; "Philosophisches aus dem Zehnten Jahrhundert," Nakel, 1868.

In addition to these works, Dukes was a frequent contributor to all the Jewish scientific periodicals, chiefly to the "Literaturblatt des Orients," which he enriched with numerous valuable articles on the history of Jewish literature.

S. I. BR.

DUMAH (= "silence").—**Biblical Data: 1.** Son of Ishmael (Gen. xxv. 14; I Chron. i. 30). Suḳ ("market") Dumah has been found in Dumat al-Jandal in Arabia, called "Jauf" to-day (Yakut, *s.v.*; Burkhardt, "Travels in Syria," p. 662), and compared with Domatha (Pliny, "Historia Naturalis," vi. 32; Stephanus Byzantius, *s.v.*). The Dumathii are mentioned in Porphyry, "De Abstinentia" (ii. 56), as an Arabian tribe which sacrifices a boy every year and buries him under the altar of its idol. The name "Dumah" seems to point, like the name "Hadramaut" (חצרמות, Gen. x. 26), to some legend of Hades (compare Glaser, "Skizze der Gesch. und Geographie Arabiens," 1890, p. 440).

2. Name of a land probably identical with the territory of the tribe of Ishmael (Isa. xxi. 11). The Septuagint substitutes "Idumea" (see commentaries *ad loc.*, and comp. Abu al-Walid's "Dictionary," *s.v.* דום).

3. Name of a city of Judah (Josh. xv. 52). The Ginsburg MS., the Vulgate, and the Septuagint have "Rouma," but Jerome's and Eusebius' Onomastica, *s.v.*, mention a village of the name of "Dumah," which has been identified with "Khirbat Daumah" in the neighborhood of Bait Jibrin.

4. Name for the nether world (Ps. xciv. 17 [the Septuagint has *Ἅδης*], cxv. 17).

E. G. H.

——**In Rabbinical Literature:** "Dumah" is the name of the angel who has charge of the souls of the nether world. According to Dozy ("Die Israeliten in Mecca," p. 95, note), the name was adopted also by the pre-Islamic Arabs (compare Wolff, "Mohammedanische Eschatologie," 1871, Arabic text, p. 39; German trans., p. 69, where "Ruman" seems a corruption [another reading is "Dhudat"] of "Dumah," as the name of the angel who has charge of the souls). The angel of death has to deliver all souls to Dumah, both the righteous, who are led to the place of eternal bliss, and the wicked, who are to meet their doom (Ḥag. 5a; Shab. 152b). He also announces the arrival of newcomers in the nether world (Ber. 18b). Dumah takes the souls of the wicked and casts them down "in the hollow of a sling" into the depth of Hades, and this is repeated every week at the close of the Sabbath, when the souls, after the day's respite, must go back to their place of torment (Shab. 152b, after I Sam. xxv. 29; Pesiḳ. R. 23; She'eltot, Bereshit i.). According to Midr. Teh. to Ps. xi. (see ed. Buber, 102, note), Dumah leads the spirits every evening out of Hades into Ḥaẓarmavet (the Courtyard of Death), a walled place with a river and a field adjoining, where they eat and drink in perfect silence. Many authorities, such as Jacob Tam and Solomon b. Adret, have the word "Sabbath" added, so as to refer only to Sabbath evening (see DEMONOLOGY; compare Tan. Yelamdenu, Ha'azinu: "Prayer is said for the dead that they may not have to return to Gehinnom"). Dumah was originally, according to the Cabalists, the guardian angel of Egypt; but when fleeing before the Lord's decree (Ex. xii. 12), he was placed in the nether world over the spirits of the dead (Zohar ii. 18a). Mashḥit, Af, and Ḥemah are the officers of execution under Dumah (Recanati, Wayera). The name of Dumah is found also on a Judæo-Babylonian vase in the Louvre (see Schwab, "Vocabulaire de l'Angélologie," 1897, p. 707).

"Dumah" is also the name of one of the seven departments of Gehinnom, and those who have been guilty of slander and the like are "silenced" there (Midr. Teh. and Yalḳ., Makiri, to Ps. xi.; compare, however, 'Er. 19a, where Dumah is not mentioned). It is identified by R. Levi with Ḥaẓarmavet (Gen. x. 26; see Gen. R. xxxvii.). "When the soul has been drawn out of the body by the angel of death, it remains seated above the nostrils until decay sets in; then it breaks out into wailing, and it cries to God, saying: 'Whither am I brought?'

Instantly Dumah takes it and brings it to the Courtyard of Death [Ḥazarmavet, seemingly the purgatory mentioned in the Testament of Abraham, xiv.], where the spirits are gathered, and if the soul be that of a righteous one, the call goes forth: 'Make room for this N N, the righteous!' Then it ascends from department to department, according to its merit, until it beholds the face of the Shekinah. If the soul be that of a wicked one, it descends from department to department according to its demerit" (Midr. Teh. *l.c.*; Jellinek, "Bet ha-Midrash," v. 43 *et seq.*).

s. s. K.

DUMASHEVSKI, ARNOLD BORISOVICH: Russian lawyer; born at Mohilev-on-the-Dnieper, 1836, of poor Orthodox Jewish parents; died at St. Petersburg 1887. He received his first instruction in the ḥeder, but ran away from home at the age of fourteen, and entered the Agricultural School at Gorigoretzk, from which he graduated in 1855. During this time he was left entirely to his own resources. By his exceptional abilities he attracted the attention of his instructors, who took a great interest in him. After leaving the school Dumashevski found employment at the office of the Foreign Emigration Committee in Odessa. Here he was noticed by the Russian surgeon and philanthropist Pirogov, who helped him to enter the Richelieu Lyceum of that city; and there he studied law. Later he attended the University of St. Petersburg, graduating in 1862. Here again his abilities attracted the attention of the authorities, and he was sent abroad at the expense of the government to complete his law studies, a professorship being promised him on his return. After his return in 1865 a new law was passed prohibiting Jews from occupying professors' chairs of legal and of political science. He accepted a position in the Ministry of Education, and later he served in the Ministry of Justice, by which, for valuable services on the Committee for Reforming the Legislation of Poland, he was appointed first secretary of the third department of the Senate.

Dumashevski was for many years one of the editors, and finally the owner, of the "Sudebnyi Vyestnik" (Messenger of Judicial Affairs), and was author of the following articles and works on jurisprudence: "Nashe Pravovyedenie," etc., in the "Journal of the Ministry of Justice," 1867; "Ocherk Frantzuzskavo Grazhdanskavo Sudoproizvodstva," *ib.* 1865 and 1867 (published also in the "Journal of Judicial Affairs"); "O Predyelakh Vlasti Kassatzionnavo Departamenta Senata," 1867; and "O Silye Kassatzionnykh Ryesheni." His chief work is "Sistematicheski Svod Ryesheni Kassatzionnavo Departamenta," etc. (Systematic Collections of the Decisions of the Appeal Department of the Senate, with notes by Dumashevski), St. Petersburg, many editions. Of special interest as pertaining to the Jews are the articles: "Nuzhen li Zhournal dlya Yevreyev i na Kakom Yazyke?" (Do the Jews Need a Special Periodical, and in What Language?), published in "Russki Invalid" in 1859; "Brak po Bibleiskomu i Talmudicheskomu Pravu" (Marriage According to Biblical and Talmudic Law), in "Biblioteka dlya Chteniya," 1861; "Yevrei Zemledyeltzy v Rossii" (Jewish Agriculturists in Russia), in "Vyestnik Imper. Russkavo Geogr. Obshchestya."

Dumashevski advocated a practical tendency in the study of civil law, opposing the historico-philosophical side; and at the same time he was a partizan of the dogmatic development of Russian civil law. In his will he left 36,000 rubles to the University of St. Petersburg under the condition that this be entered as a gift "from the Jew Dumashevski."

DUNASH BEN LABRAṬ: Philologist and poet of the tenth century. For the name "Dunash," which Joseph Ḳimḥi on one occasion ("Sefer ha-Galui," p. 62), for the sake of the rime, writes דונוש ("Dunosh"), see Dunash ibn Tamim. "Labraṭ" (לבראט, generally written without א, לברט) does not occur elsewhere as a given name; hence "Ben Labraṭ" may be the family name. "Labraṭ" has been explained as "Laurat" (Steinschneider, "Jew. Quart. Rev." xiv. 130) and as "Librat," "Librado" (Derenbourg, "Opuscules," p. 2). Both of Dunash's names, therefore, are of Romance origin. Abraham ibn Ezra Hebraizes "Dunash" into "Adonim"; Dunash himself employed the Biblical name "Adonijah," which is a mnemonic device containing the servile letters ("Criticism of Saadia," No. 6). Dunash was of Levitical descent (Moses ibn Ezra calls him "Al-Levi"), and to this origin also his pupil Jehudi b. Sheshet dedicated a few panegyric verses (Polemic Treatise, verses 10–16). Dunash's family came originally from Bagdad, although he himself was born in Fez (Moses ibn Ezra).

Becomes a Pupil of Saadia.

While still young, though doubtless equipped with a rich fund of knowledge, Dunash, perhaps influenced by the origin of his family, journeyed eastward and became a pupil of the renowned gaon of Sura, Saadia, whom, in his tract against Menahem b. Saruḳ, he proudly designates as his master. The term employed by Dunash in this connection (זקני, verse 101; the pupils of Menahem more clearly expressed it as זקנך ורבך, p. 48) is responsible for the singular belief that Dunash was a grandson of Saadia; but the pupils of Menahem (p. 27) expressly designate him as the "least important of the pupils of Saadia." Dunash himself relates that he submitted his Hebrew verses, containing the first application of an Arabic meter, to the gaon, who expressed his astonishment at this innovation in the words, "Such a thing has hitherto been unknown in Israel." Dunash was, therefore, still very young when he adapted the Arabic meter to Hebrew poetry. This innovation created a new epoch for Hebrew poetry, and was probably inspired in North Africa, where Ibn Ḳuraish and Dunash ibn Tamim prepared the way for a systematic comparison of the Hebrew and Arabic—a comparison to which Ibn Labraṭ afterward gave his indorsement in his tract against Menahem. It may be accepted as a historical fact that Dunash was the founder of the new Hebrew meter. He is as such regarded by

Founder of New Hebrew Meter.

his opponents, the pupils of Menahem, who objected to the innovation on the ground of its inappropriateness, although they themselves follow the example of Dunash by writing metrical verse. Dunash is celebrated as an innovator by his pupil Jehudi b. Sheshet, who, referring to his work, says: "He created a new foundation for our poetry, such as did not exist in the days of our fathers." Another observation which this scholar makes would seem to indicate that Dunash did not hesitate to put forward his convictions even when they clashed with those of Saadia.

After the death of Saadia (942) Dunash returned to Fez, and thence went to Cordova, which city, under the powerful influence of the statesman Ḥasdai ibn Shaprut, was rapidly becoming a center of culture among the Jews of Spain. Of the circumstances of Dunash's life nothing further is known. He seems, however, to have been a man of means.

Criticizes Menahem ben Saruḳ.

Dunash soon found an opportunity for applying his knowledge, his critical acumen, and his literary talents to a matter of consequence. The first important product of Jewish literature in Spain had appeared—the Hebrew lexicon of Menahem b. Saruḳ. Dunash wrote an exhaustive criticism of it, composed partly in the metrical verse introduced by him, and dedicated this comprehensive and logically elaborated polemical treatise to Ḥasdai ibn Shaprut, Menahem's patron. In the opening verses Dunash proclaims the fame of this statesman, whose services in the cause of his prince and of his coreligionists were alike eminent. This dedication was skilfully interwoven with a tribute to the great diplomatic successes which Ḥasdai had shortly before obtained (in 960); namely, the acquisition of the ten fortresses, and the journey of the son of Ramiro and his grandmother Tota to pay homage at the court of the califs of Cordova (Dozy, "Histoire des Musulmans d'Espagne," ii. 54 *et seq.*). The flattery of Dunash impressed Ḥasdai powerfully; and his attacks on Menahem lowered the latter in the estimation of his patron. The supposition is justified that in consequence of the action of Dunash, Menahem not only lost the favor of his patron, but was treated by him in the harshest manner, even to the extent of being deprived of his freedom, as is known from the remarkable letter sent by Menahem from prison to his former patron. That Menahem, as Dunash intentionally emphasizes, should have made the respected gaon Saadia the subject of unjustifiable criticism, and that he should have expressed opinions which placed Saadia in the category of the founder of the hated sect of the Karaites—these were the causes which especially roused the resentment of Ḥasdai against him.

Concerning the further relations between Dunash and Ḥasdai nothing is known. It is probable, however, that the former obtained the position previously occupied by Menahem. But the pupils of the latter arose to defend the scientific standing of their teacher, who probably died soon after his humiliation and without replying to Dunash's criticism. Three of them collaborated in the preparation of an important polemical work, in which they adopted the half-metrical, half-prosaic form employed by Dunash. In this work they opposed the views of Dunash and defended the honor of their master and of their fatherland, claiming that Dunash had sought to humiliate not only Menahem, but the Jewish scholars of Spain in general. It is certain that the conduct of Dunash—the foreigner, who doubtless boasted also of his sojourn in the Babylonian high schools—aroused the resentment of the native scholars. Dunash was probably too proud to reply to this attack in person, and therefore committed the task to his pupil Jehudi b. Sheshet, whose still more violent polemic, characterized by a coarse satire, undoubtedly contained many arguments inspired by his teacher. With this tract, which at the same time sounded the praise of Dunash, the literary feud engendered by Dunash's attack upon Menahem seems to have ended. This quarrel inaugurated the golden age of Hebrew philology in Spain; and one of the participants in it, Judah b. David Ḥayyuj, a pupil of Menahem, laid the foundation of a new and wider knowledge of Hebrew grammar. Dunash probably did not live to witness this extraordinary development to which he had given so powerful a stimulus.

Results of His Quarrel with Menahem.

Many years after the death of Dunash a second but uncompleted polemical treatise of that scholar was discovered in Egypt (before 1140) by Abraham ibn Ezra. In this work Dunash had begun to form an alphabetical arrangement of his comments on the grammatical and exegetical opinions of his teacher Saadia. The greater part of the work, however, consisted of scattered notes. In this criticism of Saadia (which Abraham ibn Ezra answered by the tract entitled "Sefat Yeter") the doctrine of the triconsonantal nature of the weak roots already finds clear expression. It was the study of Arabic which enabled Dunash, like Ḥayyuj at a later period, to arrive at this knowledge. But the latter, upon the basis of his discovery, proceeds to the systematic elucidation of the conjugation of the before-mentioned verbs; while Dunash does not go beyond the statement that the first, second, or third root-letter is weak and may be eliminated. Owing to its incomplete form, this second writing of Dunash's was never published by him; nor is there the slightest reference to its existence before Ibn Ezra, who praises Dunash by stating that "he was the only one before Ḥayyuj who awakened somewhat from that slumber of ignorance which, like a deep sleep, still held others in its bonds" ("Safah Berurah," p. 256; Bacher, "Abraham ibn Ezra als Grammatiker," p. 87). Ibn Ezra's contemporary R. Jacob Tam, the eminent grandson of Rashi, in a very interesting work defended Menahem b. Saruḳ against the criticism of Dunash; but Joseph Ḳimḥi (in "Sefer ha-Galui") sided with Dunash. Thus were the great feuds that agitated Spain during the tenth century revived in France two centuries later.

The first work of Dunash was published from a codex of the Bodleian Library (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1449), together with Jacob Tam's criticism of it, by H. Filipowski ("Criticæ Vocum Recensiones," London, 1855). The second was edited by R. Schröter from a manuscript (No. 27,214) in the British Museum ("Kritik des Dunash b. Labrat," Breslau, 1866). The genuineness of this treatise has recently been contested by N. Porges (in the Kaufmann Gedenkbuch, Breslau, 1901), but not on good grounds. See Eppenstein in "Monatsschrift," 1902, i. 46, pp. 62–83, 535–536; Porges, *ib.* pp. 141–153; Bacher, *ib.* pp. 478–480; D. Kohn, in "Ha-Goren," iii., 1902, pp. 86–89. The polemical writings of Dunash and of the pupils of Menahem have been edited by S. G. Stern ("Liber Responsionum," Vienna, 1870).

His Writings.

The poems of Dunash ibn Labraṭ were early forgotten (Al-Ḥarizi, "Taḥkemoni," iv.), only a few religious verses having been preserved, which acrostically reveal the name of Dunash, or Dunash ha-Levi (Maḥzor Vitry, ed. Hurwitz, p. 178; Zunz, "Literaturgesch." p. 484). One of these (דרור יקרא) is still included in the Sabbath songs of the prayer-books (Bär's "Gebetbuch," p. 257). Perhaps it is the poet Dunash, the creator of the new versification, that Solomon ibn Gabirol, the elaborator of it, has in mind when he praises Samuel ha-Nagid with the words, "O Samuel, dead is Ben Labraṭ, and thou hast taken his place. Were he living, he would have to bow to thee" ("Shir Shelomoh," No. 54).

T. W. B.

DUNASH IBN TAMIM: Scholar of the tenth century and pioneer of scientific study among Arabic-speaking Jews. His Arabic name was "Abu Sahl"; his surname, according to an isolated statement of Moses ibn Ezra, was "Al-Shafalgi," perhaps after his (unknown) birthplace. The name "Dunash," for which Abraham ibn Ezra substitutes the Hebrew "Adonim," is probably derived from the Latin "dominus," and not from the Arabian "dhu nas" (lord of mankind), concerning which there is nothing to show that it was used as a proper name. The name seems to have been native to North Africa; the younger contemporary of Ibn Tamim, Dunash ibn Labraṭ, for instance, was born in Fez (see Steinschneider, "Cat. Bodl." col. 897; "Jew. Quart. Rev." x. 519; J. Derenbourg, "Opuscules et Traités d'Aboul-Walid," p. 2). Hence the statement of Abraham ibn Ezra to the effect that Ibn Tamim came from the East—to be more exact, from Babylonia, or Bagdad (on one occasion he calls him Mizraḥi, on another Babli)—does not deserve consideration beside that of Moses ibn Ezra, who calls him a native of Kairwan. The statement of Ibn Ezra has been interpreted as signifying that the family of Ibn Tamim came from Bagdad; but it is possible that Abraham ibn Ezra has erroneously transferred the appellation "Babylonian" from Ibn Labraṭ to Ibn Tamim. The additional details concerning Ibn Tamim's life and activities have been gathered principally from his Yeẓirah commentary discussed below.

In this commentary, which was written in the year 955–956, Saadia the Gaon is mentioned as no longer living. The author refers, however, to the correspondence which was carried on when he was about twenty years of age between his teacher, Isaac b. Solomon Israeli, and Saadia, before the latter's arrival in Babylonia, consequently before 928; hence Tamim was born about the beginning of the tenth century. Like his teacher, he was physician in ordinary at the court of the Fatimite califs of Kairwan, and to one of these, Isma'il ibn al-Ḳa'im al-Manṣur, Tamim dedicated an astronomical work, in the second part of which he disclosed the weak points in the principles of astrology. Another of his astronomical works, prepared for Ḥasdai b. Isaac ibn Shaprut, the Jewish statesman of Cordova, consisted of three parts: (1) the nature of the spheres; (2) astronomical calculations; (3) the courses of the stars. The Arabian author Ibn Baitar, in his book on simple medicaments, quotes the following interesting remark on the rose, made by Ibn Tamim in one of his medicinal works: "There are yellow roses, and in Irak, as I am informed, also black ones. The finest rose is the Persian, which is said never to open."

The Arabic original of Ibn Tamim's commentary on the Sefer Yeẓirah no longer exists. In the Hebrew translations the manuscripts are widely dissimilar, and contain varying statements regarding the author. In several of these manuscripts Ibn Tamim is expressly referred to as the author; in one instance he is named again, but with his teacher, while in another Jacob b. Nissim is named, who lived in Kairwan at the end of the tenth century. From certain passages of the commentary it appears that Isaac Israeli, who is mentioned elsewhere as a commentator on the Sefer Yeẓirah, actually had a part in the authorship of the work. But the majority of the statements contained in the commentary itself justify the assumption that Ibn Tamim was the author. He must, therefore, have selected the commentary of his teacher as his basis, while the finishing touch must have been given by Jacob b. Nissim (Steinschneider, "Hebr. Uebers." pp. 395 *et seq.*). A short recension of the commentary (Bodleian MS. No. 2250) was published by Manasseh Grossberg, London, 1902.

Ibn Tamim as Grammarian.

In the history of Hebrew philology Ibn Tamim ranks as one of the first representatives of the systematic comparison of Hebrew and Arabic. In his "Moznayim" (Preface) Abraham ibn Ezra mentions him between Saadia and Judah ibn Ḳuraish, and speaks of him as the author of a book "compounded of Hebrew and Arabic." Moses ibn Ezra says that Ibn Tamim compares the two languages according to their lexicographical, not their grammatical, relations, and in this respect is less successful than Ibn Barun Abu Ibrahim at a later period. The latter also criticized certain details of Ibn Tamim's book. In the Yeẓirah commentary Ibn Tamim says: "If God assists me and prolongs my life, I shall complete the work in which I have stated that Hebrew is the original tongue of mankind and older than the Arabic; furthermore, the book will show the relationship of the two languages, and that every pure word in the Arabic can be found in the Hebrew; that the Hebrew is a purified Arabic; and that the names of certain things are identical in both languages." In adding, "We have obtained this principle from the Danites, who have come to us from the land of Israel," he certainly alludes to the well-known Eldad ha-Dani. Abraham ibn Ezra (commentary on Eccl. xii. 6) mentions the interesting detail that Ibn Tamim believed he could recognize the diminutive form of Arabic names in several noun-formations of the Biblical Hebrew (for instance, אמינון: II Sam. xiii. 20). The statement cited by Saadia b. Danan (end of fifteenth century), according to which the Mohammedans believe that Ibn Tamim was a convert to Islam, is erroneous, and is probably due to the fact that Ibn Tamim is often quoted by Mohammedan writers.

DUNAYEVTZY: Village in the government of Podolia, Russia. It had a population (1898) of 13,000, of whom 7,000 were Jews. The chief sources of income for the Jews are from trade and industrial occupations. The most important articles of commerce are timber, grain, and cloth. Several of the merchants do a fairly large business. From funds collected for charitable purposes a wood-yard has been established, where the poor can buy wood at a reduced price. See Podolia.

DÜNNER, JOSEPH HIRSCH: Rabbi; born at Cracow Jan., 1833; received his rabbinical education at his native place; studied philosophy and Oriental philology at Bonn and Heidelberg. In 1862 he was called from Bonn to the rectorate of the Nederlandsch Israelitisch Seminarium in Amsterdam. His ability soon made it famous as a school of Jewish theology, ancient languages, and religious philosophy. In 1874 he was made chief rabbi of the Amsterdam community and of the province of North Holland, and though he belongs to the strictly Orthodox party, no dissension has marred his administration. The government recognized his ability and activity by decorating him with the Order of the Lion of the Netherlands.

Dünner is known by his researches on the Halakah of the period of the Tannaim, and by his disquisitions on the Tosefta. According to him the Tosefta originated after the close of the Talmud, being edited by a redactor who had before him an ancient, or at least fragments of an ancient, Tosefta. He asserts that a comparison of the texts contained in the collections of the Tannaim with the two Talmuds will substantiate his contention. Dünner has acquired a reputation as an orator. He has written: "Die Theorien über Wesen und Ursprung der Tosephtha, Kritisch Dargestellt," Amsterdam, 1874; "Glossen (Haggahot) zum Babylonischen und Palästinensischen Talmud" (in Hebrew), 4 vols., Frankfort-on-the-Main, 1896-1903; "Kritische und Erläuternde Anmerkungen zu Bedarschi's Chotham Tochnit," Amsterdam, 1865; "Leerredenen," 5 vols., *ib.* 1897-1901. Besides these works he has contributed to the "Joodsch Letterkundige Bijdragen," "Monatsschrift," "Weekblad voor Israeliten," and "Israelitische Letterbode."

Bibliography: Polak, *J. H. Dünner, Iets Uit Diens Leven en Werken*, in *Weekblad voor Israëlitische Huisgezinnen*, Rotterdam, 1899-1900; *De Joodsche Courant*, Nos. 18, 19, The Hague, 1903.

S. S. Se.

DUNS SCOTUS, JOHN: Franciscan monk, theologian, and scholiast; born at Dunston, Northumberland, England (according to some, at Dun, Ireland), in 1266 (?); died in Cologne, 1308. He was the foremost representative of the Franciscan Order, and founder of the Scotists, which school stood in sharp contrast to the Thomists, or followers of Thomas Aquinas, who, together with their leader, belonged for the most part to the Dominicans.

In accordance with his opposition to the doctrinal speculations of Aquinas, Duns Scotus professed, concerning the attitude that the secular authorities and the Church should assume toward the Jews, views which were diametrically opposed to the more humane and enlightened views held by Aquinas, and which represented a deplorable reaction. Thus, whereas Aquinas denounced the forcible baptism of Jewish children, especially on the ground that such a course would be a violation of justice, inasmuch as the child, not being possessed of its full reasoning powers, is naturally under the jurisdiction of its parents (compare Guttman, "Das Verhältniss des Thomas von Aquino zum Judenthum und zur Jüdischen Literatur," p. 4, Göttingen, 1891), Duns Scotus stoutly advocated such baptism. Such a procedure, he maintained, would mean a breach of natural justice only in the event of its being undertaken by a private person; to the sovereign, however, the right appertains. Just as the jurisdiction of local magistrates is limited by the authority of higher functionaries, so the jurisdiction of the parents ceases when it conflicts with the authority of God. Accordingly, it is not only a privilege, but a duty to take children out of the power of their parents in case the latter are unwilling to bring them up conformably to a true worship of God, and to lead them in the right way (commentary in Sent. iv. 4, 9: "Opera," ed. Wadding, viii. 275, Lyons, 1639).

And not only the children, but also the parents themselves should be subjected to forcible baptism. Nor can the words of Isaiah (iv. 22), according to which the remnant of Israel shall be converted in the last days, be cited against such a procedure, since, in order to fulfil this prophecy, it would suffice to transfer a little band of Jews to some island, and to grant them permission to observe the Law.

Duns Scotus, in support of his contention, refers to the decision of the Council of Toledo, which commended King Sisebut for his piety in compelling the Jews to an acceptance of Christianity (*ib.*).

Duns Scotus' acquaintance with Hebrew literature was confined to the "Fons Vitæ" of Ibn Gabirol (whose name takes with him, as with William of Auvergne, the form of "Avicebron") and to the "Moreh Nebukim" of Maimonides. In one place he makes mention of a rabbi who is unknown even to the greatest scholars of Hebrew literature. He speaks there of one "Rabbi Barahoc," who is a worthy counterpart to the renowned "Rabbi Talmud"; for he is indebted for this name to the Talmud tractate Berakot, out of which a certain convert of Jewish extraction communicated a passage to a Franciscan monk, who interpreted it in a spirit not very friendly to the Jews ("Quæstiones Miscellaneæ," qu. 6, art. 21: "Opera," iii. 477).

Influence of Gabirol.

The influence of Gabirol's philosophy shows itself particularly in the doctrine which is at the foundation of one of the most important differences between the Dominicans and the Franciscans. As early as ALEXANDER OF HALES, the founder of the Franciscan theological school, the view is expressed that not only corporeal, but also spiritual substance is compounded of matter and form. This view is held also by William of Lamarre, Bonaventura the Mystic, Roger Bacon, and Raimond Lully, who were all members of the Franciscan Order. Stoutly rejected by the Dominicans, this fundamental concept of Gabirol's philosophy was adopted by Duns Scotus and incorporated in his system as an integral part. In his "De Rerum Principiis" (qu. 8, art. 4: "Opera," iii. 51) he expressly declares, in opposition to Aquinas, in favor of a return to the standpoint of Avicebron.

The metaphysical and cosmological system which is advanced in this work, presupposes Gabirol's doctrine of a unitary, universal substance underlying all created things, both corporeal and spiritual. In elaborating this doctrine Duns Scotus, as might be expected of an independent thinker of his type, follows his own individual bent. But as regards the fundamental principles, the dependence of his system upon Gabirol is so marked that, in the words of Stöckl ("Gesch. der Philosophie des Mittelalters," ii. 808), "his work gives the impression of a running commentary on the metaphysics of Avicebron."

Strange to say, Duns Scotus makes no mention whatsoever of Gabirol's teaching on the will. In his other works, which are mainly in the nature of a commentary on the Bible, and in which, therefore, there is little occasion for a systematic substantiation of his theological doctrines, Duns Scotus rarely refers to Avicebron.

Influence of Maimonides.

With Maimonides, too, Duns Scotus shows more than one point of contact. Like Thomas Aquinas, he follows the statements of Maimonides concerning belief and knowledge, or the relation of revelation and reason, which statements are all, in their essential points, traceable back to Saadia as their first source (see Guttmann, "Die Religionsphilosophie des Saadia," pp. 24–25; *idem*, "Das Verhältniss des Thomas von Aquino," etc., pp. 32 *et seq.*). "The doctrine concerning the existence and freedom of God," says Duns Scotus, referring to Maimonides, "had to be imparted to the Israelites by means of revelation, although it may indeed be demonstrated by human reason. Such a revelation was necessary in view of the fact that the culture of the Israelites was of an imperfect order, and also because they were inclined to idolatry" (comment. in Sent. i., dist. 2, qu. 3, 7, v. 294; compare "Moreh Nebukim," ii. 31). "Altogether, it can not but be helpful to a people that even truths accessible to reason should be authoritatively communicated to them; since there is a general indolence in regard to the discovery of truth, and the powers of comprehension of the average man are limited; and, finally, for the reason that errors are apt to creep into speculations independently carried on, giving rise to doubts. Through an authoritative communication or revelation such a danger is obviated" (Duns Scotus, *ib.* p. 295; compare "Moreh Nebukim," i. ch. xxxiv.; Munk, "Guide," i. 118–130).

In connection with Aquinas' statements concerning the divine attributes, Duns discusses the view of Maimonides, which he finds to be in harmony with that of Ibn Sina, and which is to the effect that the attributes applicable to God either refer to His activity or else are of a negative character (commentary in Sent. i., dist. 8, qu. 4, 2: "Opera," v. 751; compare "Moreh Nebukim," i. ch. li., liii. *et seq.*). To Maimonides also is traceable the statement that there occur in the Bible designations that are applicable only to God—a view which the Jews held in regard to the Tetragrammaton (comment. in Sent. i., dist. 22, qu. 1, 3: "Opera," v. 1053; compare "Moreh Nebukim," i. ch. lxi.; Munk, "Guide," i. 271 *et seq.*).

Duns Scotus follows Maimonides also in his treatment of the various forms of prophecy, not to mention other less important particulars. The highest form of prophecy is, according to him, that in which the prophet not only grasps the revelation that comes to him, but is also aware of its coming to him from God. Of this character was, for instance, the intuition of Abraham, who would not have been ready to sacrifice his own son had he not been convinced that the command proceeded from God ("Quæst. Miscell." 6, 8: "Opera," iii. 474; compare "Moreh Nebukim," iii. ch. xxv.; Munk, "Guide," iii. 194–195). On the other hand, Duns Scotus combats the opinion that the temporal character of the world can not be proved—an opinion held by Aquinas, and borrowed by the latter from Maimonides, whom Duns does not mention ("Quæstiones in Metaphys." qu. 1, 13: "Opera," iv. 513; compare "Moreh Nebukim," ii. ch. xxi.; Munk, "Guide," ii. 269).

J. J. G.

DUPORT, ADRIEN: French lawyer and friend of the Jews; born in 1758; died in exile 1798. He became a deputy to the States-General in 1789, and from the first was a member of the Jacobin party. After the arrest of Louis XVI. in June, 1791, Duport became a royalist. In the constitution of September, 1791, the Jews of France were not remembered, although statements as to freedom of religious opinions were inserted. On Sept. 27, 1791, Duport proposed that the Jews be accorded all the privileges of citizenship in France, and the suggestion was adopted despite some slight opposition. The National Assembly next abrogated all exceptional laws against the Jews.

DURA: A valley mentioned only in Daniel (iii. 1). Here Nebuchadnezzar set up a golden image, to the dedication of which he summoned all the officers of his kingdom. The Septuagint (Codex Chisianus) reads *περιβόλον* ("walls surrounding a city"), and this may be due to the Assyrian "duru" (= a wall). The place is therefore to be looked for in Assyria. Delitzsch ("Wo Lag das Paradies?" p. 216) says that, according to Rawlinson, "Cuneiform Inscriptions of Western Asia," iv. 38, 9–11b, there were three places in Babylon called "Dura" (see also Schrader, "C. I. O. T." ii. 128). In one of these places east of Babylon, according to Oppert, ruins of an ancient statue have been found.

E. G. H. G. B. L.

DURAN, DURAND, or DURANTE: A widely scattered family, originally from Provence, not from Oran ("d'Oran"), as some scholars think. A "Mosse Duram" is mentioned in a list of Tarascon Jews, 1350–1487 ("Rev. Etudes Juives," xxxix. 268). The Durans went first to Majorca, and finally settled in Africa. Some of their descendants are met with as late as the end of the eighteenth century, as shown in the subjoined pedigree. M. K.

The principal members of the family were:

Aaron ben Solomon ben Simon Duran: Dayyan of Algiers in the fifteenth century. He and his brother Ẓemaḥ Duran lived at one time in Majorca, from which they sent a responsum to the community of Constantinople ("Yakin u-Bo'az," l., No. 126). His name and those of his brothers Simon and Ẓemaḥ are associated as the authors of a responsum written at Algiers and directed to the community of Oran (*ib.* l., Nos. 53–55).

Bibliography: Michael, *Or ha-Ḥayyim*, No. 316.

M. Sel.

Ḥayyim Jonah b. Ẓemaḥ Duran: Published at Leghorn in 1763 the first part of "Magen Abot," written by his grandfather, Simon b. Ẓemaḥ Duran.

Moses Duran: Lived in Provence in the thirteenth century. His death (1380) was lamented in an elegy by Abraham b. Isaac Bedersi (Zunz, "Z. G." pp. 464, 523).

Moses b. Ẓemaḥ Duran: Elder of the Jewish community at Leghorn in 1790. He published a part of the "Magen Abot" at that city in 1785 from a manuscript in the possession of Ẓemaḥ b. Benjamin Duran and Ẓemaḥ b. Ḥayyim Jonah Duran.

Nissim Duran: Son of Ẓemaḥ and brother of Simon Duran, of Majorca, where he died after 1395.

Profiat Duran (called **Maestre Profiat,** and also **Efodi** or **Efodæus,** from the initial letters of אני פרופיט דוראן; real name **Isaac b. Moses ha-Levi**): Philosopher, grammarian, and controversialist; born in the second half of the fourteenth century, of parents from the south of France. It is not known whether he was born at Perpignan, where he lived for some years, or in a town of Catalonia. In his youth he attended a Talmudic school in Germany for a short time, but instead of confining his studies to the Talmud, he took up philosophy and other sciences also, in spite of the interdiction of his teachers. Duran became a tutor in the Crescas family, and during the bloody persecution of 1391 was forced to become an ostensible convert to Christianity.

In order to return to Judaism, he and his friend David Bonet Bongoron agreed to emigrate to Palestine. Duran set out on his journey, but instead of meeting his expected friend, he received a letter from him stating that in consequence of the persuasions of the neophyte Paul de Burgos he had decided to remain true to the new faith, and exhorting Duran to follow his example. Duran's answer was the famous satiric epistle called, after the repeatedly recurring phrase, "Al Tehi Ka-Aboteka" (Be Not Like Thy Fathers). It was written about 1396, and was circulated by Don Meïr Alguades, to whom it had been sent. It is so ingeniously ambiguous that the Christians, who called it "Alteca Boteca," interpreted it in their favor; but as soon as they recognized its satirical import they burned it publicly. This epistle, with a commentary by Joseph b. Shem-Ṭob and an introduction by Isaac Akrish, was first printed at Constantinople in 1554, and was republished in A. Geiger's "Melo Chofnajim," 1840, in the collection "Ḳobeẓ Wikkuḥim," 1844, and in P. Heilpern's "Eben Boḥan," part 2, 1846. Geiger also translated most of it into German ("Wissenschaftliche Zeitschrift," iv. 451).

Connected with this epistle is the polemic "Kelimmat ha-Goyim" (still in manuscript), a criticism of Christian dogmas written in 1397 at the request of Don Ḥasdai Crescas, to whom it was dedicated.

In 1395 Duran compiled an almanac in twenty-nine sections entitled "Ḥesheb ha-Efod," and dedicated to Moses Zarzal, physician to Henry III., King of Castile. That Duran was familiar with the philosophy of Aristotle as interpreted by the Arabian philosophers, is apparent from his synoptic commentary on Maimonides' "Moreh Nebukim," which was published at Sabbionetta in 1553, at Jessnitz in 1742, and at Zolkiev in 1860.

Duran's chief work, praised by both Christians and Jews, is his philosophical and critical Hebrew grammar, "Ma'aseh Efod," containing an introduction and thirty-three chapters, and finished in 1403. He wrote it not only to instruct his contemporaries, who either knew nothing about grammar or had erroneous notions concerning it, but especially to refute mistakes promulgated by the later grammarians. He frequently cites the otherwise unknown Samuel Benveniste as an eminent grammarian. See the edition of J. Friedländer and J. Kohn (Vienna, 1865).

Duran was also a historian. In an unknown work entitled "Zikron ha-Shemadot" he gave the history of Jewish martyrs since the destruction of the Temple. Grätz has shown that this work was used by Solomon Usque and Ibn Verga.

In 1393 Duran wrote a dirge on Abraham b. Isaac ha-Levi of Gerona, probably a relative; three letters containing responsa, to his pupil Meïr Crescas; and two exegetical treatises on several chapters of II Samuel, all of which have been edited as an appendix to the "Ma'aseh Efod."

At the request of some members of the Benveniste family, Duran wrote an explanation of a religious festival poem by Ibn Ezra (printed in the collection "Ṭa'am Zeḳenim" of Eliezer Ashkenazi), as well as the solution of Ibn Ezra's well-known riddle on the quiescent letters of the Hebrew alphabet (quoted by Immanuel Benvenuto in his grammar "Liwyat Ḥen," Mantua, 1557, without mentioning Duran), and several explanations relating to Ibn Ezra's commentary on the Pentateuch.

Simon b. Solomon Duran: Rabbi in Algiers, 1531; grandson of Simon ben Ẓemaḥ. He and his brother Ẓemaḥ are the authors of the responsa which appeared under the title "Yakin u-Bo'az," Leghorn, 1782, the fifty-one responsa printed in the second part ("Bo'az") being Simon's work. His liturgical poems (nine dirges) still exist in manuscript (Zunz, "Literaturgeschichte der Synagogalen Poesie," p. 534). M. K.

Simon b. Ẓemaḥ Duran (RaShBaẒ): Rabbinical authority; born Adar, 1361, not in Barcelona, as Zunz ("Zeitschrift," p. 132) and others assert, but on the island of Majorca; a near relation but not a grandson of Levi b. Gershon; died in 1444. He was a pupil of Ephraim Vidal, and of Jonah de Maestre, rabbi in Saragossa or in Calatayud, whose daughter Bongoda he married. He was also a student of philosophy, astronomy, mathematics, and especially of medicine, which he practised for a number of years at Palma.

After the persecution of 1391 (see Balearic Isles) he went with his father and sister to Algiers, where, in addition to practising medicine, he continued his studies during the earlier part of his stay. In 1394 he and the Algerine rabbi Isaac b. Sheshet drafted statutes for the Jewish community of Algiers. After Sheshet's death Simon was chosen as rabbi on condition that he would not, like his predecessor, have his election confirmed by the regent. As Duran had lost all his property during the massacre at Palma, he was forced against his will to accept a salary from the community, not having other means of subsistence. He held this office until his death. His epitaph, written by himself, has been reprinted for the first time, from a manuscript, in "Orient, Lit." v. 452. According to Joseph Sambari, Simon was much respected in court circles ("Medieval Jew. Chron." i. 130).

Simon was a very active literary worker. He wrote commentaries on several tractates of the Mishnah and the Talmud and on Alfasi (Nos. 4, 5, 7, 11, 12, and 16 in the list of his works given below); he treated of various religious dogmas and of the synagogal rite of Algiers (Nos. 5, 8, 10, 16); while in his responsa he showed a profound acquaintance with the entire halakic literature. His theologico-philosophical scholarship, as well as his secular learning, is conspicuous in his elaborate work, "Magen Abot," in which he also appears as a clever controversialist (No. 7). The same ability is evidenced in his writings against Ḥasdai Crescas, which afford him an opportunity to defend Maimonides (No. 2); in his commentary on the Pentateuch (No. 6), where he takes occasion to enter into polemics with Levi b. Gershon; and in that on the Book of Job (No. 1), especially the introduction. In his commentary on the Pirḳe Abot he shows a broad historical sense (No. 7, part iv.); and it is not improbable that the tradition which ascribes to him the historico-didactic poem "Seder ha-Mishneh leha-Rambam" (No. 9), is well founded.

Simon also wrote a considerable number of poems, both religious and secular (Nos. 9 [?], 15); commented on the Pesaḥ Haggadah, the Hosha'not, and the works of more ancient poets (Nos. 5 (*c*), 13, 14); and was the author of numerous pamphlets. The following list of Duran's writings is arranged according to the letters of the Hebrew alphabet, on the basis of a catalogue drawn up by the author himself (Responsa, vol. iii.):

1. "Oheb Mishpat," commentary on the Book of Job, with a theologico-philosophical introduction, Venice, 1589; Amsterdam, 1724-27 (in the Rabbinic Bible "Ḳehillat Mosheh").
2. "Or ha-Ḥayyim," controversial treatise against Ḥasdai Crescas' "Or Adonai."
3. "Zohar ha-Raḳia'," commentary on Solomon ibn Gabirol's "Azharot," Constantinople, 1515. (Jacob Ḥagis ["Petil Teke-let"] and Moses Pisante ["Ner Miẓwah"] have reedited this work, of which a shorter recension also exists.)
4. "Ḥiddushe ha-Rashbaẓ," novellæ on and elucidations of Niddah, Rosh ha-Shanah, Ḳinnim, Leghorn, 1744. ("Ḥiddushim," novellæ to Ketubot and Giṭṭin [Fürth, 1779], is erroneously ascribed to Duran.)
5. "Yabin Shemu'ah": (*a*) precepts for sheḥiṭah and bediḳah; (*b*) "Ma'amar Ḥameẓ," precepts concerning ḥameẓ and maẓẓah; (*c*) "Afiḳomen," commentary on the Pesaḥ Haggadah; (*d*) "Tif'eret Yisrael," on the computations of the new moon ("moladot"); (*e*) "Perush," commentary on the Mishnah Zebaḥim, ch. v. ("Ezehu Meḳoman"), and the "Baraita de Rabbi Yishma'el" (taken from the Sifra) subjoined thereto in the prayerbook (Leghorn, 1744). Part (*c*) appeared as "Ma'amar Afiḳomen" with the Haggadah (Rödelheim, 1822).
6. "Liwyat Ḥen," commentary on the Pentateuch; also two tracts against Ḥasdai Crescas ("'Anaḳim," "Ma'amar ha-Yiḥud").
7. "Magen Abot," consisting of four parts with special titles: i., "Ḥeleḳ Eloah mi-Ma'al"; ii., "Ḥeleḳ Shosenu"; iii., "Ḥeleḳ Ya'aḳob"; iv., "Ḥeleḳ Adonai 'Ammo." Part iv., a commentary on Abot, including a literary-historical introduction on the sequence of tradition, appeared under the title "Magen Abot," Leghorn, 1762; reedited by Y. Fischl, Leipsic, 1855. Under the same title appeared parts i.–iii., with the exception of one chapter in part ii. (*ib.* 1785). The missing chapter in this edition, being a polemic against Christianity and Islam, was published under the title "Ḳeshet u-Magen" (*ib.* 1785-90; reedited by Steinschneider, Berlin, 1881). Extracts from this chapter, "Setirat Emunat ha-Noẓrim," are contained in "Milḥemet Ḥobah," Amsterdam, 1710. It is largely taken from Profiat Duran's "Kelimmat ha-Goyim" ("Monatsschrift," iv. 179).
8. "Minhagim," ritual observances, presumably treating of the rites in Algiers.
9. "Seder ha-Mishneh leha-Rambam," didactic poem, ascribed to Duran in MS. Poc. 74 (Neubauer, "Cat. Bodl. Hebr. MSS." No. 1971).
10. "Perush ha-Ketubbah weha-Geṭ," on marriage contracts and divorces, Constantinople, *c.* 1516-48.
11. "Perush Hilkot Berakot le-Harif," commentary on Alfasi's "Berakot."
12. "Perush Masseket 'Eduyyot," commentary on 'Eduyyot.
13. "Perush 'al ha-Hosha'not," published with the "Hosha'not" according to the Spanish rite, Ferrara, 1553. (A short extract from the "Perush" is contained in the Spanish prayer-book of 1571.)
14. "Perush Ḳeẓat Piyyuṭim," of which several pieces are inserted in the Algiers Maḥzor, Leghorn, 1772. (The commentary on the introduction, "[Baruk] Asher Ishshesh," may also be found in B. Goldberg's "Ḥefes Maṭmonim," pp. 85 *et seq.*, Berlin, 1845.)
15. "Ḳunṭras Teḥinnot u-Pizmonim," religious and secular poems. (The elegy ["ḳinah"] on the destruction of Jerusalem, "Eksof le-Sapper," was published in Profiat Duran's "Iggeret Al-Tehi," Constantinople, *c.* 1577; that on the persecutions in Spain in the second edition of "Magen Abot," Leipsic, 1855. A larger collection was edited by I. Morali in part i. of his "Ẓofnat Pa'aneaḥ," Berlin, 1897.)
16. "Remaze Pisḳe Niddah" (distinct from No. 4).
17. "Tiḳḳun ha-Ḥazzanim," of which the title only is known.
18. "Taḳḳanot ha-Rashbaẓ," inserted in part ii. of the responsa (19), and in Judah 'Ayyash's responsa, entitled "Bet Yehudah," Leghorn, 1746.
19. "Tashbaẓ," 802 responsa in three parts, Amsterdam, 1738-39; title ed., *ib.* 1741.

M. K.—H. B.

Solomon b. Simon Duran (abbreviated **RaShBaSh**): Son and successor of Simon b. Ẓemaḥ Duran; born in Algiers about 1400; died there 1467. In his youth he became familiar with the Talmud and rabbinical literature, and with a resoluteness remarkable for his time he protested against the Cabala. Like his father, he was the author of many responsa (published in Leghorn, 1742); his letter, written in the language of the Talmud, to Nathan Nagara in Constantine has been separately reprinted, with an index of passages ("Kerem Ḥemed," ix. 110 *et seq.*). His defense of the Talmud, written in 1437 against the attacks of the convert Geronimo de Santa Fé, appeared under the title "Milḥemet Ḥobah," and also the title "Setirat Emunat ha-Noẓrim," after the second part of his father's "Ḳeshet u-Magen." It was also published separately at Leipsic in 1856. His treatise "Tiḳḳun Soferim," which has frequently been ascribed to his father, is printed as an appendix to the work "Yabin Shemu'ah," Leghorn, 1744. A dirge written by him has been preserved in manuscript.

Bibliography: Conforte, *Ḳore ha-Dorot*, p. 26b; *Kerem Ḥemed*, ix. 114 *et seq.*; De Rossi-Hamberger, *Historisches Wörterbuch*, p. 94; *Orient*, iii. 812 *et seq.*; Grätz, *Gesch.* viii. 166: Zunz, *Literaturgesch.* p. 524; E. N. Adler, in *Jew. Quart. Rev.* xii. 147.

Solomon ben Ẓemaḥ Duran: Rabbi in Algiers, where he died after 1593; great-great-grandson of Solomon ben Simon Duran. In addition to some responsa, which have been added to Simon ben Ẓemaḥ Duran's collection, he wrote a detailed commentary on Proverbs, which appeared under the title "Ḥesheḳ Shelomoh," Venice, 1623; six discourses on the seven kinds of wisdom; a commentary on the book of Esther; and a treatise on temperance. All these works were completed by the year 1591, and published under the title "Tif'eret Yisrael," Venice, (*c.* 1596) (Roest, "Cat. Rosenthal. Bibl." pp. 494 *et seq.*).

Ẓemaḥ Duran (also called **Astruc**): Father of Simon Duran; went from Provence to Palma, and thence to Algiers, where he died in 1404. He had some knowledge of medicine and astronomy, and was preacher at Algiers ("Rev. Et. Juives," xlii. 277).

Bibliography: Isaac b. Sheshet, *Responsa*, No. 60; Kayserling, *Gesch. der Juden in Spanien*, i. 169.

Ẓemaḥ b. Simon b. Ẓemaḥ Duran: Great-grandson of the preceding; died 1590; author of a commentary on a liturgical poem for Purim by Isaac b. Ghayyath. This poem, with the Aramaic text, was printed in "Tif'eret Yisrael," a work written by his son Solomon b. Ẓemaḥ Duran (Roest, "Cat. Rosenthal. Bibl." Appendix, p. 494; Steinschneider, "Cat. Bodl." p. 2761).

Ẓemaḥ ben Solomon Duran: Great-grandson of Ẓemaḥ Duran.

Ẓemaḥ ben Solomon Duran: Talmudist; died Sept., 1604; was mourned in an elegy by Abraham Gavison (Nepi-Ghirondi, "Toledot Gedole Yisrael," p. 49).

Pedigree of the Duran Family.
("Cat. Bodl." col. 2306.)

DURESS (Hebrew, אונס): In law, the use of such unlawful force against a contracting party as will entitle him to rescind a contract. The rabbinical law on this subject goes back to the wars of Vespasian and Titus, when many Jews, in order to save their lives, gave up their lands to armed robbers ("siḳariḳin" = daggermen; Giṭ. v. 6).

From several Talmudic passages (compare B. B. 40b, 47b; B. Ḳ. 62a) the standards have drawn the following rules:

> "If one has been put under duress until he sells, and takes the purchase-money, even if they hang him up till he sells, yet the sale is valid, whether of movables or of lands, and this though the price has not been accepted before witnesses. Hence he should make his protest before two witnesses, and say to them: 'Know ye that I sell this field [or this article] under compulsion.' If the seller does this, the sale may be set aside after many years' possession, and the buyer must make restoration. But the witnesses must know of their own knowledge that force was used; and when the protest is written out to be signed by them, it should recite such knowledge on their part. This refers only to a sale of property or to the compromise of a claim; but a gift of property, or the free release of a claim, is void whenever the donor or releasor protests his unwillingness at the time, though he be not under duress at all. Beating or other bodily violence is not the only form of duress; duress may consist in the threat of any harm which it is in the power of the other party to inflict. . . . But no protest is necessary to prevent the possession of land which is taken by sheer violence from ripening into a title by prescription. An admission made by the seller after the protest does not estop; for it is presumed that he was forced to make it" (Maimonides, "Yad," Mekirah, x.; much to the same effect is Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 305).

What has been said as to deeds or other acts of conveyance would, with proper changes, apply to bonds or promises of payment made under compulsion; but the case of sale under duress, being that which occurs most frequently, has been especially treated here.

L. G. L. N. D.

DURKHEIM, EMILE: French writer; born at Epinal, in the department of Vosges, France, April

15, 1858. He was educated at the college of his native town, and later in Paris at the Lycée Louis le Grand and the Ecole Normale Supérieure. From 1882 to 1887 he occupied the position of professor of philosophy in various lycées, in 1887 became professor of sociology at the Faculté des Lettres of the University of Bordeaux, and in 1902 was called to the Sorbonne. It was Durkheim who introduced the study of sociology into the French universities. In 1897 he founded an annual, "L'Année Sociologique," in which he gives an account of the sociological literature of France and other countries. He has published the following works: "De la Division du Travail Social," Paris, 1893; "Les Règles de la Méthode Sociologique," Paris, 1895; "Le Suicide: Etude de Sociologie," Paris, 1897. Besides these Durkheim published a great number of essays in the "Revue Philosophique," "Revue Bleue," and elsewhere.

S.

DURLACHER, ELCAN: Hebraist and publisher; born at Karlsruhe, Germany, in 1817; died Dec. 21, 1889. He went to Paris in 1845 as a teacher of languages, and founded a Hebrew publishing-house, which was continued, after his death, by his son. He compiled a Hebrew reader and an almanac, and wrote a small book entitled "Joseph and His Brothers." His two most notable works are a French translation of the German Maḥzor, and another of the daily prayer-book, which he made with the assistance of L. Wogue, whose edition of the Pentateuch he published.

S. J. W.

DURY, JOHN: English divine of the seventeenth century. During his travels abroad he met Manasseh ben Israel in 1644, and heard from him an account of Antonio de Montesino's alleged discovery of the Ten Tribes in America. In 1649 he addressed a further inquiry to Manasseh on the subject, which resulted in the publication of "The Hope of Israel." Dury was also author of a pamphlet issued in 1656 entitled "A Case of Conscience: Whether It Be Lawful to Admit Jews into a Christian Commonwealth." To a question put to him by Samuel Hartleb, as to the general lawfulness of their admission, Dury replied in the affirmative; but from the point of view of expediency he considered that circumstances as to a particular time and place might render their admission unwise.

J. G. L.

DUSCHAK, MORITZ: Austrian rabbi and author; born in Triesch, Moravia, Nov. 14, 1815; died in Vienna July 21, 1890. He was a pupil in Talmud of R. Moses Sofer of Presburg, and was for a long time rabbi at Gaya, Moravia. In 1877 he became preacher in Cracow and teacher of religion at the gymnasium of that city. He was a modern preacher and the author of works in the German language. Although engaged to deliver his sermons at the Temple, his sympathies were mostly with the old-style Orthodox people of the "Klaus," who could better appreciate his Talmudical knowledge. His position as preacher was thus somewhat anomalous; and after several years' service he left Cracow and settled in Vienna, where he spent his last days in neglect and disappointment.

Duschak wrote much for various periodicals, and was, besides, the author of the following works: "Mor Deror," on Josephus and tradition, Vienna, 1864; "Das Mosaisch-Talmudische Eherecht mit Besonderer Rücksicht auf die Bürgerlichen Gesetze," Vienna, 1864; "Gideon Brecher, eine Biographische Skizze," Prossnitz, 1865; "Gesch. und Darstellung des Jüdischen Cultus," Mannheim, 1866; "Das Mosaisch-Talmudische Strafrecht," Vienna, 1868; "Zur Botanik des Talmuds," Budapest, 1871; "Schulgesetzgebung und Methodik der Alten Israeliten," Vienna, 1872; "Die Biblisch-Talmudische Glaubenslehre," etc., *ib.* 1872; "Die Moral der Evangelien und des Talmuds," Brünn, 1878. He also wrote "Jerushalayim ha-Benuya," a commentary on the Mishnah, treatise Mo'ed, Cracow, 1880.

BIBLIOGRAPHY: *Ha-Asif*, 1894, pp. 139–140; *Ha-Ẓefirah*, xvii., No. 183.

S. P. WI.

DUSCHENES, FRIEDRICH: Austrian jurist; born at Prague Jan. 18, 1843; died there Jan. 11, 1901. He received his education at the Unter-Realschule of his native town, and in deference to the wish of his father became a teacher at the Jüdische Hauptschule. Duschenes went in 1867 to the University of Vienna, whence he was graduated as doctor of law in 1871. Returning to Prague, he was (1878) admitted to the bar and engaged in practise. He retired from professional life in 1899.

Duschenes, with Wenzel, Ritter von Belsky, and Carl Baretta, edited from 1890 the "Oesterreichisches Rechts-Lexikon," published in Prague, which was also translated into Bohemian. He took an active part in the councils of the Jewish community and in the political life of Prague.

BIBLIOGRAPHY: *Oesterreichische Wochenschrift*, Jan. 25, 1901, pp. 62, 63; *Prager Tageblatt*, Feb. 22, 1901; *Prager Gemeindezeitung*, 1901, No. 3.

S. F. T. H.

DUSCHINSKY, WILHELM: Austrian writer; born in Strasnitz, Moravia, May 6, 1860. He attended the gymnasium in Vienna, and afterward studied Romanic and Germanic philology at the universities of Vienna and Paris. Since 1892 he has been professor at the Ober-Realschule in the seventh district of Vienna. The following monographs of his may be mentioned: "Zur Lautlehre des Französischen," 1887; "Die Technik von 'Hermann und Dorothea,'" 1888; "Das Stumme 'e' im Französischen, in Prosa und Vers," 1889; "Die Analytische Methode im Sprachunterrichte," 1889–90; "Das Französische Verb," 1891; "Sur le 'Misanthrope' de Molière," 1893; "Shakespearische Einflüsse auf Schiller's 'Tell,'" 1898; "Ueber die Quellen von Grillparzer's 'Esther,'" 1898; "Ueber die Quellen von Kleist's 'Prinz von Homburg,'" 1900; "Uebungsbuch zur Französischen Syntax," 1901; "Zur Reform der Französischen Syntax," 1901; "Gesch. des Neuphilologischen Vereines an der Wiener Universität," 1902; "Choix de Lectures Expliquées," 1902.

S.

DÜSSELDORF: City in Rhenish Prussia, situated on the right bank of the Rhine. According to the census of 1900 it has about 2,600 Jews (500 households) in a total population of 213,767. In 1890 it had 1,401 Jews in a total population of 144,642. Although Düsseldorf was raised to the rank of a town in 1288, its Jewish community is one of the youngest in Germany, the history of the Jews in the duchy of Jülich-Berg, of which Düsseldorf was the capital, dating only from 1608; in Düsseldorf itself the first records of Jews are of a much later date. The synods or councils of the Jews of the duchy were usually held in Düren, and the name of Düsseldorf is rarely mentioned in the records which have come down to us. In the "ketab rabbanut," or contract, dated June 6, 1746, by which R. Simson ha-Levi was chosen rabbi of Jülich-Berg, it is stipulated that, inasmuch as R. Simson had taken up his residence in Düsseldorf, which is remote from some parts of Jülich, he must visit central localities like Jülich and Düren at least once a year. Similar stipulations were made with R. Mordecai b. Eliezer Halberstadt, author of the responsa "Ma'amar Mordekai" (Brünn, 1790), when he was chosen to succeed R. Simson in 1752. R. Mordecai had already styled himself rabbi of Düsseldorf and the surrounding country, which tends to prove that the community was rising in importance in the second half of the eighteenth century. An interesting incident during the rabbinate of R. Mordecai was the ordering by him of special prayers after the earthquake of Lisbon (Nov. 16, 1755; see Carl Brisch, "Zur Gesch. d. Juden im Bergischen Lande," in "Israelit," 1879, No. 7).

R. Mordecai died in 1769, at the age of 84, and was succeeded by R. Jacob Brandeis (d. 1775), who had been rabbi of Fürth and of Darmstadt for twenty years. It is stated by Adolph Kohut, editor of the "Düsseldorfer Zeitung," that R. Judah Löb Abraham Scheuer of Fürth, who died in 1821, aged 87, was rabbi of Düsseldorf and of Jülich-Berg for 42 years. Since the incorporation of Düsseldorf in the kingdom of Prussia in 1815, the community has not been connected with the neighboring communities, and later rabbis, as A. Wedell or the present incumbent, have not been "Landesrabbiner," as were their earlier predecessors.

The remains of numerous members of Heinrich Heine's family are buried in the old Jewish cemetery of Düsseldorf, which is now within the city limits, and was closed Jan. 1, 1877. Among other prominent personages buried there are David Selig, the first Jewish "Stadtrath" of Düsseldorf (d. 1849); the mother of Ḥakam Bernays (d. 1855); and Solomon Eichberg, who was cantor of the community for 50 years and died aged 85.

The anti-Jewish demonstration which occurred in Düsseldorf at the time of the reaction in 1819, seems to have been confined to "black marks and threatening placards placed on the doors of several Jewish houses" (Graetz, "Hist." v. 30). After the emancipation the Jewish community of Düsseldorf soon rose to importance among the Jewish communities of Germany, and is now the home of two prominent Jewish national organizations—the Bildungsanstalt für Israelitische Lehrer and the Verein zur Verbreitung und Förderung der Handwerke Unter den Juden. The last-named society, founded about 1880, maintains a home for apprentices, and is doing much good work. Stadtrath Gustav Herzfeld (b. 1828) is one of the founders, and was for a long time its president. The Jewish community also has charge of five foundations, which bear the names of their founders or of their dedicatees: Martha Horn, S. Scheuer, S. Simon, N. Franck, and D. Fleck. The erection of the new synagogue was decided on in March, 1899. Düsseldorf has the following institutions: Ḥebra Ḳaddisha we-Haknasat Kalah; Ḥebrah Gemilut Ḥasadim; Ḥebrah Malbish 'Arumim; Ẓedakah-Verein for general charity; and Israelitischen Privatverein for the prevention of house-to-house begging.

In 1901 the Regierungsbezirk Düsseldorf, which comprises 24 districts, had 16,032 Jews in a total population of 2,191,359.

DUTY (Hebr. "miẓwah" = commandment; later Hebr. "ḥobah" = obligation): That which is due to God as the Master of life, or to a fellow man, or to oneself. "Duty" is an ethical term; its recognition as such is urged by the inner voice called conscience (see Wisdom xvii. 11), which tells man what he ought or ought not to do. It derives its sanction and authority from God. "Fear God and keep his commandments, for this is the whole of man" (Eccl. xii. 13; A. V. wisely adds the word "duty"). "Duty" is too abstract a term to find a place in the Biblical terminology, but the idea of duty as inseparable from life is expressed in different forms in the Bible. It is "the keeping of the way of the Lord" (Gen. xviii. 19); it is defined by Micah (vi. 8, Hebr.): "He hath told thee, O man, what is good and what the Lord requireth of thee: to do justly, to love kindness, and to walk humbly with thy God"; and it is summed up in the commandment: "Holy shall ye be, for I the Lord your God am holy" (Lev. xix. 2). This thought of duty runs through all Jewish literature. "Walk after the Lord thy God; as He is merciful, be thou also merciful; as He is kind, be thou also kind" (Sotah 14a). So also Philo: "Man was created in the image of God; it must therefore be his aim to become more and more like God" ("De Decalogo," § 197; "De Migratione Abrahami," iii. § 470); "Man's highest duty is to imitate God according to the best of his ability, and to neglect no opportunity to become like God" (*ib.* § 40).

The Jewish conception of duty is therefore superior to that of the Greek and the Roman in that it emanates from a God of holiness, and life is based upon duties and obligations which form the contents of the Law, and the faithful fulfilment of which by the Jewish people establishes their claim to the

The Extent of Duty.

title "'am ḳadosh" (holy people: Ex. xix. 6, xxii. 30; Lev. xi. 44, 45; xix. 2; xx. 7, 26; Num. xv. 40; Deut. vii. 6; xiv. 2, 21; xxvi. 19; xxviii. 9). True, in the Pentateuch no distinction is made between duties of various kinds; the ceremonial duty is of as great importance as the moral act. In Lev. xix., which may be assumed to represent the spirit of Pentateuchal legislation at its best, the duty to offer sacrifices (verses 5-7)—a purely ritual obligation—is given as high sanction as the fear of father and mother (3), the care of the poor (10), honesty in speech and dealing (11), respect for the aged (32), love for one's neighbor (18), and similar moral duties of the highest type. The command to keep the Sabbaths (3) has no more binding force than that requiring honesty in regard to weight and measure (35). From the standpoint of the Mosaic legislation life in its various aspects is one, and no distinction is made between the different kinds of duty enjoined; God commanded them all, and therefore they all have equal sanction.

Prophetic Hierarchy of Duties.

The prophetic conception of life, however, distinguished between the various kinds of duties. To the Prophets duty meant chiefly to do justice and to love mercy (compare Isa. i. 26; Jer. vii. 5-8; Hosea vi. 6; Amos v. 24; Zech. vii. 9, 10). This characteristic of prophetic thought is expressed very clearly by R. Simlai (Mak. 23b). Similarly, Baḥya ben Joseph ibn Paḳuda, in his "Ḥobot ha-Lebabot," distinguishes between the various kinds of duties by dividing them into two classes: "ḥobot ha-ebarim" and "ḥobot ha-lebabot," the external religious duties and the duties of the heart, or the ritual duties and the moral obligations. However, though individual thinkers made these distinctions, yet Jewish tradition developed the thought that all duties derive their sanctity from the Law as the unchangeable will of God. And here lies the danger of Legalism, inasmuch as every ceremonial law is regarded from this point of view as an actual debt ("ḥobah" = ὀφείλημα) incumbent upon man, and of which he must rid himself (יצא ידי חובתו or simply יצא; Ber. ii. 1, 8b, 20b; Yer. Sanh. vii. 21b; Eccl. vii. 18) by performing it. This debt is a sin while it remains unpaid ("ḥobah"); but when paid it becomes a merit ("miẓwah"; Yer. Ber. ix. 4—according to the Pharisees; compare Montefiore, "Hibbert Lectures," 1892, pp. 467-563; see also Ceremonies and the Ceremonial Law; Commandment).

Motive.

In the fulfilment of duty, possibly the chief consideration is the character of the motive. Why shall duty be performed: for reward or for its own sake? In this matter Jewish ethics rest on the highest plane. The sages taught, "Whether one do much or little, all that is necessary is that the intention be pure" (Ber. 17a). The classical saying of Antigonus of Sokho clearly expresses the true Talmudic ideal of the spirit that should accompany the performance of duty: "Be not like servants who serve their master for the sake of the reward, but be like servants who serve their master not for the sake of the reward, and let the fear of Heaven be upon you" (Ab. i. 3). The usual expression for this thought of doing duty for duty's sake is "le-shem shamayim" (in the name of God), or "lishmah" (for its own sake); thus it is said, "Those who occupy themselves with communal affairs should do so in the name of God," and "Let all thy deeds be done in the name of God" (Ab. ii. 2, 16). Another manner of expressing the same thought appears in the phrase "raḥmana libba ba'e" (God requires the intention of the heart to be pure; see Sanh. 106b). This doctrine is clearly taught in passages like the following: "The words 'to love the Lord thy God, to harken to Him, and to cling to Him' mean, 'Let no man say, "I will study so that people shall call me a wise man; I will learn that they may call me rabbi; I will learn that I may become an elder and preside over the academy."' Let him learn for the love of learning, and the honor will come in the end" (Ned. 62a). So also says R. Eleazar, commenting upon Ps. cxii. 1: "Happy he who delighteth in His commandments, but not for the reward that might come from observing them" ('Ab. Zarah 19a). Baḥya (*ib.* Introduction) says: "I am convinced that all actions which are to conduce to the honor of God must have their basis in purity of the heart and of the intention; if the intention be not pure the deeds will not be acceptable, be they ever so numerous, as it is said in Scripture, 'If ye heap up ever so many prayers I will not hear, for your hands are full of blood; wash yourselves, make yourselves clean'" (Isa. i. 15, 16, Hebr.). See Ethics.

K. D. P.

DUX, ADOLF: Hungarian writer; born at Presburg Oct. 25, 1822; died at Budapest Nov. 20, 1881; cousin of Leopold Dukes. He studied law and philosophy at the University of Vienna, and was connected with the "Presburger Zeitung" until 1855, when he became a correspondent of the "Pester Lloyd." He translated Alexander Petöfi's and Josef Eötvös' Hungarian poems, and Katona's tragedy, "Bank Ban," and wrote "Aus Ungarn," and various stories in German under the title "Deutsch-Ungarisches."

S. A. Ku.

DUX, LUDWIG. See Dóczy, Ludwig.

DUYTSCH, CHRISTIAN SALOMON: Hungarian clergyman; born in Temesvár, Hungary, in 1734; died in 1797. He attended the Talmud Torah in Prague. Returning to Temesvár, he received in 1760 the title of "Morenu." Two years later, excited on the subject of conversion and distracted by religious doubt, he became a wanderer, and visited Dresden, Leipsic, Berlin, Amsterdam, Arnheim, Wesel, Halle, and even London. In 1767, owing to the influence of Pastor van Essen, he received baptism in Amsterdam. In 1768 he married for the third time, and then studied theology at the University of Utrecht, becoming in 1777 a preacher at Mijdrecht.

A number of Duytsch's sermons were published; and his confession of faith, entitled "Jehova Verheerlijkt door de Erkenning van den Waren Messias Jezus Christus," had a large sale. His principal work was "Israels Verlossinge en Eeuwige Behoudenis," 3 vols., Amsterdam, 1769-93. His "Nederlands Deborah 't Middle in God's Hand tot Redding van 't Zinkend Vaderland" appeared in 1767, and a new edition in 1873.

DVINSK (formerly **DÜNABURG**): City in the government of Vitebsk, Russia. It is situated on the River Düna, at the intersection of two railroads. It was founded in 1278 by the Knights of the Livonian Order, and in 1561 was annexed to Poland. According to the census of 1897 it has a population of 72,231, the Jews numbering 32,369. The latter are engaged in commerce, industries, and manufacturing. The local trade is entirely in their hands, and the chief articles of commerce are flax, flaxseed, and timber. Toward the end of the last century the business transactions amounted to ten millions of rubles annually.

Industrial occupations are also left almost entirely to the Jews. According to the official census of industries made in 1893, there were in Dvinsk 330 industrial establishments owned by Jews, and 99 owned by non-Jews, while the number of Jewish artisans was only 741. As a matter of fact both the absolute and the relative number of Jewish artisans is much greater. According to a private investigation in 1898 there were 4,862 Jewish artisans, including 2,193 masters, 1,760 journeymen, and 909 apprentices.

The most important of the trades followed by the Jews are tailoring (1,210) and shoemaking. In the 32 local factories and workshops (match factory, tannery, sawmill, button factory, etc.), all owned by Jews, there is a total of 2,305 employees, of whom 1,942 are Jews. There are in Dvinsk 658 Jewish day-laborers.

Taking the average family as consisting of five persons, it appears that in 1898 thirty per cent of the Jewish population of Dvinsk applied for aid from the community. The help given to poor and destitute Jews comes from a savings and lending association, and from various charitable institutions. The first of these, founded in 1900, was established as a mutual aid society. It has more than 1,200 members, and lent in 1902 (up to Sept. 1) various small sums, ranging from 15 to 50 rubles, and aggregating 41,321 rubles. There is another organization, established on charitable principles, for the advancement of small loans. This is a loan fund of 13,000 rubles founded in memory of M. Vitenberg. Loans, secured by personal property, are advanced without interest. Of other charitable institutions there are a society for aiding the poor, founded by the governor, with an income in 1899 of 8,917 rubles; a cheap dining-hall; a biḳḳur ḥolim; a dispensary; and a lying-in hospital.

In the year 1898, in the general schools of Dvinsk there were 1,203 pupils, 359 of them being Jews. In the schools exclusively Jewish there were 401 pupils. The attendance in the general schools was as follows: scientific high school, non-Jews 344, Jews 36; girls' classical high school, non-Jews 240, Jews 140; city school, containing industrial classes, non-Jews 151, Jews 74; private four-class girls' school, non-Jews 73, Jews 76; one-class girls' school, non-Jews 36, Jews 33.

In the Jewish schools: Talmud Torah, 122; Jewish school, with preparatory class, 116; three-class Jewish industrial school, 87; private Jewish school for boys and girls, 51; private Jewish one-class school, 25.

In several of the general schools Jews are not accepted; and those that are open to them are so crowded that many Jewish children can not gain admittance. The poor people can not even send their children to the "melammed," for the latter charges from 40 to 50 rubles a year for instruction. The local Zionist association opened in 1901 a model free ḥeder, where about 80 children get instruction. Thanks to the efforts of the Zionists, there were established in 1900 a library and reading-room, with a charge of three kopeks for admission.

Bible.

DWARF.—Biblical Data: The rendering in A. V. of דק (Lev. xxi. 20, literally "thin"), denoting one of the physical disqualifications of priests for the service. In this sense דק is taken by Targ. Yer. (ננס) and Ibn Ezra *ad loc.* (comp. Bek. vii. 6), but the adopted rabbinical tradition (see Sifra, Emor, 3; Bek. 45) and modern commentators explain the word differently (see commentaries *ad loc.*); nevertheless, the dwarf is declared unfit for service (Ḥullin 63a; Sifra, *l.c.*; Bek. *l.c.*; see Blemish). Legends concerning giants and dwarfs exist among all nations (Tylor, "Primitive Culture," i., ch. x.; German ed., i. 379 *et seq.*; comp. Wutke, "Der Deutsche Volksaberglaube der Gegenwart," p. 42; Lehmann, "Aberglaube und Zauberei," p. 67, Stuttgart, 1898; Seifert, "Zwerge und Riesen," in "Neue Jahrbücher für das Klassische Alterthum," etc., vol. v., part 2, p. 9). These legends are based mostly on primitive conceptions regarding the original inhabitants of a country. In the Bible the pre-Israelitic inhabitants of the Holy Land are supposed to have been gigantic—a reminiscence of the prehistoric man (comp. the Hebrew dictionaries *s.v.* נפילים, ענק; also Gen. vi. 2 and the commentaries to the respective passages; Baedeker, "Palästina," 5th ed., p. 59; Pirḳe R. El. xxii.). Compared with these the Israelites regarded themselves as "grasshoppers" (Num. xiii. 33). Dwarfs are said to have been numerous in the towers of the fortresses of Tyre (Ezek. xxvii. 10 [A. V. 11]).

E. G. H.

Talmud.

——**In Rabbinical Literature:** In tradition the dwarf (נָנָס or נַנָּס, *νάνος*) is mentioned frequently, and the word has been adopted in the Judæo-German jargon. One who sees a giant or a dwarf should say: "Blessed be God, who alters man" (Tosef., Ber. vii. 3). The apes were regarded by many nations as human dwarfs (Tylor, *l.c.*), and strangely enough the Talmud enjoins that the same benediction be said when seeing an elephant, or apes, or birds looking like men (see Rashi on Ber. 58b).

In opposition to the gigantic Philistines the Caphtorim (Gen. x. 14, כפתורים: according to Targ. Onḳ.

"Cappadocians," according to modern commentators "Cretes") are called dwarfs (Gen. R. xxxvii. 5). There is here, no doubt, the general legend in regard to dwarfish tribes and nations. Legendary elements may perhaps also be found in the following parable: The governor of a province summoned for the king the men having the necessary military stature. A woman complained that her son, who was a dwarf, but whom she called "swift-footed giant" (μακροέλαφος), had been overlooked. She was answered: "Though he be in your eyes a makroelaphos, in our eyes he is a dwarf of the dwarfs" (Gen. R. lxv. 11; Cant. R. ii. 15). L. B.

Nebuchadnezzar is frequently called in rabbinical literature "the dwarf of Babel" (Pesiḳ. xiii. 112a; Pesiḳ. R. xxxi.), or "the little one ell dwarf" (with reference to Dan. iv. 14, 17), "the lowest of men" (Yalḳ. ii. 1062); according to another tradition, Pharaoh was the dwarf referred to in Daniel, *l.c.* (M. Ḳ. 18a). The description "one ell the height, one ell the beard, and one ell and a half another member of his body" makes it probable that the grotesque, dwarfish figure of some popular deity or demon, such as the Egypto-Arabic Bes, a god of music and dancing which under the Ptolemies appeared on coins and structures all over Asia (Erman, "Zeitschrift für Numismatik," 1882, pp. 296 *et seq.*; Wiedman, "Ægyptische Geschichte," pp. 391, 595), was identified by the Babylonian Jews with either Nebuchadnezzar or Pharaoh.

Medal Presented to Leon Dyer by the Baltimore Community, 1847.

DYATLOVO. See Grodno.

DYBOSSARI. See Dubosary.

DYER, ISADORE: American merchant and communal worker; born in Dessau, Germany, 1813; died at Waukesha, Wisconsin, 1888. He went to America while young, living first in Baltimore, whence in 1840 he moved to Galveston. He was engaged in mercantile pursuits till 1861, when, after a successful business career, he retired. In 1866 he was elected to the presidency of the Union Marine and Fire Insurance Company of Galveston, which position he filled until the company discontinued business in 1880. He held high place in the Odd Fellows' lodge, and was among the earliest of its grand masters. The first Jewish religious services in Galveston were held at his house (1856). He made provision in his will for the maintenance of the two Hebrew cemeteries, and left bequests to the Congregation B'nai Israel ("to afford increased pews and seating capacity for the poor Israelite families who are unable to purchase or rent same"), and to the Protestant Orphans' Home of Galveston.

Bibliography: *Records of the City of Galveston*, 1840-88; *Encyclopedia of the New West*, 1886; *Records of the Probate Office of Galveston, Texas*, 1888; *Publications Am. Jew. Hist. Soc.* No. 2, 1894.

A. H. C.

DYER, LEON: American soldier; born at Alzey, Germany, Oct. 9, 1807; died in Louisville, Ky., 1883. At an early age he went with his parents to Baltimore. Dyer was self-educated. In the early part of his career he worked in his father's beef-packing establishment (the first in America). As a young man he enjoyed great popularity with the citizens of Baltimore, and filled a number of minor public offices. When the great Baltimore bread riots broke out, he was elected acting mayor, and through his intervention order was soon restored. While Dyer was engaged in business in New Orleans in 1836, Texas called for aid in her struggle for independence. Dyer was at that time quartermaster-general of the state militia of Louisiana. With several hundred citizens of New Orleans he embarked at once on a schooner bound for Galveston, arriving two days after the battle of San Jacinto. He received a commission as major in the Texas forces, signed by the first president, Burnett. The Louisiana contingent was assigned to the force of Gen. Thomas Jefferson Green, and saw active service clearing western Texas of bands of plundering Mexican troops. When Santa Anna was taken from Galveston to Washington, Major Dyer accompanied the guard, and Santa Anna's autograph letter thanking Dyer for courtesies received on the journey testifies to the general's gratitude.

Dyer's natural talent and strong patriotic feeling won him the confidence of ante-bellum statesmen, and in Van Buren's administration he was chosen to be the bearer of despatches to the Prussian government. Dyer saw extended service in the United States army. He was on General Scott's staff in the Florida campaign against Osceola, the Seminole chief, and was wounded in the neck in the final battle which ended in Osceola's defeat and subsequent capture. During the Mexican war Dyer, then with the rank of colonel, was appointed quartermaster-general by Gen. Winfield Scott.

In 1848 Colonel Dyer crossed the plains to California, and settled in San Francisco, where he founded a congregation—the first on the Pacific coast. Before his departure from Baltimore he had been presented with a medal by the community of that city (1847).

Bibliography: *Records of the City of Galveston*, 1888; *Encyclopedia of the New West*, 1886; *Publications Am. Jew. Hist. Soc.* No. 2, 1894.

A. H. C.

DYES AND DYEING (= צובע): Though not mentioned as a special art in the Bible, dyeing was probably practised as in Egypt by the fuller and the tanner. Dyed stuffs are mentioned among the vestments of the high priest and the appurtenances of the Tabernacle. Red, however, seems to have been the only dye manufactured. In fact, in several instances "adom" (red) is used as a synonym of "ẓeba'" (later Hebrew and Talmudic), "dye," from "ẓaba'," to dye, dip, immerse (see Ex. xxv. 5, xxvi. 14, xxxv. 7, xxxvi. 19, xxxix. 34); in Ezek. xxiii. 15 the word "ṭebulim" = dipped, is used; in Isa. lxiii. 1, "ḥamuẓ" = leavened; in Judges v. 30, "ẓeba'." Dyes, dyers, and dyeing, with occasional mention of manufactured colors, are referred to in the Talmud (Shab. vii. 2; Sheb. vii. 1–2; Pes. iii. 1; Tosef., Sheb. v. 1; Men. 42a–44a; Meg. 24b; Yer. Shab. i. 3b, vii. 10c; B. Ḳ. 100b; Yer. B. Ḳ. ix. 6d). Abba Hoshayah of Tarya, the saint, was a fuller who also practised dyeing (Yer. B. Ḳ. x. 7c). Amram, the dyer, is mentioned in Giṭ. 52b. Regarding the purple dyeing of the Phenicians see Delitzsch, "Iris," 1888, pp. 46 *et seq.*; and Purple. Especially was the tribe of Zebulon believed to have acquired this art, together with that of glass manufacture, from the Phenicians (see Sifre, Debarim, 354; Meg. 26a; Herzfeld, "Handelsgeschichte der Juden des Alterthums," 1879, p. 106). According to Shab. 26, the Jews in the vicinity of Tyre manufactured purple stuffs for the market (comp. Schürer, "Geschichte," 3d ed., ii. 56, notes, and Herzfeld, *l.c.* pp. 108, 307). A Jewish gild of purple dyers is mentioned on a tombstone inscription in Hierapolis (Schürer, *l.c.*, 3d ed., iii. 14). In the twelfth century the Jews of Tyre were still purple dyers and manufacturers of glass (see Benjamin of Tudela, "Travels," ed. Asher, p. 30b). In St. George, the ancient Luz, Benjamin found one Jew to be a dyer (*ib.* 32b), and in Thebes, Greece, the Jews were the most eminent manufacturers of silk and purple cloth (*ib.* 16b). They were noted for being skilled dyers also in Italy, Sicily, and elsewhere (*ib.* 15a; see also Bedarride, "Les Juifs en France, Italie et Espagne," 1867, p. 179; Depping, "Die Juden im Mittelalter," German transl., 1834, pp. 136, 353, 401). Delitzsch ("Jewish Artisan Life," p. 27) speaks of "Migdal Ẓeboa'ya" ("the tower of the dyers"; Lam. R. ii. 2), and cites Yer. Shab. 3b to the effect that when walking abroad the dyers hung red and blue threads behind one ear, and green and pale-yellow threads behind the other. Purple was the most costly dye known to the ancient Hebrews. "The blood of the purple mollusk is used to dye wool purple" (Menaḥot 44a). Each shell secreting but one drop of the dye, and the work of preparation being tedious, such dyeing was costly. Akhissar, the ancient Thyatira, a Jewish stronghold in Asia Minor, seems to have been connected with the dyeing trade in the early centuries, and even to-day the crimson fez usually worn in the East is generally manufactured and dyed in that locality (Brightwen, "Side-Lights on the Bible," p. 47). In antiquity the trade obtained some distinction, purple being the royal color. The almond-trees of Bethel and Luz ("luz" = almond-tree) produced a color used in dyeing.

Jews seem for a long time to have held the monopoly of the dyeing trade. In Asia they were especially noted as dyers, as they were also, according to Beckmann, in Italy and Sicily. The Jews' tax in southern Europe was sometimes called "tincta Judæorum," as it was levied on dyed goods (Abrahams, "Jewish Life in the Middle Ages," p. 219; Güdemann, "Geschichte des Erziehungswesens," ii. 312).

In the itinerary of Benjamin of Tudela (*c.* 1170) it is noted that Brindisi contained ten Jews who were dyers (p. 45, Asher's ed.); that purple dye was found in the neighborhood of New Tyre (p. 63); that one Jew, a dyer, lived at St. George, the ancient Luz (p. 65); that the dye-house in Jerusalem was rented by the year; that the exclusive privilege of carrying on that business had been purchased by the Jews, two hundred of whom dwelt in one corner of the city under the tower of David (p. 69); and that but twelve Jews lived in Bethlehem, two in Bet Nuba, one in Jaffa, one in Ḳaryaten Binyamin, and one in Zer'in, the ancient Jezreel—all dyers (pp. 75, 78, 80, 87). Rabbi Pethahiah of Regensburg visited Jerusalem in the twelfth century, and found only one Jew there, Rabbi Abraham, the dyer ("Travels of R. Petachia," ed. Benisch, pp. 38, 60). Naḥmanides (*c.* 1250) also found in Jerusalem only one or two families of dyers (Graetz, "History of the Jews," iii. 606).

Dyeing was the occupation of the Jews in Aragon in the Middle Ages (Jacobs, "Sources," p. 16), and there were many dyers among the Jews of Prague in the seventeenth century (Abrahams, "Jewish Life in the Middle Ages," p. 248). Dr. Wolff ("Narrative of the Mission of Dr. Wolff to Bokhara," ii. 3) mentions that in 1844 there were in Bokhara 10,000 Jews, "mostly dyers and silk merchants"; and Franz von Schwarz ("Turkestan, die Wiege der Indogermanischen Völker," p. 441) says that "the Jews of Bokhara devote themselves to commerce and industry. . . . Nearly all the dyers, especially the dyers of silk, are Jews. . . . The Jews of Bokhara have in a way monopolized the commerce with dyed raw silk."

According to Errera ("The Russian Jews," p. 177), the Jews in Russia created the industries of dyeing and preparing furs. The manufacture of ẓiẓit, ṭallit, and arba' kanfot in Russia, and the dyeing which is incidental to the last two, have placed a considerable part of the dyeing business in the hands of the Jews of that country. See Artisans; Color.

Bibliography: Güdemann, *Geschichte des Erziehungswesens in Italien*, p. 312, note v.

A. H. C.—K.

DYHERNFURTH: Town in Prussian Silesia, with 1,463 inhabitants; founded Jan. 20, 1663. In that year the Austrian emperor Leopold I., desiring to reward the Silesian chancellor, Baron von Dyhern, gave his estate Przig the rights and status of a city with the name "Dyhernfurth." To further the prosperity of his city its owner obtained permission (July 12, 1667) to establish a printing-house, which, however, soon ceased to exist. In 1688, under Baron von Glaubitz, the new lord of the estate and of the city, the workers whom the printer Shabbethai Bass had gathered about him became a community—the first in Silesia since the expulsion of the Jews from that province in 1584. The Jewish cemetery established by Bass in 1689 has twice been enlarged (1805 and 1881) by purchase. Until 1761 the Jews of Breslau buried their dead in the Dyhernfurth cemetery. A synagogue had been established and maintained by Feibl Pesong, its president; in 1785 it was succeeded by a new temple, which was superseded in 1851.

Among the rabbis who served the community of Dyhernfurth were: Wolf Katz (כ"ץ = Kohen Ẓedeḳ) Schotten, who founded its ḥebra ḳaddisha; Rabbi Jacob Löb Falk, later dayyan in Breslau; and Ḥayyim Kroner. A branch community existed formerly in the neighboring town of Auras. The community of Dyhernfurth has steadily diminished, numbering at present only nineteen; its president is M. B. Weinbaum.

D. S. Sa.

——**Typography:** The earliest Hebrew printing-office in Dyhernfurth was established in 1681 by the bibliographer Shabbethai ben Joseph Bass. The place was well fitted for such an enterprise. Eastern Europe was the best market for Hebrew books, and, outside Prague, had no Hebrew printing-office at that time. A further point in its favor was the fact that the books supplied by Holland were very expensive. The first work to be issued from the presses of Dyhernfurth was Samuel ben Uri's "Bet Shemuel," on the Shulḥan 'Aruk, Eben ha-'Ezer (1689). In the same year appeared David ha-Levi's commentary on Rashi to the Pentateuch; three prayers to be recited in the cemeteries (with a Judæo-German translation by Eliezer Liebermann); and the mystic prayers of Nathan Nata' ben Moses of Hanover. In 1708 the establishment was partly destroyed by fire. It was, however, soon rebuilt, and in 1712 Shabbethai transferred it to his son Joseph, whose name appeared on the title-pages, together with that of his father, after 1707. During his last ten years of active work, Shabbethai confined himself chiefly to liturgical productions. In these years he issued four editions of the Pentateuch; a Judæo-German edition, by Ḥayyim ben Nathan, of the historical parts of the Bible; four editions of the Psalms; seven of the Siddur; four of the Maḥzor; five of the Seliḥot; and two of the Tiḳḳum recited on the nights of Shabu'ot and Hosh'ana Rabba.

About this time Joseph, with his father, was accused by the Jesuits of circulating a book containing blasphemies against Christianity. They were imprisoned, and business was practically suspended. The subject of the accusation was the "Sha'are Ẓiyyon" of Nathan of Hanover, published at Dyhernfurth in 1705. No works published by the Bass firm from 1714 to 1718 are known to be extant. In the latter year business seems to have been resumed by Berl Nathan of Krotoschin, husband of Shabbethai's granddaughter Esther. Berl Nathan paid 5,000 thalers purchase-money. After Nathan's death in 1729, it was carried on by his widow.

About 1780 Jehiel Michael May from Breslau established another printing-office, which, after his death in 1790, was managed at first by his widow Rachel, and his sons Michael, Simon, Aron, and Joseph, but later by Joseph alone. In recent times a printing-office was established in Dyhernfurth by Warschauer & Co.

Although there have been issued from the Dyhernfurth presses many important works, such as the Babylonian Talmud and the Yad ha-Ḥazaḳah, and although for a long time they supplied Silesia and the neighboring territories with books, they failed, owing to poor type and the lack of correctness, to find much favor.

DYTE, D. M.: English Jew who distinguished himself by saving the life of George III. of England under the following circumstances: On May 15, 1800, George III. attended the Drury Lane Theater to witness a comedy by Colley Cibber; and while the monarch was acknowledging the loyal greetings of the audience, a lunatic named Hadfield fired a horse-pistol pointblank at his Majesty. Two slugs passed over the king's head, and lodged in the wainscot of the royal box. The king escaped unhurt; but it was only subsequently realized that Hadfield had missed his aim because some man near him had struck his arm while in the act of pulling the trigger. This individual was Dyte, father of **Henry Dyte,** at one time honorary secretary to the Blind Society. It is said that Dyte asked as his sole reward the "patent" of selling opera-tickets, then a monopoly at the royal disposal.

DYVIN: Village in the government of Grodno, Russia. It has a very old Jewish community, but it is impossible to determine when Jews first settled there. When the town endeavored to secure the Magdeburg Law, the Jews contributed for the purpose fifty gold coins, in return for which they were to be allowed to avail themselves of the privileges and income of the town. Notwithstanding this the burghers often attempted to curtail the rights of the Jews. In 1634 King Ladislaus IV. granted them certain privileges, and recognized their rights to the possession of houses, market-places, the public bath, and lands legally acquired by them. The right to own a synagogue and a burial-ground, and to free and undisturbed conduct of religious services, was also recognized. They were permitted to engage in commerce, and to enjoy other privileges, on equal terms with the burghers of Dyvin. They were subject to the jurisdiction of the Dyvin court, but had the right to appeal from this to the judges of the king's court. With the burghers, the Jews have often farmed various profitable portions of municipal property, as, for instance, the flour-mills and the distillery.

In 1656 the commissioners appointed by the king, on the complaint of the Jews, reaffirmed that the latter, having enjoyed for many years with the burghers the privileges and incomes of the city, and having contributed to the expense of securing the Magdeburg Law, were entitled to avail themselves, to an equal extent with the burghers, of the income from the farming of public property. But since for a number of years they had neglected to avail themselves of these rights, the commissioners conceded to the Jews the right to share, as was done in other towns, in one-third of the farming privileges. Subsequently new differences arose between the burghers and the Jews in regard to the unequal distribution of taxes for the maintenance of soldiers. These differences were settled by mutual agreement on Feb. 9, 1661.

In 1898 there was in Dyvin a Jewish population of 1,200 out of a total population of 10,000. Most of the Jews are engaged in commercial and industrial occupations; there are also 237 artisans. The educational institutions include a Talmud Torah with an attendance of 24 pupils, and ten ḥadarim with an attendance of 115.

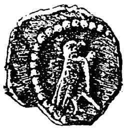
E

EAGLE: The rendering in the English Bible versions of the Hebrew "nesher." The nesher, however, was bald; nested on high rocks; and was gregarious in its habits (Micah i. 16; Job xxxix. 27, 28; Prov. xxx. 17), all of which characteristics belong to the griffin-vulture, but not to the eagle.

Several species of eagles inhabit Palestine; and these are probably all included in the term "'ozniyyah" (Lev. xi. 13; Deut. xiv. 12; compare Tristram, "Natural History of the Bible," p. 181).



Reverse of Copper Coin Bearing an Eagle, Attributed to Herod the Great.

(After Madden, "History of Jewish Coinage.")

The Talmud says that the eagle is the king of birds, but that it is afraid of the flycatcher (Shab. 77b). It flies rapidly without tiring (קל כנשר = "light like the eagle," Ab. v. 20).

The eagle is ranked among the unclean birds—a fact variously explained by the Talmudic writers (Ḥul. 61a). The nesher is found deified in the Assyrian Nisroch, the vulture-headed god (II Kings xix. 37; Isa. xxxvii. 38), and in the Arabic idol Nasr. In Ezekiel (i. 10, x. 14) the eagle is mentioned in connection with the throne of God. In rabbinic parlance "nesher" is used as a title of distinction; *e.g.*, to denote the Roman government (Sanh. 12a).

On the ancient fallacy that the eagle could renew its youth see Bochart, "Hierozoicon," part ii., bk. ii., ch. 1 (compare Ḳimḥi on Ps. ciii. 5).

E. G. H. H. H.

EARNEST-MONEY: Part payment of the price by the buyer of a commodity as a guaranty that he will stand by the bargain.

Wherever the payment of the whole price secured title to property, the payment of a part of the price did the same. All objects, whether movable or immovable, could be acquired by the payment of money, and part payment was sufficient to make a sale valid. The payment of a "peruṭah," the smallest coin of Palestinian currency, on account of the purchase was sufficient to bind the bargain (Ḳid. 3a; Maimonides, "Yad," Mekirah, i. 4; Shulḥan 'Aruk, Ḥoshen Mishpaṭ, 190, 2). The law regarding acquisition was restricted by the earlier rabbis, however, to immovable property. Because of certain apprehensions, they provided that movable property could be acquired only by actual possession of the object (B. M. 47b; see Alienation and Acquisition). Hence, where there was no delivery the payment of the purchase-money did not constitute a sale. It was, however, considered a breach of good faith if one of the contracting parties retracted after the payment of an earnest or of the whole sum, and the following curse (מי שפרע) was pronounced upon him:

> "He who revenged Himself on the men of the generation of the Flood, and on the men of the generation of the division of languages ["haflagah"], and on the men of Sodom and of Gomorrah, and on the Egyptians who were drowned in the sea, will revenge Himself upon him who does not abide by his word" (B. M. 44a, 48a).

In cases of hiring and letting, the payment of an earnest was sufficient (Ḥoshen Mishpaṭ, 198, 5, Isserles' gloss; 198, 6; 199).

In the case of immovable property the payment of earnest-money constituted a sale where local custom did not require the formality of a deed of sale ("sheṭar"). The remainder of the purchase-money was then considered a loan to be paid by the buyer at a stipulated time. If the seller was urgent for the payment, and thus made it obvious that he sold the property because he was in need of money, either of the parties could retract before the payment of the last instalment; for it was evident that the seller did not agree to sell except on condition that he receive the full amount. If, however, this urgency could be explained in another way—for instance, when the property was in bad condition and the seller was afraid lest the buyer find some excuse to retract, or when the seller wished to remove to another place—then the sale was valid and neither could retract (B. M. 77b; Maimonides, *l.c.* viii.; Ḥoshen Mishpaṭ, 190, 10-16). In cases where the earnest did not validate the sale, he who retracted had to submit to the conditions of the other party as to the manner in which the earnest-money should be refunded (*ib.*).

A pledge, either for part or for the whole of the purchase-money, was not considered an earnest, and did not constitute a sale (Ḳid. 8b).

All the laws that applied to the acquisition of immovable property applied also to the acquisition of slaves (see SLAVES). See also ḲINYAN.

EARNINGS. See MASTER AND SERVANT.

EARRING: A ring or hook passed through the lobe of the ear. Earrings, so widely used by Eastern peoples, have no particular designation in Hebrew. The word נזם is applied to both the ornament for the ear and that for the nose; so that when this term occurs in the Bible, it may mean either. When the writer wished to specify, he added the word און to indicate earrings, or אף to indicate nose-rings. The word נזם ("stringed ornament"), the equivalent of the Arabic "naẓm," induces one to suppose that the primitive form of the ear-pendants was a string of pearls, beads, etc., of a globular form. It is perhaps this shape which is indicated by the word נטיפות (lit. "drops," Judges viii. 26). The references in Ex. xxxii. 2 and Judges *l.c.* to earrings of gold, show at the same time that there also existed earrings of other materials. It was not until the time of Ezekiel that earrings acquired a circular form, and were then called עגיל (Ezek. xvi. 12). It is true that this word occurs also in Num. xxxi. 50, but there is nothing to indicate that it means "earrings." The passage in Exodus proves that earrings were worn by women and by the youth of both sexes.

Earrings seem to have been regarded by Eastern nations as sacred things—some scholars even suggest as amulets—for the sons of Jacob surrendered their earrings with the idols which Jacob afterward concealed under the oak-tree (Gen. xxxv. 4). The Targum and the Samaritan version of the Pentateuch always translate נזם by קדשא (Syriac, "ḳadasha"), which Buxtorf ("Lex. Rab." *s.v.* קדשא) supposes to mean "the ornament consecrated to Astarte"; but there is no proof that this belief in the sacredness of earrings was current among the ancient Hebrews. If the word לחשים, occurring in Isa. iii. 20, A. V., really means "earrings," the latter are so called because, these ornaments being suspended from the ears, they are figuratively looked upon as whispering to the wearer.

E. G. H. M. SEL.

EARTH (אדמה): The Hebrew expression for "earth" means primarily earth or soil as an element, and also the surface of the earth and plowed land, the latter being probably of the red color characteristic of Palestinian soil (compare Abu al-Walid, "Dictionary," *s.v.*; Credner, "Der Prophet Joel," 1831, pp. 123 *et seq.*). Josephus says that the Hebrew for "man" (אדם = Ἀδαμος), which is related to "earth" according to Gen. ii. 7, really means "red," since virgin soil is red ("Ant." i. 1, § 2). The Syrians also called the earth ארמתא (*ἀδαμθά* in Theodoret, "Quæst. lx. in Gen."; compare Mishnah Shab. viii. 5); the expression is not found in the other Semitic languages, surviving only in the protoplast ADAM. The original meaning of אדמה is, however, not certain; Friedrich Delitzsch thinks it means, as in the Assyrian, "arable land" ("The Hebrew Language Viewed in the Light of Assyrian Research," p. 58). Another expression for "earth," ארץ, is equivalent to "terrestrial globe," in contrast with "the heavens." According to a rabbinical interpretation, the earth has four names, "ereẓ," "tebel," "adamah," and "arḳa," corresponding to the four points of the compass (Gen. R. xiii. 12).

In Hebrew, "heaven and earth" together constitute the universe. The earth has foundations and pillars (I Sam. ii. 8; Ps. lxxv. 4, civ. 5; Job ix. 6, xxxviii. 6); it rests on the ocean, out of which it rises (Ps. xxiv. 2, cxxxvi. 6); it is suspended in space (Job xxvi. 7); the idea of its free suspension in the air is especially worked out in the mystical "Book of Creation" (Sefer Yeẓirah). Like most peoples of antiquity, the Hebrews conceived of the earth as a disk (Prov. viii. 27; Job xxvi. 10; Isa. xl. 22); and they spoke, therefore, of peoples like the Assyrians, Egyptians, Persians, and Medes as living at the ends of the earth (see Gesenius, Commentary on Isaiah, i. 247). As Ezekiel (v. 5) could describe the Israelites as being set in the "midst of the nations," so also could he speak of their land as being the "navel of the earth" (xxxviii. 12, Hebr.); for Palestine in fact occupied a central position as regards Assyria and Egypt, the two chief powers of antiquity. In later times, indeed, it was positively asserted that Palestine, or Zion, was the physical center of the earth (Enoch, xxvi. 1, 2; Book of Jubilees, viii.); and the Rabbis interpreted the phrase "midst of the nations" as referring both to Palestine and to Jerusalem as the center of Palestine (Tan., ed. Buber, iii. 78).

The earth was destined not for a desert, but for the habitation of man (Isa. xlv. 18). In Ecclus. (Sirach) xl. 1c the earth is called "the mother of all living" (comp. Targum on Job i. 24). The Biblical conception of the paramount importance of the earth prevailed down to the time of the great astronomical discoveries of Copernicus and Kepler. The allusions of the Prophets to a new heaven and a new earth (Isa. lxv. 17, lxvi. 22) were interpreted even as early as Maimonides in a non-physical sense ("Moreh," ii. 29). In mystical speculations the earth, like the other heavenly bodies, was taken to be an animated being, having therefore its own genius (Num. R. xxiii. 6), and also its guardian angels (Schwab, "Vocabulaire de l'Angélologie," p. 75).

E. G. H. S. KR.

EARTHQUAKE: The Hebrew word "ra'ash," as well as its Assyrian and Arabic equivalents designating an earthquake, is indicative of a great noise or tremendous roaring. In Ps. lxxii. 16 the same word is used to describe the gentle rustling of wheat. It is also employed in poetry to express the harmonious choral song of angels. It would thus seem that during an earthquake the Hebrew was most impressed by the rumbling connected with it, which he regarded as a theophany (Ps. xviii. 8 [A. V. 7]; Hab. iii. 6; Nahum i. 5; Isa. v. 25). The trembling and smoking of the mountains, as during the revelation on Sinai (Ex. xix. 18, xx. 18), the moving of the door-posts, as during Isaiah's initiation (Isa. vi. 4), accompanying great theophanies, must in the view of the authors be regarded as earthquakes (comp. I Kings xix. 11, 12).

Palestine was subject to frequent earthquakes, the volcanic nature of the region around the Dead Sea and the Sea of Gennesaret being a contributory cause. The earthquake mentioned under Ahab (I Kings xix. 11) is legendary, but that under Uzziah (809–759 B.C.) is historical: time was counted from it (Amos i. 1; Zech. xiv. 5). Ibn Ezra and R. David Ḳimḥi refer Amos' entire prophecy, especially Amos ix. 1, to this earthquake (comp. Eusebius, "Demonstratio Evangelica," vi. 18).

Josephus describes an earthquake that occurred in Judea during the battle of Actium. The earth trembled, and many animals and more than 30,000 persons perished ("Ant." xv. 5, § 2). The earthquake at the death of Jesus is mentioned in Matthew (xxvii. 52), but not in the other Gospels (see CRUCIFIXION). A few years before Bar Kokba's insurrection, the cities of Cæsarea and Emmaus were destroyed by an earthquake (Eusebius, "Chronicon," eleventh year of Hadrian). In 499 severe earthquakes devastated Asia Minor, continuing until 502, when the synagogue of the Jews at BEIRUT fell (Assemani, "Bibl. Orient." i. 272; "Jerusalem," vi. 17). Antioch was visited by numerous earthquakes in the sixth century (Procopius, "De Bello Persico," ii. 14; Evagrius, "Hist. Eccl." v. 17, vi. 8). Bar Hebræus, 'Abd al-Laṭif, and the "Gesta Dei per Francos" mention many earthquakes in Palestine during the Middle Ages. On Jan. 1, 1837, the whole province of Galilee was shaken; the cities of SAFED and TIBERIAS especially suffered, 4,000 Jews perishing. The seismic disturbance was also felt at Tyre, Sidon, Beirut, and even at Jerusalem. The last-named city has otherwise been free from earthquakes (Robinson, "Biblical Researches in Palestine," etc., iii. 500–585; "Jerusalem," v. 295).

The Rabbis, following Joel and Amos, use the expression שאון in the sense of "earthquake" (Yer. Ber. 13c; Ex. R. xxix. 9). Earthquakes, according to them, are a divine punishment for the performances in the circus and theater of the heathens, or for their immorality. Others held that earthquakes were meant to remind men of their sins. An earthquake, like thunder and lightning, called forth the benediction, "Praised be Thou, Eternal One, with whose power and might the world is filled" (Ber. ix. 1). A chapter on "Thunder and Earthquake," in the form of a calendar, is contained in the appendix to "Milḥemet Ḥobah," Constantinople, 1710.

E. G. H. S. KR.

EASEMENT: An incorporeal right, existing distinct from the ownership of the soil, consisting of a liberty, privilege, or use of another's land without profit or compensation; as, an easement consisting of a right of way, a right to running water, to free air, etc. According to rabbinical legislation, an easement was acquired by mere possession, provided no objection was raised against it by the other parties concerned. The later authorities, however, differed with regard to the conditions that constitute such possession (see ḤAZAḲAH). If one erected a rain-spout from his roof leading to his neighbor's premises, and the neighbor did not object, he acquired the use of his neighbor's premises to that extent, while the neighbor also acquired the use of the water coming from the rain-spout onto his premises. The owner of the rain-spout could not remove it without the permission of his neighbor, while his neighbor could not compel him to remove it after he had once acquired the right (B. B. 58b, 59a). For such a right could never be destroyed; and consequently if one acquired the right of opening a window or a door into his neighbor's premises, the right, or easement, would exist even after the house containing the window or door was destroyed; and in rebuilding the house, he might open a window or a door of the same size and in the same place, even if his neighbor then objected (*ib.* 60b). One who possessed an easement of a window overlooking his neighbor's premises could prevent his neighbor from building in front of it and thus shutting out its light; or if his neighbor were to build a wall against the window, he could compel him to remove the wall at least four cubits from the window (*ib.* 22a, 59b).

In some cases the possession of an easement was not sufficient to establish a right to it. The construction of a window opposite another's window, even though the other did not object at first, did not establish an easement, for the Rabbis considered it indecent to look into another's house and watch his actions and movements (היזק ראיה; *ib.* 60a). The establishment of a baker's or of a potter's oven, which emitted large volumes of smoke, or of a factory from which much dust issued, in the immediate vicinity of another's house, or of anything that caused obvious injury to another's property, although no objection had been raised against it at first, did not constitute an easement (*ib.* 23a). The rules which applied to easements in the property of individuals also applied, with a few exceptions, to easements in the common property of the community. See BOUNDARIES; NEIGHBORS; PARTNERSHIP.

S. S. J. H. G.

EAST: מזרח or מזרחהשמש = "rising" or "the rising of the sun" [opposed to מערב = "west": Isa. xli. 2, 25; Ps. l. 1, ciii. 12], or קדם = [lit. "forward"] the direction of the face, west being "behind" [אחור], north "to the left" [שמאל], and south "to the right" [ימין: Job xxiii. 8–9; Gen. xiii. 14, xxviii. 14; Num. x. 5, 6]): Worshipers of the sun turned toward the east, with their backs to the Holy of Holies (Ezek. viii. 16; comp. Suk. v. 4), whereas the Jews of the Exile prayed toward the Temple (Dan. vi. 11; I Kings viii. 38, 44 *et seq.*; Ber. iv. 5; Sifre, Debarim, 29). For those living in the west, therefore, the east was the direction in which they were to pray (see "Ḳiblah" in the article MOHAMMED).

East is the part of the world where God planted paradise (Vita Adæ et Evæ, 18, 22; [Lat.] Apoc.

Mosis, i., according to Gen. iii. 24, LXX.). According to the "Didascalia," prayer is offered with the face turned to the east "because God ascended to the heaven of heavens to the east, and because paradise is situated in the east" ("Apost. Const." ii. 57). This was enjoined on the early Christians (see Clemens Alexandrinus, "Stromata," vii. 7; Syriac Canons [Teachings] of the Apostles, i.; Ante-Nicene Library, viii. 668, New York, 1890; Tertullian, "Apology," 16). A much older custom, which goes back to very primitive times and is connected with the belief that the dead go down to the land of Hades in the west, but will rise again with the sun in the east, is the burying of the dead with the face toward the east (see Tylor, "Primitive Culture," 1874, pp. 422 *et seq.*). See also MIZRAH.

EAST INDIES. See COCHIN; INDIA.

EASTER (from "Eostre," "Ostara," the Teuton goddess of the rising day, particularly of spring): Name given by Anglo-Saxons to the Christian Passover as the Feast of Resurrection, and rather incorrectly used for the Jewish Passover (Acts xii. 4, A. V.). Originally "Pascha," or "Passover," was the name given by the Christians to the fourteenth day of Nisan as the day of the Crucifixion, corresponding to the eve of the Jewish Passover, the season of the sacrifice of the paschal lamb; this was followed by the memorial of the Resurrection on the succeeding Sunday; the former was regarded as a day of fasting and penitence, the latter as a festival of joy. Under the first fifteen bishops of Jerusalem, who were all Jews, no difference occurred between the Jewish and the Christian dates.

In the course of time it appears that custom and tradition differed in the various churches of the East and the West, some laying stress upon Friday as the historical day of the Crucifixion, others again adhering more to the Jewish custom of celebrating the fourteenth day of Nisan; but as the anti-Judean element obtained ascendency, the connection of the Jewish and the Christian Passover was severed, and adhesion to the fourteenth day of Nisan by Christians (the "Quatrodecimani") was condemned as heresy. Greater stress was laid, in the Western Church at least, on the connection of Easter with the vernal equinox of the sun than with the full moon of the fourteenth of Nisan. In other words, Easter became a solar date, whereas Passover was essentially lunar. The Metonic cycle was, however, employed by both Jews and Christians to reconcile the calculations by sun and moon respectively; Passover and Easter always occur, therefore, about the same time of the year, though they only rarely fall on the same day. At the Nicene Council in 325 it was decided that the Christian Passover should be celebrated on the Sunday following the full moon of the vernal equinox (March 21); and in the Western Church it was decreed that, in case the full moon falls on Sunday, so that there arises the possibility of a common celebration of Passover by Christians and Jews, the Christian Passover should be postponed until the next Sunday; the reason for this given by Emperor Constantine (Socrates, "Hist. Eccl." i. 9) was that "it seemed very unsuitable that we should follow this custom of the Jews, who, constantly erring in the utmost degree, celebrate the Feast of Passover a second time in the same year"; *i.e.*, celebrate it sometimes before the spring equinox. See PASSOVER.

Thus the Crucifixion day, the Friday before Easter, gradually lost its ancient paschal, or Jewish, character, and the day of the Resurrection assumed more and more the character of the Teutonic and Slavonic spring festival with all its pagan rites and festive symbols. Regarding the (Easter) egg at the Jewish Seder, see SEDER.

EATING. See BANQUETS; CLEAN AND UNCLEAN ANIMALS; COOKERY; DIETARY LAWS; FOOD.

EBAL (עיבל; Septuagint, Γαιβάλ; now called "Jabal Slamiyyah"): **1.** A bare mountain 2,900 feet high, north of Sichem, opposite Mt. Gerizim. At the base toward the north are several tombs. The higher part is on the west, and contains the ruins of some massive walls called "Al-Ḳal'ah"; east of this are other ruins now called "Kunaisah." In the Old Testament Ebal is mentioned only infrequently: Joshua built an altar of unhewn stones there (Joshua viii. 31 *et seq.*; compare Deut. xxvii. 5-7); there must have been a sanctuary on this spot. Another account (Joshua viii. 32; compare Deut. xxvii. 1-4, 8) relates that large stone slabs whitened with lime were erected there with the Law inscribed upon them. In Deut. xi. 29, xxvii. 13; Joshua viii. 33, one-half of the people were ordered to place themselves on Mt. Ebal to pronounce curses against those who disobeyed the twelve precepts of prime religious and ethical importance, while the remainder of the tribes, standing upon Mt. Gerizim opposite, pronounced the corresponding blessings upon those who obeyed them. **2.** Name of an Edomite tribe (Septuagint, Γαιβήλ; Gen. xxxvi. 23; I Chron. i. 40). **3.** Name of an Arab tribe (I Chron. i. 22; Gen. x. 28); the Samaritan text has "Ebal" also; the Septuagint Γαιβήλ; while the Masoretic reading is עובל ("'Obal").

EBED-MELECH.—Biblical Data: A Cushite officer at the court of King Zedekiah, who interceded in behalf of Jeremiah, and was sent by the king with thirty (Ewald and Duhm, "three") men to draw up the prophet from the pit (A. V. "dungeon") into which he had been cast by order of the princes (Jer. xxxviii. 4-13). For this deliverance Ebed-melech was prophetically assured of safety in the general overthrow of Zedekiah (*ib.* 16-18). The name occurs in the Phenician inscription, "C. I. S." i. 46, 3 (Lidzbarski, in "Handbuch der Nordsemitischen Epigraphik," p. 334; see also Grey, "Hebrew Proper Names," pp. 117, 147).

E. G. H. G. B. L.

——**In Apocryphal and Rabbinical Literature:** Ebed-melech is the hero of popular legend. According to "The Rest of the Words of Baruch,"

published by J. Rendel Harris in Greek under the title Τὰ Παραλείπομενα Ιερεμίου τοὺ Προφητὸυ (Cambridge, 1889), Ebed-melech slept under a tree during the sixty-six years which elapsed between the destruction of the Temple in the month of Ab and the return of the exiles from Babylonia on the 12th of Nisan; during all this time the figs in the basket which Jeremiah had sent him to carry to the sick in Jerusalem remained fresh as when first put there. Ebed-melech is also counted among the nine persons who entered paradise alive ("Masseket Derek Ereẓ," i., ed. Taurogi, p. 8; "Alphabeticum Siracidis," ed. Steinschneider, pp. 27 *et seq.*; comp. "J. Q. R." v. 409-419).
K.

There is a disagreement among rabbinical writers as to the identification of Ebed-melech. Jonathan b. Uzziel rendered the name "the servant of the king," considering "ha-Kushi" to apply to Zedekiah. This interpretation was adopted by the Talmudists (M. Ḳ. 16b). But the Talmud does not state who the servant of Zedekiah was. In Pirḳe Rabbi Eliezer liii. (see also Pesiḳ. R., ed. Friedmann, 131b), Ebed-melech is identified with Baruch b. Neriah, to whom the epithet "ha-Kushi" is referred. Still, Ebed-melech is generally counted among the nine persons who entered paradise alive, or among the thirteen who never tasted death (Derek Ereẓ Zuṭa ch. i., end; Yalḳ. ii. 367; Yalḳ, Ḥadash, *s.v.* גן עדן). The source of this legend is Jeremiah xxxix. 16, from which is also derived the Ethiopian legend that Ebed-melech, like Ḥoni ha-Ma'gal, slept for seventy years (see R. Basset, "Les Apocryphes Ethiopiens," fascic. x., and Syriac MS. No. 65, fols. 230b-247a in the Bibliothèque Nationale of Paris).

EBEL RABBATI. See Semaḥot.

EBEN-EZER (Hebr. "Eben ha-'Ezer" = the stone of help): **1.** Scene of two battles in which the Israelites were defeated by the Philistines. In the first engagement they lost 4,000 men. The Ark of the Covenant was then fetched from Shiloh, in the hope that its presence might bring victory to the Israelites; but in a second battle they lost 30,000 men. The Ark was captured, and Hophni and Phineas, the sons of Eli, were killed (I Sam. iv. 1-11).

The exact site of Eben-ezer has not been determined. It was near Aphek, and near enough to Shiloh for a man who had been in the second battle to reach Shiloh the same day that it was fought (see G. A. Smith, "Historical Geography," p. 223, note).

2. Name given by Samuel to the stone set up by him between Mizpeh and Shen to commemorate the victory of the Israelites (I Sam. vii. 12).

EBER: The eponymous ancestor of the Hebrews; grandson of Arphaxad and great-grandson of Shem; father of Joktan, the ancestor of the Arabs, and of Peleg, among whose progeny, in the fifth generation, was Abram (Gen. x. 22, 25-30; xi. 18-26).

The word "Eber" signifies "the region beyond." Of the nine words in Genesis that designate Shem's descendants, at least two, "Arphaxad" and "Serug" (Gen. xi. 10, 21), are identical with the names of districts: the former indicating the district of Arrapachitis on the upper Zab, the latter the place where Abu Zaid of "Saruj," the hero of Ḥariri's "Maḳamat," had his home. The conclusion is therefore warranted that the term "Eber" originally designated a district.

The use of "Eber" as a "nomen appellativum" is common; it denotes originally "that which is beyond." This explains the fact that, in the genealogy of the Semites, Abraham and, especially, Israel are called descendants of "Eber"; for if "Eber" had been originally the name of a person, it would be strange that Abraham should have been so closely linked with him, since Eber was not his immediate ancestor, but one six times removed. It is because "Eber" was originally the name of a region that it took so important a place in the genealogical tree.

"Eber" designates the region occupied longest and most continuously by the peoples that traced their descent from Shem through Arphaxad. This is apparent in the words, "And ships shall come from the coast of Chittim [Kition, on the island of Cyprus], and shall afflict Asshur, and shall afflict Eber" (Num. xxiv. 24). Here "Eber" designates a country in the neighborhood of Assyria, and to a certain extent forming a part of it—the country beyond the Euphrates. The importance of that river for anterior Asia may serve to explain the fact that the country beyond the Euphrates was designated *κατ' ἐξοχὴν* as the "region beyond."

The Babylonian name corresponding to the Hebrew "'Eber ha-Nahar" is "'Ebir Nari" (comp. Winckler, "Gesch. Israel's," i. 223, note 1). It occurs in an inscription of Assur-bel-kala (Hommel, "Ancient Hebrew Tradition," p. 195, line 5) about 1100 B.C. In I Kings v. 4 (A. V. iv. 24) "'Eber ha-Nahar" is descriptive of the limits of Solomon's kingdom.

Hommel's opinion is that the region beyond Wadi Sirḥan is indicated; but see Ed. König, "Fünf Neue Arabische Landschaftsnamen im Alten Testament," 1901, p. 44.

EBERTY, GEORGE FRIEDRICH FELIX: German jurist and author; born in Berlin Jan. 26, 1812; died at Arnsdorf (Riesengebirge) July 7, 1884. He was educated at the universities of Berlin and Bonn. In 1849 he became privat-docent at the University of Breslau in natural and criminal law, and in 1854 associate professor.

Eberty's principal works are: "Die Gestirne und die Weltgeschichte: Gedanken über Raum, Zeit, und Ewigkeit," Breslau, 1846, 3d ed. 1874; translated and published in English, and retranslated into German by Voigts-Rhetz, Leipsic, 1860; "Versuch auf dem Gebiete des Naturrechts," Leipsic, 1852; "Geschichte des Preussischen Staats," 7 vols., Breslau, 1866–73; "Walter Scott, ein Lebensbild," 2 vols., Leipsic, 1860; translated into several languages, and reissued in 1870; "Lord Byron, eine Biographie," 2 vols., *ib.* 1862, 2d ed. 1879; "Jugenderinnerungen eines Alten Berliners," Berlin, 1878. De le Roi, in his "Geschichte der Evangelischen Juden-Mission" (i. 240), cites Eberty as a convert to Christianity.

EBIASAPH or **ABIASAPH** (אביאסף, אביסף): A Levite, descendant of Kohath, and one of the ancestors of the prophet Samuel and of Heman, the singer. In Exodus vi. 24 and I Chronicles vi. 22 (37), ix. 19, Ebiasaph (Abiasaph) occurs as a son of Korah and brother of Assir and Elkanah; but in I Chronicles vi. 8 (23) he is stated to have been a son of Elkanah, son of Assir, son of Korah.

K. M. Sel.

EBIONITES (from אביונים = "the poor"): Sect of Judæo-Christians of the second to the fourth century. They believed in the Messianic character of Jesus, but denied his divinity and supernatural origin; observed all the Jewish rites, such as circumcision and the seventh-day Sabbath; and used a gospel according to Matthew written in Hebrew or Aramaic, while rejecting the writings of Paul as those of an apostate (Irenæus, "Adversus Hæreses," i. 262; Origen, "Contra Celsum," ii. 1; Eusebius, "Hist. Eccl." iii. 27; Hippolytus, "Refutatio Hæresium," vii. 34; Jerome, Commentary on Isaiah, i. 3, 12; on Matt. xii. 13). Some Ebionites, however, accepted the doctrine of the supernatural birth of Jesus, and worked out a Christology of their own (Origen, *l.c.* v. 61).

The origin of the Ebionites was, perhaps intentionally, involved at an early date in legend. Origen ("De Principiis," iv. 1, 22; "Contra Celsum," ii. 1) still knew that the meaning of the name "Ebionim" was "poor," but refers it to the poverty of their understanding (comp. Eusebius, *l.c.*), because they refused to accept the Christology of the ruling Church. Later a mythical person by the name of Ebion was invented as the founder of the sect, who, like Cerinth, his supposed teacher, lived among the Nazarenes in Kokabe, a village in the district of Basan on the eastern side of the Jordan, and, having spread his heresy among the Christians who fled to this part of Palestine after the destruction of the Temple, migrated to Asia and to Rome (Epiphanius, "Hæreses," xxx. 1, 2; Hippolytus, *l.c.* vii. 35, x. 22; Tertullian, "De Præscriptione Hæreticorum," 33). The early Christians called themselves preferably "Ebionim" (the poor; comp. Epiphanius, *l.c.* xxx. 17; Minucius Felix Octavius, ch. 36), because they regarded self-imposed poverty as a meritorious method of preparation for the Messianic kingdom, according to Luke vi. 20, 24: "Blessed are ye poor: for yours is the kingdom of God"; and "Woe unto you that are rich! for ye have received your consolation" (=Messianic share; Matt. v. 3, "the poor in spirit," is a late modification of the original; comp. Luke iv. 18, vii. 22; Matt. xix. 21 *et seq.*, xxvi. 9 *et seq.*; Luke xix. 8; John xii. 5; Rom. xv. 26; II Cor. vi. 10, viii. 9; Gal. ii. 10; James ii. 5 *et seq.*). Accordingly they dispossessed themselves of all their goods and lived in communistic societies (Acts iv. 34 *et seq.*). In this practise the Essenes also were encouraged, partly by Messianic passages, such as Isa. xi. 4, xlix. 3 (comp. Ex. R. xxxi.), partly by Deut. xv. 11: "The poor shall never cease out of the land"—a passage taken to be a warning not to embark upon commerce when the study of the Law is thereby neglected (Ta'an. 21a; comp. also Mek., Beshallaḥ, ii., ed. Weiss, 56; see notes).

Origen (*l.c.* ii. 1), while not clear as to the precise meaning of the term "Ebionim," gives the more important testimony that all Judæo-Christians were called "Ebionites." The Christians that fled to the trans-Jordanic land (Eusebius, "Hist. Eccl." iii. 5, 3), remaining true to their Judean traditions, were afterward regarded as a heretic sect of the Ebionites, and hence rose the legend of Ebion. To them belonged Symmachus, the Bible translator (*ib.* vi. 17).

K.

EBONY (הבנים): This word is mentioned only once in the Old Testament, namely, Ezek. xxvii. 15, where it is stated that the Arabian merchant people, the Dedanites (see Dodanim), brought horns of ebony to Tyre. The genuine ebony is the wood of the *Diospyros Ebenum* and of several kindred species. It is now indigenous to eastern Asia and Ceylon, but is found in Zanzibar and Mozambique also. In ancient times ebony was brought from Ethiopia; and this variety, which was considered superior to that of India, was held to be very precious. The Phenicians, Egyptians (Thebes; see "Zeit. für Aegyptologie," 1886, xiii.). and Babylonians ("ushu"; see Schrader, "K. B." iii. 37) used it for fashioning images of their gods and all kinds of precious vessels for sacred and profane use. Cheyne thinks, with some degree of probability ("Encyc. Bibl."), that ebony is mentioned also in I Kings x. 22, where, corresponding to Ezek. xxvii. 15, he reads שן והבנים, "ivory and ebony," instead of שנהבים.

EBSTEIN, WILHELM: German physician; born in Jauer, Prussian Silesia, Nov. 27, 1836. He studied medicine at the universities of Breslau and Berlin, graduating from the last-named in 1859. In this year he was appointed physician at the Allerheiligen Hospital, Breslau; in 1868, chief physician at the municipal poorhouse; in 1869, privat-docent; in 1874, professor in Göttingen University (which chair he still [1903] holds); and in 1877, director of the university hospital and dispensary.

Ebstein's specialties are malassimilation and defective nutrition, in the treatment of which he has introduced several new methods. He eliminates the hydrocarbons from the food almost entirely, but allows fat to be taken with adequate albumen, his theory being that fat contains nutritive matter equivalent to two and a half times that of hydrocarbons (see the following by Ebstein: "Die Fettleibigkeit," etc., 7th ed., Wiesbaden, 1887; "Fett oder Kohlenhydrate," Wiesbaden, 1885; and "Wasserentziehung und Anstrengende Muskelbewegungen," *ib.* 1885; also Oertel, "Die Ebsteinsche Flugschrift über Wasserentziehung," Leipsic, 1885). In this field Ebstein has become one of the leading specialists of the world.

Of his numerous works may be mentioned: "Nierenkrankheiten Nebst den Affectionen der Nierenbecken und der Urnieren," in Von Ziemssen's "Handbuch der Speziellen Pathologie und Therapie," 2d ed., vol. ix.; "Traumatische Leukämie," in "Deutsche Med. Wochenschrift," 1894; "Handbuch der Praktischen Medizin," *ib.* 1899; "Die Medizin im Alten Testament," Stuttgart, 1901; "Handbuch der Praktischen Medizin," (with Schwalbe), *ib.* 1901; "Die Krankheiten im Feldzuge Gegen Russland," *ib.* 1902; "Dorf- und Stadthygiene," *ib.* 1902; "Die Medizin in Bibel und Talmud" (New Testament and Talmud), *ib.* 1903.

Name and Authorship.

ECCLESIASTES, BOOK OF: The name "Ecclesiastes"—literally, "Member of an Assembly," often thought to mean (after Jerome) "Preacher"—is the Septuagint rendering of the Hebrew "Ḳohelet," apparently as an intensive formation from the root "ḳahal," with which such forms as the Arabic "rawiyyah" (professional reciter) have been compared. The Hebrew word is given by the author of the book as his name, sometimes with the article (xii. 8, and probably vii. 27), but ordinarily without it: similar license is allowed in Arabic in the case of some common nouns used as proper names. The author represents himself as the son of David, and king over Israel in Jerusalem (i. 1, 12, 16; ii. 7, 9). The work consists of personal or autobiographic matter, with reflections on the purpose of life and the best method of conducting it. These, the author declares, were composed by him as he increased in wisdom, were "weighed," studied, corrected, expressed in carefully chosen phrases, and correctly written out (xii. 9, 10), to be taught to the people.

The fact of the author describing himself in the foregoing style, together with his statements concerning the brilliancy of his court and his studies in philosophy (i. 13-17, ii. 4-11), led the ancients to identify him with Solomon; and this identification, which appears in the Peshiṭta, Targum, and Talmud (compare 'Er. 21b; Shab. 30a), passed unquestioned till comparatively recent times. The order of the Solomonic writings in the canon suggested that Ecclesiastes was written before Canticles (Rashi on B. B. 14b); whereas another tradition made their composition simultaneous, or put Ecclesiastes last (Seder 'Olam Rabbah, ed. Ratner, p. 66, with the editor's notes). The fact that Ḳohelet speaks of his reign in the past tense (i. 12) suggested that the book was written on Solomon's death-bed (*ib.*). Another way of accounting for it was to suppose that Solomon composed it during the period in which he was driven from his throne (Giṭ. 68b), a legend which may have originated from this passage. The canonicity of the book was, however, long doubtful (Yad. iii. 5; Meg. 7a), and was one of the matters on which the school of Shammai took a more stringent view than the school of Hillel; it was finally settled "on the day whereon R. Eleazar b. Azariah was appointed head of the assembly." Endeavors were made to render it apocryphal on the ground of its not being inspired (Tosef., Yad. ii. 14; ed. Zuckermandel, p. 683), or of its internal contradictions (Shab. 30b), or of a tendency which it displayed toward heresy—that is, Epicureanism (Pesiḳ., ed. Buber, viii. 68b); but these objections were satisfactorily answered (see S. Schiffer, "Das Buch Ḳohelet," Frankfort-on-the-Main, 1884). It was assumed that Solomon had taken the name "Ḳohelet," just as he had taken the name "Agur" (Prov. xxx. 1), as a collector (see, further, Eppenstein, "Aus dem Ḳohelet-Kommentar des Tanchum Jeruschalmi," Berlin, 1888); and probably the Septuagint rendering represents a theory that the name contained an allusion to I Kings viii. 1, where Solomon is said to have gathered an assembly.

Date.

As to the age of the work, there is an indication of the latest date at which it could have been written in the fact that Ben Sira repeatedly quotes or imitates it (Ecclus. [Sirach] xxvii. 26, from Eccl. x. 8, verbatim [comp. LXX.]; xviii. 5, from Eccl. iii. 14, inverted, probably for metrical reasons; xxx. 21, from Eccl. xi. 10; xxxiv. 5b, from Eccl. v. 9; xiii. 21, 22, after Eccl. ix. 16; xxxvii. 14, after Eccl. vii. 19; xxxiv. 1, after Eccl. v. 11; comp. "The Wisdom of Ben Sira," ed. Schechter and Taylor, Introduction, pp. 13 *et seq.*, and p. 26, note 2). Since Ben Sira declares himself a compiler from the Old Testament (xxiv. 28), whereas Ecclesiastes claims originality (xii. 9, 10), it seems certain, in the case of close agreement between the two books, that Ben Sira must be the borrower. This fact gives some date about 250 or 300 B.C. as the latest possible for the composition of the book in its present form; for this repeated borrowing implies that Ben Sira regarded it as part of his canon, which would scarcely contain any works that had been produced in his lifetime. With this fact the nature of Ben Sira's language, as preserved in Talmudic quotations, agrees; for such decided Neo-Hebraisms as עסק ("business"), שמא ("lest"), and הרשה ("authorize") are not found in Ecclesiastes, though, had they been in vogue in the author's time, he would have had constant occasion to employ them. He uses instead חפץ, למה (vii. 16, 17; also used in the Phenician Eshmunazar inscription), and השליט. Though allusions to Ecclesiastes are not common in the New Testament, Matt. xxiii. 23, R. V., "These ye ought to have done, and not to have left the other undone," seems clearly a reminiscence of Eccl. vii. 18. It is therefore necessary to reject all theories that bring the book down to a date later than 250 B.C., including that of Graetz, who regarded it as Herodian—in which he is followed by Leimdörfer (Erlangen, 1891), who makes Simeon ben Shetaḥ the author—and that of Renan, who places it somewhere before 100 B.C. These theories are largely based on conjectural interpretations of historical allusions, which, though often attractive, are not convincing. The Grecisms supposed to be found in the book are all imaginary (for instance, פתגם has no connection with φθέγμα; the phrase "under the sun," which occurs so frequently, is also found in the Eshmunazar and Tabnith inscriptions, not later than 300 B.C., as the equivalent of "on earth"), and the suppositions as to borrowings from Greek philosophy which some have professed to detect are all fallacious (see Ad. Lods, "L'Ecclésiaste et la Philosophie Grecque," 1890).

On the other hand, there is much in the language which, with the present knowledge of Hebrew, one should be disposed to regard as characteristic of a comparatively late period. H. Grotius, in the sixteenth century, collected about a hundred words and phrases of this sort occurring in the book; but several apparent modernisms may represent usages which must have been introduced into Palestine at an early period (*e.g.*, ש for אשר, and the abstracts in ות, both from Assyrian), or words which may have been largely used in ancient times (*e.g.*, "taḳḳen," "to correct," also Assyrian); and even in the case of some idioms which seem especially characteristic of late Hebrew, the likeliest account is that they were preserved through long ages in remote dialects (so "kebar," "already," occurring only in this book —apparently an old verb, "kabur," "it is great"; *i.e.*, "it is a long time since"; comp. the Arabic "ṭalama"); certain Persisms, however (פתגם, "account" [viii. 11], Persian "payghām"; פרדס, "park" [ii. 5], Zend "pairidaeza," Armenian "partez"), seem to provide a more certain clue; and that the book is post-exilic may be asserted with confidence, though how near the latest possible limit the date can be brought down can not be fixed with precision. Hence the Solomonic authorship (which few now hold) may be dismissed; nor indeed could the second king of the dynasty have spoken of "all which were in Jerusalem before me."

Beyond the fact that Ḳohelet was uncritically identified with Solomon, it seems impossible to discover any connection between the two names. The interpretation of the word "Ḳohelet" as a substantive is purely conjectural; and though the phrase rendered "masters of assemblies," but more probably signifying "authors of collections," lends some color to the rendering "collector," it is not free from grave difficulty. As a proper name, however, it might be derived from "ḳahal" in one of the Arabic senses of that root, though its use with the article would in that case constitute a difficulty; finally, it might be a foreign word. The Talmud seems rightly to call attention to the importance of the past tense in i. 12; for one who says "I *was* king" implies that his reign is over: he must be speaking either as a dead man or as one who has abdicated. Ḳohelet is then either a fictitious person or an adaptation of some monarch, like Al-Nu'man of Arabic mythology (Ṭabari, i. 853), who, becoming conscious of the instability of the world, abandons his throne and takes to devotion. Similarly, Ḳohelet appears to pass from king to preacher, though it is not actually stated that he abandons his throne. The references to kings in all but the earliest chapters rather imply that the author is a subject; but this may be unintentional. The author's idea of a king would seem to be modeled on the monarchs of Persia, with kings and provinces subject to them (ii. 8); and the gardens with exotics (ii. 5) and irrigated parks (ii. 6) are likely to belong to the same region.

The Israelitish name for God is nowhere employed, nor does there appear to be any reference to Judaic matters; hence there seems to be a possibility that the book is an adaptation of a work in some other language. This supposition would agree with the fact that certain of the idioms found in it are not so much late Hebrew as foreign Hebrew (*e.g.*, vii. 24, viii. 17, xii. 9); with the frequent use of the participial present (*e.g.*, viii. 14); with the unintelligible character of several phrases which are apparently not corrupt (*e.g.*, iv. 17, x. 15, much of xii. 4–6); and with the want of sharpness that characterizes some of the aphorisms (*e.g.*, x. 9). Further, the verb אזן (xii. 9), which describes a process to which the author says he subjected his proverbs, should, on the analogy of the Arabic "wazan," refer to the numbering of syllables; and the following phrases, apparently meaning "searched out and corrected" or "carefully straightened," have the appearance of referring to metrical correctness, though their exact import is not easy to fix. Of any such formal technicality the verses of Ḳohelet bear no trace in their existing form; yet there are places where the introduction of words would be more intelligible if the author had a fixed number of syllables to make up (*e.g.*, xii. 2, "while the sun *or the light* or the moon or the stars be not darkened"). If this be so, the character of the idioms noticed (*e.g.*, xii. 9, "the wiser Ḳohelet became, the more did he teach") renders it probable that the language of the model was Indo-Germanic; and the introduction of the names "David," "Israel," and "Jerusalem," as well as the concealment of all names in the case of the anecdotes which the author introduces (*e.g.*, iv. 13–15, ix. 14–16), is with the view of accommodating the work to Jewish taste.

In Ecclesiastes there are some continuous sections of considerable length: (1) Ḳohelet's autobiography, i. 12–ii. 26; (2) a statement of the doctrines of determinism and Epicureanism, ix. 1–12; (3) a description of death, xii. 1–8. The rest of the book is in short paragraphs or isolated aphorisms; and the author in xii. 11, 12 declares that the aphoristic style is superior to the continuous discourse—a doctrine which in modern times has been associated with the name of Bacon. In the autobiography the author states that he experimented with various forms of study, pleasure, and enterprise, in the hope of finding the meaning of the endless chain of phenomena, but that he

Contents.

abandoned them in disgust. The morals that he draws, however, appear to be inconsistent; since, while some verses encourage the theory that pleasure is the summum bonum, others seem to warn youth against any such view. This inconsistency, which could probably be paralleled from the works of Oriental pessimists like Omar Khayyam and Abu al-'Ala of Ma'arrah, attracted attention, as has been stated, in early times; but the various attempts that have been made to bring the author into harmony with himself are too subjective to be convincing. Thus some would regard all the edifying passages as interpolations (so Haupt, "Oriental Studies," pp. 243 *et seq.*); others would regard the Epicurean passages as to be read with interrogations (so some rabbis), while it has also been suggested (by Bickell, "Der Prediger") that the sheets of the book have been displaced. None of these opinions can be received without external evidence. It seems more probable, therefore, that the author expresses the varying sentiments of different moods, just as the second of the writers mentioned above alternates between orthodoxy and blasphemy.

After his personal history the author proceeds to give illustrations of more general experiences. In these he speaks as a subject rather than as a king; he cites the prevalence of injustice in the world, for which he had some tentative solutions (iii. 17, 18); later, however, he relapsed into the Epicurean conclusion (iii. 22), accentuated by further observation into pessimism (iv. 1-4). At this point he proceeds to introduce a variety of maxims, illustrated by anecdotes, leading up to the conclusion (vii. 17) that the plan of the universe is incomprehensible. Chapter ix. formulates the doctrine that men's actions and motives are all foreordained, and advises gaiety on the ground that whatever is to happen is already fixed, and that there will be no room for activity in the grave. This is emphasized by anecdotes of the unexpected happening (11-16). There follows another series of maxims leading up to a poetical description of death, and, after some observations on the value of the aphorism, to the assertion that the substance of the whole matter is "Fear God and keep his commandments, . . . for God shall bring every work into judgment" (xii. 13-14).

The felicity, wisdom, and profundity of many of the aphorisms probably endeared the book to many who might have been displeased with the Epicurean and pessimistic passages. Yet without the idea that Ḳohelet was Solomon one could scarcely imagine the work ever having been included in the canon; and had it not been adopted before the doctrine of the Resurrection became popular, it is probable that the author's views on that subject would have caused his book to be excluded therefrom. Mystical interpretation of the book began fairly early (see Ned. 32b); and the work was a favorite source of citation with those rabbis who, like Saadia, were philosophers as well as theologians.

ECIJA (איסנה): Spanish city in the province of Seville. A charge of ritual murder occurred in the time of the "great king" Alfonso (Alfonso X., or Alfonso XI.). The Jew charged with the crime was imprisoned on the eve of the Passover. At the mere report the populace rose. Many Jews saved their lives by taking refuge in the houses of the nobles. In Ecija, his birthplace, the fanaticism of the archdeacon Ferrand Martinez found a fruitful soil. At his bidding the synagogue was destroyed (Dec., 1390, not 1395 as in Jacobs, "Sources," No. 1318). The great Jewish massacre in 1391 spread from Seville to Ecija, where most of the Jews joined the Church. With no less cruelty were the Maranos treated in 1473, until a few knights came to their rescue.

ECIJA, JOSEPH DE. See Benveniste, Joseph ben Ephraim ha-Levi.

ECK, JOHANN MAIER VON: Catholic theologian; born at Eck, Bavaria, Nov. 13, 1486; died in Ingolstadt Feb. 10, 1543. One of the most active antagonists of Luther, he was an equally zealous enemy of the Jews. His work, "Verlegung eines Juden-Büchleins, Darin ein Christ (der) Ganzen Christenheit zu Schmach Will, als Geschähe den Juden Unrecht, in Bezüchtigung der Christ-Kinder-Mord," an endeavor to fasten the blood accusation on the Jews, was published in Ingolstadt in 1542. Eck translated the Vulgate into German in an effort to counteract the influence of Luther's version of the Bible. His translation, known as "Die Ingolstadter Bibel von 1538," is by no means as accurate or as well written as Luther's version. He also edited Haggai in Hebrew.

J. A. M. F.

ED ("witness"): Name supplied by the English versions for the altar erected by the tribes on the east of the Jordan (Joshua xxii. 34). The name does not appear in the Masoretic text nor in the Septuagint. The Hebrew reads simply, "And the children of Reuben and the children of Gad called the altar, for it is a witness between us that the Lord is God"; and it would seem that the name of the altar must have been dropped by a copyist.

Dillmann (Joshua *ad loc.*) suggests "Gal-'ed," as in Gen. xxxi. 47 (A. V. "Galeed").

E. G. H. G. B. L.

'EDAH ḲEDOSHAH or **ḲEHALA ḲADDISHA:** Two Hebrew appellations signifying respectively "holy congregation" and "sacred college"; the former being peculiar to the Palestinian sources, while the latter is used exclusively in the Babylonian Talmud. They designate a Palestinian association of scholars that flourished in the second century (last tannaitic generation), and of which Jose ben Meshullam and Simeon ben Menasya were members; but whether these two constituted the whole association, or merely formed part of a larger aggregation, can only be conjectured, the purport of the main sources relied upon in this instance being somewhat ambiguous and contradictory. The Palestinian Talmud (Ma'as. Sh. ii. 53d) asserts, "By 'Edah Ḳedoshah are meant R. Jose ben ha-Meshullam and R. Simeon ben Menasya."

EDDINUS: One of the three "holy singers . . . , the sons of Asaph" (I Esd. i. 15), at Josiah's Passover. He alone belonged to the royal suite. The name is a Greek equivalent of "Jeduthun." See the parallel passage—II Chron. xxxv. 15.

E. G. H. E. I. N.

EDEL, JUDAH LÖW BEN MOSES HA-LEVI: Russian preacher; born at Zamoscz, government of Lublin, Poland; died at Slonim 1827. He was a pupil of Elijah Wilna, and, besides possessing great homiletic talent, was a Hebraist and a Talmudic scholar. He wrote: "Safah le-Ne'emanim," a concise Hebrew grammar for beginners (Lemberg, 1793); "Afiḳe Yehudah," a collection of homilies, of which only the first volume, containing twenty-four sermons, appeared (*ib.* 1802); "Me Neftoaḥ," a commentary on Maimonides' introduction to Ṭohorot (Byelostok, 1816); "Mayim Ṭehorim," a commentary on Ṭohorot (*ib.* 1817); "Iyye ha-Yam," essays on the Haggadah, edited by his son Solomon (Ostrog, 1835); "Yam ha-Talmud," casuistic notes; "Redife Mayya," on Hebrew synonyms.

Bibliography: Fürst, *Bibl. Jud.* i. 220; Fuenn, *Keneset Yisrael*, p. 415; Zeitlin, *Bibl. Post-Mendels.* p. 71.

K. M. Sel.

EDELMANN (ḤEN-ṬOB), HIRSCH: Author and editor; born in Swislocz, Russia, 1805; died at Berlin, Nov. 20, 1858. He was the son of a rabbinical scholar, and received a good Talmudical education, which he later supplemented by acquainting himself thoroughly with ancient and modern Hebrew literature. In 1839 Edelmann published his first work, "Haggahot u-Bi'urim," notes and commentaries to the "Me'irat 'Enayim" of Nathanson and Etlinger, Wilna, 1839. Five years later he published "'Alim le-Mibḥan," specimens or extracts from his work on difficult passages of the Haggadah in the Talmudim and Midrashim, with an appendix, "Megillat Sefer," on Purim and the Megillah, Danzig, 1844. The following year he published in Königsberg (where, as at Danzig, he had charge of a printing establishment) two critical editions of the Haggadah for Passover, with introductions, annotations, etc. The same year he published, also in Königsberg, the "Siddur Hegyon Leb," which is commonly known as "Landshuth's Prayer-Book." To this work Edelmann also contributed glossaries, emendations, and notes.

Edelmann spent about ten years in England, and was one of the first competent scholars to examine the manuscripts and rare printed books of the Oppenheim collection in the Bodleian Library, Oxford, and to give the outside world some knowledge of their contents. In this work he was assisted by Leopold Dukes; and they jointly edited and published "Ginze Oxford" (with an English translation by M. H. Bresslau, London, 1851).

To this period of Edelmann's activity belong also: "Derek Ṭobim," ethical wills of Judah ibn Tibbon and Maimonides; also ancient Arabic and Greek proverbs rendered into Hebrew, with English translation by Bresslau, London, 1852; "Dibre Ḥefeẓ," extracts from various unprinted works, London, 1853; "Tehillah la-Yesharim," poem by Moses Ḥayyim Luzzatto from an Oxford manuscript, with preface by Edelmann, London, 1854; and "Ḥemdah Genuzah," unedited manuscripts by early rabbinical authorities, with a literary-historical introduction, Königsberg, 1856. Edelmann also brought out a valuable critical new edition of Estori ha-Farḥi's "Kaftor u-Feraḥ," Berlin, 1851, and wrote "Gedullat Sha'ul," a biography of Rabbi Saul Wahl, the alleged one-day King of Poland, with an appendix, "Nir le-Dawid ule-Zar'o," the genealogy of Denis M. Samuel of London, a descendant of that rabbi, London, 1854. In 1852 Edelmann settled in Berlin. For three months before his death he was in the insane department of the Charité hospital of that city.

L. G. P. Wi.

EDELMANN, SIMḤAH REUBEN: Russian grammarian and commentator; born in Wilna Jan., 1821; died in Warsaw Dec., 1892. He received a good Talmudical education at home and later at the yeshibah of Volozhin. He lived in Rossein for about thirty years, mainly in the employ of a rich merchant of the name of Gabrilovitch, but for a part of the time in business for himself. Edelmann was the first to discover the latent talent of the poet Judah Loeb Gordon, for whom he obtained a position as teacher in Gabrilovitch's house. After the death of his wife Edelmann left Rossein and lived for a short time in Tels (1867). Later he was employed successively in Mohilev and Königsberg. In his later days he was again in business for himself, first in Brest and then in Kovno, and at last settled in Warsaw, the home of his surviving children, where he died.

Edelmann was the author of the following works: "Shoshannim," containing, besides some treatises on grammar and exegesis, a few poems, and a commentary on Canticles, Königsberg, 1860; "Ha-Mesillot," in three parts, of which the first treats of the Masoretic text of the Bible and of the changed readings occurring in the Bible quotations of the Talmud;

the second is a quasi-critical commentary on Psalms lxviii., xc., and c., and the third contains commentaries and explanations on various difficult passages of the Haggadah, Wilna, 1875; "Ha-Tirosh," a commentary on Midrash Rabbah, part 1, Genesis, Warsaw, 1891; and "Doresh Reshumot" (a scathing criticism of the liberal views advanced by Weiss in "Dor"), *ib.* 1892. He also contributed valuable articles to Fuenn's "Ha-Karmel" and Atlas' "Ha-Kerem."

Edelmann was considered one of the foremost champions of Orthodoxy in modern Hebrew literature.

Bibliography: *Hakam we-Dor*, a biography of S. R. Edelmann by his son Mordecai Isaac, Warsaw, 1885 (Hebrew); Zeitlin, *Bibl. Post-Mendels.*

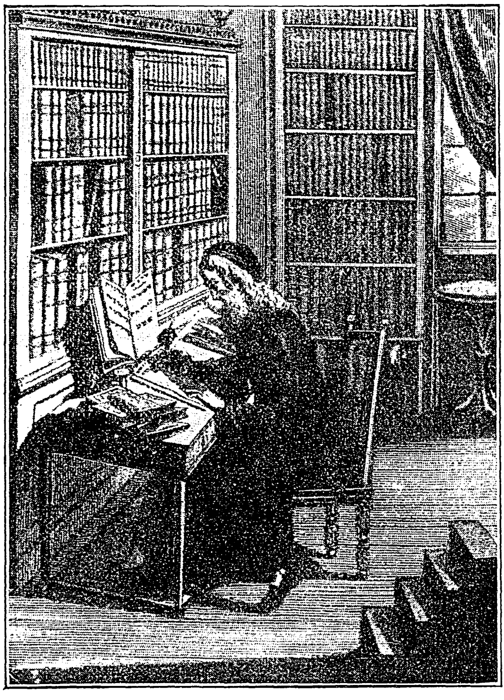
EDELS, SAMUEL ELIEZER BEN JUDAH: Polish rabbi; born in Posen, 1555; died at Ostrog Nov. 30, 1631. He was a son-in-law of Rabbi Moses Ashkenazi, author of "Zikron Mosheh." Samuel bears the name of his mother-in-law, Edel. In 1585 his wife's parents founded for him a large yeshibah, which was under his management until 1609. His mother-in-law supported the students out of her own money. In 1590 he was already recognized as an eminent scholar, and together with other rabbis, who were in convention at the city of Lublin, he signed the anathema against the use of money for the purpose of securing a rabbinical position. In 1610 he became rabbi of Chelm, which position he held with distinction for four years; he was then elected rabbi and head of the yeshibah at Lublin (1614). From Lublin he was called to Tictin (Tykoczin). During the remainder of his life Edels was rabbi and head of the yeshibah of Ostrog, in the Russian province of Volhynia.



Samuel Edels.
(From a traditional portrait.)

Edels conceived a new method in the study of the Talmud. His efforts were directed toward the investigation of the Tosafot, and the explanation of any passages on them which seemed to be unclear or to contradict the Talmud. He thus succeeded in producing many "ḥiddushim" (novellæ) on the entire Talmud. His constant desire was to discover something new and original, and because of his originality discussions that were really complex and difficult seemed to him extremely simple.

Edels in 1600 published part of his ḥiddushim anonymously. On learning that his new method had made a favorable impression upon his contemporaries, he published the remaining part in 1611.

Edels also endeavored to apply his new method to the Haggadot of the Talmud. This he did in a work which he published in 1627 in opposition to the many rabbis who devoted their time to the Cabala, and who tried to explain the Haggadah by means of it. Edels considered the method of his opponents as a mere waste of time.

From his various works it is clear that Edels possessed a knowledge of astronomy and philosophy; of the latter science, indeed, he made a deep and careful study.

His published works are: novellæ on Beẓah and Yebamot, Basel, 1600; on Niddah and Nedarim, Prague, 1602; and on the other treatises of the Talmud, Lublin, 1611–21; novellæ on the haggadic portions of the Talmud, vol. i., *ib.* 1627; vol. ii., Cracow, 1631; supplement to parts of his halakic novellæ, Lublin, 1670; hymns for the Sabbath in the work "Ḳabbalat Shabbat," *ib.* 1620. Most editions of the Talmud contain Edels' novellæ.

L. G. B. F.

EDEN, GARDEN OF (Hebrew, גן עדן; Arabic, "Jannat 'Adn".—**Biblical Data:** Name given to the "earthly paradise" occupied by Adam and Eve before their fall through sin. The word "Eden," perhaps an Assyrian loan-word, is of the same root as the Assyrian "edinu," synonymous with "ṣeru" (= field, depression; compare the Arabic "zaur," which is the name still given to the country south of Babylon and extending to the Persian Gulf; the nomadic tribes inhabiting it were called by the Assyrians "sabe edini") (see Delitzsch, "Wo Lag das Paradies?"). Its connection with the Hebrew word עדן is of later origin. Sprenger ("Das Leben und die Lehre des Mohammad," ii. 507) explains it through the Arabic "'adn."

The writer of the Biblical story of Eden (Gen. ii.–iii.) is evidently describing some place which he conceives to be on the earth; hence the exact details: "God planted a garden eastward, in Eden," etc. Many attempts have been made to determine the precise geographical location. The most ancient tradition, going back to Josephus and followed by most of the Church Fathers, makes Havilah equivalent to India, and the Pison one of its rivers, while Cush is Ethiopia and the Gihon the Nile. A very popular theory places Eden in Babylonia. Calvin made the Shaṭṭ al-'Arab—formed by the union of the Tigris and Euphrates—the river that "went out of the garden"; but it is now known that in ancient times the two rivers entered the Persian Gulf separately. Friedrich Delitzsch also places Eden in the country around Babylon and south of it, a country which was so beautiful in its luxuriant vegetation and abundant streams that it was known as "Kar-Duniash," or "garden of the god Duniash." Rawlinson even tried to show the identity of the names "Gan-Eden" and "Kar-Duniash." This region is watered practically by the Euphrates alone, which is here on a higher level than the Tigris. The Pison and the Gihon are identified with two canals (they may originally have been river-beds) which branch out from the Euphrates just below Babylon. The former, to the west, is the Pallacopas, upon which Ur was situated, and Havilah is thus identified with the portion of the Syrian desert bordering on Babylonia, which is known to have been rich in gold. The latter, Gihon, is the Shaṭṭ al-Nil, which passes the ruins of the ancient Erech, while Cush is the Mat Kashshi, or the northern part of Babylonia proper. Curiously enough, this region was also called "Meluḥa," which name was afterward transferred to Ethiopia. Other Assyriologists (*e.g.*, Haupt, "Wo Lag das Paradies?" in "Ueber Land und Meer," 1894–95, No. 15) do not credit the Biblical writer with the definiteness of geographical knowledge which Delitzsch considers him to have had.

Views of Delitzsch.

The Gilgamesh Epic.

A very natural theory, which must occur to any one reading the Babylonian Gilgamesh epic, connects Eden with the dwelling of Parnapishtim, the Babylonian Noah, at the "confluence of streams." This is supposed to have been in the Persian Gulf or Nar Marratim ("stream of bitterness"), into which emptied the four rivers Euphrates, Tigris, Kercha, and Karun (compare Jensen, "Kosmologie der Babylonier," p. 507, and Jastrow, "Religion of the Babylonians and Assyrians," p. 506). It is probable, however, that the story as given in the Bible is a later adaptation of an old legend, points of which were vague to the narrator himself, and hence any attempt to find the precise location of Eden must prove futile. Indeed, the original Eden was very likely in heaven, which agrees with the view on the subject held by the Arabs. Gunkel, in his commentary on Genesis, also adopts this view, and connects the stream coming out of Eden with the Milky Way and its four branches.

The El-Amarna Tablets.

Though there is no one Babylonian legend of the Garden of Eden with which the Biblical story can be compared as in the case of the stories of the Creation and of the Flood, there are nevertheless points of relationship between it and Babylonian mythology. On one of the tablets found at Tell el-Amarna, now in the Berlin Museum, occurs the legend of Adapa. Adapa, the first man, is the son of the god Ea, by whom he has been endowed with wisdom, but not with everlasting life. He lives in Eridu, and cares for the sanctuary of the god. One day while fishing in a calm sea the south wind suddenly arises and overturns his boat. In his anger Adapa fights with the south wind and breaks his wings so that he can not blow for seven days. Anu, the god of heaven, hearing of this, summons Adapa before him. Ea gives his son instructions as to his behavior before Anu; among other things he tells him: "Bread of death will they offer thee: eat not of it. Water of death will they bring thee: drink not of it." Adapa does as he is told, but the bread and water Anu causes to be placed before him are of life, not of death. Thus Adapa loses his chance of eternal life. He puts on the garment, however, which is offered him, following Ea's instructions. In this story the bread of life is parallel to the tree of life in the Biblical story. It is probable that the water of life also formed a part of the original story, and that the river of Eden is a trace of it. In Ezek. xlvii. 6–12 and, with some variation, in Rev. xxii. 1, 2 mention is made of a "river of water of life, . . . and on either side of the river was there the tree of life," showing that the water of life was associated with the tree of life.

Further, in the Biblical story, as in the Adapa legend, man is prevented from eating the food of life through being told that it means death to him. "In the day that thou eatest thereof thou shalt surely die" (Gen. ii. 17); and it is Ea, who has formed man, who is the means of preventing him from attaining life everlasting, just as it is God who removes man from out of Eden "lest he put forth his hand and take also of the tree of life, and eat, and live for ever" (*ib.* iii. 22). Jastrow (*l.c.*) remarks that the Hebrew story is more pessimistic than the Babylonian, since God even begrudges man knowledge, which the Babylonian god freely gives him. Adapa, who has been endowed with knowledge, puts on the garment given him by Anu, and Adam and Eve, after eating of the tree of knowledge, make for themselves garments of fig-leaves.

Schrader ("K. A. T." ii. 1. 523) calls attention to the possibility of associating the name "Adam" with "Adapa." The "garden of God," situated on the mountain, in Ezek. xxviii. 13, 14, and the tall cedar in Ezek. xxxi. 3, may have some connection with the cedar-grove of Khumbaba in the Gilgamesh epic and with the high cedar in the midst of the grove. In this connection may be mentioned the attempt to associate Eden with the mountain in Iranian mythology, out of which rivers flow, or with the Indian mountain Maru with the four rivers (Lenormant). Jensen ("Keilschriftliche Bibliothek," vi.) places the "confluence of the streams" in the Far West, and associates the island with the Greek Elysium.

Snake and Cherubim.

The snake in the story is probably identical with the snake or dragon in the Babylonian story of the Creation. In the British Museum there is a cylinder seal which has been supposed by Delitzsch, among others, to represent the Babylonian story of Eden (see illustration, Jew. Encyc. i. 174). The seal represents two figures, a male and a female, seated on opposite sides of a tree, with hands stretched toward it; behind the woman is an upright snake. This picture alone, however, is hardly sufficient basis for believing that the Babylonians had such a story. The cherubim placed to guard the entrance to Eden are distinctly Babylonian, and are identical with the immense winged bulls and lions at the entrances to Babylonian and Assyrian temples. See CHERUB.

E. G. H. M. W. M.

——**In Rabbinical Literature:** The Talmudists and Cabalists agree that there are two gardens of Eden: one, the terrestrial, of abundant fertility and luxuriant vegetation; the other, celestial, the habitation of righteous, immortal souls. These two are known as the "lower" and "higher" Gan Eden. The location of the earthly Eden is traced by its boundaries as described in Genesis.

In 'Erubin 19a (comp. Rabbinovicz, "Variæ Lectiones," *ad loc.*) Resh Laḳish expresses himself to the following effect: "If the paradise is situated in Palestine, Beth-Shean [in Galilee] is the door; if in Arabia, then Bet Gerim is the door; and if between the rivers, Damascus is the door." In another part of the Talmud (Tamid 32b) the interior of Africa is pointed out as the location of Eden, and no less a personage than Alexander the Great is supposed to have found the entrance of Gan Eden in those regions which are inhabited and governed exclusively by women. Alexander, who desired to invade Africa, was directed to Gan Eden by the advice of the "elders of the South."

A baraita fixes the dimensions of Gan and of Eden by comparisons with Egypt, Ethiopia, etc.: "Egypt is 400 parasangs square, and is one-sixtieth the size of Cush [Ethiopia]. Cush is one-sixtieth of the world [inhabited earth], the Gan being one-sixtieth of Eden, and Eden one-sixtieth of Gehinnom. Hence the world is to Gehinnon in size as the cover to the pot" (Ta'an. 10a). The same baraita in the Jerusalem Talmud defines the territory of Egypt as 400 parasangs square, equal to forty days' journey, ten miles being reckoned as a day's journey (Pes. 94a).

The Rabbis make a distinction between Gan and Eden. Samuel bar Naḥman says that Adam dwelt only in the Gan. As to Eden—"No mortal eye ever witnesseth, O God, beside thee" (Isa. lxiv. 4, Hebr.; Ber. 34b).

Identification of the Four Rivers.

The Midrash (Gen. R. xvi. 7) identifies the "four heads" of the rivers with Babylon (Pison), Medo-Persia (Gihon), Greece (Hiddekel), Edom-Rome (Perat), and regards Havilah as Palestine. The Targum Yerushalmi translates "Havilah" by "Hindiki" ("Hindustan," or India), and leaves "Pison" untranslated. Saadia Gaon, in his Arabic translation, renders "Pison" the Nile, which Ibn Ezra ridicules, as "it is positively known that Eden is farther south, on the equator." Naḥmanides coincides in this view, but explains that the Pison may run in a subterranean passage from the equator northward. Obadiah of Bertinoro, the commentator of the Mishnah, in a letter describing his travels from Italy to Jerusalem in 1489, relates the story of Jews arriving at Jerusalem from "Aden, the land where the well-known and famous Gan Eden is situated, which is southeast of Assyria." Jacob Safir, who visited Aden in 1865, describes it in his "Eben Sappir" (ii. 3) as sandy and barren, and can not posssibly indorse the idea of connecting Aden with the Eden of Genesis. The opinions of the most eminent Jewish authorities point to the location of Eden in Arabia. The "four heads" or mouths of the rivers (= seas) are probably the Persian Gulf (east), the Gulf of Aden (south), the Caspian Sea (north), and the Red Sea (west). The first river, Pison, probably refers to the Indus, which encircles Hindustan, confirming the Targum Yerushalmi. The second river, Gihon, is the Nile in its circuitous course around Ethiopia, connecting with the Gulf of Aden. The third river, Hiddekel, is the Tigris, which has its course in the front (קדמת) of Assur (= Persia), speaking from the writer's point of view in Palestine. Some explain the difficulty of finding the courses of the rivers by supposing that since the Deluge these rivers have either ceased to exist, entirely or in part, or have found subterranean outlets. Indeed, the compiler of the Midrash ha-Gadol expresses himself as follows: "Eden is a certain place on earth, but no creature knows where it is, and the Holy One, blessed be He! will only reveal to Israel the way to it in the days of the king Messiah" (Midr. ha-Gadol, ed. Schechter, col. 75).

The boundary line between the natural and supernatural Gan Eden is hardly perceptible in Talmudic literature. In fact, "Gan Eden and heaven were created by one Word [of God], and the chambers of the Gan Eden are constructed as those of heaven, and as heaven is lined with rows of stars, so Gan Eden is lined with rows of the righteous, who shine like the stars" (Aggadat Shir ha-Shirim, pp. 13, 55).

Earthly and Heavenly Gan Eden.

The leviathan disturbs the waters of the seas, and would have destroyed the life of all human beings by the bad breath of his mouth, but for the fact that he occasionally puts his head through the opening of Gan Eden, the spicy odor issuing from which acts as an antiseptic to his bad smell (B. B. 75a). Ḥiyya bar Ḥanina says that God had prepared for Adam ten canopies of various precious stones in Gan Eden, and quotes Ezek. xxviii. 13 (B. B. 75a). This, according to the Midrash, relates to the celestial Gan Eden. The Zohar claims for everything on earth a prototype above (Yitro 82a). Naḥmanides also says that the narrative of Eden in Genesis has a double meaning, that besides the earthly Gan Eden and the four rivers there are their prototypes in heaven (Commentary to Gen. iv. 13). See PARADISE.

S. S. J. D. E.

——**In Arabic Literature:** The Arabic word for Eden is "'Adn," which, according to the commentators and lexicographers, means "fixed residence," *i.e.*, the everlasting abode of the faithful. "'Adn," preceded by "jannat" (gardens), occurs ten times in the Koran (suras ix. 73, xiii. 23, xvi. 33, xviii. 30, xix. 62, xx. 78, xxxv. 30, xxxviii. 50, xl. 8, xli. 12), but always as the abode of the righteous and never as the residence of Adam and Eve, which occurs in the Koran only under the name of "jannah" (garden), although the Moslem commentators agree in calling it "Jannat 'Adn" (the Garden of Eden). In sura ii. 23 occur the words: "And we have said to Adam: 'Stay with thy wife in the garden ["fi al-jannah"],'" which Baiḍawi explains: "The garden here is the 'Dar al-Thawab' [The House of Recompense], which is the fourth of the eight heavens." According to the Koran, the gardens of Eden are in heaven, and form a part of the blissful abode of the believers. In sura ii. 23 it gives the command: "Announce that the believers will reside in delightful gardens," on which Baiḍawi remarks: "According to Ibn al-'Abbas, there are seven gardens, one of which is called 'Firdaus' [Paradise] and one ''Adn' [Eden]." Hence there is a difficulty as to the Eden from which Adam was cast out. Baiḍawi says on sura ii. 23: "Some people have thought that this Eden was situated in the country of the Philistines, or between Persia and Karman. God created it in order to put Adam to the test." Mohammed Ṭahir ("Majma' al-Biḥar," p. 225), speaking of the tradition that the rivers Jaiḥun and Jaiḥan are rivers of the garden ("al-jannah"), says: "The terms are figurative, implying that faith extended to those regions and made them rivers of paradise." In another place (*ib.* p. 164) he says: "The four rivers, Siḥan [Jaxartes], Jaiḥan [Gihon], Furat [Euphrates], and Nil [Nile], are rivers of paradise." Abu Mohammed Mu'afa al-Shaibani, author of the "Uns al-Munḳaṭi'in," states the following tradition: "When God created the Garden of Eden, He created in it that which the eye had never seen before, that which the ear had never heard of before, and that which had never been desired before by man's heart." There is another tradition that God, having created the Garden of Eden, ordered it to speak. The garden pronounced the following words: "There is no God besides Allah." The garden was ordered to speak a second time, and it added: "The faithful will be happy." After a third order it said: "Misers or hypocrites will never enter me." Wahb ibn Munabbah says: "There is a tradition that the Garden of Eden has eight gates, the porters of which must not let anybody come in before those who despise earthly things and prefer those of heaven." According to one tradition the tree of life was a stalk of wheat—which in the days of Adam grew to the size of a tree—a vine, a fig-tree, or a "tree that whoever eats of it grows young again" (Baiḍawi, Commentary on Koran, sura ii. 33). Weil, in "Biblische Legenden der Propheten," gives some interesting traditions in regard to Eden and Satan.

EDER, EDAR: **1.** A place near Ephrath, *i.e.*, Bethlehem. Jacob, while journeying from Bethlehem to Hebron, encamped "beyond the tower of Eder" ("Migdal-'eder," Gen. xxxv. 21). The name "Migdal-'eder," signifying "tower of the flock," was probably derived from a tower used as a lookout for robbers (comp. Micah iv. 8).

2. A city in Judah "toward the border of Edom in the south" (Josh. xv. 21, R. V.), identified by Conder with Khirbat al-'Adar, five miles south of Gaza.

3. A Levite of the Merari clan, a contemporary of David (I Chron. xxiii. 23, xxiv. 30).

4. A Benjamite chief (A. V. "Ader," I Chron. viii. 15).

E. G. H. E. I. N.

EDERSHEIM, ALFRED: Christian theologian and missionary to the Jews; born at Vienna, of Jewish parents, March 7, 1825; died at Menton March 16, 1889. He embraced Christianity in 1846, and was for some time a missionary to the Jews in Jassy, Rumania. After having been successively a Presbyterian and a member of the Free Church, he joined the Episcopalians, settling at Oxford in 1882. His last ecclesiastical appointment was that of vicar of Loders, Dorsetshire, which he resigned in 1883.

Edersheim's works include: "A History of the Jewish Nation After the Destruction of Jerusalem," 1856; "The Temple; Its Ministry and Services," 1874; "Life of Jesus, the Messiah," 2 vols., 1883 (his most important work); "Prophecy and History in Relation to the Messiah," being his Warburtonian Lectures; and a commentary on Ecclesiasticus, in Wace's commentary on the Apocrypha.

EDESSA (Urhai, 'Οσροήνη): The present Urfa, a city in the vilayet of Aleppo, Asiatic Turkey. No mention of the name is found in Jewish writings, except, perhaps, in Yoma 10a (ארכת or אריכות; Neubauer, "G. T." p. 346; but explained by Jastrow, *s.v.*, as Warka in southern Mesopotamia). The Targum Yer. has הדס ("Edessa") for ארך in Gen. x. 10. Jews certainly lived here in early times. One of the pre-Christian rulers, Bakru I., son of Phradasht (115–112), is said to have been saved by a Jewess named Kutbi, whom the Mesopotamians afterward adored as a goddess (Cureton, "Spicilegium Syriacum," 25, 11). At the beginning of the first century C.E. a Parthian family ruled here, whose first member was Abgar VII., son of Izates, son of Helena of ADIABENE. When Addai, the apostle, came to Edessa, he is said to have stayed at the house of a Jew named Tobias, and to have converted many of his host's coreligionists. The influence of the Jews is seen as well in the fact that the Peshiṭta translation—with its Jewish tendencies—was made in Edessa, as in the Jewish material to be found in the writings of such Syriac Church fathers as St. Ephraim. The old Edessan chronicle mentions at least two synagogues (בית שבתא דיודיא), one of which was turned by Bishop Rabbula (412) into the chapel of Mar Stephen (though Heller reads עודיא, a Christian sect); the notice is repeated in pseudo-Dionysius of Tellmaḥre and by Bar Hebræus. The latter relates also ("Eccl. Chron." i. 359) that the Moslem Mohammed ibn Ṭahir built a mosque in 825 where formerly there had been a synagogue. The city was visited by Pedro de Texeira (seventeenth century) and Benjamin II. (*c.* 1860); both report the legends which connect the place with Abraham because of its proximity to Harran. The Syriac Midrash identifies ארך with Edessa, as in Targum Yer. (Budge, "The Bee," p. 37; Bezold, "Die Schatzhöhle," p. 154). The house where Abraham was born and the furnace into which he was thrown by Nimrod are still to be seen, and the great mosque still bears the name "Khalil al-Rahman" (*i.e.*, "Abraham"). The house of Job is also to be seen, and, according to Julius Africanus, the tent of Jacob was preserved here. According to Benjamin II., the city had, in his day, 150 Jewish inhabitants; according to Cuinet, the whole sanjak, of which Urfa is the capital, has at present about 367 Jews in a total population of 143,483; the city itself 322 in a total of 55,000.

EDINBURGH: Capital of Scotland. When the Jews began to settle in Scotland early in the nineteenth century, they appear to have been attracted in the first instance to Edinburgh. The first regular synagogue was established in 1816 with twenty families. This synagogue was situated in a lane off Nicholson street. After a year the congregation moved to a small hall in Richmond Court; and here it remained until it acquired a synagogue in Park Place, the old Ross House having been adapted for the purpose (1868). The congregation worshiped here until quite recent years. The present synagogue in Graham street was erected in 1897. Until 1880 there was only one synagogue in Edinburgh. By that time a number of foreign families, principally engaged in the water-proof clothing industry, had settled in the Dalry quarter of the city, and they formed a congregation and erected a small place of worship in Caledonian Crescent.

The original cemetery of the Edinburgh Jews was situated near the Causeway side. This ceased to be used about a quarter of a century ago, when a portion of the Echo Bank Cemetery was acquired and railed off for Jewish purposes.

The first minister was the Rev. Moses Joel of London, who continued in office forty-six years, until his death in 1862. He was succeeded in the order named by Elkan, Rosebaum, Abraham Harfield (1864–66), B. Rittenberg (1867–73), Albu, and S. Davidson. J. Fürst, a native of Courland, educated at the rabbinical college of Wilna, has been the minister since 1879.

Edinburgh has three Jewish charities: a benevolent loan society, a board of guardians, and a lying-in society. A Hebrew school is attached to the Graham Street Synagogue; and there is a Jewish literary society as well as a Jewish amateur orchestral society. The Jews number (1903) about 2,000 in a total population of 317,000.

EDINGER, MARKUS: German deputy; born at Worms Jan. 14, 1808; died at Mannheim Feb. 9, 1879. He was the first Jew summoned by the government to act as juror, serving at Mayence in 1847. It was he who brought about at Mayence, in spite of the passionate opposition of the Orthodox, the holding of regular synagogue services in German. He took an active part in politics. In 1848 he was one of the leaders of the Democratic party, and his services were acknowledged in the following year when he was elected mayor, while in 1850 he was sent as deputy to the Upper House of Hesse—a distinction rarely enjoyed by a Jew in those days. The success of the reactionary party in 1853 obliged him to retire from his office for a time.

S. S. Ro.

EDOM, IDUMEA (אדום, 'Ιδουμαία): Edom is the name which was given to Esau, the first-born son of Isaac, on the day he sold his birthright to Jacob for a mess of pottage, the reddish color of which gives it its name—"Adom" (Gen. xxv. 30). The country which was subsequently inhabited by Esau and his descendants was called "the field of Edom" (Gen. xxxii. 3, R. V.) or "the land of Edom" (Gen. xxxvi. 16; Num. xxxiii. 37). "Edom" in the Bible is also used as an equivalent for "Edomites," though the expression "the children of Edom" occurs but once (Ps. cxxxvii. 7). The country had before that been called "Mount Seir" (Gen. xxxii. 4 [Hebr.], xxxvi. 8), from "Seir" the progenitor of the Horites, who lived there previously (Gen. xiv. 6; xxxvi. 20, 21). According to Josephus ("Ant." i. 18, § 1), the name "Seir" is due to the fact that Esau was hairy (Gen. xxv. 25), but according to Gen. xiv. 6, the mountain was called "Seir" long before Esau's birth. The boundaries of Edom are very concisely defined: The country stretched along the route followed by the Israelites from the Sinaitic peninsula to Kadesh-barnea, that is, along the east side of the valley of Arabah. Southward it reached as far as Elath, which was the seaport of Edom (Deut. i. 2; ii. 1, 8). On the north of Edom was the territory of Moab (Judges xi. 17, 18; II Kings iii. 8, 9). The boundary between Moab and Edom was the brook Zered (Deut. ii. 13, 14, 18). The ancient capital of Edom was Bozrah (Gen. xxxvi. 33; Isa. xxxiv. 6, lxiii. 1, *et al.*). In the time of Amaziah (838 B.C.), Selah (Πέτρα) was its principal stronghold (II Kings xiv. 7); Elath and Ezion-gaber its seaports (I Kings ix. 26).

Biblical Data.

Contrary to the promise of Isaac that Esau's dwelling would be of the fatness of the earth and of the dew of heaven (Gen. xxvii. 39), Edom was a rocky and calcareous country. Esau is described as a man who subsisted by hunting (Gen. xxv. 27 *et passim*), as his descendants, the Edomites, did, living amid rocky fastnesses and mountain heights (Jer. xlix. 16; Obad. 3, 4). The name "Mount Seir" or "Mount of Esau" shows that Edom was a mountainous country, and therefore it was called by later writers "Gebalene" (the mountainous).

Rulers of Edom.

According to the Bible, immediately after Isaac's death Esau settled in Mount Seir (Gen. xxxvi. 6, 8), where he had lived before (Gen. xxxii. 3). The Edomites soon became powerful enough to extirpate the Horites, the former inhabitants of the country (Deut. ii. 12), whose ways of life they adopted. As among the Horites, each tribe was ruled by a prince or chief (אלוף), whose position resembled probably that of an Arab sheik (Gen. xxxvi. 15–19, 29–30). Later the Edomites organized themselves into a kingdom, and had had eight kings when the first king in Israel began his reign (*ib.* xxxvi. 31–39). However, a list of chiefs given after that of the kings (*ib.* xxxvi. 40–43) shows that subordinate chiefs ruled under the sovereignty of the king. In the time of Moses both chiefs and king are mentioned (Ex. xv. 15; Num. xx. 14). When the King of Edom refused to allow the children of Israel to pass through his land on their way to the land of Canaan the Israelites were expressly ordered not to wage war upon the Edomites, but to go round their country (Num. xx. 14–21; Deut. ii. 4–6). Neither did the King of Edom attempt hostilities against the Israelites, though he prepared to resist aggression.

Nothing further is heard of the Edomites until their defeat by Saul four hundred years later (I Sam. xiv. 47); forty years later David overthrew the Edomites in the "valley of salt," and his general Joab slew all their males (II Sam. viii. 13, 14; I Kings xi. 15, 16). Hadad, one of the royal family, fled to Egypt, and after David's death returned and endeavored to excite his countrymen to rebellion; failing in which he went to Syria (*ib.* xi. 14–22; Josephus, "Ant." viii. 7, § 6). From that time Edom remained subject to Israel. David placed over the Edomites Israelite governors or prefects (נציבים: II Sam. viii. 14), and this form of government seems to have continued under Solomon. When Israel divided into two kingdoms Edom became a dependency of Judah. In the time of Jehoshaphat (914 B.C.) a king of Edom is mentioned (II Kings iii. 9, 10, 13, 26), who was probably a Judean appointed by the King of Judah. It is stated further (II Chron. xx. 10–23) that the inhabitants of Mount Seir invaded Judea in conjunction with Ammon and Moab, and that the invaders turned against one another and were all destroyed. Edom revolted against Jehoram, elected a king of its own, and afterward retained its independence (II Kings viii. 20–22; II Chron. xxi. 8). Amaziah attacked the Edomites, and slew 10,000 in battle; 10,000 more being dashed to pieces from the cliffs. Their stronghold, Selah, was taken, but the Israelites were never able to subdue Edom completely (II Kings xiv. 7; II Chron. xxv. 11, 12).

In the time of Nebuchadnezzar the Edomites took an active part in the plunder of Jerusalem and in the slaughter of the Jews (Ps. cxxxvii. 7; Obad. 11, 13, 14). It is on account of these cruelties that Edom was so violently denounced by the Prophets (Isa. xxxiv. 5–8; Jer. xlix. 7–22; Obad. *passim*).

Edom is mentioned in the cuneiform inscriptions in the form "Udumi" (u); three of its kings are known from the same source: Ḳaus-malaka at the time of Tiglath-pileser (*c.* 745), Malik-rammu at the time of Sennacherib (*c.* 705), and Ḳaus-gabri at the time of Esarhaddon (*c.* 680). According to the Egyptian inscriptions, the "aduma" at times extended their possessions down as far as the borders of Egypt (Müller, "Asien und Europa," p. 135). After the conquest of Judah by the Babylonians, the Edomites were allowed to settle in southern Palestine. At the same time they were driven by the Nabatæans from Idumea. In southern Palestine they prospered for more than four centuries. Judas Maccabeus conquered their territory for a time (B.C. 163; "Ant." xii. 8, §§ 1, 6). They were again subdued by John Hyrcanus (*c.* 125 B.C.), by whom they were forced to observe Jewish rites and laws (*ib.* xiii. 9, § 1; xiv. 4, § 4). They were then incorporated with the Jewish nation, and their country was called by the Greeks and Romans "Idumea" (Mark iii. 8; Ptolemy, "Geography," v. 16). With Antipater began the Idumean dynasty that ruled over Judea till its conquest by the Romans. Immediately before the siege of Jerusalem 20,000 Idumeans, under the leadership of John, Simeon, Phinehas, and Jacob, appeared before Jerusalem to fight in behalf of the Zealots who were besieged in the Temple (Josephus, "B. J." iv. 4, § 5).

Post-Biblical Times.

From this time the Idumeans ceased to be a separate people, though the name "Idumea" still existed the time of Jerome.

According to the Law (Deut. xxiii. 8, 9), the congregation could not receive descendants of a marriage between an Israelite and an Edomite until the fourth generation. This law was a subject of controversy between R. Simeon and other Talmudists, who maintained that female descendants were also excluded until the fourth generation, contrary to R. Simeon, who regarded the limitation as applicable in only to male descendants (Yeb. 76b).

The name "Edom" is used by the Talmudists for the Roman empire, and they applied to Rome every passage of the Bible referring to Edom or to Esau. In Leviticus Rabbah (xiii.) Rome, under the name of "Edom," is compared to a boar, and the symbolic name "Seir" was used by the poets of the Middle Ages not only for Rome (comp. Ecclus. l. 26, Hebr.), but also for Christianity (Zunz, "Literaturgesch." p. 620). On this account the word "Edom" was often expunged by the censor and another name substituted (Popper, "Censorship of Hebrew Books," p. 58). In place of "Edom," the word "Ḥazir" (swine) was occasionally used, perhaps as a mere term of reproach (but see Epstein, "Beiträge zur Jüd. Alterthumskunde," p. 35). In Midrash Tanḥuma Bereshit, Hadrian is called "the King of Edom." The Talmudists, however, made an exception in favor of Antoninus Pius, whom they assured would attain paradise, because he had not acted in the manner of Esau ('Ab. Zarah 10b). 'Abodah Zarah 10a, however, explaining Obadiah, verse 2, says that Edom had neither written nor spoken language. This is inconsistent with its application to Rome. See TEMAN.

Use of Name.

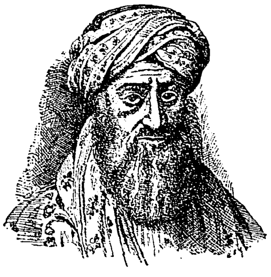
G. M. SEL.

EDREHI, MOSES: Moroccan cabalist and teacher of modern and Oriental languages of the earlier part of the nineteenth century; born in Morocco; resided in Amsterdam and in England. He was the author of: "Yad Mosheh," sermons for the festivals, Amsterdam, 1809, "Ma'aseh Nissim," an account of the River Sambatyon, London, 1834 (of this a Hebrew and a German edition appeared at Amsterdam, 1818); "An Historical Account of the Ten

Tribes, Settled Beyond the River Sambatyon in the East," London, 1836. Edrehi was a firm believer in the existence somewhere in western Asia of the Ten Tribes.



Moses Edrehi.

Edrehi appears to have been in Edinburgh in 1829, for in June of that year there appeared in "Blackwood's Magazine" one of Christopher North's "Noctes Ambrosianæ," devoted in large measure to Edrehi's peculiarities. His long beard and Oriental costume, and the mixture of tongues he employed to convey his meaning, are all adverted to with kindly humor.

EDREI: Ancient city in the Jordan valley, at present Der'at, southeast of Muzerib. The city is apparently mentioned as "Otara" in Egyptian inscriptions. In the Old Testament Ashtaroth and Edrei are referred to as the capital cities of King Og (Josh. xii. 4, xiii. 12). According to Num. xxi. 33 and Deut. i. 4, Og was defeated in a battle at this place. Edrei is mentioned as a boundary of the Israelitish conquests (Deut. iii. 10) and as situated in the territory of Manasseh lying beyond the Jordan (Josh xiii 31). Then the city disappears from historical notice, and it is met again only in post-Biblical times After Pompey's conquest of the land, the city belonged to the Roman province of Syria, later to the province of Arabia. Eusebius calls it "Adraa." It was the seat of a Christian bishop. Part of the Jews whom Mohammed drove from Medina came to "Adra'at," as the Arabs called the city. In the history of the Crusades, "Adratum" is spoken of. The present comparatively populous city contains few ruins, as the old city was completely destroyed. A great Roman aqueduct ran from the city to Mukes. Extensive subterranean dwellings, forming an entire city. are one of the remarkable features of Der'at.

EDRIS. See ENOCH IN ARABIC LITERATURE.

EDUCATION.—Biblical and Pre-Talmudical Data: The moral and religious training of the people from childhood up was regarded by the Jews from the very beginning of their history as one of the principal objects of life. Of Abraham the Lord says: "I have singled him out [A. and R. V. "known him"] to the end that he may command his children and his household after him that they keep the way of the Lord to do justice and judgment" (Gen. xviii. 19, Hebr.). All the festivals and ceremonies have for their object the inculcation of religious and moral lessons in the children (Ex. xii. 26 *et seq.*; xiii. 8, 14; Deut. iv. 9 *et seq.*; vi. 20 *et seq.*; xxxii. 7, 46). Especially are the fundamentals of the faith coupled with the admonition to teach the children and bring its truths by words and signs constantly and impressively to their consciousness (Deut. vi. 7, ix. 19).

The whole Law was at an early stage utilized for public instruction. The Deuteronomic law, whatever its contents were, was to be written "very clearly" on large stones on the highways, that all the people might read (Deut. xxvii. 1-8); and while each king or leader was to keep a copy of the Law and read therein all the days of his life (Deut. xvii. 18; comp. Josh. i. 8), all the people, "the men, women, and the little ones," were to assemble every seventh year at the close of the Sukkot festival to hear and to learn the Law. Out of this Biblical ordinance was evolved the custom of completing one consecutive reading of the Pentateuch at the Sabbath services within every three years (probably seven originally, later three and one-half, finally one year: Schürer, "Gesch." 3d ed., ii. 455; see PENTATEUCH and LITURGY). This custom, however, of reading the Law every Sabbath in public is so old that Josephus ("Contra Ap." ii. 17; "Ant." xvi. 2, § 4), Philo ("De Septennario," 6), and Eusebius ("Præparatio Evangelica," viii. 7, 12) assign its origin to Moses (comp. Acts xv. 21).

At any rate "Torah," denoting originally "Law" (Ex. xxiv. 12; Lev. vi. 2, vii. 1, xxvi. 46), assumed in the course of time the meaning of "religious teaching" (Deut. i. 5, iv. 44; Mal. ii. 7; Ps. xix 8; cxix. 71, 174; Prov. iii. 1, iv. 2, vi. 23, vii. 2), and religion to the Jew became the synonym of common instruction. For a long time the priests and Levites, as the keepers of the Law, were the main instructors of the people (Deut. xxxi. 9, xxxiii. 10; Jer. ii. 8, xviii. 8; Mal. ii. 6; II Chron. xvii. 7; Book of Jubilees, xxxi. 15). According to ancient rabbinical tradition, the tribe of Issachar produced many teachers of the Law (Gen. R. lxxii., xcix.; Sifre, Debarim, 354, based on I Chron. xi. 33); also the descendants of Jethro the Kenite are singled out as teachers (Mek., Yitro, 2; Ab. R. N. xxxv., after I Chron ii. 55).

The recital of the chapters Shema' and Wehayah Im Shamoa' (Deut. vi. 4-9, xi. 13-21) in the daily liturgy instituted by the founders of the Synagogue impressed each father with the obligation of teaching his children. Josephus ("Contra Ap." i. 12, ii. 18-25; "Ant." iv. 8, § 12), and Philo ("Legatio ad Caium," 16, 31) point with pride to the fact that Jewish children were from earliest childhood instructed and trained in the Law and the traditions of their fathers. The Books of Wisdom contain many pedagogic rules. Father and mother are regarded as the child's natural instructors (Prov. i. 8, iv. 1, vi. 20, xiii. 1, xxxi. 7; Ecclus. [Sirach] xxx. 1-13); "fear of the Lord," as the chief part or beginning of knowledge (Prov. i. 7; comp ix. 10). The application of "the rod of correction" is often recommended (Prov. xiii. 24; xix. 18; xxii. 15; xxiii. 13; xxix. 15, 17), though to the intelligent reproof is better than a hundred stripes (xvii. 10). The chief admonition is to train the child at the right age (xxii. 6), and the child's life itself is to be a continual training (Prov. i. 2, 7, 8). The daughters probably remained under the supervision of the mother until their marriage (Cant. viii. 5).

From the hands of the parents, whose place in royal houses was taken by tutors (אומנים: II Kings x. 1, 5; comp. II Sam. xii. 25), the child passed into the hands of professional teachers (מורים or מלמדים: Prov. v. 13; Ps. cxix. 99), called also "the wise" (Prov. xiii. 21). The public teachers were also termed מבינים (Neh. viii. 7; Ezra viii. 16; I Chron. xxv. 8) and משכילים (Dan. xi. 33, 35; xii. 3). The pupils (למודים, Isa. viii. 16, liv. 13; or תלמידים, I Chron. xxv. 8) were addressed as "children" (Ps. xxxiv. 12; Prov. i. 8; Ecclus. [Sirach] ii. 1; iii. 1, 17, and frequently; see also DIDACHE).

It is interesting to note that the commandment "teach them diligently to thy children" (Deut. vi. 8) was referred to the instruction of pupils (לבניך אלו תלמידיך) at a time when the propagation of the Law was made the chief aim of life (Sifre, Debarim, 34; comp. Abot i. 1-2; Peah i. 1), and the synagogues were called "places for instruction" (Philo, "De Vita Moysis," iii. 27). It is quite characteristic of Judaism that the prophetic ideal of the future is of the time when "the earth shall be full of the knowledge of the Lord as the waters cover the sea" (Isa. xi. 9), when all will know the Lord, "from the least of them unto the greatest of them" (Jer. xxxi. 34). The time of King Hezekiah was believed to be of this kind, when men, women, and children alike studied and knew the Torah (Sanh. 94b).

How old the institution of the בית המדרש, or schoolhouse, is, first mentioned in Ecclus. (Sirach) li. 23, it is difficult to say (see BET HA-MIDRASH).

E. G. H. K.

——**In Talmudical Times:** The period of book-learning or of the scribes ("soferim") has received its name from the practise of transcribing and commenting on the Book of the Law. In the latter years of the kingdom of Judah, and more especially under the discipline of the Exile, the religious teachings and the moral principles of the Law and the Prophets had assumed definite shape as the belief and religion of the people. After the end of the Exile it became necessary to preserve these teachings and the documents containing them. The education of the people passed from the hand of the prophet into those of the scribe or "sofer" (Mal. iv. 4). This period is introduced by Ezra the Scribe, who is extolled as the "restorer of the Torah" (Suk. 20a); and just as a band of disciples gathered around Samuel, so men gathered around Ezra, who, following Samuel's example, read the Law to the people distinctly and explained its meaning (Neh. viii. 5 *et seq.*). Ezra belonged to the priestly caste, to whom the task of education fell from this time forward, "for the priest's lips should keep knowledge, and they should seek the law at his mouth: for he is the messenger of the Lord of hosts" (Mal. ii. 7). Indeed, the body of scribes came from among the Levites (Neh. *l.c.*; II Chron. xxxv. 3, where the educational activity of the Levites is by an anachronism transferred to an earlier period). The men thus engaged are designated as מבינים or משכילים, *i.e.*, expounders of the Torah. Here for the first time in Jewish history is an organized body of teachers. The Prophets had been replaced by the priests; these in turn were succeeded by the scribes, "the wise" (comp. B. B. 12a, חכם עדיף מנביא). The latter are described in Dan. xii. 3 as the teachers, המשכילים; "they that be wise shall shine as the brightness of the firmament; and they that turn many to righteousness, as the stars for ever and ever." The Talmud refers the second clause to the teachers. The study of Scripture grew to be the central point of the life of the people, and divided them into two classes, the erudite scribe ("ḥakam" or "ḥaber") and the unlettered class ("'am ha-areẓ"; compare Josephus, "Ant." i., end).

The Reform of Simon ben Sheṭaḥ.

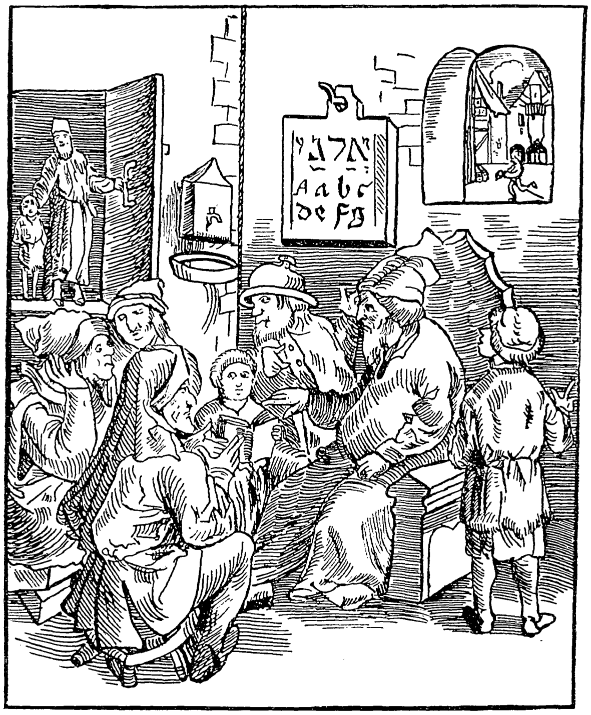
The scribes at first restricted their educational activities to adults, delivering free lectures in synagogues and schools (see BET HA-MIDRASH), while the education of children remained, as in olden times, in the hands of their fathers. But as boys often lacked this advantage, the state employed teachers in Jerusalem (B. B. 21a), to whose care the children from the provinces were entrusted; and as these did not suffice, schools were also established in the country towns. This arrangement must probably be referred to an ordinance of R. Simon b. Sheṭaḥ (Yer. Ket. viii., end), who was one of the presidents of the Sanhedrin during the last century of the Jewish state. These district schools were intended only for youths of sixteen and seventeen years of age who could provide for themselves away from home. The high priest Joshua b. Gamla instituted public schools for boys six and seven years of age in all the cities of Palestine, and on this account he was praised as the man who prevented teaching in Israel from being altogether neglected. It was said that no man who pretended to the title "Talmid ḥakam" ought to live in a place where there were no teachers for children (Sanh. 17b). One teacher was employed for every twenty-five boys. If the number reached forty, he was given an assistant ("resh dukna"; B. B. *l.c.*). Many rabbinical sayings indicate the extraordinary value placed by the Rabbis on education, on the school, and on the teacher. R. Eleazar b. Shamua' said:

> "Let the honor of thy pupil be as much to thee as thine own, and the honor of thy companion ["ḥaber"] as much as the reverence for thy teacher, and the reverence for thy teacher as much as the reverence for God" (Ab. iv. 12). "The study of the Torah outweighs all other religious commands" (Peah i. 1). "Touch not my anointed [Ps. cv. 15]: this refers to the school children; and do not offend my prophets: this refers to the teachers." "By the breath from the mouth of school children the world is sustained" (Shab. 119b). "Teaching must not be interrupted even for the reestablishment of the sanctuary in Jerusalem" (*ib.*). "Instruct thy son with the assistance of a good text" (Pes. 112a). "The advantage of reviewing is unlimited: to review 101 times is better than to review 100 times" (Ḥag. ix. 6). "As I have taught you without pay, says God, so must you do likewise" (Ned. 36a).

Education of Women.

The duty to give free instruction refers, however, only to teaching in the academies, not to elementary instruction. Women were excluded from this instruction. While, on the one hand, they were required to be taught the Torah, on the other hand it was said by R. Eleazar that he who instructs his daughter in the Law is like one who teaches her indecorous things (Soṭah iii. 4). Yet there were always educated, even learned, women. These principles obtained throughout the Middle Ages. Since religion entered into the whole sphere of life, as in determining the calendar, in agriculture, etc., astronomy and mathematics formed an integral part of instruction. Indeed, it is said that knowledge of these sciences reflected honor upon Israel in the eyes of the nations (Shab. 75a, with reference to Deut. iv. 6). Furthermore, it was the duty of a father to let his son learn a trade, not only that he might be able to support himself, but also because a one-sided intellectual occupation with the Torah was not considered to be conducive to success, but rather a drawback from a moral point of view (Ab. ii. 2; Ḳid. 29a). According to one opinion, a father was in duty bound to have his son taught even swimming (Ḳid. *l.c.*).

With the dissolution of the Jewish state, the Jewish system of education, while preserving intact its main characteristics, began to be differentiated according to the varying surroundings and outward circumstances of the Diaspora. In Egypt and in other countries along the Mediterranean, Judaism succumbed to Hellenism; but in Palestine the former conquered the latter so completely that after the destruction of the Temple the scribes formally banished Greek learning from the Jewish schools (Yer. Peah i.; B. Ḳ. 82b, 83a; Soṭah 41a; Men. 64b, 99b). But this uncompromising attitude toward "alien sciences" has never been adhered to either in principle or in practise. The Middle Ages furnish abundant proofs that the Jews took a large part in the culture and learning of the nations among which they dwelt.



German Jewish School of the Sixteenth Century.

(After a contemporary woodcut.)

Post-Talmudic Education.

Even after the dissolution of the Jewish state, Palestine remained for some time the seat of the patriarchy, and in consequence the center of Judaism. The most momentous achievement of that period was the final compilation of the Mishnah; and this became the foundation for all the lectures and discussions in the schools. Toward the end of the fifth century this compilation was edited under the name "Gemara" or "Talmud," and became the principal subject for study in the schools of the Diaspora. Babylon contributed largely to the work through its flourishing academies in Nehardea, Sura, and Pumbedita. The schoolhouse ("sidra," from which the presiding officer was called "resh sidra") was visited by hundreds of pupils, who listened all day long to the lecturer or to his interpreter ("meturgeman"). Gatherings, also ("kallah"), which attracted men from far and near, were held in the spring and the fall of the year. At these gatherings lectures were delivered, important decisions, or rules of conduct, were laid down, and rabbis were appointed with certain formalities and ceremonies, which served later as patterns for European universities (compare Jacob Alting, "Hebræorum Republica Scholastica," p. 122, Amsterdam, 1652). Discourses, also, called "rigle," were delivered on feast-days. Every community had, in addition to the higher schools ("metidtas"), preparatory or elementary schools (בית אולפנא; בית ספר; אסכולא=σχολή) under direction of elementary teachers (מקרי דרדקי; פדגוג=παιδαγωγός), where the children were taught the Hebrew alphabet and the Bible.

The influence of Arabian civilization in developing the scope of Jewish education is quite noticeable. From the middle of the seventh century the rector of the academy at Sura bore the title "Gaon." The Geonim, instead of condemning secular knowledge, considered it a means for advancing and completing Jewish religious thought (Grätz, "Geschichte," v. 268). It is fair to assume that at that time, and in the homes of the great scholars of those days, in both the Orient and the Occident, special attention was paid to the system of education. A proof of this is to be found in such works as the "Testament" of Judah ibn Tibbon of Granada (1120–1190), as well as in the twenty-seventh chapter of the "Cure of Souls," by Joseph b. Judah ibn Aknin of Barcelona (end of twelfth century). Both writings give in detail a number of rules for pedagogy and for the course of instruction to be followed in the schools. Joseph ibn Aknin lays down the following desiderata for the successful teacher. He must have complete command of the subject he wishes to teach; he must carry out in his own life the prin-

(In the Columbia University Library, New York.)

Qualifications of a Teacher.

ciples he wishes to inculcate in his pupils; he must exact no pay for his teaching; he must look upon his pupils as if they were his own sons, and treat them accordingly; he must train his pupils to lead an ethical life; he must not be impatient, but come to his pupils with a happy countenance; and he must teach his pupils according to the range of their intellectual abilities. The following order of studies to be pursued is recommended: reading, writing, Torah, Mishnah, Hebrew grammar, poetry, Talmud, philosophy of religion, logic, arithmetic, geometry, optics, astronomy, music, mechanics, medicine, and, lastly, metaphysics. Joseph also lays down rules which the pupils are to follow. They are to keep their bodies and souls pure; not to be ashamed to ask instruction in that in which they are ignorant; not to think of future gain or that their study has an ulterior object; to commence their studies by learning the elements and principles upon which science is built; to let no moment of the day or of the night pass in idleness; to make the acquisition of wisdom an end in itself; to leave their place of residence for some other place famous for its learning; and, lastly, to show their teachers even greater honor than their parents.

From the thirteenth century onward the "seven sciences" (שבעה חכמות), enumerated differently by various writers, comprised the prescribed curriculum among Jews as well as among Christians. Other authors who insist upon having education and teaching placed on a scientific basis are: Judah b. Samuel b. Abbas in his "Ya'ir Netib" (*c.* 1250); Shem-Ṭob b. Joseph Falaquera (died after 1290), especially in his didactic novel "Ha-Mebaḳḳesh"; Joseph Ezobi (*c.* 1250) in his didactic poem "Ḳa'arat Kesef"; and Profiat Duran of Catalonia (*c.* 1350) in the introduction to his grammatical work "Ma'ase Efod." Systematic Jewish education in Italy received like care and encouragement, due in part to the influence of scholars from Spain and Provence. Deserving of mention in this connection are: Jacob b. Abba Mari Anatolio of Provence; Zerahiah b. Isaac of Barcelona, who lectured at Rome; Kalonymus b. Kalonymus of Provence; and the native Italian Jews Judah b. Moses of Rome and the poet Immanuel. All these men, belonging to the thirteenth century, stimulated interest in the "alien sciences" and in the scientific treatment of Jewish literature. Numerous hints on pedagogy are scattered throughout their works. The "Book on Ethics," by Jehiel b. Jekutiel of Rome (1278), in which are found together with the moral teachings of the Rabbis maxims from Aristotle, Porphyry, Theophrastus, and the emperor Frederick II., gives the best view of the intellectual status of the Italian Jews of the period.

In Northern Europe.

Side by side with this scientific trend went the endeavor to guard Jewish education against the influences of the current culture in so far as it was a menace to religion. This was the special work of the Jews of northern France and of Germany, where their Christian neighbors also were backward in learning. This one-sidedness and concentration shaped the system of education and teaching for the Jews of northern France and of Germany. The so-called "Maḥzor Vitry" of Simḥah b. Samuel, a pupil of Rashi, describes (§ 508) how a child received its first instruction—a description that is supplemented by the contemporaneous "Sefer Asufot":

> On the Feast of Weeks, the day when the Law was proclaimed, the child was handed over to the school with especial ceremony. Having been bathed and dressed, the boy was taken to the synagogue at daybreak, and placed before the Torah, from which was read the passage for the day (the Decalogue, Ex. xix. 16 *et seq.*). Then he was led to his teachers. While on the way he was wrapped in a shawl or a cloak to guard him from the evil eye. The teacher took the child in his arms, and then set him down. After this he took a slab upon which were written the first four and the last four letters of the Hebrew alphabet and the sentences: "Moses commanded a law, even the inheritance of the congregation of Jacob" (Deut. xxxiii. 4); "Let instruction be my vocation"; and the first verse of Leviticus. This slab was placed at the head of the infant in his cradle when he was named; even in ancient times it was used for the first instruction with the idea that the slab which treated of the pure (the sacrifices) should first occupy the attention of the pure (the children). The teacher then pronounced slowly all the letters of the alphabet, the pupil repeating them. The last four letters were pronounced in their proper order as one word (קרשת), and also backward as one word (תשרק). The slab was smeared with honey, which the child might lick off and taste as it were the sweetness of instruction. There was also a honey-cake made of three kinds of fine flour, upon which were marked the Biblical verses Ezek. iii. 3; Isa. i. 4, 5: Ps. cxix. 9, 11, 12, 13, 34, 97, 130, 140.

There was also an egg inscribed with Biblical verses—a supposed preventive of forgetfulness. While reading the pupils were required to sway their bodies and to recite to a certain tune, which varied with the different parts of the Bible. The text was translated into the vernacular. The children soon advanced to the Mishnah and Talmud, so that at thirteen years of age a boy had attained a certain independence and was in a position to enter the yeshibah or academy. Here he listened to lectures on the Talmud remarkable for their depth and acuteness, and then took up the wandering life of the "baḥur," which resembles much that of the Christian bacchant or traveling scholar (see BAḤUR). The constant influx of new elements stimulated the teaching at the academies, and this again influenced the life of the Jewish congregation. A picture of this life is to be found in the "Book of the Pious," by Judah of Ratisbon. Compared with the surrounding Christians, the Jews are seen to have been in no wise inferior to them, but, on the contrary, somewhat superior because their intellects were sharpened by Talmudic studies. A Christian lay preacher, Sebastian Lotzer, refers to the advantage enjoyed by the Jews in being instructed in the Law from their youth. The medieval period ends in France with the expulsion of the Jews from that country in 1395; in Germany with the persecution of the Jews there in 1348; and in Spain and Sicily with the expulsion of the Jews therefrom in 1492.

The Wandering Scholar.

The ideas on education which the Spanish Jews carried with them were developed more freely in their new surroundings. In Italy especially, under the influence of the revival of learning, this was most apparent, as may be seen in the curriculum published by David Provenzale, in Mantua in 1564, for the educational institution which he had intended to found. This curriculum includes the Bible and the Talmud with the best commentaries, Hebrew grammar, Jewish philosophy, composition and calligraphy, Latin and Italian philosophy, medicine, mathematics, cosmography, and astrology. This shows the intellectual status of the Italian Jews and how they became the teachers of nearly all the Hebraists of the age of humanism. The Spanish and Portuguese Jews carried their educational ideas also into Holland. The school at Amsterdam, which Spinoza attended, was admired by Shabbethai Sheftel Hurwitz ("Wawe ha-'Amuddim," 9b) on account of its systematic arrangement, and was held up as a pattern to the congregations of Germany, Austria, and Poland. According to Shabbethai Bass, it comprised six classes, the curriculum being: (1) Hebrew reading, until the prayers were mastered. (2) The Pentateuch with the tonic accents. (3) Reading and translation from the Bible, with Rashi's commentary upon the weekly section. (4) The Prophets and the Hagiographa with the tonic accents. (5) Lectures on Hebrew grammar and discussions of halakic passages from the Talmud, the class being conducted in Hebrew. (6) The school proper, called "'Eẓ Ḥayyim," and presided over by the grand rabbi. The subjects taught in the school proper were the Talmud with Rashi and Tosafot, responsa and discussions on the code of Maimonides. The hours of instruction were from 8 to 11 A.M. and from 2 to 5 P.M., or until the afternoon service.

In Amsterdam.

The educational systems of the Jews in Germany, Austria, and Poland were defective in so far as the grading of classes was so arranged that pupils were instructed in the most difficult passages of the Talmud even before they had mastered the Bible, and were thus trained to excel in sophistic dialectics. Many rabbis declaimed against these conditions, which were not improved until the beginning of the nineteenth century, and then only gradually.

Eighteenth Century.

Even before Moses Mendelssohn, individual Jews had attained to the general culture of their time; for instance, the physician Tobiah Nerol, who was born in Metz, 1652, and who, by permission of the Elector of Brandenburg, had studied in Frankfort-on-the-Oder; the ichthyologist Bloch of Berlin; and others. Yet to Mendelssohn is due the general improvement of the Jewish educational system. He had many followers, who, as contributors to the Hebrew periodical "Ha-Meassef," were called "Meassefim," and were instrumental in raising their coreligionists to higher intellectual planes. In Austria especially, Hartwig Wessely's Hebrew circular letter, "Words of Peace and of Truth" (1782), in which he advocated general culture, justifying it from the standpoint of the Jewish religion, stirred up the Jews to carry out the suggestions of Emperor Joseph II. for improving their school system.

The actual systematic reorganization of the Jewish system of education and teaching dates from the founding of the following schools:

(1) The Jewish Free School of Berlin, founded in 1778 under the leadership of David Friedländer and Isaac Daniel Itzig. The following subjects were taught: German, French, Hebrew, business technology, arithmetic, bookkeeping, writing, and drawing.

(2) The Wilhelm School of Breslau, founded in 1791, but discontinued soon afterward.

(3) The Jüdische Haupt- und Freischule (Herzogliche Franzschule) of Dessau, founded in 1799 by an association of Jewish young men.

Modern Schools in Germany.

(4) The Jacobsonschule (day- and boarding-school) of Seesen in the Harz, founded in 1801 by Israel Jacobson (born in Halberstadt 1768, died in Berlin Sept. 13, 1828). The school is, in accordance with the intentions of its humane founder, a non-sectarian educational institution for boys. It is still flourishing, and was attended between the years 1838 and 1867 by 1,444 pupils, of whom 719 were Christians.

(5) The Real- und Volksschule der Israelitischen Gemeinde in Frankfort-on-the-Main (Philanthropin), founded in 1804 by Sigmund Geisenheimer. It was at first non-sectarian, but when the city came under Prussian rule the school was restricted to Jewish youth.

(6) The Samson'sche Freischule of Wolfenbüttel, including a boarding-school, founded in 1807 by Isaac Herz Samson. L. Zunz and M. Jost were prepared there for the university.

(7) The High School at Tarnopol in Galicia, founded in 1813 by Joseph Perl; its normal courses served as models for other normal schools of Austria.

General Compulsory Education.

Since the beginning of the nineteenth century the following governments have interested themselves in Jewish schools: Prussia, which introduced compulsory education (comp. L. Geiger, "Zeit. für die Geschichte der Juden in Deutschland," iii. 29 *et seq.*); Württemberg ("Mitteilungen der Gesellschaft für Deutsche Erziehungs- und Schulgeschichte," ix. 51 *et seq.*); Hanover, Bavaria, Baden, Hesse, etc. Since the emancipation of the Jews their children have entered the state or municipal schools, receiving religious instruction in the same way as the pupils of other denominations. In Austria the Jewish teachers of religion employed in the public schools have the same official standing as their Christian colleagues, which is not the case in Prussia. Besides this, Jewish children receive instruction also in special religious schools (Talmud Torah Schulen). The founding of Jewish elementary schools called for normal schools for Jewish teachers. In 1809 a teachers' seminary was founded at Cassel; others are in Berlin, Hanover, Münster, etc.

Education of Rabbis.

With this awakening to the need of general culture came the demand for scientifically trained rabbis. The following institutions provide such training: the Jewish Theological Seminary at Breslau, founded by Fränkel; the Institute for the Science of Judaism at Berlin; the Orthodox Rabbinical Seminary at Berlin; the State Rabbinical School at Budapest; the Jewish Theological Institute of Vienna. The last two institutions are supported, the first entirely, and the second partly, by the government. Similar institutions exist in Paris, London, Florence, Cincinnati, and New York (see SEMINARIES, RABBINICAL). As of old, larger communities support schoolhouses (בתי מדרש), where popular lectures on the Bible, the Talmud, and the Midrash are delivered.

In the eastern countries of Europe, in Russia, Rumania, and Turkey, Jewish education is in almost the same condition as it was prior to Mendelssohn; that is, those countries are given over to one-sided Talmudic study, and hold aloof from general culture (see ALLIANCE ISRAÉLITE UNIVERSELLE). The Russian government has founded rabbinical schools—for instance, at Jitomir—which furnish the officially recognized rabbis. More important, however, are the yeshibot. The rabbis who direct these are remarkable for their minute knowledge of the Talmud as well as for their antagonism to culture. In Rumania the Jews are not only curtailed in their civic rights, but their educational opportunities also are limited by the government. For education in other countries see PEDAGOGICS.

G. M. G.

——**Trade-Schools:** As soon as emancipation came there was a tendency among Jewish philanthropists to train their poorer coreligionists in handicrafts, though there were many difficulties in the way owing to the existence of the gilds. Thus, Jacobson wished to train Jews as artisans as early as 1805, and was encouraged by the government of Westphalia to do so, though he was informed that they would not be allowed to enter the gilds (Rülf, "Jacobson," p. 11). Notwithstanding this, many societies for the training of Jewish boys in handicrafts were formed; the earliest, so far as is known, being that established in 1793 at Copenhagen ("Orient," 1843, p. 58). This was followed at Cassel in 1802; and during the next fifty years general associations were formed in Prussia (1812), Bavaria (1830), Baden (1833), Saxony (1837), Hanover (1841), Hungary and Bohemia (1846); in many cases these general movements had been preceded by local associations, the success of which led to their spread.

Technical Training Among Jews.

In 1888 Baron de Hirsch gave large sums of money (2,000,000 gulden) for the training of Jewish artisans in Galicia and Bukowina. In the preceding year N. Händler of Leipsic had given 100,000 marks for a school for Jewish boys to be trained as artisans ("Allg. Zeit. des Jud." 1888, p. 505). In 1844–45 many private benefactors devoted their money to a similar purpose. In the former year H. Todesco founded a prize of 500 florins for every Jewish journeyman who completed his apprenticeship at Vienna ("Orient," 1844, p. 188), and D. Massaroni of Rome gave 2,000 florins to the Trabotti foundation to train each year two Jewish lads as watchmakers ("Allg. Zeit. des Jud." 1845, p. 654).

The following is a list of some towns and countries in which exist certain of the most effective associations that have helped to train Jews in handicrafts throughout Europe in the nineteenth century. Countries in which general institutions exist are indicated by italics.

A. Z. J. = Allgemeine Zeitung des Judenthums.

In more recent times the Alliance Israélite Universelle and the Anglo-Jewish Association have established technical schools as part of their regular work in the East, while it is the aim of most apprenticeship committees, attached to boards of guardians and other Jewish philanthropic institutions, to train in manual labor the lads entrusted to their care. See ALLIANCE ISRAÉLITE UNIVERSELLE; ANGLO-JEWISH ASSOCIATION.

EDUCATIONAL ALLIANCE. See NEW YORK.

EDUCATORE ISRAELITA: Monthly periodical founded by Giuseppe Levi, and published by him, in conjunction with Esdra Pontremoli, at Vercelli (1853–74). It advocated moderate Jewish reform, to be brought about by the cooperation of all communities. Luzzatto, Della Torre, Cantoni, Mortara, and Benamozegh were among its contributors. After Levi's death in 1874 the periodical was continued in Casale by Flaminio Servi under the title Il VESSILLO ISRAELITICO.

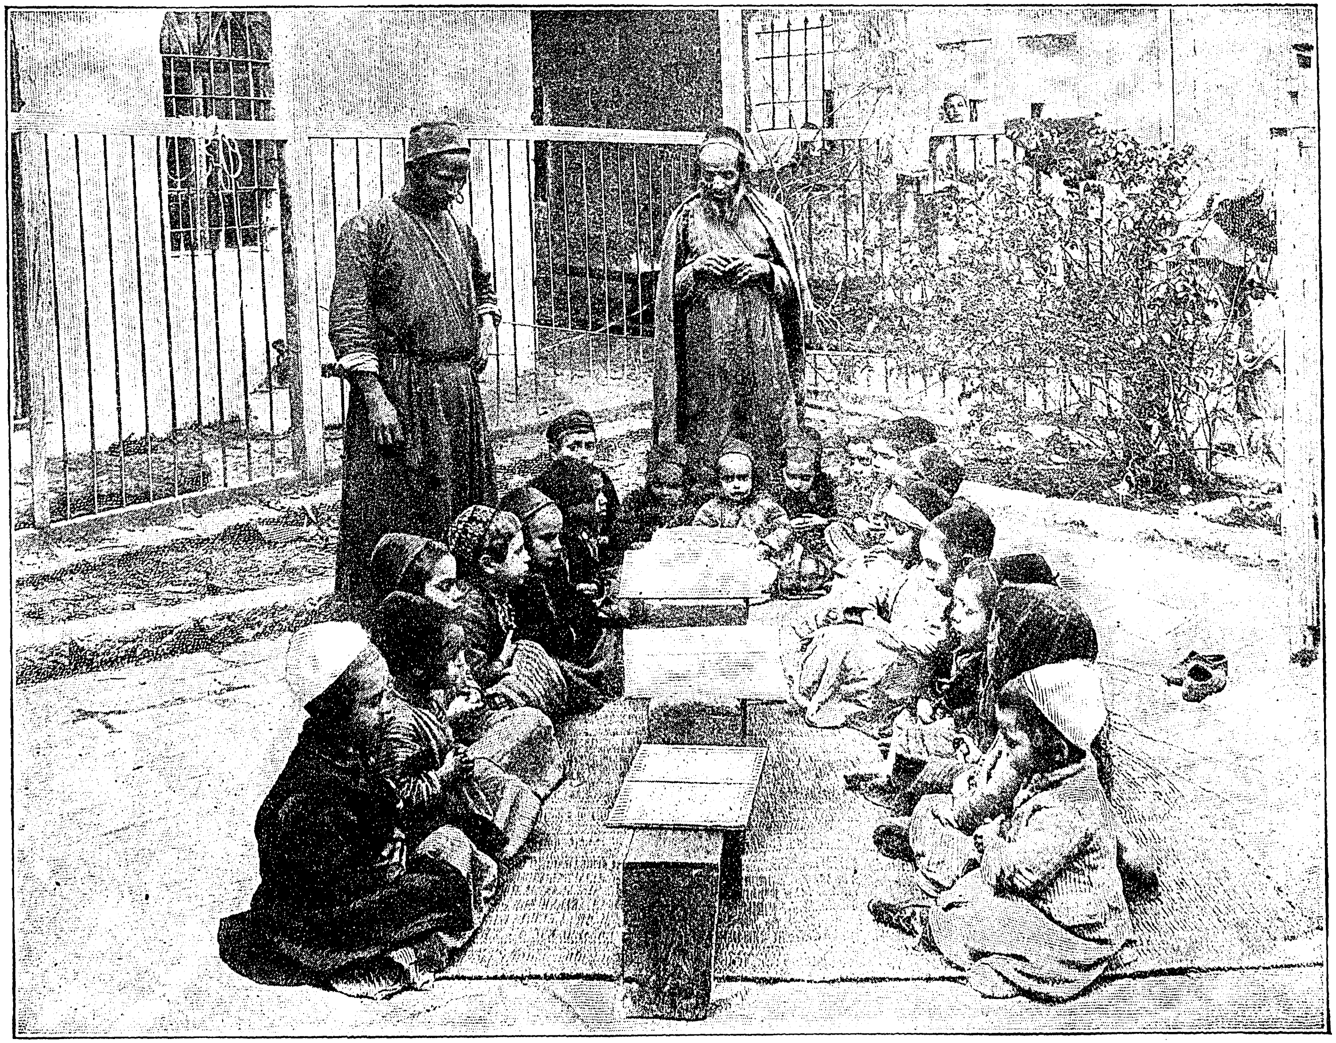
'EDUYOT ("Evidences" of the sages on ancient halakot; called also **Beḥirta** ["Choice" of halakot]): The seventh treatise in the order Neziḳin of the Mishnah. When, after the destruction of the Temple, it became necessary, through the removal of R. Gamaliel II. from the office of patriarch, to decide religious questions by the will of the majority, there was produced, as the groundwork of the treatise 'Eduyot, a collection of unassailable traditions.



JEWISH SCHOOL AT JERUSALEM,
Showing Pupils Reading from Inverted Text.
(From a photograph in the possession of Nissim Behar.)

From time to time more material was added to this groundwork, until the treatise was concluded on the redaction of the whole Mishnah. There is no connection between the many subjects touched upon in the 'Eduyot; and an exhaustive discussion of each is not its purpose. Even the names of the sages responsible for the halakot provide but a loose thread of union.

Following is a synopsis of the longer portions of the treatise:

Contents.

Chapter i.: In 1-3 a matter of dispute between Hillel and Shammai is again brought up for consideration; namely, the chief rules to be observed in regard to niddah, ḥallah, and miḳweh. In 7-11 the schools bring forward various decisions relating either to Levitical purity or to priestly tithes ("ṭohorot," "zera'im"). In 12-14 a group of halakot is given in which the Hillelites incline to the opinion of the Shammaites.

Chapters ii. and iii.: Insertions in which Ḥanina, "the deputy of the high priest," reports concerning certain customs in the Temple and other precedents at Jerusalem (ii. 1-3). Each mishnah consists of three halakot, which were propounded by Ishmael or in his school, or by Akiba or in his house of learning (4-8); they are followed by two haggadic sentences of Akiba (9-10). In ch. iii. space is given to Dosa ben Harkinas, who was prominent in the disputes with Gamaliel; and matters relating to ṭohorot and zera'im are treated together with a marriage law. In 7-12 the thread dropped in ch. ii. is taken up again: it contains four questions disputed by Joshua; three by Zadok; four by Gamaliel (besides two groups of his teachings, each group consisting of three parts, which reconcile the conflicting opinions of the two schools); and three by Gamaliel's colleague, Eleazar ben Azariah.

Chapter iv.: Continues i. 12-14 by giving the exceptional cases. Here the Shammaites appear as putting a milder construction upon the Law than the Hillelites (1-12).

Chapter v.: Gives other halakot in which the Hillelites and Shammaites take a stand similar to that taken in the earlier chapters. These halakot are severally mentioned by Judah, Jose, Ishmael, and Eliezer (1-6).

Chapter vi.: The opinions of new colleagues of Jose, Joshua, and Eliezer are given in continuation of ch. iii., partly treating of the same subject (1-3).

Chapter vii.: Joshua and Judah again appear (1-7), and Gamaliel's halakot are given on the consecration of the new moon and of the leap-year, a subject of dispute at the time. In 8-9 the opinions of older colleagues are given.

Chapter viii.: The opinions of members of the house of Beteira (1, 3) and of important contemporaries and older teachers (2, 4) are presented; also a halakah of Akiba on a marriage law, already treated, and a statement of Joshua on the future mission of the prophet (5). To this the opinions of other teachers are added.

The tractate closes with an ethical teaching: "The wise men say, Elijah will not appear in order to draw some nigh and to keep others away, but in order to bring peace into the world: 'Behold, I will send you Elijah the prophet before the coming of the great and dreadful day of the Lord: And he shall turn the heart of the fathers to the children, and the heart of the children to their fathers' (Mal. iii. 23-24 [A. V. iv. 5-6])."

The space in this treatise allotted to each of the teachers is in proportion to his importance; and the frequent occurrence of Akiba's name is justified by the great conciliatory part which he took in the disputes of the time.

A synopsis of some of the insertions follows:

Insertions.

In i. 4-6 this question is put: "Why are not the names given of the authors of those halakot which are not accepted?" The answer is: "To show that after a clearer insight they withdraw their opinions and do not abide by them stubbornly; or they are used as sources to serve as precedents in certain cases." In v. 6 Akiba ben Mahalalel is cited as having firmly adhered to his opinion; but at his death he bade his son yield to the majority. In ii. 9-10 and viii. 6-7 are sayings to encourage the people for the loss of the Temple.

The Tosefta.

The Tosefta to 'Eduyot generally follows the order observed in the Mishnah. After the introductory halakot (Tosef. i. 1-3 = Mishnah i. 1-3) and the peace exhortations (Tosef. i. 4-6 = Mishnah i. 4-6), those cases mentioned in Mishnah i. 12 are taken up in which the Hillelites yield to the Shammaites (Tosef. i. 6), the disputes between the schools being omitted. Sentences follow (Tosef. i. 8-14 = Mishnah ii. 5-10) advising a wise and moderate limitation of individual opinions where certainty is lacking in cases of dispute. After a short selection from the third chapter of the Mishnah (Tosef. i. 16-18 = Mishnah iii. 3, 6, 7), consideration is given to the occasional milder constructions of the Shammaites and the severer ones of the Hillelites (Tosef. ii. 2-9 = Mishnah iv. 6, 7, 11; v. 1, 3-5). In Tosef. ii. 9, the exceptional opinion of Akabia (Mishnah v. 6, 7) is considered. Tosef. ii. 10 (= Mishnah vi. 3) and iii. 1 (= vii. 2) touch briefly upon the chief opponents of Gamaliel. Tosef. iii. 2, 3 (= Mishnah viii. 5) gives laws of purification which have reference to the position of Jerusalem after the destruction. The conclusion (Tosef. iii. 4) agrees with Mishnah viii. 7. Tosef. i. 7, ii. 1-2, and ii. 6 do not wholly fit into this treatise. The last paragraph is a fragment from the Mishnah of Eliezer ben Jacob.

In general, the Tosefta took as a basis a treatise which dealt only with the chief questions regarding the day called "bo ba-yom" (that day); but the Mishnah of 'Eduyot is of a wider range.

'EFA or ḤEFA: Rabbinic scholar of the fourth century. He was a native of Babylonia, who, although but few halakot and fewer haggadot are associated with his name, acquired considerable fame as belonging to "the ingenious scholars of Pumbedita" (Sanh. 17b; Men. 17a). His full name, which was "'Efa b. Raḥba," appears once in the Babylonian Talmud (Sanh. *l.c.*); but in Yerushalmi he is always cited as "Ḥefa," without patronymic or title.

EFES, AFES, or PAS: Scholar of the third century; secretary to the patriarch Judah I. (Gen. R. lxxv. 5), and one of the last tannaim. After Judah's death, while Efes conducted a college in southern Judea, on account of which he was called "Efes (in Yerushalmi, "Pas") Daromi" (Yer. Ta'an. iv. 68a; Eccl. R. vii. 7), he was made principal of the academy at Sepphoris, although the dying patriarch had ordered the appointment of Ḥanina b. Ḥama to that position. The latter refused to supersede Efes, who was his senior by two years and a half (Shab. 59b; Ket. 103b; compare Yer. *l.c.*; Eccl. R. *l.c.*). Hosha'yah Rabba was one of his disciples, and reported in his name several haggadic remarks, among them one bearing on Isa. lx. 3 (Hebr.): "Nations shall walk by thy light," from which he argues that Jerusalem will in the future become a torch by the light of which people will walk (Pesiḳ. xxi. 144b). Hosha'yah reports also a civil law in Efes' name (Yer. Yoma v. 43a); and Simeon b. Laḳish applied to him for information on a ritualistic point ('Er. 65b; Yer. 'Er. iv. 23c).

Efes did not survive Judah I. many years. He was succeeded by Ḥanina b. Ḥama.

EFODI. See Duran, Profiat.

EFRATI, AMRAM BEN NATHAN: Rabbi of Valencia in the second half of the fourteenth century. He was a contemporary of Nissim b. Reuben, rabbi of Barcelona, and of Simeon b. Ẓemaḥ (RaSHBaẒ), whom he consulted on rabbinical questions. He occupied the rabbinate of Valencia for more than forty years. Efrati was held in high esteem by his contemporaries, notwithstanding the fact that at the very outset of his career he had had occasion to attack certain powerful members of his community whose actions had given public offense. He enjoyed the reputation of being a great Talmudist and mystic, and was credited with a knowledge of secular sciences also. He seems to have been opposed to casuistry. In his decisions there is good reason to suppose that he largely followed Maimonides. Toward the end of his life there came to Valencia Ḥasdai b. Solomon, a distinguished casuist, who endeavored to defame Efrati and attacked him openly. Efrati's literary remains consist only of a few responsa, which are to be found in the collection of Isaac b. Sheshet.

EGER (Czech, **Cheb**): Bohemian town, on the right bank of the River Eger. The population of Eger in 1890 was 17,148, including 508 Jews. The oldest document mentioning the Jews is dated March 12, 1314, and refuses them permission to inhabit a new street near the monastery. They are again mentioned in a document of Oct. 23, 1322, in which the emperor Louis the Bavarian pledges Eger to John, King of Bohemia. Louis annulled all the debts of Abbot Griebel of Waldsassen to the Jews. At that time the Jews inhabited a special part of the city called "Unter den Juden."

About 1332, under Charles IV., many rich Jews settled in Eger, where they succeeded so well that in a short time the Jews formed one-fourth the population of the town. They had then a high school, a synagogue, a synagogue courtyard ("Judenhoff"), a house for the cantor, and a cemetery. Their wealth aroused the jealousy of the other inhabitants. The charges against the Jews at the time of the Black Death (1348) reached Eger on March 25, 1349; and in 1350 they were suddenly attacked by the mob, incited by a monk's preaching; nearly all were massacred, their goods appropriated, and their books taken to the town hall, whence they were sent to the Imperial Library of Prague. The street where this occurred still bears the name "Mordgässchen." On May 15 the citizens were absolved from all guilt in the matter by Charles IV. himself. It seems that the few survivors fled to Königsberg, a neighboring town, where they gave Jewish burial to many of the dead whom they had carried with them.

Some Jews returned to Eger shortly after this, for four "Judenmeister" (rabbis) are mentioned in 1352, and a tombstone of a Jewess, "Kele" (1353), is still to be seen. They repurchased from Albrecht Nothheft, the "Landvogt," their synagogue, school, and cemetery. This purchase was confirmed by Charles Nov. 6, 1364. On Jan. 25, 1379, King Wenzel formally declared that the Jews of Eger were his serfs ("Kammerknechte"), and that they could be summoned only before the royal judge of the town; they were thus protected against the injustice of the popular authorities. Two years later, May 5, 1381, he freed the Jews of Eger (together with other inhabitants) from taxes for five years in return for financial assistance. In 1390 he remitted all debts due the Jews. He included them in the safe-conduct given (1391) to the inhabitants of the city, so that they had protection within the empire and in Bohemia. Many documents of the fifteenth and sixteenth centuries evidence the jealousy aroused through their success by the "Jewish bread-thieves." In 1410 they had their own "Tanzhaus" in the "Judengasse."

In the fifteenth century, during the Hussite troubles, a deputation from Eger complained to King Sigismund (1430) that the Jews, on the strength of their old privileges, were not performing military service. The city council thereupon received permission (Oct. 3) to expel all the Jews. The synagogue became a chapel. But the council soon repented, and in 1434 received permission from Sigismund to allow as many Jews to enter the city as business interests demanded. A safe-conduct was given on Oct. 1. Each Jewish family was to pay fifty florins "Schutzgeld." In 1437 there were two families, in 1457 only three, the last with the express permission of King Podiebrad. In 1463 King George agreed to the request of the Senate to put the Eger Jews under the dominion of the city itself.

At the present time the community of Eger has three village dependencies, a synagogue, a cemetery, a ḥebra ḳaddisha, a society of synagogal chorists, and a woman's benevolent society. See Bohemia.

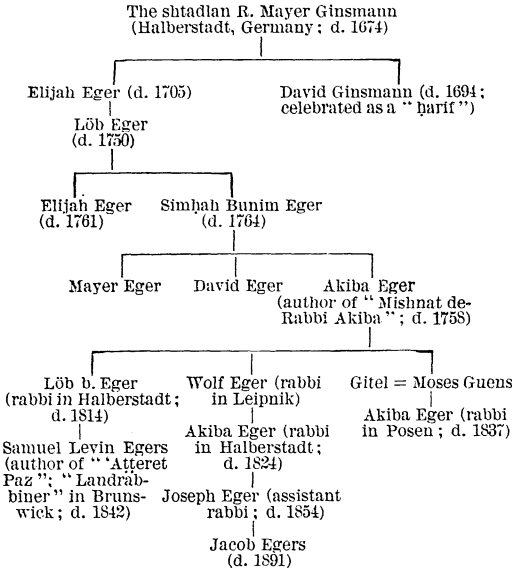
EGER or **EGERS:** A family established for a long time at Halberstadt, Germany. It appears to have been originally known by the name of "Gins" or "Ginsmann," by which appellation the first two definitely authenticated members, Mayer and David, are known. R. Akiba Eger of Posen, likewise called himself "Ginsmann" while in Friedland. To the same family probably belongs Jacob Egers, some-time teacher at the Training-School for Teachers in Berlin.

Biographical sketches of the foregoing and of some of the other important members of the family follow the subjoined pedigree:



The shtadlan R. Mayer Ginsmann (Halberstadt, Germany; d. 1674)
Elijah Eger (d. 1705)
David Ginsmann (d. 1694; celebrated as a "ḥarif")
Löb Eger (d. 1750)
Elijah Eger (d. 1761)
Simḥah Bunim Eger (d. 1764)
Mayer Eger
David Eger
Akiba Eger (author of "Mishnat de-Rabbi Akiba"; d. 1758)
Löb b. Eger (rabbi in Halberstadt; d. 1814)
Wolf Eger (rabbi in Leipnik)
Gitel = Moses Guens
Samuel Levin Egers (author of "'Aṭṭeret Paz"; "Landrabbiner" in Brunswick; d. 1842)
Akiba Eger (rabbi in Halberstadt; d. 1824)
Akiba Eger (rabbi in Posen; d. 1837)
Joseph Eger (assistant rabbi; d. 1854)
Jacob Egers (d. 1891)

BIBLIOGRAPHY: Auerbach, *Gesch. der Israelitischen Gemeinde Halberstadt*, pp. 32, 33, 142, 1866.

J. H. GUT.

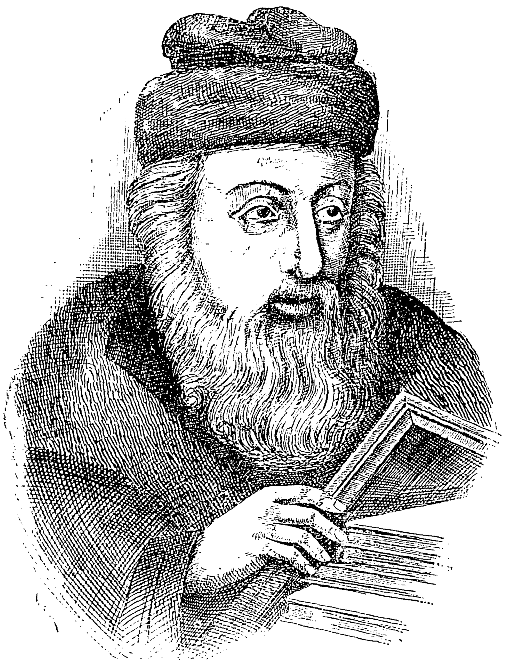
Akiba Eger (Eiger) the Younger (Akiba ben Moses Guens): German rabbi and champion of Orthodoxy; born at Eisenstadt, Hungary, Nov. 8, 1761; died at Posen Oct. 12, 1837. Akiba's mother, Gitel, whose family was probably from the Bohemian city of Eger, was the only daughter of Akiba Eger (d. 1758), formerly rabbi of Presburg, whose name was taken by his grandson, Akiba ben Moses Guens. At an early age Akiba showed great proficiency in Talmud, so that his uncle, Wolf Eger, later rabbi of Leipnik, took him under his care at Breslau. Akiba distinguished himself so highly that the wealthy Itzig Margalioth of Lissa gave him his daughter Glueckche and provided for his needs. He refused to accept a rabbinical position, his idealistic nature being repelled by the idea of deriving material benefit from the study of the Law. The great conflagration which destroyed Lissa in 1791 impoverished his father-in-law and forced Eger to accept the rabbinate of Märkisch Friedland in West Prussia. His noble and self-sacrificing character and his great Talmudic learning made him universally beloved, and won for him an international reputation among orthodox Jews. He repeatedly expressed a desire to resign his charge and to accept a position as teacher, or a small stipend from wealthy patrons of a bet ha-midrash, in order to escape from the religious responsibilities of the rabbinical office, but remained in deference to the entreaties of his congregation and family. When his daughter Sorel married Moses SCHREIBER in 1813, he allowed his son-in-law to present his name as a candidate to the congregation of Triesch (Münz, "Rabbi Eleasar, Genannt Schemen Rokeach," p. 143, Treves, 1895). For unknown reasons the change was not made, but a year later he was called to the important rabbinate of Posen. From that time his real public activity began, and lasted till his death twenty-five years later.

Spiritual and Religious Activity.

Eger's Talmudic learning moved altogether in the paths of the dialecticism common among the rabbis of the eighteenth century. An example is given by O. H. Schorr in "He-Ḥaluẓ," ii. 29. His mode of thinking on such subjects may be judged from the following quotation:

> "I saw an admirable explanation of a Talmudic saying in the "Emeḳ ha-Melek.' 'The Talmud says (Ḥul. 69a): "Because Abraham said, Neither a thread nor a shoe-latchet (Gen. xiv. 23), his descendants were privileged to wear the thread of the ẓiẓit and the strap of the tefillin.' As the strap of the tefillin, wound about the left arm, corresponds to the shoe-latchet, it is proper that we should tie the latchet of the left shoe first" (Notes on Shulḥan 'Aruk, Oraḥ Ḥayyim, p. 1, Berlin, 1862).

In casuistry he was of the ultra-rigorous type. In a circular, published both in Hebrew and in German, he appealed in the most solemn terms to his colleagues not to allow the use at Passover of alcohol made from potatoes. He prohibited the writing of a bill of divorce upon parchment originally manufactured for use as a scroll. It should, however, be added that in his decisions he was guided by humanitarian views, and allowed many things, otherwise forbidden, out of consideration for the poor and the widow.



Akiba Eger the Younger.

Eger was naturally a strict opponent of Reform, and declared the slightest change in the order of service inadmissible: "If one disturbed only the one-thousandth part of the words of our Rabbis in the

Talmud the whole Torah would collapse" (see "Eleh Dibre ha-Berit," p. 27, Altona, 1819). He was also opposed to secular learning, and one or two hours a day for that purpose was the utmost concession he would make to the government when compulsory secular education of Jewish children was introduced into Prussia. He accordingly rebuked Solomon Plessner, though somewhat mildly, for having advocated secular schools for the Jews in place of the ḥeder (Elias Plessner, "Biblisches und Rabbinisches aus Salomon Plessner's Nachlass," Hebr. part, p. 13, Frankfort-on-the-Main, 1897). Though when measured by modern standards Akiba Eger appears extreme in his views, compared with his contemporaries, and especially with his son-in-law Moses Sofer, he presents really one of the mildest types of Orthodoxy. In spite of an extremely delicate constitution he often spent whole nights at the bedside of the sick, and his conduct during the cholera epidemic of 1831 was recognized by Frederick William III. in a special royal order addressed to the chief of the province.

His Works.

Of his works the following have been edited: "Ḥilluka de-Rabbanan," notes on Nissim Gerondi's novellæ to Baba Meẓi'a, Dyhernfurth, 1822; Responsa, Warsaw, 1834, reprinted with additions, *ib.* 1876; "Derush we-Ḥiddush," novellæ on various Talmudic treatises and homilies, *ib.* 1839; Glosses on the Talmud, printed in the editions of Prague, 1830–34, and Warsaw, 1860–63; Tosafot, glosses on the Mishnah, in the editions of Altona, 1841–45, and Warsaw, 1862–67; "Ḥiddushe Rabbi Akiba Eger," notes on various Talmudic treatises, Berlin, 1858; Notes on the Shulḥan 'Aruk, Yoreh De'ah, in the edition of Königsberg, 1859; Notes on Shulḥan 'Aruk, Oraḥ Ḥayyim, edited by Abraham Bleicherode, Berlin, 1862; Notes on Shulḥan 'Aruk, Ḥoshen Mishpaṭ and Eben ha-'Ezer, edited by Nahum Streusand, Thorn, 1869; a further collection of Responsa, edited by Isaac Caro, Vienna, 1889.

Bibliography: Kaempf, *Biographie des Hochberühmten Hochseligen Herrn Akiba Eger, Oberrabbiner zu Posen*, etc., Lissa, 1838; R. I. Fürstenthal, *Ebel Yaḥid, Trauergedicht auf den Tod des R. Jacob Moses Eger*, Breslau, 1838; *Toledot R. Akiba Eger*, by his sons Abraham and Solomon, in the Berlin edition of his notes on Oraḥ Ḥayyim, 1862, reprinted, Warsaw, 1875. From the latter Solomon Sofer's (Schreiber) *Ḥuṭ ha-Meshullash* (Pacs, 1887) is largely taken. Eger's ethical will has been published, together with that of Jacob Lissa, under the title *Ẓawwa'ot ha-Geonim*, Warsaw, 1875.

J. D.

Akiba Eger the Elder of Presburg: German rabbi; born at Halberstadt about 1720; died at Presburg Sept. 17, 1758. When he was twenty years old he had a dispute on Talmudic matters with Meïr, chief rabbi of Eisenstadt. In 1749 he was elected rabbi of Zülz (Silesia), and in 1756 was appointed assistant to Rabbi Moses Ḥarif of Presburg. Eger was the author of "Mishnat de-Rabbi Akiba," novellæ on several treatises of the Talmud, Fürth, 1781; and of several Responsa, published in the "Bene Ahubah" of Jonathan Eybeschütz, Prague, 1819.

Bibliography: Steinschneider, in Ersch and Gruber, *Encyc.* section i., part 67, p. 345; Fränkel, in *Orient, Lit.* 1848, col. 15; Neubauer, in Berliner's *Magazin*, i. 43; Auerbach, *Gesch. der Israelitischen Gemeinde Halberstadt*, pp. 33, 71.

L. G. M. Sel.

Jacob Egers: German scholar and educator; born at Halberstadt Jan. 18, 1834; died at Berlin Nov. 17, 1891. He was for more than twenty years a master at the Training-School for Teachers ("Lehrerbildungsanstalt") in Berlin.

He published the diwan of Abraham ibn Ezra together with the latter's secular poetry and allegory, "Ḥai ben Meḳiẓ," Berlin, 1886, some parts of which were translated into German by D. Kaufmann; and two poems of Solomon ibn Gabirol with notes in the "Zunz Jubelschrift," Hebr. part, pp. 192–200.

Bibliography: *Oester. Wochenschrift*, 1891, p. 886.

S. M. Sel.

Löb b. Akiba Eger: German Talmudist; died at Halberstadt 1814. In 1775 Eger was appointed rabbi of the community in succession to his late teacher, Isaac Schwanfeld. He devoted his whole energies to furthering Talmudic studies in his native city, his yeshibah in consequence achieving a high reputation. In collaboration with his brother Wolf he published supplementary notes to his father's work, "Mishnat de-Rabbi Akiba." A funeral oration delivered by Eger on the death of Frederick the Great (1786) gives proof of his oratorical attainments. A few of his sermons have been preserved in manuscript. Some of them denounce the fashions then coming into vogue, especially the wearing of jewelry by women; others warn against buying Christian sacred vessels, even when offered by the clergy.

L. G. A. Pe.

Nathan ben Abraham Eger: Bohemian Talmudic scholar; lived at Prague in the second half of the seventeenth century. He was the author of "Gan Naṭa'," a commentary on the Shulḥan 'Aruk, Oraḥ Ḥayyim, Prague, 1695, and often reprinted.

Bibliography: Wolf, *Bibl. Hebr.* iii., No. 1723c; Steinschneider, *Cat. Bodl.* col. 2035.

L. G. M. Sel.

Samuel Levin (Perez Sabel) Egers: German Talmudist; born in Halberstadt June 9, 1768; died in Brunswick Dec. 3, 1842. He was one of the most brilliant pupils, and afterward an assistant, in his father's yeshibah. In 1809 he was appointed rabbi of Brunswick, and filled this position until his death.

Egers was not adverse to the introduction of reforms; thus he founded in 1828 an "Elementarschule" in Brunswick; and three years later he introduced the confirmation of boys and girls.

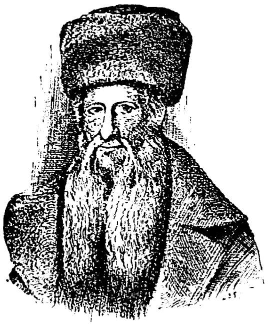
In 1836 Egers became blind; but in spite of his severe sufferings he did not relax his labors. In 1842 he gave his assent to a plan to render the synagogue service shorter and more intelligible.

Egers' works include: "Aṭṭeret Paz," novellæ on Beẓah; "Rimmon Pereẓ," novellæ on Ketubot, Altona, 1823; besides several homilies.

Bibliography: Herzfeld, in *Allg. Zeit. des Jud.* 1842, pp. 412, 461, 762, Suppl. to 1843; Zunz, *Z. G.* i. 242; Auerbach, *Gesch. der Israelitischen Gemeinde Halberstadt*, p. 103.

S. G. R.

Solomon ben Akiba Eger: German rabbi; born at Lissa 1785; died in Posen Dec. 22, 1852. In 1830 he became rabbi of Kalisch, Russian Poland, and on the death of his father (1837) he succeeded him in the rabbinate of Posen, which charge he held till the year of his death.



Solomon ben Akiba Eger.

His published works are: notes on the work of R. Alfasi, Wilna, 1860; a biography of his father, Berlin, 1862; Notes on the Talmud, Wilna, 1880; Notes on the Shulḥan 'Aruk, Yoreh De'ah, Königsberg.

Wolf ben Akiba Eger: German Talmudist; lived in the second half of the eighteenth century. He was born in Halberstadt, and married the daughter of Joseph Teomim, the rabbi of Breslau, whereupon he took up his abode in that city. He conducted a school which attracted great numbers of youth possessed of a desire for Talmudical study. After 1780 he was called as rabbi to Leipnik, which position he held until his death. Together with his brother Löb he edited his father's "Mishnat de-Rabbi Akiba," and added to it a supplement of his own, Fürth, 1781.

EGESIPPUS. See Joseph b. Gorion.

EGGS (ביצה).—**Biblical Data:** The Old Testament refers to eggs of birds (Deut. xxii. 6) and of vipers (Isa. lix. 5, A. V., "cockatrice"), and to the well-known fact that the ostrich leaves the egg in the warm sand and allows it to come to maturity through the heat of the sun (Job xxxix. 14). The humane command is given not to take away the dam together with the eggs from the nest (Deut. *l.c.*). The custom of collecting eggs which had been left in the nest is made use of in the fine imagery of Isaiah (x. 14).

——**In Rabbinical Literature:** According to the Rabbis (Ḥul. 64a), the eggs of birds suitable for eating have one end oblate and the other pointed, and the white surrounds the yolk; whereas with the eggs of impure birds the ends are either both pointed or both oblate, while at times the yolk is outside the white. In the eggs of amphibious animals the yolk and white are intermingled. Impure birds may sit upon and hatch the eggs of pure birds, and vice versa (Ḥul. 138b). The male bird sometimes sits upon the eggs, as in the case of the partridge; according to some authorities both the eggs and the sitter may then be taken, though seemingly in opposition to Deut. xxii. 6 (*ib.*). The development of the egg proceeds from the chalaza of the oblate end, which is supposed to represent the original seed (Ḥul. 64b)—a mistake opposite to that of Aristotle, who traces the development from the chalaza of the other end. The strength of the shell was known to the Rabbis, who stated that it was used sometimes to support a bedstead (Beẓah 3b). The egg of the ostrich was sometimes used as a vessel (Kel. xvii. 14), and its membrane was used in medicine (Shab. 110b); the hen's egg was used as a liquid measure (Yoma 80a; 'Er. 83), of which 144 went to a seah. For the egg of the phenix see Bar Yokni. Unclean birds and their eggs are alike prohibited; therefore the above criteria are used in the halakic text-books (see Shulḥan 'Aruk, Yoreh De'ah, 66, 86).

——**In Jewish Ceremonial:** A roasted egg is included among the objects placed upon the Seder table on the eve of the Passover to represent the "ḥagigah," or burnt offering, offered at the three chief festivals (*ib.* Oraḥ Ḥayyim, 476). Eggs are also to be eaten first of all at the meal of the Seder, the reason given for this by some authorities being that all joyful occasions should have a touch of the mournful, as indeed the Ninth of Ab always falls upon the same day of the week as the first day of Passover (Isserles, *ad loc.*). Eggs mixed with ashes are used on the eve of the Ninth of Ab as a sign of mourning. It is possible that this identification of eggs and mourning is due to the fact that the mourners' meal always includes an egg, perhaps to suggest the idea of the resurrection, as some writers hold. Yet eggs are associated with the joyful festival of the thirty-third day of 'Omer, when they are used, like Easter eggs, to amuse children; the one custom is probably derived from the other. It is usually said that the egg at the Passover represents life and creative force, but this is not borne out by the common view given above. On the occurrence of the egg in creation-myths see Cosmogony.

——**Modern Superstitions:** In Russia a bride, to be blessed with children, carries an egg in her bosom while going to the ḥuppah. In the Orient the bride steps over a fish roe with the idea that this will give fecundity. He who gets the roasted egg of the Seder on the morning of the second day of Passover will be specially lucky, and will gain whatever he wishes while eating it. If you steal an egg you will have seven years of poverty, and after death your body will roll round in the grave. A childless woman who is lucky enough to find an egg with a double yolk will, if she eats it, surely bear children.

EGLAH ("heifer"): Mother of Ithream, David's sixth son (I Chron. iii. 3). The expression "wife of David" (II Sam. iii. 5) probably means the favorite wife of David. According to the Targum, Eglah is identical with Michal, the daughter of Saul, and David's favorite wife.

E. G. H. E. I. N.

EGLATH-SHELISHIYAH ("the third Eglah"): A place mentioned in ancient oracles against Moab (Isa. xv. 5, R. V.; Jer. xlviii. 34, R. V.), together with Zoar, Luhith, and Horonaim. It has been identified with the 'Αγαλλα mentioned by Josephus ("Ant." xiv. 1, § 4) in connection with Zohar as an Arabian town, while others have claimed it to be the Ajlun, a mountain range, district, and city north of Jabok. The former identification is the more likely. There must have been three places known as "Eglah" (= heifer), the ordinal numeral being added, as is also the custom in Arabic nomenclature, to distinguish them. Misled by the numeral, some commentators have argued that three horns of a mountain near Zoar were known as "heifers," taking the name as an appellative. Most of the commentators have translated "Eglath-Shelishiyah" as "the three-year-old heifer" (A. V., Targum, Rashi, Ḳimḥi, etc.). E. G. H.

EGLON: A king of Moab, who overcame the Israelites and captured the "city of palm-trees," by which is probably meant Jericho (Judges iii. 13). He held the Israelites in subjection for eighteen years, and they were then delivered by Ehud, who assassinated Eglon (*ib.* 15–26).

EGOTISM. See Altruism.

EGRA, MESHULLAM BEN SAMSON: Austrian rabbi; born in Galicia 1733; died at Presburg Sept. 21, 1785. Egra's father was of Buczacz, Galicia, but Meshullam Egra was at Brody as a boy of nine. At about that age he delivered a casuistic homily in the large synagogue of Brody, and had a discussion with its rabbi, Isaac Hurwitz, whose son-in-law he became. He was a contemporary of Sender Margoliouth, with whom he discussed ritual laws, and the master of Jacob Lissa, author of "Derek ha-Ḥayyim." Egra was at first rabbi of Tusmenetz, becoming rabbi of Presburg in 1775. He wrote "She'elot u-Teshubot RaMA" (the last word of the title being an abbreviation of "R. Meshullam Egra"), responsa, Czernowitz, 1862; and an unpublished work on Maimonides.

EGYPT.—Ancient and Biblical: The valley of the Nile north of the first cataract, having an area of 9,000–12,000 square miles of arable ground. Almost rainless, the country depends upon the inundations of the Nile and artificial irrigation (comp. Deut. xi. 10; Zech. xiv. 18), although the narrow valley and its triangular prolongation of alluvium, the Delta or Lower Egypt, possess an extremely fertile soil. Egypt had in early times a very limited flora, which, like its fauna, was of an entirely African character. The same may be said of its population, which, quite in agreement with Gen. x., formed a branch of the great white African or Hamitic family.

Tradition has preserved the recollection of the early division of Egypt into two kingdoms, (*a*) that of the red crown in the north, whose capital was Buto, and (*b*) that of the white crown in the south, with its capital at Eileithyiaspolis, the modern El-Kab; and in literary style Egypt is always designated as "the two countries" (comp. "Miẓrayim," dual, but see below). Yet these formed one kingdom even before King Menes (about 3500 B.C.?), whom the later books of history considered as the first historical king. The division of the country into about thirty (thirty-six?; later, forty-two) nomes or counties points to a still more primitive period, indicating that many independent tribes may have inhabited the land.

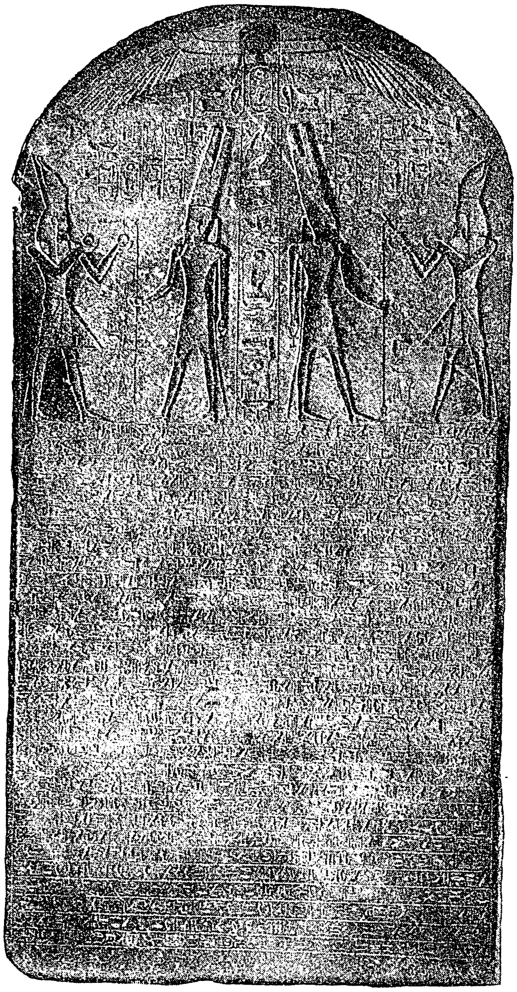
Some very primitive traits always adhere even to the later, highly developed culture. The clothing was remarkably scanty long after 3000 B.C.; and the scarcity of metals, although these were known very early, forced not only priests (in analogy with the old Israelitish custom referred to in Ex. iv. 25 and Josh. v. 2), but also sculptors, masons, and other craftsmen, generally to use stone implements nearly up to 1000 B.C. The religion above all remained most primitive: it never concealed that its hundreds of local divinities, its sacred animals, trees, and stones, had their most perfect analogy and origin in the fetishism or animism of the negroes, although even in prehistoric time higher ideas, partly of undoubtedly Asiatic origin (especially traits of that astral mythology of which the clearest expression is found in Babylonia), mingled with it. The language and the race remained very consistent.

The history of Egypt can be best divided after the system of Manetho, using his scheme of thirty royal dynasties from Menes to Alexander. Although these groups of kings do not represent genealogically correct divisions, and are often quite conventional, the uncertainty of chronology, especially before 2000 B.C., forces the student to use that arrangement. Dynasties 1–6 are called the ancient empire, dynasties 11–13 the middle empire, and dynasties 18–26 the new empire.

The Ancient Empire.

The tombs of Manetho's "Thinitic" dynasties 1 and 2 have recently been excavated near This-Abydos (see especially Petrie, "Royal Tombs," 1900 *et seq.*). Whether that of the half-legendary Menes is among them remains disputed, but some of the tombs may be even earlier. The arts and architecture were even then highly developed at the royal court; and that the system of hieroglyphic writing was perfectly established as early as 3500 B.C. is shown by the inscriptions. The residence of those ancient kings seems to have been partly at This, partly in the ancient capitals of Upper Egypt, the twin cities Hieraconpolis and Eileithyiaspolis. Less well known at present is dynasty 3, which moved the capital not far south of Memphis. The earliest known pyramid (in steps, because unfinished), near Saḳḳarah, was built by King Zoser of this dynasty, who seems to have first exploited the mines near Sinai, which furnished the copper for tools and weapons. Dynasty 4 (from about 2900?) is famous for the construction of the three largest pyramids, those of Cheops (Khufu), Chephren

(Kha'f-re'), and Mycerinus (Men-ka[u]-re') near Gizeh—monuments which the successors did not try to imitate. Snefru(i), the first king, seems to have waged extensive wars in Nubia and Palestine. From dynasty 5 remainders exist of several gigantic monuments in the form of huge obelisks (not monolithic!) on platforms, dedicated to the sun-god Re' (see PILLARS). In dynasty King Pepy (pronounced "Apopy"?) I. (*c.* 2450 B.C.) was a great builder; he founded Memphis proper. With dynasty 6 closes the period called conventionally the ancient empire. Of its literature only religious and magic texts (chiefly from the funerary chambers of the pyramids in dynasties 5 and 6; comp. Maspero, "Les Inscriptions des Pyramides de Saqqarah," 1894) have been preserved. Egyptian sculpture reached its acme of perfection at that time.



Syenite Stele of Amenophis III. with Added Inscription of Meneptah II. Mentioning the Israelites.

(From Flinders Petrie, "Six Temples at Thebes.")

The Middle Empire. After the sixth dynasty the centralization of the government broke down, and the nomarchs or counts became independent princes. The long wars which they waged over their possessions or the crown of the whole country, led to the establishment of two rival kingdoms, one (dynasties 9 and 10) at Heracleopolis, the other (dynasty 11) at Thebes. The younger Theban family finally united Egypt again under one scepter (*c.* 2150 B.C.?). Much more important is the 12th (Theban) dynasty (*c.* 2000 to 1800 B.C.) of seven kings—four of whom were called Amen-em-ḥe't, and three Usertesen (or Sa-n-usoret)—and a queen. The fertile oasis of Fa(i)yum was created by diking off (not excavating) the lake called "Moeris" (after Amen-em-ḥe't III.). Nubia to above the second cataract was conquered; but a powerful Canaanitish kingdom prevented conquests in Asia—only Usertesen III. records an expedition to Palestine.

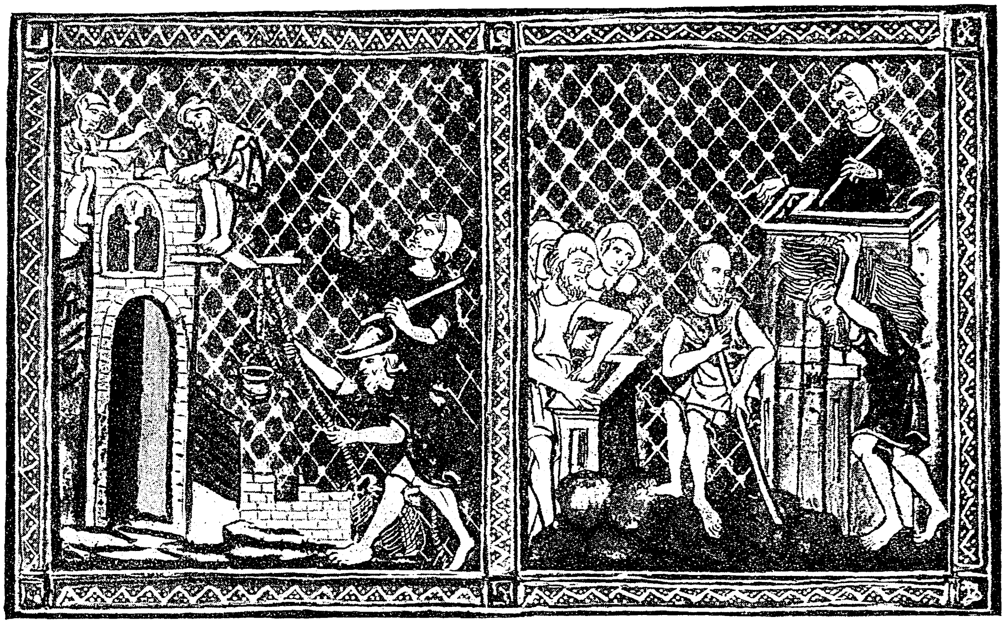
The following period (13th and 14th dynasties) soon developed the former decentralization, together with civil wars and anarchy. One hundred and fifty kings—*i.e.*, aspirers to the crown—are recorded. This explains the ability of a Syrian power, the so-called Hyksos (better "Hyku-ssos" = "foreign rulers," mistranslated "shepherd kings" in Manetho), to conquer Egypt (*c.* 1700?). On this family of (7?) rulers, in whose time, after Ex. xii. 40, the immigration of Israel into Egypt is usually assumed, see APÔPHIS. Most scholars consider them as Canaanites, somewhat after Josephus' confusion of "Hykussos" and "Israelites"; but it seems that those kings were of non-Semitic (northern?) origin (comp. "Mittheilungen der Vorderasiatischen Gesellschaft," 1898, p. 107). The nomarchs of Thebes revolted against the foreigners (*c.* 1620 B.C.?), and after a long struggle, especially around the stronghold of the foreigners, Hat-wa'ret (Auaris) (near Tanis?), expelled the Hykussos soon after 1600.

These circumstances gave to the new dynasty (the 18th) a warlike character.

The New Empire. Following the claims of their predecessors, its kings conquered and held about two-thirds of Syria; the north seems to have been under the control of the Mesopotamian kingdom Mitanni, and it withstood, therefore, the Egyptian attacks. Amosis (A'ḥ-mose) I. began those conquests. Amenophis (Amen-ḥotep) I. died after a short, peaceful reign. Thutmosis (Dhut[i]-mose) I. penetrated to the Euphrates (after 1570). Thutmosis II.'s reign was filled apparently with internal disturbances connected with the question of succession. Thutmosis III. (*c.* 1503) stood for twenty-two years under the control of his aunt (?) Ma'-ḳa-re or Ḥa't-shepsut (who has commemorated in her beautiful terrace-temple at Der al-Baḥri a commercial expedition to Punt, *i.e.*, the incense region east of Abyssinia). His independent rule is marked by fourteen campaigns, reaching as far as northern Mesopotamia, and by great constructions (the temple of Karnak, etc.). Amenophis II., Thutmosis IV., and, less successfully, Amenophis III. (*c.* 1436) maintained the Asiatic conquests; Ethiopia as far as Khartum had been subjected and, unlike

Syria, which was merely tributary, had been made a province by the first kings of dynasty 18.

Amenophis IV. (*c.* 1400) is a most interesting person. He attempted a great religious reform; making the sun-disk his chief god, and persecuting the cult of several gods, especially that of the Theban Amon, the official god of the empire, with such hatred that he even changed his royal name and his residence. At his new capital, the modern Tell el-Amarna, the famous archive of cuneiform despatches has been found, which shows him corresponding with all the important kings of western Asia, but unable to control his Syrian possessions owing to the great struggles which his innovations had caused in Egypt. After his death (*c.* 1383) his reforms were overthrown, especially by his fourth successor, Ḥar-em-ḥeb(e). The religion, mummified again, kept its deplorable state of confusion forever.



Israelites Building Storehouses for Pharaoh.

(From an illuminated haggadah in the possession of the Earl of Crawford.)

The 19th dynasty begins with Rameses I. (after 1350?). Sethos (Setoy) I. and Rameses II. maintained only the smaller half of Syria against the encroaching empire of the Hittites. Both were very active as builders; Rameses II. (the "Sesostris" of the Greeks, reigning 67 years from about 1330?) was undoubtedly the greatest builder of the Pharaohs, even after taking into account the many cases where he appropriated monuments already in existence. Under his son Me(r)neptaḥ (*c.* 1263?) occurs the first monumental mention of Israel apparently dwelling as a rebellious nation in Palestine. Ex. i. 11, on the other hand, seems to fix upon Rameses II. as the Pharaoh of the oppression (see Rameses), while Me(r)neptaḥ is generally considered as the Pharaoh of the Exodus. How to fit the new monumental data in with the Biblical chronology is yet an open question, there being no certain monumental evidence for Israel's stay in Egypt. Me(r)neptaḥ warded off a great invasion of Libyans allied with pirates from Asia Minor and Europe. The nineteenth dynasty ended with several short-lived, powerless rulers, among them a Syrian (officer?) as usurper.

The Ramesides.

Setnakht(e) reunited the country and established a new dynasty (the 20th) somewhat before 1200. His son Rameses III. tried to imitate Rameses II., especially as builder. He fought with the Libyans, who pressed more than before on Lower Egypt; with the northern pirates; with the Philistines, who had just settled in Syria; with the Amorites; and with small Hittite princes. His successors, the Ramesides (Rameses IV.-XII.), had short, inglorious reigns; Palestine and Phenicia were freed from the condition of an Egyptian dependency, which had been their lot for more than 400 years. The priesthood had become so wealthy by numerous donations that the royal power vanished, and finally the high priests of Thebes became kings. They had soon to yield to the twenty-first (Tanitic) dynasty (*c.* 1100). Its seven kings were hemmed in by their Libyan mercenaries, whose generals gained great influence. Therefore the Pharaohs were unable to interfere in Syria, where the Philistines were waging war. Solomon's Egyptian wife (I Kings ix. 16, 24; xi. 1) would seem to have been a daughter of the following ruler (comp. *ib.* ix. 16, which states that Gezer was her dowry).

Shoshenḳ I. (the Biblical "Shishak"), a descendant of Libyan generals, who founded the twenty-second or Bubastite dynasty (*c.* 950 B.C.), checked the Philistines, arranged the division of the Israelitish kingdom, evidently in favor of Jeroboam (comp. I Kings xi. 18), and ransacked Palestine (*ib.* xiv. 25; II Chron.

xii.). On the Edomite Hadad (I Kings xi. 17–22) see below. Shoshenḳ's successors, however—3 Shoshenḳs, 2 Takelots, 3 Osorkons (Wasarken), 1 Pemay—could not maintain this influence in Asia.

Muṣri and Mizraim.

After 800 B.C. Egypt was again practically divided into about twenty kingdoms ruled by the generals of the larger Libyan garrisons. The new kingdom of Ethiopia was thus able to occupy Thebes; about 750 the Ethiopian king P-ʿankhy even tried to conquer all Egypt. Only his grandson Shabako was, however, able to accomplish this and to subject the most powerful of the many princes, the ruler of Saïs and Memphis (Bocchoris or Bok-en-ranf, the son of Tef-nakhte), somewhat before 700. Neither he nor his successor Shabatako seems to have been able to interfere in Syria, finding it difficult to maintain Egypt. It has been shown conclusively by Winckler (especially in "Mittheilungen der Vorderasiatischen Gesellschaft," 1898, p. 1; comp. also Schrader, "K. A. T." 3d ed., p. 145) that the king So with whom Hoshea had conspired against Assyria (II Kings xvii. 4) was Sib'e, viceroy of Muṣri, *i.e.*, northwestern Arabia (not Mizraim-Egypt, cuneiform "Miṣri"), and that various other conflicts between Assyria and Egypt (?) refer rather to this Muṣri (which curiously had a king, Pir'u, formerly understood as "Pharaoh"). Few scholars, however, have accepted in all its conclusions the inference drawn from this, namely, that a great many Biblical passages originally refer to this Muṣri, not Mizraim-Egypt (thus Gen. xiii. 10; xvi. 1, 3; l. 11; I Sam. xxx. 13; II Sam. xxiii. 21; I Kings iii. 1, xi. 14 *et seq.*; Hadad's and Jeroboam's exile [see above]; and even Israel's servitude in Egypt).
